

F. University 1151

Chapter 1151: Collecting Names Throughout the School!

"I'll start by suggesting a name. It's said that the two giant panda cubs were born to the same mother and are twins, so why not call them Big Zai and Little Zai?"

"Hahaha, Big Zai and Little Zai? Those names are too cute, right?"

"I think they're pretty good."

"Hmm, although they're cute, they don't really capture the vibe of Mist City Arts and Science University."

"Exactly, since they were gifted to us by the Shu City Giant Panda Breeding Base, we should reflect the essence of Mist City Arts and Science University."

"How about Wenwen and Lili?"

"Hahaha, Wenwen and Lili sound pretty good too, and they also reflect the name of our Mist City Arts and Science University!"

"Yeah, our university excels in both liberal arts and sciences. Naming them Wenwen and Lili really isn't bad at all."

The students of the Chinese department began a heated discussion about naming the two giant panda cubs.

And not just the Chinese department.

Students from various other departments, such as Catering and Cuisine, National Academy, E-sports Game College, Mechanical Department, Computer Department, Architecture College, Medical College, Art Department, Media College, and more also joined the discussion, each one coming up with creative names for the soon-to-arrive panda cubs.

A naming frenzy spread through Mist City Arts and Science University.

Meanwhile, on online platforms like Twitter and TikTok, the official account of Mist City Arts and Science University had posted a naming announcement, which caught the attention of many users.

After all, the university's official accounts on these two platforms had gone viral multiple times before, and not only students from Mist City Arts and Science University were following them.

Keep in mind that the total faculty and students at Mist City Arts and Science University number just over eighty thousand, but the followers of the university's official accounts on these platforms have already reached millions.

"My goodness, Mist City Arts and Science University can even keep giant pandas?"

"Wow! Shu Province and Mist City are rich in giant pandas, confirmed!"

"I'm so jealous!"

"Your school's students are too lucky. Now, they don't even need to go to Shu City to see Gungun; they can see him right at school."

"Wuu wuu, even getting to name Gungun, totally making me jelly."

"Look at this lemon, big and sour!"

"Gungun is really cute, and you at Mist City Arts and Science University can even keep him, that's just awesome!"

Many users couldn't help but be a bit sour after seeing the post about the giant pandas from the official account of Mist City Arts and Science University.

Looking all over the country, which other college has kept a giant panda?"

As more and more users joined the discussion, the topic of Mist City Arts and Science University keeping giant pandas quickly soared in popularity and made it to the trending topics.

However, once something gets popular, it attracts a lot of attention, and inevitably, some trolls and detractors appeared.

Suddenly,

many began to post comments heavily criticizing and slandering Mist City Arts and Science University, all under the guise of "raising questions."

Even some marketing accounts began to stir up controversy.

These controversies were about why Mist City Arts and Science University could keep national treasure giant pandas? Keeping such treasures requires high standards and conditions, does Mist City Arts and Science University qualify?

Soon enough, these rhetorics were amplified by numerous "internet users" and marketing accounts.

"Just asking out of curiosity, giant pandas are national treasures, so why can a private university like Mist City Arts and Science University keep them? Is this the power of capital?"

"Having money is great, huh? Can even privately keep a national treasure?"

"It's one thing for giant pandas to be kept in zoos, but in a private university? What's that all about?"

"Why can Mist City Arts and Science University keep a national treasure like the giant panda?"

"Yancheng University and Qinghua University don't have giant pandas, so why does Mist City Arts and Science University get to have them? Just because it's a privately capitalized university? Capital really does whatever it wants, huh!"

"Haha, a private university keeping a national treasure giant panda, I'm speechless."

"Hope the relevant authorities conduct a strict investigation!"

"Mist City Government should seriously investigate Mist City Arts and Science University and find out how they obtained these two national treasure giant pandas!"

As more and more opinions with an agenda emerged, more and more netizens began to harbor some doubts.

Mist City Arts and Science University, why could it keep giant pandas?

How did this university obtain these two national treasure giant pandas? Did they buy them? Or what?

Gradually.

The trending topic, which was initially quite hot, was replaced by this agenda-driven topic, causing more netizens to be swayed by marketing accounts and orchestrated commentators.

At this time, Ding Yue was still unaware of the ongoing events online.

Because at the moment, he was still in the mechanical engineering building of his Mist City Arts and Science University.

Tong Yihang and Liu Tiefei had just finished cleaning Big White and brought him out. Big White, who had gotten all dirty from extinguishing a fire, was now as fluffy and lovely as before.

"Hehehe, Big White looks so much better fluffy and plump."

Wen Ruohan came forward with a giggle after seeing Big White clean and gave him a big hug.

Big White just stood there, completely unaware of what he had been through, knowing only to stand there and be adorable.

"Principal Ding, Big White has been cleaned up,"

Tong Yihang stepped forward and said to Principal Ding.

"Good, hard work you all, I'll treat everyone in the lab to lunch," Ding Yue said with a smile to all the teachers and students in the lab.

"Thank you, Principal Ding!"

The lab instantly erupted with the students expressing their gratitude to Principal Ding.

Principal Ding was just like that, always happy to provide some benefits to the students, and although it was just a lunch, the students felt genuinely warmed.

...

Far away, at Westlight University.

After Principal Xu Dongcheng finished some work, he had some free time and decided to check the day's news.

As the principal of a private university like Principal Xu Dongcheng, it was essential to stay updated with daily news.

However.

As Xu Dongcheng was browsing the news, he suddenly stumbled upon a particularly eye-catching piece of news.

It was about Mist City Arts and Science University.

"Hmm?"

Uttering to himself, Xu Dongcheng clicked on the comments section, then froze, "Why are they all criticizing Mist City Arts and Science University?"

Immediately afterward, he opened Twitter and saw that it was indeed trending, even ranked first with the word "Explosion" indicating extremely high popularity.

"Good Lord!"

Xu Dongcheng exclaimed to himself in surprise: "Is it that influential?"

Xu Dongcheng continued to view real-time Tweets and comments, noting that many marketing accounts were clearly setting the tone because their logic was the same; hastily and from a skeptical standpoint, they led the charge against Mist City Arts and Science University.

Mist City Arts and Science University was preparing to keep two national treasure giant pandas, and since the source wasn't stated online, marketing accounts and some netizens started questioning why Mist City Arts and Science University should keep pandas.

While indeed it was a question worthy of consideration, upon closer thought by adults, the reasons why Mist City Arts and Science University could obtain the qualification to keep two giant pandas weren't simple at all, possibly even backed by official endorsement. After all, Mist City Arts and Science University was highly favored in Mist City, something Principal Xu Dongcheng knew all too well.

But with such a strong momentum online, Principal Xu Dongcheng surmised that someone was seizing the opportunity to target Mist City Arts and Science University.

Following the lead of marketing accounts and many trolls on Twitter, it seemed that Mist City Arts and Science University's reputation was set to take a substantial hit again.

"Does Xiao Ding know about this yet?"

Principal Xu Dongcheng murmured to himself, then searched Mist City Arts and Science University's official Twitter and Ding Yue's personal Twitter account, only to find no response.

It appeared then that Principal Ding was probably still unaware?

So, after thinking it through, Xu Dongcheng picked up his phone and directly called Principal Ding...

Chapter 1152: Just These Little Tricks

"Hello, Principal Xu, how have you been lately?"

Upon receiving a call from Principal Xu Dongcheng of Westlight University, Ding Yue greeted him and asked if Principal Xu had been doing well recently.

Principal Xu Dongcheng, an old friend of Ding Yue, had overseen Westlight University prospering more and more this year. A major reason for this was the fruitful outcome of Principal Xu's previous visit to Mist City Arts and Science University to learn and emulate their practices.

"Principal Ding, I've been quite busy lately with the education reform at our Westlight University. Every day is filled with substantial work. These past few days, I heard from my daughter Mei Jia that Mist City Arts and Science University is preparing to host a Hanfu fashion show featuring her designs, is that right?"

Principal Xu Dongcheng engaged in conversation with Ding Yue.

He started by talking about his daughter's affairs.

"Hahaha, yes, Principal Xu, I must say Mei Jia is truly an excellent fashion designer. She may well have the chance to become an internationally renowned fashion design master in the future. Her designs for Hanfu, from inspiration to quality, are truly impeccable. To promote the Hanfu culture of Xia Country, our university has decided to feature Student Xu Meijia's designed outfits in a Hanfu fashion show," Ding Yue replied with a laugh.

"Well, thank you, Principal Ding for providing Mei Jia with such a great platform. I've covered all the expenses for this Hanfu show myself," said Principal Xu Dongcheng, generously.

When it came to money, Principal Xu Dongcheng was never stingy.

Last time, he had directly invested a hundred million into Mist City Arts and Science University without expecting any return.

"Ah, Principal Xu, you really shouldn't say that,"

Ding Yue laughed and said, "Organizing a Hanfu fashion show certainly requires some human, material, and financial resources, but these costs are worth it to promote a Hanfu design master trained by our institution. How can we let you pay for it?"

Indeed.

For Ding Yue's Mist City Arts and Science University, this sum of money was not really a significant issue.

Although the university's main funding was somewhat tight, they had ample budget set aside for all annual expenses.

Moreover, with projects like the graphene industry and new energy vehicle plan supported by interest-free loans from the Mist City Government, Ding Yue could fully utilize his own funds.

"Principal Ding, look, Mei Jia is holding her own Hanfu design show, and your school is spending money and resources on it. That really doesn't sit right with me," said Principal Xu Dongcheng, feeling somewhat embarrassed.

"Hahaha, Principal Xu, with the relationship we have, discussing these things is like being strangers to each other."

"Alright, alright, we'll follow Principal Ding's arrangements then."

The two friends did not persist over this minor matter. Since Mist City Arts and Science University had thorough plans, Principal Xu Dongcheng decided not to get involved.

However, Principal Xu Dongcheng was well aware that by having his daughter's Hanfu show supported by Mist City Arts and Science University in terms of manpower, materials, and funds, he owed Principal Ding a favor.

He thought that when the time comes, he definitely had to repay Mist City Arts and Science University.

However, for the moment, Principal Xu Dongcheng thought it best to discuss a more pressing matter with Principal Ding, "By the way, Principal Ding, there's another issue that I read about in the news online. I heard that your Mist City Arts and Science University is planning to take care of two national treasure giant pandas, is this true?"

"Yes, we obtained two giant pandas from the Shu City Giant Panda Breeding Base. Our school has developed a good breeding environment to the north with an excellent breeding team in place. Given the recent construction plans to enhance relations and the establishment of a metropolitan circle between Mist City and Shu City, Governor Li of Mist City and the governor of Shu City came to an agreement. As a result, Shu City gifted two national treasure giant pandas to Mist City, and the Mist City Government decided to have these two pandas housed at our Mist City Arts and Science University," Ding Yue elaborated on the situation to Principal Xu Dongcheng.

Although it was Ding Yue who initially proposed the idea of keeping the giant pandas to Governor Li of the Mist City Government, Governor Li had long elevated the matter to strengthen the friendship in the construction of the twin cities between Mist City and Shu City, so it was not that simple anymore.

"Oh, I see. So, these two national treasure giant pandas have the backing of both Mist City Government and Shu City Government. No wonder," Principal Xu Dongcheng said, suddenly understanding the situation.

As two cities in the southwest region, the construction of a twin-city economic circle between Mist City and Shu City is a major national development strategy. It's natural for the governments and governors of both cities to strongly support the fostering of relations between them.

So, it was no surprise that Shu City would gift two national treasure giant pandas to Mist City.

Given that Mist City Arts and Science University had the conditions and team to house giant pandas, it made perfect sense for the Mist City Government to decide to keep these two pandas at the university.

Online, however, the issue had been skewed by malicious marketers and paid commentators, and the narrative had turned into one of suspicion and denunciation against Mist City Arts and Science University.

Even the university's identity as a "private institution" was being labeled with the stigma of "capitalism." In an era where the masses are squeezed by 996 capitalist regimes, anything tagged with "capitalism" was sure to be condemned and reviled by the average netizens.

Chapter 1153: Just These Little Tricks _2

"Principal Xu, why did you suddenly start asking about this?"

Ding Yue asked curiously.

"Ah, this... Principal Ding, don't you know yet? The news about Mist City Arts and Science University raising a national treasure giant panda has already topped the trending list, and it's ranked first," Principal Xu Dongcheng immediately explained.

"Trending number one?"

Upon hearing this, Ding Yue was startled, then muttered, "Is it that hot? That's excessive. Could it be that there's no other significant news today?"

Ding Yue pondered. Had Mist City Arts and Science University simply posted an announcement asking for name suggestions for the panda they would be raising to have topped the trending list?

Wasn't that a bit too outrageous?

"My dear Principal Ding, this trending status is not a good thing. It is because your Mist City Arts and Science University is taking care of a giant panda that you have been led into a negative rhythm, and you have been defamed on the trending list. I seriously suspect that someone specifically bought a negative trending spot against you!"

Seeing that Principal Ding still thought that topping the trending list was a good thing, Principal Xu Dongcheng hastened to warn him.

"What?"

Ding Yue exclaimed in shock, "That really happened?"

Mist City Arts and Science University was frequently in the trending topics, which was normal, but for someone to buy negative trend placement or even to push it to number one was something Ding Yue couldn't imagine anyone doing.

No, that's not right!

The moment he considered who might target his university, the image of a penguin immediately jumped into Ding Yue's mind!

Who else could it be other than the Q Entertainment Media?

If he had to name those Mist City Arts and Science University and Feiyue Group had offended in the past two years, the Chen siblings of Q Entertainment Media were at the top of the list.

What's more, Chen Xueming of Q Entertainment Media truly had the capability and connections; this wasn't their first time, was it?

"It seems some people are watching my Mist City Arts and Science University closely, intending to tarnish our reputation," Ding Yue remarked with a sigh.

"Principal Ding, why not make a detailed announcement from Mist City Arts and Science University? Otherwise, this rhythm is being led too harshly," Principal Xu Dongcheng suggested. "Even I can't stand to watch it. If I didn't know Mist City Arts and Science University and you, Principal Ding, very well, I might have been swayed by the current narrative."

"Okay, I will first find out what's going on with the negative trending topic, then respond accordingly. Thank you, Principal Xu, for informing me about this issue immediately," Ding Yue said calmly as he analyzed the situation and thanked Principal Xu Dongcheng for the timely information.

"Hey, we're all in this together. Well then, Principal Ding, you go ahead and handle it. I'll be waiting for Mist City Arts and Science University to break the negative trend on their own."

"Okay, goodbye Principal Xu."

"Goodbye, Principal Ding."

After hanging up the phone, Ding Yue turned to his secretary Wen Ruohan and said, "Xiao Wen, it seems that there is a negative trending topic online about Mist City Arts and Science University raising the national treasure giant panda. Regarding this negative trend, ask the publicity department to make detailed explanatory announcements... No, no need for that."

Ding Yue suddenly thought of something, furrowing his brows, deciding not to issue explanations, but rather to solve the issue in a different way.

After all, it took no effort to fabricate rumors, but refuting them was exhausting. Even if Mist City Arts and Science University's official account responded with clarifications, there was no guarantee that many people would see it.

"Ah? Principal Ding, someone defamed our school again?"

Upon hearing this, Wen Ruohan was instantly infuriated.

There had been multiple instances in the past—either competing from abroad or some domestic actors with an agenda, but ultimately, Mist City Arts and Science University had always managed to debunk the negative trends.

And now they were targeted again?

"Principal Ding, are we not going to respond?"

Wen Ruohan asked, puzzled.

"Contact the Mist City Government. It would be best for them to release an announcement," Ding Yue said with a hint of a smile, then added.

Instead of Mist City Arts and Science University issuing its own weak explanatory announcement while caught in the vortex, it would be far more impactful to have the Mist City Government step in.

The two national treasure giant pandas were originally given by Shu City to Mist City to establish a friendship between the two cities, instantly elevating the matter to the official levels of the city governments of two major cities.

This kind of announcement was authoritative enough!

Ding Yue then picked up his phone to look at the top trending item on Twitter.

Just as Principal Xu Dongcheng said, it was clear at a glance that it was a smear campaign, with a whole bunch of marketing accounts setting the rhythm.

Usually, aside from riding on trends, if a marketing account actively sets the tone for a topic, there's no doubt they've taken dirty money.

"All right, Principal Ding!"

Wen Ruohan immediately contacted the Mist City Government.

Very quickly,

Mist City Government made an official announcement regarding Mist City Arts and Science University's care of the two national treasure giant pandas.

Immediately following this, all major platform official accounts of Mist City Arts and Science University promptly re-posted this official announcement from Mist City Government.

The official announcement from Mist City Government carried a lot of weight, stating that the two national treasure giant pandas were a gift from Shu City to Mist City as a testimony to the profound friendship and brotherhood between the cities.

Mist City Arts and Science University had the environmental conditions and team necessary to care for the national treasure giant pandas, so Mist City Government decided to entrust the two pandas gifted by Shu City to Mist City Arts and Science University for their care.

Once the official announcement from Mist City Government was released, the smear campaign rhythm and comments online instantaneously collapsed of their own accord.

"Ah, so it turns out to be an exchange between Mist City and Shu City."

"Well done, it even drew out Mist City officials."

"Where are those people who were setting the rhythm? Why don't they come out and apologize?"

"I saw it was all marketing accounts setting the rhythm, and I knew it wasn't so simple."

"Exactly, I also saw some netizens saying that Mist City Arts and Science University got the two national treasure giant pandas through illegal channels, it just made me laugh, what are their brains made of, tofu dregs?"

"So that's what it was!"

"Indeed, in recent years Mist City and Shu City have been building a twin-city economic circle!"

"What's wrong with Shu City gifting two giant pandas to strengthen the relationship between the two cities?"

About five minutes later, Shu City Giant Panda Breeding Base also released an announcement.

The announcement from Shu City Giant Panda Breeding Base indicated that they had sent an expert team to conduct a professional inspection of the environment and personnel Mist City Arts and Science University had for caring for the national treasure giant pandas, and the inspection results met the standards.

"See, Mist City Arts and Science University really does have the capacity and conditions to care for national treasure giant pandas!"

"How embarrassing must those who tried to sway public opinion against Mist City Arts and Science University feel now?"

"Awesome, Mist City Arts and Science University can even take care of Gungun; I'm green with envy!"

"I've noticed that this private university, Mist City Arts and Science University, often seems to get caught up in others' rhythms."

"I'm liking Mist City Arts and Science University more and more."

"Well done, your Mist City Arts and Science University is once again in the spotlight because of raising Gungun, striding further down the path of becoming a celebrity university."

"Honestly, I quite like the celebrities from Mist City Arts and Science University; they're all pretty cool!"

"Hahaha, now when you visit Mist City Arts and Science University, not only can you enjoy campus hotpot, read books at Book Ship Library, and run on the sunny grass, but you can also see giant pandas—an absolute gem!"

"Everyone is welcome to visit us at Mist City Arts and Science University."

"Our Mist City Arts and Science University welcomes every tourist who wants to visit (this post cost fifty cents, (dog head))."

Following the successive announcements from Mist City Government and Shu City Giant Panda Breeding Base, the top trending smear campaign on Twitter instantly collapsed.

Netizens finally realized that the two national treasure giant pandas Mist City Arts and Science University was set to care for were officially permitted by the city governments of Mist City and Shu City, and had been directly gifted by Shu City Giant Panda Breeding Base to Mist City Arts and Science University.

Ding Yue, watching the reversal of public opinion online, couldn't help but let out a cold laugh.

These little tricks of setting the rhythm by his rivals were hardly enough to affect Mist City Arts and Science University anymore.

Chapter 1154: Are the Students of Our School at This Level?

Two days later.

Shu City Giant Panda Breeding Base.

Today, the Giant Panda Breeding Base will have a team specially responsible for transporting two national treasure giant pandas to Mist City.

These two national treasure giant pandas represent the profound friendship between Mist City and Shu City, two major southwestern cities, and have extraordinary significance in the new era.

Prior to this, there were some public opinions about these two giant pandas on the internet.

Later, after Shu City and Mist City both made announcements explaining the situation, all the doubts disappeared, and Mist City Arts and Science University became the focus of popular attention for housing these two national treasure giant pandas.

After the trending incident.

Since Mist City Arts and Science University became the focus of internet users for housing the national treasure giant pandas, they had organized a live stream in the past two days to introduce the preparations Mist City Arts and Science University had made to welcome these two national treasure giant pandas.

This included the living environment of the two national treasure giant pandas, a large bamboo forest, and the surrounding environment which was very good.

Besides that.

Mist City Arts and Science University also equipped these two national treasure giant pandas with twelve professionals in caregiving, health, and other areas.

These twelve individuals were all professional talents from Mist City Arts and Science University in this field, carefully selected by the school.

Only then did the netizens understand.

It turns out that Mist City Arts and Science University had made extensive preparations to welcome these two national treasure giant pandas.

As of now, Mist City Arts and Science University had not yet renamed these two national treasure giant pandas, because the naming process for the national treasure giant pandas of Mist City Arts and Science University was still underway.

Morning.

Administration Building, Principal's Office.

Ding Yue came to the office for daily work today, naturally most concerned about the arrival of the two national treasure giant pandas.

"Xiao Wen, the two national treasure giant panda cubs from Shu City Giant Panda Breeding Base are being transported today, right?"

Ding Yue asked his secretary Wen Ruohan.

"Yes, Principal Ding,"

Wen Ruohan immediately nodded and answered, "They will arrive at Mist City Arts and Science University at twelve noon, Director Jia Nong has already made the relevant welcoming preparations."

The two giant panda cubs gifted by the Shu City Giant Panda Breeding Base will be specially delivered by the team of Shu City Giant Panda Breeding Base and then handed over at Mist City Arts and Science University.

This event had accumulated high popularity over the past few days, so whether it was Mist City or Shu City's television stations, or even NTS's reporters, they would all come to conduct interviews today.

"Principal Ding, it seems that NTS's reporters are coming too,"

Wen Ruohan suddenly remarked.

"Oh? Which reporter is NTS sending for the coverage this time?"

Ding Yue asked curiously.

Could it possibly be that previous one?

"It seems to be Reporter Wang Bingbing," Wen Ruohan answered.

Indeed!

Just as Ding Yue expected, it was indeed NTS's beautiful reporter Wang Bingbing. It seems NTS likes to send her to cover the news about Mist City Arts and Science University.

"Okay, after the giant pandas are transported from Shu City Giant Panda Breeding Base, have Director Jia Nong contact me, and I'll go right over,"

Ding Yue thought for a moment. Although this time, the specifics of gifting two national treasure giant pandas to his Mist City Arts and Science University were handled by the Dean of the Forestry Department, Director Jia Nong.

But since many television station reporters and numerous netizens were very interested,

then Ding Yue also needed to make an appearance, right?

"Of course, Principal Ding,"

Wen Ruohan nodded and sent a message to Director Jia Nong, conveying Principal Ding's intentions.

"Oh right, how is that naming contest we launched last time for the two Gunguns progressing? Those two Gunguns will be arriving soon."

Ding Yue inquired about the naming contest.

"Oh, Principal Ding, the names submitted by various faculties and students have started voting. Voting will end tonight at eight o'clock, and the name with the most votes will be the names for the two Gunguns, as you originally said,"

Wen Ruohan immediately responded in detail.

"Hmm, where can I see the voting data? On the official website?"

Ding Yue asked further.

"The official account is also possible," Wen Ruohan said as she took out her phone, opened the school's official account, and entered the national treasure giant pandas naming voting interface.

"Here, Principal Ding, take a look,"

Wen Ruohan held the phone, walked over, and handed it to Principal Ding to see.

Ding Yue glanced at it.

The naming contest for the two Gunguns currently had the first place as—

1. Wenwen, Lili, 17,936 votes
2. Feifei, Yueyue, 16,808 votes
3. Zai, Xiao Zai, 15,997 votes

4. Coco, Love, 10,422 votes

5. Huanhuan, Xixi, 8,713 votes

...

Good grief, Ding Yue looked through the naming contest rankings and thought, are these the names that the faculties and students of Mist City Arts and Science University came up with?

The caliber seems quite ordinary!

But then again, Ding Yue thought, for treasures like the national treasure giant pandas, the names should indeed not be too complex. Better yet, either repetitive or simple and memorable, ideally reflecting the adorable and charming qualities of the national treasure giant pandas.

In that regard, it seemed the top names in the contest were not so bad after all.

And these names each held a meaningful sentiment.

Chapter 1155: Are the Students of Our School at This Level? _2

For instance, the current top-voted names Wenwen and Lili are undoubtedly meant to reflect Mist City Arts and Science University itself, and therefore, only the words "Wen" and "Li" from the six characters of "Mist City Arts and Science University" could be taken, using a duplication of these terms.

Then comes the second name.

Feifei and Yueyue are also quite obvious, certainly derived from "Feiyue Group." After all, every teacher and student at Mist City Arts and Science University knows that behind it all is Principal Ding's Feiyue Group, and many students from Mist City Arts and Science University go on to work for Feiyue Group.

But this is a bit more indirect, given that these two national treasure giant pandas are sent to be cared for at Mist City Arts and Science University, which doesn't seem to have any direct connection to Feiyue Group at first glance.

However, there is an indirect connection, which is that Mist City Arts and Science University belongs to the private education sector of Feiyue Group.

Given a choice between these two names, Ding Yue naturally leans more towards Wenwen and Lili.

Of course.

Actually, Ding Yue's favorite among the top five names is the third one.

Yes, that's right, Zai and Xiao Zai.

This pair of names isn't a duplicative word, and it is also the only one among the top five names not constituted by duplicative word.

As for why Ding Yue likes Zai and Xiao Zai, there's no other reason than that they look pleasing and quite cute.

They are even better than the fourth-ranked names Coco and Ai'ai, which are too direct. Who came up with these names?

The real kicker is that these names have actually received ten thousand votes. The students of Mist City Arts and Science University are simply outrageous!

The fifth pair, Huanhuan and Xixi, are just too mediocre.

So, after looking over all the options, Ding Yue's two favorite names are Wenwen and Lili and Zai and Xiao Zai.

"Good grief, over eighty thousand people in our Mist City Arts and Science University and this is the best we can do? Can't we think of any better-sounding names?"

After muttering to himself, Ding Yue cast his own vote for Zai and Xiao Zai without hesitation.

Although that's what Ding Yue says.

In reality, were he to try to think of a name, he might not be able to come up with anything better than what's currently on the naming contest leaderboard.

"Principal Ding, which name did you vote for? I think the names for the national treasure giant pandas are all quite nice," Wen Ruohan asked expectantly.

"Of course, Zai and Xiao Zai. These two names are decent," Ding Yue responded.

"Hehehe, then I'll also vote for Zai and Xiao Zai."

After saying this, Wen Ruohan immediately followed Principal Ding's lead and voted for Zai and Xiao Zai as well.

Just after Wen Ruohan finished voting, she received a call from Director Jia Nong of the Forestry Academy, informing her that the giant pandas from Shu City Giant Panda Breeding Base were almost here.

"Alright, got it."

After hanging up, she turned around and said to Principal Ding, "Principal Ding, those two giant pandas from Shu City Giant Panda Breeding Base will be arriving at our school soon."

"That soon?"

Upon hearing this, Ding Yue stood up and then said, "Let's go."

"Okay-doke."

...

At this moment, on the ring road less than two kilometers away from University Town, a large transport vehicle specially designed for carrying two national treasure giant pandas was heading towards Mist City Arts and Science University.

The vehicle was escorted by police cars from the Mist City Police Department both in the front and back.

After all, these were national treasure giant pandas, and furthermore, they were a gift from Shu City Government to Mist City, which the Mist City Government highly valued.

About fifteen minutes later.

Ding Yue and his secretary Wen Ruohan arrived at the gate of Mist City Arts and Science University.

At this moment, Ding Yue saw many staff members wearing panda jackets at the school gate, which must have been organized by Director Jia Nong of the College of Forestry or the Academic Affairs Office.

There were also welcome banners, although the banners were somewhat special as they welcomed the two national treasure giant pandas from the Shu City Giant Panda Breeding Base but did not mention their names.

The reason was that the new names for the two national treasure giant pandas hadn't been finalized yet.

After donating two million yuan to the Giant Panda Fund, Mist City Arts and Science University had acquired the naming rights for the two national treasure giant pandas at the university.

"This is NTS, and we are currently standing at the main entrance of Mist City Arts and Science University. As you can see, many students of Mist City Arts and Science University are eagerly awaiting the arrival of the two national treasure giant pandas. It's reported that in just a few minutes, the two national treasure giant pandas from the Shu City Giant Panda Breeding Base will arrive at Mist City Arts and Science University. I am NTS reporter Wang Bingbing."

At the entrance of Mist City Arts and Science University, the beautiful reporter Wang Bingbing was conducting a live broadcast.

Not only that, but Mist City TV Station, Shu City TV Station, and even the official livestream of Mist City Arts and Science University were all streaming live from here.

Perhaps it was because Mist City Arts and Science University had more fame and popularity as an internet celebrity, that among the various livestreams, Mist City Arts and Science University's official livestream had the highest viewership.

Of course, the number of viewers watching the NTS live broadcast was also high.

But Ding Yue seriously doubted whether the audience going to the NTS livestream to watch the news was really there to watch the news. He was too embarrassed to expose them!

"Principal Ding!"

Upon seeing Principal Ding of Mist City Arts and Science University, NTS's beautiful reporter Wang Bingbing hurried over to prepare for an interview.

Wang Bingbing still remembered that the last time at Mist City Central Hospital, it seemed to be news about 3D bioprinting technology, where she had conducted an interview with Principal Ding.

"Hello."

After meeting the beautiful reporter Wang Bingbing again, Ding Yue greeted her.

It had to be said that NTS's Reporter Bingbing was truly beautiful!

No wonder wherever Wang Bingbing appeared in the news livestream, the viewership and ratings skyrocketed exponentially!

"Principal Ding, may I ask if your school has finished naming the two giant pandas sent from the Shu City Giant Panda Breeding Base?" Wang Bingbing interviewed Ding Yue and asked.

As for the naming of the two national treasure giant pandas that Mist City Arts and Science University gave to the Shu City Giant Panda Breeding Base, the netizens already knew about it, and this time, no one was stirring things up.

Even the Shu City Giant Panda Breeding Base had announced the news, and after all, Mist City Arts and Science University had donated to the Giant Panda Fund.

"Our school has already selected a few names for Gungun, but we are currently in the middle of voting by the teachers and students. The voting will end tonight at eight o'clock, and the name with the most votes will be the final name for these two Gungun," Ding Yue replied with a smile.

"So, we can currently see on the official website of Mist City Arts and Science University several names that have received over ten thousand votes, and some that are close to ten thousand. Principal Ding, which one do you think is more suitable for these two national treasure giant pandas?" Bingbing asked again.

Seeing Wang Bingbing ask this question, Ding Yue smiled and said, "Then I can only speak from my personal preference. I think 'Big Zai' and 'Little Zai' are pretty good, so I gave that name my vote."

When Ding Yue said this in Wang Bingbing's news livestream, the student who had nominated the names "Big Zai" and "Little Zai" screamed excitedly.

"Hahaha, look, even Principal Ding likes the name I submitted!"

Suddenly, many students from Mist City Arts and Science University who hadn't participated in the voting rushed to the university's official website and public platforms to vote for the name.

"They're here."

Just as Wang Bingbing was preparing to continue the interview with a few questions about the future care of the national treasure giant pandas, she heard Ding Yue say "They're here" and point to a spot not far ahead.

Following his direction, Wang Bingbing looked over,

as did the camera from NTS.

A police car could be seen leading the way at a short distance in front.

Following closely behind the police car was a specialized transport vehicle emblazoned with giant panda motifs. After all, they were transporting national treasure giant pandas, and the transport vehicle featured a giant panda theme.

"They're here, the giant pandas are here!"

Chapter 1156: Naming Pandas Today, Spaceships in the Future

All eyes turned toward the roadside not far ahead.

"Look, the giant pandas must be coming."

"Wow, a police escort for the way?"

"What did you expect? These are two national treasure giant pandas, way more precious than us."

"Hahaha, Gungun is really getting the VIP treatment."

"Loads of people are watching our school's live stream, our Mist City Arts and Science University is trending again."

"Hehehe, I'm one of the viewers in the live stream."

"Then let's join our school's live stream too, to boost its popularity."

As the transportation convoy from the Shu City Giant Panda Breeding Base slowly made its way toward the gates of Mist City Arts and Science University, the gathered teachers and students, the journalists from various major television stations, and the tourists who had heard the news, all became visibly excited.

The arrival of two national treasure giant pandas was truly a moment worth witnessing.

Normally, when national treasure giant pandas are sent overseas as a symbol of friendship between countries, they receive a grand welcome ceremony like this.

Upon learning that two national treasure giant pandas from the Shu City Giant Panda Breeding Base would arrive at Mist City Arts and Science University today, the teachers and students had spontaneously organized a welcoming party for them.

In fact, more students were mainly there to witness this moment.

Many netizens also made the trip from all over the country because Mist City Arts and Science University was already one of the must-visit landmarks in Mist City, and the chance to witness the arrival of the national treasure giant pandas drew even more people to the event.

There's no need to say much about the media journalists.

The news of the Shu City Giant Panda Breeding Base transporting the national treasure giant pandas to Mist City Arts and Science University had already gone viral a few days earlier.

If they didn't cover this story live, could they even call themselves part of the media?

"Let's go have a look."

Ding Yue approached after seeing the transportation convoy from the Shu City Giant Panda Breeding Base.

Very quickly.

The convoy from the Shu City Giant Panda Breeding Base came to a stop.

The most eye-catching vehicle was a large transport van adorned with a panda graphic; without a doubt, the two national treasure giant pandas were inside this van.

Today, they had flown from Shu City to Mist City, then were moved with specialized transport crates and vehicles to Mist City Arts and Science University.

Two black SUVs pulled up next to the transport vehicle, and out stepped the person in charge of this transportation operation, who was also a representative from the Shu City Giant Panda Breeding Base.

"Hello Principal Ding, Director Jia."

Upon approaching and seeing Principal Ding, the person with the surname Sun took the initiative to greet him.

Although Ding Yue didn't recognize this person with the surname Sun, seeing as Director Sun seemed acquainted with Director Jia Nong, he understood that Director Jia had probably been in communication with Director Sun throughout this period.

As for Director Sun knowing who Principal Ding was, that was hardly a surprise.

Since the reputation of Mist City Arts and Science University had been on the rise, the fame of Ding Yue naturally rose with it.

"Hello, Director Sun."

Director Jia Nong stepped forward enthusiastically, shaking hands with Deputy Director Sun.

"Director Jia, who is this?"

Ding Yue asked Director Jia Nong in a low voice.

"Principal Ding, this is Deputy Director Sun from the Shu City Giant Panda Breeding Base Research Institute. He's responsible for the entire process involving these two national treasure giant pandas."

Director Jia Nong immediately explained to Principal Ding.

"Oh, I see."

Ding Yue nodded slightly upon hearing this and then warmly said to Deputy Director Sun, "Deputy Director Sun, welcome for bringing the two national treasure giant pandas to Mist City Arts and Science University. Our entire school, both teachers, and students, have been eagerly anticipating their arrival, and today they're finally here."

"Hahaha, Principal Ding, the journey was quite smooth. Are we going to take a moment for media coverage and interviews now?"

Deputy Director Sun laughed and asked Principal Ding.

"Yes, that would be fine."

Seeing the news media journalists from various TV stations making their way toward the large transport vehicle, Ding Yue nodded.

"You've had a long trip; take a good rest after we've completed the handover."

Ding Yue continued chatting with Deputy Director Sun.

At that moment, Wang Bingbing, the attractive reporter from NTS, came over to interview Deputy Director Sun from the Shu City Giant Panda Breeding Base.

Seeing this, Ding Yue stepped aside to let the beautiful reporter Wang Bingbing proceed with the interview.

Now was the moment for the Shu City Giant Panda Breeding Base's arrival at Mist City Arts and Science University to be witnessed and covered.

But in a short while, the convoy would continue into the school to reach the Sunny Lawn, where professional teams from Mist City Arts and Science University and the Shu City Giant Panda Breeding Base would work together to transport the two giant pandas to their bamboo grove habitat.

There lied their new home.

There, Ding Yue had had the architectural college of Mist City Arts and Science University, which was the Feiyue Building team, construct a specialized giant panda sanctuary.

NTS and other TV stations from Mist City and Shu City spent roughly ten minutes covering and reporting on the event.

Chapter 1157: Naming Pandas Today, Spaceships in the Future _2

Then Deputy Director Sun hurried over and found Principal Ding, asking, "Principal Ding, shall we transport them over now? Where specifically should they be?"

"Alright, your convoy can just follow ours."

Ding Yue promptly nodded, then headed to the Mist City Arts and Science University car that had been prepared here in advance. He personally drove, leading the convoy from the Shu City Giant Panda Breeding Base, slowly entering his own Mist City Arts and Science University.

Several TV station vehicles hurriedly followed.

Wow!

As the transport convoy from the Shu City Giant Panda Breeding Base entered Mist City Arts and Science University, thunderous applause erupted like a tidal wave from among the crowd of students on both sides.

The students warmly welcomed the arrival of the two national treasure giant pandas.

The applause and cheers rose and fell continuously, and some students even fired crackers loudly, making the scene extremely lively and celebratory.

About ten minutes after entering Mist City Arts and Science University,

Ding Yue drove the convoy from the Shu City Giant Panda Breeding Base all the way to the Central Sports Ground. Along the way, many students stopped on the roadside to watch.

All of the more than 80,000 faculty and students knew that the two national treasure giant pandas had already arrived at Mist City Arts and Science University.

Although not all of the more than 80,000 faculty and students came to see them, as many students still preferred to sleep in a bit more in their dormitories,

the throngs of students packed along the roadside illustrated just how popular the arrival of the two national treasure giant pandas was.

After reaching the Central Sports Ground, the convoy had to stop as there was only a narrow road leading to the bamboo grove panda feeding base.

After parking the car, Ding Yue got out and approached the black SUV of Deputy Director Sun from the Shu City Giant Panda Breeding Base.

"Director Sun, our cars can only go up to here. To get them to the bamboo grove feeding base, we'll need to change to a different mode of transportation to take the two national treasure giant pandas there,"

Ding Yue explained the situation to Deputy Director Sun.

"Mhm, okay."

This point had already been prepared for by the Shu City Giant Panda Breeding Base, as they had previously sent an inspection team.

The inspection team had thoroughly understood the specific situation of Mist City Arts and Science University.

Although after arriving here, the large transport vehicles could not drive further, they could unload the transport crates containing the two national treasure giant pandas from the large transport vehicles and then move them to the bamboo grove panda feeding base using special crate transport vehicles.

"Come on, get ready, prepare to unload."

Deputy Director Sun signaled to the workers from the Shu City Giant Panda Breeding Base, along with the workers brought by Director Jia Nong, and the staff from both sides began preparing to unload the two national treasure giant pandas.

At this moment, a worker from the Shu City Giant Panda Breeding Base opened the large transport vehicle's door.

The beautiful NTS reporter Wang Bingbing, along with a cameraman, also hurried over to this side.

"It's time to open the crates!"

"Hahaha, congratulations to the two Gunguns on their arrival at Mist City Arts and Science University!"

"Welcome to your new home!"

"They're opening the crates; we'll soon see the two giant panda cubs."

"Wow, I'm so excited!"

"Wuwuwu, this unboxing is simply enviable!"

Netizens affectionately referred to the moment the panda transport crates were unloaded as "unboxing", and they exclaimed that it was the first time they saw such a grand unboxing, with the national treasure giant pandas being unboxed!

Ding Yue was watching the unloading of the national treasure giant pandas, when at that moment, his secretary Wen Ruohan approached him.

"Principal Ding."

"What's the matter?" Ding Yue asked with a furrowed brow.

"A phone call from Vice Deputy Chen of the Aerospace Bureau."

Wen Ruohan gestured with the cellphone in her hand and then handed it to Principal Ding.

Just a while ago,

Vice Deputy Chen of the National Space Administration had made a phone call, which was directed to Wen Ruohan, Ding Yue's secretary, saying that he needed to talk to Principal Ding.

"Oh, oh."

Ding Yue nodded and then took over the phone to answer the call, "Hello, Deputy Chen, this is Ding Yue."

"Principal Ding, I heard that your school received two national treasure giant pandas today?"

Over the phone, Deputy Chen asked about this matter.

This puzzled Ding Yue.

The National Space Administration, why would they be interested in this?

One is the National Space Administration, dealing with the national aerospace business, and the other is the Shu City Giant Panda Breeding Base, the nation's treasure; the two seemed completely unrelated.

"Ah, yes, they have already arrived at Mist City Arts and Science University," Ding Yue replied, although he did not know why Deputy Chen was asking about this.

"This is a good thing for your Mist City Arts and Science University, but today, I have another piece of good news for you."

Deputy Chen said with a smile.

"Oh?"

Upon hearing this, Ding Yue seemed to realize something.

No wonder Deputy Chen suddenly asked about the arrival of the national treasure giant pandas at his Mist City Arts and Science University today; there was indeed a reason.

Looking at this, it seemed that Deputy Chen was about to bring him some good news?

"The Shu City Giant Panda Breeding Base brought you this joyous event, so today, the National Space Administration will also bring you a piece of good news,"

Deputy Chen continued with a smile, "After research by the National Space Administration, the demand for graphene over the next three to five years, as well as the demand for aerospace technical talents, is going to double from our previously agreed requirements. Furthermore, apart from Professor Qian Jianlin and his team, another group of expert professors are also interested in going to your Mist City Arts and Science University to cultivate excellent talents for our national aerospace projects!"

Ding Yue listened attentively and was thrilled.

What did Deputy Chen's words imply?

It implied that the collaborative relationship between the aerospace academy of Mist City Arts and Science University and the National Space Administration would be further strengthened.

Even the National Space Administration seemed intent on fostering the aerospace faculty at Mist City Arts and Science University.

"Really? That's wonderful, Deputy Chen. Rest assured, now that our Feiyue Group's graphene production line is maturing, we can perfectly provide the graphene materials needed by the National Space Administration, no matter the quantity. Also, special thanks to the expert professors of the National Space Administration for having such high regard for our aerospace faculty at Mist City Arts and Science University,"

Ding Yue said sincerely from the bottom of his heart.

For his Mist City Arts and Science University's aerospace academy, this was like adding wings.

"Well, I just wanted to inform you of our decision at the National Space Administration. Principal Ding, you must be very busy right now, so I'll not disturb you further,"

After finishing, Deputy Chen hung up the phone.

Ding Yue was still very excited after he ended the call.

"Principal Ding, what did Deputy Chen say?" Secretary Wen Ruohan asked curiously.

She clearly sensed that Principal Ding seemed quite excited at the moment.

"Our aerospace faculty at Mist City Arts and Science University is about to flourish,"

Ding Yue said excitedly to his secretary Wen Ruohan.

"Ah?"

Wen Ruohan was slightly stunned and took a moment to comprehend.

"The arrival of the national treasure giant pandas today is good news for our Mist City Arts and Science University, and the National Space Administration has brought us another piece of good news. Today we will be naming the national treasure giant pandas, and in the future, we will also have the opportunity to name our Xia Country's spacecraft!"

Ding Yue said spiritedly.

Hiss!

Although Wen Ruohan did not know what had happened, she felt her own blood boiling after hearing Principal Ding speak.

"Yue, what are you talking about over here? Director Jia Nong just said that after the two giant pandas are sent to the bamboo forest breeding base, he wants you to say a few words. Will you go over and speak?"

At this moment, Huang approached them from a distance and asked.

"Ah?"

Upon hearing this, Ding Yue snapped back to reality, then nodded and said, "Alright, I'll say a few words. On such a great day, how can I, as the principal, not speak?"

Chapter 1158: Voting Results Are Out, It's This?

Mist City Arts and Science University.

At this moment, thousands of people were gathered at the Central Sports Ground, most of whom were teachers and students from Mist City Arts and Science University.

There were also some tourists who came to Mist City Arts and Science University for sightseeing, along with news media journalists from various major television stations, and personnel from the Shu City Giant Panda Breeding Base.

On the presidential platform at the Central Sports Ground, a red banner was hung, bearing the words — "National Treasure Panda Welcome Ceremony."

After all, the two national treasure pandas from Shu City Giant Panda Breeding Base had been delivered and successfully transferred to the bamboo forest panda feeding base using transport boxes, which officially handed them over to Mist City Arts and Science University.

Therefore, holding a welcome ceremony was necessary.

From the moment those two national treasure pandas arrived at the gate of Mist City Arts and Science University, they received a warm welcome from the vast number of teachers and students of Mist City Arts and Science University.

This ceremony being conducted was the formal welcome.

More and more students from Mist City Arts and Science University arrived at the Central Sports Ground.

You should know that this Central Sports Ground is the largest sports ground of Mist City Arts and Science University, capable of accommodating over tens of thousands of people.

Ding Yue hadn't specifically prepared a welcome speech script for this national treasure panda welcome ceremony.

Just improvising a little would do.

Moreover, Ding Yue just received a call from Deputy Chen of the National Space Administration, who brought another piece of good news to Ding Yue.

Today was truly a double celebration for Mist City Arts and Science University.

The first joy was, naturally, the official arrival of the two national treasure pandas.

The second joy was what Deputy Chen told Ding Yue: the National Space Administration would expand the scale of cooperation with Mist City Arts and Science University and Feiyue Group. In addition to the team of expert professors led by Qian Jianlin, there would also be new experts and professors from the National Space Administration willing to become distinguished professors at Mist City Arts and Science University.

This undoubtedly provided a huge driving force for the aerospace program of Mist City Arts and Science University!

At this national treasure panda welcome ceremony, the head of the College of Agriculture and Forestry at Mist City Arts and Science University, Jia Nong, said a few words, and then Deputy Director Sun of the Shu City Giant Panda Breeding Base also spoke briefly.

"Principal Ding, it's your turn now, please say a few words."

Director Jia Nong came to Principal Ding's side, reminding him that it was his turn to speak shortly.

"Alright."

Ding Yue nodded and then mentally prepared himself.

Soon after, Deputy Director Sun from the Shu City Giant Panda Breeding Base finished speaking.

Then it was Ding Yue's turn.

Ding Yue proceeded very solemnly to the very center of the presidential platform. At this moment, several television station cameras, including a live camera from NTS, were aimed at him.

However.

This had already become a common occurrence for Ding Yue.

Had it been the Ding Yue from a few years ago, he might have been quite nervous being under the focus of so many news media cameras.

But over the years since he had started managing his own Mist City Arts and Science University, Ding Yue's mindset had steadily matured; although still appearing very young, anyone with a bit of insight could see that Principal Ding was not merely as simple as his young age would suggest.

This was a man who, despite his youthful appearance, had a steady interior and powerful capabilities.

At least, many who had met Principal Ding had remarked as such, even Governor Li of the Mist City Government had praised Ding Yue in this way.

"Ahem."

As per usual routine after taking the stage, he coughed lightly before the microphone and then began his formal speech.

"Today is an important day as the two national treasure pandas from Shu City Giant Panda Breeding Base arrived at our Mist City Arts and Science University. Welcome all major media, social figures, and our university's teachers and students gathered here to celebrate the arrival of the two national treasure pandas."

Ding Yue began to speak.

All the people in the Central Sports Ground looked at this young university president and listened attentively to his speech.

"I heard that the young principal of Mist City Arts and Science University is no ordinary person."

"Isn't that right, he has a very strong presence."

"How can you tell he has a strong presence? Why do I only see how incredibly handsome Principal Ding is—truly handsome."

"Uh, you're so lovesick!"

"I must say, the development of Mist City Arts and Science University in recent years has been extremely rapid and powerful!"

"Today is a day worth remembering for us students of Mist City Arts and Science University."

"Yes, yes, it's an honor to witness the arrival of the national treasure pandas to my alma mater, oh my, this is something I can boast about to others after I graduate."

As soon as Principal Ding began to speak, various discussions sprung up among the audience.

After delivering a series of welcome remarks, Ding Yue had almost fully expressed his own and Mist City Arts and Science University's many students' endless welcoming feelings towards the two national treasure pandas.

At this moment, the applause was thunderous.

After all, Principal Ding's speech was quite symbolic.

Besides sharing Mist City Arts and Science University's heartfelt welcome for the two national treasure pandas from Shu City Giant Panda Breeding Base, Ding Yue also specifically mentioned the friendly relations between Shu City and Mist City.

Chapter 1159: Voting Results Are Out, It's Actually This? _2

Furthermore, Ding Yue compared Mist City Arts and Science University and the two national treasure giant pandas to the bond between Mist City and Shu City.

Indeed, that was exactly the case.

The gifting of the national treasure giant pandas between Shu City and Mist City was meant to establish a bond, and this bond was none other than Mist City's own Mist City Arts and Science University, as well as the two national treasure giant pandas from Shu City.

"The arrival of the two national treasure giant pandas is a fortunate event for our Mist City Arts and Science University, but today we have more than one piece of good news. Let me digress for a moment, today, our Mist City Arts and Science University and the National Space Administration will embark on a broad and deep cooperation in the field of aerospace. What does this mean? I think I don't need to spell it out. On the occasion of these two happy events, I want to say to the students of Mist City Arts and Science University, and to this institution of higher learning, strive hard, for our future is limitless!"

Upon these words from Ding Yue, a thunderous applause broke out from the vast number of students at the Central Sports Ground of Mist City Arts and Science University.

"Holy shit! Principal Ding's words are kind of stirring, aren't they?"

"Study hard, shine bright, we must do our duty!"

"It's a pity, I am not from the Aerospace College."

"Mommy, being a student of the Aerospace College, I'm already pumped up at this moment."

"I have to say, Principal Ding has really started to pay attention to our Aerospace College this past year."

"Yeah, yeah, I heard that the National Space Administration has taken a particular interest in our Aerospace College at Mist City Arts and Science University."

"Principal Ding is all about focusing on the majors that the country needs to develop!"

"The key is that these are all expensive and challenging fields to work in. Principal Ding is truly awesome!"

Although Ding Yue's speech just now, about the deep cooperation between Mist City Arts and Science University and the National Space Administration, seemed unrelated to the arrival of the national treasure giant pandas, there seemed to be a slight connection.

"Tonight at eight o'clock, the entire faculty and student body of Mist City Arts and Science University will complete the voting process for naming the two national treasure giant pandas. The results will be announced in real-time through our school's official website, public accounts, and official accounts on various platforms. Ladies and gentlemen, today we name giant pandas, and in the future, we may also have the opportunity to name spacecraft!"

Ding Yue suddenly linked the topic of the national treasure giant pandas with the topic of aerospace.

Two seemingly unrelated subjects, at this moment, seemed so fittingly intertwined, and the students' emotions were ignited by Principal Ding's speech.

Even the viewers in the NTS live broadcast room and the Mist City Arts and Science University live broadcast felt compelled to respond with a barrage of comments.

"Holy crap! This Principal Ding has something in his speech."

"What's he talking about? Completely off-topic."

"Don't you get it?"

"He used this national treasure welcome ceremony to give a BUFF-like motivation to the whole faculty and students. You have to admit, Principal Ding is really a master when it comes to public speaking."

"A textbook example of public speaking!"

"Look at how our principal speaks, how stirring and spirited he is, and then look at other universities' principals, putting people to sleep with their speech."

"Damn, that was really quite impressive."

"Who was it that said Principal Ding was incompetent?"

"This Principal Ding has some real skills."

"Goodness gracious, it's more than just a couple of skills!"

"The guy's a public speaking pro, plus he's got a master's degree from Qinghua University, and he's worth millions. Who are you to say he's no good?"

"After watching today's live broadcast, I've gone from a passerby to a fan of Principal Ding."

"I saw a lot of people blindly criticizing Principal Ding before, but after watching the live stream today, my God, those critics must be the ones who are brainless, right?"

Two minutes later.

Ding Yue's speech had ended, and the welcome ceremony for the national treasure giant pandas gradually drew to a close.

NTS, Shu City TV Station, and Mist City TV Station subsequently visited the bamboo panda feeding base to see the two national treasure giant pandas and interviewed the panda care team from Mist City Arts and Science University.

During the interview with the TV stations, every member of the panda care team from Mist City Arts and Science University displayed their professional expertise, so much so that no one could find a single fault.

This was something that Director Jia Nong had stressed; today, there must not be a single slip-up. In the days to come, while taking care of these two national treasure giant pandas, they must maintain the same standard without the slightest error.

The news about the two national treasure giant pandas moving into Mist City Arts and Science University dominated today's news and became a major trending topic on Twitter.

By evening, the related topics were still very much trending.

Many netizens were also very interested in what names the teachers and students of Mist City Arts and Science University would eventually choose for these two national treasure giant pandas.

Eight o'clock in the evening.

Ding Yue too was awaiting the results of the naming contest.

Xu Bin was leading a team in professionally analyzing the big data of the votes, ensuring that all the votes were cast by the teachers and students of Mist City Arts and Science University, making the process seem more fair.

Otherwise, if netizens also voted through Mist City Arts and Science University's public WeChat account program, it could not be guaranteed that the names were chosen by the teachers and students of Mist City Arts and Science University.

Principal Ding had said that after the arrival of the two national treasure giant pandas, the teachers and students of Mist City Arts and Science University would name them and choose a name.

Having said that, he had to follow through – this was one of Principal Ding's leadership principles in the development and construction of Mist City Arts and Science University!

After all, as principal, he naturally had to lead by example!

"Xiao Wen, have the results of the naming contest come out yet?"

Principal Ding sent a voice message to his secretary Wen Ruohan from his apartment room.

Because Bin might still be working on the data analysis of the votes, Principal Ding did not ask him directly.

About a minute later, Secretary Wen Ruohan made a voice call.

"Principal Ding, the results of the naming contest from Director Xu's side are out!"

As soon as the voice call connected, Secretary Wen Ruohan's voice came through.

"Oh? What are the names?"

Principal Ding had been anticipating the final results of the naming contest since he hadn't looked at the voting data from day until eight o'clock in the evening.

"Principal Ding, you would never guess. 'Zai' and 'Xiao Zai' overtook 'Wenwen' and 'Lili' in today's voting and ultimately 'Zai' and 'Xiao Zai' won the highest number of votes!"

Secretary Wen Ruohan said excitedly.

"Hahaha, it seems that the students of Mist City Arts and Science University have quite the eye for names."

Upon hearing this, Ding Yue immediately burst into laughter.

You see, Ding Yue himself had voted for the names 'Zai' and 'Xiao Zai'.

What Ding Yue did not realize, however, was that his vote for 'Zai' and 'Xiao Zai' had indeed influenced the students.

More and more students felt today that 'Zai' and 'Xiao Zai' indeed sounded cuter.

As for 'Wenwen' and 'Lili', although they had some connection to the name of Mist City Arts and Science University, they seemed a bit odd to the ear.

Of course, there were those who said that 'Wenwen' and 'Lili' were actually quite good names, signifying that the two national treasure giant pandas at Mist City Arts and Science University, a private university that has nurtured many talents, would become two scholarly pandas, one educated in arts and the other in science!

But, in the end, the cute names 'Zai' and 'Xiao Zai' staged a comeback against 'Wenwen' and 'Lili,' thus emerging as the final winners in the naming vote for the two national treasure giant pandas at Mist City Arts and Science University.

And so.

Principal Ding immediately instructed Director Liu Hongxia of the Publicity Department of Mist City Arts and Science University to announce the official naming of the two national treasure giant pandas sent from Shu City Giant Panda Breeding Base to the entire school and the public online!

Chapter 1160: The Architecture Institute is Short on Staff

Two days later.

The two pandas at Mist City Arts and Science University, Zai and Xiao Zai, continuously maintained their popularity.

Many tourists from all over the country made special trips to Mist City Arts and Science University just to see these two adorable national treasures.

Suddenly, the hotel accommodations at Mist City Arts and Science University became somewhat strained.

Unfortunately, the newly-constructed hotel building was not yet completed, otherwise, the University could have made a substantial profit from the popularity of Zai and Xiao Zai.

The hotel building, constructed next to the Central Sports Ground of Mist City Arts and Science University, is slated to be completed next year, ensuring that participants from all over the country will have a nice hotel environment during the National University Sports Games held at the University.

Despite the ongoing buzz about the adorable pandas, Zai and Xiao Zai, at the University,

as the day of the League of Legends S World Championship final approached, everyone gradually started to pay attention to the ultimate showdown between the school's FY team and the Big Tiger team from Korea.

Today.

Ding Yue will set off for Korea. The finals are extremely important for both the FY team and Mist City Arts and Science University, and as the owner of the FY team, Ding Yue naturally wants to be there to witness the event.

Winning would mean witnessing the glory of the first professional esports team cultivated by Mist City Arts and Science University becoming world champions—an incredibly significant moment indeed.

Of course, that's assuming they win.

The Big Tiger team from Korea is not an easy opponent. The last time, during the Mid-Season Championship, Ding Yue's FY team lost to the Big Tiger team.

What's key is that this S World Championship is being held in Korea, giving the Big Tiger team a home ground advantage and a morale boost.

But that's not a problem.

Ding Yue believed that such a slight home and away advantage would not significantly affect his own FY team's five players.

"Principal Ding, the luggage is all ready."

In the Principal's office of the Administration Building, Secretary Wen Ruohan came over and said to Principal Ding.

As the Principal's personal secretary, Wen Ruohan was naturally making sure everything was prepared for the trip.

"Can't we bring Big White?"

Ding Yue looked at Secretary Wen Ruohan and asked.

Initially, Ding Yue had planned to bring his intelligent robot Big White along, but because of the robot's uniqueness, and the complicated procedures involved in traveling abroad to Korea, the idea of bringing Big White to witness the League of Legends S World Championship final became rather difficult to realize.

"Principal Ding, we can't bring Big White. Korea is delaying the approval, so we can't bring Big White,"

Wen Ruohan shook her head.

Big White was no longer the same as before. If it was the previous version that hadn't undergone upgrades, perhaps there wouldn't be an issue, considering it was just a robot that used lithium batteries.

But now it was different. Big White's materials, including its graphene battery and especially the fact that it was an artificial intelligence robot, made Korea naturally unwilling to allow such a robot onto their territory.

"Well, alright then."

Ding Yue shrugged helplessly and then said to Big White, "Big White, I'll be going abroad for a few days to cheer on our FY team in person. You wait here for me to come back, okay?"

"Okay, Principal!"

Big White replied.

"Principal Ding, for your safety, although Big White can't come, I've arranged for Sun Chengkang to go with us to Korea,"

Wen Ruohan said with a smile.

"Good."

Ding Yue nodded slightly.

If he could have brought Big White, Ding Yue wouldn't have to worry about any danger while overseas, as Big White could protect him, and Ding Yue trusted Big White completely.

Unfortunately, since Big White couldn't come, bringing the martial arts expert Sun Chengkang was also fine.

Although Ding Yue wasn't some high-profile individual, nor did he have enemies who could pose a threat to his personal safety, being cautious about safety while traveling was still prudent.

Ding Yue had previously discussed with his two friends, Xu Bin and Huang Youjie.

There could indeed be a "danger" in going to Korea.

It should be noted that in Korea, there is a huge enterprise called Tri-Gold Group, and their products, which naturally involve "batteries,"

pose a potential threat to any tech company globally that relies on batteries, just like the graphene batteries from Mist City Arts and Science University.

Tri-Gold Group in Korea obviously has close ties with America and would not use Ding Yue's graphene batteries. But that doesn't mean that there won't be any accidents during Ding Yue's trip to Korea.

However, It could also just be Ding Yue and his friends worrying too much.

But bringing Sun Chengkang at least ensured some level of personal safety during the trip.

"What about Huang?"

Ding Yue looked at his secretary Wen Ruohan and asked.

Bin wouldn't go to the live match this time because he needed to spend more time at the University working on several projects, which kept him very busy.
