

## F. University 1371

Chapter 1371: Hacker Intrusion Incident! \_2

Xu Bin, sitting next to Ding Yue, was analyzing the situation with a serious expression on his face.

"Indeed."

Ding Yue nodded, fully agreeing with Xu Bin's analysis.

His own Mist City Arts and Science University basketball team wasn't exactly at the NBA level, after all. These young people were just setting sail, and the future was long, with a lengthy road ahead for them to continuously grow on.

As for Qinghua University, their School Basketball Team was truly formidable, estimated to be just slightly weaker than the CBA professional teams.

That being said, Mist City Arts and Science University's basketball team was just a notch below the CBA teams. With a bit more effort, Ding Yue felt that there was a chance for his university's team to break into the CBA.

Like the football team.

"Go! Go!"

While Ding Yue was discussing the strengths of Mist City Arts and Science University and Qinghua University's basketball teams with Xu Bin and Huang Youjie, he heard a familiar cheering voice nearby.

"Xiao You?"

Ding Yue looked towards the source of the voice and indeed saw his sister Ding Xiaoyou in the spectator stands.

"Brother?"

Ding Yue heard someone calling him and turned his head to see, and lo and behold, it was none other than his brother, Principal Ding.

"Aren't you usually uninterested in basketball? Why did you decide to come watch the game today?" Ding Yue shrugged his shoulders and said to his sister Ding Xiaoyou, "Isn't it better to do some experiments in the lab?"

With Ding Xiaoyou's capabilities, she was indeed better suited to the laboratory, a place fit for a genius like her.

"Well, it's because my friend Cai likes a guy from the basketball team and insisted on dragging me here to watch the game." Ding Xiaoyou spread her hands and glanced at a beautiful girl next to her as she spoke.

Ding Yue also glanced at the girl next to his sister Ding Xiaoyou, who indeed was quite pretty. Her name was Cai, a friend that Ding Xiaoyou met this year, and they got along quite well.

"So that's the reason."

Ding Yue nodded thoughtfully after he learned the reason behind Ding Xiaoyou's presence at the Central Sports Stadium to watch the basketball game.

Then, Ding Yue asked, "By the way, Xiao You, how's that project going, the one I asked you to improve and upgrade?"

"I'm still working on it. Recently, the school has been organizing the National University Sports Games, so there hasn't been much time to work on it."

Ding Xiaoyou replied lazily.

Recently, ever since the May Day holiday, Ding Xiaoyou had been spending much less time in the laboratory than before. It was sort of like giving herself an extended break, especially since her brother's project didn't seem to be in a rush.

Commercializing the cold fusion energy device wasn't going to be an easy task.

"Oh, just make sure you keep an eye on it, alright?"

Ding Yue reminded his sister Ding Xiaoyou.

After all, the dream of becoming like Iron Man still burned ardently in Ding Yue's heart.

And equipment like Iron Man's, if it were to be commercialized, would be far too costly. So, Ding Yue planned to use the cold fusion energy device for his personal use, just like the artificial intelligence robot Big White.

At that moment, a cheer erupted from the crowd.

Ding Yue focused and saw his Mist City Arts and Science University scored a three-pointer.

"Nice!"

Ding Yue also immediately joined the applause and cheering.

With that three-pointer, their lead increased to six points.

However, in the subsequent course of the game, Qinghua University kept up a tight chase, and even managed to take the lead at one point. Due to the intense competition, both sides ended up with relatively low total scores.

Ding Yue estimated that by the end of this final game, the score for both teams probably wouldn't exceed triple digits.

"Looking at it, Qinghua University has been closely trailing the whole time, and won't know who can win the game until the very last moment."

Ding Yue watched the game and couldn't help but reflect on it.

Just as Xu Bin was about to respond, suddenly his phone rang.

"I need to take a call."

Xu Bin took out his phone and stood up, walking to the entrance of the spectator stands in the stadium; after all, it was indeed too noisy inside to hear clearly.

"Hello, Xiaoqing, what's up?"

Xu Bin answered the phone and asked,

The person calling was Xu Bin's assistant, Xiaoqing.

Initially, Xiaoqing was just Xu Bin's assistant in administrative matters, but later she also became his assistant in computer-related affairs, now her status was akin to Ding Yue's personal secretary, Ruohan.

"Director Xu, there's a problem with the computer research lab."

On the phone, Xiaoqing spoke anxiously.

"What? What problem could there be with the computer research lab? Could it be a security accident?" Xu Bin quickly asked.

"No, the computers in the research lab have been hacked," Xiaoqing hurriedly replied.

"Hacked?"

Upon hearing this, Xu Bin frowned slightly and said, "Let Chen Jun and Ouyang Chen handle it."

Ever since the computer department of Mist City Arts and Science University became its ace department, the computer equipment and servers in its computer lab had faced frequent attacks.

Perhaps this was the so-called 'more popularity brings more trouble.' However, for the computer science department of Mist City Arts and Science University, such attacks were merely a minor annoyance, not at all frightening.

Therefore, Xu Bin directly assigned Chen Jun and Ouyang Chen from the computer department to take care of it, without any need for his own intervention.

In fact, Xu Bin thought that even assigning Chen Jun and Ouyang Chen to handle it was an overqualification, given that they were the top genius students that Xu Bin had personally trained.

"But Director Xu, Chen Jun and Ouyang Chen have already looked at it and said it's not easy to solve," Xiaoqing continued.

"What? Even Chen Jun and his group can't handle it? Who's hacking our computer system?" After hearing this, Xu Bin felt that the situation might not be as simple as it seemed.

He then thought about the timing of this incident.

After all, tomorrow was the day when the artificial intelligence robot Big White from Mist City Arts and Science University and the AI robot AlphaGo from Google Company in the United States would face off.

It was precisely at this time that the computers of his computer department had been hacked.

The situation was probably not so simple after all!

"Yes Director Xu, they told me to contact you immediately and have you come over," Xiaoqing said.

"Alright, I'll report this to Principal Ding and then come right away."

After finishing speaking, Xu Bin hung up the phone and immediately turned around, heading towards the spectator seats inside the Central Sports Stadium.

"Beautiful! What a beautiful three-pointer!"

Ding Yue was excitedly watching the game, and the entire crowd cheered after another three-pointer went in.

Because of that three-pointer, Mist City Arts and Science University had overtaken the score again, temporarily leading once more.

Today's basketball championship game was unfolding with alternating temporary leads between Mist City Arts and Science University and Qinghua University.

"Yue Brother!"

Xu Bin came up to Ding Yue and called out.

After the first call, perhaps the cheers from the crowd were too strong, and Ding Yue did not hear him.

"Yue Brother."

Xu Bin called out again, then reached out and tapped Ding Yue on the shoulder.

Ding Yue felt someone tapping his shoulder, and then turned around to see that it was Xu Bin, who had returned from taking the call, and asked, "What's the matter, Bin?"

"Yue Brother, there's trouble."

Xu Bin frowned deeply, with a serious expression.

"What? What kind of trouble?"

Upon hearing something troubling had happened, Ding Yue's nerves involuntarily tensed up.

After all, before this, his Mist City Arts and Science University really had had its share of troubles, but fortunately, all past issues had been resolved well.

"Our computer research lab's computers and servers have been invaded by hackers."

Xu Bin reported directly.

Chapter 1372: The Game Among Top Hackers

"What? Hacked?"

Ding Yue was also somewhat surprised.

This kind of thing, Ding Yue was hearing for the first time. Although similar incidents had happened before, they were essentially minor intrusions that Xu Bin couldn't be bothered to report to Ding Yue.

"It's possible that this hacking incident isn't so simple."

Xu Bin said earnestly, "Yue, I need to rush over now to see the situation. If it can't be resolved promptly, it will be a huge blow to the computer system of Mist City Arts and Science University."

"Alright, let's go take a look together."

Ding Yue had already lost interest in watching the basketball final. At any rate, the outcome would be revealed after the game, and his Mist City Arts and Science University basketball team had shown their mettle even without his presence.

At this moment, solving the hacking invasion was more critical.

"Okay."

Xu Bin nodded, then turned and walked towards the exit of the Central Sports Stadium.

Ding Yue immediately followed, along with Huang Youjie, secretary Wen Ruohan, and his sister Ding Xiaoyou. They knew about the hacking incident and all left the Central Sports Stadium together, heading towards the computer lab building.

"Bin, for this hacking invasion, how much information do we have? And, could we lose the various confidential data stored in our servers at Mist City Arts and Science University?"

Ding Yue asked with concern.

After all, the computer servers at Mist City Arts and Science University stored numerous data materials related to scientific projects. If these data were lost, the impact and damage would be incalculable.

For instance, the photolithography experiment project—if data related to it were lost after the hacking, wouldn't that be disastrous?

"Rest assured, Yue. Our computer servers at Mist City Arts and Science University have dual firewalls set by me. Even if they are hacked, it would be very difficult for them to break through the first layer, not to mention the second firewall."

Xu Bin confidently stated.

Regarding the security of confidential data stored on the servers at Mist City Arts and Science University, Xu Bin was very confident. After all, he occasionally claimed to be the best computer programmer in the world. If he couldn't even ensure the security of the data, wouldn't that be shooting himself in the foot?

"That's good, that's good."

Upon hearing this, Ding Yue was finally able to relax.

As long as the confidential data inside the servers at Mist City Arts and Science University were secure, he could be at ease.

"So next, should we investigate who exactly managed to invade our computer system?"

Ding Yue asked further.

"Yes."

Xu Bin nodded and said, "Chen Jun and Ouyang Chen mentioned that tracing the hacking scenario is tough; it appears the adversary isn't someone to be taken lightly. I suspect, it must be one of the top hacker teams globally."

"The top hacker team globally?"

Ding Yue suddenly frowned and reconfirmed with Xu Bin, "Since that's the case, can you really guarantee that our data will not be invaded?"

"Rest easy, Yue. The first firewall is currently one of the hardest to crack in the world, and the second firewall requires physical breach to be compromised."

Xu Bin said with a hint of a smile.

Upon hearing about physical breach, a weight was lifted off Ding Yue's heart.

Physical breach meant that to access the data in the servers of Mist City Arts and Science University, one needed to physically operate the system manually. Like launching a nuclear missile, mere programming commands wouldn't suffice; manual action was required.

This level of security was virtually fail-safe.

"That's excellent."

Seeing Xu Bin so confident, Ding Yue felt that no major problems could occur: "Let's quickly go and check."

The group arrived at the parking lot of the Central Sports Stadium, then got into Ding Yue's Feiyue Future New Energy car and Xu Bin and Huang Youjie's Feiyue Future New Energy cars, heading towards the computer lab building.

After all, there was a considerably good distance from the Central Sports Stadium to the computer lab building; walking would take quite some time, so driving was much faster.

Within three minutes, Ding Yue drove his Feiyue Future New Energy car and arrived at the base of the computer lab building. Then, together with Xu Bin and others, they went upstairs to the computer lab.

"Principal Ding, Director Xu, Director Huang."

Upon seeing Principal Ding and others, Chen Jun and Ouyang Chen from the computer lab quickly came forward to report the situation: "Principal Ding, Director Xu, right now they are attacking the first layer of our server's firewall, and the assault is fierce."

"Have you located where these hackers are from?"

Xu Bin immediately looked towards Chen Jun and Ouyang Chen, asking.

Firstly, it was necessary to determine who was invading their computer systems, so they could better counterattack.

"Ouyang Chen and I can only confirm that the invaders are coming from somewhere in North America."

Chapter 1373: The Game Between Top Hackers \_2

Chen Jun replied.

"North America, isn't that The United States?"

Upon hearing this, Ding Yue sneered and said.

In North America, there are only two countries worth mentioning: one is Maple Country, and without a doubt the other is The United States. In this case, it's likely that The United States is the more probable origin.

"Yeah, it looks like it's the hackers from The United States."

After pondering for a moment, Xu Bin nodded and said, "There are only a few infamous hacker teams in the world with the capability to breach our first line of firewall defense: The United States has them, so does Europe, and then there's Japan."

"Director Xu, you'd better take a look at the situation now."

Chen Jun, worried that the university's first line of firewall might be breached, urged Director Xu to take over immediately because Chen Jun and Ouyang Chen had already tried and after a fight with the other party, they felt somewhat outmatched.

"You two couldn't handle it either?"

Xu Bin asked seriously.

Immediately, Ouyang Chen nodded and said, "Director Xu, the opponent is formidable. Chen Jun and I just tried to work together to stop their intrusion, but we failed."

"It seems they have some skills."

Xu Bin muttered, then immediately went to his computer.

Having knocked down two of his able lieutenants showed that this hacker team was indeed very capable.

"Could it be the Fallen Angel Team?"

This made Xu Bin think of that famous hacker team from The United States.

"Fallen Angels? What's that?"

Ding Yue, not very familiar with hackers, asked.

"Principal Ding, the Fallen Angel Team is a team of elite hackers, and several of the world's top hackers are members of the Fallen Angel Team," Ouyang Chen explained to Principal Ding.

"Oh."

Ding Yue nodded thoughtfully and then looked at Xu Bin and asked, "How about it, Bin, are you confident you can handle them?"

"Of course, but they are especially cunning; it looks like today is going to be a tough fight."

Xu Bin was confident, but indicated that it wouldn't be an instantaneous victory over this group of expert hackers, so it would take time.

"No problem, we have time."

Ding Yue spoke calmly to Xu Bin, reassuring him to take his time dealing with the Fallen Angel Team.

"We've confirmed it; it's the Fallen Angel from The United States, and their location is in California."

Seated at his computer, Xu Bin, after a series of operations and with his excellent skills, managed to locate the IP of the adversary.

"That's good."

Seeing Bin so quickly determine the location of the Fallen Angel Hacker Team, Ding Yue's confidence in him was fully affirmed.

"Yue, it looks like our first line of firewall is definitely going to be breached. The invasion is fierce; many of the hacking viruses are the latest."

Xu Bin operated his computer seriously while reporting to Ding Yue.

"It's okay if the first line of firewall is breached."

Ding Yue already knew that the second line of defense was impossible to breach, so he wasn't worried at all.

"Chen Jun, Ouyang Chen, I've locked onto several devices; come and assist me, create a disturbance, I want to see what kind of technology they are using."

What Xu Bin needed to do now was to understand what software techniques the adversaries used to infiltrate Mist City Arts and Science University's computer servers; for that, he needed them to reveal some flaws.

It would be difficult for the adversary to directly expose their flaws, so it was necessary to pressure the adversary.

"Understood, Director Xu."

Chen Jun and Ouyang Chen both nodded in agreement, then immediately started their online operations.

Though the pair couldn't confront the Fallen Angel Hacker Team, they would have no problem assisting Director Xu Bin, after all, Chen Jun and Ouyang Chen were also super-genius computer experts.

An invisible battlefield ignited across thousands of miles.

Both sides had clear targets.

The goal of the adversary, the Fallen Angel Hacker Team, was to breach all defenses of the Mist City Arts and Science University's computer servers.

Meanwhile, Xu Bin had also locked several targets, and once he confirmed those devices, he could begin the counterattack.

But Xu Bin would not personally conduct the counterattack, instead delegating that action to his two capable lieutenants, Chen Jun and Ouyang Chen, while he would remain focused on finding the adversaries' point of breakthrough.

At this moment.

On the other end of the Pacific, in California, USA.

In a room on a certain floor of a five-star hotel, a group of young people are using their own computer equipment to carry out a cyber attack; they're trying to take control of some computers located at Mist City Arts and Science University in Xia Country, as well as trying to obtain data from the servers of Mist City Arts and Science University.

"Tom, how's the progress with the K virus?"

A girl with dreadlocks asked.

"Almost there."

Tom replied.

"Jack, the firewall of Mist City Arts and Science University's computer server seems to have more than one layer. After we've breached the first one, let's try to see if we can get some data first."

Tony told Jack.

"Alright, Tony."

Jack nodded.

"Not good!"

Suddenly, Jimmy frowned from the other side and said to his teammates, "My computer seems to have been hacked."

"What?"

This surprised Tom and Tony, because they were the ones doing the hacking, yet their own computer got hacked?

"There's a mastermind on the other side."

Tony stroked his chin and said, "It looks like we've been exposed."

"Then let's have a real showdown," the dreadlocked girl Allie said, chewing gum in her mouth, seemingly excited.

"Damn, my computer seems to have been hacked too, what virus is this?"

Jack said helplessly with his hands spread open.

"Clear it. They're just trying to delay us so they can attempt to patch the vulnerabilities in their firewall," Tony analyzed and then assigned tasks to his teammates: "Launch cleanup operation."

"No problem!"

So, the members of the Fallen Angel Hacker Team immediately started the "cleanup operation" on the computers that had been hacked by Mist City Arts and Science University.

Both sides continued to clash.

But Xu Bin at this moment was more like a spectator, yet a very covert one at that; no one knew which corner of the internet he was hiding in.

However, Xu Bin watched the Fallen Angel Team from the shadows, looking for their weaknesses!

"How's it going, Bin? Found an opportunity yet?"

Ding Yue, seeing Bin seriously operating, couldn't understand a thing on his side because the interface on his computer equipment was completely different from any ordinary computer interface he had seen.

"They should be slipping up anytime now. They're counterattacking us with cleanup operations, but they haven't slowed down their firewall breach. It seems they're determined and capable."

Xu Bin stroked his chin, analyzing.

"Chen Jun, Ouyang Chen, pretend to fall apart, let them cripple your computer equipment."

Xu Bin suddenly came up with a plan.

"Roger that."

Chen Jun and Ouyang Chen instantly understood what Director Xu Bin meant.

At this moment, Huang Youjie, who was curious, asked, "Bro Bin, are you planning to lure the enemy deeper in?"

"Nice move luring the enemy in!"

Ding Yue immediately gave Xu Bin a thumbs up.

The opponents would never have expected this move because how could they know the Art of War by Sun Tzu of Xia Country?

Sure enough!

After the counter-infiltration attack from Chen Jun and Ouyang Chen was defused by the opponent's cleanup operation, both of them were overwhelmed, and the opponent directly crippled the two computer devices of Xu Bin and Ouyang Chen.

"They're now attacking the firewall with full force; this is the time when mistakes are most likely."

Xu Bin said, eyes glued to his computer screen.

"Director Xu, the first firewall has been breached!" Chen Jun checked the situation and immediately reported.

On the Fallen Angel Team's side, they had already started celebrating, for they had just solved what was considered one of the most difficult firewalls to breach in the world.

"Excellent, I've finally found your vulnerability."

At this moment, a cold smile appeared on the corner of Xu Bin's mouth.

Chapter 1374: Full Counterattack!

"Found an opportunity?"

Ding Yue's eyes lit up as he immediately asked Xu Bin.

"Just now, when the Fallen Angel Hacker Team launched a full-scale attack and breached our first line of defense, they already gave themselves away."

Xu Bin wore a confident smile and nodded.

"So what's next?"

Ding Yue asked again.

Now that they had found an opportunity with the Fallen Angel Hacker Team and were certain that the second line of defense was impregnable, the next consideration was how to counterattack the Fallen Angel Hacker Team.

"Yue, don't you want to figure out why the Fallen Angel Hacker Team would attack the computer servers of Mist City Arts and Science University?"

Xu Bin looked up and asked Yue in return.

"Could it be?"

Ding Yue stroked his chin, speculating.

Exactly who was orchestrating this, or if there was someone behind it at all, Ding Yue couldn't say for sure, he could only speculate and doubt.

And the most likely possibility was, undoubtedly, Google Company from The United States.

Because.

Why invade our Mist City Arts and Science University's computer servers today, when the timing is perfect? Tomorrow is the pinnacle showdown between our university's AI robot Big White and Google Company's AI robot Alpha Dog.

"Yue, are you talking about Google Company?"

Xu Bin understood the implication of Ding Yue's words, because Xu Bin could also only guess that Google Company from The United States was the most likely puppet master behind the scenes, with the Fallen Angel Hacker Team merely being a "tool."

If it's not for that reason, surely it couldn't be that the Fallen Angel Hacker Team simply wanted to challenge the firewall of Mist City Arts and Science University's computer servers.

"Google Company?"

Huang Youjie exclaimed from the side, "Isn't Google Company supposed to challenge us with their AI robots tomorrow? Why are they messing with our computer servers now? Are they planning some foul play?"

"Oh, right, Xiao Wen, has the Google Company team arrived?"

Ding Yue looked over at his secretary Wen Ruohan and asked.

"They should arrive at the airport at about six o'clock this evening," Wen Ruohan replied.

This AI robot challenge was initiated by Google Company, and Mist City Arts and Science University accepted the challenge on the condition that the venue would be at their university, with the timing set for tomorrow afternoon, right after the closing ceremony of the National University Sports Games.

At this moment.

Larry Page, one of the founders of Google Company, had already led Google's professional team and brought along their AI robot Alpha Dog on a private jet, heading to Mist City in Xia Country.

On Ding Yue's end, even though he suspected that Google Company might be behind the Fallen Angel Hacker Team's intrusion into Mist City Arts and Science University's computer servers, there was no evidence. Therefore, even if they wanted to retort, they could only target the Fallen Angel Hacker Team, with no way to go after Google Company.

Simply counterattacking the Fallen Angel Hacker Team would be quite uninteresting.

With Xu Bin here, facing a world-class hacker group like Fallen Angel, there certainly would be no problem. Ding Yue trusted that Xu Bin alone could take down the entire Fallen Angel Hacker Team.

"Bin, see if you can find any leads?"

Ding Yue looked at Xu Bin and asked.

If they could find any evidence linking this hacking incident to Google Company, then Ding Yue could let Xu Bin properly "retaliate" against Google.

"I'll need a bit more time to see if I can find any traces of Google Company from this Fallen Angel Hacker Team. If there are, then our deduction could be largely confirmed. But if I do this, given the Fallen Angel Hacker Team's capabilities, they should be able to detect me, which means another tough fight,"

Xu Bin thoroughly explained the current situation to Ding Yue.

"Alright, then go ahead and look."

Ding Yue spoke with determination.

If it really was just the Fallen Angel Hacker Team purely challenging the computer servers of Mist City Arts and Science University, then Ding Yue wouldn't have anything to say.

But if they could find even the slightest trace linked to Google Company, then they would start a full-scale counterattack!

"No problem."

Xu Bin nodded, then delved into a new round of "combat."

This was a battle without gunpowder.

This was a high-stakes game between the world's top hackers.

In California, USA, the members of the Fallen Angel Hacker Team were preparing to launch a full-scale attack on the second line of defense of the computer servers at Mist City Arts and Science University.

"After breaking through this firewall, how much data can we get?"

Tony looked at the others and asked.

"Tony, these are non-essential data, not too significant to take. More core data, along with the data of Big White that the BOSS wants, is hidden behind this second line,"

Jack replied.

At that moment, Tom frowned and said, "This second line of defense doesn't seem so simple."

"No matter how formidable the defense, can it really defy the Fallen Angels?" Tony was very confident.

Chapter 1375: Full Counterattack! \_2

"Of course not."

Allie said with a smile.

"Tony, it seems like someone is checking our transaction information." Tom suddenly realized something and immediately reported it.

"Is it from Mist City Arts and Science University?" Tony gave a faint smile and said, "Our transaction information has nothing to do with the BOSS. Even if the people from Mist City Arts and Science University are checking, they won't be able to find anything."

Just as Tony said, after a thorough investigation, Xu Bin indeed couldn't find any connection between any member of the Fallen Angel Hacker Team and Google Company.

All the transaction information, even the other information, seemed to have no relation to Google Company at all.

"It looks like our opponent has been very thorough."

Xu Bin said, without stopping his hands from working.

Although he couldn't find anything related to Google Company in the Fallen Angel Hacker Team's transaction and other information, Xu Bin was definitely not going to give up easily.

"Bin, is there any other way to find some clues?"

Seeing this, Ding Yue quickly asked.

"It looks like I have to use my trump card."

Xu Bin said with a cold smile, "Yue, watch me."

"What's the plan?"

Ding Yue asked.

"I'm going to take a gamble, to see if there's any relationship between the Fallen Angel Hacker Team and Google Company." Xu Bin said with a sneer, "From the opportunity just now, I've already implanted a stealth program. Now, I can freely roam in the Fallen Angel Hacker Team's virus database. I just took a look, their virus database is pretty impressive, possessing the top virus programs in the world."

"Gambling?"

After hearing this, Ding Yue gave it some thought and then understood what his companion Xu Bin meant, "You mean, using the Fallen Angel Hacker Team's viruses to attack Google Company's computer network?"

"Exactly."

Xu Bin nodded.

"That moment when Huang Youjie also understood, immediately said, "As long as the Fallen Angel Hacker Team comes to Google Company's aid, it will prove that there is definitely a connection between the two."

"Right."

Xu Bin continued nodding.

"What if the Fallen Angel Hacker Team doesn't step in? Then, if Google Company's computer network is paralyzed, this matter won't be so simple."

Ding Yue said with some concern.

"Don't worry, Yue, I have a sense of measure," Xu Bin confidently said, "Of course, it would be best if the Fallen Angel Hacker Team reacts, then Google Company's computer network will be completely paralyzed."

"Chen Jun. Ouyang Chen."

After finishing, Xu Bin looked at his two capable right-hand men and said, "Call over all the experts from our team, get all usable equipment into action; this time, we are declaring an all-out war against the Fallen Angel Hacker Team, with the battlefield set on Google Company's computer network."

This war, without the smoke of gunpowder, made Ding Yue feel a surge of blood boiling.

"Understood!"

Chen Jun and Ouyang Chen immediately summoned a group of the most talented people in computer hacking from Mist City Arts and Science University's Computer Science Department.

Then they consolidated their fighting strength.

Under the leadership of Xu Bin, they officially began to declare war on the Fallen Angel Hacker Team.

The game had already been a confrontation just now, only this time, the scale of the battle had been upgraded.

Taking advantage of the opportunity and vulnerability he had grabbed earlier, Xu Bin began to invade Google Company's computer network using the Fallen Angel Hacker Team's own L-virus.

Google Building.

As the employees of Google Company were working, suddenly their network was completely paralyzed.

Network engineers tried to fix the issue immediately, but it seemed not as easy as expected.

Thus,

Google Company's senior network engineers began tackling this network paralysis issue, only to discover it wasn't a simple network paralysis, but a hacker invasion.

Therefore, Google Company's team of senior network engineers immediately reported the issue to their superiors and then initiated defense strategies against this hacker invasion.

It must be said, Google Company's senior network engineers, who are also officially hired hacking experts, certainly did have the skills, as they recognized immediately that this was an L virus from the Fallen Angel Hacker Team.

But knowing it was one thing, solving it was another.

...

At Mist City Airport,

as soon as Larry Page, one of the founders of Google Company, disembarked from the plane, he received a call from the Google headquarters. It was from Sergey Brin, the other co-founder.

"What?"

Larry Page asked in astonishment: "You're saying the company's network was infected with a virus from the Fallen Angel Hacker Team? How could this happen?"

This left Larry Page utterly confused.

He clearly instructed the Fallen Angel Hacker Team to invade the computer network of Mist City Arts and Science University in Xia Country, so how could it be that Google Company's network was invaded instead?

This matter was probably not so simple.

"Alright, I will have it taken care of immediately," declared Larry Page, not wanting to cause any more trouble for the head office.

After hanging up with Sergey, Larry Page promptly made a highly encrypted phone call to the person in charge of the Fallen Angel Hacker Team, who had only just realized that their virus library had been exploited and had even attacked their chief financier, Google Company.

This turned the tables, and now it was their financier that was left fuming.

Tony from the Fallen Angel Hacker Team immediately laid out combat strategies and set to work on resolving the L virus issue in Google Company's network.

With the involvement of the Fallen Angel Hacker Team themselves, who created the L virus, it was quickly removed from Google Company's computer network.

And as a result of this action,

Xu Bin and Ding Yue were able to confirm that although the Fallen Angel Hacker Team carried out the hacking attack, the mastermind behind it was undoubtedly Google Company.

"Yue, it looks like we've confirmed it," said Xu Bin with certainty, looking at the L virus that had been removed from Google Company's network.

"Who would have thought they'd play these tricks behind the scenes, not realizing the hacking experts we have at Mist City Arts and Science University are not to be trifled with?" scornfully said Ding Yue, who immediately sent the signal for a full counterattack to Xu Bin: "Full counterattack, let's cool down Google Company's computer network completely, just doing it until midnight will suffice."

We couldn't keep Google Company's network down forever; that would be playing the game too big.

"Okay, Chen Jun, Ouyang Chen, begin the counterattack!"

Xu Bin, following the order, led the team of hacking experts from Mist City Arts and Science University's computer department and launched a full-scale counterattack.

This counterattack utilized the Fallen Angel Hacker Team's virus, but Xu Bin added his own twist to it, which rendered even the Fallen Angel Hacker Team helpless against their own creation.

And so,

A grand counteroffensive began.

All sorts of virus programs from the Fallen Angel Hacker Team's virus library began to infiltrate Google Company's computer network.

Whether the headquarters or the branches, all computer networks related to Google were invaded, and not just by a single type of virus, but many, leaving Google Company's senior network engineers dumbfounded.

Faced with the invasion of so many virus programs, Google Company's defense was almost powerless; in just a moment, all of Google Company's computer networks plunged into complete paralysis.

That is to say, all of Google's services for business, operation, and maintenance, etc., were disabled, including the Google search engine.

In less than ten minutes, this huge network technology giant made headlines on the internet, as all its services were down!

Chapter 1376: Principal Ding PKs World's Wealthy

Twitter trending #1 #GoogleCompanyNetworkParalysis#, heat index 10369754!

...

Twitter topic ranking #1 #GoogleCompanyNetworkCollapse#!

...

This evening, the hottest and most discussed topic across all major global social media platforms was undoubtedly the complete network collapse of Google Company.

Within the global range, Google Company has a workforce of tens of thousands, and the vast majority of employees rely heavily on the internet for work.

When the network of a tech company specializing in internet and computer technology collapses, it's as if the entire company is paralyzed.

"What happened?"

"Did we get hit by a cyberattack?"

"It must be those Xia Country hackers, they got jealous after seeing our Google Company's AI robot Big White, and they played dirty."

"Oh my god, people from Xia Country are really too filthy."

"Can it be fixed quickly? I can't even use Google Search now."

"Without Google Search, I bet searching worldwide will be paralyzed."

"This is seriously affecting my work."

"Was it really the hackers from Xia Country?"

Overseas, the foreigners were extremely shocked by this total network collapse that befell Google Company, and some of them even speculated that it could have been the work of Xia Country's hackers. The motive could be jealousy over Google Company's AI robot Big White or due to the challenge tomorrow; hence Xia Country hackers aimed to sabotage Google's network from behind.

These foreigners held substantial malice towards Xia Country.

In reality, the truth was the opposite of what these foreigners speculated. It was because Google Company had secretly instigated the Fallen Angel Hacker Team to hack into the computer servers of Mist City Arts and Science University, intending to cause some mischief.

Unexpectedly, they were counterattacked by Mist City Arts and Science University, using the Fallen Angel Hacker Team's own virus against them.

At this moment, Larry Page, one of the founders of Google Company, had already arrived and checked into the campus hotel at Mist City Arts and Science University.

Inside his hotel room, Larry Page was handling the total network collapse of his own company.

"Sergey, how's the situation now?"

Larry Page asked Sergey on the phone.

"It's still terrible; our senior network engineers are clueless about it," replied Sergey.

"I've tasked the Fallen Angel Hacker Team to handle it, a turnaround should appear soon," Larry Page said with a sigh.

"Larry, this incident has immensely impacted the company's operations; have you seen it? This issue has topped the charts on social media worldwide."

Sergey expressed helplessness.

Initially, when Larry Page planned to invade the computer server of Xia Country's Mist City Arts and Science University, Sergey was not very supportive.

After all, it's best to compete with fair methods, to defeat Mist City Arts and Science University's AI robot Big White with Google's real AI strength.

But Larry Page insisted on finding weaknesses in the opponent, which led to this incident.

"It will soon be under our control, but I didn't expect Xia Country to have such a formidable hacker. We should try to recruit this mastermind."

Larry Page suggested.

To defeat the Fallen Angel Hacker Team and even use their own virus to counter-invade their Google Company, causing a complete network paralysis; such a skilled hacker was a rare find. Recruiting them would undoubtedly boost Google's strength and deal a significant loss to Mist City Arts and Science University or Xia Country.

All it would take to recruit this mastermind was money.

And, well, money was certainly not something Google lacked.

"That's indeed possible."

Sergey agreed with Larry Page's suggestion.

After all, capturing a computer talent capable of beating the world's top hacker team is vital for Google to have under its command.

"Then I'll have the Fallen Angels look into who this computer expert at Mist City Arts and Science University is."

After chatting with Sergey, Larry Page immediately assigned a new task to the Fallen Angel Hacker Team.

The invasion of Mist City Arts and Science University's computer server had failed; this time, Larry Page gave the Fallen Angel Hacker Team a chance to redeem themselves.

"BOSS, it might take some more time on our side, probably after midnight to completely eradicate the virus," Tony, the leader of the Fallen Angel Hacker Team, cautiously told BOSS Larry Page.

"You guys really messed up; don't you realize that your entire team is no match for just one computer expert from Mist City Arts and Science University?"

Larry Page said angrily.

"Yes, yes, we've already figured out what happened. There's a computer expert from Mist City Arts and Science University who exploited our vulnerabilities, thereby using our own virus to attack Google Company's computer network."

Chapter 1377: Principal Ding PKs World's Wealthy \_2

Tony had now figured out what was going on. Previously in the dark, he was trying to breach the second line of defense of Mist City Arts and Science University's computer servers, only to find that not only was the second line of defense impenetrable, but his own vulnerabilities had been exposed by the enemy.

"Now I'm giving you a new mission, to find this computer expert or team from Mist City Arts and Science University, and extend an invitation to them."

Larry Page suppressed his anger and spoke of the serious business at hand.

"Got it, boss!"

Tony replied.

...

Over at the computer research lab building of Mist City Arts and Science University.

Ding Yue saw Xu Bin, with his own strength and leading his capable subordinates, beating the Fallen Angel Hacker Team to a pulp and successfully crippling Google's network entirely – sending it to the top of global trending topics.

"Bin, well done!"

Ding Yue gave Xu Bin a thumbs up.

Xu Bin smiled faintly and said: "It's nothing really, the Fallen Angel Hacker Team is not even worth my attention."

Xu Bin's confident words stemmed from his own strength.

This time, Xu Bin had proven with his capabilities that he was the world's top hacker. Although hacking was on the fringe of legality, there was no doubt that being the world's best hacker meant he was unquestionably the world's best computer programmer.

"It seems like we need to present you with the World's Best Hacker Award, hahaha."

Ding Yue joked.

"Even though it's a battle without smoke and gunfire, it's got me boiling with excitement. Bin, you're awesome!"

Huang Youjie applauded and spoke straightaway.

"The clash in the hacker realm is kept out of the light. The fight between artificial intelligence robots tomorrow, that will be out in the open. Therefore, after midnight, let's restore Google's network to normal. We should not only defeat Google on the hacker front but also beat them openly!"

Ding Yue said confidently.

"No problem."

Xu Bin also confidently nodded.

"Principal Ding."

At this exhilarating moment, the secretary Wen Ruohan approached Ding Yue.

"What is it?"

Ding Yue asked.

"Principal Ding, Mr. Larry Page's team from Google has arrived at the school and has been arranged to stay at the hotel," Wen Ruohan reported.

This matter was something that Wen Ruohan, as the principal's secretary, needed to attend to.

Distracted by the hacker battle today, Ding Yue had for the moment forgotten that Google's founder Larry Page had already arrived in Mist City and was staying at their Mist City Arts and Science University hotel.

"How about this, shall we go check out this Mr. Larry Page who has been troubling us?"

Ding Yue smiled lightly and said to Xu Bin and Huang Youjie by his side.

"Sure!"

Xu Bin immediately nodded and said, "Shall we?"

"Let's go!"

Without a second word, Ding Yue took Xu Bin, Huang Youjie, and others, leaving the computer research lab building.

By now, the hacker battle had essentially settled, and the complete paralysis of Google's network was something even the Fallen Angel Hacker Team couldn't solve in a short time. Meanwhile, here, it was enough to have Chen Jun and Ouyang Chen keep an eye on things.

On their way to the Campus Hotel of Mist City Arts and Science University.

Ding Yue inquired about the basketball finals that had taken place that afternoon.

Because of the hacker incident, Ding Yue, who was supposed to be at the scene watching the game, hadn't managed to watch it till the end, and he still didn't know the outcome of the basketball final.

"Principal Ding, our Mist City Arts and Science University basketball team ultimately won with a score of 98 to 95, defeating Qinghua University's basketball team and taking the championship of the basketball finals!"

Secretary Wen Ruohan immediately replied.

"Really? That's fantastic!"

Upon hearing this, Ding Yue's face broke into a joyful smile.

This time, at the National University Sports Games, our Mist City Arts and Science University really performed incredibly well, even though there was the advantage of being the host, the athlete students from our Mist City Arts and Science University also put in a lot of effort.

In basketball, table tennis, badminton, and volleyball, we have already won quite a few championship gold medals, and tomorrow afternoon, we will be competing against Yancheng Sports Academy for the ultimate football championship in the finals!

This very highly anticipated battle.

Even Ding Yue is very much looking forward to the two most important events tomorrow, the closing match of the National University Sports Games' football finals, which is between his own Mist City Arts and Science University and Yancheng Sports Academy.

The other event is after the closing ceremony of the National University Sports Games, where our Mist City Arts and Science University's artificial intelligence robot Big White will accept the challenge from America's Google Company's AI robot AlphaGo!

"Yue, this National University Sports Games really put our Mist City Arts and Science University in the spotlight, hahaha, we won quite a few gold medals."

Huang Youjie said excitedly.

"That's right, whether it's in comprehensive teaching or in sports, our Mist City Arts and Science University is now top-tier. Given another two years, once we've nurtured even more outstanding talents from various fields, I think we'll be competitive even against Qinghua University or Yancheng University."

Ding Yue nodded his head, speaking with confidence in his heart.

Now, his Mist City Arts and Science University has become a national key university, and Ding Yue's next goal is to be the King of Glory among the private colleges in the country, capable of competing with Qinghua University and Yancheng University.

When that time comes, his Mist City Arts and Science University can start to make its mark internationally, competing with the top universities in the world.

And of course, Ding Yue's ultimate goal is to become the most prestigious institution of higher learning in the world, fulfilling his ultimate mission.

Soon, Ding Yue and the others drove over in the Feiyue Future New Energy car to the Campus Hotel.

After arriving at the door of Mr. Larry Page's room, Ding Yue knocked.

"Who is it?"

A voice came from inside the room.

"Mr. Larry Page, I am Ding Yue, the principal of Mist City Arts and Science University."

Ding Yue replied.

Click!

The door opened, and standing there to greet him was none other than Larry Page himself, accompanied by his assistant.

"Mr. Larry Page, hello."

Ding Yue greeted him "warmly."

After all, the man was a world-renowned figure, one of the world's top tycoons, and certainly deserved some respect.

"Hello, Principal Ding. I've heard that the principal of Mist City Arts and Science University is a promising young talent. I didn't expect you to be so young."

Larry Page spoke with amazement, as this young man seemed to be even younger and more promising than that Mark Zuckerberg fellow.

"Mr. Larry Page, you flatter me."

"Principal Ding, please, come in."

"Sure."

Larry Page invited Ding Yue and the others into the room.

After all, Larry Page's public reason for coming was to challenge the AI robot Big White from Mist City Arts and Science University, a spectacle that the whole world was watching. Even if they were opponents in the challenge, on the surface, they still maintained a semblance of "friendship."

In reality, this whole challenge was Google's doing.

Not only that, today's cyber incident was also orchestrated by Google.

"Mr. Larry Page, after you arrive in Xia Country today, be sure to rest well. Tomorrow afternoon, following the conclusion of the National University Sports Games hosted by our Mist City Arts and Science University, the challenge match between the two AI robots will begin."

Ding Yue said to Larry Page with a smile.

"So there's a sports meet? No wonder when I came here today, it seemed like your university was organizing some major event," Larry Page replied with a smile as well.

Although both were smiling, it was clear that there were knives hidden behind those smiles...

## Chapter 1378: The Profound Xia Country Language

In the hotel room.

Ding Yue chatted idly for a while with Mr. Larry Page, one of the founders of Google Company from America, mainly about the National University Sports Games currently being hosted by Mist City Arts and Science University.

It didn't take long.

The two soon steered the conversation back to the serious matter at hand.

That's right.

The matter was the artificial intelligence robot challenge taking place tomorrow, where one was the challenger and the other the challenged. Before the contest, the two parties exchanged "warm" and "friendly" greetings.

"Principal Ding, your school has achieved extraordinary results in the field of artificial intelligence, which we at Google Company greatly admire."

Mr. Larry Page smiled as he spoke to Ding Yue.

Ding Yue knew very well what Mr. Larry Page meant by that. He meant that even though Mist City Arts and Science University's AI technology was awesome, it still wasn't as awesome as Google

Company's, because his following remark, "which we at Google Company greatly admire," clearly indicated that Google's AI tech was superior.

"Mr. Larry Page, I heard that Google Company's computer network was hacked today. What exactly happened there?"

Ding Yue instantaneously took on the role of a drama king, shifting the topic perfectly to this matter.

Upon hearing this, Ding Yue could clearly detect a slight change in Mr. Larry Page's expression.

How could Mr. Larry Page not know about the hacking incident involving Google Company's computer network? Wasn't it done by the computer hacker experts from Mist City Arts and Science University?

Obviously, this young and talented Principal Ding was pretending to be clueless.

"Oh, this matter, for us at Google Company, isn't really a big deal. It's just that the media has been blowing things out of proportion," Mr. Larry Page said, spreading his hands and appearing very composed.

"Really?"

Ding Yue responded with a nonchalant smile, nodding and saying, "Indeed, with Google Company's formidable computing skills, how could they be crippled by just any hacker? The media nowadays, just to draw attention, completely disregard the facts."

Huang Youjie and Xu Bin, standing to the side, felt exhilarated listening to Yue's sarcastically tinged insincere remarks.

Everyone said these words openly, but they all knew well what the other had done behind the scenes.

Google Company had secretly orchestrated the Fallen Angel Hacker Team to infiltrate Mist City Arts and Science University's computer servers, a fact Mr. Larry Page almost assuredly knew and might have even arranged.

And as for Mist City Arts and Science University's counters, which caused a total paralysis of Google Company's computer network, here they were saying it couldn't be the case, definitely the media ignoring facts, making Mr. Larry Page grind his teeth in anger.

Feeling secretly thrilled on one hand and grinding teeth on the other, even though it wasn't shown outwardly, a sharp contrast was still formed at the psychological level.

"Principal Ding is right; there really are way too many reports disregarding the facts in the media these days," Mr. Larry Page also said, with nothing left to argue, just following along with what Ding Yue had said.

Otherwise, was he supposed to clarify things with Principal Ding?

That certainly wasn't an option.

As a businessman, as a wealthy individual, he had the emotional intelligence for this.

Actually, neither Mr. Larry Page nor Ding Yue would likely spell out the situation. It was clear enough to each side, and then they just needed to hint at each other in their public statements, like the double meanings in Ding Yue's previous remarks.

"By the way, Mr. Larry Page, let me introduce to you, this is Mr. Xu Bin from Mist City Arts and Science University's Department of Computer Science."

Ding Yue simply introduced Xu Bin to Mr. Larry Page.

After all, the upcoming artificial intelligence robot challenge that both sides will engage in tomorrow involves computer programming, and Xu Bin is one of the creators of Big White, the AI robot. Naturally, he needed an introduction.

"Nice to meet you, Mr. Xu Bin," Mr. Larry Page said as he extended his hand to shake hands with Xu Bin.

"Nice to meet you, Mr. Larry Page," Xu Bin also politely shook hands with Mr. Larry Page, and then said, "If Mr. Larry Page needs it, as a computer programmer, I could find a way to help to solve the network paralysis issue at Google Company."

After Xu Bin finished speaking, a wry smile couldn't help but appear at the corners of his mouth.

The next second, everyone who had come with Ding Yue to see Mr. Larry Page, like Huang Youjie, Secretary Wen Ruohan, and little sister Ding Xiaoyou, etc., were internally laughing their heads off.

Xu Bin's comments were simply too mischievous.

The network paralysis at Google Company was his doing, and now he was offering to help them solve the network paralysis issue.

This was essentially slapping the other side's face.

"Oh?"

Mr. Larry Page knew exactly what was going on inside but could only continue to "play dumb" and asked, "Mr. Xu Bin has the ability to solve the virus infiltration incident at Google Company this time?"

"Of course."

This time, Ding Yue stepped forward and immediately said, "Mr. Larry Page might not be aware, but this Mr. Xu Bin is the most outstanding computer expert at Mist City Arts and Science University. Any computer program is an easy task for him, and I believe it would be quite difficult to find another computer expert as exceptional as Mr. Xu Bin in the world."

Chapter 1379: The Profound Language of Xia Country \_2

Ding Yue's words were quite clear; he was telling Mr. Larry Page that Xu Bin was the top computer expert at Mist City Arts and Science University.

"So that's how it is."

Mr. Larry Page suddenly understood, looking at the young man in front of him with surprise, wondering if this person was the one who defeated the Fallen Angel Hacker Team, exploited their vulnerabilities, and caused his Google Company's network to completely paralyze - the very super-hacker he wanted to poach?

"Mr. Larry Page, I just received an invitation from your Google Company, asking me to join as a senior network engineer, right? Is this because you want me to solve your network paralysis?"

Xu Bin said with a smile to Larry Page.

"Oh, uh, well, if Mr. Xu Bin you are willing, of course that's possible."

Mr. Larry Page was a bit flustered at this point.

How is everything under the control of these people from Mist City Arts and Science University?

"Thank you for your kind invitation, Mr. Larry Page. Since that's the case, I'll help your Google Company out. I'll solve the virus problem before midnight tonight. As for your offer to join your company, I think I need to think about it."

Xu Bin stated calmly.

Meaning, I might help your Google Company fix the virus, but you think you can poach me easily?

Dream on!

Today's "meeting" and "chat" were completely dominated by Mist City Arts and Science University, catching Larry Page somewhat off-guard.

Ding Yue laughed and nodded, then looked at his watch, and said, "Mr. Larry Page, it's getting late. You should adjust to the jet lag and rest early, we'll meet again tomorrow?"

"Okay, Principal Ding."

Mr. Larry Page nodded slightly and said, "Then I will not see you out, Principal Ding."

After the conversation, Ding Yue left Mr. Larry Page's room with his group.

On the way back, Huang Youjie and Xu Bin couldn't hold back and burst into laughter.

"Hahaha, Yue bro, we are all professionally trained, we only laugh when we really can't help it, hahaha!" Huang Youjie said laughing.

"Bin, well done today. Did you see the look on Mr. Larry Page's face? It was hilarious."

Ding Yue couldn't help but laugh as well.

Today's trip to meet Mr. Larry Page was truly refreshing.

"Tomorrow, if we beat Google Company's AlphaGo as well, I wonder if Mr. Larry Page might die of anger right here? Hahaha."

Xu Bin asked laughing.

"That might be possible!"

Huang Youjie continued.

"Then we'd better prepare a medical team," Ding Yue joked.

Yet, Huang Youjie took it seriously, saying, "I'll coordinate with the logistics department and the medical school right away to be prepared—in case Mr. Larry Page really collapses, at least we can rescue him immediately."

"Old Huang, oh Old Huang, you really got it."

Ding Yue laughed and chatted with his friends all the way back to the apartment building.

This evening's episode truly lifted Ding Yue's spirits; seeing Mr. Larry Page's expression made him want to laugh, and with such a joyful mood, Ding Yue even slept more soundly than usual.

On the contrary.

Mr. Larry Page was feeling quite upset now.

His Google Company's network had collapsed today affecting office operations severely, and even now, the company's network had not been restored. Plus, he had just been subtly mocked by Principal Ding of Mist City Arts and Science University, so how could Mr. Larry Page possibly feel good?

Now.

Mr. Larry Page's only hope was that the AI robot AlphaGo he brought tomorrow could defeat Mist City Arts and Science University's AI robot Big White.

"How's the situation at the company?"

Mr. Larry Page quickly asked about the situation at Google Company.

"Boss, it still hasn't been restored."

The assistant replied.

When Mr. Larry Page heard this response, his face became even uglier.

That night, Ding Yue slept soundly while Mr. Larry Page stayed awake.

It was not until midnight that Mr. Larry Page finally received some good news: the Google Company's network was restored, and the virus had finally been cleared.

Initially, Mr. Larry Page thought that the Fallen Angel Hacker Team had cleared the virus from Google Company, but it turned out they weren't responsible after a communication with them.

Even the Fallen Angel Hacker Team seemed powerless against the virus that had invaded Google's network.

However, at midnight Xia Country time, these viruses disappeared as if they had self-destructed, allowing the Google Company's network to finally be fully restored.

Even though it was restored, the complete paralysis of Google Company's computer network today still caused a great loss to the company.

"What?"

Upon learning that the virus had "automatically" disappeared, Mr. Larry Page's mood became even more complicated.

This made Mr. Larry Page think of something Xu Bin, a computer expert from Mist City Arts and Science University brought by Principal Ding, had once said.

For a moment, Mr. Larry Page only felt a stark humiliation!

He was initially planning to take a good rest after hearing the good news of the network restoration, preparing for tomorrow's artificial intelligence robot challenge.

Now, with such mixed emotions, he couldn't sleep at all.

...

The next day.

Today is the last day of the National University Sports Games, with many events holding their final matches and awarding gold medals.

Among them, undoubtedly the most anticipated was the football final between Mist City Arts and Science University and Yancheng Sports Academy.

In the morning.

Ding Yue watched two finals, in one of which his own Mist City Arts and Science University won another championship gold medal.

At noon.

Ding Yue went to the Campus Hotel to meet Mr. Larry Page.

"Mr. Larry Page, there's a football match this afternoon between our Mist City Arts and Science University and Yancheng Sports Academy, it's the championship battle, and also the closing battle of this year's Xia Country's University Sports Games. Would you be interested in coming to watch it live? Also, right after this match, will be the closing ceremony of the National University Sports Games, and following that, our artificial intelligence robot challenge."

Ding Yue invited Mr. Larry Page.

After pondering upon hearing this, and knowing that the artificial intelligence robot challenge was essentially connected to this football match, Mr. Larry Page nodded and agreed, "Sure, Principal Ding."

"Alright, Mr. Larry Page, the match is at three o'clock in the afternoon."

Ding Yue mentioned the time.

After two o'clock in the afternoon, Ding Yue contacted Mr. Larry Page again, and then the two met at the Central Sports Ground, where Ding Yue had specially prepared VIP-level spectator seats for Mr. Larry Page.

Actually, Mr. Larry Page himself is also a football enthusiast.

Ding Yue knew this.

So before the game officially started, Ding Yue chatted with Mr. Larry Page: "I heard you're very passionate about football, Mr. Page. Which football club do you like the most?"

"Of course, it's the Galacticos."

Mr. Larry Page responded with a smile.

The so-called Galacticos refers to Real Madrid!

Real Madrid has a massive fan base, and unexpectedly, Mr. Larry Page was one of them.

After hearing this, Ding Yue nodded and said, "I also quite like the Real Madrid team, but Mr. Page, in a few years, when our Feiyue Football Club goes international, I believe you'll grow fond of our Feiyue team."

"Oh? Is that so?"

Chapter 1380: Overwhelming Advantage?

A mere college team dares to be mentioned in the same breath as Real Madrid?

Larry Page thought to himself.

However.

Ding Yue was very confident in the football team of Mist City Arts and Science University.

Given time, as long as the players persevere, he believed they would definitely be able to stand on the international football stage and win the glory they deserve.

The match was about to begin.

Players from Mist City Arts and Science University and Yancheng Sports Academy's teams made their appearances one after another.

There's an old saying that goes.

Sworn enemies often meet more than others would.

At this moment, the players from Yancheng Sports Academy had a "vengeful" look in their eyes, as they had lost the last match they played against Mist City Arts and Science University.

That match was also the only one Yancheng Sports Academy lost in this National University Sports Games football competition.

Faced with the "revenge" from Yancheng Sports Academy's team, players from Mist City Arts and Science University were prepared for battle and aimed to defeat them once more, failing their attempt at revenge and claiming the championship trophy!

"Really looking forward to today's football match."

"I just knew, this finals was definitely going to be between these two colleges."

"Yancheng Sports Academy is seeking revenge."

"Everyone take a guess, who will win this final match?"

"Looking forward to the results!"

"This is the last match of the National University Sports Games, cherish it while you can."

"Mist City Arts and Science University, go for it!"

In the Central Sports Ground's stands, the audience eagerly anticipated the match that was finally about to start. Since the football finals were between Mist City Arts and Science University and

Yancheng Sports Academy, the majority of the audience present were students from Mist City Arts and Science University.

After all, who else would they support at this critical moment if not their alma mater?

You have to understand, the students from Mist City Arts and Science University had very strong sentiments towards their school.

Not only were the stands full of spectators.

In the official live streaming room of Mist City Arts and Science University on Feiyue Home streaming media platform, hundreds of thousands of online audiences also flocked to watch the live stream.

The live broadcast of this match had been publicized extensively beforehand by Mist City Arts and Science University because after this football final and the award ceremony, it will be instantly followed by the closing ceremony of the National University Sports Games, and right after that, the AI robotics challenge will seamlessly commence.

Thus, from the beginning of this football match, the number of viewers watching live was much higher than during previous matches.

"Holy crap! There are so many spectators at the venue?"

"I have to say, these two college football teams are indeed a match made in heaven."

"I would call this Yancheng Sports Academy's battle of revenge!"

"Both teams are very strong, this match will be good to watch."

"Honestly, what's so interesting about domestic football matches? Even summer super league games are so dull."

"Champions League is much better to watch!"

"World Cup is good too, but can we even make it into the World Cup? Haha!"

When netizens started chatting about football, they couldn't help but bring up the national team, whose shame is truly beyond words.

The camera in the official live streaming room of Mist City Arts and Science University suddenly focused on Principal Ding and Larry Page sitting next to him in the audience, pausing there for a while.

This immediately set off a wave of comments in the live chat!

"Principal Ding is so cool!"

"Who's that foreigner next to Principal Ding? He looks so familiar."

"Holy sh\*t! Isn't that Larry Page, one of the founders of Google Company?"

"Gosh! It really is Larry Page!"

"The world's billionaire Larry Page next to Principal Ding, now that's impressive!"

"It looks like today's AI robotics challenge is going to be amazing; even the boss of Google Company, Larry Page, is here."

"I really want to fast-forward to the AI robotics challenge, but then again, I do want to watch this football match too, so let's not fast-forward."

"Larry Page is here? That's freaking awesome!"

Clearly, many people recognized this foreigner, Larry Page, a regular on the Forbes Global Billionaires List, one of the founders of Google Company.

On the field.

The match officially started.

Mist City Arts and Science University's football team and Yancheng Sports Academy's team began their final battle.

From the start of the match, both sides were very cautious.

Yancheng Sports Academy had already suffered from a strong offense when they last faced Mist City Arts and Science University.

Therefore, Yancheng Sports Academy had changed some of their strategic and tactical methods, from their previous tactic of a fierce attack in the first half to break through and defeat the opponent, to a more steady and measured approach.

Mist City Arts and Science University, on the other hand, has always been tight in both offense and defense, waiting for the opponent to make a mistake, and then seizing the opportunity to score!

Thus.

On the football field, the first ten minutes formed a situation that everyone found unexciting, where both Mist City Arts and Science University and Yancheng Sports Academy, after getting the ball, simply passed the ball between themselves without forming any significant attacks.
