

F.D Emperor 77

Chapter 77: Higher Difficulty Level

Wang Wei stood in front of the 90 zhang Battle Tower again, entering for the second time. However, this time he was going to face people in the Divine Sea Realm.

"It's time for me to test my three months cultivation of the [Overlord Fist]," muttered Wang Wei, before he stepped in the tower again.

With his powerful and pure origin qi, he easily passed the first 3 difficulties, however, he encountered a challenge in the Heaven Difficulty.

Once again, Wang Wei found himself in a forest full of trees. However, the internal space for Divine Sea cultivators seemed more vast as he could observe mountains and lakes around the forest.

Wang Wei was still surrounded, but this time he faced 10 Tier 2 Demonic Beasts instead of 5 Tier 1. However, he was not surprised by the fact that the number was doubled. He knew that the tower became increasingly more difficult as one gets higher. Additionally, in the Earth difficulty, he also had to face two demonic beasts instead of the only tiger he fought previously.

Wang Wei observed his opponents for this trial: it was composed of 2 Swift-Wind Wolves, 3 Solid-Earth Boars, and 5 Fierce-Fire Lions.

Each of these demonic beasts had a fierce light in their eyes, looking at Wang Wei like their prey. However, soon, it will be known who is the hunter and who is the prey.

Wang Wei mobilized his origin qi into his legs--which light up the color grey--and instantly rushed to the closest Solid-Earth Boar. His figure left more than three shadows behind him when he moved.

Boom!

A powerful punch hit the face of the boar. Affected by the tremendous force, the boar vomited a mouthful of blood and flew more than 20 meters before hitting the ground; he did not get up afterward.

Seeing the state of his companions, the other 2 Solid-Earth Boar became angry, then immediately activated the power of their bloodline. Soon afterward, a thick armor made of earth enveloped the remaining two boars.

It was not just them, all the remaining demonic beasts activated their bloodline abilities. The five Fierce-Fire Lions opened their mouth and five fireball shoot out of their mouth in the direction of Wang Wei

However, he did not back down or evade. Instead, he stepped forward and punched:

"Lion Fist"

A lion head image made of origin qi appeared on the right hand of Wang Wei. When this punch touched the five fireballs, a lion roar echoed throughout the jungle, signaling that the king of the jungle was patrolling his territory and all animals should bow to it.

Boom! Boom! Boom!

Wang Wei's single fist instantly destroyed all the five fire attacks, resulting in a massive explosion. A huge fire of more than 500 degree Celsius spread throughout the forest with Wang Wei at the center. However, he was completely unarmed.

A grey layer of energy enveloped his entire body protecting him from the heat. With his powerful origin qi, it is quite easy for him to withstand such temperature.

While the smoke from the fire was obscuring the sight of all the demonic beasts, he instantly rushed in the direction of the wolves. As they had the highest level of mobility, he deemed them the most threatening of the groups.

In just a few seconds, Wang Wei traveled a few meters and reached in front of the more than 10 meters tall wolf, he jumped in the air and threw another punch.

Following the sound of a lion roaring, the head of the Swift-Wind Wolf exploded, splashing blood and brain matter all over. It did not even have the time to react.

The other wolf on the hand was always on alert. Seeing that his companion was killed, the other wolf opened his mouth and spewed out a 20 meters long wind blade to kill his opponent.

Wang Wei immediately mobilized his origin qi and chopped the wind blade into two parts right down the middle, he then rushed toward the last remaining wolf.

He threw another punch. However, this time it was the image of a tiger that appeared in his hand instead of a lion.

The tiger exuded a terrible killing intent, demonstrating its status as Heaven and Earth's most perfect killing machine, the most powerful hunter and predator. This was a move from the [Overlord Fist] known simply as Tiger Fist.

When the Swift-Wind Wolf faced the upcoming punch, he suddenly felt a powerful killing intent invading his mind, making it extremely afraid and temporarily frozen. This feeling reminded this wolf of one time when he met a demon with a pure and noble bloodline.

With just one look, he rendered him unable to move and had to bow to it.

Despite being overwhelmed by fear, the wolf still instinctively responded by attacking with his paw. Unfortunately, this was a grave mistake.

Bang!

The wolf's entire arm--from the paw all the way to the shoulder--exploded in countless pieces. Whether it was its bones, skin, and muscles, they were all instantly pulverized.

Without giving the wolf any chance to breathe, Wang Wei did a somersault in the air, thus standing upside down right on top of the wolf's back. Afterward, he used his origin qi as a leverage to step in the air, then rushed to the wolf and punched it in the back.

Crack! Crack!

Every bone in the spine of the wolf was broken. It howled in misery before falling in the ground, either dead and crippled for life.

Wang Wei looked at the wolf lying on the floor. The move he used to step in the air was similar to an anime he saw in his previous life. He had the idea to try and he succeeded. He knew that it was possible simply because of how pure and powerful his origin qi was.

However, the consumption was simply abnormal. Just this one use already drains a quarter of his vast Ocean of Origin cultivation.

Despite all of the excitement, all of Wang Wei's actions happened in the span of a few minutes. By the time the second wolf was killed, the remaining five lions and two boars had already cleared out the smoke from the previous fire explosion.

They all surrounded Wang Wei hoping to find a flaw that they can pounce on and kill him in one fell swoop. Although they knew that they were not his opponent, they knew that if they did not kill this cultivator, they would be the one killed.

Wang Wei looked at these demonic beasts. All of a sudden, an impulse came over him. He gathered the power of his Bodyrefining Realm 13th Layer and his Infinite Divine Sea and merged them together.

A sudden will manifested from him and directly hit the seven Demonic beasts. Then, they all vomited large mouthfuls of blood and fell in the ground, whining in pain. It seemed that they were still alive.

Wang Wei was surprised and confused about what happened. He walked over and checked the condition of these beasts by pouring his origin qi into their body. He discovered that their bloodline core was destroyed--essentially destroying their cultivation.

"Could this new ability be able to destroy other people's cultivation just by looking at them?" muttered Wang Wei, "If that was the case, that would be truly Heaven Defying."

However, he could guess that this ability probably had drawbacks, for example, the person must be weaker than him by a large margin. However, even if that was so, this ability can be used to prevent being encircled by a bunch of people using mob tactics.

Furthermore, as his cultivation grew higher and developed more unique realms--unique Divine Altar and Supernatural Realm--this ability will also grow more powerful.

"Let's call this ability True Will from now on," said Wang Wei out loud. Now that these demonic beast were incapacitated, he had passed the Heaven Difficulty level.

He sat cross-leg, took out a Profound Tier Divine Sea Replenishing Pill to refill his origin qi. Cultivators in the first three realms of cultivation can only use Profound tier pills otherwise they would not be able to bear the medicinal strength.

Three hours later, Wang Wei finished recuperating and left his meditation state. Right now, he was in perfect shape for the next difficulty: The Emperor Difficulty.

There, Wang Wei will have the chance to fight and learn from the sect's Great Emperors at the same level of cultivation. If he said he was not excited, then he would be lying to himself. His blood started boiling again at the idea of fighting a Great Emperor, even if it's just a clone in the same realm.

After a few breaths, Wang Wei saw a young man of similar age standing in front of him. He had cold and emotionless eyes like he was not a human being, however, deep in there, Wang Wei could see a terrifying fighting will that feared nothing in Heaven and Earth. His eyebrows were quite similar to Li Jun, or Li Jun's eyebrows are similar to him.

Wang Wei could guess who this was, as such he muttered, "Li family's Ancestor, Battle Maniac Emperor."
