

F. University 1121

Chapter 1121: The Feelings of the Mist City Government's Own Son _2

Moreover, Mist City Arts and Science University was already a popular private university frequented by Internet celebrities, with multiple spots on campus for social media check-ins, almost becoming another new hotspot in Mist City.

Originally, Internet celebrity tourism was a major industry in Mist City, and now Mist City Arts and Science University could further enhance the scale of this industry. For Mist City, it was indeed a very good thing.

"Okay, let's talk business, Liu, I called you here because of the land issue."

Governor Li directly shifted the conversation to the matter at hand.

"Governor Li, just command me."

Longshun Liu had always been one of Governor Li's top officers, always following Governor Li's orders and arrangements.

"Feiyue Group is planning to make new energy vehicles, and since Chang'an Group is now beyond redemption, we urgently need another automotive company to replace Chang'an Group. Feiyue has the capability, so we need land to build the factory."

Governor Li briefly explained the situation to Director Liu Changshun.

Director Liu Changshun knew about the situation of Chang'an Group, and since Governor Li and the Mist City Government had already decided to support Feiyue Group, he certainly had nothing more to say.

"Principal Ding, which land are you planning to acquire?"

Director Liu Changshun looked up and asked Principal Ding.

Although Director Liu Changshun could authorize land for Principal Ding, he felt somewhat that Principal Ding had gone to Governor Li, who then ordered him, or there was some deal between Principal Ding and Governor Li concerning which piece of land they were interested in acquiring.

However.

The next words from Ding Yue dissipated this thought from Director Liu Changshun's mind.

"Director Liu, actually, the specific piece of land isn't important, just as long as there's enough land to build the factory. Director Liu, which piece do you think is more suitable?"

Ding Yue said to Director Liu Changshun with a smile.

These words indeed surprised Director Liu Changshun.

Originally, Director Liu Changshun thought that Ding Yue had already set his sights on a specific parcel of land, especially since he surely knew about the high-tech zone's planning. After all, isn't that how businessmen are, wanting to secure a prime piece of land in advance, even just to hold onto it, so that it could be sold later at a great profit?

But now, Director Liu Changshun didn't think so anymore, and neither did Governor Li.

Director Liu Changshun's personality was to follow Governor Li's lead, supporting anything that was beneficial for the development of Mist City, but when it came to deals between businessmen and the Mist City Government, Governor Li would definitely not agree first, and so Director Liu Changshun would naturally be the second to disagree!

"If I may suggest, let's take a more remote area in the high-tech zone, Principal Ding, what do you think?"

Director Liu Changshun looked at Ding Yue and suggested.

If the high-tech zone were to develop, then it would inevitably become another core urban area of Mist City, and also primarily a zone based on innovation, technology, and culture.

Therefore, building an automobile factory in the high-tech zone meant choosing the outskirts was naturally the best option.

"Hmm, that works."

Ding Yue nodded and said, "Director Liu, you are from the Land Planning Bureau and are very familiar with the plan for the high-tech zone. Since you say so, we'll follow your recommendation."

Actually, Ding Yue also understood Director Liu's logic. After all, an automobile factory, like his graphene industrial park, wasn't particularly suited to be built too close to the main urban areas; a slightly more remote location wouldn't hurt.

"Alright, Principal Ding, I'll bring over the map of the high-tech zone, and we can look at it together."

As he spoke, Director Liu Changshun took out a map cylinder, pulled out a map from it, which was marked with the words "High-tech Zone Land Distribution Plan."

After unfolding the map, Director Liu Changshun said, "Principal Ding, look here, your graphene factory is this one, and I think this spot is very suitable for Feiyue Group to build their factory."

Ding Yue followed the direction pointed by Director Liu Changshun and saw that it was indeed the current area of his graphene factory.

The graphene factory area was actually located below University Town, not too far from Mist City Arts and Science University in terms of straight-line distance on the map.

And the planning for the high-tech zone was in a large strip area just below University Town.

"Director Liu, I was thinking the same thing."

Ding Yue said with a smile, "Having all the major factory areas built together would indeed be best. That way, when it comes time to establish the basic infrastructure for the factory areas, it will be much more convenient."

The graphene factory area, the medical health robot Big White's production factory area, and the new energy vehicle factory area, if these factory areas were all built relatively close to each other, then it would be possible to coordinate the construction of corresponding basic infrastructure.

For example, venues for activities, leisure and entertainment, employee dormitories, etc.

"Indeed."

Director Liu Changshun nodded and said, "Then we'll plan it on the west side, as there's basically no plan for this area yet. There's a lot of land available to the west that can be used, and it would be convenient for your company's automobile factory to expand in the future. Principal Ding, what do you think?"

"Sounds good."

It has to be said, Director Liu truly deserves to be the head of the Land Planning Bureau, as his grasp on this aspect of planning is quite on point.

Regarding the area that Director Liu recommended, Ding Yue found it very suitable.

Then Ding Yue turned to An Yujia, who was behind him, and asked, "Miss An, what do you think?"

After all, An Yujia would personally be in charge of the factory construction when the time came.

An Yujia nodded and replied, "Principal Ding, this is the most suitable location."

"Principal Ding, how many acres of land will be needed this time?"

Director Liu Changshun looked up at Ding Yue and asked.

"Our new energy automobile factory's initial planning is for 3,000 acres," Ding Yue replied.

"3,000 acres, great."

Director Liu Changshun nodded, "If you need to expand later, just come directly to the Land Planning Bureau and find me."

Director Liu Changshun thought this was actually quite easy to manage, as the land Feiyue Group was acquiring was not the highly valuable kind but rather remote and secluded areas; had Feiyue Group not taken it, it likely would have just lain there or been taken over by another company.

Since Feiyue Group wanted the land here, it was easy to just give it to them.

"Alright, thank you Director Liu."

Ding Yue expressed his gratitude towards Director Liu's attitude.

Seeing how things were going, if Feiyue Group needed more land in the future, it should be quite easy, especially since Governor Li was very supportive of him.

Adding to that, Director Liu also said the same.

3,000 acres of land to build a new energy automobile factory was just the initial planning.

If the sales of Feiyue Automobile's new energy vehicles were good next year, then the automobile factory would definitely need to expand massively once again.

After all, if the sales were good, then the production capacity had to keep up.

"Principal Ding, for your new energy automobile factory construction this time, we can offer a batch of loans with policy discounts. As for whether to take the loan or not, that is up to you," said Governor Li with a smile.

The direct support that the Mist City Government could provide was indeed policy-discounted loans.

"Thank you, Governor Li!"

Upon hearing this, Ding Yue was truly delighted.

This visit to Mist City Government gave Ding Yue the feeling that Feiyue Group and Mist City Arts and Science University were like the favored children of the Mist City Government, as everything seemed to be proceeding so smoothly.

Not only did the Mist City Government agree to the land use for his automobile factory, but they also helped him secure two giant pandas from Shu City.

Most importantly, as Ding Yue's Feiyue Group was preparing to engage in new energy vehicles, Mist City Government would continue to provide loans, which could not be better.

After all, when it came time to take over the mess from Chang'an Group, it would undoubtedly require a significant amount of money.

Although Ding Yue had access to ten to twenty billion yuan in liquid funds, it was not really feasible to spend it all, especially since his Mist City Arts and Science University and other major projects also required funding.

And that funding flowed like water.

This strong support from the Mist City Government, including favorable loans, directly relieved Ding Yue's pressure in the billions of yuan funding level.

Chapter 1122: Just for a Pleasurable Mood

Having successfully resolved the land acquisition for the factory and the matter of the giant pandas, Ding Yue's mood was quite splendid.

Everything was going smoothly.

The support from Mist City Government for his Mist City Arts and Science University and Feiyue Group was incredibly strong.

It virtually made Ding Yue feel as if his Mist City Arts and Science University and Feiyue Group were like the foster sons of Mist City Government.

Of course.

This was just a metaphor. In reality, the reason why Mist City Government supported his Mist City Arts and Science University and Feiyue Group so vigorously was that they could provide a huge boost to the development of Mist City. Otherwise, Governor Li probably wouldn't even spare it a glance.

The development of Mist City Arts and Science University and Feiyue Group was complementary to the city of Mist City.

"Governor Li, thank you for the strong support from the City Government for our Mist City Arts and Science University and Feiyue Group."

Before leaving, Ding Yue expressed his gratitude to Governor Li, "Then I won't disturb you any longer, Governor Li."

Having said that, Ding Yue was ready to leave.

At this moment, Governor Li called out to Ding Yue, "Principal Ding, since you are already here, and it's almost time for a meal, why don't we go to the Government Cafeteria to eat together? While we eat, you can tell me in detail about the future development plans for your Mist City Arts and Science University and Feiyue Group?"

Faced with Governor Li's warm invitation, how could Ding Yue refuse?

How could he possibly dare to refuse?

"Sure."

Ding Yue smiled and nodded in response, "I am quite hungry indeed."

Having said that, Governor Li took his secretary, and Ding Yue also brought his secretary, along with Huang and Miss An and others, and followed Governor Li to the cafeteria in the Mist City Government Building.

This was Ding Yue's first time eating at such an official cafeteria.

It's known that anyone eating at this cafeteria could be some director or commissioner or something similar, not to mention that even Governor Li usually dined here.

The food quality in the Mist City Government Building was very high and the taste was not bad either. However, compared with the Fifth Canteen of his own Mist City Arts and Science University, the dishes at the Fifth Canteen were a bit tastier.

During the meal, Ding Yue continued to discuss Mist City Arts and Science University and Feiyue Group with Governor Li, focusing on development and planning, which Governor Li found very interesting.

After all, Governor Li represented the Mist City Government and had invested significant stakes in Mist City Arts and Science University and Feiyue Group.

Things like granting land and loans were handled very smoothly.

Governor Li was eagerly anticipating that Ding Yue's Feiyue Group's graphene industry, as well as the new-energy vehicle industry, could develop and turn into a top enterprise in Mist City and perhaps even the entire southwestern region and nationally.

This, in turn, would not only solve many employment issues in Mist City but also contribute a huge amount to the GDP.

Most importantly, Mist City had long lacked a technology-based enterprise as a pillar, whereas its neighboring city, Shu City, had innovative technology industries.

Thus, Governor Li was urgently in need of a technology sector to stand out.

It was during this time that the graphene technology of Mist City Arts and Science University stepped forward, and Feiyue Group also came into Governor Li's view at this time.

During the meal, Ding Yue had a very pleasant chat with Governor Li.

And at that moment, Ding Yue also made a few firm commitments to Governor Li.

These were to complete the handover work with Chang'an Group as soon as possible.

Also, his Feiyue Group's graphene industry would be scaled up within a year, and the new-energy vehicles were to be launched soon to undergo market testing.

These commitments, in fact, were not very difficult for Ding Yue to achieve.

Regarding the handover with Chang'an Group, it only needed to be carried out methodically; after all, with Governor Li and Mist City Government involved, how could Chang'an Group not cooperate?

Next came the scaling of the graphene industry; the factory was now being scaled up, and the equipment was keeping up with production.

The market expansion was also successively progressing.

Sectors like military and aerospace needed graphene, and Feiyue Group had already opened up these markets.

The next sectors that needed graphene would inevitably place orders with Ding Yue's Feiyue Group due to the influence of the military and aerospace sectors.

The application areas for graphene were broad, and once promoted, there were no worries about finding orders.

It was clear that Ding Yue's previous collaborations with the military and aerospace sectors were intended for promotion, since the influence of these sectors was strong.

Finally, there were the new-energy vehicles.

Upon returning, Ding Yue planned to set clear targets with the faculty and students of the automotive engineering department and the automotive engineers from Chang'an Group.

They aimed to design a satisfactory vehicle model within a month or two.

Then, paired with Feiyue Group's graphene batteries and an onboard artificial intelligence system, a competitive new-energy vehicle would soon be born.

Upon return, he'd also need to mobilize everyone at Feiyue Construction Company.

The construction of the car factory was urgent.

After all, if the design of the new-energy vehicles progressed so quickly, then the subsequent production and manufacturing needed to keep pace as well.

Chapter 1123: Just for a Pleasant Mood _2

And at that time, his own Feiyue Group's Feiyue Building had found its place to shine.

After dining with Governor Li, Ding Yue bid farewell and left.

Governor Li had said that if he encountered any difficulties, he could find him at the Mist City Government. This bolstered Ding Yue's confidence tremendously.

After leaving the Mist City Government Building, Ding Yue and Huang drove back to school.

Just as they reached the school gate, Ding Yue's phone chimed.

So, Ding Yue picked up his phone and saw that it was a message from Xu Meijia.

Thanks to the good relationship Ding Yue had previously established with Principal Xu Dongcheng, he had added Mei Jia on Whatsapp.

Xu Meijia: [Photo.jpg], [Photo.jpg], [Photo.jpg], [Photo.jpg], "Principal Ding, do they look good?"

The message from Xu Meijia contained four photos and a sentence.

Well, I'll be!

Anyone who didn't know better would think that Xu Meijia had sent her own selfies, asking if Ding Yue found her attractive.

Needless to say, Xu Meijia's beauty was unquestionable. As one of this year's freshman, she was considered one of the school beauties.

However.

Ding Yue took a look at the photos Xu Meijia sent, and they were not of her but someone else.

The key thing was, Ding Yue seemed to recognize these four photos, and the most important thing was, they really were beautiful. All were pictures of beauties dressed in ancient Hanfu attire.

You're showing me this? Now I'm definitely not sleepy!

Four sets of Hanfu costumes, each different in style, on four breathtakingly beautiful women instantly captured Ding Yue's attention.

How could Ding Yue not recognize these four beauties in Hanfu?

The first one to meet his eyes was Lin Zhirou, the first school beauty of Mist City Arts and Science University and now an artist at Ding Yue's company.

The second was another stunning school beauty, Jiang Yao!

Jiang Yao was the lead school beauty of the second cohort at Mist City Arts and Science University. With looks and figure not inferior to Lin Zhirou's, Jiang Yao had a vibrant youthfulness to her beauty, whereas Lin Zhirou's was more tranquilly beautiful.

The other two were this year's elected school beauties, Jiang Qiuying and Zhang Yu.

These two were the very definition of pure yet seductive beauties.

"Xu Meijia, aren't these Lin Zhirou, Jiang Yao, Jiang Qiuying, and Zhang Yu?"

Ding Yue replied to Xu Meijia's message.

Quickly, Xu Meijia responded, "Hehe, that's right, Principal Ding. Today, I invited them to the Sunny Great Lawn to model the Hanfu outfits I designed for a photoshoot, and I thought I'd show them to you, Principal Ding. Do they look good?"

Well, I'll be!

Xu Meijia, this student, really was something. Her major was fashion design, which had been her passion since childhood, and she already had her own designs?

And they were Hanfu designs at that!

Not bad, not bad at all!

Most importantly, Xu Meijia had actually managed to invite the four most beautiful school beauties of Mist City Arts and Science University to wear her own designed Hanfu for a photoshoot.

That Xu Meijia knew Lin Zhirou and the others didn't surprise Ding Yue at all.

Since Xu Meijia was also one of this year's school beauties, it was only natural for school beauties to network among themselves. Another point was that Xu Meijia was a bona fide second-generation rich kid.

Her father, Principal Xu Dongcheng, was worth a fortune!

Last year, Principal Xu Dongcheng might have been wealthier than Ding Yue, but this year was different. After all, Ding Yue's Feiyue Group had developed a number of industries this year, so his assets definitely surpassed Principal Xu Dongcheng's now.

Yet, Principal Xu Dongcheng's fortune was still enviable among many magnates.

So it was easy to understand how Xu Meijia, as a rich heiress and school beauty, could effortlessly know and invite Lin Zhirou, Jiang Yao, Jiang Qiuying, and Zhang Yu for the photoshoot.

Ding Yue couldn't help but be impressed that, apart from himself, probably only Xu Meijia could bring together these four top-tier beauties at Mist City Arts and Science University.

"Yes, they are very ethereal."

Ding Yue simply commented.

In fact, when Ding Yue first saw these four photos, his eyes were practically blessed.

Exactly!

Overwhelmed by beauty.

She's explosively beautiful, okay? Ding Yue even started to doubt whether the ancient world had such gorgeous beauties.

If there were, he could understand why emperors would skip the morning court sessions; maybe King Zhou wasn't wronged at all!

If it were Ding Yue, perhaps he too would skip the morning court sessions.

"Xu, are you guys taking photos over at the Sunshine Grassland?"

asked Ding Yue.

"Yeah, we're still there. Principal Ding, do you want to come and take a look?"

"Sure!"

Without even thinking, Ding Yue agreed right away.

Being able to see all four campus beauties of Mist City Arts and Science University at once was indeed a treat.

As the saying goes, looking at beauties every day can please the heart, and a happy heart leads to longevity.

Right, Ding Yue wanted to live long and happily. Visiting the Sunshine Grassland was to take in the sight of the beauties—not for any other reason but for the pleasure of the heart!

With that thought in mind,

Ding Yue drove straight to the Sunshine Grassland.

The secretary in the car, Wen Ruohan, was stunned. "Principal Ding, aren't we going back to the Administration Building?"

"Go back to the Administration Building for what?"

Ding Yue muttered, "Xu Meijia is hosting a Hanfu show over at the Sunshine Grassland. She designed the Hanfu herself and wants to invite me to have a look. As the principal, how can I not go?"

As soon as Wen Ruohan heard this, it seemed to make sense.

After all, Xu Meijia's father, Xu Dongcheng, had a very good relationship with Principal Ding.

With that being the case, Wen Ruohan understood and decided to follow along to see Xu Meijia's designed Hanfu. If they turned out to be beautiful, maybe Wen Ruohan might even want to ask Xu Meijia to custom-design a couple of pieces for her.

Even though they might be pricey.

But that was okay because Wen Ruohan had been Principal Ding's secretary for years and had saved up quite a bit.

About ten minutes later,

Ding Yue parked his car near the Central Sports Ground and found a parking spot.

It had been a while since Ding Yue had come to the Central Sports Ground; the last time might have been during the Military Training Closing Ceremony.

Back then, there hadn't been many changes here.

But now it was different; construction had started.

The construction site was on the east side of the Central Sports Ground, diagonally opposite the Sunshine Grassland on the northwest side.

If Ding Yue remembered correctly, this construction site was for the largest hotel of Mist City Arts and Science University.

Since the hotel within the university at the Book Ship Library was truly insufficient, Ding Yue decided to build another hotel inside the campus of Mist City Arts and Science University.

The hotel was being built here for a reason—it was because next year's National University Sports Games had been confirmed to be held at his Mist City Arts and Science University.

Therefore, the construction of this hotel would provide great convenience for the national games next year.

It was definitely not possible to drive right onto the Sunshine Grassland.

So, after parking the car, Ding Yue and his secretary Wen Ruohan walked towards the Sunshine Grassland.

From a distance, they could see a huge, well-maintained green grassland.

This Sunshine Grassland was open for anyone to play on, but you couldn't ride bicycles or walk pets on it.

The reason it was maintained so well was that it wasn't open every day.

If it were open daily, wouldn't the students and tourists wear it out?

It was open periodically, then closed for periods of maintenance. Although the maintenance cost was slightly higher, Ding Yue could afford it.

Besides, the Sunshine Grassland attracted quite a few tourists to the university each month. Even though it didn't charge an entrance fee, as long as tourists came to Mist City Arts and Science University and spent money, Ding Yue could make a profit.

"So many people,"

exclaimed Wen Ruohan.

Ding Yue looked in the same direction and truly saw a crowd gathered around something at the Sunshine Grassland.

Chapter 1124: Isn't This More Effective Than the Enrollment Prospectus?

The sunlight bathed the large lawn, where many people had gathered.

Some were students from Mist City Arts and Science University, while others were tourists who had come to check out the hotspot at the university.

At this moment, they seemed to be captivated by something.

Because the crowd was packed so tightly, Ding Yue couldn't get close enough to see what they were watching.

However, Ding Yue could guess.

Just before, Xu Meijia had told him that she and her fellow beauties from Mist City Arts and Science University were taking photos in Hanfu; many people gathered here were likely watching the beauties.

Oh boy, beauties really are popular everywhere.

"Hello, Principal Ding."

"Principal Ding is here, make way."

"Principal Ding is here."

"Hahaha, indeed, where there are beauties, there is Principal Ding."

"Principal Ding lsp'd."

"Shh, don't you talk about my Principal Ding like that."

Upon seeing Principal Ding approaching, the students quickly made a path through the crowd.

Ding Yue, accompanied by his secretary Wen Ruohan, walked through the crowd, and sure enough, saw Lin Zhirou, Jiang Yao, Jiang Qiuying, Zhang Yu, and others under the direction of Xu Meijia, striking one pose after another in Hanfu while the photographer was taking pictures.

"Principal Ding, you're here."

Seeing Principal Ding approaching, Xu Meijia immediately came forward, smiling, and said, "Principal Ding, look at the Hanfu I designed. Isn't it lovely?"

"Yes, very nice. It has an ancient charm. You're studying fashion design; have you started designing Hanfu now?"

Ding Yue smiled and nodded, then asked Xu Meijia.

Fashion design was Xu Meijia's beloved major, something that Ding Yue knew because Xu Meijia had shared her dream of becoming a world-famous fashion designer when she was hospitalized.

"Yes, I think our Xia Country's Hanfu is beautiful and has cultural depth. Why can places like Paris be the forefront of world fashion, but not our Xia Country's Hanfu? I've decided to focus solely on researching our Hanfu and strive to make it a renowned international trademark in the fashion world!"

Xu Meijia spoke with aspiration.

Indeed, Hanfu was currently only popular in small circles within the country.

While an increasing number of people appreciated Hanfu, taking it internationally was not an easy task.

Of course.

If there were good fashion designers who could create eye-catching Hanfu, then Xu Meijia's dream of becoming such a designer might well become a reality.

"That's a good idea, and I have to say, the Hanfu you've designed does look quite striking. Paired with Lin Zhirou and Zhang Yu, they give a breathtakingly stunning impression."

Ding Yue praised.

Then his gaze turned toward where Lin Zhirou, Jiang Yao, Jiang Qiuying, and Zhang Yu were.

Those impeccable appearances and perfect figures, adorned with Hanfu, indeed exuded an ethereal classical beauty, akin to deities descending to the mortal world.

Such beauties, who wouldn't be dazzled?

"Hee hee, Principal Ding, I specifically asked Zhirou and the others to be models for my Hanfu. I'm also planning to organize a Hanfu show at the university, would you support it?"

Xu Meijia said happily.

However, after Xu Meijia finished speaking and looked at Principal Ding, he did not respond to her, as he seemed engrossed in watching Zhirou and the others in the middle of the lawn.

"Principal Ding?"

Xu Meijia softly called a couple of times: "Principal Ding?"

What's up with Principal Ding today?

"Ah?"

Ding Yue seemed to hear someone calling him and hastily snapped back to attention before turning to Xu Meijia and asking, "Hm? What did you just say?"

Xu Meijia was slightly startled.

So Principal Ding had been so focused on the shooting that he hadn't heard what she said.

"Principal Ding, I was saying, I want to use the Hanfu I designed to hold a Hanfu show at our university. Could you allow the school to support us?"

Xu Meijia repeated her earlier words.

"Oh, oh, that's a good thing indeed. It can promote our Xia Country's Hanfu culture and display your Hanfu designs. Support, definitely support."

This was clearly something Ding Yue had no reason not to support.

"Hee hee, that's great, thank you, Principal Ding."

Xu Meijia was thrilled to hear Principal Ding's prompt endorsement, almost jumping with joy.

Xu Meijia was just such a lively girl.

"Xu, just go directly to Director Huang in the Logistics Department when the time comes. Let the Logistics Department help you organize a good Hanfu show, and it will be a way to promote our Mist City Arts and Science University as well."

Ding Yue said smilingly to Xu Meijia.

"Yes, thank you, Principal Ding." Xu Meijia expressed her thanks again.

After Ding Yue and Xu Meijia finalized the arrangement, Lin Zhirou, Jiang Yao, Jiang Qiuying, and Zhang Yu had almost finished their photo shoot.

Seeing Principal Ding nearby, Lin Zhirou immediately walked over.

Then Jiang Yao, Jiang Qiuying, and Zhang Yu followed suit.

"That's Principal Ding, right?"

Jiang Qiuying looked toward Principal Ding and asked Jiang Yao who was standing beside her.

As Jiang Qiuying and Zhang Yu, both campus beauties, were freshmen this year, they certainly weren't very familiar with Principal Ding.

Chapter 1125: Isn't This More Effective Than the Enrollment Prospectus? _2

And Jiang Yao was different; she was the school beauty of the previous session and had already been studying at Mist City Arts and Science University for a year. This year was her second, so she definitely had a better understanding of Principal Ding.

As for Lin Zhirou, there's no need for further explanation. Lin Zhirou was already a musical artist under Principal Ding's company.

"Principal Ding,"

After Lin Zhirou approached, she greeted Principal Ding.

"You look quite pretty in Hanfu,"

Ding Yue said to Lin Zhirou with a smile.

"It's the Hanfu designed by Mei Jia that looks good," Lin Zhirou replied, slightly shy.

Lin Zhirou was the kind of girl who was very modest and low-key about her own beauty. Clearly, she was stunning, yet she remained modest, attributing her good looks to the beautiful Hanfu designed by Xu Meijia.

That wasn't false at all.

The Hanfu designed by Xu Meijia, when worn by Lin Zhirou, truly transformed a modern youthful beauty back into an ancient one, embodying breathtaking grace and charm.

Add to that Jiang Yao, Jiang Qiuying, and Zhang Yu – the four stunning beauties together, Ding Yue mused that even the ancient top ten beauties might not be as attractive as them when they stood side by side.

"Student Xu, could you sort out the videos and photos you took today and give them to our university's Publicity Department? Later on, we can post them on our platforms for promotion,"

Ding Yue suddenly turned his head and asked Xu Meijia.

"Of course, I can,"

Xu Meijia agreed without a second thought.

At that moment, Jiang Yao arrived with Jiang Qiuying and Zhang Yu, each of them greeting Principal Ding in turn.

Good heavens, upon hearing the sweet voices of the beautiful ladies, Ding Yue felt his DNA stir.

There was no need to mention Jiang Yao; Ding Yue had met her long ago. Taking another look at Jiang Qiuying and Zhang Yu, he confirmed they were indeed beautiful. They were deservedly chosen as the school beauties from among more than fifty thousand new students at Mist City Arts and Science University this year.

"Jiang Qiuying and Zhang Yu, right? Do you two like Hanfu as well?"

Ding Yue smiled and asked the two beauties.

"Mm-hmm,"

Both of them nodded in unison.

"Then in the future, when Student Xu designs stunning Hanfu, you could become her Hanfu ambassadors," Ding Yue casually remarked.

However, Xu Meijia took it seriously and, looking at Jiang Qiuying and Zhang Yu, said, "Yes, yes, in the future, all four of you will be the chief models and ambassadors for the Hanfu I design, haha."

"Sure,"

Zhang Yu responded with delight, "Mei Jia, I really love the Hanfu you design."

"Me too,"

Jiang Yao also nodded in agreement.

It was clear that the beautiful Hanfu Xu Meijia designed was very popular among these school beauties.

"Student Xu, keep it up, I have high hopes for you,"

Ding Yue encouraged Xu Meijia, hoping she would continue to excel and design even more beautiful Hanfu, gradually expanding the fashion landscape of Hanfu.

"Principal Ding, I've also submitted my Hanfu designs to Central Plains Satellite TV. There are many fine programs about traditional culture on Central Plains Satellite TV, and I wonder if my Hanfu designs will be chosen,"

Xu Meijia shared her hopes.

"Central Plains Satellite TV is good,"

Upon hearing this, Ding Yue nodded and said, "With the sheer beauty of these four pieces of Hanfu, I think they would be enough to impress the program directors of Central Plains Satellite TV."

In Xia Country, Central Plains Satellite TV is the provincial television station of Central Plains Province and has always valued traditional culture.

After all, Central Plains is the cradle of Xia Country's culture, and Central Plains Satellite TV has had many programs that went viral, winning acclaim from a vast number of internet users.

The success of the traditional culture programs on Central Plains TV Station is due to the profound cultural heritage and the creators' serious efforts, unlike some TV stations that only know to invite flowery young male stars for views, lacking any depth.

"Hopefully,"

Xu Meijia said, looking forward.

Because of the presence of Lin Zhirou and her group on the sunny grassland, the students and visitors experiencing it had long since become distracted.

In fact, Ding Yue felt the same way.

There was no helping it, the four Hanfu beauties before him truly lifted his spirits.

However, Ding Yue didn't delay Xu Meijia and her group's photography session. After chatting with them for a while, they moved on to shoot their next set of photos and videos.

The next destination was the school's Archive, which featured ancient-style architecture.

Because it was filled with ancient-style buildings, it was very suitable for taking pictures of the Hanfu beauties.

Ding Yue didn't interrupt their photo session, so he returned to his office in the Administration Building.

Once back in his office, Ding Yue got down to business. He called over Director Cao Guowei from the Mechanical Department, along with several outstanding teachers and students from the automotive engineering major, as well as Engineer Chu Jiannan from the Chang'an Group.

Chief Chu Jiannan knew the Chang'an Group inside out.

He felt regret that such a large group had ended up in its current predicament—it was indeed lamentable.

Now, Chief Chu knew that at Mist City Arts and Science University, within the Feiyue Group, there was an opportunity to realize his ambitions, as Feiyue Group was preparing to work on new energy vehicles.

This was an opportunity.

When Ding Yue called them over, it was to assign tasks to Chief Chu and the teachers and students of the automotive engineering major at his own Mist City Arts and Science University.

Governor Li of Mist City wanted Ding Yue's Feiyue Group to launch the new energy vehicles as soon as possible, so Ding Yue had to put some pressure on the automotive engineering department.

He wanted them to quickly develop and design a new energy vehicle model that would satisfy him.

...

At this moment in the publicity department of Mist City Arts and Science University, Director Liu Hongxia received a set of Hanfu photos and a video. They had been sent by Xu Meijia.

Director Liu Hongxia had already received instructions from the Principal's Secretary Wen Ruohan to have her department share these Hanfu photos and videos.

Consequently.

Liu Hongxia edited the photos and videos and then published them using the official media accounts of Mist City Arts and Science University on Twitter, Bilibili, TikTok, and other platforms.

[Mist City Arts and Science University Official Twitter] v: Come and admire the stunning Hanfu designed by our fashion design students~[image.jpg]x9!

In these Hanfu photos and videos were Mist City Arts and Science University's top-ranking beauties. Who doesn't like beautiful women?

The Hanfu photos of Lin Zhirou, Jiang Yao, Jiang Qiuying, and Zhang Yu immediately attracted countless netizens to view them.

"Holy shit! This is too ethereal, right?"

"The Hanfu looks beautiful."

"This Hanfu was designed by university students? It looks way better than the Hanfu I've seen before."

"These Hanfu seem to have cultural connotations."

"Am I the only one here to see the Hanfu?"

"Are you guys here to see the Hanfu? I'm embarrassed to expose you!"

"So many beauties, holy shit, that one must be Lin Zhirou, right?"

Many netizens recognized the most famous among the four Hanfu beauties in the photos. Yes, it was the goddess-level singer Lin Zhirou, whom many adored. The netizens were very surprised and didn't expect to also see Hanfu photos and videos of Lin Zhirou.

The key point was that the Hanfu Lin Zhirou wore was designed by fashion design students of Mist City Arts and Science University, which was simply amazing.

"This is just too beautiful."

"I suggest Mist City Arts and Science University should post more of these regularly, isn't this more effective than a recruitment brochure?"

"Yes, yes, this is way more effective than a recruitment brochure."

"Lin Zhirou is truly a breathtaking fairy, and the Hanfu makes her even more gorgeous!"

"If everyone had to choose one, who would you pick?"

"Kids make choices, grown-ups... understand all."

As netizens were leaving all sorts of comments in the comment section about the Hanfu photos released by Mist City Arts and Science University, suddenly, a particularly eye-catching hot comment appeared...

Chapter 1126: Life Advice from Principal Ding

In the official Twitter comment section of Mist City Arts and Science University.

Countless netizens had been drawn to the Hanfu photos of Lin Zhirou, Jiang Yao, Jiang Qiuying, and Zhang Yu. Indeed, everyone loves beautiful women.

Even many netizens suggested that Mist City Arts and Science University should post more photos of beautiful women in the future, as they're much more effective than enrollment brochures.

Amused by the netizens' various jokes and memes, Ding Yue joined in the fun.

Originally, Ding Yue was in his principal's office, waiting for the teachers and students of the Automotive Engineering Department to come for a meeting, but since they hadn't arrived yet, he casually checked Twitter on his phone.

And then he saw the trending topic.

Having nothing better to do, Ding Yue left a comment in the Twitter thread, which instantly became a hot comment with a high number of likes and replies.

"You can look at their photos a hundred times, but they will not be yours. You can read books a hundred times, and the knowledge will be yours. Young people, it's time to wake up. Our goal is to build our motherland!"

As soon as Ding Yue's comment was posted, it was seen by many netizens.

After all, this was none other than the principal of Mist City Arts and Science University.

"Principal Ding, you're a charmer and sly as a fox. I don't believe a word you say!"

"I just love looking at beautiful women, and I will continue to do so!"

"Woohoo, Principal Ding really is something, saying things that kind of make sense!"

"Principal Ding's vision is truly grand!"

"'Pattern'!"

"Principal Ding, you should write a book!"

"Principal Ding, you're wrong. If I look at their photos a hundred times, I'll be in a good mood. If you make me read a book a hundred times, I'll be depressed!"

"Am I the only one who thinks Principal Ding makes a lot of sense, and that it's quite motivational?"

"Right, right, right, our goal is to build our motherland!"

"Nice one, I'm fired up!"

"I also think Principal Ding makes sense. So, the question is, how can I attend Mist City Arts and Science University and meet these senior sisters?"

Ding Yue's Twitter comment quickly received tens of thousands of likes and thousands of replies, making it the top hot comment on the trending post.

Many netizens even jokingly referred to Ding Yue's words as life advice from Principal Ding!

Ding Yue briefly looked at the replies from the netizens, found them quite amusing, and even started interacting with some of them inadvertently.

At that moment, many netizens realized that this young Principal Ding from Mist City Arts and Science University was actually very interesting, totally different from the doddering old heads of other universities.

Just as Ding Yue was enjoying his time online, he heard the voice of Cao Guowei, the director of the Department of Mechanical Engineering, from outside the office: "Principal Ding."

Seeing that it was Director Cao Guowei and Chief Chu Jiannan, along with the teachers and students of the Automotive Engineering Department who had arrived, Ding Yue promptly put away his phone, stood up from his seat, and said, "Let's go to the meeting room."

Since there were many attendees, Ding Yue planned to convene everyone in the meeting room to set out the tasks for the new energy vehicle design and development project.

This time, Ding Yue had summoned the best teachers and students from the Mechanical Engineering and Automotive Engineering Department of Mist City Arts and Science University.

The job of designing and developing new energy vehicles was now in their hands, and the deadline was tight—they aimed to have it done before the end of the year, meaning there were only about two months left.

Everyone followed Ding Yue to the meeting room.

Wen Ruohan, the secretary, and Big White, the artificial intelligence robotic assistant, poured water for everyone.

"Please, have a seat. I've called you all here today to discuss an important matter," Ding Yue said.

After sitting down and asking everyone else to do the same, Ding Yue generally preferred not to make his subordinates too stiff during meetings.

"Principal Ding, are we talking about something related to Chang'an Group?" asked Chief Chu Jiannan abruptly.

Chief Chu was aware of some issues concerning Chang'an Group and knew that it would be difficult for it to continue running, especially since the Mist City Government was likely to withdraw support.

That meant Chang'an Group was running out of room for development, and Chief Chu resolved to devote his efforts to Feiyue Group and Mist City Arts and Science University in the future.

"Chief Chu, you probably have a rough idea about the situation with Chang'an Group. Indeed, as you suspect, Chang'an Group... alas, it's such a pity," Ding Yue said, his sigh indicating the gravity of the situation.

Chief Chu Jiannan and the other automotive engineers who had come from Chang'an Group bowed their heads in regret.

After all, Chang'an Group is where they had worked for many years, dedicating a significant portion of their lives. The current state of Chang'an Group inevitably brought them a sense of loss and helplessness.

Fortunately, they now had a new "home"—teaching at Mist City Arts and Science University and working as automotive engineers for Feiyue Automobile, a subsidiary of the Feiyue Group.

They all knew that Feiyue Automobile was planning to get into new energy vehicles, which meant that their skills would eventually be in demand.

Having a skill always ensured that they wouldn't be without opportunities.

Moreover, Feiyue Automobile had access to graphene batteries and a positive corporate environment, and Chu Jiannan and his colleagues wanted to see if they could make a significant impact there.

Chapter 1127: Life Advice from Principal Ding _2

In fact, the most important aspect was that Principal Ding really provided them with excellent welfare benefits!

"However, the reason I've called you here today is not to discuss Chang'an Group, but to talk about our Feiyue Automobile," said a seriously.

After finishing, Ding Yue looked towards the teachers and students from his own automotive engineering department at Mist City Arts and Science University.

Everyone was eagerly awaiting Principal Ding to explain the matter.

But Ding Yue remained silent for about half a minute before finally saying, "As you all know, Feiyue Automobile is preparing to create our own new energy vehicles. The timing is gradually maturing, from batteries to on-board systems, we are vigorously developing and producing them. Therefore, the design of the new energy vehicle's body structure will depend on the experts present."

Ding Yue made it very clear. If the new energy vehicle is divided into three parts: the battery system, the on-board system, and the vehicle body structure system, then the teachers and students he had called here today were responsible for the vehicle body structure system.

"Principal Ding, I was wondering what kind of standards you have for the new energy vehicle's body structure hardware system?" Chief Chu Jiannan asked seriously.

This was Chief Chu's professional domain, after all, he was previously the chief automotive engineer at Chang'an Group.

"This is precisely why I've gathered everyone for this meeting."

Ding Yue's voice and demeanor became a little more relaxed, then he looked at Chief Chu and said, "Chief Chu, first of all, it's about the design of the body shape. I believe that young people will be the most receptive group to new energy vehicles, so our first new energy vehicle should be designed to look sporty, vibrant, and cool. That shouldn't be a problem, right?"

As far as Ding Yue was concerned, the aesthetics of the car, its visual appeal, was a very important aspect for car buyers.

The failure of Chang'an New Star, Chang'an Group's new energy vehicle, was largely due to its unattractive appearance. The exterior of the Chang'an New Star was too sharp and angular, the lines not graceful enough, failing to impart an immediate sense of attraction, and came off as uglier the more one looked at it.

"Hmm... that direction is not a problem, but Principal Ding, we might be getting on in years, for youthful, sporty, and cool car body styling, perhaps the younger people in the college would have a better grasp of that," Chief Chu Jiannan replied without directly taking on the task.

Chu Jiannan knew what he was good at and what he was not.

If you asked him to oversee the vehicle body hardware structure engineering and quality, that was not a problem at all. However, designing a car body aesthetic that was outside his usual way of thinking, Chu Jiannan worried he would not satisfy Principal Ding's expectations.

So, it would be better to leave the design of the car body to the young people in the college.

After spending some time teaching the automotive engineering students at Mist City Arts and Science University, Chu Jiannan found that these young people, who loved car design, had very good learning abilities and professional skills.

For designing the kind of car body Principal Ding wanted, these youths were indeed more suitable than himself.

Hearing this, Ding Yue nodded slightly, understanding what Chief Chu was implying. He then turned his head and looked at several outstanding students in the automotive engineering field.

"Principal Ding, do you intend to hand over the design of the car body to us?" asked one of the students, visibly excited.

It was clear that the student was quite eager.

Ding Yue smiled and nodded, "Do you have confidence in designing a car body that will satisfy me?"

As long as the design could satisfy Ding Yue, it was most likely to be acceptable to the wider consumer base as well.

Because Ding Yue's aesthetic tastes were generally in line with the public.

Just as Ding Yue was very fond of high-beauty ladies like Lin Zhirou, Jiang Yao, Jiang Qiuying, and Zhang Yu, whatever Ding Yue considered beautiful, the greater internet user base had no need to say more, in their eyes, these were certainly top goddess-level beauties.

"Principal Ding, we will definitely try our best to design a car body that will satisfy you!" another student from the automotive engineering field said with full confidence.

"Good, you are Sun Xueyang, right?"

Ding Yue nodded and asked.

"Yes, Principal Ding, my name is Sun Xueyang," the student named Sun Xueyang immediately answered.

These outstanding students from the automotive engineering major, Ding Yue had previously heard about from Cao Guowei and had seen their academic performance and photos over the past two years, so he naturally remembered them a bit.

The other two were students Guan Sheng and Li Xiangyuan.

Since they were the best students in the automotive engineering major, Ding Yue thought for a moment and decided to entrust them with the design of the body shape for Feiyue Automobile's first new energy vehicle.

As for the research and design of the body structure, as well as the safety performance and other aspects that had nothing to do with the external design, but were very important, naturally, he would leave these to the experienced Chief Chu and the team of automotive engineering designers from Chang'an Group.

"Seeing you all so eager to try, alright, I will entrust you with the design task of the body shape for our Feiyue Group's first new energy vehicle. However, due to the urgency of time, you must ensure that you deliver a satisfactory car design within the limited time. Can you do it?"

Ding Yue asked very seriously.

This time, indeed, the urgency arose because the Mist City Government wanted to see the results of Feiyue Group's new energy vehicles as soon as possible, which made the timing a bit tight.

The vehicle had to be created before the end of the year.

Moreover, since the beginning of the year, various technology companies and traditional car manufacturers had been releasing new energy vehicles one after another. At this moment, if they didn't reveal their own trump card, the market might well be taken by others.

There it was, Penguin Group's Penguin new energy vehicle 6 series was about to come out.

As was Huawei Technology Group's collaboration with Red Flag Car for a new energy vehicle, which was also about to hit the market soon.

These were all somewhat capable.

"We guarantee to complete the task!"

"We guarantee to complete the task!"

"We guarantee to complete the task!"

Guan Sheng, Li Xiangyuan, and Sun Xueyang responded in unison.

Seeing this, Ding Yue nodded with satisfaction, then turned to look at Chief Chu Jiannan and the others, smiling as he said, "Chief Chu, the design work for the body shape will be left to these young people. With your rich experience in automotive engineering, I will leave the crucial tasks such as body structure design and safety design to you."

Upon hearing this, Chief Chu Jiannan immediately nodded and said, "Principal Ding, rest assured, we will definitely control the quality well."

"Likewise, the part you are responsible for is also under time pressure. We need to finish the car, and even put it into mass production, before the end of the year," Ding Yue continued.

Before the end of the year, this time constraint was indeed tight for everyone involved. But since Principal Ding had said so, and had also provided such an opportunity and stage to showcase their abilities, even in the face of time pressure, Chu Jiannan and others were ready to face the challenge head-on.

"Principal Ding, we will do our utmost to complete the design work for our first car before then," Chief Chu Jiannan said with a serious and earnest expression.

Ding Yue also knew that asking them to guarantee a hundred percent was certainly not realistic. Since everyone expressed that they would do their utmost, Ding Yue just needed to await the results.

"Good, everyone has worked hard. As long as our first new energy vehicle is successfully launched, the company will surely not let you down!"

Ding Yue said to everyone.

This was something that nobody needed to worry about because, looking back at Feiyue Group's past projects, any that satisfied Principal Ding always received a generous reward.

"Principal Ding, I have another question,"

At this moment, student Li Xiangyuan raised his hand.

Chapter 1128: The Principal Watches the Game with the Students

Ding Yue turned to the student raising his hand to ask a question, Li Xiangyuan.

"What's your question? Go ahead and ask," said Ding Yue.

"Well... Principal Ding, we're not employees of the company yet... I just wanted to ask if we would share in the rewards when the time comes?"

Li Xiangyuan asked a very realistic question.

Upon hearing this, Ding Yue thought the student was quite sincere. Currently a student in the mechanical engineering department at Mist City Arts and Science University, he wasn't a signed employee of Feiyue Group. Considering his own interests was quite normal.

"Oops, I overlooked that."

Ding Yue smiled and nodded, saying, "In that case, the student team in charge of car body design will certainly receive the same treatment. And if you're willing to join Feiyue Group, the company would of course welcome you."

For students such as these, excelling in automotive engineering and able to contribute to his company, there could be no better outcome.

Better than working for someone else's company, right?

And to add,

The original intention behind establishing Feiyue Group was to attract all the outstanding individuals trained at Mist City Arts and Science University to work for him.

In so doing, he could transform the knowledge from various academic disciplines through Feiyue Group to drive the development of science and society, while also establishing his own business empire that covered all academic fields of the university.

"Principal Ding, of course we're willing to join the company!"

Student Guan Sheng said excitedly.

The students of Mist City Arts and Science University take pride in securing a position at Feiyue Group, which stands behind the school. Now that Guan Sheng, Li Xiangyuan, and Sun Xueyang had not yet graduated but had the opportunity to join the company, they were definitely "winners in life."

It was as if you were still studying at university, but based on your excellent academic achievements, you already had an extremely satisfying job offer in hand.

In fact, there were quite a few such students in the mechanical engineering department at Mist City Arts and Science University.

Especially since Feiyue Group's graphene industry had been established.

The same was true for students from the computer science department and the school of architecture.

For example, the school of architecture had a large number of students since architecture was a perennial field with naturally many learners. After the establishment of Feiyue Construction Company, many students who had good academic results from the school of architecture had already joined Feiyue Construction Company one after another, becoming part of Feiyue Group.

"Alright, Director Cao, when the time comes prepare the materials for these three students, and then submit them to Miss An. Afterward, Miss An will arrange for someone to sign the relevant employment contracts with you," said Ding Yue as he directly arranged work for the three students, Guan Sheng, Li Xiangyuan, and Sun Xueyang.

Feiyue Automobile, under the Feiyue Group umbrella, was in urgent need of releasing its first new energy vehicle. At this critical moment, having taken advantage of these students' services, it was only right to put them to work.

There was no need to say anything about Chief Chu Jiannan and the others, as they had already joined Feiyue Group when they came over from Chang'an Group.

"Does anyone else have any questions? Speak up while we're meeting," Ding Yue said as he looked around the conference room.

Everyone shook their heads in turn. Chief Chu Jiannan and the others certainly had nothing to say, given the excellent benefits and compensation Principal Ding provided.

Guan Sheng, Li Xiangyuan, and Sun Xueyang were primarily concerned with whether they could join Feiyue Group, and now that issue had also been resolved.

"No, Principal Ding," Sun Xueyang responded with a smile.

"Good, in that case, as soon as everyone gets back, start getting to work right away. I'm waiting for your good news!" Ding Yue encouraged them.

With that, the meeting came to an end. After Chief Chu Jiannan and the students like Li Xiangyuan left, they began preparing to carry out the tasks assigned by Principal Ding.

After the meeting,

Ding Yue returned to his principal's office.

The main tasks for the coming period had been assigned. Recently, Ding Yue found himself quite busy.

Sitting in his principal office chair, he even felt a bit weary.

Whenever Ding Yue was busy for a while and most of the work had been done, he would feel this sense of tiredness when he rested.

But a day or two of rest would suffice.

"The S Competition must be nearing the finals, right?"

After resting in his office chair for a few minutes with his eyes closed, Ding Yue suddenly thought of this. He opened his eyes and muttered to himself.

Fortunately, his secretary, Wen Ruohan, heard Principal Ding's muttering and immediately said, "Principal Ding, today is the semi-finals. After they end, in one week, it will be the final."

Unbeknownst to him, the S World Championship had reached the semi-finals.

Since Jian Zihao hadn't brought him any bad news, that meant Mist City Arts and Science University's FY team must have made it into the semi-finals.

This was not unexpected.

The FY team's momentum had been unstoppable along the way.

However, due to Ding Yue's recent busyness with various school and company matters that required his decisions, he had been so preoccupied that he hadn't had the time to watch the matches in between.

For instance, Ding Yue only watched the opening match of the group stage.

Chapter 1129: The Principal Watches the Game with the Students _2

At the time, the opening match we faced was against the perennial mid-season champion, the Big Tiger team from Korea, but fortunately, we won, which felt like fulfilling a revenge.

"Xiao Wen, how is the situation now?"

Seeing that Wen Ruohan seemed to have always been following the S World Championship, Ding Yue asked.

Since today is the semi-finals, Ding Yue definitely planned to watch the match because, if he won today's game, he could directly have his secretary Wen Ruohan book tickets to watch the match live.

"Principal Ding, you might have been too busy recently to follow, but I have been keeping an eye on it, hehehe, our LPL region, our FY team advanced to the top four, and Dragon City's LC team is also very strong, reaching the top four. The other two top four teams are Korea's Big Tiger team and Europe and America's GG team!"

Wen Ruohan updated Principal Ding about the current League of Legends S World Championship semi-finals situation.

This year's semi-finals include two LPL teams from Xia Country, marking a strong presence from the LPL in recent years.

And most fortunately, the two LPL teams did not meet in the semi-finals.

That means, both the FY team and Dragon City's LC team have the chance to meet each other in the finals.

Of course, there's another possibility that both LPL teams get eliminated, leaving the finals to be contested between Korea's Big Tiger team and Europe and America's GG team for the championship.

What the final scenario will be depends on the outcome of today's semi-finals.

"What time does it start?"

Ding Yue checked the time, and it was already past four in the afternoon.

"The game officially starts at five o'clock, the first match is Dragon City's LC team against Korea's Big Tiger team, and the second match is our FY team against Europe and America's GG team."

Wen Ruohan immediately replied.

The two semi-final matches will both take place today, each following a best-of-five format.

That means, for League of Legends players worldwide today amounts to a grand celebration.

After all, the world's strongest four teams will determine a winner today, deciding which two teams will stand on the finals stage next week.

"Darn, you should have reminded me earlier."

Upon hearing this, Ding Yue figured the matches were about to start.

However, the first game was not his own FY team, but Dragon City's LC team. Yet, it's still our Xia Country's own team.

Logically and emotionally, Ding Yue naturally hoped that Dragon City's LC team could defeat Korea's Big Tiger team, advancing to a final showdown with his own FY team.

After all, having both Xia Country's teams in the finals would absolutely be the most glorious moment in League of Legends history for the LPL region!

"Ah, this..."

Secretary Wen Ruohan didn't know what to say for a while.

Indeed, she had forgotten to inform Principal Ding that today was the day of the League of Legends S World Championship semi-finals. She would just have to take responsibility for this oversight.

"No worries."

Ding Yue didn't blame secretary Wen Ruohan.

Since he now knew today was the day of the semi-finals, all he had to do was to get in the right mood and prepare to watch the game.

"Principal Ding, are we watching the game in the office or going to the Fifth Canteen?"

Seeing that Principal Ding wasn't angry, Wen Ruohan smilingly asked.

"The semi-finals are quite an important part of the S World Championship, and since both of today's matches involve our Xia Country's teams, we definitely need to go somewhere with a good atmosphere."

The moment Ding Yue said this, secretary Wen Ruohan immediately understood the implication.

The last time they watched a game at the Fifth Canteen, the atmosphere was very lively. They decided to go there today to watch with the students for a more vibrant setting.

As a result, Wen Ruohan hurriedly made the arrangements, gathered her things, and left the Principal's office with Ding Yue.

"Big White, come with us."

Ding Yue also called Big White along; if they were going to the Fifth Canteen to watch the match with the students, it would be nice to bring Big White so that the students who adore him could see him as well.

Big White immediately followed Ding Yue's command, hurrying along with small quick steps.

"Let's go!"

Ding Yue, accompanied by Secretary Wen Ruohan and Big White, left the Administration Building and headed toward the Fifth Canteen.

On the way, Ding Yue didn't forget to call his mother, Zhang Yuping, asking her to prepare a special meal for him.

Meanwhile, at the Fifth Canteen, the place was almost filled with students. Though it wasn't mealtime yet, the first match of the semifinals was about to start.

The live broadcast on the platform had already begun, and both commentators and the production team were in place.

"Principal Ding, hello!"

"Principal Ding, are you also here to watch the match?"

"Good afternoon, Principal Ding!"

"Wow, look, look, Principal Ding is here too."

"Principal Ding is here again, haha."

"FY team will win!"

When the students at the Fifth Canteen saw Principal Ding arrive, they couldn't help but cheer, and many of them greeted Principal Ding.

Ding Yue responded to each greeting and then found a fairly good table to sit down at.

In fact, this fairly good table was given up by the students for Ding Yue.

"Thank you."

Ding Yue expressed his thanks for the students' enthusiastic gestures.

"Don't mention it, Principal Ding, we are so happy you could join us to watch the match," a student said excitedly.

By then, quite a few students had already taken out their phones to snap plenty of photos. After taking the photos, they shared them on Twitter, TikTok, and Twitter, showcasing their approachable principal who was watching the match with them in the canteen.

The large screen in the Fifth Canteen had already started broadcasting the live semifinals of the S World Championship. Although the two contending teams hadn't officially appeared yet, the commentators and hosts had already begun their pre-match analysis.

"Students, the first match is with our own Xia Country's Dragon City LC team. Let's give them strong support!"

Ding Yue stood up and spoke to the students around him in the canteen.

"Of course, we'll support!"

"Support Dragon City LC team to power through and meet us in the finals!"

"Yes, yes, yes, support Dragon City LC team to crush Korea!"

"Big Tiger team is tough though!"

"As people from Xia Country, we should of course support our own team!"

In such S World Championships, any team from Xia Country is our own team. That said, another team, the FY team, is truly our own since it was formed by students from the e-sports program under the nurture of Principal Ding's own club.

FY team is genuinely our people!

Most of the audience at this first match was supporting Dragon City LC team, as they were the runners-up of the LPL regional postseason and had proven to be a strong competition to FY team, becoming significantly stronger after the world championship.

That is to say, Dragon City LC team was indeed capable of competing for the championship!

And the opponent of Dragon City LC team, Korea's Big Tiger team, needs no further introduction as the students of Mist City Arts and Science University are familiar with them.

In the first half of the year, the FY team was defeated by this team, regrettably missing out on the mid-season championship title.

However, in the latter half of the year, the performance of this team seemed to have declined significantly in Korea, not entering the S Competition as the top seed.

But in the S World Championship, Big Tiger team seemed to have regained their form, fiercely battling their way into the semifinals.

The veteran strong team proved worthy of their reputation, quickly adjusting their form on the field.

"I remember Big Tiger team isn't the strongest in the Korea division, right?"

Since Ding Yue hadn't kept up with the details of the teams during the past half-month of the S Competition, he asked his secretary, Wen Ruohan.

"Right, Principal Ding, Big Tiger team wasn't initially favored, but they knocked down the top seeds from both the Korean and Western divisions..."

Chapter 1130: Joyfully Receiving a School-wide Notice of Criticism and Punishment

Ding Yue originally thought that since the Summer Game, the Big Tiger team from Korea had been languishing, no longer possessing the formidable strength they once had.

But unexpectedly,

The Big Tiger team seemed to be getting stronger and stronger in the S World Championship.

"The first game where Dragon City LC team plays against Korea's Big Tiger team, that's really going to be something to watch."

Ding Yue muttered.

The Dragon City LC team is an LPL team, just like his own FY team, both being all-Chinese lineups.

If such a team could defeat Korea's Big Tiger team, it would definitely be exhilarating for the LPL region, especially since FY team had lost to the Big Tiger team during the mid-season championship earlier in the year.

And that's not all.

If Dragon City LC team beat the Big Tiger team from Korea, they would advance to the finals. Then, if his FY team went on to defeat the GG team from Europe and America, it would be even more interesting. It would be a showdown within the LPL region, two all-Chinese teams facing off, something entirely unprecedented in the history of League of Legends competitions.

Of course, if Dragon City LC team were to lose to Korea's Big Tiger team, it wouldn't really matter.

After all, the Dragon City LC team is still young, a dark horse that has risen this year. It's normal for them not to be able to defeat veteran powerhouses.

Then, it would be Korea's Big Tiger team advancing to the finals.

And if his FY team won their second game, it would be even more fascinating.

The mid-season championship was a showdown for his FY team against Korea's Big Tiger team at the Summit. If the upcoming finals of the S World Championship were to turn out to be a rematch between these two teams at the Summit, it would indeed be like a cycle.

But this time, Ding Yue naturally hoped that his FY team could seize the opportunity and not lose to the Big Tiger team again.

If they were to lose again, he figured FY team would find it tough to hold their heads high for quite some time.

However, since the match hadn't started yet,

anything was possible.

What if his FY team suffered an upset loss to Europe and America's GG team?

After all, the strength of Europe and America's GG team was also formidable.

While the first match between Dragon City LC team and Korea's Big Tiger team had not yet officially started, when they were still being introduced onto the stage, Ding Yue took out his phone and made a call to Director Jian Zihao.

The semi-finals are extremely important as well.

Even though he wasn't physically at the venue to encourage his FY team, it was still essential to give Jian Zihao a reminder at this time.

Soon, the call was connected.

"Hello, Principal Ding."

Director Jian Zihao's voice came through the phone.

"Director Jian, you guys are at the venue right now, right?" Ding Yue asked.

"Yes, Principal Ding, we're playing in the second game. Right now, we're in the resting room, watching the match between Dragon City LC team and Korea's Big Tiger team."

Jian Zihao responded.

"Watch it closely because one of those teams could be your opponent in the finals. We have to take our enemy seriously," Ding Yue advised Jian Zihao.

Implicit in those words was the assumption that FY team would be able to make it to the finals.

"Alright, we've done extensive research on both Dragon City LC team and the Big Tiger team and have formulated respective lineups and strategies," Jian Zihao confidently replied.

Hearing Director Jian Zihao sound so confident, Ding Yue was mostly reassured. Now it was just a matter of seeing how the five players from FY team would perform on the field.

"What about the game against Europe and America's GG team? How confident are you?" Ding Yue asked again.

The most pressing issue at the moment was Europe and America's GG team, because only by defeating them could they advance to the finals.

And the GG team from Europe and America was not to be underestimated.

Every team that had made it to the semi-finals was formidable.

Just like the Dragon City LC team, this dark horse, which had lost to FY team in the LPL's postseason finals but had been showing impressive performances on the world stage. If they were to meet in the finals, a slight lapse in concentration could very well lead to being defeated by the Dragon City LC team.

"As for the GG team from Europe and America, we have a good handle on them this time. Unless the GG team has some ace up their sleeve that they haven't shown yet, even so, Xiong Jiahao and the others are very confident. In terms of individual laning abilities, they can definitely push for an early lead," Director Jian Zihao maintained his confident stance.

FY team had always been fearless in playing against Europe and America's GG team.

Even though the GG team from Europe and America had many tricks up their sleeve, despite that, Xiong Jiahao, Wang Shilin, and Yao Jing were all very confident in gaining the upper hand in their lanes, using that advantage to roll the snowball bigger and eventually find the opportunity to defeat Europe and America's GG team.

It's about having a superior individual skill level.

Indeed, in terms of individual skill, whether it's FY team's top laner, mid laner, jungler, or the bottom lane duo, compared to Europe and America's GG team, they have the edge.

"Then that's good. I won't keep you any longer. The match between Dragon City LC team and Big Tiger has started. Let's focus on the game. I'm watching with the students at the school cafeteria. Whether I can get a ticket to watch the finals live depends on your performance today," Ding Yue said, ready to hang up and concentrate on the match.
