

Doomsday 881

Chapter 881: Update log happy and worried

When Di Ping came to the market, Dorothy was already waiting. The market has not been opened to the outside world. It is completely closed. Looking at the quiet market, he suddenly felt that it was a waste.

It's just that the base has just been built, and there are not many awakened people, and everyone just takes care of housing and clothing, so they have money to spend.

However, this situation will soon disappear. The points system will soon be implemented. Everyone has a salary, and then people will have surplus money in their hands, and the market can open up.

Recently, he has been busy with crystal nuclei and has not had time to consider the establishment of the points system, so he has not urged Liu Bingyu to ask about the development of the plan.

All the crystal cores obtained during this period were handed over to Doro to exchange them for crystal coins. At this time, he was still playing drums in his heart, wondering if the city wall could be built.

The robot even received the crystal core, and the exchange amount came out in a short while, a total of more than 3,700 pieces. When he saw this number, Di Ping's nervous heart finally let go.

He now has more than 8,100 in his backpack. After adding the current more than 3,700, there are nearly 13,000. According to his simple calculation, it should be enough to take 10,000. The entire base is circled.

With enough crystal coins, he went out of the market and returned to the main tower of the city. He decided to build the city wall during the day. This is not his way.

Originally, many people have guessed in private about the origin of this base, because many things here are like miracles, like huge castles, and many people around them know that there is no such castle in this community, but now they magically appear here. In front of everyone, how is it not strange.

And his warehouses, taverns, manors, etc., are not buildings that amaze many people, but they can't hide everyone's eyes, let alone block everyone's mouth. Although many people are silent, it does not mean There is no doubt in mind.

It's like Feng Ziming, who was good at thinking about persecuting Di Pingda's future. It's because he saw these magical things and he had greed in his heart and wanted to hold it for himself. Will deliberately attack Ye Lu, hoping to make a difference at the critical moment.

Unfortunately, he never had the chance. Until Wang Dequan came, he saw hope, and then conspired with Wang Dequan to obtain a base, but he kept his mind, because he knew Di Ping's mystery and power, so he let Ye Lu in front and he hid Behind the scenes.

It's a pity that in the end, the organs were exhausted, but Di Ping would return at a critical moment, killing everything, including his life.

Di Ping plans to build the city wall during the day, just to let everyone know about his immortal means, to frighten everyone to stop thinking about it. Now he has the power to protect his base from casual peeping, so he wants to show him to the world. The teeth are hideous.

Standing in front of the city lord's large French windows, looking down at the entire base, he felt a little excited, not knowing what the city wall would be like.

Once the city wall was established, he truly had a place of his own in the end times, no longer a small base for improvisation, with certain defensive capabilities, and a little confidence in the face of the increasingly dangerous end times.

"The system uses my crystal coins to build the wall to the maximum!"

Di Ping took a few deep breaths, settled the turbulent mood, and said in a deep voice.

"It's the host!"

The cold voice of the system that has remained unchanged for thousands of years came.

Chapter 882: First-class city defense gun

All the people in the sanctuary city suddenly felt their hearts sinking, feeling weak, as if something was going to happen.

Sure enough, the next moment it went dark, the sun in the sky was covered by rolling black clouds, and there was a sense of depression that was about to come by storm. Almost everyone stopped working and raised their heads to look at the sky.

When I felt something was wrong indoors, they walked out of the room and looked up at the sky. At this moment, everyone at the base was looking up at the sky.

Everyone had a look of surprise on their faces. How could a cloudless sunny day suddenly become densely covered with clouds? The billowing clouds seemed to appear out of thin air, covering the entire sky in an instant, covering the sky tightly. , It looks like a typhoon and heavy rain are coming.

We must know that there was heavy rain for a few days and nights some time ago, and many low-lying places were flooded. The rain was terrible. Will it come again?

Many people have such doubts in their hearts.

Click.....

Suddenly two blasts of thunder blasted in the sky, scaring many people a clever.

In the sky, two thunder snakes crossed the void, seeming to tear the sky apart, and the color of panic on everyone's face illuminated by the strong electric light was fixed. This thunder was terrible.

Even so, no one wants to enter the room. They are still staring at the sky, it seems that there is a mysterious voice calling them, this kind of strange telepathy.

But Di Ping didn't know. He stood in front of the city's main tower and kept watching the changes in the sky. The light on his face also illuminated his face. It was solemn and agitated. He knew that he was about to start after experiencing it many times. .

Click.....

The thunder sound became denser and denser, as if it had disturbed the thunder and lightning's lair. The endless thunder snake was rushing through the void, trying to break the dark clouds.

Immediately afterwards, a strong pressure from heaven and earth descended in panic. As the heaven descended, everyone felt their bodies sank, fear grew in their hearts, and more of awe. It seemed that at this moment, the heavens were standing in the void and staring at the underground beings. , Everyone in front of him can only be as small as ants.

There are many people who have already knelt down, chanting prayers to heaven, blessing them, and family happiness.

Among them, there are many elderly people, they are more awe of the heavens, and they believe more in ghosts and gods, and young people are much better, and they can still withstand the fear in their hearts.

And Di Ping stood upright, he already felt the pressure, it seemed that the world was roaring in anger, this feeling made him very strange.

However, this time was not as pressured as the last time to build the transmission well. Last time, it seemed that the whole world was targeting him. Everyone's aura and coercion came to him and almost wiped out his mind. Fortunately, "Yuqing· The "True Jue" cultivation allowed him to break through one level of spiritual power, otherwise he would really be obliterated by the power of heaven and earth, and become a fool.

This time, although the momentum is still very strong, it is incomparable compared to the last time. Although the thunder snake is overwhelming and the dark clouds are over the city, it seems that the feeling of bluff is very strong.

This puzzled Di Ping, but it was not the time for him to think too much.

Boom boom boom...

Suddenly a louder thunder sounded, and then the thousands of thunder snakes and birds collided together. A dazzling thunder light exploded, as if a nuclear bomb exploded. The originally gloomy sky was instantly bright as daylight, and everyone was violently The light stabbed and couldn't help closing his eyes.

"Look at what it is?"

Suddenly someone exclaimed.

An exclamation sounded, everyone hurriedly opened their eyes to the sky, and then everyone looked shocked and their eyes were dull.

Chapter 883: Money is hard to make and spend like water

When Di Ping looked at the sky, his mouth was open, astonished.

I saw the place where the thunder snake exploded just now, as if the sky was blown by a powerful thunder and lightning. A hole with a direction of more than ten meters was exposed from the layers of dark clouds and connected to the unknown space, and a ray of light fell from the hole. .

This ray of light is as clean as the holy light, passing through the mottled dark clouds, falling into the world, rendering the entire sky like a fairyland, as if a fairy is about to descend, full of spiritual illusion.

Through the entrance of the cave, you can see the clouds and the mountains and the mist, the cranes flying in the Qionglou Yuyu universe, and the fairies flying leisurely. It seems that there are bursts of fairy music coming, long and magnificent, and people are full of understanding. Transparency and spirituality.

Seeing this scene, more people slowly knelt down, one by one with solemn expressions, praying piously to heaven. This is a fairyland, this is the heaven, this is the manifestation of the heavens, who has seen this scene.

"Oh my god, the system will make you play!"

Di Ping looked at the sky blankly and muttered.

"Host, isn't this the effect you want?"

The cold and ruthless voice of the system sounded again, but Di Ping always felt that the voice was full of joking and mockery.

"Uh! Okay! I didn't say it!"

Di Ping is a bit speechless, yes, this is what I really want, but the system is too exaggerated, right?

When are you caring!

The holy white light shoots from the hole to the ground, shrouding the entire base in the holy light. The buildings, trees, weeds, or people are all covered by the rich holy light, which seems to be stained with colorful colors from a distance. There were bursts of halo, dimly like a fairyland.

Almost everyone fell on their knees and begged the manifestation of God to bless themselves and their family members. No one of them doubted the truth of the matter. The gods were manifested. They all saw the immortal world, so what is false?

If, at this time, look from afar from outside the base, you can just see a holy light from the dark clouds covering the entire base, full of holiness and grandeur, just like the immortal world of the gods.

At this time, Liu Zhenya just led the team to the sanctuary city, seeing that it was about to reach the place, the sky suddenly changed, and the dark clouds were rolling and thunder snakes. Like the end of the world, he thought it was going to rain heavily.

I complained in my heart, seeing that it would rain soon, I was wondering whether to hide, it would be heavy rain and I would not be able to see the road, but if I thought about it, I should hurry up before it rains!

As a result, as soon as he arrived at the gate of the base, he saw this shocking scene, and then everyone looked up at the miracle revealed. Although Liu Zhenya didn't believe in ghosts and gods, he didn't even know how to convince him not to believe it.

And the next scene completely destroyed the last point in his heart for life.

I saw a lot of white lotus flowers falling from that ethereal fairyland. The lotus flowers fell as if controlled by an invisible hand, and the petals fell into huge stones like white marble. Blocks, like code bricks, are rapidly forming a wall around the base.

Whether it was Liu Zhenya, the soldiers, or the people in the base, they all watched the miraculous scene before them in shock.

As if it were laser printing, the city wall was forming at a speed visible to the naked eye. In just ten seconds, it rose two or three meters high, and the outline of a giant city wall about four or five meters thick was rapidly forming.

Liu Zhenya stared at the scene in front of him blankly, his eyes kept raising, and in just one or two minutes, a huge city wall appeared in front of him.

The city wall is about 20 meters high. The bright and white city wall has no gaps. It is neat and tidy, and reflects the faint light of milky white light, making the whole city look like a fairy city, magnificent, shocking, majestic and tall.

Chapter 884: Dialogue from Bianzhou

The city wall was formed, the holy light in the sky slowly dissipated, the dark clouds gradually dispersed, and the sun fell on the earth again, and nothing seemed to have changed.

But everything seemed to have changed again, because a towering city appeared in front of everyone, and the dazzling white walls made people feel unreal.

Everyone rubbed their eyes, trying to confirm whether all this was fake, but when they opened their eyes again and found that it was still there, it turned out to be true.

A city built by gods just appeared in front of everyone. Everyone seemed to be sleepwalking. Maybe they were drinking, their faces were flushed with excitement, and their steps were a little staggering.

Many people ran to the edge of the city wall, stretched out their hands tremblingly, and touched the city wall. When the cold and hard touch appeared, they were sure that it was true. The milky white city wall seemed to be made of white marble, magnificent and atmospheric. .

"Ah! This is not fake! This is true! This is a miracle!"

This excited shout seemed to ignite the solidified air. In an instant, the entire base exploded. There were excitement cheers everywhere, and there were running figures everywhere. They were all running towards the city wall. They wanted to feel this fairy. The bestowed city.

They are going to get a breath of gods, so that they can be safe.

"A miracle! A miracle! This is a miracle"

Everyone who touched the city wall exclaimed like this!

"With such a city wall, we will no longer be afraid of monsters, ah! Long live, long live the city lord!"

Someone screamed, and his scream seemed to be everyone's shock, cheering one by one.

"Long live! Long live the city lord!"

"Long live the city lord!"

In the end, there was only one voice, which was Long live the city lord. The entire base was shouting, and the voice broke through the clouds and spread far and wide.

At this time, Liu Zhenya also looked at all this in amazement, muttering in his mouth: "A miracle! This is really a miracle!"

He didn't believe it, and he had to believe it. Even all the sergeants he brought with him lowered their guns at this time. They looked at the tall city wall with shock and awe. This is a god-given city, and they are afraid of themselves. The weapon will attract the dissatisfaction of the gods.

At this time, Di Ping, who was standing on the main tower of the city, was also shocked by the mastery of the system, right now?

If this spreads out, I can't do it without trouble. This is a god-given city. Once rumors are everywhere and outsiders are greedy, what should I do?

I thought it was just a shock to make people feel his immortal means, but the system understands this meaning too well, right?

However, then he calmed down again. Since he decided to show his muscles, he would show it in place. Whoever dared to look at his base, cut off his paws.

He has such confidence and the same strength.

In the last days, some of these methods can bring different effects. They only make the people in the base more united, more active, and believe in the future of the base. This is not bad. The power of belief is sometimes infinite.

Seeing the excitement and excitement of the people running around the base, Di Ping suddenly felt that there was nothing wrong with it. Secretly building it would attract other people's reveries, and such a building could achieve a positive effect.

Looking at the majestic tall city wall in front of him, not to mention that ordinary people have a sense of security, but he also feels a sense of peace of mind, but he doesn't need to worry about it before. With the city wall, he can defend most of the mutant animals.

Even if there were Wang Dequan and his like before, don't even think about destroying the tower with a cannon. The current city wall will make many people awe and timid.

Chapter 885: Shrewd Commander Chu Dingbang

Liu Zhenya stared at the tall city walls and towering towers blankly. He swallowed his saliva and moistened his dry voice.

He suddenly remembered what Liu Minsheng said in the telecom, this person is not an enemy!

At this time, he also sighed, if this was the method of that mysterious city lord, then this person really could not be an enemy with him, and if he was an enemy with such a person, he might feel uneasy even sleeping at night!

"Sanctuary City!"

Liu Zhenya raised his head and looked at the three gleaming golden seal characters on the huge gate hole more than ten meters high, and sighed for a moment.

He straightened his uniform, stepped forward, and walked towards the gate of the city. The original idea of coming to give the base to get off the ground was completely abandoned. Those who can possess such methods cannot be enemies but only friends.

Di Ping didn't know Liu Zhenya's arrival, the base was cheering, and he was stunned by the sound of the system prompt.

"Di...The construction of the first-level city is completed, and the first-level city defense is activated!"

"Di...The first level city is fully activated and the system is upgraded!"

"Di...The system upgrade is complete, please check the upgrade log!"

A series of system prompts sounded in Di Ping's mind, but at this time he had no intention of listening, but looked outside in shock.

When the system mentioned the activation of the first-level city defense, he found that countless lines were formed over the entire city, intertwined with each other, and then he discovered that there was a tower on the city wall every thirty times, and a tower appeared on this tower. Something dark, like a high-hidden machine gun, stretched out a long barrel, pointing diagonally at the sky.

Then, at the top of the original four observation towers of the castle, a huge cannon suddenly appeared on the top of each tower. The barrel with a bowl-thickness of about five or six meters long shone dark in the sun, cold and hideous.

This is the first level of defense?

After the city wall is completed, there are such benefits?

Di Ping has always wondered what it means for this building to be upgraded. It had something to do with city defense, not just because of restrictions.

He opened the upgrade log, he wanted to see how many functions this level of city has.

There were a lot of upgrades this time, and Di Ping read them one by one.

1. Optimize the system interface and add city defense system management items;

2. Turn on the first-level city defense system;
3. The main gun of the main tower of the city is activated (please see the introduction of the first level defense);
4. The system backpack is increased to 100 cubic meters;
5. All buildings are open to construction permissions, except for the castle and the main system building that cannot be repeated, all system buildings can be repeated (see the building page for details);
6. Cancel the initial discount of the system and restore the original price of all buildings. Please check the building page for the specific price;
7. Cancellation discount for unfinished construction will be calculated at the latest price;
8. Newly-added building intelligent resource station, check the building page for the construction price;
9. All the functional facilities of the system building will be used, please pay attention to the consumption of coins;

After reading these articles, Di Ping was overjoyed at first, but when he finished reading the next few articles, he only felt that something was wrong, and there seemed to be something wrong.

He hurriedly opened the system building page and only glanced at it. When he felt blood was pouring up, he almost spewed out a mouthful of blood.

"The system is ruthless!"

He held back for a long time before spitting out a word.

The system changed from being stupid and generous, to a demanding money, everything needed money, and he shook his shriveled pockets for a while and wanted to cry without tears.

Di Ping felt depressed and was about to vomit blood. He did not expect such a problem after the city wall was built. He actually activated the first-level town-level city defense in advance, and all the previous benefits of the system were cancelled.

No wonder he thought that castles and other buildings were cheap in the past and it was amazing, but the prices became more and more expensive in the future. He also complained about the system for this, and now he knows how generous the system was.

Looking at the price on the system again, he was again depressed and wanted to vomit blood. He had known that he would build something else first, and then build this city wall.

Chapter 886: Majestic High Wall Shocked Military Region

Now, Di Ping took a look at the buildings above and found that the price was not lower than one hundred thousand crystal coins. Looking at the string of zeros behind each building, he only felt that his eyes were green.

In addition to the smart resource station, which is cheaper, but it also costs 50,000 crystal coins. Recently, he has struggled to grab food from the tiger's mouth and almost hangs up to get 10,000 crystal coins. Now any building costs more than 50,000 crystal coins. , So how not annoyed him.

What irritated him the most was that he appeared in the architectural arena and the hero's cemetery before. It originally only cost a thousand crystals, but now it's okay. There is no discount for one hundred thousand crystals, and the arena is as high as 200,000 crystals. Coin, how can this not let him get angry.

Didn't you know that he had built these two buildings first?

One or two thousand crystal coins are nothing to him now, but now it is useless to regret it. With his understanding of the system, he cannot have room for discussion.

"Master System, make a discussion, the arena is cheaper than it is!"

In the end, he still didn't give up, and softly pleased the system.

But the system was as cold as before, and there was no sound at all, it seemed that Di Ping hadn't heard anything.

"Okay! Don't beg you, 200,000 yuan, I don't believe I can't make it!"

He waited for a long time with a shy face, and did not wait for a fart, which made Di Ping very annoyed, and his face turned black and grimace.

I was displeased and closed the building page and returned to the main page. Sure enough, the system interface was updated again. A white wall appeared in the base, enclosing the entire base, and every time a black cannon appeared on the wall. A muzzle the size of a teacup was slanting upward.

There was also a cannon on the watchtower of the castle on Thursday and Thursday, but this one was much larger than the one on the city wall, only two or three in size, and the muzzle was like a bowl, and the whole body was pitch black.

What Supreme Diping noticed is that on the top of his city's main tower, a cannon larger than the watch tower appeared. The same pitch-black cannon body, the sea bowl thick and thin cannon barrel, and the black-painted cannon body gleamed in the sun. The mysterious light, located on the top of the main tower of the city, occupies like a ferocious behemoth, staring into the distance.

Seeing these strange artillery-like weapons, Di Ping became a little excited. This is his city finally has the ability to defend.

He looked at the interface with excitement, and sure enough, there was an extra button on the side of the "first-level city defense function", he directly clicked in, and he wanted to see what the first-level city defense included.

There is not much content inside, one is function introduction.

The first-level city defense includes an all-round intelligent defense a1 type energy cannon every 30 meters of the city wall. There are a total of 400 energy cannons. The minimum energy consumption of each cannon is 1 coin, and the highest consumption is 5 coins, which can be destroyed. Mutant animals from the first to the third order.

As soon as he saw this, Di Ping's scalp was numb. This was a shot, this was a money, grandma. Now he has only 80 coins left on his whole body after building the city wall, which is not enough for a full salvo The round is 400 crystal coins, which is the lowest consumption, and he feels a headache listening to it.

This is a cannon, but he feels he can't use it!

However, seeing the power introduced later, he felt that it was worth the money.

The lowest energy can destroy the mutant animals in Tier 1 and Tier 1, and the highest energy can threaten the mutant animals in Tier 1 and Tier 3. If a shot can kill mutant animals in Tier 1 and Tier 3, it can be recovered. Cost too.

Chapter 887: Generous system rewards

This omni-directional smart gun can not only be on the ground but also on the air. It is completely controlled by the combat system. It can automatically determine the strength of mutant animals to use energy cannons. It also has an advanced enemy and friend recognition system, which is simply too advanced!

Di Ping looked at the four cannons on the sentry tower with excitement. These four are a2 type omnidirectional intelligent energy cannons. Its lowest energy consumption is eight crystal coins, which can kill mutant animals in Tier 1 and Tier 4. , And if it is fully activated, it will be fifteen crystal coins, which can directly kill first-level and sixth-level mutant animals.

Di Ping looked straight at his tongue, this artillery is really strong!

At this time, his interest in the main gun on the main tower of the city suddenly increased. The four secondary guns are so powerful, then the main gun should be more bullish.

He quickly looked at the introduction of the main gun.

The main cannon of the main tower of the city is a B1 type all-round intelligent energy cannon. The minimum energy consumption is 18 coins. Each hit can kill mutant animals below level 9 and the maximum energy consumption is 30 coins. The first and ninth levels include mutant animals with special bloodlines.

The main artillery is very strong, but Di Ping has caused disappointment. He can only kill the mutant animals of Tier 1 and Tier 9, which is still far from what he hoped.

We must know that the Komodo dragon is as high as Tier 2 and Tier 9. If the main gun can't take him down, what if the base encounters such a powerful mutant animal?

He is now unpopular, and now that the mutant animals on the earth that can deal with the second and ninth levels may be so powerful except for nuclear bombs, but can nuclear bombs be released casually?

The power of his main gun is quite impressive, how many mutant animals of Tier 2 and Tier 9 can there be?

Although he was not reconciled, Di Ping couldn't. Only now that the base has a certain defensive function, now he is not afraid of the Bianzhou base at all.

Now not only is the artillery powerful, but the main city wall is powerful. This city wall can defend against the attacks of mutant animals within the first and ninth levels. This is not the most terrifying. The most terrible thing is that it can be repaired autonomously. Once the attack stops, it will be repaired slowly. Heavier damage can be repaired in one day.

Moreover, this repair can be accelerated by using crystal coins. Once the crystal coins can be used to repair it instantly, this is simply unsolvable. As long as Di Ping has crystal coins, no one can rush into the city.

Now Bianzhou base dared to attack again, and he had to let him try the power of his artillery, but Di Ping, who held his head high, immediately fell down again at the thought of his deflated pockets. A penny stumped the hero!

It seems that in the days to come, he will still fight for crystal coins.

After carefully inspecting the system changes, he found that there were no omissions, so he turned off the system.

He felt that he had to speed up the steps, and the points system had to be worked out, otherwise the base would not function properly.

He inspected all the building functions, and all the buildings will consume crystal coins. Although it is not expensive, one crystal coin is equal to one Baidu of electricity, but the consumption of the entire base is staggering. How can it consume thousands of kilowatt-hours a day? ?

This is not to add to the manor's processing plants. Once these plants are turned around, the consumption will be even more alarming. It used to be entirely borne by the system, but now it belongs to him. When he thinks about it, he feels his head is big again.

Now the training room, the gravity room, including his city's main tower training room, as long as the use of the internal functions have to consume crystal coins, and the transfer tower in the tavern is also a big consumer, and each change of job actually consumes ten crystal coins.

The more I think about it, Di Ping feels that his head grows bigger. No matter what he counts, the 80 crystal coins in his pocket are not enough to consume for a few days. It seems that it will be a long time before he can get rid of poverty!

Chapter 888: Try your own strength

Chu Dingbang was sitting in a high-end boss chair in an office with more than 500 square meters on the 18th floor of the central building of the Bianzhou base. His whole body was about to be swallowed by the comfortable and soft boss chair. He placed one hand in the spacious office. On the table, gently tapping the tabletop without any rhythm, making a bang.

As an old staff officer Zhao Gang who has been with Chu Dingbang for five or six years, he stood silent at the big desk and waited for the old leader's question. He knew it best. This was when Chu Dingbang was thinking about problems. , It's best not to disturb him, otherwise no one can bear the general's anger.

"Xiao Zhao, where are the troops of Liu Zhenya and Zhang Beiwang?"

Two full minutes passed, Chu Dingbang suddenly asked.

"General Zhang's army has joined Zhang Haicheng at 9 o'clock this morning; Chief of Staff Liu's army has not yet received the latest news, but it should have arrived by time!"

Zhao Gang didn't get distracted by Chu Dingbang's silence. He was still very focused. He immediately replied as soon as Chu Dingbang spoke.

"Oh!"

Chu Ding uttered, the tapping fingers paused and then asked: "How about the casualties of the two troops?"

"The situation is not optimistic!"

Zhao Gang's face turned straight, and his expression was very uncomfortable and said: "General Zhang suffered relatively few losses, with 77 casualties and no damage to the vehicle. This is the result of the report this morning!"

Speaking of this, Zhao Gang stopped, his face became more serious, and his voice slightly lowered: "Chief of Staff Liu's situation is more serious, with 153 casualties, three tanks damaged, and five trucks, but this is last night. The report of the report, I haven't received the latest report today!"

"Boom!"

Chu Dingbang's tapping fingers stopped suddenly, and he straightened up from the seat suddenly, and asked with a serious face: "The loss is so serious? Is the data true?"

"Yes, Commander, it is consistent with our insider's report!"

Zhao Gang nodded with a serious expression.

"Oh!"

Chu Dingbang lay back in the boss chair again, his fingers rang without rhythm again, his expression was flat, it seemed that the surprise just now was not from him.

"Commander, I think Liu Zhenya will have a hard time this time. The 500 elite loses one-third, which can be regarded as traumatic!"

Suddenly a joking voice came, and only then did he find that there was another person in the office. This was not someone else but Fang Daocheng, the infantry division. He was sitting on the large sofa in the center of the living room smoking a cigarette leisurely, with joking on his face.

"Not enough! Not enough!"

Chu Dingbang lightly clasped his fingers and said with a plain expression.

"Not enough! I think it's almost the case. These five hundred people are the real hole cards of his Liu family. Now even this has lost half of them. If you know there is a return journey, how many people can he bring back!"

Fang Daocheng leaned forward and flicked the soot in the ashtray on the coffee table in front of him, with a mocking expression on his face.

"Dao Cheng, you haven't understood the situation for two years since you came to Bianzhou! You underestimate the Liu family's background. Although I have been in Bianzhou for six years, you must know that his Liu family has always been the oldest family in Bianzhou base. , Do you know how many old men of his Liu family are in the army?"

Chu Dingbang shook his head lightly.

"The Liu family is so strong?"

Fang Daocheng said in astonishment.

"Otherwise, do you think I will give way to it? Just the few people in the provincial government have broken guns. Without the Liu family behind them, they would have been swept aside to play!"

Chu Dingbang smiled coldly, his voice full of killing intent.

Standing nearest, Zhao Gang felt his whole body trembled. His fear of being with his old leader had deepened into his bones. He knew how ruthless this leader was and was decisive. I believe many people know this.

Chapter 889: I heard the voices of acquaintances

Fang Daocheng also leaned against the sofa. He is an old subordinate of Chu Dingbang. He was trained for many years and stayed in the old army. He only fell under his command in the past two years. He is very aware of Chu Dingbang's methods, especially It was after the life that Chu Dingbang's domineering aura became heavier and heavier, and he couldn't help but be frightened.

"Then, what if they return safely? Would you like to do something?"

Fang Daocheng said with a cold expression on his face.

"Come back! Of course you want to come back! Daocheng, you must remember what I am saying here. The army is the root of our Bianzhou. I can use my means to deal with the Liu family, but I must not hurt our foundation!"

Chu Dingbang's eyes stared at Fang Dao's enlightenment like electricity.

Fang Daocheng, with the chill in his eyes, shook his head, his face changed and nodded, "Yes, yes, I remember!"

Although Fang Daocheng was already a division commander, he was also an officer holding the military power, but at this moment, he was like a new recruit in front of Chu Dingbang, nervous and restrained.

"Okay, don't be nervous, I don't know you a ghost!"

Suddenly, Chu Dingbang showed a knowing smile on his dark face, and pointed to enlightenment in an angry way.

"Hehe! It's all due to the love of the Secretary!"

Fang Daocheng was not angry but rather smiled contentedly.

"Dao Cheng, the danger of the end times is unimaginable. I did not disclose a lot of information before. According to the news from Kyoto today, only three of our bases like ours have been destroyed by terrifying mutant animals. Up!"

Suddenly Chu Dingbang sat upright, with a hint of panic on his rare straight face.

"This..... How is this possible?"

Fang Daocheng screamed in surprise, even Zhao Gang was horrified, he didn't even know the news.

This is so amazing. As the actual leadership of the military region, they know the strength of the military region best, but three of the military regions with such strength have been destroyed.

"Nothing is impossible! I have received a secret telegram from the direction of Kyoto, and we need to attach great importance to it. Once something cannot be done, a strategic retreat must not lead to a major loss of strength!"

Chu Dingbang slowly told a big shocking news, and even a secret phone call from Kyoto, I can imagine how serious the matter is.

"You think I really can't do anything with them. In Bianzhou, Chu Dingbang's words are orders. Who dares not follow? I just don't want to lose and cause internal friction due to internal fighting!"

Chu Dingbang's voice suddenly became agitated, his body straightened upright, and his whole body exuded an incomparably overbearing aura. The shocked Zhao Gang and Fang Daocheng's faces appeared with terror on the faces of the **** general who mastered thousands of lives.

"The commander is really well-intentioned for the country and the people!"

Fang Daocheng's tight face eased after a while, his eyes showed a trace of eagerness and emotion.

"Okay, don't flatter, you and I don't know yet!"

Chu Dingbang's face turned dark, and he rebuked.

"By the way, I asked you to collect the talents for biological research, how is it going? Kyoto Secret Electric confessed to speed up the research on mutant animals and develop the human awakening medicine!"

Chu Dingbang suddenly looked at Fang Daocheng with unprecedented seriousness and asked.

"I'm already working on this matter. I have recruited more than a dozen biological scientists. Some of them may not be found among the refugees. Now I am slowly screening the base personnel!"

Fang Dao became a serious way.

"Well, this matter is tight. We must hold these talents in our hands. Judging from the unprecedented importance of Kyoto, the future may depend on the Awakened. I think the thermal weapon will withdraw from the big historical stage."

Chu Dingbang sighed with a complicated expression.

"Commander, do we really want to send these experts to Kyoto?"

Fang Daocheng suddenly lowered his voice and asked.

"Send? How to send it? Whoever holds these talents will have a chance. Tell me how to send it!"

Chu Dingbang lifted his eyes and watched Fang Daocheng shoot out a ray of cold light, his voice was freezing.

"Oh! That... I get it!"

Fang Daocheng shrank his neck and smiled awkwardly.

"What is the Di Ping kid in Sanctuary City? I feel that this is not easy! He even knows that he wants scientific and technological talents, but what does he want technological talents?"

Chu Dingbang slowly leaned his back in the boss's chair, his eyes half-squinted and stared at a red flag in the middle continent on the huge military map on the wall, muttering in his mouth, even the nearest Zhao Gang didn't hear it. What the boss was saying, he had doubts in his mind, but he did not dare to ask more.

Chapter 890: Exploring the strength of virtual reality

The high-level people in the sanctuary city quickly reacted after the initial shock. They knew that this must be the city lord's method again, and they had long been numb to the city lord's immortal methods.

There are many buildings in the base now. They are not extraordinary divine, but they are not as shocking as the city walls.

Cheng Chao, Lu Guoliang, Han Zhongguo and others moved quickly to assign a plan to defend the city. The members of the city guard began to rush up to the city wall in excitement, touching the wall in surprise while running.

The city wall is very wide and five or six meters wide, and the walkway is nearly three meters wide. There is no problem moving on it. You can drive on it. Standing on the high head of the city, you can overlook all the movement outside the city wall. The thick and solid city wall gives An unprecedented sense of security for everyone.

There is a tower every 30 meters on the city wall. Everyone doesn't know what this is for. Only Di Ping knows that this is the location of the omni-directional smart energy cannon. Usually the energy cannon is stowed away. Once the monitoring is dangerous, The cannon will rise automatically and attack all enemies.

Regardless of the excitement and excitement of the city guards, Liu Zhenya's nose was almost tilted at this time. If he had not seen this miraculous city wall appear, he would have been on fire.

He and Liang Chengdong had been at the gate of the city for more than ten minutes, but the gate was still tightly closed and there was no movement. It was only when he heard cheers from the top of the city that he suddenly remembered that he was too impatient.

He looked at the city wall being built, and he must have only reacted to the base. Now there is no one at the city gate, and of course no one heard him calling the gate.

"Ah! Someone down there!"

"My God! And tanks!"

"Hurry up and prepare weapons for defense. It is possible that the ***** from the Bianzhou Military Region have come here. Go and notify the city lord that an enemy is coming!"

As the city wall fell, all the trees within 30 meters from the city wall disappeared and turned into flat grass. This exposed the army on the horse path, and the city guards on the city wall finally discovered the huge motorcade in front of the city gate. Suddenly screamed in shock.

Then there was a panic on the wall, with people screaming from time to time. Liu Zhenya standing underneath listened to the sound coming from Yao Yaoyao. When did he become a bastard?

However, he came here today because he wanted to ask others, and he didn't dare to show off his general style. Although Liang Chengdong next to him was uneasy, he was also depressed by the shocking scene before, and he had to sulking bitterly. .

"Who is down there?"

At this time, there was a question from someone above, and the two had to withdraw from the city gate and look up at the top of the city wall.

Twenty meters high in the current city is really not too high, like the place where Haicheng is called the magic capital, but there are hundreds of meters high, standing on it and looking at the people below it is like an ant.

As Zhongzhou is the central city of the provincial capital, buildings 100 meters high can be seen everywhere, not to mention buildings of thirty to fifty meters.

But this can't be compared with the momentum of the city wall in front of you. Standing under a 20-meter-high building, you won't sigh the height of the building, but standing under the city wall feels really tall and big.

This is a visual impact. When you look up, you will only think of one word to describe him, that is majestic!

At this time, Liu Zhenya and Liang Chengdong had such thoughts in their hearts. This is simply a majestic and unbreakable barrier.

"We are from the Bianzhou Military Region to negotiate, not the enemy, please inform City Lord Di!"

Liang Chengdong put his hands in front of his mouth and raised his head and shouted.

"Fuck, it really is the **** of Bianzhou base, brothers **** fucking!"

As soon as his voice fell, a riot came from above, and someone shouted angrily.

"Naughty, everything is up to the city owner, give me a break!"

Then there was another stern rebuke from above, and then the messy voice above stopped.

"Wait a moment! We have sent someone to notify the city lord!"

After waiting for a while, there was a loud shout from the tower.
