

F.D Emperor 161

Chapter 161: Peak Battle (2)

Wang Wei looked at the freshly healed Ji Song with a pensive look on his face. He could tell that Ji Song did not use his own natural healing ability, but absorbed energy from the Earth to heal himself.

Although in the Five Elements, Wood is often known for its healing properties, the Earth element is also good at healing.

Many people or culture believed that we humans were born from the soil and will eventually return to it. As such, the Earth is our mother and it can nourish us, it can both heal and protect us.

So, Wang Wei guessed that the cultivation method that Ji Song used was based on that idea.

After thinking about the information he knew from the Great Zhou Imperial Dynasty, Wang Wei then said with a calm smile, "If you only cultivate the [Myriad Earth Codex] to this level, then you are destined to lose this battle."

However, Ji Song just shrugged his shoulders and answered with a cold voice, "It's you that should be worried. From what I've seen so far, it seems that the [Ancient Desolate Body Refining Scripture] was wasted on the likes of you."

"Hehe," replied Wang Wei with a smirk on his face. "And yet, this waste almost killed you with one punch."

Veins instantly started to appear in Ji Song's face, then his mouth started to twitch. However, he immediately calmed himself down. Then, the rock armor manifested around Ji Song again; however, this time things were slightly different.

There were countless red and hot lines that were inscribed in the armor. Following which, it turns from grey to dark red. Two horns appeared on top of Ji Song's head, then, the frozen ground under his feet melted and turned into lava.

Meanwhile, Wang Wei was a little surprised after seeing this. Of course he was not surprised by Ji Song's transformation, but by his reaction. The last time they fought, he instantly became angry after being taunted by Wang Wei.

However, this time, he managed to calm himself down after just a few seconds. After seeing this, Wang Wei then realized that he was not the only one who grew up and learned new things in the past few decades; that his opponents were also growing and learning from their adventures and failures.

In the end, the ones that grow faster and learn to adapt as quickly as possible will be the ones that he gets to meet during the Heaven Will Battle.

After quickly thinking about this kind of thing, he reigned in his mind and focused on the battle. Without hesitation, he rushed straight towards Ji Song and threw a [Earthquake Fist].

However, Ji Song was not to be outdone, so his hand turned into boiling hot magma and he also threw a punch.

Boom!

A terrible explosion occurred after these two clashed. A massive mushroom cloud appeared afterwards. It was as if a nuclear bomb had exploded in the place where their fist clashed.

Then, the entire Northern Region of the Warring Kingdom World started to tremble. All the people and animals living there suddenly felt that everything around them was shaking, that they could hold on to their footing. Luckily, there were few houses or buildings in this region.

Meanwhile, in the middle of the clash, Wang Wei was pushed a few steps behind, lava could be seen all over his body, but there was not even a scratch on him. His skin was still not even injured. As for Ji Song, he stood in the same place, however, he spewed out a big mouthful of blood.

This time however, Wang Wei did not give his opponent the time to recuperate. He instantly activated his Divine Veins and threw a punch. He used the [Lion Fist] attack in his grandfather's cultivation technique, [Overlord Fist].

A lion suddenly appeared after Wang Wei threw his punch, and roared to create a soundwave attack. However, this attack was not a regular [Lion Fist].

No, Wang Wei used the vibration from his [Earthquake Fist] to fuse with the soundwave attack of the Lion's Roar.

As such, Ji Song suddenly felt his eardrum burst, then a powerful shockwave was started to do a number on his internal organs. So, without hesitation he opened his mouth and also roared.

However, what came out of his mouth was not sound waves, but burning lava, which instantly created another powerful explosion after hitting the lion's roar.

Wang Wei reacted quickly and created a shield around him with both his origin qi and the spiritual qi in the environment. He rushed straight into the explosion, bearing all the blunt of the shockwave that it created.

In just a few seconds, he appeared in front of Ji Song, who could not see anything due to all the fire and smoke around him. Nevertheless, he still sensed some sort of danger, so instantly created more lava around his armor and cooled it down, thus reinforcing his defensive ability.

Meanwhile, after Wang Wei reached in front of Ji Song, he used the [Tiger Fist] this time. A tiger manifested from Wang Wei's punch, then revealing an intense killing intent that wanted to overwhelm Ji Song's senses.

However, he woke up after less than a second of being in a trance, however, by that time, the tiger had already turned into a red light pierced straight into his body, trying to destroy anything in its path.

Ji Song's instant armor managed to buy him a brief moment of rest, however, he knew that he would not be able to stop this attack. So, he immediately redirected it into his right arm, thus sacrificing it.

Psst!

A red light pierced Ji Song's right arm, but Ji Song did not scream or back down. Instead, he instantly counter-attacked.

He lifted his leg and stomped on the ground, then the frozen earth seemed to have been cracked by a Heaven Defying Axe.

Meanwhile, Wang Wei--who had just finished his attack--watched as the ground under his feet suddenly separated into two sides, then a powerful volcano eruption appeared with him at the very center.

A terrifying heat engulfed his whole body, wishing to sunder not only his body, but his soul as well; this heat wanted to burn his very existence.

All this while, Ji Song watched all of this happening while at the same time observing how his arm will heal. Unfortunately for him, his fleshly body did not allow him to instantly heal his injuries. So, he began to absorb energy from the Earth to heal.

However, the process was still extremely slow. It was then that Ji Song noticed that this attack also contained a powerful will that prevented his healing, so he started to fight with it.

Meanwhile, after a few minutes, the volcano eruption stopped, and Ji Song watched Wang Wui floating in the air.

Ji Song's face instantly became ugly as he realized that his attack did not break the defense of Wang Wei, let alone injure. To be precise, this attack did not break all of his defense.

Ji Song could see that a powerful field was surrounding Wang Wei's skin, providing him with a powerful defense. His attack managed to break that field, but it still failed to break his skin.

After a few seconds, Ji Song had managed to remove the killing will inside his arm and healed properly. However, Wang Wei's Innate Aura or Field recovered by itself and began to protect him again.

Ji Song's face became ugly as he refused to believe that he could not even wound his opponent.

How could he accept that someone that could not even take on a single punch from a few decades ago, now has outclassed him to this level?

So, he decided to go all out for this fight. His Black Lava Armor suddenly increased from ten meters to 20 meters. Then, Ji Song started to throw punches.

However, with each powerful punch, a meteor was formed and rushed towards Wang Wei. What's more, these meteors broke the sound barrier, increasing their levels of destruction.

Boom! Boom! Boom!

The burning meteor brought with them the will or intent to destroy all things--both physical and spiritual. They wanted to destroy all worlds, all known civilization. Furthermore, this destruction had no rhyme or reason: it existed simply for the sake of destruction.

Wang Wei had a serious look on his face after seeing this attack. However, he was not the least afraid. Without hesitation, he threw a punch with all strength, thus creating air bullets by bending the air pressure in his surroundings to his will.

The first meteor exploded, scattering countless flaming pieces of earth debris all over the surrounding area.

After seeing this, Wang Wei's eyes lit and he continued to punch them. However, the quantity was quite outrageous and they came too fast.

So, after crushing a few dozen meteors, many of them suddenly rushed towards him and crashed into him.

Boom!

Another powerful explosion occurs. Although Wang Wei managed to cross his arms to block the attack, the powerful shockwave still sent him flying a few hundred kilometers until he landed on a frozen mountain.

With another boom sound, the mountain was instantly destroyed after Wang Wei landed. Meanwhile, Ji Song had stopped attacking. He looked in the direction of the mountain while breathing heavily.

He was looking to see whether his attack actually worked this time.

Chapter 162: Peak Battle (3)

Ji Song looked straight at the mountain, waiting for the outcome of his attack. Meanwhile, all around him, there was not a single piece of frozen land. The majority of the Northern Region was turned into lava.

The land that used to be blue from one point all the way to the horizon, had turned red and orange with patches of dark or charcoal molten debris scattering everywhere.

Smoke and steam were billowing towards the cloud, turning them dark. Ashes were blowing all over the place, suffocating any life that had the destiny to survive the shuddering heat.

A few minutes after the attack, the mountain that Wang Wei landed on was instantly blasted off. There, Wang Wei floated in the air.

The upper garment of his clothes were burned off, while only the bottom part of his robe still remained relatively intact. Wang Wei's 8 pack abdomen muscle was showing, while his long grey hair floated in the air.

Ji Song's face--inside the armor--became ugly as he could see that his opponent was still perfectly intact. He took a deep breath to calm himself down as he knew that in order to win this battle, he had to use his last hidden card.

Without hesitation, he jumped a few thousand meters into the air, did a somersault before doing a single leg drop kick towards Wang Wei, who was standing on the lava as if it was nothing but his bath at home.

Wang Wei clenched his hand, mobilized all the powers of his steel-like muscles and threw a punch .

Boom!

A powerful explosion was generated by the clash of these two titans, however, they did not care about such a thing.

Following the explosion, the ground under Wang Wei's feet indented inwards, created a very large web-like crack more than a thousand of meters. Immediately afterwards, to his surprise, Wang Wei actually vomited a big mouthful of blood.

However, Ji Song did not give him time to think or react. He followed his first attack with another powerful punch.

Wang Wei wanted to respond with one of his own, however he soon discovered that it was very hard for him to move. It was as if he was surrounded by a quagmire and his every action was greatly hindered.

As such, Ji Song's punch hit Wang Wei right above his heart, making him throw up another big mouthful of blood before he was sent flying a few thousand kilometers.

On his way, he rebounded on the floor countless times before he managed to regain his footing. He looked at Ji Song after spitting on the ground. His spit and blood instantly vaporized even before hitting the ground.

"You can control gravity?" said Wang Wei with a calm look on his face.

He could tell that the reason that he was injured was not because the attack broke the defense of his skin or muscles, but because it directly bypassed these things and acted straight on his internal organs.

Furthermore, the only reason that he was not that injured was because his Innate Field fended off most of the gravity.

Additionally, in the last attack, Ji Song's strength did not magically become more powerful than him. No, he bent the gravity around him and redirected it towards Wang Wei, thus increasing his strength.

It was like using gravity to lift an object by controlling the direction of the gravity from downward to upward. In the case of this attack, Ji Song controlled the gravity from downwards to forwards, thus dramatically increasing his power.

Wang Wei frowned after thinking about this as he knew that this battle would be more difficult than he thought.

When cultivating the [Ancient Desolate Body Refining Scripture], the process of tempering the internal organs comes after the bones. And at the moment, Wang Wei has not even finished tempering his bones, let alone his internal organs.

However, he did not back down as a sudden idea suddenly came to his mind, then he started breathing strangely. Then, he rushed straight into the sky, heading towards Ji Song who had used his gravity manipulation ability to fly in the air.

Ji Song also rushed towards his opponent and immediately activated the gravity around him, making Wang Wei's movement very stiff. Taking advantage of this opportunity, he threw another punch.

Boom!

Wang Wei was again sent flying. He hit the ground with supersonic speed, resulting in a massive lava tsunami that traveled for miles in. He then coughed off a big mouthful of blood again.

This time, not only was the gravity affecting him, but the ashes on the volcano around him started to enter his body and started wreaking havoc.

However, Ji Song did not give him a single chance to breathe. By increasing the gravity downwards, his speed suddenly increased as he rushed towards Wang Wei.

Five circular vapor shapes could be seen in Ji Song's path, followed by five loud explosions. This showed that using this method, Ji Song's speed has reached Mach 5--which is five times the speed of sound.

Boooooom!

With a speed of Mach 5, Ji Song hit Wang Wei straight in the guts, making him spit saliva, blood, and a few pieces of internal organs. Furthermore, he could hear the sound of bones cracking. Immediately afterwards, Ji Song kicked him from the ground, sending him flying away again.

Meanwhile, Wang Wei groaned before using all his strength before preventing stabilizing himself in the air. However, immediately afterwards, he saw Ji Song coming straight after it, so he crossed his arm to block the oncoming attack.

This time, Wang Wei only sent away a few meters, while actually sliding in the air.

Ji Song frowned, then decided to increase the intensity of the gravity by a few folds. As such, Wang Wei was flown away again with tremendous force, while simultaneously vomiting blood.

However, Wang Wei's healing ability was simply inhuman. Only a few minutes after his injury, his bones would heal by themselves. As for his internal organs, he would use his pure origin force to heal and nourish them.

During the entire confrontation, the Northern Region was completely destroyed. Not to mention that it had already turned into complete lava, thus killing any kind of life that inhabited it: whether it was animals, people, insects, or plants.

The shockwave created by these two people are enough to kill any cultivators below the Divine Body Realm. Luckily for them, only a few people actually lived in the Northern Region; however, the casualties created by their battle was still in the 100,000s.

Meanwhile, Ji Song kept pummeling Wang Wei with more and more powerful attacks. However, his opponent refused to stand down.

More importantly, Ji Song discovered that with each attack, he has to increase the gravity around by a few folds. At this rate, he will not be able to sustain these attacks any longer.

What's more, Ji Song had a feeling that something was wrong, so he used a powerful attack to try to end this battle once for while.

"[Gravity Implosion]" roared Ji Song with a clutching motion of his hand.

Suddenly, Wang Wei felt like he was in a cage as the gravity around him was actually crushing him from all directions: upward, downward, or sideways. All four sides seemed to want to crush him.

Without hesitation, he started to fight back. He stretched out his hands to fight the gravity that seemed to be slowly closing in. He gritted his teeth as he mobilized all the muscles in his body.

The air around Wang Wei started to tremble, then twisted around creating the illusion that the space was about to be destroyed. As a matter of fact, the space of the Warring Kingdom World was indeed close to breaking apart.

Meanwhile, inside the gravity "sphere", Wang Wei's muscles and bones started breaking as he could not bear all the power. However, Wang Wei did not scream or groan, nor did he have a look of despair on his face.

On the contrary, he looked excited. As his muscles and bones kept breaking, Wang Wei kept breathing in a certain way to repair them. Vast amount of spiritual energy between Heaven and Earth entered his body to speed up the process.

At first, Wang Wei was forced on one knee in order to fight back the imploding gravity, but as time passed, he managed to stand up. Then, with a mighty roar, he tore apart the gravity field around him with his bare hand.

Meanwhile, Ji Song looked at all this with an ugly look on his face inside his rock armor before saying, "You used my gravity ability to actually refine your body. To be specific, your internal organs."

As for Wang Wei, he smiled after hearing this before saying: "Well, I would have to temper them with gravity eventually after I finish tempering my bones. I just used this moment of life and death to speed up the process and prepare for the future."

After saying this, he checked his body. His muscle and bone strength have dramatically increased. After he gets back home, all he needs to do is absorb the material necessary for his bones to finish tempering them.

Of course the reason that he allowed himself to be beaten so much was because of the [Overlord Fist] that he cultivated. According to this technique, the more brutal one gets injured, the more benefit they will receive. So, Wang Wei allowed himself to suffer so much.

As for his internal organs, this was the most benefit he received during this fight. According to the [Ancient Desolate Body Refining Scripture], refining the organs is a very dangerous process. As a result, it takes a very long process.

Wang Wei did not want to wait that long. So, he used a life and death situation to force out his potential and accelerated the process. And the benefits he got were unimaginable.

After finishing checking his body, Wang Wei looked at Ji Song with a calm smile, and yet a terrifying killing intent was in his eyes. Then he said, "Are you prepared to experience hell?"

Chapter 163: Peak Battle (4)

Despite the fact that Wang Wei allied himself to be injured in order to increase the strength of his fleshly body, he did not like the feeling of being abused by his opponent.

So, his pettiness got the best of him as he decided to pay back ten fold, hundred fold to Ji Song.

After saying these words, a powerful aura suddenly emanated out of Wang Wei, then the Heaven changed.

The sky of the entire Warring Kingdom world suddenly turned deep grey, the same color as Wang Wei's hair. Then, lightning clouds suddenly covered the entire world.

All the people suddenly felt that the end of the world was happening. A supreme aura traveled throughout the world, forcing the majority of people or beast to kneel down--including all the cultivators.

There were only a handful of people capable of still standing, however, they still had to endure a powerful suppression.

Great Xia Dynasty, Li Jun and Yan Liling felt the pressure and they both had a frown on their face.

"Is that?" asked Yan Liling.

"Yes, that's big brother Wang Wei's aura. I've never seen him so worked up. I suddenly felt sorry for Crown Prince Ji Song." replied

"Are you saying that his majesty did this?" asked Dong Lifen who was kneeling on the ground. To which, Li Jun just nodded as he did not want to waste that much energy talking.

As for Dong Lifen, she had a shocked look on her face. Although she knew that Wang Wei was powerful, it wasn't until today that she knew how powerful he was.

To be able to create celestial phenomena just because of his mood, this was the powers of Gods and Immortals in legends. After thinking about this, a desolate mood suddenly appeared on Dong Lifen's face.

Great Shu Dynasty:

Feng Heng was sweating as he looked at his subordinates that were forced to kneel on the ground. He wanted to do something, but he was also bearing tremendous pressure, so he went back into his temple and activated all the formation.

Feng Heng then sighed in relief. Afterwards, he called out, "Master, what is going on?"

Shi Fuyu then appeared with a frown on his face. He waved his hand, then a scream of the battle between Wang Wei and Ji Song appeared inside the temple.

Meanwhile, in the Northern Lava Region, Ji Song instinctively took a step back after feeling the aura coming out of Wang Wei's body, then he instantly shrugged off the pressure that surrounded him.

As for Wang Wei, he did not say anything more. He clenched his hand, then took the posture of a punch. The space around suddenly vibrated with the contraction of his muscles. He roared, "[Wind Calamity]" before throwing the punch.

Boom!

A massive explosion occurred, following which, millions of black winds appeared before forming countless cyclones, tornadoes, or hurricanes. And all these natural phenomena were actually thousands of kilometers in size or height.

Wang Wei's punch created countless rapidly moving windstorms that twisted themselves in all directions, wishing to destroy or cut everything in their paths.

As for Ji Song, he found himself surrounded by many powerful disasters that wanted to cut him into tiny pieces. So, without hesitation, he waved his hand to create a barrier around him.

However, this was no ordinary barrier, but one created by pushing the gravity outwards from him in all directions, thus preventing the black winds from even touching him.

Unfortunately for Ji Song, his [Gravity Shield] only lasted a few seconds before it was cut apart by countless wind blades, then the attack reached him.

Boom!

Another explosion occurred. The black winds became even more erratic after hitting the target. The majority of the land of the Northern Region had countless deep cuts on them. Some of them were so deep that they formed ravines.

As for Ji Song who was in the center of the attack, he managed to survive, however he was quite miserable.

His armor was completely destroyed, many deep cut wounds could be seen all over his body; some of them even showed his bones. However, this was not the worst part of his wounds.

One of his arms was cut off and blood was gushing out of it like a fountain. Ji Song instantly used his origin qi to stop the bleeding before doing an inhaling motion with his mouth.

He wanted to absorb the life energy of the earth in order to heal himself, unfortunately he did not reach the realm where he can regrow his limbs. As a matter of fact, even Wang Wei has not reached this stage and won't reach it until he finishes refining his bones.

After realizing this, Ji Song then used lava to create a prosthetic arm for himself. Although it was not as good as his real one, it would have to do for now.

Meanwhile, Wang Wei had already launched his second attack. The attack he used this time was called [Thunder Calamity].

After throwing that punch, thunder and lightning enveloped the entire Northern Region, turning it into a thunder field.

And all of these thunder had one purpose: to destroy Ji Song. Even the clouds in the sky started raining thunder.

Ji Song immediately used all the lava on the floor to wrap around him and turned into a rock cocoon. On top of that, he also used his [Gravity Field]. However, the thunder was not playing around.

It destroyed the gravity protection, then the earth shield before hitting Ji Song, destroying every part of his body. An intense pain suddenly assaulted him as he felt that every part of him was slowly burning.

In the end, Ji Song screamed out loud for a long time before the attack stopped. By then, all his skin and muscle was burned black by the lightning, leaving lightning shaped scar all over his back and front.

Meanwhile, Wang Wei took a very brief moment to admire these two powerful attacks that he learned from the [Ancient Desolate Body Refining Scripture] over the past few years.

Since his body--skin and muscle--used both wind and lightning to tempered them, there are techniques in the scripture on how to use these elements as a form of attack.

Previously, Wang Wei did not completely learn about them, but managed to comprehend them fully during his retreat in chaotic space.

After that, Wang Wei used the thunder in his muscle to boost his speed. With more than 7 booms, he reached Mach 7 speed and instantly appeared in front of Ji Song and grabbed him by his head, before flying into the air.

Ji Song took the opportunity to attack Wang Wei with another [Gravity Punch], however his attack had no effect this time. Wang Wei's Innate Field detached itself from his skin and turned into a shield that block the attack.

Ji Song was surprised as he never saw this field behave this way before. Of course he did not know that this was an ability that Wang Wei just developed after the beating he received.

Despite his failure, Ji Song did not stop; he continued to attack the Innate Field, however, it was of no use. Wang Wei dragged him by the face into the sky, then he rushed straight into the ground with all his force.

Boom!

Wang Wei slammed Ji Song on the ground with tremendous power, creating powerful shockwaves that traveled. The shockwave was so powerful that it did not stop after traveling throughout the entire Northern Region, but also headed to the Central region.

If that shockwave even hit that area, countless people would die as a result. Luckily for Wang Wei, True Monarch Yan Chen intervened in time and prevented it from reaching beyond the Northern Region.

As for Ji Song, he screamed again as most of the bones in his body were crushed. He threw out a big mouthful of blood. Many of his internal organs were out of place. However, Wang Wei was not done.

He picked up Ji Song from the ground and threw him in the air, then he threw another punch. This time he combined the [Thunder Calamity] with his [Dragon Sovereign Fist].

As such, a powerful thunder dragon a few kilometers long manifested itself. It brought with it the pride and aloofness of a divine beasts, while at the same time representing the might of Heaven and Earth.

The Dragon rushed straight towards Ji Song, wishing to destroy him in both body and soul, wanting to destroy every single aspect of his existence.

However, right before it did so, a giant illusory image appeared from Ji Song's body and protected him from the majority of the damage.

As such, only one of his legs was completely ripped off by the dragon before he landed on the ground. As for Wang Wei, he frowned after seeing this as he could feel a familiar feeling from this illusory image that appeared; it was as if he knew or saw that person before.

Chapter 164: Peak Battle (Finale)

Although Wang Wei had a feeling that he knew the figure that appeared was too vague for him to actually remember who it was, so he did not dwell too much on it. He figured that he would know soon enough.

As for Ji Song, he was currently on the verge of death. Most of his organs, bones, and muscles were destroyed, two of his limbs were cut off, and his spirit was affected by the might of the dragon.

However, he still had a calm look on his face. To be precise, he had a determined look in his eyes. So, he bit the tip of his tongue to take out a drop of his source blood.

Using that as a catalyst, he launched a secret technique called [Dead Earth]. Following this, countless green lights started entering Ji Song's body, repairing every part of it.

In just a few seconds, all his bones were regrown and placed back together. New organs and muscles appeared, even his cut off arm and leg were also grown back; Ji Song returned to peak conditions.

However, he was not happy. For one, he knew that he would face backlash for using this secret technique. More importantly, the vitality of the entire Northern Region was absorbed by Ji Song.

As a result, from now on, the Northern Land would be truly a barren land, preventing anything from growing or surviving there for thousands of years, or maybe forever.

This act was different from Ji Song's previous destruction of this area due to lava. Even in such hard conditions as boiling lava, many plants would manage to survive and thrive in such an area. Especially fire or extreme yang spiritual herbs, Even ores would also be created in such an environment.

However, with Ji Song's secret method, none of that will be possible from now on. The Northern Region will be more barren than the Western Desert.

This act resulted in Ji Song being rejected by Heavenly Dao. As such, he knew that he did not have much time. What's more, even if he won this battle, he won't be able to stay in this world for long.

So, he did not waste time before using a powerful attack. With a wave of his hand, he roared [Gravity Push], then a powerful gravity force traveled from him destroying everything in all directions.

This attack was essentially Ji Song's [Gravity Shield] expanding outwards, destroying everything in its path.

However, Wang Wei did not care about this attack. With his hair floating in the air, he clenched his hand and threw another punch.

"[Dragon Wind Calamity]"

A very long black dragon appeared from Wang Wei and rushed straight towards Ji Song. It easily tore through his attack and rushed at him. Without hesitation, Ji Song instantly compressed the air around him before exploding, creating an air pressure bomb.

Boom!

With an explosion, the entire Northern Region shook again, and Ji Song was pushed away by the recoil of the explosion.

A few hundred meters from the epicenter, Ji Song threw a mouthful of blood as he frowned. He realized that his regular attacks did not have much effect, so he decided to use the most powerful attacks he could muster.

With a wave of his hand, the entire Northern Region started to tremble, then it was separated from the ground; Ji Song lifted the entire Northern Region, which was a piece of land larger in circumference than a few planet Earths combined together.

Then, with a wave of his hand, the piece of continent broke into countless small pieces, forming countless flaming meteorites.

"[Meteor Rain]" roared Ji Song, then waved all these meteors towards Wang Wei. This was not a normal meteor shower, but one that Ji Song used gravity to accelerate their traveling speed.

Wang Wei raised his head in the air to look at all the flashing lights coming towards him. It was a beautiful sight as Wang Wei had never witnessed a meteor shower before, let alone having one thrown at him.

After taking a brief moment to admire the view, Wang Wei also prepared to use his most powerful attack. This attack was an upgraded version of his [Earthquake Fist] that he just created.

Wang Wei started to mobilize all the vibration from his body: whether it was his near neutron star dense skin, his diamond strong muscle, or his steel-like bones, they all vibrated rapidly.

And he did not stop there. The Innate Field around him also started vibrating, along with the thunder and wind lodged in his skin and muscles. Heck, even his soul also vibrated at a rapid rate.

Then, he concentrated all these vibrations in his fist, and threw a punch as he roared:

"[World-Breaking Fist]"

The moment that Wang Wei threw that punch, everything in the world became silent. For a brief moment, all the birds stopped chirping, the flowers stopped swaying, insects lost their ability to flap their wings and humans lost the ability to speak.

Then, the entire world turned black, losing its light.

All that happened in just a blink of an eye. Then, the entire world started shaking. Whether it was the Eastern Region where the Great Xia was located or the Central Region where the Great Shu and Great Zhou dominate, everything started shaking.

Following which, all kinds of natural disasters began. Earthquakes appeared everywhere, tsunamis could be seen all over the Eastern Coasts, Volcanoes started to erupt, tornadoes or cyclones were formed all over the Central Region. Meanwhile, sandstorms ravaged the western Desert.

Space cracks started to appear all over what remained of the Northern Region. Many people were about to be killed as a result of these catastrophes.

At that time, in the Endless Void, both True Monarch Yan Chen and Ji Han's face instantly changed after seeing this, so they acted immediately.

They waved their hands, then the entire Warring Kingdom Small Thousand World and all the people inside shrink into a hand-size ball, then with another wave of their hands, countless runes appeared around the crystal-clear ball that was actually an entire world.

After doing this, all the natural disasters that plagued this world subsided, saving the lives of its inhabitants.

Yan Chen sighed in relief before grinning widely. Then he said, "I cannot believe that the young master's attack actually reached the destruction level of the Primordial Spirit Realm."

"Originally, we refined this world to be able to bear peak Divine Body Realm level attacks, but it seemed that this was not enough."

While Yan Chen was happily chatting to himself, Ji Han had an ugly look on his face as his Heaven Chosen was the one to face such an attack

Back to the battle:

After Wang Wei threw that heaven defying punch, the meteor shower launched by Ji Song was completely annihilated. There was not even a speck of dust left; they were completely atomized by the vibration created by that attack.

And it was not just them that were completely annihilated. Even the space around Wang Wei was also mostly destroyed, creating a vacuum void full of chaotic space energy floating in the Northern Region.

Normally speaking, only cultivators in the Void Shattered Realm can actually break space, hence the name. However, due to the fact that Wang Wei's attack exceeded this world's bearing capacity, space was thus shattered.

As for Ji Song, he still managed to survive somehow. Right before the attack hit him, the same illusory image appeared to protect him again. This time, Wang Wei managed to see what it was.

"Retire Prince Ji Xiang?" muttered Wang Wei. Then, he seemed to have thought of something and said in shock, "Dharma Body?"

The reason that he was surprised was because the illusory image that appeared to protect Ji Song actually resembled the Supreme Realm's Dharma Body.

After thinking for a few minutes, Wang Wei guessed the gist of things. He guessed that True Monarch Ji Xiang must have used a secret method to sacrifice himself in order to heal Ji Song's foundation that was ruined back in the Spirit Road Trial.

This was proof due to the fact that Ji Xiang never showed up after that incident, and the fact that there was a vision in the Central Continent signifying the death of a Supreme Realm Powerhouse.

At that time, many people went to investigate and found nothing--including the Dao Opening Sect's Shadow of this generation. However, divination did reveal that the dead Supreme was related to the Great Zhou Imperial Dynasty.

So, after seeing this Dharma Body on Ji Song Wang Wei suddenly put two and two together.

Ji Xiang' secret method not only repaired and improved Ji Song's Foundation, but also granted him with an entire Dharma Body--meaning a complete Dao was given to Ji Song.

So, in the future, when he broke through the Supreme Realm, he will have two Dharma Bodies--which is an unprecedented feat.

After thinking about these for a few seconds, he looked at Ji Song's body that was floating in the Void.

He was in terrible shape. Three of his limbs were completely gone, leaving only his left leg. His internal organs and bones were totally liquefied, leaving only his skull and a bag of skin still intact, floating in the air.

By all accounts he should be dead, but a powerful force was protecting his head and soul, then providing him with a powerful life force to keep him breathing.

Wang Wei looked in one direction before saying out loud, "I know that you are here, so come out."

Immediately afterwards, a shadow appeared not far in front of Wang Wei.

Chapter 165: Aftermath of the Battle

The person that appeared in front of Wang Wei was of course Ji Song's big brother, Ji Su. He witnessed the entire battle in order to prevent the worst from happening to his brother.

Ji Su looked at the terrible sight of his brother with a sigh. During his battle, his little brother was completely outmatched in every way. The worst part is the fact that his opponent did not use all his strength.

By now, it is already common knowledge that Wang Wei is a Young Emperor, and every young emperor contained a Pseudo-Domain-like ability. However, he did not use that even once during that fight.

Although Ji Su knew that his little brother had prepared on how to deal with that ability, it was not certain how effective the method would be and whether it would affect the outcome of the battle.

After sighing a few more times, Ji Su took out a Saint Pill and fed it to Ji Song. The pill's only purpose is to keep alive for as long as possible. So that he can properly heal after returning back home.

All this time, Ji Su looked at Wang Wei with the utmost vigilance. Any sudden movement will prompt him to instantly react.

However, Wang Wei just smiled nonchalantly before saying:

"You do not need to be vigilant. Even with your Peak Divine Body Realm cultivation, you are not my match. If I wanted to do something, you could not stop me."

Ji Su frowned after hearing this, but he did not say anything, and he still remained vigilant.

He was not afraid of a confrontation. After witnessing that battle, he knew that Wang Wei's attack or destructive ability had reached the lowest threshold of the Primordial Spirit Realm.

However, there is still much instability with his strength. Although his destructive power and defense have reached that level, his stamina and more importantly, his speed, have not reached that level.

So, Ji Su is confident that with his cultivation level in the Peak Divine Body Realm, as long as he uses a few techniques, his speed can reach that level and he can run away with his brother if necessary.

So, after pondering for a few seconds, he said: "You are the winner of this battle. According to our agreement, the territories of Great Zhou belonged to you."

After saying this, he crushed a talisman, then he and his brother were swallowed by a space crack.

Meanwhile, Wang Wei sighed after seeing this. The truth of the matter is that he was not in the best shape as well. Although he was not injured, his entire body was aching after he threw that last punch. He even had a terrible headache, signaling that even his spirit was greatly fatigued.

On top of that, Wang Wei was actually in quite the conundrum. His ability to fly was due to his terrible control of spiritual energy between Heaven and Earth. However, there was currently no such thing as spiritual energy around him.

His last attack created a vacuum environment, meaning there was no spiritual energy, no gravity. So, Wang Wei was just floating in empty space.

His powerful fleshly body allows him to breathe there, and his Innate Field prevents him from floating away. However, he could not fly, so he was literally stuck there.

On top of that, his stamina was at an all time low, so Wang Wei discovered to his embarrassment that he was actually stuck there.

So, he decided to use a communication talisman to call someone to come pick him up. However, before he did so, Wang Ju appeared in front of him.

Wang Wei sighed in relief after seeing her and asked to be carried away. And Wang Ju happily obliged. She then placed him on her back and flew towards the Central Region.

"This reminded me of old times when you used to carry me everywhere," said Wang Wei as he placed a bunch of pills inside his mouth.

"Now that young master has the ability to fly, of course you no longer need this maid to carry you everywhere."

"I will always need you in one way or another," replied Wang Wei as he closed his eyes and rested on her back. Meanwhile, Wang Ju had a smile on her usually calm face.

This journey was supposed to be a long one as it was a little hard for Wang Ju to fly in a Vacuum Space with her cultivation in the early stage of the Divine Body Realm.

However, midway through, the space around her twisted, then she instantly appeared in the Great Xia Capital. She guessed that this was probably the doing of True Monarch Yan Chen, so she bowed to the sky before heading straight to the Imperial Palace.

Meanwhile, Wang Wei and Ji Song's battle had a far lasting impact that the two of them were even aware of.

Many people, sects or factions of the Myriad Emperor World were secretly watching this battle. And they were shocked. Not just at Wang Wei's power, but even at Ji Song's strength.

This battle showed that the Heaven Chosen of this generation have the ability to fight Three Great Realms above them, which was unheard of. The only person who could do such a thing in the last generation was probably Wang Tian, but even he did not accomplish this feat until he created his [Absolute Cut Sword Sutra] and reached the Peak of the Supernatural Realm.

And that was because sword cultivators are known for their Extreme Ways of attack.

So, whether it was Ji Song or Wang Wei, they both were in the radar of all the factions of the Myriad Emperor World.

Qilin Central Continent, Fang Family Domain, in a very large mansion:

Fang Lijuan had just finished watching that battle and she secretly clenched her hand. Compared to those two people, her strength that she is so proud of is nothing but a complete joke. Luckily, for her, there is still hope.

After thinking about this, she looked at the talisman in her hand, and her cold eyes lit up. As long as she can thoroughly study this talisman and absorb its strength for her own, she can create her own Dao, thus severing the shackles of her bloodline.

So, Fang Lijuan closed her eyes and began to understand or be enlightened on this talisman.

Huang Family Domain, Huang Min had also just finished watching the terrifying battle. His face was extremely pale, while his face had an ugly look on it.

Immediately afterwards, he called one of his maids and asked, "What was the result?"

"Young Master, the Fang Clan hesitated at first, pondering whether to accept our request. However, suddenly, they changed their mind and decided to protect Fang Lijuan at all cost--even if they have to go to war with our Huang Clan."

Huang Min frowned after hearing this before asking, "What about the response of our Huang Clan?"

"The Clan does not seem to want to go to war with the Fang Clan."

"How come!"

"Well, your father--the Patriarch--wanted to fight with the Fang Clan, however, the Grand Elder strongly disagreed."

"Damn stupid uncle, why does he opposed father at every turn," replied Huang Min with veins popping of his forehead.

"What reason did he use to prevent the war?"

The maid lowered her head after hearing this question, then she said, "The Great Elder said it was not worth it for the Clan to go to war and waste so many resources for a..."

"For a wasteful person, isn't it?" asked Huang Min with red eyes and gritted teeth. "A person who has their bloodline destroyed is a waste, isn't it?"

The maid lowered her head and did not say anything. As such, Huang Min then waved his hand to dismiss her.

A few minutes later, a middle-aged man appeared in Huang Min's room: it was his father. So, Huang Min rushed to meet him with a look of expectancy on his face.

However, his father just sighed and shook his head, an act which made Huang Min's face become very ugly.

His father then said, "The Fang Clan seemed adamant in supporting Fang Lijuan for this generation's Heaven Will Battle."

"But why? Didn't they see the battle between those two? Could they really believe that Fang Lijuan has any chance at all."

"Who knows," shrugged his father. "It may be because an Eternal Emperor might appear in this generation, so they wanted to take their chances. Or, Fang Lijuan might have acquired something in that trial that boosted their confidence."

"In the end, what truly matters is the fact that they are more than willing to go to war with us in order to protect her."

Huang Min looked at his father with bloodshot eyes for a few seconds before taking a deep breath, then he asked, "What about the issue of my bloodline?"

After hearing this question, Huang Min's father just sighed again before saying, "I'm afraid that there is nothing the clan can do about this. The herb used on you is a very rare and extinct one. As such, the herbs needed to create an antidote are also extinct long ago."

"Since the poison herb was found in the Warring Kingdom World, couldn't the ones for the antidote be also found there?"

"Things are not as simple as you make it out to be," replied Huang Min's father with a sigh. "According to our agreement, the final winner of the trial will get control over the entire Small Thousand World."

"At this rate, it is obvious that the Sacred Son of the Dao Opening Sect will be the final winner. Do you think that the Dao Opening Sect will allow our Huang Clan to go hunting for precious herbs in their territory?"

'What's more, even if we get the herbs, who would refine the antidote for you? You know that the only powerful alchemist in our clan belonged to your uncle's faction."

"So, what am I going to do now?"

Huang Min's father patted his shoulder before saying, "You do not have to worry. With me here, nothing will happen to you and you can live a life without any care or worries."

After saying that, Huang Min's father left. As he walked away, he could hear the sound of things being destroyed or thrown all over. He sighed but continued on his way.

Meanwhile, in the Herd Raising Valley, Liu Meixiu also just finished watching the battle between Ji Song and Wan Wei. She too was surprised by the immense power displayed by her peers.

As such, she had a deep frown on her face for a few minutes after the battle ended, then she sneered before saying, "Do you think everything is over because I left the trial?"

Chapter 166: Absolute Beginning Emperor (1)

Warring Kingdom World, Great Xia Dynasty:

Wang Wei spent a few days inside his cultivation room to heal his injuries and recuperate his lost stamina. Of course Wang Wei was not just doing this, but also reviewing what he learned during this battle.

Afterwards, he exited his room, however, on his way he saw Dong Lifen waiting outside the room for him. It seemed that she had been waiting for quite some time.

"What are you doing here?" he asked her.

"Your majesty, I was just worried about you."

After hearing this, Wang Wei looked her up and down before sighing, then he asked her to join him for tea.

After brewing and drinking the tea, Wang Wei got right to the point and was quite direct as he said, "I can feel that you have some feeling towards me, however, what I said to you when we first met is true."

Don Lifen lowered her head after hearing this, then she asked in a lowered voice, "Is it because of my low status? Does your majesty hate that I am weak and not worthy of you?"

Wang Wei was a little surprised at the question, but he shook his head before saying, "I have never judged a person based on their background. Furthermore, with your talent, as long as you arrived in my world, many powerful sects would be more than happy to make you their heir, thus your status would be the same as mine."

"And with high status and plenty of resources, your strength will of course increase dramatically."

"Then, if it is not humble birth, could it be that I'm not beautiful enough?" asked Dong Lifan with her head still lowered.

"I'm not that superficial," replied Wang Wei with a sigh. "The truth of the matter is I believe that a Fated Person is out there waiting for me."

"Although I know that it is a little ironic coming from the guy whose Dao involved controlling his own fate and the fate of myriad worlds and races, but when it comes to love, I still believe in fate."

"I believe that when I meet that person for the first time, I will instantly know that she was meant for me, that we belong together. Many might argue that this kind of love is superficial and shallow, but I still believe in it."

"I still believe that she and I will be together for eternity, that she will accompany me in my pursuit of the end of the Dao. And not just as my wife, but as my equal, as my companion, as a fellow pursuer of the truth."

After saying this, the face of someone suddenly appeared in his mind. Even with Wang Wei's unforgettable memory, the face was quite vague or blurred, however, he had a feeling that he would instinctively recognize that person the day that they actually met.

Meanwhile, Dong Lifan was surprised by Wang Wei's words as she had never seen him like this. More often, he gave her the feeling that he was mighty and strong, that nothing could truly bother, that he had a solution to every problem.

After thinking about this, she sighed before saying, "Well, whoever this woman is, she will be the luckiest woman in the world to have your majesty's affection."

"I'm the one who will be lucky," replied Wang Wei with a smile on his face. After that, the two of them drink their tea in silence. In the end, Dong Lifen got up to leave, however, Wang Wei stopped her one last time and said:

"I can see that you have a very ambitious side when it comes to cultivating and pursuing the Dao, so let me give you a piece of advice."

"If you truly want to go far in the path of cultivating, do not let anyone dictate your worth. Whether it is societal customs, your origin or birth, Heaven and Earth, and even me."

"You alone can determine what you are worth, what you are capable of and what height you can reach."

Dong Lifen's eyes lit up after hearing this as he realized the importance of these words. She decided to remember them and meditate on them when she has time. As such, she bowed politely to Wang Wei before leaving with fast and steady strides.

After finishing his discussion with Dong Lifen, Wang Wei went out to deal with the affairs of the dynasty. His territory has just been exponentially increased, as such, there are many things left for him to deal with.

Meanwhile, in the Great Shu Dynasty, Feng Heng had also watched the battle between Ji Song and Wang Wei. At first, he was also shocked, but eventually calmed himself down.

However, he noticed that his master seemed unsettled the entire time. So, he finally asked the reason.

"Disciple, I think you are in trouble," said Shi Fuyu with a frown on his face.

"Master, what do you mean?"

After thinking for a few seconds, he replied, "This Wang Wei reminds me of a young version of your sect's ancestor."

"The Absolute Beginning Emperor?"

"Yes."

"Master, since you were alive back then, what kind of person was your ancestor? Not a lot of records are left about him in the sect."

After pondering for a while, Shi Fuyu asked, "Tell me what you know?"

"All I know is the fact that the ancestor's real name was Li Taishuang, and he took the name Absolute Beginning after proving the Dao. And he is most famous for ending the Incense/Faith Era."

Shi Fuyu nodded before continuing:

"Things were not as simple as you state. Back then, during the Incense Era, Buddhism reigned supreme throughout the entire world. Due to the technique of absorbing Faith or Incense Power, the cultivation speed of most Buddhist cultivators was faster and they had more strength than other people--even compared to the Heaven Chosens of that era."

"During that time, even the Dao Opening Sect was nothing as they only had three Great Emperors by the end of the Incense Era. Although there were countless different sects or philosophies of Buddhism, they were still united when facing outsiders."

"The only group that could compete with Buddhism back then was the Heaven Race or God Race."

"God Race? Do you mean the Divine Clan of the Divine Dao League?" asked Feng Heng with a puzzled look on his face as he had never heard of any Heaven Race or God Race.

After seeing the puzzled look on his disciple's face. Shi Fuyu sighed melancholy before shaking his head, "No, they are different. As a matter of fact, the Divine Clans got the idea of inheriting bloodline from the Heaven Race."

"As for the Heaven Race, they were the physical manifestation of concepts like thunder, fire, water, earth...etc. As such, they were always referred to as Thunder God, Fire God, and so on."

"Isn't that the Spirit Race?"

However, Shi Fuyu still shook his head before saying, "It's still different. The God Race was created when countless mortals and cultivators prayed to a specific concept, such as praying to fire and treating it as a God. The Incense Power generated by all those people created a living being with unimaginable power that embodies all the prayers that people offered them, the God Race."

"As for the Spirit Race, they were born by Heaven and Earth themselves through a long time and using massive spiritual energy. Furthermore, Spirit Races still have to slowly cultivate, but the Heaven Race was born extremely powerful. The weakest one had the strength of the Primordial Spirit Realm, while some were born with a cultivation of the Supreme Realm."

Feng Heng nodded as he understood the difference between them. The Spirit Race was basically like demonic beasts that have turned into human shape and called themselves Demon Race.

However, the Spirit Race is mostly made up of plants, stones, or weapons that have gained sentience and mold a human body. According to Feng Heng's knowledge, these individuals refused to acknowledge themselves as Demon Race, so they blended together to create the Spirit Race.

After seeing that his disciple understood, Shi Fuyu continued, "The Heaven Race was able to compete with Buddhism at first because it was easier for them to absorb Faith or Incense Power than any other cultivators."

"At first?"

"Yes. The Buddhist Sects did not allow anyone to threaten their status, so they conceived a plan to weaken the power of the Heaven Race. You should be aware of the Conferred God List right?"

"Yes," responded Feng Heng while nodding his head.

"That's the method that we used. By conferring the title of Godhood to certain human cultivators, we can divide the power of the Heaven Race."

"How to divide it?"

"An example would be that a human was granted the title of Fire God. When people pray to the Fire God, who does the Faith Power go to? To the Heaven Race Fire God, or the Human Race that holds the position of Fire God?"

Feng Heng's eyes lit up after hearing this as he realized that this was indeed a good way to weaken the power of the Heaven Race. Then, he asked, "Master, if what you said is true, why didn't the other factions use Faith? Why haven't I heard of the Heaven Race?"

Chapter 167: Absolute Beginning Emperor (2)

Shi Fuyu pondered for a while to reorganized his words, then he said, "At first, many people did absorb the power of faith to cultivate--especially in the early stage of the Incense Era, however, the power of faith and incense had repercussion or side affects."

"Side effects? According to the records in the Profound Gate, faith and incense is very poisonous to the spirit. Is that what you mean by repercussions?" asked Feng Heng.

"It's not that simple. Do you know what faith actually is?"

"No."

"Faith is basically the aggregation of spiritual power of countless people. For example, when someone prays to either offer worship to a higher being or to ask them for something, a part of their spiritual power will combine with the spiritual energy between Heaven and Earth to form the power of Faith or Incense."

"The negative side of this is the fact these spiritual powers are not pure, but full of emotions and desires. As a matter of fact, the power of faith was first discovered when a monk accidentally absorbed this power in a temple while breaking through the Primordial Spirit Realm."

"That monk discovered that he could use the Incense to go through the Heart Demon Tribulation needed to turn his soul into a Primordial Spirit. Later, this method was used by Buddhist and other sects to make it easier to break through into that realm."

"However, faith is not only made of positive emotion or desire, but also negative one, which can easily affect a person's spirit, forcibly changing their nature. Especially later on in that era when Buddhist sect absorbed a massive amount of Incense Power."

"The majority of monks in that time became brutal and greedy. They would slaughter people for no reason. More importantly, they would enslave mortals to force them to pray and offer Incense to them."

Shi Fuyu paused for a moment, then took a short passage down memory lane. Meanwhile, Feng Heng hurriedly asked, "So, how did the people of that time deal with the problem?"

The question jolted Shi Fuyu from his memories, he smiled before answering, "This problem occurred in the early stage of the Incense Era, so I'm not very sure exactly what happened."

"What I do know was that it was solved by the Karmic Unbound Emperor."

"Karmic Unbound Emperor? Never heard of him," replied Feng Heng.

Shi Fuyu paused for a moment after hearing this, then he looked at his disciple deeply.

"Master, is there something wrong?"

"No," replied Shi Fuyu as he secretly sighed. "The Karmic Unbound Emperor was actually the first Buddhist Emperor of the Incensed Era. He created the Karmic Heavenly Flame and passed it down to the world."

"As a result, the Buddhist Sect could use this flame to burn out the impurities inside the Incense Power, thus making it easier to absorb."

"Since this flame has the name Karma, does that mean it could be used to wash away the Karma of the people who absorb Incense Power?" asked Feng Heng.

"You are correct, however, Incense is not as karmically binding as Qi Luck. As long as the person who absorbed the power accomplished the wish or desire of the people who prayed to them, they can still escape being bound by karma."

"Master, since the problem was solved, why did other people stop using that power?"

"That's because the majority cultivator labeled the Incense Dao as heretical or unorthodox. Not to mention that only the Buddhist Sects had access to the Heavenly Karma Flame."

"Furthermore, the flame did not completely solve the problem. At first everything was fine, however, the Buddhist Sects decided to expand their borders to all the other worlds in the community."

"They not only preach the philosophy and ideas of Buddhism, but also use these worlds to gather a massive amount of Faith. However, with this large amount of power, even the Karmic Flames could not remove all the impurities."

"At that time, the Buddhist Sect began to fracture due to the internal contradiction."

"You mean infighting?" asked Feng Heng with a surprise look on his face.

"Yes. The term 'Buddhist Sect' is used to refer to a coalition of all the different factions of that era that practiced the teachings of Buddha. So, you can imagine the contradiction with so many Emperor Lineages collaborating together."

"So what caused the split between them?"

"Well, one faction wanted to stop using Incense Power due to its harmful nature, or at the very least not absorb so much."

"The other faction was more aggressive and refused to stop. They believed that doing so would greatly decrease the power of the Buddhist Sect."

"So, which faction won in the end?" asked Feng Heng with an intrigued look on his face.

"At first, the peaceful faction had the advantage. After all, Buddhism is a sect that focuses on discovering the self, liberating the self from the Sea of Suffering and reaching Nirvana. For most Buddhist cultivators at that time, the power of Incense was just a means to achieve enlightenment at a more rapid pace and help more people liberate themselves from their suffering."

"However, things rapidly changed. The radical faction conducted a ceremony that contacted a powerful being using a massive amount of Incense Power. That being then gifted that faction the Western Pure Bliss Land, or Buddha World."

"Wait, Western Pure Bliss Land? Are you talking about one of the Six Forbidden Lands?" asked Feng Heng, visibly shocked.

Shi Fuyu nodded before replying, "Now it is considered a Forbidden Land, but back then, it was not."

"Western Pure Bliss Land was the holy land of Buddhism. Just standing there, you could feel the powerful Buddha Rhyme that increased understanding and enlightenment."

"At the center lies the Maitreya Bodhi Tree, a very powerful spiritual tree that may have reached beyond the Emperor Tier. Anyone who meditated under it will have the Maitreya Buddha Mother explaining the Dao to them herself."

"She was an unimaginable being that words alone could not express her sacredness. Just being in the divine presence of the Divine Mother Buddha was enough for any monk to know and experience what true Nirvana was--even for a brief moment. A brief moment that all monks pursue for their entire lives, even willing to give their entire life," said Shi Fuyu with a twinkle in his eyes.

"What? Beyond Emperor Tier? Master, does such a thing exist?" asked Feng Feng all flustered.

Shi Fuyu looked at his disciple realizing that he must have said something that he should not, so he immediately said. "You do not need to think about these kinds of things that are outside of your capabilities."

Feng Heng nodded mechanically, but the look of shock was still in his face. After seeing this, Shi Fuyu did not say anything, giving his disciple the chance to slowly process that information that he let slip.

And this quiet lasted a few hours. Then, Feng Heng took a deep breath to calm himself down before saying, "Master, so what happened between the contradiction of the two factions? And what does any of this have to do with my ancestor, the Absolute Beginning Emperor."

Shi Fuyu looked up and down at his disciple. After noticing that he had relatively calm down, he continued:

"Well, after getting access to the Western Pure Bliss Land, the radical faction labeled the other faction as unorthodox and almost destroyed them. Luckily, the peaceful faction had previously taken control over the Heavenly Karmic Flame, so they still found a way to survive."

"Master, wait, if the peaceful faction had control of the Karmic Flame, then how did the other faction refine their Faith Power?"

"Well, Western Pure Bliss Land also had this ability, so they did not need it."

Feng Heng nodded, then he asked, "So, what brought the destruction of Buddhism in the end? What about the Heaven Race you previously mentioned?"

"Be patient, I'm getting there."

"After eliminating their competitors, the Buddhist Sect began to gather incense using more radical means in order to power up the Western Pure Bliss Land."

"They mainly targeted the Small Thousand Worlds in our community. By creating catastrophe, then sending a Buddhist Emissary to save the world, they could gather very pure Incense Power."

"At that time, every time a Buddhist Emperor managed to prove the Dao, he would lead the world to conquer other worlds in order to gather more faith. Of course not all Emperors born in that era belonged to the Buddhist Sect."

"Other factions also managed to cultivate one of two Emperors back then, and those Emperors tried to deal with the Buddhist Sect, but they were not strong enough--especially with the protection of the Western Pure Bliss Land."

"The only Emperor that posed a threat back then was the Ancient Desolate Emperor of the Dao Opening Sect, however, since he had some karma with Buddhism, he did not attack them, but instead made a deal with them not to do anything to his sect in exchange for his neutrality."

"All of these actions actually garnered the ire of all the factions of the world, however, everyone decided to close one eye because of how powerful the Buddhist Sects were."

"However, when we created the [One World Nirvana Plan], everything changed."

Chapter 168: Absolute Beginning Emperor (3)

"[One World Nirvana Plan]? What's that?" asked Feng Heng.

"Just like the name implies, it was a plan that allowed all the Buddhist cultivators to all reach Nirvana by combining all their consciousness together, thus reaching a realm One-Self, One-Being, or One-World."

"That sounds like a brilliant plan, so why did it cause the destruction of Buddhism?"

"It was indeed a brilliant plan, and one that had a high chance of success too. However, there were three major problems: one of was the energy needed to sustain such a powerful consciousness, second was a leader to bear such tremendous amounts of power, and lastly was whether Heavenly Dao would allow such a thing to happen."

"The problem of leader could be solved as long as a powerful Great Emperor was born in the Buddhist Sect. As for the other two problems, well they both had the same solution: Incense Power."

"As long as the Incense Power was enough, the energy required for this plan to succeed was more than enough. As for Heavenly Dao, the Buddhist believed that as long as reaching Nirvana was the belief or desire of all living beings, Heavenly Dao would not interfere."

"All living beings? You don't mean..." asked Feng Heng.

"Yes. The plan of the Buddhist Sect was to conquer the entire Myriad Plane World, then gather Faith from the entire world."

Feng Heng looked at his teacher with his mouth open, becoming speechless. The entire Myriad Emperor World is vast and very powerful, beside the Human Emperor, the world was only conquered once again in the Devil Era.

Shi Fuyu could guess what his disciple was thinking, "Yes, the Buddhist Sect wanted to conquer the entire world, just the Great Qin Imperial Dynasty.

After calming himself down, he said, "I'm guessing that they did not succeed."

"Even worse, they did not even begin their plan before they were destroyed."

"How come?"

"The Buddhist Sect knew that the cultivators of the world would never allow someone else to conquer the world like the Human Emperor, so this plan was kept the highest level of secret. They planned to only execute the plan after they cultivate a powerful Great Emperor. Unfortunately, the plan was leaked."

"Leaked? How?" asked Feng Heng.

"Well, this is where your ancestor came into this story."

Shi Fuyu paused for a few seconds before continuing:

"In the Ancient Emperor Era, both Taoism and Buddhist were actually competitor and fought for the title of the Orthodox religion of the Myriad Emperor World."

"During that time, the Five Element Palace was the leader of Taoism, while the Taiyi Profound Gate was probably not even created yet. However, after the Incense Era, Taosim was completely suppressed by Buddhism to the point that the Five Element Palace was forced to close their mountains for generations, only coming out when they decided to fight for the Heaven Will Battle."

"As such, the Taiyi Profound strived during the Incense Era with the absence of the Five Element Palace. However, they were only considered an Immortal Land, not an Emperor Lineage as they did not cultivate a Great Emperor of their own."

"Immortal Land?" interrupted Feng Heng

"Just know that they are more powerful than Supreme Land, but way weaker than Emperor Lineages. You will get access to this information when you become more powerful later in the future," replied Shi Fuyu, so he just nodded.

"Your ancestor actually got the news about the [One World Nirvana Plan] from the Heaven Race."

"How would the Heaven Race get access to such a powerful secret? Let alone leak it?"

Shi Fuyu sighed before continuing: "The plan actually needed a tremendous amount of Faith, and as the Heaven Race was born out of Incense and Faith, they were the perfect people to use as a catalyst to execute it. Furthermore, the Buddhist Sect wanted allies before executing the plan."

"With this plan, the Heaven Race would have access to a tremendous amount of Incense Power, as such they could deal with the problem of the low population of their race. So, they were the perfect partner."

"As for your ancestor, no one knew his exact connection with the Heaven Race, however, after finding out about the plan, he secretly rallied all the cultivators of the world against Buddhism."

After a brief pause, Shi Fuyu continued, "Your ancestor was a heaven defying genius with a deep and scheming mind. He was very low-key during his rise and his reputation was not very loud."

"Everyone knew that he was powerful, but no one knew how powerful until the Heaven Will Battle."

"In that Battle, the Buddhist Sect had pooled together all their resources to cultivate a terrifying genius. Using all the Incense Power of the entire Sect--which by that time had spread through thousands upon thousand of Worlds--they created a Buddha Golden Body."

"I remember that day when the Golden Body was completed. Buddha Lights enveloped all the continents of the Myriad Emperor World along with multi-colored lotus. The chant of countless people in myriad worlds chanting reverberated throughout the entire World Community we are located in. It was truly a majestic sight."

"Unfortunately, it was useless," said Shi Fuyu with a sigh.

"Because of the ancestor?"

"Yes, because of Li Taishuang. In that generation's Heaven Will Battle, he alone faced all the Heaven Chosens of the Buddhist Sect and killed all of them--even the one with the Buddha Golden Body."

"At one point, the owner of the Golden Body even sacrificed the lives of all the Heaven Chosen to increase his strength. After all, he was the embodiment of the hope and wishes of all the Buddhist monks, he was the aspiration of an entire Era."

"However, it was futile as he still failed under Li Taishuang's sword. After that, your ancestor proved the Dao and took the name of Absolute Beginning."

Shi Fuyu took a few second pause after talking up to here, then the hand that was behind his back was secretly clenched as he continued:

"Do you think that things are over? No, this was just the beginning."

"After proving the Dao, the Absolute Beginning Emperor showed his ruthless side. He rallied all the sects that he had previously contacted and used the [One World Nirvana Plan] as an excuse to wage a terrible war against Buddhism."

"And he was relentless. The Absolute Beginning Emperor seemed to have a terrible hatred for Incense Power, so he set out to completely eradicate Buddhism, and he succeeded."

"He destroyed all the Buddhist Sect in the entire Myriad Emperor World, even the countless Emperor Lineages were not spared. Even the Heaven Race was not spared from his wreath--despite the fact that many of them still supported him."

"As for the Buddhist Sect, no matter what method they used, it was simply useless."

"During that period, countless Immortal Venerable and Dao Ancestors were killed and slaughtered. Many Will left over by previous Great Emperors manifested themselves, but they were no match for the Absolute Beginning Emperor."

"Even the Western Pure Bliss Land was not spared as it was also destroyed by the Absolute Beginning Emperor, And by that time, the Bliss Land had actually evolved into a Great Thousand World, only a little smaller before reaching the size of a Heaven Will World like the Myriad Emperor World."

Meanwhile, Feng Heng had twinkled in his eyes after hearing the exploits of his sect's ancestor. As for Shi Fuyu, the hand behind his back further clenched, showing red veins on them. But he still continue:

"Do you think this was the end? No, the Absolute Beginning Emperor was truly relentless. Using his own Dao, he actually cut the Absolute Beginning of Buddhism, meaning he erased their origin from the world."

"So, disciple, what do you think happened to someone who has their beginning erased?"

"They will cease to exist. Without beginning, there is no living and no eventual end," replied Feng Heng after thinking for a few seconds.:

"That's correct. With this method, all history of Buddhism was erased from existence, all their knowledge and philosophy, all their cultivation techniques, all their accomplishments, and even all memories of them. Anything related to Buddhism was completely gone, wiped out."

"This is the reason that virtually nothing is known about Buddhism in this Era."

Feng Heng was shocked, then he quickly asked something. "Wait, if what you said is true, there should not be any information 'whatsoever' about Buddhism in this current era, yet there is still some news remaining about them floating? What's more, the Western Bliss Pure Land is still a Forbidden Land! Not to mention that there are still rumors about the famous Buddhist Emperor Scripture [Past, Present, Future Buddha Scroll]!"

"The reason for that was a last resort of the Buddhist Sect. At the last moment before their destruction, they sacrifice to the Maitreya Mother Buddha through a Bodhi Tree Seed that was saved. The purpose was to leave a future for Buddhism, and they received a positive answer."

"The Absolute Beginning Emperor was furious and rushed in to completely destroy the remains of the Western Pure Bliss Land, but he failed. He had a Heaven Shattering Battle with the will of the Maitreya Mother Buddha, but he lost and was greatly injured."

"What! The Ancestor actually lost?" asked Feng Heng with a surprised look on his face.

"Yes, this was probably the only failure in his life. As a result of this, a few pieces of the history and inheritance of Buddhism managed to survive the passage of time."

Feng Heng nodded in acknowledgment before asking, "But teacher, what does that have anything to do with Wang Wei?"

"Let me ask you, you have read a lot of information about Great Emperors, do you think many of them were like the Absolute Beginning Emperor?"

"No, the majority of Great Emperors have left only a footnote in his history. As for the ones like my ancestor, there have been only a handful of them. And all of them displayed terrifying talents at a very young age... Wait, are you saying that Wang Wei reminds you of my ancestor?"

Shi Fuyu nodded before continuing:

"Whether it is strength, will, intelligence, and talent, this Wang Wei reminds me completely of the Absolute Beginning Emperor. What's more, his Dao seemed to be more terrifying."

In fact Shi Fuyu did not tell his disciple the whole truth. As a matter of fact, he was a little scared of Wang Wei. The reason for that was that during that last strike--the [World Breaking Fist]--he suddenly felt a terrifying fluctuation from Wang Wei.

And Shi Fuyu had on felt this fluctuation from the will of the Maitreya Mother Buddha when she fought with the Absolute Beginning Emperor. As such, he knew that Wang Wei probably had a terrible secret that even he himself might not know.

As for Feng Heng, he became silent for a few seconds, "Master, so what are you going to do?"

"You should be asking yourself that question."

"In that case, let us continue with our original plan," replied Feng Heng after thinking for a few minutes.

Chapter 169: Brilliant Move

Back in the Great Xia Dynasty, Wang Wei was frowning while looking at a bunch of papers. In the past few days, he was not in the best mood, and it was all because of paperwork.

After winning his battle with Ji Song, the vast territory of the Great Zhou now belongs to him, however, it will still take some time before he settled all the people there, let alone made them have a sense of belonging with Great Xia.

As a result, many rebellions occurred throughout his territory, so he had to dispatch the army to use force to eliminate these rebels.

If it was in the past, Wang Wei might consider using less brutal means to deal with the situation, but now the end of the trial was rapidly approaching, he did not have time to play nice.

Although Wang Wei was the final winner of the trial, he knew that his competitors would use the shortest amount of time to recuperate from their defeat, then strive to break through the Supernatural Realm as soon as possible.

And if he wasted any more time in this world, he would be left behind. So, he decided that all his plans must be accomplished in 5 years or less, then he will leave this world.

Of course dealing with the affairs of the dynasty was not the only reason that Wang Wei was in a bad mood. But because Yan Liling, his supposed Chancellor refused to help him.

According to her, she was mad at the fact that he did not share his secret Longxue Tea recipe with her. After hearing this, Wang Wei immediately blamed Li Jun for not being able to keep his mouth shut.

I mean, doesn't he know to place his brother before his companion? I mean they basically grew up together wearing the same diapers. Couldn't he keep his mouth shut?

Wang Wei sighed while gritting his teeth. As a last resort, he had to ask Dong Lifan for help, an act which made him very embarrassed.

After all, he had just basically rejected the poor girl, but now he was asking her to work for him. Wang Wei felt like a capitalist that exploited the people working for him. However, after seeing her

working hard and not complaining, he removed the guilt he felt; he convinced himself that she enjoyed the work.

One day while working in the Dragon Throne Room, someone came in and told him that a special guest came to see him.

It turns out the person was actually Feng Heng, the leader of the Great Shu Dynasty.

Wang Wei could not think of the reason that this guy showed up to meet him. However, he did not care. No one can stop from conquering this world. As such, the Great Shu Dynasty is actually on its last breath, and it is only a matter of time before he conquers it.

A few minutes later, Feng Heng entered the Dragon Throne Room, then cupped his hand together to salute Wang Wei.

However, one of the ministers of the court roared, "Bold! You dare not to properly salute his majesty!"

However, Wang Wei waved the person off as he knew that Feng Heng just used the etiquette to indicate that he was treating him as the Sacred Son of the Dao Opening Sect, not the ruler of Great Xia.

As a matter of fact, he did not really care about etiquette. As long as the person shows the necessary level of respect, everything is fine.

As such, Wang Wei just observed this Heaven Chosen from the Taiyi Profound Gate from up to down.

He noticed how this Feng Heng had a very peaceful and natural temperament, which symbolized that he has a high understanding of Taoism.

Speaking of Taoism, Wang Wei knew a little bit as he had read the Tao Te Ching by Lao-tzu and Zhuangzi in his previous life. Although he only did so to impress his boss, he still remembers them with his unforgettable memory.

Furthermore, the Origin Path System that all the cultivators in the Myriad Emperor World cultivate borrows many ideas and philosophy from Taoism.

After taking a brief moment to call this thing, he said, "So, Dao Child Feng Heng, what brought you to my little dynasty?"

"I'm here to make a deal with you?"

"Oh? Please say."

"I will hand the entire Great Shu Dynasty to you without fighting, in return, you have to give the position of National Master and make Taoism the national religion of Great Xia."

Wang Wei looked directly into Feng Heng's eyes for a few seconds, before saying with a sneer, "You must be joking. I have done all of this work, just to let you benefit for cheap? You value yourself too much."

Wang Wei could guess this guy's plan. Let all the other Heaven Chosen battle between themselves, then allies himself with the final winner.

With the status of National Master and the spread of religion, he can absorb as much Qi Luck as the final victor of the trial.

'No Wonder this guy never actually made any move during the whole trial,' thought Wang Wei secretly.

He always wondered what Feng Heng's endgame was. During the whole trial, he had many opportunities to conquer more territories.

As the first person to truly conquer a dynasty, he could have easily invaded the Great Wu back then and conquered them. Or, he could have attacked the Great Zhou when they were fighting with the Great Wu.

However, he did not do any of these. He remained neutral, just protecting his own territory. Now, it seemed that he was playing the long game.

Meanwhile, Feng Heng was not that surprised that he was rejected, so he continued, "What if I add the Western Region?"

"What do you mean?" asked Wang Wei with a frown.

"During all my years in the trail, I have successfully spread Taoism throughout all the dynasties in the Western Region, and they are essentially under my control."

"I can see that you are the kind of person who likes to have the best when doing things, so you should strive to have a 7-Color Rainbow Qi Luck. However, to achieve that, you will need to conquer the entire world--even the Western Region."

Wang Wei nodded in acknowledgement, then replied, "You are right, but I do not see where you matter in that situation. Even without you, I can still conquer the Western Region."

"You are right, however things are not as simple as you think. To the desert people of the West, Taoism is not just a religion, but a form of salvation for their poor living environment, a kind of sustenance for their soul. So, anyone who threatens their belief, they will never accept it."

"What does that have to do with you?" asked Wang Wei, however, he had an inkling what Feng Heng was about to say.

"As the Taoist Ancestor of this world, I have a lot of power," replied Feng Heng.

"As long as I tell these people that the Great Xia is a threat to Taoism, millions of people will not hesitate to take arms and fight to the death against you."

"I mean, you can imagine the burst of power these people will bring out when believing that they are fighting for their religion, their beliefs, their ways of life."

Feng Heng paused for a few seconds before continuing:

"As a matter of fact, I know that despite all of this, your Great Xia will probably still win in the end. However, at what price?"

"With the majority of people of the Western Region dead in a war, what is the point of you conquering that barren land? How long will it take to end such a War of Faith? However, with my proposition, all of this can be avoided."

"You can easily conquer the entire world, and I will just benefit a little."

Wang Wei had a pensive look on his face while tapping his finger on the armrest of his Dragon Throne.

He realized what a brilliant move Feng Heng's plan was. Plus, he did not want to waste more unnecessary time on this trial. However...

"I can agree with your proposition, but I have a few conditions."

Feng Heng hurriedly said, "Please say."

"First, you can only absorb enough Qi Luck to reach the 2-Color Rainbow Level."

"Impossible!" replied Feng Heng.

He did all of this work in order to achieve the highest result possible, how could he accept the bare minimum instead.

As a matter of fact, if it was up to him, Feng Heng did not want to use this method. Unfortunately, the barrier between the peak purple-gold Qi Luck and the 2-color Rainbow is too vast for him to accomplish with the territory that he has control of.

According to his master, a person has to conquer an entire Small Thousand World in order to break that barrier between those two levels. And if you want to reach higher levels like 3-color, 4-color and so on, you need more than just vast territory.

You need to properly govern the people, make them happy and better. And even that can only guarantee a 6-color Rainbow Qi Luck. If you want to reach the last color, you have to fundamentally change the world.

So, Feng Heng was very happy when Wang Wei was the final winner because according to the information he received, the people of Great Xia have very happy and fulfilling lives.

But now...

"Either accept my condition, or we can go to war," said Wang Wei with a cold and ruthless tone. Meanwhile, Feng Heng had an ugly look on his face, while thinking about his options.

Chapter 170: Suspicions

Feng Heng thought about the situation for a good half hour, then he said with gritted teeth, "Fine, I accept. What other conditions do you have?"

As for Wang Wei, he just smiled after seeing this.

"My second condition is actually very simple: I want to fight with you."

"Fight me?" asked Feng Heng with a puzzled look.

"Yes, I want to see whether you are worthy to negotiate with me on the same level."

Feng Heng's face instantly became ugly again after hearing this. This was the first time that his peaceful mood changed so much in such a short time. He looked at Wang Wei with fire in his eyes.

However, Wang Wei did not care, so he said, "You can't blame me for this, after all, no one has even seen you fight. How do I know you are not a sheep disguised as a tiger?"

Feng Heng took a deep breath before calming himself down. Then he said, "I accept your challenge!"

In a forest not far from the Great Xia Capital, both Wang Wei and Feng Heng stood not far from each other. Many people were standing far away, watching and commenting on the battle that was about to happen.

"Who do you think will win?" asked Dong Lifen with a worrying look on her face.

"Isn't it obvious?" replied Li Jun with a calm look on his face. He saw a recording of the battle between his big brother and Ji Song from Wang Ju, so he knew how powerful Wang Wei was.

That battle also brought a lot of pressure to him, however he was also motivated to increase his strength. Furthermore, he decided to cultivate the [Overlord Fist] in order to refine a strong body for himself.

Meanwhile, Wang Wei was looking his opponent up and down waiting to see what kind of method he would use, however his opponent seemed to be more patient than him, so he decided to attack.

In an instant, Wang Wei appeared in front of Feng Heng, then punched him in his guts. However, a sudden cumulus cloud appeared to block the attack, but it was to no avail.

Feng Heng was sent flying for more than a few hundred meters away, throwing up a mouthful of blood. However, midway through, his body suddenly turned as light as clouds, then he slowly floated in the air before stopping.

Feng Heng wipes the blood from the corner of his mouth as he realizes that he underestimated his opponent despite the fact that he saw his true strength during the battle a few days ago.

So, he decided to take things seriously. With a wave of his hand, red clouds were condensed from the atmosphere, then they dropped like rain on Wang Wei.

However, with just one punch in the air, a powerful shockwave dispersed these clouds. Immediately afterwards, Wang Wei flew straight towards his opponent, and kicked him.

Boom!

Feng Heng was sent flying on the ground with tremendous force as he spewed out another mouthful of blood. Fortunately for him, a cumulus cloud appeared in front of him and blocked some of the attack.

And this was not an ordinary cloud, but one that turned as dense as metal, but it was still no use under Wang Wei's kick.

As for Feng Heng, he did not hit the ground as expected. He used the same previous tactic by turning his body as light clouds, then slowly landed on the floor.

Feng Heng frowned as he looked at Wang Wei in the sky, then he used another attack.

This time the clouds turned into a dead grey color before rushing straight towards Wang Wei, who just watched as the attack hit him without even leaving a single scratch on him.

However, this attack was not a simple one as Wang Wei felt an extremely creepy energy trying to penetrate his soul and corrode it. He snorted coldly, then this energy was instantly vaporized.

Then he looked at Feng Heng before saying, "Interesting use of Yin and Yang Dao."

"Turning a cloud which is water in nature and imbued it with fire nature. Then, transform it from a weak substance into one as solid as metal, symbolizing the transformation of Yin into Yang. Not to mention the last attack that contained Extreme Yin nature, capable of directly attacking the soul."

"However, if this is all the strength you have, today's battle will officially be the worst day of your life."

Feng Heng had a frown on his face. Not only because his attacks seemed to be useless, but because his opponent seemed to be able to read the nature of his attacks in just a few minutes.

After thinking for a brief moment, he decided to use another tactic. With a wave of his hand, countless swords materialized in the air, then they rushed forwards.

Meanwhile, Wang Wei looked at all the swords rushing towards him and guessed that his opponent decided to use Five Element Spells from now on. He was not that surprised as the Taoist Sects are known for their amazing and wonderful spells.

So, he rushed straight towards Feng Heng, ignoring all the swords that hit him. These swords could not even break his Innate Field, let alone his skin.

However, Feng Heng seemed to have anticipated this, so he moved away from Wang Wei. A burst of red clouds appeared under his feet,

Swoosh!!

In an instant, he appeared a few hundred meters from Wang Wei. As a result, for a few minutes, a game of cat and mouse chase occurred in this battle.

Wang Wei frowned as he observed this situation. He was quite surprised at how fast this Feng Heng actually was. Although he looked like he just teleported, Wang Wei knew that this was just because of how fast this guy moves so that it appears that way.

Of course, this is not the reason that Wang Wei actually stopped chasing. The real reason was because one of Feng Heng's attacks managed to break through his Innate Field, and he was puzzled.

According to the intensity of the attack, there is no way in a million years that such a level of power could break his defense.

After pondering for a few seconds, Wang Wei once again rushed towards his enemy. This time he observed every single sword that hit.

After a few hundred thousand hit him, a slight break a few centimeters appeared in his Innate Field, then the swords hit his skin before being bounced off from it.

Wang Wei stopped again and looked at Feng Heng and said, "You are the owner of the Yin-Yang Eyes!"

A slight surprise appeared in Feng Heng's eyes before disappearing, then he said, "What are you talking about?"

"Your attacks seemed to be able to find the tiniest of flaws in my defense and attack them. These flaws are so small that even I did not notice them, yet you could see them and directly target them.

"Only the Yin-Yang Eyes had such ability."

"You are wrong," replied Feng Heng while shaking his head. "This is my natural Innate Ability, but I do not have the Yin-Yang Eyes."

Wang Wei looked at him deeply as he could not tell if this guy was telling the truth. The only thing he had to go on was the slight surprise in his eyes when he first mentioned this, but Feng Heng's soul fluctuation remained calm after he denied it.

However, he remained suspicious.

Wang Wei waved his palm, a giant blue dragon manifested, releasing a powerful suppression. And to his horror, Feng Heng found himself unable to move as Wang Wei rushed towards him.

With a desperate attack, all the swords floating in the air turned into countless needles, then rushed forwards.

Meanwhile, Wang Wei ignored these needles as he let them attack him. However, to his disappointment, none of them seemed to attack his weak point.

So, lightning appeared on Wang Wei's body, then he instantly appeared in front of Feng Heng. He proceeded to slap him in the face.

Bang!

Feng Heng flew from the sky with tremendous speed and force. And this time, he did not have the ability to slow down his fall.

Boom!

After landing on the ground, a powerful shockwave traveled from his landing spot. Countless trees were destroyed, and a deep hole could be found with the shape of a human body could be seen from the air.

After a few seconds, Feng Heng managed to unbury himself from deep underground, then he vomited blood for a few seconds. His face was slightly deformed as his skull was bulged inwards, and many of the teeth in his mouth had fallen off.

He raised his head and looked at Wang Wei with gritted teeth, while the latter had a frown on his face. A few seconds later, Wang Wei said, "My final condition to accept your proposal is for you to use your 'Innate Ability' to find the weakness in my defense."

Feng Heng opened his mouth as if to refuse, then he closed his mouth with gritted teeth. Then he said, "No problem."
