

## Doomsday 96

Chapter 96: Surprise again and again

Di Ping was watching his hero list nervously, with an anxious expression. Three minutes later, a new hero appeared on the list.

Di Ping took a closer look and saw that it was Owen, the potential hero of the S grade, and then he took a long sigh of relief and completely relieved that it was his own dish in his bowl.

Seeing success, Di Ping immediately returned to the recruitment page. Is there a B-level potential hero waiting for him?

When Di Ping started recruiting, he was immediately dumbfounded. The B-rank potential hero actually asked for 50 crystal coins, and he still had 48 coins or 2 coins?

Di Ping had no choice but to exchange the mutated Tibetan Mastiff's crystal core. He originally wanted to keep it, but he didn't keep it. After the exchange, he immediately became happy again. He didn't expect this crystal core to exchange 8 crystals. Coins are much stronger than ordinary mutant dog crystal cores.

Looking at the remaining 56 crystal coins, Di Ping reluctantly clicked on the b-rank potential hero priest Mok again, and some distressed the crystal coins. This time it really became clean and slippery.

But B-level heroes are too rare at this stage. He knows that he is playing games. In the game, the probability of the first-level tavern and B-level potential heroes is only 5%, which is rare. I didn't want to be lucky. If you run into it, you can't let it go.

The owner of the tavern, Wu An, was about to take the warrior Owen downstairs. At this time, the prismatic body in the middle of the hall creaked again, and white energy began to overflow from the gap. He knew that the owner had started to recruit again and talked to Owen. Stand together on the third floor.

Sure enough, the white light of the prism body flashed, and the energy body of a square meter square suddenly retracted, and a figure appeared in the middle of the three pillars again.

The figure was also confused for a while, and then stepped out of the space, and Wu An took Owen to greet him, and then the three of them talked and laughed and went downstairs.

Then Wu Ann, Owen, and Mork walked out of the tavern and appeared in front of the castle gate. At this time, the castle butler Barton was already waiting at the door, and after a brief exchange with Wu Ann, he took Owen and Mork away.

And Wu An walked to his tavern again. Although the wall guard saw Patton with two strangers into the castle, no one asked much.

Because everyone knows Patton's power in this castle, no one dared to intervene except Di Ping.

Di Ping didn't know this. He felt relieved when he saw Mok appear on his hero list and closed the tavern.

He wanted to find the backpack function that was just turned on today, and after looking at the full screen for a long time, he found a backpack icon next to the top profile picture.

Di Ping got excited immediately and hurriedly took a look. A backpack interface appeared in front of him. The backpack was similar to the game. It was also a small grid. There were exactly 50 grids in a row of five grids and ten rows. All the grids were empty. A long knife appeared in the first grid.

Di Ping knew that this sword was supposed to be the completion of the mission to get the Wujin sword. This sword came too timely. His Han sword happened to be broken, and it was becoming less and less useful. He needed a good weapon long ago. .

Then this battle knife is what he needs most at the moment, but he is a little dizzy looking at the backpack grid, how can this knife be taken out?

When he was about to stretch out his hand to take it out, suddenly the saber in his backpack disappeared suddenly, and his hand sank, he hurriedly looked at it, and a black long sword appeared in his hand.

This knife is narrow and long with a total length of about one and a half meters. The blade has three fingers wide. The back is thick and straight with deep grooves on the side. The tip is slightly raised and the blade is slightly curved. The whole body is pitch black, shining with black light under the light. The heart of the person watching is cold. The handle of the knife is about 30 cm long and can be held with both hands. The leopard's head is in the back of the handle.

Di Ping liked it the more he looked at it. This knife is so useful. The knife weighs forty to fifty kilograms. It has a strong sense of strength when swinging. It is not as light as the previous Han sword, which is as heavy as a stick like a stick. The heavy feeling is always overwhelming.

But this knife is different. Not only does it have a good grip, but it also has enough weight. It can maximize his strength when he swings it. He believes that if he had this knife before, the mutant Tibetan Mastiff would not be able to walk a round in his hands.

I couldn't put it down for a while, and this was not enough to put away the backpack. When he thought about it, the sword suddenly disappeared in his hand, and then a backpack frame appeared in his mind, and the sword was already the number one in the backpack. In the grid space.

Di Ping did not expect the backpack to have such a function. You can check it directly in your mind without opening the system interface, as if your own consciousness enters the backpack. You can check the information of the items in the backpack. I took it in and out, and it was a joy to play. If I didn't feel a little tired after going back and forth a dozen times, I had to play for a while.

Seeing that it was already past nine o'clock, he didn't want to finish this task, but after a long time, he was really a little sleepy. Today, he rushed to participate in the battle again, both physically and mentally exhausted. Yawn stood up, walked over to the bed and fell asleep.

Gina still sits quietly on another bed and meditates. Di Ping didn't bother her. He heard Gina say that they rarely sleep and use pranayama meditation instead of sleeping, so that they can not only practice but also rest their bodies.

After Di Ping lay down, Gina opened her eyes and saw Di Ping directly asleep on the bed without taking off her shoes or covering her bill.

You must know that after the end of the world, the weather is like autumn, not hot at all, and there is still a bit of cold at night, especially the underground temperature is lower.
