

Rebirth of the Evil Life #Chapter 11 – 20

Read Rebirth of the Evil Life Chapter 11

Chapter 11 Crazy stock market

However, because the stock market is so hot, Lin Feng is still obsolete by his relatives. There is no other reason. Although they have been chasing Yi'an Technology, they have not been able to buy the goods. Finally, they watched Yi'an Technology all the way to 105 yuan before eating all the goods, which made relatives who wanted to make a fortune. How not to be annoyed.

Especially after the relatives knew that Lin Feng had been holding 25 hands of Yi'an Technology in his hand and did not sell it, it made them bitter towards Lin Feng, thinking that this nephew was too unkind. He made a fortune in a muffled voice, but didn't tell them these relatives.

This also directly led to Lin Feng being besieged by the elders when he was eating the New Year dinner on the twenty-ninth lunar month. If he hadn't been dragged by his father, Lin Feng would almost leave.

I do know that Yi'an Technology will skyrocket and didn't tell them the exact news, but can you blame me? ——Lin Feng's heart was about to explode. If it weren't for these relatives to spread the news after they heard the news, it would make the city full of storms in a short time, would he change his mouth? Otherwise, if it is allowed to continue, the black hand behind Yi'an Technology will definitely have a "high-level diving" and another "catch-up", which can strike out most retail investors in three or two, and their losses will be even more miserable at that time.

What's more, they are also making money now. Although they all went in at 105 yuan, as long as they sold it at 126 yuan, the profit was still a lot this time, but they were still not satisfied. ——The human heart is not enough to swallow an elephant.

All in all, the reunion dinner on the 29th of the twelfth lunar month was the most depressing reunion dinner that Lin Feng had ever eaten.

The next day is the 30th of the twelfth lunar month. Lin Feng closed the door early and accompanies his father at home to prepare New Year's Eve dinner.

In the evening, after a burst of firecrackers, the New Year's Eve feast officially began.

"Knock, knock, knock" suddenly there was a knock on the door.

Lin Feng was taken aback, wondering who would knock on the door at this time.

“Big Brother Lin, the younger sister and the girl-girl are here for a New Year dinner.” After opening the door, the mother and daughter Huang Shuqi stood outside. Aunt Huang holds a plate of steaming dumplings and a few delicate dishes.

“Haha, please come in quickly, please come in quickly. Xiaofeng and I were too deserted during the Chinese New Year, and you just came to lively and lively.” Lin Qixiong laughed and invited Huang Shuqi’s mother and daughter in. In previous years, due to the close relationship between the two families, Lin Qixiong would invite Aunt Huang’s family to his home on the 30th of the twelfth lunar month to have fun. But after Lin Feng failed the college entrance examination last year, Aunt Huang refused Lin Qixiong’s invitation during the Chinese New Year. Therefore, Lin Qixiong did not invite Aunt Huang and his family this year.

“Brother Xiaofeng, happy New Year’s Eve!” Huang Shuqi happily jumped in holding a bottle of orange juice. The happiest person today is Huang Shuqi. Last year, because Aunt Huang was banned from coming up, Huang Shuqi had a very dull New Year.

Amidst the deafening sound of firecrackers, the New Year’s Eve dinner of the Lin family and the Huang family began.

“Xiaofeng, this cup is from your Aunt Huang to respect you. Thank you for showing your Aunt Huang a way of making money. Otherwise, Aunt Huang doesn’t know that Shuqi child will be admitted to college next year. Where can my mother raise money for her? The tuition to go to college.” Aunt Huang drank the wine in her hand in one sip.

“You are too polite, Aunt Huang, everyone earns money if you have money!” Lin Feng just smiled and drank the wine in his hand.

“Brother Xiaofeng, this is my respect to you. May your business be prosperous in the new year.” Huang Shuqi used orange juice instead of wine and toasted Lin Feng.

“Haha, I also wish you a good university in July next year.” Lin Feng drank it.

On New Year’s Eve, the two families spent the night happily and warmly. Compared with the reunion dinner on the 29th of the twelfth lunar month, Lin Feng felt that it was a reunion dinner tonight.

The next day, the first day of the new year, Lin Feng didn’t want to go door to door to pay a New Year’s greetings and suffer because of his relatives burying himself. It’s the New Year’s Day, which is also the best time for Internet cafes, and they are ready to open their doors early in the morning.

“Congratulations on getting rich, bring the red envelope!”

As soon as the door was opened, a shadow jumped in.

Lin Feng was taken aback for a moment, then he was happy.

auzw.com

“You are not allowed to laugh. People come to visit Xiaofeng Ge early in the morning. If you don’t have a red envelope, you are not allowed to go out!” Huang Shuqi scowled and raised her fist, but after a few seconds, she chuckled.

“Brother Xiaofeng, this is my New Year gift for you.” Huang Shuqi took out a piece of paper from behind.

Lin Feng opened it and saw it was a sketch painted with watercolor brushes. In the painting is a brightly lit room, and four people sit warmly and eat dinner together. In the lower right corner of the drawing paper, there is also a pen written with the word “home”. If you look closely, you can clearly recognize that the four people in the painting are themselves and their father, as well as Huang Shuqi and Aunt Huang.

“Did you paint this?” Lin Feng exclaimed, “Shuqi, you paint so vividly, I think you can become a painter in the future.”

“Hehe!” Huang Shuqi put her hands on her back, sticking out her tongue, and smiled shyly.

Alas, it seems that it is really just as simple as family. ——Lin Feng felt a little bit lost in his heart.

“By the way, come, Shuqi, this is the red envelope from your Xiaofeng brother.” Lin Feng put away the painting and took out a red envelope from his arms.

“No, Brother Xiaofeng, this is too much.” Huang Shuqi looked at the bulging red envelope and immediately pushed it back.

“Next, you are going to take the college entrance examination in a few months. You can use this money to buy some nutritious food.” Lin Feng couldn’t allow Huang Shuqi to argue, and forcibly stuffed the red envelope into Huang Shuqi’s pocket.

“Okay, I’m going to open a store, study hard!” Lin Feng waved his hand and left.

On the seventh day of the first month, Internet cafes adjusted their prices unanimously, rising from 3 yuan to 4 yuan per hour. However, the price increase can not resist the enthusiasm of the Chinese New Year students to play games. Not long after the door was opened, the Internet cafe was full.

During the Chinese New Year, the students have money in their hands (the New Year’s money), and as a result, they occupy the daytime game time. It is not until the overnight and night time that it is the turn of the restless game masters who are waiting early.

While these game masters urged the students to go home and sleep quickly, they also made Lin Feng and other Internet cafe owners earn a lot of money.

The New Year's time always passed quickly. Lin Feng stayed at the Internet cafe every day, eating rice cakes and other snacks bought during the Chinese New Year, drinking beverages, and counting banknotes. This life is extremely pleasant. Huang Shuqi also occasionally comes to the Internet cafe to help in her spare time. When she is there, she always laughs constantly, and time flies quickly. Of course, people who are addicted to games often unconsciously gameover.

When the national holiday ended on the seventh day of the first lunar month, Lin Feng settled the accounts. From the New Year to the present, in 42 days, the gross income of seven computers in Linfeng Internet cafes totaled 13,780 yuan. Excluding various taxes, rent, electricity and other expenses of 2,200 yuan, a net profit of 11,580 yuan.

Aunt Huang has five computers in the Internet cafe. The 45-day gross income is 10,180 yuan. Excluding all the expenses of 2,130 yuan, the net profit is 8,050 yuan. Seeing this astonishing number, Aunt Huang was so excited that she was secretly grateful to Lin Feng, and she was more kind to Lin Feng.

However, at this time, the Computer City in Chu City has not yet opened, and Lin Feng and Aunt Huang have not added computers for the time being. Aunt Huang also decided not to repay Lin Feng's 1,000 yuan, but to add a computer first. After all, every additional computer now earns more than 50 yuan in income every day.

However, at this time, Lin Feng's attention has not been placed on the Internet cafes, but has turned to the stock market.

When the market opened on the first day of the new year, Yi'an Technology set its daily limit, and the stock price reached a high price of 115.5 yuan. It's not far from the highest price in Lin Feng's memory.

The daily limit was set on the first day of the new year, which made investors who had hesitated to sell Yi'an Technology stocks become crazy again. There are more people chasing. At this time, there is no reason in the minds of investors, and some are just the rising sun line of Yi'an Technology.

That night, countless stock commentators on TV changed their tone of the previous year, and their wild words on TV also added a catalyst to this madness. This expert predicted that it would rise to 150 yuan, the veteran threatened to exceed 200 yuan, and some so-called financial scholars even boasted that Yi'an Technology would become the world's most expensive stock.

Lin Feng has only two words to describe their behavior-running dogs. These so-called stock review experts must have received the black money from Yi'an Technology, and misled the national investors on TV without conscience.

The stockholders randomly interviewed by the TV station in the stock exchange found that those who bought Yi'an Technology were excited, and those who did not buy it were stomped and annoyed, and threatened to buy Yi'an Technology tomorrow.

Lin Feng shook his head helplessly-don't you know that the stock will not rise forever.

Chapter 12 Self-inflicted, can't live

"Bell the bell "

"Hey!" Lin Feng didn't have to think about it and knew it must be a relative's phone number. Thinking of the siege of the people on the 29th of the twelfth lunar month, Lin Feng didn't want to pay attention to them, but looking at his father, Lin Feng had no choice but to put aside his unhappiness.

"Lin Feng, how much will Yi'an Technology rise to? Do you have any news?" Aunt is a real stock fan among relatives.

"Well, aunty, the maximum 126 yuan will be thrown away, otherwise it will definitely fall." Now Lin Feng is no longer afraid of leaks. Yi'an Technology has risen to this level, and it will definitely not deviate from the historical trajectory.

"126 yuan? You are so sure. The previous few times you always said that the news could not be confirmed, which caused us to make a lot of money." Auntie displeased Lin Feng for the "fake" news several times before.

"Well, no matter how many shares you have this time, you must let go of them if you exceed 126 yuan." Lin Feng said with certainty.

"Really?" The aunt hung up the phone dubiously.

"Bell the bell "

The phone kept ringing. They were all calls from relatives asking if Lin Feng had any insider information. For these elders, Lin Feng had done his best to tell them that Yi'an Technology had to throw it away after 126 yuan. However, judging from their tone, it seems that they did not believe Lin Feng's warning very much, but revealed suspicion, suspecting that Lin Feng would be on holiday again.

Lin Feng could only helplessly smile at the suspicion of his relatives. Perhaps now, in the eyes of these elders, he is no different from the kid who shouted "The wolf is coming."

On February 17, 2000, Yi'an Technology reached a peak of 126.31 yuan. In the securities trading floor, every one percentage point increase of Yi'an Technology will

attract unanimous applause and excited applause from all investors, applauding the magic of this stock.

At 10 o'clock in the morning, when Yi'an Technology broke through 126 yuan, he sold out 25 lots of stocks in his hand, exchanged for cash yuan, and returned the 50,000 yuan that he borrowed. However, the relatives on both sides of the parents did not sell one. They believed in the words of stock commentators that Yi'an Technology would break through the 130 yuan mark at least.

"Dad, tell your aunt and the others, in any case, you must sell Yi'an Technology today, or they will regret it." As a last resort, Lin Feng asked his father to call his relatives on both sides. Everyone with relatives, Lin Feng couldn't just watch them fall into this pit.

Of course, Lin Feng was more afraid of their siege. Remind them early that no matter whether they sell or not, they can no longer use it to bury themselves at that time. If you don't remind them, they will all be paid in by the time, and Ken is afraid it is not as simple as complaining about Lin Feng.

"Hey, my third sister, my son said, I must sell Yi'an Technology today." Lin Qixiong dialed the phone, but before he finished speaking, there was a lot of noise in the microphone.

"Boss, it's not my sister who said you, Xiaofeng, this kid is too rude. He squeezed the stocks to make money without telling us the information. Now we have finally bought it again and want us to sell it again! Why, he is too timid to play, and he won't let us buy. Is he afraid that we are also making money? He looks uncomfortable. Brother, if there are too many, I won't say anything, I will look at the stocks." Aunty counted. Behind, hung up the phone.

Lin Qixiong was stunned for a while, wondering where the third sister was so angry. The stock is inherently risky, and it is normal for Xiaofeng to not confirm it before. Now that the price is so high, it is more kind to remind them to avoid risks. Unexpectedly, they have been met with a lot of criticism.

auzw.com Lin Qixiong's comments made Lin Qixiong a little uncomfortable.

The result was the same. I heard that Lin Feng asked them to sell the stocks now. They all complained and criticized Lin Feng for not wanting to hinder them from making money. Some even bluntly said that Lin Feng only wanted to make money for himself, and he could not see others make money. In the end, none of them sold, and they squeezed the stocks to death, waiting for Yi'an Technology to break through the rumored 130 yuan mark.

Then it is 140 yuan, 150 yuan

Regarding this, Lin Feng could only sigh that these people were blinded by the lard, and could not see the powerful relationship. Forget it, I have tried my best, and they don't listen to me, so what can I do.

On February 18, 2000, Yi'an Technology rarely stopped its upward trend, and the stock price remained unchanged throughout the morning. This is a red flag, but it is considered by investors to be a hidden signal before the next wave. Not only did no one use this last escape opportunity to sell the stocks that they had made a lot of money, but more people poured in for fear that they would not be able to keep up with the next wave of rising prices.

Regarding this abnormal situation, Lin Feng once again asked his father to call all his relatives, but the result was still the same. Not only did no one listen this time, he took out the words of various stock review experts to refute Lin Feng and even mocked Lin Feng for his timidity. , But can't tolerate others to get rich.

Heaven does evil, and you can live. Do not live by committing sins. –Lin Feng sighed long.

On February 21, 2000, the stock market had just opened. After Yi'an Technology rose slightly by one point, when many investors shouted and cheered, it fell to the limit in less than ten minutes.

The green numbers made all the investors in the stock exchange dumbfounded, rubbing their eyes desperately and couldn't believe the scene before them. Everyone, you look at me, I look at you, they are all stupid.

All the stock exchanges in the country were silent at the same time unexpectedly, and unexpectedly broke the Guinness World Record for keeping the largest number of people quiet at the same time. It's just that this record is definitely not good luck.

“Don't worry, everyone, rest assured, this must be a technical callback, and it will definitely rise tomorrow.” An old stockholder suddenly climbed up and shouted, not knowing whether he was comforting everyone or comforting himself, but he was echoed by all stockholders and published their own opinions. The view, without exception, is that this is only a short-term callback. Perhaps they have faintly felt uneasy in their hearts, but at this time, they have no retreat and can only comfort themselves in this way.

“Hey, Xiaofeng, how exactly is Yi'an Technology? Is it a technical callback?” After the stock market was closed in the afternoon, relatives flocked to Lin Feng's small internet cafe. After changing the ridicule of Lin Feng two days ago, he looked helpless and blank, as if the drowning person wanted to grab the last floating straw.

“Sell, you can sell as much as you can, Yi’an Technology will continue to fall, there is no hope.” Lin Feng could only comfort them so much. However, I knew in my heart that it was in vain to want to escape from the dead at this time.

The subsequent trend was as expected by Lin Feng. Yi’an Technology vented to the end and did not give investors a chance to escape. All investors could only watch with tears the rapid depreciation of the high-priced stocks in their hands, and the hard-earned money accumulated over the years was turned into this way. Nothing.

“Xiaofeng , your aunt is so miserable , Xiaofeng, tell your aunt, and see if there is any way!” As Yi’an Technology went down all the way, the relatives also rectified The sky came to the door, crying about the sharp decline in stocks, and the hard-earned money turned into a bubble in an instant.

In addition to shaking his head or shaking his head, Lin Feng has warned you repeatedly before that if you don’t listen, what can I do. Even if Avalokitesvara Bodhisattva is invited, it will not be able to save Yi’an Technology.

In the end, Lin Feng was entangled in helplessness, so he had to temporarily leave the Internet cafe to his father to take care of, went out to take refuge, and found the next place suitable for investment.

Now that we have 250,000 funds on hand, we already have the foundation to expand the appearance of Internet cafes. What is missing is a good location. A prime location where you can continue to develop Internet cafes.

Chapter 13 Geographical advantage

In February 2000, Chu City just launched the isdn business, but due to data traffic problems, except for a few computer rooms transformed into semi-network and semi-computer rooms, most computer rooms still did not provide network services. However, the fact that computer game rooms make money has also stimulated most families who want to make money. Computer game rooms have sprung up all over the city of Chu. However, during this period, most of them were family workshops, with only a few computers. The real large-scale network city will not appear in Chu City until one year later.

Lin Feng’s computer game room now has 7 computers, but there have been eight new ones in the Liaoyuan District, including Lin Feng’s one, and there are nine computer rooms in total. The supply and demand of the entire community is becoming saturated. However, you can still see the facade of the building is starting to renovate and preparing to open a new computer room.

Lin Feng knew that in another month, the computer room in Chu City would start a price war, and the hourly price of computers would rapidly drop from the current 3 yuan per

hour to 2 yuan per hour. For this fierce price war, Lin Feng has long thought of a countermeasure-relocation.

Lin Feng plans to relocate the computer room to the Lanzhou District away from the city center. It seems remote, but in the following years it became the most popular place for Internet cafes. Because there is one university, two middle schools, and one elementary school, the location is unique. Although there are now seven or eight Internet cafes in the Lanzhou Special Zone, they are all small Internet cafes, with a maximum of 10 computers. Under the demand of a large number of students, it is not enough. Now it is definitely the best time to open an Internet city.

Chulian Bookstore is the only large-scale bookstore in the Lanzhou Special Zone. It has two floors and is nearly 1,000 square meters in size. However, although there are many schools here, the business is not good. The main reason is that the original books in bookstores are too expensive. Many students would rather take a taxi to the pirated book market in the city to buy books than here. After all, the price of buying a genuine book can buy three pirated books. Moreover, the appearance and content of the two are almost the same. For students who have no income, they will naturally choose to buy books at the pirated book market.

Chu Zhixuan, the owner of Chulian Bookstore, gritted his teeth and insisted on it for a year, but had to admit that the investment failed this time. I want to transfer the storefront and become a charter company dedicated to collecting rent. It has been more than a month since the storefront sales sign has been listed, and no one has ever come to take over. During the period, some people wanted to take over, but only rented the first floor. And Chu Zhixuan wants to rent out the two floors together. Otherwise, if you rent one floor, who will rent the second floor to. Because of this, the owner of Chulian Bookstore is still supporting the bookstore.

“Boss, are you renting out this shop?” Lin Feng took a fancy to this shop at a glance. The location is really good. It is close to the university and between the middle school and elementary school. If you open the Internet City, you will definitely make money. Two years later, there was indeed a foreign owner who opened an Internet city here, and became a leader in the Internet cafe industry in Chu City.

“You are” Chu Zhixuan looked at Lin Feng suspiciously.

Lin Feng was too young, and Chu Zhixuan had to wonder if he was here to make trouble.

“I want to buy this store. I don’t know if the boss is there?” Lin Feng also knew that he was too young, and he was not an old man like Oden. It is normal to be suspected.

“Uh, I am the boss, sir, please come in and talk.” Chu Zhixuan quickly invited Lin Feng into the reception room. As long as he can sell the shop, he is young or not.

“Boss, why don’t you show me first.” Lin Feng is anxious to see how the space is arranged. He has his own ideas. He hopes that the layout here can meet his liking, and it is best to not need to decorate it. No way, funds are limited!

“Excuse me, I want to ask first, do you want to take both floors, or only one floor?” Chu Zhixuan has also learned a lot. If Lin Feng only takes one floor, he won’t be too lazy to take Lin Feng with him. Looked.

“Both floors are available.” Lin Feng’s words made Chu Zhixuan overjoyed, and he quickly closed the bookstore and led Lin Feng to visit all the way.

After a visit, Lin Feng was very satisfied. Not only was the layout of the house reasonable, but it was decorated only last year, so he almost didn’t need to decorate it. I just don’t know the price.

“The rent is twelve thousand per month, but you have to pay a deposit of 100,000 yuan first.” Chu Zhixuan’s words made Lin Feng stunned.

The two-storey store with nearly one thousand square meters under 12,000 yuan is not expensive, and the store needs to be at least 200,000 yuan in the city center. But for Lin Feng, the main problem is the 100,000 deposit. Lin Feng now has only two hundred and fifty thousand in cash on hand, and there is not much left after paying a deposit of one hundred thousand.

Lin Feng calculated that if he paid a deposit of 100,000, he could only add 25 more computers at most, plus the original 7 and only 32 computers. And this two-storey storefront can hold up to 500 computers, which is a little bit of space by then. But now that he is not playing, Lin Feng is afraid that as soon as he opens the computer room, someone will see the computer room making money and take it down. Then Lin Feng will regret it. And for future development, it is profitable and harmless to take an inventory here early.

auzw.com

“Boss” Lin Feng can only communicate with Chu Zhixuan now to see if he can get rid of the deposit. After all, he runs the computer room by himself, and the computers are all here, and he can’t even run if he wants to.

“Boss, I don’t have enough funds now, can you see if you can temporarily not pay the deposit.” Lin Feng asked.

“No, how can this be done? If something happens to you and run away, who do I call.” Chu Zhixuan shook his head repeatedly, resolutely denying it.

“Boss, how could I run? I’m also from Chu City. Look, this is my ID card. Where can I go.” Lin Feng took out the ID card. “Otherwise, I will temporarily hold the ID card. In your case, you will return your ID card when you pay the deposit someday.”

“This” Chu Zhixuan hesitated a little. After all, it had been a month since no one had come to order this shop. He also wanted to throw away this burden early and go home safely as a charterer.

“Boss, everyone is from Chu City, and I really want to take this store, so please do me a favor! I will definitely not mess around and cause you any trouble.” Lin Feng strikes while the iron is hot.

“Brother, brother, I am older than you, so I ask you to call you brother.” Chu Lian said in a deep voice, “Brother, I can see that you sincerely want to buy this store. Brother, I am also sincere. Want to rent out, you tell me the truth, what business are you going to do?”

Boss Chu Lian didn’t know what Lin Feng used to do, so he had to ask clearly.

“Brother, let’s tell you that, I want to open a network city.” Lin Feng thought for a while and felt that there was nothing to hide, and he was not afraid that Chu Zhixuan would stop renting after hearing this.

“Net City? Little brother has good eyesight.” Chu Zhixuan repeatedly praised Lin Feng’s vision, and Lin Feng was inexplicable.

“Hehe, brother, I have long wanted to open an Internet cafe, but I am afraid of opening a bookstore, so I have never dared to open it.” Chu Zhixuan smiled bitterly, “brother, to tell you the truth, the students in these four weeks have been stunned. There are few Internet cafes around the school and there is always no chance. You will definitely make money if you open an Internet city.”

“Haha, thanks to my good words, I wonder if my brother can temporarily waive this deposit?” Lin Feng said with a smile.

“Brother, okay, who told us to join in.” Chu Zhixuan really doesn’t want to maintain this bookstore anymore, and Lin Feng’s appearance is really harmless to humans and animals. Keep it first.”

“Well, of course, of course.” Lin Feng was also delighted. With an extra 100,000 yuan, he could be equipped with nearly 20 more computers.

“Uh” Chu Zhixuan stopped suddenly, thinking for a long time, looking embarrassed.

“Brother, if you have something to say straight.” Lin Feng was also happy when he took this place.

“Brother, that brother, I just said it straight.” Chu Zhixuan rubbed and said, his face turned reddishly, “brother, brother, I also want to invest in your network city, I wonder if my brother can agree?”

Lin Feng's expression changed when he heard it. It is absolutely impossible for him to let anyone interfere in his internet cafe. Otherwise, disputes will definitely arise in the future because of disagreements between everyone's ideas.

Chapter 14 Combining both benefits

Chapter Fourteen: Together, Both Benefits (This chapter is free)

“Only tolerance can tolerate people, and only thick can carry things.-Xue Xuan.”

Chu Zhixuan was over thirty, and he had a natural ability to observe words and looks, and when he looked at Lin Feng's expression, he knew that he did not want to buy shares by himself. But the boss of Chu Lian was really unwilling to become a charter company, and she was really moved when she learned that Lin Feng had come to open an Internet cafe. If it hadn't been for the loss of a bookstore, he would have been scolded by his wife every day, and he would have lost his confidence. He would have opened it himself.

“My brother, don't get me wrong, I just want to share a little bit of money every year, and never get involved in the daily management of Internet cafes.” Chu Zhixuan quickly clarified the relationship, saying that just investing in shares is not about actually managing Internet cafes.

Lin Feng could barely accept the fact that he did not participate in the management of the shareholding. However, Lin Feng also knows how popular the Internet cafes here will be in the future. Although there are some Internet cafes in the surrounding area, there will only be this one here in the large-scale Internet city. The future trend is to make money in online cities, and small Internet cafes have been squeezed across.

After thinking about it, Lin Feng decided to listen to Chu Zhixuan's proposal for a shareholding first. If Chu Zhixuan buys shares, then at the beginning, a few more computers can be added, and the development will be faster. Although the profit will be less, Lin Feng does not expect to rely on Internet cafes to soar. He has other plans. Internet cafes are just a stepping stone for him to take off.

“Then I don't know how my brother is going to buy shares?” Lin Feng asked.

“Brother, brother, I'm going to do this.” Chu Zhixuan was pleased when Lin Feng's mouth became loose. Although he wanted to buy a stake in Net City, he was even more afraid that Lin Feng would be scared off because of this, and his store would not be sold.

“Brother, I use the store rent to buy shares, and only 30% of the profit.” Chu Zhixuan the lion said loudly.

Lin Feng coldly smiled, 30% of the profit, you are simply stealing money. If you turn on 500 computers in the later period, if you calculate it at 1 yuan per hour, 30% of the profit a month is scary. You must know that the geographical environment here is too generous, and there are no more than a hundred computers around. Future profits will definitely make everyone jealous.

“Brother, what you want is too cruel.” Since Chu Zhixuan was asking for a price, Lin Feng had to sit on the ground and pay it back, “I can give you half of the profit at most.”

“Half-percent? No, it’s too low. My store has the best location around it, and it will definitely appreciate in the future.” Chu Zhixuan also knew where his advantage was.

“Brother, your store has limited room for appreciation. After all, it is not a prime location, but once I have the computer equipped in the future, the profit will be large. Your 30% profit is too hard.” Lin Feng did not let go.

“Brother, otherwise, 25% of the profit.” Chu Zhixuan is also bargaining.

“No way”

The two men quarreled, and after some bargaining, they finally reached an agreement. Chu Zhixuan buys shares in the store, and its monthly profit is divided into two and a half. In the first three months, Chu Zhixuan bears all expenses such as electricity and water bills for the network, and is responsible for opening the network. The agreement also stipulates that all the turnover in the three months prior to opening must be used for the purchase of computers, in addition to the necessary living expenses. Add computers in the future and share the cost according to the shares of the two. Lin Feng is responsible for the management of the Internet cafe, and Chu Zhixuan is only responsible for dividends, regardless of affairs.

Finally, he specifically noted that as long as Lin Feng was still opening an Internet cafe here, Chu Zhixuan could not take back the shop for excuses.

The reason for adding this item is that Lin Feng is afraid that Chu Zhixuan will see the Internet cafe’s booming business and kick himself away, leaving him to run it alone. After all, for a network city, funding is easy to solve, and a good location is hard to find. Such a good place will definitely make anyone jealous.

After the two reached an agreement, they smiled at each other. This agreement can be said to have its own merits. Lin Feng can use all of the funds to purchase computers in the initial stage, and Chu Zhixuan invests in an industry that he has long coveted at almost no cost.

Of course, Chu Zhixuan really admired Lin Feng's eloquence and ability, thinking that he was completely unlike a 19-year-old boy. Lin Feng just smiled. On the surface, he looked only 19 years old, but he lived for 29 years before he was reborn. He had worked as a salesperson, a binder, a porter, an operator, a printer, a draftsman, and had rich social experience. How could he be like this? It's as ignorant as a teenager.

A week later, the "Chufeng Internet City" was opened by the two names. There are 50 computers in total at the time of opening, and the cost is 3 yuan per hour, and 20 yuan for the night package. Employ 3 cashiers and 1 hygienist, and Lin Feng will be the network manager for the time being with his own salary.

Originally, Lin Feng also wanted Aunt Huang to invest in "Chufeng Net City", but Aunt Huang refused to take care of Huang Shuqi nearby. Reluctantly, Lin Feng finally had to recommend a reputable and reasonable network administrator to Aunt Huang. Only in this way, Lin Feng could no longer enjoy the quiet, starry trail every night.

The relatives on both sides of the parents also desperately accepted the fact that Yi'an Technology kept dropping all the way during the past half a month. Empty eyes and indifferent expressions are the true portrayal of all stockholders who have bought Yian Technology stocks. Many investors who were almost crazy even went to the temples where the rumors were extremely obvious, but they still could not restore the sharp decline of Yi'an Technology.

The entire market is in depression, and I don't know how many families have fallen into a situation where they are in desperate situation. In the end, his father couldn't see it and asked if Lin Feng could help his relatives and let them invest in Lin Feng's newly opened Internet City.

Lin Feng would naturally not agree with this. Aunt Huang was asked to invest in shares before. First, Aunt Huang had little capital and would not pose any threat to Lin Feng after the shareholding; second, it was based on Huang Shuqi's face. Now if these relatives are allowed to buy shares, there will be ten relatives on both sides of the parents. Once they buy shares, Lin Feng will become a minority shareholder instead. If there is a quarrel, it will be strange that the Internet cafe will not break up. Lin Feng would never allow this kind of thing to happen.

However, due to his father's painstaking persuasion, Lin Feng could only promise to introduce another business with a large profit rate to his relatives who had lost money this time. As for the mother, he didn't put any pressure on Lin Feng. After all, his son had warned them again and again that they didn't listen to who was the stranger.

After dealing with the entangled relatives, Lin Feng's "Chufeng Net City" also officially opened.

The opening of “Chufeng Internet City” caused a sensation in the Lanzhou Special Zone, especially among students. Although there used to be seven or eight Internet cafes here, they were also online, but firstly, there were few computers, and secondly, the space was too small. In addition, after some people smoked, the air was extremely unbearable. As a result, almost all the boys in the Internet cafes were there. Playing games, I rarely see girls surfing the Internet here.

After the opening of “Chufeng Internet City”, this situation suddenly changed. The predecessor of “Chufeng Internet City” was a bookstore. In order to attract students to come to buy books, Chu Zhixuan not only made the bookstore spacious and bright, but also ensured good air circulation. After transforming into a network city, there is no change in the hardware facilities. And because Lin Feng himself hates the smell of smoke, he also postponed the bookstore’s smoking ban.

At the beginning, many smoking students boycotted “Chufeng Net City”’s anti-smoking regulations, but this rule caters to all girls and non-smokers. In contrast, “Chufeng Net City” ushered in instead. More customers. In the end, those students who resisted the ban on smoking also had no choice but to return to the “Chufeng Internet City”. After all, all the beautiful women who surfed the Internet in the Lanzhou District gathered here.

Why do men go online? There is no answer except beauty.

In the early days, due to the large number of people surfing the Internet and the small number of computers, Lin Feng also specially added a lot of sofas and chairs so that the students who were waiting for the empty computer could rest while reading when they were bored, so as not to be confused. This move also greatly increased the popularity of “Chufeng Net City”. It was an unexpected gain.

Lin Feng finally added a bar on the first floor to sell some drinks and biscuits. Lin Feng himself also played online games in Internet cafes all night, knowing that drinks and biscuits are what he needs most at dinner time or when surfing the Internet all night. Although there is food outside, few people will give up the game and go out for a midnight snack. Drinking and eating biscuits is the most suitable choice for all netizens, that is, it is economical and affordable.

Besides, this can also bring extra income to “Chufeng Net City”, why not do it!

For seven days in a row, the “Chufeng Internet City” was full of seats, making Chu Zhixuan delighted with the success of this investment, but secretly regretted that the dividend was only two and a half. In general, however, the cooperation between the two is considered an initial success.

After one month of business, Lin Feng settled the bill, the computer operating income plus the gross income of the bar non-staple food totaled 84,000 yuan. In addition to the corresponding tax of 1,200 yuan, the three cashiers each had a salary of 600 yuan, a total of 1,800 yuan, and a health worker’s salary of 500 yuan. Lin Feng’s network

manager has a salary of 1,000 yuan, making a total of 79,500 yuan. Lin Feng also used all the money to buy computers according to the agreement.

One month after the “Chufeng Internet City” opened, the original 50 computers have become 63 computers. At this time, the computer configuration has been upgraded to: Celeron 664, 128m memory, 16m HASEE graphics card, 20g hard drive. This configuration has been able to run the Red Alert Yuri’s Revenge smoothly, and naturally it can also meet the needs of Lin Feng’s next plan.

At this time, Aunt Huang also owns seven computers in the Internet cafe, and her business is still booming. However, due to the large number of Internet cafes in Chu City, the hourly Internet fee has been reduced from the original 3 yuan per hour to 2.5 yuan per hour, and this price reduction trend does not seem to stop. This also made Aunt Huang secretly admire Lin Feng’s foresight and left this tense “battlefield” early.

With the expansion of “Chufeng Internet City”, the scattered Internet cafes around them also feel the pressure, but at this time the Internet cafes are still in short supply. Students looking for computers to access the Internet can be seen everywhere, which also makes these Internet cafe owners relax their vigilance, which also makes them lose money. The last chance of survival in the future.

“My brother, I think the computer is very empty in the morning. It’s a waste.” Chu Zhixuan is fine now and likes to come around. Although he only pays 25% of the dividend, he can still get a monthly gross income from 50 computers. 84,000 yuan, he silently calculated that if 500 computers were added, there would be 840,000 yuan in one month, which is an astonishing number. He can divide at least 2100 million, which is something that he didn’t even dare to think about before. Therefore, Chu Zhixuan is also very concerned about the net city’s income, which makes him feel uncomfortable when he sees that the computer is empty now.

What’s empty is money! -Chu Zhixuan cried out in pain.

“Haha, don’t worry, brother, I have already planned.” Lin Feng smiled slightly, and he knew that “Chufeng Net City” would slowly enter the prosperous period after the initial popularity. But because students have classes every morning, they can’t be as popular in the afternoon and evening, but Lin Feng is confident to pull them back from class. Although this is a bit sorry for the future of the motherland, but all this is Zhou Yu’s fight against Huang Gai, one willing to fight and the other willing to suffer, no one can blame.

“Brother, will help me to display some advertising banners later.” Lin Feng smiled mysteriously.

Chapter 15 Local world

Lin Feng's plan is to let the "Era of Empires" and "StarCraft", which have already begun to be popular in the country, but have not yet been popular in Chu City, enter everyone's field of vision in advance.

Lin Feng believes that "Age of Empires" and "StarCraft" can definitely make a large number of students skip classes to appreciate their charm, because Lin Feng himself has been crazy about these two games day and night. The popularity of these two games was only slightly eased until the advent of another game, "cs", but even the most prosperous days of "cs" could not prevent a large number of players from becoming more concerned about "Age of Empires" and "StarCraft". favorite.

In Lin Feng's memory, "cs" should be more than half a year before it officially entered China, and it was only a year after it officially entered Chu City. Lin Feng believes that in the next year, with these two games, "Chufeng Internet City" will definitely continue to be popular, and the surrounding Internet cafes will surely decline slowly because of this.

The inherent disadvantages of small Internet cafes are destined to be unsuitable for playing this kind of LAN games, and they can barely make up a 4v4 Internet cafe. Once one is occupied by someone, the battle will not fall apart. If the owner of the Internet cafe drives away the player who is in the way, he will definitely lose the player forever, and even the friends of the player will not come to play. Therefore, when LAN games are all the rage, it is destined to be the demise of small Internet cafes.

Of course, Lin Feng has another purpose for launching "Age of Empires" and "StarCraft" at this time, and that is to stabilize the price of "Chufeng Net City". Small Internet cafes in the surrounding area have begun to fight a price war of 2 yuan during the day and 3 yuan at night due to the looting of customers. And with the further expansion of computers in the "Chufeng Internet City", the prices of these small Internet cafes will drop. Until they are unable to maintain operations and close their doors.

For this kind of price war, Lin Feng did not want to respond to price reductions with price reductions. He had to earn enough original capital in a short period of time, and his initial profit must not be low. So Lin Feng's countermeasure is to give a reason why people have to come to "Chufeng Net City" to play.

"Age of Empires" and "StarCraft" are Lin Feng's most powerful weapons.

"Brother, are these two games fun?" Chu Zhixuan was very efficient, and brought back two large posters the next day.

"Hehe, brother, just wait to see how the players squeezed our network city!" Lin Feng smiled confidently.

"Really so fun?!" Chu Zhixuan was also tickled when he heard it. During this period of time, watching these students play various games, he also experienced the fun of the game when he was over 30. However, various types of RPGs really do not suit his

appetite. The long plot process and the search for clearance items from various places really make him a headache. And he doesn't catch a cold from those slg games, and always feels unreal. He likes the fast-paced and exciting games.

The posters of "Age of Empires" and "StarCraft" printed by Chu Zhixuan were full of gimmicks, which made people feel an urge to play at a glance. In particular, Lin Feng also posted a banner in the middle of the two huge posters.

Do you want to experience the cold weapon war of Jin Ge and Iron Horse or the future interstellar war of the rain of bullets, everything is in the "Chufeng Net City"! Here can let you realize a general's command dream!

In the afternoon, the students after school crowded into the "Chufeng Net City" to play these two games. However, these two games have just entered the city of Chu. The vast majority of people don't know how to play. They just follow a little strategy on the Internet to slowly upgrade, build troops, and fight wars. They can't experience the command on the banner outside. Fun and battle fun.

"Okay, I'm 1v7, who are you on?" Lin Feng knew that he had to do it himself so that these students could realize the true charm of these two games.

Wow! Everyone was in an uproar. 1v7 was absolutely arrogant. Someone had occasionally played Age of Empires and StarCraft online before, but they were both 2v2 or 1v1. No one had ever dared to speak out about 1v7.

"I'm coming!" A junior jumped onto the machine unconvinced.

"I'm coming too!" Someone took the lead, and others joined the battle.

"Hey, brother, are you sure, otherwise you will be ashamed." Chu Zhixuan kindly reminded. He also played this, long upgrades, and then fights, which made him feel very boring. I don't think it's fun.

"Haha, brother, wait and see!" If Lin Feng had no confidence, he wouldn't shout the 1v7 slogan. At present, Chu City's "Empire Age" level, he has seen, is still very bad, the Bronze Age is about 22 minutes, and this time is not too good at Lin Feng's level, it has risen to the Iron Age.

Of course, the reason why the level of these students is so stinky is also given by all the big and small Internet cafes in Chu City. Because they are all small Internet cafes and the connection is limited, most people cannot understand the charm of these two games, so few people Go delve into them. It was only then that Lin Feng could now shout 1v7 rants.

Lin Feng arrogantly chose the Hitai tribe, an absolutely powerful nation in the Iron Age. And the other seven people chose five or eight, of course, the Yin Shang was the most.

Amidst the sounds of killing deer, picking fruit, and cutting trees, Lin Feng was the first to upgrade, and one minute later, the remaining seven people also had about time to upgrade. However, the seven of them were in the Bronze Age, while Lin Fengsheng was in the Iron Age, and it took a full minute longer than everyone else.

Playing “Age of Empires” is a period of civilization that surpasses your opponents, and you have to be one minute ahead. This advantage is absolutely overwhelming. And the battle was just as Lin Feng predicted. When his 15-block golden catapult was launched, he was invincible, just like Monkey King fighting a pig.

“This is too bullying.” The crowd watching behind Lin Feng couldn’t stand it.

When Lin Feng’s golden catapult smashed a large area, the seven-person catapult was broken like a toy; while the seven-person catapult was smashed down, it must be smashed by a few of them before it could be broken. Lin Feng is also taking advantage of science and technology to offset the serious shortage of troops.

Be beaten if you fall behind! ——** You are right!

In this situation, the combined column of seven people retreated in succession, and the last seven decided to divide their troops. The five would block Lin Feng’s troops from the front, and the remaining two assembled all their forces to fight against Huanglong and attack Lin Feng’s lair.

Lin Feng could see clearly what they thought. However, Lin Feng was not afraid. Instead, he commanded the troops to make a big advance when the opponent’s strength was insufficient.

Under the scuffle, after the other five had exhausted all their troops, Lin Feng’s “main force” troops were also exhausted.

“Quickly, the two of you are about to destroy his lair!” The five called out in unison. They had no power to fight anymore at this moment, and the battle was all up to the two who retreated halfway to sneak attack on Lin Feng’s lair.

Everyone shook their heads for a while. They were not sighing for Lin Feng’s regretful defeat, but for the fiasco of the Seven.

When the remaining two commanded all the troops to enter Lin Feng’s Lair, they encountered layers of city walls, layer by layer that tightly encircled Lin Feng’s territory. When the two of them worked so hard to demolish all the city walls, their originally complacent expressions were suddenly sluggish, with a look of horror on their faces.

“This is too exaggerated!” The two screamed and quit the game directly.

In Linfeng territory, countless golden catapults and ballistas once again waited in place for the arrival of the two of them.

“One more game!” Seven of them lost all of them, making them very shameless.

“Follow to the end.” Lin Feng smiled slightly, but this time he chose the Assyrian nation. He wants to tell these people that there is more than one way to play in the Empire Age.

When the seven were still working hard for the era of hard tool upgrades, Lin Feng rose to the Bronze Age in 13 minutes, and a small team of horse shooting has gone out hunting in 14 minutes. When the last one had just risen to the Bronze Age, Lin Feng’s horse shooting had already extinguished the other six and killed him.

“Master!!” Everyone praised.

Lin Feng could see from everyone’s eyes that these two battles not only allowed everyone to see the diversity of the “Empire Age” gameplay, but also burned their enthusiasm for the “Empire Age”.

The next battle is the more classic “StarCraft”.

Chapter 16 Empire VS Interstellar

Chapter 16 Empire vs. Interstellar (This chapter is free)

“‘StarCraft’, 1v7, who will come?” Today, Lin Feng wants everyone to realize the charm of these two games.

“I’m coming!” The seven people just now changed to four, obviously not convinced. It’s no wonder that they are all young people who are 1v7, and they say how embarrassed they are to go out. This face must be found back.

Their mentality is in Lin Feng’s embrace, as long as Lin Feng beats them miserably today, they will definitely come to practice hard every day. And the nature of these two games is destined to be difficult to become a master by one person behind closed doors, so it is natural to call on friends and everyone to learn and make progress together. At that time, why worry that “Chufeng Net City” will not be full again.

After a short while, after the 7 people were seated, Lin Feng chose the Zerg, and the opponent had all three. Lin Feng took a moment to glance at the other party’s operation and smiled faintly in his heart. One hand operates the mouse, while the other hand is either knocking the seeds or drinking tea. It’s strange if you can win.

Lin Feng used to steal the peasants and sent it by bi-base flow. His hands were as graceful as a pianist playing a world-famous song. While the seven were still worrying about economic poverty, the speed dogs and stalkers, who were already full of mountains and plains, swept all the way with the autumn wind sweeping the fallen leaves. From the beginning to the end, the seventh man was wiped out. The overall situation took less than 30 minutes.

The master of the master! ! -The whole network city looked at Lin Feng with admiration. Their eyes were absolutely no less than that when fans met their idols, they almost didn't find Lin Feng to sign.

In this regard, Lin Feng just smiled casually. He knows that his level is actually very bad, but Chu City hasn't seriously studied the people of "Empire Age" and "StarCraft". Once they appear, it is absolutely for him to admire others.

"Brother, how did you play this?" Chu Zhixuan's eyes glowed, and he felt that he had finally found the ideal game in his mind-"StarCraft", which was definitely the game he had always dreamed of. Although I played it before, but because I didn't know how to play, I reluctantly checked the information online, and I really couldn't experience the fun of the game. Now after watching Lin Feng's operation, I realized that I was playing for nothing before, and I didn't realize the essence of the game at all.

"Using the keyboard to assist the operation, as well as micro-manipulation!" Lin Feng said his only experience. The rest of them will naturally go online to check the video or experience of the master.

Oh! Everyone nodded all around. The admiring eyes once again paid tribute to Lin Feng, the "super master".

Lin Feng's battle, which was similar to an exhibition match, not only opened up the mystery of "Empire Age" and "StarCraft" for everyone, but also ignited everyone's passion. From this day on, "Chufeng Net City" has never been free. Whether it is early morning or late at night, "Chufeng Net City" only has the sound of horses running and the drool of speed dogs.

The popularity during this period is definitely no less than the grand occasion of "Street Fighter" back then, perhaps even worse!

Seeing everyone obsessed with these two games, Lin Feng was also secretly proud. Just look at the crowded students waiting to get on the machine and try one or two games, Lin Feng will know that for at least six months, "Chufeng Net City" will no longer worry about empty machines.

The only thing that surprised Lin Feng was that Chu Zhixuan was in his thirties, and he was addicted to the world of "StarCraft", all day long except for sleeping and playing

games. But also because of this, Chu Zhixuan unexpectedly became the number one master of "Chufeng Net City". Yes, it is the number one master.

Lin Feng had a game with him two weeks after he came into contact with "StarCraft" in Chu Zhixuan. As a result, Lin Feng was defeated and lost his face. He was once in front of the crowd and shouted 1v7 super master again. No longer exists. Fortunately, Lin Feng didn't care about this false name that would be subverted sooner or later, as long as the online city made money.

However, with the lessons learned from the "StarCraft", Lin Feng no longer accepts the challenges of those students who have worked hard in the "Empire Age" and have transformed into masters. One shame is enough, and another shame is that his IQ is low.

Fortunately, there are talents from generation to generation, and each has led the way for decades. Although Lin Feng returned to the world from the "sacred altar", a new "God of War" figure appeared in the "Chufeng Net City".

The God of War of "StarCraft" first recommended Chu Zhixuan. People in their 30s actually crossed the "Chufeng Net City" and never had an opponent. Don't look at his chubby hands, but his micro-manipulation is quick and scary, the layout is also magnificent, and he also gave himself a memorable English abbreviation-pj. Lin Feng always felt that this name was very familiar, but he couldn't seem to remember it.

The God of War in the "Empire Age" was one of the seven people who were wiped out by Lin Feng's 1v7 light delivery last time. However, when he played "Age of Empires", he made many strange tricks, often winning by one blow that was unexpected to everyone. Lin Feng didn't know what his real name was, but everyone who played "Age of Empires" in Net City called him cathjoe. This name seems to have been heard in Lin Feng's memory.

During the period, Lin Feng also took the time to return home, and went to Aunt Huang's Internet cafe by the way, installed the two games for Aunt Huang, and appropriately discussed with some local "empire" and "interstellar" fans.

While once again experiencing "being the top of the mountain, looking at the mountains and small mountains", Lin Feng also promoted these two games in the Liaoyuan District, and quickly spread to all Internet cafes in Chu City, where you can hear about The discussion of "Age of Empires" and "StarCraft". Also because of the popularity of "Era of Empires" and "StarCraft", the price of Internet cafes in the downtown area of Chu City has unexpectedly stabilized, stabilizing it at 2.5 yuan per hour.

Knowing that he had saved the prices of Internet cafes in the urban area of Chu City through a random act, and did not let many Internet cafes engage in price wars due to grabbing customers, the profits of Internet cafes fell to the bottom, Lin Feng secretly laughed. What made Lin Feng even more surprised was that because he introduced

“Age of Empires” and “StarCraft” into Chu City ahead of time, it also directly led to the early emergence of a large Internet city in Chu City. The survival time of small Internet cafes was sharply compressed and directly This led to the miscarriage of Lin Feng’s plan to open the Net City to the urban area in the future.

This series of changes caused Lin Feng to sigh the terrible part of the “butterfly effect”.

The only regret when I went home this time was that I didn’t see the young and lively Huang Shuqi when I went back this time, which made Lin Feng feel a trace of melancholy. But think about it, there are still more than 3 months, the college entrance examination is about to be, Huang Shuqi should be buried in the pile of books all day, naturally it is impossible to go to the Internet cafe to help.

While the level of everyone is rapidly improving, the revenue of “Chufeng Internet City” has also reached a new high. At the end of the month, the gross income of 63 computers reached 105,840 yuan, and the net profit of bar non-staple food this month was 1,200 yuan. In addition to the corresponding expenses, the net profit was 101,140 yuan. Because of the good business, Lin Feng also specially increased the salary of cashiers and health workers by 100 yuan, and hired two college students majoring in network as network administrators. Free Lin Feng from the net city.

Since many overnight students complained that their mouths were astringent and tasteless at night, and that people who surfed the Internet all night tended to get sleepy, it was not conducive to them to hone their skills. I hope Lin Feng can help them find a way. Regarding their complaints, Lin Feng can only say that more rest and less fun is enough, but from the perspective of commercial profit, Lin Feng purchased two fully automatic coffee machines.

Of course, the two fully automatic coffee machines are both domestically produced and cost 1,000 yuan each. Coffee powder uses Nescafe’s 25 yuan a packet of 700 grams of coffee powder, you can brew 50 cups of high-strength coffee, and the cost is 0.7 yuan per cup. Lin Feng set it to 1 yuan a cup, and did not intend to use it to make money, mainly relying on it to attract all-night guests and refresh their minds.

Due to the low price of the automatic coffee machine, not only was it welcomed by many students who surfed the Internet all night, but also many passersby nearby would come to buy a cup of Nescafe. This not only made the “Chufeng Internet City” more popular, but also indirectly promoted the business of the “Chufeng Internet City”, and the students waiting for an empty machine would no longer be bored while waiting, buy a cup of Nestle coffee and sit on the sofa. Tasting tea quietly is a great joy in life.

Lin Feng purchased 22 computers again in accordance with the agreement, and “Chufeng Internet City” had 85 computers in the second month after its opening. While profits have risen again, it has also hit the scattered Internet cafes in the surrounding area even more.

With the strong expansion of “Chufeng Internet City”, scattered Internet cafe owners have no other choice but to actively reduce prices. Due to store restrictions, they could not buy more computers to fight against Lin Feng’s Internet City. The air pollution in the Internet bar is really serious, and it is even more difficult to retain the source of residents. Although they tried to learn from Lin Feng and ban smoking, students who have long been accustomed to smoking will not buy it. If you don’t allow me to smoke, I will go to “Chufeng.com.” Although it is more expensive, the air is good, the environment is good, there are more mm, and the connection is convenient.

As a result, the confidence of scattered Internet cafe owners to purchase new computers was even more affected. In the end, they had to resort to extreme price reductions in response to the expansion of the “Chufeng Internet City”. The most extreme Internet cafes have already hit the price of 1 yuan per hour two years later.

Lin Feng has also been paying attention to the price cuts of these scattered Internet cafe owners. There are already faint students complaining about the high fees of the “Chufeng Internet City” in the Internet City. If this matter is not handled properly, it will definitely cause huge losses to the profits of the “Chufeng Net City”.

Lin Feng absolutely cannot allow the cabbage price of 1 yuan per hour in two years to happen now.

Maybe I should talk to them. —Lin Feng thought secretly.

Chapter 17 Big fish eat small fish

Liu Yishan is a laid-off worker. Under the guidance of relatives in the provincial capital, he opened an Internet cafe in the Lanzhou Special Zone, but only six computers were purchased by the smasher. Fortunately, the business is good. Not only did it pay back in one year, but it also bought two additional computers. Now there is a profit of several thousand yuan every month. Not only can I cope with the daily living expenses, but I also earn back the money from college with my daughter.

Liu Yishan wanted to rely on Internet cafes to support her daughter’s college graduation, and then sell the Internet cafes to get some retirement salary to enjoy the family happiness. Unexpectedly, his dreams disappeared after the opening of the opposite “Chufeng Net City”.

When the “Chufeng Internet City” first opened, Liu Yishan was not very worried. Although there is one more competitor, the supply of computers is now in short supply, and the number of people who come to play games every day far exceeds that of computers. Therefore, Liu Yishan is not at all worried that “Chufeng Internet City” will steal his business.

In the first month of the opening of “Chufeng Internet City”, Liu Yishan’s Internet cafe income was almost the same as last month, and was not affected by the newly opened “Chufeng Internet City”. This also let Liu Yishan relax his vigilance.

Unexpectedly, from the second month after the opening of “Chufeng Internet City”, his Internet cafe business began to decline sharply. Especially since the “Age of Empires” and “StarCraft” were launched on the opposite side, his business has been even more disastrous. The students who originally played here would rather go there to wait for the machine than come here to play. Uncontrollable Liu Yishan sneaked over and turned around, comparing the “Chufeng Net City” side with his side. It was indeed incomparable.

“Chufeng Internet City” not only has fresh air, good lighting, and large space, plus more computers, it feels lively just by looking at it. On the other hand, the space on my own side is small, and the air is chaotic because of people smoking. Compared with the two, Liu Yishan asked if he would definitely go there, not to his own small Internet cafe.

In order to win business, Liu Yishan has reduced the price of computers per hour from 3 yuan per hour two months ago to 1 yuan per hour, but there are still no guest sources. This makes Liu Yishan very uncomfortable and a little overwhelmed.

Oh, but the girl has one year to graduate from college! ——Looking at the other side to add a new computer again, Liu Yishan felt uncomfortable in his heart. Liu Yishan also knew in his heart that it would be difficult to stick to this situation for another year.

“Is Boss Liu here?” A young voice came in from outside.

“I am, you, aren’t you the boss of the opposite ‘Chufeng Net City’?” Liu Yishan was startled, not knowing what Lin Feng did to him, his instinct was not good.

“Haha, it’s okay, just come to drop by.” Lin Feng smiled slightly and motioned to Liu Yishan to sit down and talk.

Lin Feng’s actions made Liu Yishan frown slightly. After all, he is the boss here. Lin Feng is just a guest. Now he is rebelling against the guest, which really makes Liu Yishan feel a little unhappy. However, Liu Yishan is over middle-aged and he doesn’t account for these, at least on the surface it won’t show up.

Lin Feng also knew that he seemed a little too rash, but he didn’t care too much. Now the trend of “Chufeng Internet City” dominating in the Lanzhou Special Zone is inevitable. Under its own strong expansion, these small Internet cafes will be annexed or closed sooner or later. It is understandable that Lin Feng’s sense of superiority was unintentionally displayed. It is also a kind of mentality change of Lin Feng.

In the Lanzhou Special Zone, Lin Feng is now the big fish, and the scattered Internet cafe owners like Liu Yishan are the small fish. The big fish will naturally feel superior

when they see the small fish, and the big fish wants to eat the small fish. Big fish prepares for eating small fish.

“How is Boss Liu’s business now?” Although Lin Feng knew that this was a bit annoying, Lin Feng had to say for the next topic.

“It’s okay!” Liu Yishan’s face was stiff, and he whispered secretly in his heart, if you don’t see it, you know whether the business is good or not, and you have to ask.

auzw.com

“Haha, Boss Liu, I came here today without going to the Palace of the Three Treasures, so I will just speak straight.” Lin Feng also didn’t want to circumscribe, and didn’t need to circumscribe, “I wonder how Boss Liu thinks about the future prospects?”

After Liu Yishan stared at Lin Feng silently for a while, he said silently, “Boss Lin has something to say.”

“Boss Liu, then I’ll be blunt.” After all, Lin Feng was young and energetic. Although he had done so many jobs before rebirth, he was only a low-level job. He had never looked down at each other with such a high profile, and his tone would inevitably be a little overbearing. .

“Boss Liu, I believe you also understand the current situation of Internet cafes in the Lanzhou Special Zone. Our ‘Chufeng Internet City’ is bound to become the dominant one. In the next few months, we will continue to add new computers. By then, you small Internet cafes. His business will definitely be even more bleak.” Speaking of this, Lin Feng also realized that his tone was a little too aggressive, looked at Liu Yishan, who was expressionless, and continued.

“I wonder if Boss Liu has ever thought about cooperation?” Lin Feng’s proposal made Liu Yishan no longer able to maintain the calmness of a middle-aged person. He looked at Lin Feng in surprise, wondering what the young man’s cooperation meant.

“I don’t know what Boss Lin means?” Liu Yishan couldn’t help asking.

“You move all the computers to my ‘Chufeng Internet City’. The computers still belong to you, but they are under my management. I will pay you 720 yuan a month for each computer.” Lin Feng calmly said of his annexation Program.

Liu Yishan silently calculated that a fixed monthly price of 720 yuan per unit is equivalent to 1 yuan per hour per unit, which is the same as Liu Yishan’s current hourly price. It seems to be a bargain.

Liu Yishan carefully calculated it in his heart, and Lin Feng’s proposal was indeed a good deal for him. First of all, his business is very poor now. Although 1 yuan per hour,

very few people come to play; second, Lin Feng fixed himself to 720 yuan per month, so he also saved electricity and facade fees and Internet access fees. This is a huge expense. Third, if the computer is handed over to Lin Feng's management, he can sit at home and collect money leisurely. 8 computers, 720 yuan each, earn 5760 yuan a month, which is not only Being able to cope with all the expenses of his daughter's college, he and his wife can also live a leisurely life.

But Liu Yishan's 50 years of social experience told him that there is absolutely no free lunch under the sun, and Lin Feng would not be so kind to give himself such a big gift. Moreover, Lin Feng was only in his early 20s at the first glance, and he didn't know if he would do anything bad this time by bringing him into the group.

Liu Yishan hesitated for a long time, but still did not dare to agree to Lin Feng's seemingly lucrative cooperation agreement.

"Boss Liu, what do you think of my proposal?" Lin Feng didn't know what Liu Yishan was thinking, but the key point of his plan of annexation of big fish and small fish lies in Liu Yishan.

Did he see his plan and want to stop himself? ——Lin Feng couldn't help but worry secretly. The plan he proposed is definitely beneficial to these Internet cafe owners, but I am afraid that these Internet cafe owners will be jealous when Lin Feng's business is booming, and would rather lose money than let Lin Feng annex it, that would be bad.

What Lin Feng must admit is that there are many people in China who would rather not make money for themselves than for others to make money. If such a person appeared among the owners of these Internet cafes, it would definitely be detrimental to Lin Feng's annexation plan. The key to breaking through the jealous psychology of these Internet cafe owners lies in Liu Yishan.

Lin Feng asked someone to investigate Liu Yishan's background and found out that he has a daughter who is studying at university. All the expenses in the family are paid by the Internet cafe Liu Yishan opened. Liu Yishan is the most urgently in need of money among the eight Internet cafe owners, and also the least inspiring. . As long as it can break through Liu Yishan, when Lin Feng proposes this cooperation agreement, Liu Yishan will take the lead in responding, and there will be no opposition.

Therefore, whether Lin Feng's plan of big fish to eat small fish can succeed is all in Liu Yishan's body. But will Liu Yishan agree?

Chapter 18 Borrow chicken to lay eggs

"I don't know what Boss Lin needs me to do?" Although Liu Yishan didn't know what Lin Feng's idea was, but in middle age, everything is about stability and peace and will not easily make a decision. This is both an advantage and a disadvantage.

Lin Feng smiled faintly. There are four things in his plan for the big fish to eat the small fish.

1. To annex scattered Internet cafes to strengthen itself and increase its initial development speed.

Second, stabilize the price of Internet cafes in the Blue Zone. If they continue to drop like this, Lin Feng will definitely not be able to withstand the pressure. The price of "Chufeng Internet City" will definitely fall, and the profit will drop by 30% for every one yuan drop. This is definitely Lin Feng's current situation. unacceptable. Therefore, Lin Feng must annex them to prevent them from disrupting the normal market order.

Third, the community of interests. The growth of "Chufeng Net City" is bound to arouse the jealousy of many people. The so-called little ghosts are difficult to deal with. Although Lin Feng and Chu Zhixuan have already arranged the Bureau of Industry and Commerce and the Taxation Bureau, Lin Feng is afraid that some other small people will make trouble, These Internet cafe owners are drawn to their own banners. Under the community of interests, everyone will brainstorm. When encountering troubles, multiple people will have multiple paths.

Fourth, Lin Feng is also afraid that these Internet cafe owners will unite to resist their own "Chufeng Internet City". Once they unite, only a few network cables can connect all Internet cafes together. Then Lin Feng will be in trouble.

"Boss Liu, tomorrow I will invite all the owners of Internet cafes in this neighborhood to have a meeting together. I hope you can take the lead in agreeing to my cooperation plan." Lin Feng was afraid that Liu Yishan hesitated and threw a bait again, "Of course to show me Thanks to Boss Liu, after the cooperation is successful, I will give Boss Liu a monthly dividend of 800 yuan per computer."

Liu Yishan was moved. No one will fight against money, especially Liu Yishan is a person who needs money. Lin Feng gives him a monthly dividend of 800 yuan per computer. He can earn 6,400 yuan in a month for eight computers, and 6,400 if he doesn't do anything. Yuan income, how can there be such a good thing in the world.

However, the peculiar caution of middle-aged people made Liu Yishan hesitate for a long time before nodding in agreement. After deciding to agree to Lin Feng's cooperation plan, Liu Yishan also breathed a sigh of relief. During this period of time, the Internet cafe business was deteriorating, making Liu Yishan anxious. Now it is resolved. Although it seems to be annexed, as long as there is money to make, what does it matter if he is not the boss. The most important thing is to survive until my daughter graduates from college.

Next, Lin Feng invited the other seven bosses to move to the "Chufeng Internet City" tomorrow to hold a meeting to discuss the future of the blue zone Internet cafes. Regarding Lin Feng's invitation, the owners of the other seven Internet cafes hardly

refused and agreed. After all, the situation is better than others, and the strength of “Chufeng Internet City” is obvious, and they have to agree.

The next day, the owners of the eight Internet cafes arrived at the “Chufeng Internet City” on time.

“Put the score!” each of the eight owners whispered.

Lin Feng turned a deaf ear to their whispers, but was secretly happy in his heart. In order to welcome today’s party, Lin Feng paid a special sum of money to add a lot of potted plants to the “Chufeng Net City”, making the “Chufeng Net City” a unique and charming scenery. If you don’t look at the students who are fighting fiercely, this place is not like an online city, but like a unique book.

What Lin Feng wanted was a kind of aura. He wanted to tell these Internet cafe owners clearly that “Chufeng Internet City” was definitely not something they could resist.

“Boss, I invite you all to come here today. In fact, I want to discuss the future development and future of our Blue Zone Internet cafes.” Lin Feng’s voice drew the attention of the bosses back.

“Boss Lin has something to say straight.” Everyone looked at each other and waited for Lin Feng’s following.

“Haha, what do the bosses think of my “Chufeng Net City”?” Before the meeting, Lin Feng decided to be stronger today. If he is too weak, he will be looked down upon. He has strong qualifications now, so he must have a strong attitude. Of course, these experiences are also mentioned in the recent book on commercial warfare.

What kind of status determines what kind of outlook on life and values. A person who holds billions of wealth in his hands will never have the same outlook on life as a beggar. This is not a question of humility or arrogance, but of momentum. As a superior, you must have the aura of a superior.

The owners of the Internet cafe looked at each other, and they all revealed a wave of anger, but they were more helpless. A discerning person knows that “Chufeng Internet City” is much better than their small Internet cafes in terms of hardware and software facilities. Lin Feng’s words are indeed a bit bullying.

Lin Feng also knows that his words are a bit offensive, but today’s negotiations are related to whether the “Chufeng Net City” can enter a period of rapid development, so he must overwhelm them with momentum. And let them feel that the future is bleak and they must be merged.

Next, Lin Feng came up with eight contracts, which listed in detail the respective benefits and contributions of both parties in this merger.

As time passed, everyone looked at every word and clause in the contract carefully, calculating how much profit and price they could make in it.

Lin Feng didn't urge him, waiting leisurely for everyone to read the contract, with a gesture of whether to sign or not to follow you. However, Lin Feng looked relaxed on the outside, but he was really nervous on the inside. This is the first time he has faced negotiations and acquisitions. Although he is fully prepared, his inner anxiety is still unavoidable.

"No, I absolutely disagree with this cooperation plan." What worries Lin Feng still happened. The first person to stand up was the richest of these Internet cafe owners. His Internet cafe had 12 computers.

"Yes, you give us a computer for only 1 yuan per hour, but you make 2 yuan yourself. This is too unfair, at least half of it." The others echoed.

Lin Feng felt unhappy and secretly scolded these people for being greedy. They don't have to pay for electricity or on-site expenses, and they don't have to worry about whether the business is good or not. They can collect money while sitting at home. On the contrary, it seems that Lin Feng has annexed their Internet cafes, using their computers to make 3 yuan an hour, and only give them a 1 yuan bonus, but Lin Feng also bears a lot of expenses. After careful calculation, Lin Feng and their profit distribution are Six (four) open, Lin Feng six, they four.

"I think bosses, you should be clear about one thing, can your current income be higher than one block?" Lin Fengqiang held his unhappiness in his heart, and said with a smile.

"Uh" The bosses also knew that Lin Feng was right, but they were really unwilling to be swallowed up in disguised form like this.

"No, or you can give us a price of 2 yuan per unit, otherwise we would rather jade pieces than tiles." The kind of people who worries Lin Feng that hurt others and self still appeared.

Give you 2 yuan, you are crazy about money. -Lin Feng cursed secretly in his heart.

"All the bosses, you all open Internet cafes for money, not for anger. I hope you will think about it." Lin Feng ignored the man and exhorted.

Everyone pondered for a while, considering whether Lin Feng's plan was worthwhile.

It's true that Lin Feng's cooperation plan has some conspiracy elements in it, but this is a conspiracy on the bright side, it is a conspiracy. I clearly told the eight owners that I was going to annex everyone's Internet cafes, but the owners of the eight Internet cafes were unable to resist.

Seeing that everyone was a little moved, Lin Feng secretly winked at Liu Yishan.

“Wh, huh, huh!” Liu Yishan had already agreed to Lin Feng’s cooperation agreement, and now he has received Lin Feng’s signal again, so naturally there is nothing to hesitate. As far as Liu Yishan is concerned, as long as he has money to make money, he can make it to her daughter’s college graduation. He doesn’t care if the boss is not the boss.

“Old Liu!” The others were shocked, but they didn’t expect Liu Yishan to sign the contract so soon. In their hearts, Liu Yishan has always been a calm and cautious person.

“Everyone, actually Boss Lin is right. We are asking for money instead of being vindictive. Now we have already cut the price to almost no profit, and the business is still not good. Now Boss Lin has given us this cooperation plan and it’s not bad. You don’t have to worry about it every day. What’s the business, you can collect money while sitting at home, so why not do it.” Liu Yishan said to everyone’s heart that opening an Internet cafe is to make money, so why take anger for the sake of fame.

“Okay, Boss Lin, I also agreed.” With Liu Yishan taking the lead, everyone else signed their names one after another. As for the person who came out to stab him, he had no choice but to sign his name after seeing everyone signing the contract. After all, who can’t live with, and can’t live with money, right?

“Okay, bosses, we’ll see you again in a year, and I will pay you the money on time every month.” Lin Feng breathed a sigh of relief. The successful signing of this contract will be the rapid development of “Chufeng Net City”. A key opportunity.

Chapter 19 improve dramatically

Chapter 19 Rapid Development (This chapter is free)

After the “merger” of the eight Internet cafes in the Blue Zone, “Chufeng Internet City” became the only Internet cafe in the Blue Zone. Counting the computers in the merged Internet cafes, there are a total of 165 computers, and profits doubled next time. It has also greatly eased the trouble of many students waiting for the computer, but compared with the majority of student flow, the supply is still in short supply.

The “annexation” operation also completely stabilized the price of Internet cafes.

The disguised annexation of “Chufeng.com.cn” also greatly affected other small owners who wanted to open Internet cafes. After inquiring about the prospects and market evaluation, although there is still a market, it is difficult to compete with “Chufeng.com.” “City” competition, and there is no good facade around to open a large-scale network city, so in a short period of time, “Chufeng Network City” has become a unique show in the blue zone.

Lin Feng is naturally not satisfied with his current achievements. After rebirth, he will never be complacent because of this little achievement.

A month later, when it entered June, Lin Feng had settled the accounts. In May, due to the annexation of other Internet cafes, his profit skyrocketed from 105,840 yuan to 232,400 yuan. In addition to 3 cashiers, health workers and network administrators, plus various taxes and other expenses, there is 226,500 yuan.

The net profit of non-staple food at the bar also rose to 1,500 yuan this month, and the biggest surprise was the automatic coffee machine. The two automatic coffee machines have brought a net profit of 1,800 yuan to Lin Feng, and consumes an average of 4 bags of 700 grams of Nescafe coffee every day. This is an unexpected surprise.

In this way, the final net profit of “Chufeng Internet City” in May was 229,800 yuan.

Since the computers of the eight Internet cafe owners were annexed after May 10, Lin Feng gave each person 480 yuan per computer. Except for Liu Yishan’s 8 computers, 72 computers paid a total of 34,560 yuan, and Liu Yishan gave him 6,400 yuan.

After some calculations, Lin Feng’s net profit in May reached 188,840 yuan. Seeing this number, even the pj-Chu Zhixuan, who has been fighting in the interstellar world, has been enjoying himself for several days, and even “StarCraft” has also played abnormally, losing a few games in a row, greatly losing the reputation of “Star Wars”.

But Chu Zhixuan didn’t care, he was happy. Seeing this number, although he posted tens of thousands of yuan for several months in a row, the prospects are bright. He can imagine that in the future, he will definitely count the money and get cramps.

For Lin Feng’s previous annexation plan, Chu Zhixuan can only use one word to describe it-strong! At a very young age, Chu Zhixuan can have this kind of courage. On the one hand, Chu Zhixuan secretly sighed that he was terrifying, on the other hand, he was proud of choosing the right partner.

In accordance with the terms agreed in the contract with Chu Zhixuan, Lin Feng once again used all this income to purchase computers. 30 computers were added again, and this time all became 17-inch monitors. Counting these 30 “Chufeng Internet City” has a total of 195 computers. This can basically meet the needs of students in the morning. As for the golden period of the afternoon and evening, the supply is still in short supply.

After all the computers were purchased and equipped, Lin Feng re-planned the “Chufeng Internet City”. In view of the fact that there is no broadband Internet service in Chu City, Lin Feng has only designated 10 computers as a special “Internet cafe” area, and the remaining 185 computers are all used for games.

Although it is now the “Empire Age” and “StarCraft” in power, in order to satisfy people of different tastes, Lam Fung also specially demonstrated the online battle between “Delta Special Forces” and “Legend of Wizards”, so that more people came to the game. A choice. It can be regarded as a condiment between “Age of Empires” and “StarCraft”.

At this time, Aunt Huang also owns 8 computers in the Internet cafe and can make up 4vs4. Although the price has dropped a little, the profit has remained unchanged due to the purchase of computers. This makes Aunt Huang smile every day, but she never forgets to brag about Lin Feng’s vision and ability.

But at this time Lin Feng was not as optimistic as Aunt Huang. Occasionally when passing through the urban area, Lin Feng has discovered that several large online shopping malls are undergoing renovation. Lin Feng glanced at the scale. Not surprisingly, the number of computers in each home is more than 200. Although it is far away from the Lanzhou Special Zone, he will not be affected. “Chufeng Internet City” caused any impact on the business, but it was devastating to the small Internet cafes in the urban area.

Lin Feng once again persuaded Aunt Huang to buy an Internet cafe into the “Chufeng Internet City”, and Lin Feng treated Aunt Huang as Liu Yishan. However, Aunt Huang refused again, which made Lin Feng feel helpless and secretly annoyed. Refers to a sunshine avenue, do not walk, have to cross this single-plank bridge that is about to collapse.

Aunt Huang has calculated in private that she has 8 computers now, although it is only 2.5 yuan an hour, but a monthly gross income of 10,800 yuan, apart from all expenses of 2,300 yuan, she can still have a net profit of 8,500 yuan. But Lin Feng only gave her 6,400 yuan a month, which was a full 2,100 yuan less. Although she can relax a little bit and no longer have to guard the Internet cafe all day, she can take better care of Huang Shuqi, but Aunt Huang can’t bear the income of 2,100 yuan.

Lin Feng also knew the little Jiujiu in Aunt Huang’s heart. Since she doesn’t want it, let’s forget it. In the future, Internet cafes will be squeezed by large-scale Internet cities, and I can’t blame myself for reminding her every time. As for the expenses of Huang Shuqi’s university, Lin Feng believes that this will no longer be a problem. With his current net worth, he can easily support Huang Shuqi to finish university. As for Aunt Huang, she can find a sustainable business at that time. Lin Feng believes that based on his memory of the next 9 years, this is really simple.

The only thing that worries Lin Feng is, what is his attitude towards Huang Shuqi in his heart? What is Huang Shuqi’s attitude towards herself? What is the relationship between the two families now? This made Lin Feng dare not easily break the layer of sand between him and Huang Shuqi. Fortunately, now Huang Shuqi is about to take the college entrance examination, and everything will be discussed after she finishes the college entrance examination.

During this period, relatives from both sides also visited the “Chufeng Net City” by appointment, and constantly praised Lin Feng for his vision and courage. He has opened such a big net city and is a role model among all the younger generations.

For their compliments, Lin Feng knows what their subtext is, hoping to buy a stake in his own network city, so as to recover some of the huge losses in Yi'an technology. Originally, there is nothing wrong with this share request. “Chufeng Internet City” is also developing rapidly. Sodium absorption funds can speed up the pace of development, but their identity is the reason for Lin Feng's refusal again.

The family business is not big, and it will not last long. A company needs to speak up. A company like this type of joint venture with relatives rarely succeeds. Lin Feng didn't want the foundation he worked so hard to create to be ruined by infighting like this.

With disappointed and complaining eyes, Lin Feng sent away the relatives on both sides of his parents. Lin Feng knows that for a long time, he has been the subject of their verbal criticism, but it does not matter. As long as the next time I have the opportunity to introduce them to an industry with a high return on profit, he will once again become what they call the “after”. Back to the role model”.

auzw.com In the rapid development of “Chufeng Internet City”, discordant voices have also appeared.

“Damn, who did you scold just now?” The calm Internet cafe suddenly exploded.

“Fuck, I just scolded you, you are stupid, why did you fight just now?” A person stood up on the other side.

“I think you are x, you have another kind of scolding!” This “teng, tum, and tumbling” here rushed to the other side, pointing to the opponent's nose and cursing.

When a man is pointed at his nose and scolded, he is still in the public, no one will be a tortoise. Although it seems that the figure who was scolded by the nose is a little thin, but if he retracts at this time, he will be laughed to death. In particular, most of the surrounding areas are from the same school, so if it spreads out, it will be shameless to see people.

“I'm the one who is x you, I scolded you.” The little one understood the principle of starting first from the “StarCraft”, and directly punched the big one in the face.

Naturally, it was a melee. Fortunately, it was all classmates, but it didn't cause a group fight, otherwise the “Chufeng Net City” would suffer. Who will pay for the broken things? Looking for these students? Do they have money to lose?

Not long after Lin Feng and Chu Zhixuan separated the two with the help of other classmates.

“Okay, what do you guys look like? They are all classmates. Playing for a game, is it good-looking!” Chu Zhixuan is a bit fat here, and looks particularly burly, plus he is the famous “Interstellar” “God of War”, what he said is particularly weighty.

Although the two still stared at each other, they finally didn’t fight again.

“Okay, okay, it’s okay, everyone continues to play the game!” Lin Feng also hurriedly dispersed everyone, lest they get together and cause trouble again.

“Well, the two of you shook hands. It was considered a reconciliation. Why bother with classmates blushing and having a thick neck.” Under the half-force of Lin Feng and Chu Zhixuan, the two of them shook hands reluctantly.

“Come on, I will invite you two to drink a bottle of Coke to calm down. It is considered that you do not know each other.” Lin Feng handed over a bottle of Coke by himself, which was regarded as exposing the matter.

However, today this incident also reminded Lin Feng that the violence incidents in Internet cafes have to be guarded against. Especially those who came to play were students, young and energetic, and they were playing competitive games, and it was easy to get started if they didn’t agree with each other. Today was pretty good, and there was no group fight, otherwise Lin Feng would not know who to cry if he wanted to cry.

After careful consideration, Lin Feng decided to hire a few security guards. One is to prevent the occurrence of violent incidents in Internet cafes; the other is to prevent thefts in Internet cafes. Regardless of whether these two things happen to be the same, they are both very headache and depressing. They are prepared and prepared. Although there is an additional expenditure, they are of great benefit to the future stable development.

Things are as Lin Feng expected. After hiring a security guard, no cyber cafe violence occurred in the “Chufeng Internet City”. At the same time, due to the presence of security guards, students who come to the Internet have a sense of security and don’t have to worry about their mobile phones. Such items were stolen.

Just when Lin Feng breathed a sigh of relief, troubled him to find the door again.

“Who is the boss here?” Several uniformed police officers walked in.

“Uh, I am, is there anything wrong?” Lin Feng frowned, wondering what happened.

The police in the lead looked and didn’t seem to believe that the boss of “Chufeng Net City” would be so young. Lin Feng could only smile helplessly at this. In China, he still believes in the saying: There is no hair on his mouth, and he can’t do things well.

“I heard that you had a fight a few days ago!” The leading policeman looked around and said.

“Hehe, please take care of it, it’s just that the two classmates quarreled for a while and they were all right soon.” Lin Feng said with a smile. But there is always something wrong in my heart.

“Well, that’s good. You have to be careful of violence when you open such a big Internet cafe.” The leading public security officer turned around with a few people and said, “I heard there have been cases of theft?”

“Hehe, thank you for your constant concern. It did happen. After we hired a security guard, it never happened again.” Lin Feng always felt that there was something in the leading police’s words.

“Come on, since you are the boss, it’s easy to say, this is the notice given to you by our Lante district police station.” The leading public security officer took out a piece of paper from the briefcase.

Lin Feng’s face turned green immediately.

Chapter 20 The little devil comes home

Looking at the notice carefully, Lin Feng’s expression changed.

Thousands of words were eloquent on the notice, most of which were nonsense, but in the end it revealed the real purpose of these public security officers’ trips-fees and security management fees.

According to the notice, in order to maintain the security of the Blue Zone and maintain the stable and prosperous development of the Blue Zone, a public security management fee of 50 yuan per unit is charged to the “Chufeng Internet City”. Based on Linfeng’s current 195 units, it will cost an extra 9750 yuan per month if it is not turned on. This is still now. If there are more computers in the future, the expenses will be more.

Lin Feng frowned, showing that he was here to “extort”, but it was called the public security management fee.

“I don’t know how you are called?” Lin Feng quickly took out a few packets of “King Furong” from the bar and handed them to the police. This is the “Furong King” for 48 yuan a pack. Although Lin Feng feels distressed, it is necessary to get rid of these “little ghosts”.

“You can call me Officer Zhang!” The leader put the cigarette in his pocket easily.

by! It's really natural. -Lin Feng cursed secretly.

"Police Officer Zhang, you see, our Internet cafe has always been very safe due to the use of security guards, so this security management fee is not necessary." Lin Feng said that the weaker his tone, he was also afraid of angering these plague gods. Bring unnecessary trouble to the network city.

"Hehe, Boss Lin, we are also thinking about the security and prosperity of the Lanzhou Special Zone. As long as our public security is good, do you still need security? You don't need it at all, so you can save a lot of money every month." Officer Zhang didn't get angry, but he laughed.

Cutting costs? I think it's a big extra expense. And I'm going to fire the security guard, who should I go to if something really happens? Looking for you? When you come, no one knows where you are going. —Although Lin Feng was angry, he could only laugh with him.

"Well, boss Lin, today we are here to give a notice. Of course, this is also an intention. You can also not hand it in. But if something happens, we can't say that we didn't remind you." At the end, this is a bit threatening.

"That is, that is." After sending off Officer Zhang and the others, Lin Feng fell into deep thought.

Will this money be paid or not? This is a huge expense, and it will be paid every month after this month. It will be close to 100,000 in a year. In addition, computers will be added in the future. At that time, only the management fee will be installed. I am afraid that it will be the bulk of all expenditures.

"What's the matter, brother?" Chu Zhixuan also walked over at this time.

"Brother, look." Lin Feng handed the notice to Chu Zhixuan.

"Are you making a mistake, this is too dark!" Chu Zhixuan also looked indignant.

"Oh, Yan Wang is good to see, the little devil is hard to deal with. Brother, do you think we should meet or not?" Lin Feng had no idea, so he had to ask Chu Zhixuan.

Chu Zhixuan also had no idea. Once the money is spent, it will become long-term, and it won't work if you don't want to pay it. When the two of them were at a loss, an accident occurred in the "Chufeng Net City" the next day.

In the prime time around 6 pm, several police cars stopped at the gate of "Chufeng Net City", and it was Officer Zhang who led the team.

“Officer Zhang, what are you?” Lin Feng hurriedly greeted him with a smile, and naturally more than ten packs of “King Furong” were sprinkled out. Although distressed, he can’t be stingy at this moment.

“Haha, Boss Lin, we have received a report saying that you may be a wanted criminal. In order to ensure the interests of you businessmen and the safety of citizens, we are here to investigate.” Police Officer Zhang smiled.

auzw.com

Lin Feng and Chu Zhixuan’s heart sank. This is to protect the safety of the public, it is clearly to find fault.

“ID card!” Several police officers immediately started checking ID cards one by one.

More than ten minutes later.

“Reported to the police officer, no suspects were found.” A police officer reported.

“Well, close the team. Boss Lin is embarrassed, I’m bothering you.” Officer Zhang shrugged helplessly, sorry, and led the team away.

Seeing Officer Zhang’s smiling face when he left, Lin Feng almost hit him with a punch. However, Lin Feng forcibly held back at the last moment. If he really punched him, let alone the Net City no longer needs to be opened, he would be in a lot of trouble.

After Police Officer Zhang left, the Internet City naturally complained that everyone came to have fun online, and their ID cards were checked. What was this called, and it also affected the mood. At the moment, many people got off the plane and left. “Chufeng Internet City” rarely appears empty machines.

“Damn, pure heart is here to find the fault.” Lin Feng cursed in a low voice.

“Oh. Brother, I think I should pay it.” Although Chu Zhixuan was also distressed about the money, he knew that if the money was not paid, “Chufeng.com City” would be uneasy.

He can use the excuse of wanted criminals to check his ID today, and tomorrow he can block the door by catching a thief. The so-called people do not fight with officials. He is just asking for money, and he still needs the money.

Lin Feng also knew this truth, but he was uncomfortable. After thinking for a long time, Lin Feng had to admit it. After Chu Zhixuan communicated through relevant relationships, the so-called public security management fee was reduced to 15 yuan per month.

The next day, Lin Feng paid a lot of the money that was due in June. Of course, this kind of arrest of wanted criminals never happened again.

But the police station was dismissed, and the fire station came again. The excuse that Lin Feng Net City's fire control failed, so Lin Feng was asked to suspend business for rectification. Yes, this is more ruthless than the police station, Lin Feng had to grit his teeth and pay. Otherwise, let you reorganize for three or five months, and all of Lin Feng's plans will be finished. Fortunately, the 3,000 yuan was passed this time.

This is not over yet, the National Taxation Bureau came again and asked Lin Feng to pay the corporate income tax. Otherwise, the business would be closed for rectification. Fortunately, Lin Feng learned well this time. After some private consultations, he fixed an income tax of 2,000 yuan per month without invoicing.

When Lin Feng thought that all the little ghosts had been around, the Lanzhou District Neighborhood Committee came to the door. This time I didn't come to trouble, but to solicit sponsorship. I hope that Lin Feng's "Chufeng Internet City" can support the daily activities of the neighborhood committee. Lin Feng didn't say much this time, the big money was paid out, and the small money didn't care anymore. The 1,000 yuan sponsorship was directly allocated to the Lanzhou District Neighborhood Committee, which was a pass away.

After this trouble, Lin Feng carefully calculated the calculations, starting from this month, he will spend 4925 yuan more each month. Once computers are added in the future, this expenditure will be even more.

Black! —— Lin Feng cursed secretly in his heart, but this is the way in this world. Fortunately, Internet cafes are more profitable, and this extra expenditure can be afforded.

When these many troubles were resolved, it was already mid-June, the eleventh European Cup in 2000 began.

When Lin Feng sat in the Internet cafe and watched the opening match between Belgium and Sweden with Chu Zhixuan and many football-loving fans, Lin Feng suddenly had an idea in his mind, a plan that could greatly shorten his original fund accumulation process again.

Gamble! He can go to Europe to gamble. With his memory of the Euro 2000, he may be able to make a fortune by gambling.

European Cup, you are too timely!
