

Doomsday 991

Chapter 991: Wealth can only be found in danger

"Owen, call all the guards and follow me out of town!"

Di Ping looked at Owen's command.

"No!"

Lu Guoliang's expression changed when he heard the words, and he stepped forward and stopped him: "City Lord, now in a very period of time, there are too many mutant animals gathered outside. It's too dangerous to get out of the city?"

"Yes! The lord, please think twice, it's not good to get out of the city now!"

Cheng Chao also stopped him with a look of horror.

Di Ping smiled slightly and said: "Don't worry! I have a sense of measure, and I will return when there is danger!" Then he signaled to Owen: "Owen, go and call!"

"It's the master!"

Owen ordered to leave quickly. Lu Guoliang and Cheng Chao saw Di Ping's attitude firmly and knew that they could not be changed, so they didn't say anything, but there was worry on everyone's faces.

The heavy door slowly opened a slit, and Di Ping rushed out in the lead, followed by a dozen awakened people, and the door slowly closed within five seconds.

Cheng Chao, Lu Guoliang and others stood on the city's head watching Di Ping and his party quickly rushed out of the city gate and ran towards the jungle 50 meters away. The faces of the people were tense and nervous. There were two machine guns on the city's head. She also stood up and pointed straight at the jungle.

Why does Di Ping have to leave the city at this critical time?

He can't help it, is he short of crystal coins?

Don't take advantage of this time to hunt down mutant animals and get some crystal nuclei. What if the monsters attack the city tomorrow? The energy cannons on the city's head are all displayed. These cannons are all expensive. It's a white coin!

Di Ping is playing the side ball. At this stage, he believes that there should not be too powerful mutant animals coming over. They are all small fish and shrimps. The big bosses are the last ones to play, so he dares to do so.

The seventeen people were divided into two teams, Di Ping led one team, Owen led the other team, the two teams rushed into the jungle and separated left and right, and cleared them to both sides.

When the mutant animals gathered in the jungle saw someone coming, they roared and rushed towards everyone.

Di Ping rushed forward with a sword in his hand waving like the wind, it was really devastating, and everything he passed was full of flesh and blood, and the people who followed could only pick up some leaks. It was a mutant beast that he was too far away to reach. It was the turn of the people behind.

Zhang Heng succeeded in following Di Ping's team. It was only then that he could see the strength of the city lord. He was stronger than he had imagined before. It was terrifying. The speed was like a shadow, fast as lightning, and momentum like a galloping horse. Everywhere is the light of the knife flickering, leaving behind a corpse of a mutant animal.

As a result of the knife, no mutant animal with a middle knife can still survive. They are all hits. The people behind, watching their eyelids jump, think that the city lord is getting stronger and stronger.

After Di Ping's talent became S-rank, his strength was further enhanced, especially Tiger Spirit Art's leaps and bounds. He felt that his strength has now completely exceeded 30,000 catties, unlike the previous full burst that could only reach this limit, and Now a casual blow is 30,000 catties, and the basic strength has increased again.

Di Ping couldn't stop this rush. He didn't use the mad wave knife technique, but the most basic chopping, cutting, sweeping and wiping, but the more he killed, the more he learned, the knife became more handy, and his understanding became more and more. Deep, he was addicted to killing for a while, and he kept rushing in front.

This made the group of people behind them very depressed. They trot all the way behind Di Ping, and they lag behind when they ran slowly. Di Ping simply kept going, leaving the group behind to clean the battlefield.

Di Ping got more and more excited and didn't pay attention to the situation behind him. He felt that he gradually understood the reason why his crazy wave sword technique had been difficult to improve.

It turns out that his understanding of the knife is too one-sided. The knife can be fast or slow. When it is fast, the knife can only be seen without the knife. It can be said that there is no blood to kill. The sword technique can be fierce and insidious, the sword sees blood, the sword causes the sword, and the sword technique can also be overbearing and unstoppable.

Chapter 992: Monsters besieged for dawn

The sword is the king of a hundred soldiers, the weapon of killing, and the hegemony of the soldiers, so the sword is more important than strength.

Di Ping used to think that the knife was just a tool, and the sword technique was just a method of using the sword. Now he knew he was wrong, which is why he has never been able to use the real power of the Kuanglang sword technique.

The strongest thing about the Kuanglang Knife is not how fast the sword is, but the superposition of the knives in it. Up to now, he can only stack three knives, although he has learned all the three styles and 18 moves of the Kuanglang Knife. , But it is like swallowing a date, learning a little knowledge.

If the Kuanglang Sword Technique does not know how to use the sword strength, it is not considered to have really learned this sword technique, and the use of this sword strength Di Ping has been puzzled, and he didn't realize until today that he didn't understand the sword.

Practicing the sword without training the mind is tantamount to white training. He has been gravitational and not mindful, and has not understood the true meaning of the sword. He has been wandering outside the door. At this moment, he seems to feel a shadow of sword strength, but this shadow is The dreams and illusions made him feel unreal, although he was anxious, but it was still like a mirror, but he could not touch it.

This kind of urgency made him want to stop at all. He kept rushing towards killing, and when he encountered a mutant animal, he swung his knife up, killing it in darkness.

"What's wrong with the city lord?"

The fat man looked at Di Ping who was slaying frantically and asked Xu Sheng beside him in a low voice.

"do not know!"

Xu Sheng also shook his head worriedly.

"Is the city lord practicing the sword? I think he used those tricks back and forth!"

Tang Zhandong broke open the head of a mutant dog with a single axe, took out a crystal core and put it into the bag, then whispered.

"Yeah! It's possible, I feel that the city lord's sword is getting more and more fierce! Look at the surrounding leaves a meter or two away from being shattered!"

Zhang Hengcheng stared at Di Ping's back with an enviable expression.

"Practicing knife skills? Don't say it, I do feel that the city lord's knife skills are getting more and more powerful. You see, this mutant dog is not at the cause! Look..."

The fat man's eyes lit up, and he pointed to the mutant animal carcass on the ground.

"Stop talking nonsense and keep up, the city lord rushed away again!"

Xu Sheng calmly stopped the words below the fat man, and then chased Di Ping away with his sword.

"go!"

Tang Zhandong let out a deep cry and followed up with his legs.

"How to stack knife strength...How to stack knife strength?"

Di Ping asked himself in his heart while waving a knife. He seemed to have found the way, but the road was blocked by a layer of fog, which made him unable to see clearly. The feeling of seeing but being intangible was very uncomfortable.

"Crazy Wave Sword Technique...Crazy Wave Sword Technique...wave..."

Di Ping used the crazy wave knife technique over and over again, feeling the artistic conception in the knife technique, and he stopped thinking about it, suddenly his eyes lit up.

He thought of the waves. Since it is the crazy wave sword technique, the sword technique must be related to waves. From the perspective of the three-style sword technique, it is indeed all related to waves. Isn't that a clue?

It's a pity that I haven't seen the sea?

I saw it on TV, even the tsunami, but it was only on film and television. He didn't adjourn the meeting in person, so he couldn't imagine how it would feel.

Turbulent, surging, overwhelming, and invincible, all he can think of are these words and the meanings they express, but they are only literal and empty.

Suddenly his eyes lit up, and he thought of the feeling of standing on the bridge and watching the waves swept over him.

That kind of overwhelming, overwhelming, unstoppable aura once again appeared in front of his eyes, it seemed that it was not a wave, but the might of heaven and earth, with endless layers of strength that could not be resisted by humans.

"Crazy Wave Knife Technique·Breeze and Drizzle"

Di Ping's mind gradually became clear. His eyes lit up and he burst out with a violent shout. The sword in his hand seemed to come alive suddenly, roaring and cheering, as if a breeze suddenly surged in the jungle, listen carefully. The sound of the ocean waves gently hit the shore, so soft and gentle.

Suddenly a bright light from the jungle shone in the dark jungle, like the sun shining into the dark jungle, bright and dazzling, making people close their eyes involuntarily.

Chapter 993: The base has heard and heard

All that flashed in everyone's eyes at this moment was the cold light of the sword, a huge pressure came from the front, and the light of the sword rising in front was as hot as the sun, and everyone's skin was in pain. Like acupuncture, everyone couldn't help but shudder, as if it wasn't hot but a bitter cold ahead.

boom!

At this moment there was a loud noise, everyone forced their eyes to look over, and saw a large tree with a diameter of more than one meter under Di Ping's blade, and the broken trunk instantly shattered into pieces. Time sawdust flying across.

"Knife Jin Wuzhong Jin!"

There was surprise on Di Ping's surprise face. He used the first method to achieve the five-fold stack of sword strength. Before, he used the third layer of the crazy wave knife technique, but he only forcibly reached the triple sword strength, but the power was more powerful than now. The difference is not a little bit, it's just the most superficial use, not at all the strength.

Standing thirty meters away, the fat man and the others stared blankly at the scene that just happened before them. They couldn't believe that it was true. It was so powerful that it cut the big tree that they couldn't hold together into pieces. How fast the knife, how strong, they are very strong now, but they can't do this.

"Crack!"

The giant tree seemed to react at this time, the 100-meter-high trunk began to fall, and the broken branches made a cracking sound.

"call!"

Di Ping exhaled a long breath, suppressing the excitement in his heart, and slowly raised the knife in his hand again, his eyes became focused.

"Crazy Wave Knife Technique Second Style·Wave Drain!"

With a loud shout, the light of the knife lit up again, and the light of the knife was as if the moon rose on the sea, and the bright moon bloomed all over the earth, and under the moon bloom the waves were surging, beautiful, desolate, and lonely.

Rushing...

The sound of waves suddenly appeared, as if everyone was standing on the beach, listening to the waves and watching the moonrise on the sea.

Hum!

With a buzzing sound, the blade lights emptied, and the sky was enveloped by countless blade lights. The fallen tree trunks, branches, and leaves seemed to be swallowed by a shredder, and the countless blade lights turned into waves and swept waves. Everything in front of me swallowed everything.

Cang!

A sound of golden iron strikes sounded, as if it were a signal of termination, the sound of the waves dissipated, and the empty blade light disappeared without a trace. It seemed that it had never appeared. Only the broken leaves and sawdust fell down like a dense The white snow flies in this world.

"Wow!"

Di Ping raised the sky with a long roar, the sound was long and continuous, passionate and high, rushing straight into the sky, full of domineering and powerful aura soaring into the sky, like a sky full of power, at this moment, all the mutant animals around him looked Zhong Du showed a frightened look, let out a whimpering low roar, and fled with his tail between them, trying to stay away from this dangerous place.

Hum!

After a long whistle for half a minute, Di Ping seemed to have vented the pride in his heart. The knife in his hand shook, a buzzing sound, a surge of energy, the sawdust that fell like snow, was affected by this energy. Blowing scattered and fled, the falling debris on his body was also shaken away.

There was joy on Di Ping's face. He didn't expect that he was just going out to hunt mutant animals, and he fell into an epiphany, and once practiced the crazy wave sword technique.

Only now did he know that his mad wave sword technique was really practiced. If he was only rough before, but only able to play every move, then he has already crossed the proficiency and entered the deep level. Dacheng is still some distance away, but he believes it is not far.

With the mad wave knife technique, he can now cut seven levels of sword strength, not only that, now he can cut a hundred knives in the second style, and the strength of each knife is heavy, and the fallen giant wood is shattered into pieces. , The power of the powerful sword shock is so terrifying, if it cuts the person to pieces in an instant, there is no bones, this is even more terrifying than Ling Chi.

He did not resort to the third pose. He believed that by resorting to the third pose, he would definitely be able to play another layer of sword strength, but he was not dizzy, knowing that this place was out of place.

Chapter 994: Final breakthrough in spiritual realm

He has already seen the power of the Kuang Lang Sword Technique, and he couldn't help thinking, if the eighteenth layer of sword strength instantly cuts out a thousand knives, how powerful it would be, and if the three incomplete sword techniques behind it should be made up. How horrible it is.

Di Ping suddenly wanted to get the back of this crazy wave sword technique, but he knew that he wanted too much. He still couldn't use the c-level martial arts. It was already a higher level of vitality martial arts. He is still there. At the first tier, only by breaking through to the second tier to open up the pill mansion, and through the vitality, can you truly use the C-level martial arts.

At the same time, he really felt the horror of the S-level talent. It has not been a day or two for him to learn this crazy wave sword technique, but he has not made much breakthrough. This makes him very depressed. This powerful sword technique lies in him. In the battle, it did not match its rank, showing strong destructive power.

But today he broke through and knew the horror of this sword technique. It was almost indestructible, everything was unbreakable, but it was hard and soft, and when it was soft, it was like a breeze and fine waves.

Of course he knew that today's breakthrough was definitely not due to the cultivation, because he had never felt a breakthrough in the practice of the sword technique, which made him feel that he did not have the talent to practice the sword technique.

And today's sudden breakthrough, he knows that he has improved his talent. This super comprehension ability and breakthrough speed, he has already experienced in the Tiger Spirit Jue training before. He was intoxicated by his invigoration, and his talent is really a good thing.

When Di Ping sighed, he frightened the group of people behind him. The city lord was already powerful enough to be inhuman.

"Oh my God! What a terrifying sword technique!"

The fat man swallowed his saliva and cried out in horror.

"So strong!"

Zhang Hengcheng also stared blankly at the quiet young man 30 meters away, with horror in his eyes. He was hit today. The original Feiyang mood was extremely low at this time, and there was a deep sense of frustration.

Zhang Hengcheng, who had originally thought that he had become a soldier, had soared in strength, and felt that he should be not far from the city lord. Today, I learned that the difference seems to be getting farther and farther, and the difference between the two is no longer a little bit.

It's no wonder that Zhang Hengcheng felt this way. After all, Di Ping was a lot higher than their starting point. The system's early strengthening of the body originally allowed him to surpass the ordinary awakened in strength and speed. After that, his talent evolved twice. Further enhance his strength, and the martial arts skills he learned are far stronger than the others, which makes his strength, speed, and destructive power more and more beyond the same level.

His strength now exceeds 30,000 catties, and Owen, the strongest among the people, is at Tier 1, Tier 3, and his strength is only 5 or 6 kilo catties. Even if he rises to Tier 1, Tier 7 and Di Ping's same level, his strength It is impossible to reach 30,000 catties, unless he has some great opportunity to suddenly strengthen to the same degree as Di Ping, but this is too difficult.

Di Ping glanced at the mess he had destroyed, took a few deep breaths, mixed the blood and the rapid breathing caused by the strenuous exercise just now, and prepared to return to join the crowd.

Roar!

Suddenly, there was a huge and earth-shaking roar, which rolled like thunder from a distance. The trembling leaves all trembled and made a rustling sound. A violent and powerful momentum rolled over like a violent wind, and a feeling of suffocation, The hearts of everyone trembled.

Di Ping's expression also changed. This roar was obviously in response to the long howl he had just made. He screamed with excitement for a while, but unexpectedly it attracted the response of the nearby giant beasts. Hearing the anger in the voice seemed to provoke him. Dissatisfaction.

Secretly complaining in his heart, this is the proud type of forgetting, forgetting what kind of world this is, if this monster is drawn over, then he will really regret it.

Chapter 995: Different talents

"Pick up the mutated animal carcasses and return to the city immediately!"

Di Ping's face was a little ugly, and he shouted at the people who were still stunned, and then began to pack the mutant animals on the ground in their backpacks.

There was a long scream just now, I feel good, but if it attracts the powerful mutant beast, it will be troublesome. The cleaning task is almost completed. I can't stay outside the city for long, it is time to go back.

"Hurry up, everyone move!"

Everyone also reacted and started to collect the mutant animals scattered on the ground so that Di Ping could collect them.

"Zero, inform Irving to return as soon as possible!"

Di Ping ran to collect mutant animals while giving orders to the watch.

"It's the master, the message has been sent!"

Zero's voice came from the watch.

A group of people, led by Di Ping, began to run back, each carrying one or two mutant animals on their bodies. Di Ping killed nearly seventy or eighty animals along the way, and his backpack was finally full, with one hundred cubic meters. It's not too big and can't contain too many. Any mutant dog here seems to be weighing thousands of pounds, occupying a lot of space, and it can only be carried by everyone.

He hurried to the gate of the city in a panic, and Owen rushed over. He was not as far away as Di Ping rushed, so he came back quickly after receiving the order, and the two teams happened to meet.

"Into the city!"

Di Ping didn't say much and waved his hand, leading a group of guards towards the city.

The city gate opened a gap, and everyone rushed in. Di Ping was relieved when he was in the city. Today was really careless. I was excited for a while and forgot the danger, but fortunately, they all came back.

The first team of Irving also had a good harvest. There were about 30 mutant animals. Although they didn't have as many as Di Ping, they were similar.

Cheng Chao and Lu Guoliang had hurried down, their faces changed. They could not see the situation in the jungle above the city. They only heard the roar of animals and the horrible roars from time to time. They were very worried.

Finally, they heard the terrifying roar, which had a strong impact on him. The terrifying aura suppressed them from standing unsteadily. At this time, they were afraid that something happened to the city lord outside, and they all rushed back. Came here in a panic.

"City Lord, don't dare to mess around next time, my heart is scared!"

Lu Guoliang patted his chest and complained with horror on his face.

"It's okay, it's okay...you see, we are all back!"

Di Ping waved his hand pretentiously, showing a slight smile as he said, pointing to a mutant animal in a place and said: "Look, we have a good harvest this time!"

He has also thrown out the mutant animals in his backpack, and piled them on the ground like a hill. This time he went out to harvest more than ever before.

"It's too risky, my heart trembles!"

Lu Guoliang looked at the hill-like mutated animal carcasses on the ground, his eyes lit up, but then he said earnestly.

"Yes! City Lord, anyone can leave this sanctuary city, but you can't live without you, you can't do this again next time!"

Cheng Chao also looked solemnly.

"Don't worry! I have a sense of measure!"

Di Ping smiled and nodded. He knew that these two people were also worried about his safety, and he was very moved, but next time there was something like this, he would do it again. Although it was dangerous, the harvest was full. The mutated animal carcasses in one place were all white coins in his eyes.

Lu Guoliang and Cheng Chao were also well-measured people. When it came to this, it would be boring to talk about it, so they didn't say much, and began to arrange people to clean up these mutant animals.

Chapter 996: The sound of chickens and beasts suddenly

As the guards of the city lord, these people are too aware of Di Ping's habits. They are used to it and don't need to order at all. They are already breaking their heads to take crystal nuclei. As for the handling of these meats, there are special handlers.

Eighty-eight crystal coins were handed to Di Ping, and his face finally showed a smile. These crystal nuclei can be exchanged for at least two or three hundred crystal coins, which is enough for the energy cannon to shoot a few shots, and the base His normal consumption can also be supplied. With these backgrounds, he no longer feels so urgent.

"Supper in the evening, enough meat tube, so that our soldiers can eat their stomachs, and fight tomorrow!"

Putting away the crystal core, Di Ping was happy and smiled at Cheng Chao.

Cheng Chao also smiled and said, "This bunch of ***** should be happy again. I'll talk to Director Yu in a moment!"

Several city guard sergeants standing not far away heard the conversation, and all of them showed excited smiles. They were full of energy, and straightened their bodies, full of energy, for the sake of the evening. Meat also has to perform better for the city lord to see.

The logistics office moved quickly, and in a while, a dozen people came. Generally, the city guards didn't need to order and were already excited to go up and help. They pulled the mutant beasts away in a cart to deal with it. This time the base has an extra seven to eighty thousand catties of mutation. The meat is gone, they have a good taste again, watching the mutant beasts in the carts, all saliva is going down.

Di Ping asked the guards to return to their posts to rest. He also went to the top of the city again. One was to observe the defense of the city, and the other was to prevent the terrifying mutant beast from coming over and hit the base by surprise.

However, fortunately, until the sun slanted west, the powerful mutant beast did not come.

And the mutant animals scared away by him in the jungle are here again, and there are many more varieties, such as mutant dogs, mutant wolves, mutant bison, and big trees with mutant birds resting in the sky from time to time. It hurriedly fell down, bringing up screams, roaring from time to time in the forest, and the fighting and wailing of mutant animals.

Di Ping couldn't help the urge in his heart. He went down to the city twice by himself, and went into the jungle for a while. The first time it was successful, he killed more than 30 mutant beasts and was knocked back by a group of mutant bison. The bison is powerful, fast, and very united. Even if Di Ping collides together, he can't rush into the defensive circle and can only exit the jungle.

The second time he didn't give up and changed his position and went on smoothly, but this time it was even more difficult. Just after killing a few mutant animals, he was surrounded by a group of mutant birds.

This is a group of mutant sparrows, each of which is the size of a pigeon, thousands of them. As soon as they flew up, they were crushed and crushed. He used the crazy wave knife method to kill hundreds of them, but he managed to kill one. Bird feather was bloodstained, but he couldn't kill it, and he couldn't do anything about these mutant birds when the waves were different.

Moreover, the mutant bird pecked a lot of his body, and in the end he couldn't help but retreat, and even the bodies of a few mutant wolves didn't have time to collect, so he retreated in embarrassment.

Fortunately, the mutant animals seemed to be afraid of the base. As long as Di Ping rushed out of the open area, the mutant birds or animals would stop, just staring at Di Ping and roaring angrily and didn't rush over.

Di Ping didn't give up. He changed a few prescription positions in a row but was all stared at. He could not but return to the city. He knew that he had lost the opportunity to play crystal coins.

Because of the last two impacts, he obviously felt a faint sense of oppression. He knew that it meant that powerful mutant animals had been eyeing him. If he accidentally fell into it again, these powerful mutant animals would not You're welcome.

It was dark, and the jungle was even more dangerous. He was not sure that there would be a problem when he went out at night. The danger of mutant animals at night increased exponentially. He didn't dare to take the risk and had to give up.

Looking at the dark jungle, Di Ping knew that tomorrow was the beginning of the war, and he had no chance of winning.

There are too many mutated animals, and there are still so many powerful mutated animals that haven't appeared, which makes him feel no confidence.

Chapter 997: General Xiaoming

The sky is already dark, and the night is covering the earth. Today it is cloudy and there is no moon. The moon that used to be high in the sky seems to hide today from the tense atmosphere and no longer show up.

The forest mutant animals continued to gather, roaring and wailing into the city, gradually covering the city with a shadow.

The entire city seemed to be suddenly quiet, everyone was doing their own things silently, everything was unstable, but each one had a tight face and a rush, no longer the indifference before.

From time to time, the guards of the city guards swept across the dark forest, and there was a hint of fear in their eyes. At this time, the dark and boundless forest seemed to be a terrifying beast choosing an opportunity to eat, making their hearts tremble. .

But none of them flinched and stayed at their posts, their feet were steady, their eyes watched vigilantly at everything outside the city, and their weapons were tightly held. If there are mutant animals rushing up now, I believe they will still swing their swords. Fight.

Di Ping didn't dare to express his anxiety. He walked around and looked calmly. He looked leisurely and didn't have the tension before the war. He seemed to care about nothing. His indifferent attitude was more or less the same. It affects everyone's mentality, and makes many people feel less fear and more sense of security. I haven't seen the Lord of the City look indifferent! It means that the adults are ready!

In fact, Di Ping's heart is not much less nervous than these people, but he dare not show it!

Today's dinner is very rich, no matter who the base is, and the meat tube is enough, everyone can hold a big bowl of meat and drink and eat. If everyone can eat such a rich dinner in the past, they would be happy. Unbelievable, singing and dancing, joyous.

But today, although everyone was eating very happily, there was very little communication. Di Ping and the management in the small restaurant routinely gathered every night. There was not much speech during the whole process, and no one even drank the wine. Each stays in a hurry and leaves to be busy with the past.

This scene happened among all the people in the base, whether it was the city guards or ordinary people, they all ate quietly, fed their stomachs, and went to the battlefield tomorrow. They all knew that the sanctuary city had been surrounded by mutant animals and wanted to survive. You have to fight, and it's so vigorous to eat.

Even Liu Zhenya felt the changes in the city, and was confused for a while. It was not until the evening that they knew the reason from Lu Guoliang. For a time, both grandpa and grandson looked at each other, feeling a little weird and a little nervous.

Under the influence of Di Ping's terror appeal and the effective operation of the base's various institutions, the entire base has erupted with vigorous momentum, and everyone is working hard to contribute to the base and work for their homeland.

The clanging of iron in the workshop never stopped. Luo Hongyuan, Shi Dexing and his sons were sweating overtime and drove their bows and arrows. In the workshop hall, more than one hundred women were making arrow feathers. They are already very skilled in this action, cutting the arrow shaft, assembling the arrow, pasting the arrow feathers, step by step, and each arrow feather is completed, and then someone gathers it and sends it to each defense area quickly after being packed into a box.

These people simply ate some food in the evening and worked at night. No one was lazy, no one complained. Everyone was working hard and didn't even have time to lift their heads.

Di Ping looked at this and was moved in his heart. He found that the people in the base had already regarded the sanctuary city as their home, and they were all working hard for this home without any regrets.

This allowed the original tension in his heart to slowly dissipate. He saw a quality from these ordinary people, that is, tenacity, courage, and unyielding. For the common home of everyone, everyone is offering their own strength. .

This kind of strength inspired Di Ping, which gradually refilled his heart with fighting spirit, and a courageous force and will condense.

He decided not to think about it anymore. Now that everything is ready, there is no doubt that tomorrow will be a battle. He has a sanctuary and systematic support cannot guarantee the safety of the base. He simply finds a rope to find a crooked neck tree and hangs to death. Up.

No longer turning, Di Ping turned and walked towards his castle tower. He must rest well and meet tomorrow's challenge in the best condition.

Chapter 998: Mobilize the celebration wine before the war

Di Ping figured it out, and his original heavy mood relaxed. The whole person became extremely relaxed. Once he explained the matter, he went back to his room to practice.

"Yu ** Jue" is a compulsory course for him every night, and today is no exception. He felt different as soon as he sat down to practice.

It used to take two or three minutes for him to be quiet, but today he became quiet after ten seconds of meditating today.

As soon as he enters the state, he feels the difference around him. There are colorful lively energy elements floating around in the room, which are stronger than before. Today's elements are significantly more active, seeming to be very close to him, always surrounding his body. Dancing lightly, he felt that as long as he moved his mind, these energies could obey his command.

The surprise is not just these. Di Ping can clearly feel that the whole world has changed. It seems that the connection with him has become closer, and everything has become clearer, as if the world has more lines on his body. The feeling of sinking was also gone, and there was a kind of indescribable ease all over his body, as if he had removed the burden on his body and became a lot lighter.

In the depths of Di Ping's mind visualization, he was sitting quietly in the endless void, surrounded by a clean space without a trace of dust. He can never see his head or the side. At this time, the space is right. It was raining one after another. This was not an ordinary raindrop, but a clean, crystal-like energy raindrop, drop by drop from the sky, sprinkled on Di Ping's body one by one, washing away the dust and dirt on his body. , So that his whole person slowly became crystal clear, like a crystal statue.

Without knowing the passing of time, his whole mind was silent in this void between heaven and earth, accepting the baptism of heaven and earth, he had forgotten time.

Click!

Suddenly, a little light in the void was shining, like a distant star, shining with strange light. The appearance of this star seemed to be a stone breaking the calm lake surface, the mirror surface was instantly shattered, the illusion in the brain disappeared, and all the illusions collapsed. , The void in front of me slowly transformed into another picture.

"Isn't this my room?"

Di Ping felt that the picture was very familiar, and he immediately thought, isn't it the scene of his balcony in the picture?

The balcony, the chair, the coffee table, the thick carpet, and the figure of a figure sitting on the carpet.

He could still see a person sitting on the balcony floor with his eyes closed, as if he was asleep, the figure slowly became clear, and he could see his face clearly, which was shocked at the time.

"Isn't this yourself?"

"How can the scene on this balcony appear in my mind?"

"Close your eyes?"

"What's going on, can it be said that it is a dream or an illusion?"

"However, why can only see clearly within two meters, how can the surrounding area be foggy and invisible?"

The horror in his heart caused his mental power to fluctuate, and his mind shook, and the scene disappeared in an instant. Di Ping suddenly opened his eyes, and a brilliant light shot from his eyes, as if a flash of lightning flashed in the room.

He glanced at the environment around him, and it was exactly the same as what he saw in his mind. Why?

"Could it be said that it was a jade technique, which broke suddenly?"

Di Ping was taken aback for a moment, then he suddenly thought of a possibility.

"Yu ** Jue" he only got three levels of exercises in total, the first level is collectively called the internal illumination, and this internal illumination is divided into three levels, namely perception, internal vision, external peek!

Perception is the ability to vaguely perceive his physical condition, just like Di Ping can perceive the increase in his own strength, the change of energy in the body, and the perception of danger to the outside world. These are all derived from the improvement of the spiritual realm, and the senses are more sensitive. Seek luck and avoid evil.

There is also the induction of heaven and earth energy. Just like Master Gina is actually born with strong mental power, he can sense external elements to guide this element arrangement and change through methods. To put it plainly, magic is the ability to use elements.

Like Di Ping, he can already learn magic when he breaks through the perception realm. He can attack with magic as long as he learns the ability of destructive combination of magic elements.

Chapter 999: Thousand beasts roar and shake the sky

Inner vision, which is the same as the inner vision in many Taoist classics, can explore the situation in the body through the perception of mental power. For example, before Di Ping could see the situation of the five internal organs and six provinces, including the strangeness in the body. The uncontrolled energy is wandering on its own, which is through insight.

There are many mysteries in the inner vision realm, and the mental power's perception of the outside world will be strengthened. This is also the reason why Di Ping can sense danger in advance.

The third level is called the peeping level. At this level, the mental power can reach out of the mind and perceive the outside world. At this level, it is no different from the eyes. In addition to the uncontrolled range, spiritual exploration is more practical than the eyes. He can see more clearly and finer, and he can see a lot of things that the eyes can't see, and there is no blind spot in all directions, regardless of day and night, like a radar satellite, feedback everything around to the brain, let it do Out of judgment.

Of course, at this level, Di Ping is already stronger than Gina. At this time, as long as he has mastered magic and learned spellcasting skills, he can completely become a magician, but he doesn't know it.

Di Ping had made two breakthroughs before, especially the last time he built the teleportation well. In order to resist the power of the heavens and the earth, he forcibly increased his mental power from the perception state to the inner vision.

But recently, he was very distressed, and he always felt that his spiritual cultivation seemed to have entered a bottleneck, and there was not much breakthrough.

In fact, Di Ping is a bit too greedy. If anyone who understands knows that it only takes a month for him to cultivate from a layman to an inner vision, many people should call genius directly.

The system is not only transforming his body, but also the development of his brain. Every time the strengthening energy rushes to the head, he is developing his brain. He doesn't know all of this. No one will guide him in the training, which allows him to stay at the base. There is a lot of lack of knowledge, and everything can only be explored by myself.

Only after practicing the spiritual exercises, he developed the original level of accumulation, so he was so fast, and after the inner vision level was reached, the accumulation of the system was almost digested by him, and then he had to rely on the water to work slowly. Honed.

But this time, the breakthrough of talent, the purification of the body, the enhancement of physique, the spiritual realm has also increased, and the sensitivity to the heaven and the earth has increased again, pushing him from the inner vision to the outer vision in one step, and his mental power has been extended to a space two meters away.

Di Ping was surprised to find that his eyes could see everything clearly in the dark night, no different from those in the daytime. Everything in his eyes seemed to be different. There were more unclear things, and it seemed that the sky was also wide and the ground. It became wider and clearer, and more principles of heaven and earth were unfolded in front of him, as if oneself merged with this piece of heaven and earth, and every breath and breath were closely related to it, and even slight changes could be sensed.

Moreover, the mind is more sensitive, and the knowledge of the past is presented to the eyes one after another, as if I have just seen it. What I couldn't figure out before is suddenly clear.

He was a little surprised at this time, but only pushed his talent to S grade, and so many changes occurred in his body. Whether it was his understanding ability, perception ability, or physical strength, he had changed his strength to a higher level.

If he compares the previous self with the current self, he feels that the current self can beat the previous ten. This feeling of being full of power and controlling everything makes him addicted.

The whole body is one, the power is endless, and the feeling of self-strength makes him a little bit tempted to make a long whistle to relax his inner joy.

He couldn't help but give birth to greedy thoughts. If he pushed his talent to the SS level, how powerful it would be, but he knew a little too much.

With this S-level talent, he was already lucky enough to get the earth fruit by chance.

What kind of medicine is needed to push the talent to SS level?

Although he knew that he might not get this rare treasure, he had no lack of hope because he had a system. As long as he saved enough 100,000 coins, he could buy SS-level potential evolution potions to increase his talents. Up.

This is the difference between cheats and no cheats!

Only he still saw hope, and not far ahead, as long as he worked hard, he could reach it instead of vain.

Chapter 1000: Alien beasts are aggressive

"Wow!"

The rooster has also mutated, but still can't change the habit of crowing in the morning. While Di Ping was still meditating to surprise his mental strength, there was a rooster crowing from afar.

"It's going to dawn?"

Di Ping suddenly opened his eyes, like two stars in the dark night.

With a **** crowing, it seemed to have reacted, and the forest also began to make a roar or two from time to time.

Glancing at the hour hand on the wall, pointing straight to five o'clock, the sky is indeed about to light up, six o'clock is twenty-four hours, it is possible that mutant beasts will start attacking the city, Di Ping dared to neglect and jumped off the bed. He got up, simply washed his face, and hurried out of the main tower.

Perhaps only Di Ping was able to meditate and practice steadily all night in the base. Most people in the base did not say that they stayed up all night, and none of them slept well. They were all shocked.

When there was a roar of beasts and birdsong outside, they opened their eyes one by one, jumped off the bed, wiped their faces and rushed out.

Di Ping walked out of the main tower of the city. The city security was already crowded with people. There was no one to watch the night. One by one, under the organization of their respective captains, they rushed up the city wall to find their respective defense zones.

When Di Ping was on the top of the city, he found that there were all kinds of materials on the wall, including huge woods and bricks, all in piles and piles. There are many city guards who are holding weapons and guarding them. Observing the movement outside, from time to time a team quickly rushed up the city wall and rushed to their respective positions. Only slight footsteps were heard throughout the whole process, and there was no sound, as if it were a silent movie.

A touch of whiteness has appeared in the east, and the world is still very dark, but the shining light from the milky white bricks on the city wall reflects everything on the city head very clearly, even ordinary people can see the road clearly.

Standing at the head of the city and observing for a while, although the roar of beasts was heard from time to time in the forest, it was sparse after all. From this point, it can be judged that the mutant animals have not moved in large areas.

When they came to the tower, Cheng Chao, Lu Guoliang and Lu Guoliang were sitting in the command pavilion above the city gate, guarding a small lamp, and they were whispering something.

"What are you discussing?!"

Di Ping walked into the city gate and asked about this scene.

Last night, many people stayed up all night. For example, Cheng Chao, Lu Guoliang, Han Zhongguo, and the captains of the five major teams did not fall asleep. They were busy with various defensive materials, task division, organization and cooperation, and they had to stare outside the city. They don't dare to disappear as soon as they are assigned tasks like Di Ping. There are too many things for them to do.

Several people were busy all night, talking about how to defend today, such as assigning personnel and other issues. Di Ping suddenly frightened the seven people who were watching attentively.

"Ah! City Lord, are you here?"

Several people were taken aback for a moment, but then reacted and hurriedly stood up and said.

"You haven't slept all night!"

Di Ping looked at the eyes of several people and asked with exhaustion and concern.

"City Lord, this battle is just around the corner, we can sleep! What's more, all kinds of combat materials have to be transported, and personnel need to be deployed. If you are too busy, dare to sleep!"

Cheng Chao said with a wry smile.

"Yes! Lie on the bed without closing your eyes, you can only get up!"

Lu Guoliang also shook his head helplessly.

"Don't you guys have a good rest, will you have energy in the fight today?"

Di Ping looked at the tired eyes of the two and shook his head helplessly.

"It's okay if you don't sleep for a night. I used to spend my nights and nights. This is only one day. I promise not to delay business matters!"

Lu Guoliang helped the gold line glasses and smiled indifferently.
