

Eight Uncles 93

Chapter 93 Pass by Each Other Again

Blake's mind went back to the past.

After his grandfather died, Blake did not return to ordinary life but chose the same path as his grandfather to continue his grandfather's unfinished mission.

At seven, the underworld people found his grandfather's identity and also killed his parents in revenge. As they hunted him down, he hid and wandered for eight years.

At fifteen, when he grew up, his appearance changed drastically. So he changed his name and successfully entered that underworld group.

At twenty, he became the leader of the underworld group known as Mr. Dark, but he had to take drugs to cover his true identity.

At twenty-one, five years ago, when he was about to complete the mission, his partner betrayed and exposed his identity.

As a result, the boss of the underworld group injected him with ten B-drugs.

B-drug was a club drug, and there was an unwritten rule about injecting B-drug, which was bringing women.

When cracking down on this kind of drug crowd, the police officers often encountered extremely chaotic scenes while breaking into the house. The people must have a mess inside. Because of the characteristics of that drug, he could not control himself after injecting ten B-drugs.

He did not even know how he caught Jean. The only thing he remembered was Jean's panicked and despairing eyes.

Thinking of that, Blake felt a sudden pain in his head. He could not help but rub his eyebrows.

During those years of lurking, he did things recklessly and never considered guilt, except for Jean's matter.

When the organization rescued him, they also wiped out the underworld group, then forcibly sent him to a secret training camp for drug rehabilitation.

The drug was terrible because it could destroy all wills. He could not escape its consequences either.

After two years of abstinence in the training camp, the organization dared not release him, so they sent him to the frontier battlefield. With the cruelty of blood and war, he finally got out from the bottom of the abyss.

Now, he was back. The first thing he did when he came back was to find Jean, the girl he had destroyed five years ago, but only to discover that she was also dead.

Blake watched the traffic outside.

During those eighteen years, all his close relatives died. Most of his comrades sacrificed. The only girl he ever slept with also died. It was as if he had nothing left.

Blake looked at Lilly in the photo.

and two shallow dimples.

“Lilly...”
