

F. University 271

Chapter 271: Act Bravely for a Just Cause, Reward 1 Million

Over the phone, Mr. Liu looked back and said.

Hiss!

Listening to Mr. Liu say this, it wasn't because of a subconscious urge to avoid the SUV that led to the accident, but to prevent that SUV from charging onto the road and into the bustling roadside crowd, he intentionally steered in its direction to block it!

"Oh my God, Mr. Liu, you are indeed a hero!" Ding Yue said excitedly, "So, if you hadn't blocked it, the car would have crashed into the crowd, right?"

"It would definitely have crashed in. The other side probably had a drunk driver. There were so many people on that busy street, I didn't dare think about the consequences!" Mr. Liu answered.

At this moment, Ding Yue was extremely moved.

Mr. Liu actually...

This is definitely an act of heroism, Ding Yue even felt it was a bit heroic.

"Okay, Mr. Liu, rest and recover well. The school will work with the traffic authorities to get clear about the situation. We are really moved by your act of public spiritedness!"

Ding Yue said to Mr. Liu excitedly.

"Oh, it's really nothing." Mr. Liu said humbly.

After the call ended.

Ding Yue immediately asked the school staff to check with the traffic authorities about the situation.

The traffic authorities responded that the SUV's driver was drunk, and he wasn't even seriously injured. He has been taken into custody.

They also managed to acquire the surveillance video from that time.

After returning to the Haicheng Hotel, Ding Yue finally got in touch with the person in charge of Mist City Traffic Department.

"Captain Zhao, I am Ding Yue, the principal of Mist City Arts and Science University. The injured bus driver, Liu Yuanming, is a member of our staff."

After getting in touch with Captain Liu from the traffic authorities, Ding Yue introduced himself.

"Hello, Principal Ding. Based on our preliminary investigations, the Audi SUV driven by a man surnamed Chen was involved in drunk driving. We have watched the surveillance video and talked to Mr. Liu. We can more or less conclude that Mr. Liu's actions were a heroic intervention. To tell you the truth, watching the video gave me quite a fright. Mr. Liu stopped that SUV, saving many people. I'll have someone send you the surveillance video to look at."

Captain Liu also said excitedly.

"Ok."

Soon, Ding Yue received the surveillance footage sent by Captain Liu of the Mist City Traffic Department.

On the sofa in the hotel living room, Huang Youjie, Xu Bin, Wen Ruohan, and Ding Xiaoyou, his little sister, were eager to watch the surveillance footage.

Ding Yue lifted up the laptop and opened the video sent by Captain Liu.

The video showed Mr. Liu driving the school bus back to Mist City Arts and Science University on Jianbei Road, where the accident had occurred.

It was clearly visible in the video that on the busy side of Jianbei Road where Mr. Liu was driving, there was a bustling food street filled with pedestrians. Just as Mr. Liu was passing by the crowded area, an Audi SUV came charging from the opposite lane at high speed.

It looked like it would collide head-on with Mr. Liu's school bus.

At this point, if Mr. Liu chose to steer to the left, he would certainly crash into the incoming 555 bus.

But in the next two or three seconds, the situation changed again.

After the SUV entered Mr. Liu's lane, it didn't move straight ahead, but continued charging toward the side of the street.

According to this trend, without a doubt, the SUV would crash straight into the bustling food street that Mr. Liu had just passed.

There were so many people there that if the car crashed into them, the consequences were unthinkable!

At this critical juncture, you can see that even though Mr. Liu wouldn't have had an accident, he still chose to steer to the left, hunking his horn wildly down the empty street, before blocking the side of the road with the school bus.

The very next second.

Kaboom!

The SUV collided with Mr. Liu's school bus, completely flipping the bus over before it could even come to a stop.

"Damn, if that SUV had charged straight into the crowd, it would have been murder!"

Xu Bin's eyes doubled in size after the video.

"Captain Liu from the traffic authorities said that this person was drunk driving and probably lost control. He couldn't even stop."

Ding Yue said helplessly.

"Clearly. Thank God Mr. Liu blocked it with the bus, if it had charged in just now..."
Huang Youjie said thankfully.

"Principal Ding, Mr. Liu must have decided to block that car. That's pretty amazing. If he hadn't blocked it, the consequences could have been disastrous for all those people on the street."

Secretary Wen Ruohan analysed.

"Mr. Liu is so great!" Ding Xiaoyou couldn't help but admire Mr. Liu's courage.

Not everyone could make a quick decision under these kind of critical circumstances, to block a crazy Audi SUV.

Mr. Liu's action saved countless lives!

"I have to give my kudos to Mr. Liu, I admire him for making such a decision under that kind of circumstances."

Ding Yue nodded and said.

Wen Ruohan's phone rang again, she quickly got up and walked to the balcony to answer the call.

"Secretary Wen, the school arranged a single patient room for Mr. Liu at the hospital, but right now, many media outlets want to interview Mr. Liu. We feel that it might disturb Mr. Liu's recovery, so we wanted to ask Principal Ding whether we should allow the media into the ward to interview Mr. Liu?"

Chapter 272: Act Bravely for a Just Cause, Reward 1 Million

Over the phone, the person from the school responsible for Mr. Liu's hospitalization asked Wen Ruohan:

"Please hold on for a moment."

Upon hearing this, Wen Ruohan hurried back to the living room to relay the situation to Principal Ding.

Upon hearing this, Ding Yue frowned slightly, then took over the phone and asked, "What does Mr. Liu personally want?"

In such a situation, if the school refuses all media to interview Mr. Liu, there might be no chance to publicize Mr. Liu's heroic act.

"Mr. Liu is willing to be interviewed, but he hopes to not be endlessly bothered. There were too many journalists and media outlets, so we temporarily blocked them off and wanted to ask Principal Ding how to deal with it."

"In that case, allow an exclusive interview by the media journalists from the Mist City News Channel, and do not let any other media disturb Mr. Liu."

Ding Yue thought for a moment. Since Mr. Liu is not refusing interviews, the interview must take place.

But with so many media journalists, they can't all interview him, which would seriously disturb Mr. Liu's hospital stay.

Therefore, Ding Yue, after a moment of thought, decided to let the local authoritative Mist City News Channel do the interview.

"Okay, Principal Ding, we will arrange it right away!"

After hanging up the phone, Wen Ruohan received another call.

After the incident of Mr. Liu's heroic act, the phone started to ring frequently.

"Principal Ding, the Mist City Government Office called. They said that the Mist City Government will issue a certificate of merit to Mr. Liu!"

Wen Ruohan briefed Principal Ding about the latest situation.

"Okay, Wen Ruohan, tell the school's finance department that in light of Mr. Liu's heroic act this time, the school will award him a bonus of 1 million yuan!"

This is the decision made by Ding Yue immediately after confirming Mr. Liu's act of valor.

million yuan is not a large sum for Mist City Arts and Science University, but as a bonus for good Samaritans, it is indeed a considerable reward.

But Ding Yue believes that Mr. Liu's action is worth this 1 million yuan bonus. Because his split-second decision could have, unfortunately, cost him his life in the accident.

Fortunately, Mr. Liu is lucky. He saved countless lives at the expense of his own injuries and the total damage of his vehicle.

"Hehe, I was just thinking, shouldn't we give Mr. Liu a good Samaritan bonus? 1 million yuan is good!"

"Yue is great!"

Huang and Xu Bin gave a thumbs up to Ding Yue.

"It's what the school should do." Ding Yue scratched his head and said, "To tell the truth, Mr. Liu's action has also brought honor to our Mist City Arts and Science University."

"Brother, this really made the trending list, it's number one." Suddenly, Ding Xiaoyou, holding her phone, said from the side.

Ding Yue was surprised, picked up his phone, and opened Twitter to take a look.

It was indeed the top-trending topic.

#1 on Twitter's Trending Rank is: #Bus Driver Prevents Tragedy in the Nick of Time#

Seeing this trending topic, Ding Yue knew it must be about Mr. Liu's incident yesterday. A video must have been uploaded online this morning, gradually gaining attention and eventually attracting public attention, making it the top trending topic.

This trend has formed naturally. Mist City Arts and Science University did not push it from behind this time.

Usually, the popular events of Mist City Arts and Science University are indeed promoted by the school's publicity department.

Ding Yue clicked on the top trending topic to see the first Twitter post, which was the news report from "Mist City News".

It was also accompanied by the surveillance video at that time.

In this news summary, it mentions that Mr. Liu is a bus driver for Mist City Arts and Science University. Mr. Liu's action not only earned him praise and admiration from countless netizens but also brought some glory to Mist City Arts and Science University without a doubt.

"My God, this driver is great!"

"It was shocking to watch the video. If Mr. Liu hadn't stepped in, the consequences would have been dire!"

"So many people were saved by Mr. Liu, he is a real superhero!"

"Drunk driving deserves death, I propose capital punishment!"

"Drunk driving is really harmful, causing so much sorrow in so many families' lives, is there anyone not alerted by this?"

"Audi Q7, clearly a rich man's car, this needs thorough investigation!"

"Damn! I'm so mad after watching this news. Why didn't the drunk driver die from the crash? He wasn't even seriously injured!"

"The bus driver is awesome, he was willing to risk his own life to save everyone!"

"Mist City Arts and Science University's campus bus driver, not bad!"

"Kudos to Mr. Liu of Mist City Arts and Science University!"

"To be fair, apart from the mediocre teaching strength, other aspects of Mist City Arts and Science University are quite good, and Mr. Liu's heroic act this time also brings honor to Mist City Arts and Science University!"

On Twitter, there were netizens praising Mr. Liu, those worried about Mr. Liu's health condition, and those who were very angry about drunk driving and suggesting capital punishment. Some careful netizens also noticed that Mr. Liu is a campus bus driver at Mist City Arts and Science University.

Mist City Arts and Science University again. A while ago, Mist City Arts and Science University frequently made the trending list, and basically all the trending events were positive, which shows that this university seems to be quite good.

Chapter 273: Act Bravely for a Just Cause, Reward 1 Million (Second Addition of 10,000-characters Update, Please Subscribe)_4

After browsing Twitter, Ding Yue felt he should make a comment since the incident Mr. Liu experienced was due to him driving Ding and university faculty and students to Mist City Airport yesterday.

So, Ding Yue crafted and posted a Tweet on his own account.

[Principal Ding of Mist City Arts and Science University] : I was truly shocked when I first heard the news. Everyone at the university who has ridden on Mr. Liu's bus admires him for his loyalty, humility, and kindness. Yesterday, due to a business trip to another city, we arranged for Mr. Liu to take us to Mist City Airport. Astonishingly, on his way back to campus, Mr. Liu performed a tremendously heroic act, which deeply touched everyone at our university. We all are very proud of him. Thankfully, it has been confirmed that Mr. Liu is in stable condition in the hospital, and all of his medical expenses will be covered by our university. Moreover, we will award him 1 million yuan as a reward for his brave act!

Retweets (5421), Comments (7771), Likes (1.1w)

Ding Yue's Tweet caught a lot of attention as soon as it was posted.

"Great job, Principal Ding, employees like these deserve ample rewards!"

"One million in prize money, wonderful job, Principal Ding!"

"Mist City Arts and Science University truly did well in this regard."

"Finally, Principal Ding speaks out, I heard that he missed out on a collaboration with Professor Luo Xiang due to this business trip?"

"Drink-driving is a death sentence!"

"Principal Ding is amazing. So is your staff member, Mr. Liu from Mist City Arts and Science University. So touching!"

"Hope the university will definitely hold the perpetrators accountable!"

The popularity of Mr. Liu's incident is still on the rise, attracting more and more attention to Mr. Liu, the ordinary campus bus driver at Mist City Arts and Science University.

Meanwhile, various major media outlets have also reported on the incident.

At that time, the bystanders from the food street also expressed their gratitude to Mr. Liu in succession.

At Mist City Central Hospital,

"Dear media friends, please understand, Mr. Liu really needs a peaceful space to recuperate. We have already agreed to let the reporters of Mist City News Channel do an interview, so all of you can repost news from Mist City News Channel. We hope you can understand."

The faculty and staff of Mist City Arts and Science University are blocking a large number of reporters outside the ward.

Among them, mainstream media left upon learning that only Mist City News Channel was permitted to interview. Most of the remaining are various self-media and media outlets with poor reputations. You could say they were trying to "ride the wave".

In the ward,

The Director of Academic Affairs of Mist City Arts and Science University, Qi Chunsheng, along with the Secretary of the Administration Department visited Mr. Liu.

Qi Chunsheng handed Mr. Liu a bank card, "Mr. Liu, this is the one million in reward that Principal Ding has asked the school to give you. Keep it safe. You did a commendable job. We are all proud of you!"

Besides them, there are reporters from Mist City News Channel in the ward. They were conducting an interview with Mr. Liu.

There are doctors and nurses present throughout the entire interview to monitor Mr. Liu's condition. It is currently stable and he has no issues accepting the interview.

However, as Mr. Liu himself said, too much media disturbance is also what he does not want to see.

Luckily, in the end, Principal Ding only agreed to allow reporters from Mist City News Channel to enter.

The reporter from Mist City News Channel had already asked a few key questions about the incident and had seen that the people from Mist City Arts and Science University had given Mr. Liu a 1 million yuan reward for his brave act. Then he asked, "Mr. Liu, as an employee of Mist City Arts and Science University, and since it happened while you were on duty, your behavior more or less represents the university. What do you have to say about this?"

"The university treats me very well. Whether it's the leaders, teachers, students we all get along well. Honestly, the actions of the university this time made me feel very warm, and I am also very happy that I was able to bring a little bit of honor to the school. Is it an honor?"

Mr. Liu responded with genuine, albeit uncertain, words.

"Of course it is an honor. Your brave act has saved many citizens' lives. You are a hero!" the reporter affirmed confidently: "Mist City Government is already preparing to issue you a certificate of bravery."

"Principal Ding is a very nice person, as is the university. When Principal Ding heard about my incident, he called me right away and told me to take a good rest and not to worry about anything..."

Chapter 274: Big White kindly prompts you ghs was sentenced _____ years
July 17th.

Yancheng.

In the lounge next to the legal channel studio in NTS Television Tower.

Ding Yue finally got to meet Professor Luo Xiang here.

"Hello, Professor Luo Xiang."

Ding Yue extended a warm handshake to Professor Luo Xiang.

"Hello, Principal Ding." Professor Luo Xiang was also welcoming, and the two seemed to get along well.

Because the two had already connected via video call previously, Professor Luo Xiang had witnessed the first test of the robot Big White after the legal chip was uploaded.

"Principal Ding, Mr. Liu from your school was quite admirable. I looked into that incident. First, the Audi Q7 driver was drunk, and second, his behavior technically constituted endangering public safety and not just a simple traffic accident."

Meeting Principal Ding, Professor Luo Xiang started discussing the widely talked about incident involving Mr. Liu from the past couple of days.

For the entire day of July 15, the incident was the top trending topic. The official Twitter account of NTS news even praised Mr. Liu's act of bravery.

"In such instances, what is the maximum sentence that the offender can receive?"

Ding Yue, curious, asked Professor Luo Xiang, "Director Huang tells us that in the most severe cases they don't get over ten years."

After Ding Yue finished speaking, he introduced Huang Youjie, who was with him.

After all, Huang Youjie was a law student and the future chief legal officer for Mist City Arts and Science University and the Feiyue Group.

The legal chip of the legal robot Big White was a joint project by Huang Youjie and other law school students.

"This is Director Huang, you've done a good job. The legal chip you compiled is also very good," Professor Luo Xiang complimented Huang Youjie.

"Thank you, Professor Luo. However, we only compiled the 'Comprehensive Legal Solutions.' The law chip was built by the Computer Science Department. Considering no major damages were incurred, the sentencing is typically between three to ten years. Also, the Audi Q7 owner was drunk and caused an injury to Mr. Liu — but no serious injuries, so a ten-year sentence might be unlikely, though seven years is possible!"

Huang Youjie has a professional conversation with Professor Luo Xiang.

"That's right, Director Huang is correct. For endangering public safety, if no huge harm or serious consequences resulted, the sentence is from three to ten years of imprisonment. In case of major damage and casualties, it's ten years or more in jail, life imprisonment, or death."

Professor Luo Xiang nodded in agreement.

"Mist City Arts and Science University will assemble a professional legal team to deal with the lawsuit regarding this issue."

Ding Yue expressed resolute determination not to let the drunk driver of the Audi Q7 get off easily.

"Professor Luo, Principal Ding, are you ready? The live broadcast will begin in ten minutes."

At this time, a staff member from the NTS Legal Channel asked.

"Yes, I'm ready," Professor Luo Xiang responded.

Ding Yue looked at Xu Bin and Chen Jun, who nodded, signaling that the legal robot, Big White, was ready.

Earlier, Xu Bin and Chen Jun had thoroughly checked the legal robot, and everything was normal.

The current robot Big White, not only contains the legal chip but also its original medical chip.

Because this robot Big White has the most advanced technology, there are several slots for chips inside it.

This means that this robot Big White can contain multiple chips at the same time.

But the robots given to Mist City Central Hospital for trial and those given to Miss Flying Wheat Cake in lottery prizes can only contain one medical chip.

"We are also ready."

When Ding Yue saw Xu Bin and Chen Jun nod, he responded.

"For this Big White, can it analyze relevant legal know-how with me as soon as a case is mentioned?"

Professor Luo Xiang pointed at the red metal box not far away and asked about the legal robot Big White.

Ding Yue nodded and replied, "Correct, as long as Professor Luo interacts with Big White on legal topics, it will provide relevant legal education."

"Then I understand. I'll use an outlaw to vividly describe the case, and in return, Big White will then discuss the legal provisions."

Professor Luo Xiang roughly understood how he was to conduct the live broadcast with Big White.

The "Summer Legal Lecture Hall," tailor-made for Professor Luo Xiang by NTS, is actually not a formal legal program on TV but a live legal education activity, hence it's not so strict. So, Professor Luo Xiang could conduct the live broadcast with Big White very flexibly.

About five or six minutes later, a staff member of NTS legal channel came over again, asking Professor Luo Xiang and Mist City Arts and Science University to bring Big White into the broadcast room.

As it was a "Summer Legal Lecture Hall" live broadcast arranged by NTS, there was a special live broadcast room located in the 2nd program studio of NTS legal channel. The live set background looked fun and lively, even containing words like "outlaw" and "Law class begins."

Right in front of the live set was a set of live broadcasting equipment specifically prepared by NTS.

Chapter 275: Big White kindly prompts you ghs was sentenced _____ years

In addition to NTS's official website, the live streaming platform was also available on TikTok, Twitter, and Bilibili.

All streams were conducted via NTS's official media accounts.

"Professor Luo, your microphone,"

A staff member reminded Professor Luo Xiang about his mic.

At Mist City Arts and Science University, Big White was activated and stood next to Professor Luo Xiang.

Although Professor Luo Xiang was obviously sitting, Big White was standing because it was cuter that way. And being a robot, there was no practical difference between Big White standing or sitting.

"Can I have a power strip over here, please?" Xu Bin asked, making the final preparations for Big White before streaming began.

Suddenly, Xu Bin encountered a critical issue.

Big White was stationed inside a red metal box, recharging. However, to keep Big White powered constantly, the red metal box also needed to be plugged into a power source.

Otherwise, given Big White's battery capacity, it wouldn't last long throughout what was expected to be a rather lengthy stream.

It had been estimated by NTS that this episode of "Summer Legal Lecture Hall" would likely run for around one hour and forty minutes up to two and a half hours.

Shortly, a staff member brought over a power strip for Mist City Arts and Science University's robot, Big White.

Xu Bin started to recharge Big White.

Once charged, Big White would be ready to hold up for the entire livestream of the "Summer Legal Lecture Hall".

"Alright, Professor Luo, Big White, are you all set? If so, let's start the stream. The online audience has been waiting for a while."

The person in charge of "Summer Legal Lecture Hall" asked Professor Luo Xiang and Xu Bin.

Professor Luo nodded and responded, "Yes, I'm good."

Xu Bin also gave a thumbs-up, then stepped aside. Once the streaming started, only Professor Luo Xiang and the robot Big White could be shown in the camera frame.

"Alright, let's get ready. Operation team, begin attracting traffic. Equipment team, start the live stream!"

The person in charge ordered.

The on-site crew started bustling about their business.

The live stream room was now open.

NTS's live stream of "Summer Legal Lecture Hall" was simultaneously initiated on NTS's official website, Twitter, TikTok, and Bilibili.

Meanwhile, all these platforms started drawing traffic.

That is to say, providing a prominent entryway to the live stream room from their platforms.

An entrance to the live stream of NTS's "Summer Legal Lecture Hall" was displayed on the homepages of Twitter, TikTok, and Bilibili, featuring portraits of Professor Luo Xiang, the Outlaw, and the robot Big White.

Surely, such a live stream entrance cover would attract plenty of attention.

After all, they were the super popular legal anchor, Professor Luo Xiang, and the super popular robot, Big White!

What kind of sparks would fly when the two collided?

Days ahead, NTS and Professor Luo Xiang had already promoted the event – a law popularization live stream featuring Professor Luo Xiang and the robot Big White, to be held at 10 am on July 17th.

A lot of netizens were highly expectant, awaiting the opening of the live stream eagerly.

Many of the audience preparing to watch the stream were not only fans of Professor Luo Xiang but also fans of Big White the robot. The combination of the two was bound to be exciting.

"First!"

"Am I first?"

"I'm first!"

"Here it is, it's here!"

"Hello Big White, hello Professor Luo!"

The instant the live stream room started, numerous online viewers flooded in, and the bullet screen comments began to fly, mostly jostling to claim they were "first".

Although it's unclear who actually entered first, everyone believed it was them.

Indeed.

Netizens always have great confidence in themselves!

"Haha, Big White and Professor Luo appear together. I'd never have thought!"

"Isn't Big White a health and medical robot? How come it's doing a live stream with Professor Luo Xiang?"

"Big White looks so cute and lovely."

"When can I have a Big White of my own?"

"It's unlikely Big White will become commonplace in the short term, just be patient."

"I also want a Big White as a pet, hehehe."

"Shocking! Outlaw and robot Big White are appearing together!"

"I never would have imagined in my wildest dreams that Big White would be live streaming alongside the outlaw."

"This is like KFC and a hot pot place holding an event together."

The influx of eager online visitors to the live stream room was immense.

But!

This was a "Summer Legal Lecture Hall" streaming room, mostly aimed at popularizing legal knowledge rather than chitchatting with the online audience.

"Hello, everyone, I'm Luo Xiang,"

Professor Luo Xiang introduced himself at the beginning of the live stream: "Today, I will be doing a live stream collaboration on 'Summer Legal Lecture Hall' with the legal robot Big White from Mist City Arts and Science University. Welcome to our streaming room."

"Legal robot?"

"Is Mist City Arts and Science University this talented? Shortly after the creation of the medical robot, now they've come up with a legal robot? "

"I thought it was a medical robot, didn't expect it to actually be a legal robot. Impressive!"

"Actually, it's just programming. Big White mainly depends on different chips like medical chips and legal chips. Different chips provide different functionalities."

Chapter 276: Big White kindly prompts you ghs was sentenced ____ years

Some netizens with more expertise conducted a knowledge sharing session online, though it's unsure if their comments were noticed by the majority.

"Big White, come and say hello to everyone," instructed Professor Luo Xiang in the manner taught by Xu Bin, initiating an interactive greeting with Big White.

Robot Big White must receive a voice command before it can proactively greet people.

At this moment,

Robot Big White received Professor Luo Xiang's interactive command.

Usually, this type of command is set for all, meaning that anyone can tell Big White, "Big White, greet everyone", and upon hearing this, Big White would then greet everyone.

Because Robot Big White is now engaged in public activities, this type of interactive command is set.

If Big White is to provide private services, then it can be set to respond to private commands.

That is to say, only the owner can command Big White, and Big White would only carry out the command after hearing the 'master' instruction.

This type of command setting is generally set up for non-public Robots like Big White.

The robot Big White belonging to the lady who won the first personal robot Big White from the Twitter lottery, has private command settings set.

Upon receiving Professor Luo Xiang's interactive command, Big White raised its hand and greeted users in the live broadcasting room, "Hello everyone, I am the legal robot Big White!"

"Hahaha, Big White is still so cute."

"Big White, you're killing me with your cuteness."

"Wah wah wah, Big White you've changed, you've become a legal robot."

"I checked the official Twitter of Mist City Arts and Science University, and Big White can supposedly take on several types of chips at the same time. For now, Mist City Arts and Science University has written a medical chip and a legal chip for this number 1 robot."

"That's incredible! So, if they design an idling chip, wouldn't Big White become a cook?"

"Hahaha, if they use the National Arts chip, would Big White know Kung Fu?"

"Wow, that's impressive! Imagine composing chips for Big White in various fields, making it a multi-functional super robot!"

"But the cost of that would be too high."

"Yes, yes! Big White's cost must consist largely of the cost of the chips after all, everyone knows how valuable a chip is, let alone the chips for a Robot like Big White."

"I'd be happy just to own a health care robot."

"Hehe, actually according to the thought process of Mist City Arts and Sciences University, in the future you can write various chips, such as medical, legal, gourmet, and National Art chips, and that would mean Big White's multifunctionality. When Big White is widely used, everyone can select different functions according to their requirements."

"The genius above should be recruited by Principal Ding!"

It's clear, at the start of the live broadcast, the discussion about legal robot Big White was quite prevalent amongst netizens.

But as the official program began, Professor Luo Xiang started talking about all kinds of peculiar cases, and when the outlaw appeared, the atmosphere in the live broadcasting room became jovial.

"Today's tips for entering jail delivered!"

"Hahaha, Professor Luo Xiang still has that familiar style."

"What crime did the outlaw commit this time?"

"I'm the outlaw!"

"Big White's (●-●) dumbfounded look is so cute."

Professor Luo Xiang continued to present the case, "Today, the outlaw saw an unlocked door and decided to go in and take some money. Did the outlaw's behaviour constitute a crime? And of course, Big White, tell everyone, what crime did the outlaw's behavior constitute?"

"The outlaw entered a residence without permission and stole money, constituting a burglary offence."

Big White interactively responded.

"Big White is kind of amazing."

"I have to say, this legal chip in Big White is quite something."

"Damn, it's really impressive. After merely hearing Professor Luo Xiang describe the situation, it was able to analyse and identify the crime committed!"

"I heard that this legal chip of Big White's is programmed based on the 'Comprehensive Legal Solutions' compiled by the students and faculty of the Law Department at Mist City Arts and Science University."

The online viewers were all impressed by this legal function of Big White and admired the students and faculty of Mist City Arts and Science University Law Department for being able to put together such a powerful 'Comprehensive Legal Solutions'. This, coupled with the Computer Science Department's ability to write intelligent programs based on this, was phenomenal!

"Big White, if the outlaw stole five thousand yuan from the house this time, how should he be sentenced?"

Professor Luo Xiang continued to interactively ask.

"The outlaw burglarised and stole five thousand yuan, which is a substantial amount. According to our country's criminal law, theft of public or private property amounting to a large sum, or repeated thefts, burglary, weapon-assisted theft, and pickpocketing should be punished with imprisonment of up to three years, detention or probation, and a fine."

Big White responded.

"That's right, the outlaw would face a maximum of three years in prison for this burglary. However, the outlaw, not wanting to go to jail, threatened the homeowner with a weapon after being discovered."

Professor Luo Xiang adeptly adapted the storyline of the outlaw burglarising case.

At this point, Big White stated, "Burglary and robbery are easily interchangeable. In many cases, burglars resort to violence or threats when discovered by the homeowner, usually with a weapon, which then becomes a case of robbery. After being discovered by the homeowner, the outlaw threatened the homeowner with a weapon, which escalated to a robbery offense, a more serious crime."

Chapter 277: Big White kindly prompts you ghs was sentenced _____ years

"Professor Luo's interaction with Big White is simply perfect!"

"Hahaha, there's no disharmony at all!"

"Big White is awesome!"

"This situation would definitely be considered burglary, guys don't try this at home!"

"Agricultural student here!"

"Prospective senior student in humanities, reporting in!"

"Third year accounting student from Jincheng University, reporting in!"

"Automation major from Shuicheng Vocational University, reporting in!"

"Second-year marketing student from Yangcheng University of Commerce, reporting in!"

In the virtual room, someone started a roll call and the comment section filled with students and their universities.

Professor Luo Xiang and Big White weren't paying attention to the comments because this was part of the Summer Legal Lecture Hall, so they only interacted with the audience when necessary.

Moreover, there were staff members dedicated to monitoring the comments.

"So in this situation, what kind of punishment would outlaw face?" Professor Luo Xiang asked Big White.

Big White (●—●) blinked, then responded: "One who robs public or private property by force, intimidation or other methods shall be sentenced to fixed-term imprisonment of not less than three years but not more than ten years, and be fined.

Where any of the following circumstances are present, the person will be sentenced to not less than ten years of fixed-term imprisonment, life imprisonment or death, and in addition, may be fined or have property confiscated:

1. burglary
2. robbery on public transportation
3. robbery of a bank or other financial institution
4. repetitive robbery or robbery of an especially large amount

...

8. robbery of military supplies, or materials for disaster relief, disaster recovery or welfare supplies."

"So clearly, my friend outlaw committed burglary, which would lead to at least ten years of fixed-term imprisonment!"

Professor Luo Xiang naturally took over from Big White.

Because when Big White recites law articles, it can be a bit dry and could affect the atmosphere of the live stream.

Big White blinked again, saying in a very friendly tone: "Big White kindly reminds everyone not to commit burglary or robbery, otherwise you will face severe criminal punishments. Let's be good citizens together and abide by the law."

Big White's words immediately won over the audience in the live stream!

Because of the friendly tone Big White had, it was extremely inviting and resonated well with the everyone.

Immediately.

Some generous patrons in the live chat sent out a set of Big White emojis that read "Big White kindly reminds you, obey the law or go to jail" and similar versions.

The emojis appeared in the live chat and were made into mini videos by some creative folk on TikTok.

The speed of the internet is mind-boggling.

Many netizens thought that the "Legal Warnings" emoji set by Big White was really interesting and they shared it widely.

The emoji set showed up in various QQ and Whatsapp groups and on Twitter.

Wen Ruohan refreshed his Twitter and saw his classmates from the secretariat class start to share Big White's emojis.

The Mist City Arts and Science University student exchange groups that Wen Ruohan was part of also shared Big White's emojis,

[Mist City Arts and Science University Chat, Cat, and Love Group]——

"Stop bullshitting around."

"Big White kindly reminds you, if you bullshit in the group, you'll be arrested."

"Big White kindly reminds you, group members who cause chaos will be detained for fifteen days!"

"Hahahaha, this Big White kindly reminds you is hilarious (can't help but laugh) "

"[Big White kindly reminds you emoji.jpg], keep causing chaos, and face the death penalty!"

"It became popular that quickly?"

"Awesome, I've seen Big White's emojis on Twitter, TikTok and Weibo."

"Whoever made this emoji is a genius."

"Who would have thought, our school's robot Big White, got popular again."

"Small-time celebrities are jealous and crying..."

Chapter 278: Kicked the Bad Guy Away with a Foot

The two-hour live broadcast of "Summer Legal Lecture Hall" finally ended in the morning.

Professor Luo Xiang sipped on a cup of water, his mouth dry and tongue parched.

The on-site staff members began to tidy up and prepared to go to the dining hall for lunch. Xu Bin and Chen Jun from Mist City Arts and Science University were also putting away the legal robot Big White.

Ever since Tong Yihang and Liu Tiefei's team left on the Crystal Cruise luxury liner for a global sea tour, the task of managing Big White had been handed over to Xu Bin and Chen Jun.

They were, after all, the people who knew Big White best apart from Tong Yihang and Liu Tiefei.

After all, the chip of Big White was programmed by Xu Bin and Chen Jun themselves.

"Big White, go to sleep."

Xu Bin issued the sleep command to Big White.

Zzz~

The next second, Big White began to deflate automatically. After its internal gas was released, Big White's polyvinyl alcohol fiber body started to become limp and was then placed inside a red metal box. The red metal box closed automatically, and the green light on top lit up.

The green light on the red metal box meant that everything was normal with Big White.

"Professor Luo, everyone from Mist City Arts and Science University, let's go to lunch," a staff member from the NTS's legal channel approached Professor Luo Xiang and Ding Yue and others to say.

"Good."

Ding Yue rubbed his stomach, indeed feeling a bit hungry, so he joined Professor Luo Xiang and followed the staff to the dining hall.

The dining hall was on the second floor of the NTS building.

"Do we have another live broadcast in the afternoon?"

While dining at the table, Ding Yue asked Professor Luo Xiang while having his meal.

"Mm, each episode is divided into two parts, one in the morning, one in the afternoon, and one episode a week, but it's alright for you guys to participate only once," Professor Luo Xiang nodded and said.

"Oh oh, I heard from the staff just now that the afternoon session seems to be focusing on popularizing legal knowledge and role-play in Outdoor Legal Lecture Hall?" Ding Yue asked again.

"Yes."

Hearing Professor Luo Xiang's reply, Ding Yue was relieved. After attending Professor Luo Xiang's "Summer Legal Lecture Hall" today, he could return to Mist City Arts and Science University tomorrow.

Fortunately, he only needed to participate in one episode; otherwise, he would really find it a bit troublesome.

But.

Since he was participating in this episode, Ding Yue decided to take full advantage of the opportunity and discuss with Professor Luo Xiang about joining Mist City Arts and Science University.

If he could invite Professor Luo Xiang to be a guest professor at Mist City Arts and Science University, it would be nothing but beneficial.

"Professor Luo, how do you feel about cooperating with our legal robot Big White from Mist City Arts and Science University this morning?"

Ding Yue raised his head with a smile and started discussing Big White with Professor Luo Xiang.

The last time Ding Yue watched a video of Big White's first test with Professor Luo Xiang, he could tell that Professor Luo Xiang was very interested in and liked the legal robot Big White.

Thus, Ding Yue planned to "start" with Professor Luo Xiang from this aspect.

Ding!

"Congratulations to the host for obtaining a [University Task]—Famous Professor!"

"Task content: Successfully invite a famous professor (any subject area) to join Mist City Arts and Science University."

"Task reward: 50 reputation points!"

Suddenly.

The system prompt sounded in Ding Yue's mind after a long absence.

Indeed, it had been a long time, as Ding Yue hadn't received any tasks from the system or completed any [University Honors] to receive rewards recently.

However.

Now the task was here again.

And it was perfectly in line with Ding Yue's current plan.

Just as Ding Yue was about to invite well-known Law Professor Luo Xiang to his Mist City Arts and Science University, the system issued a corresponding task to him.

Although the reward for the task wasn't that generous, just 50 reputation points.

But for Ding Yue.

Reputation points were already a very good thing because he could exchange them for many good things in the system's mall.

Most importantly.

The task seemed pretty easy to him at the moment, and he was confident that he could "win over" Professor Luo Xiang.

So weren't these 50 reputation points practically being given to him for free?

As soon as Professor Luo Xiang heard Principal Ding mention the legal robot Big White, he instantly looked up, his eyes flashing with a certain expression, "Mmm, Big White is really good, I have to admit that the comprehensive legal solutions compiled by your Law school is indeed comprehensive."

"Yes, the teachers and students of our Law school have compiled and organized almost all the legal codes of our country and even internationally, and then the Computer Science team has written them into a program and put it in a chip," Ding Yue said proudly.

"This type of legal robot must be very expensive, isn't it?" Luo Xiang asked out of curiosity, "I heard that the medical robots of your school have already been inducted to start pilot testing at Mist City Central Hospital?"

This Big White and the medical robot Big White in Mist City Central Hospital are basically the same kind of robot, just with different chips installed.

"Yes, we've entered a partnership with Mist City Central Hospital, choosing it as the pilot hospital, so ten of our health bots have already been placed in the Central Hospital," Ding Yue answered the latter part of Luo Xiang's question first.

Then he answered the former part, "Currently, it does seem that the manufacturing cost of the legal robot Big White is quite high, especially the programming of the chip. However, if Professor Luo likes Big White, we could give you one."

Chapter 279: Kicked the Bad Guy Away with One Foot

At this moment, Ding Yue unexpectedly unveiled his secret weapon to "lure" Professor Luo Xiang.

Yes, you heard right.

Professor Luo Xiang was surely fond of the law robot Big White, and thus Ding Yue said he could certainly gift one to him.

To Mist City Arts and Science University, which held the core technology of Big White, rebuilding another legal robot would come down to material and manufacturing costs—tens of thousands of dollars at most. This was not a big deal for Ding Yue.

In today's world,

it is the core and patented technologies that truly matter.

Because the merchandise you invent cannot be replicated by others using your technology. Otherwise, original creators would be effortlessly terminated by copycats. This is when Patent Law plays a hugely significant role.

Replicate my robot Big White, and you risk bankruptcy from a lawsuit!

However,

There would always be companies choosing to take the risk.

For instance, over the past couple of months, two domestic companies were secretly conspiring to clone a robot similar to Big White.

Though Ding Yue was yet to be aware of it.

"Give...giving me a legal robot Big White?" Professor Luo Xiang almost thought he had heard wrong.

His eyes filled with surprise.

Ding Yue smiled in relaxed amusement and nodded, "Yes, Professor Luo Xiang, we would love to give you a legal robot Big White if you like it."

"Isn't that...a bit inappropriate?" Professor Luo Xiang asked hesitantly.

Indeed.

How could anyone feel at ease about accepting such a coveted robot like Big White?

"Not at all. We've already started collaborating, so there will certainly be more opportunities for cooperation in the future," Ding Yue said with a smile. "For example, once our University's law school is up and running, we hope Professor Luo can extend your support."

Ding Yue slowly moved the conversation towards the main subject.

Talk of this nature was different from formal business negotiations—where both parties are expected to collaborate from the start.

At such times, one could cut straight to the chase.

However, just because Ding Yue wanted to have this conversation with Professor Luo Xiang, did not necessarily mean that Luo had any interest in obtaining a position at Mist City Arts and Science University.

So,

At such an instance, tactful approaches were needed. With a gradual approach leading to the main topic.

"The road to public law education in our country is a long one. That's why we need more law students, to establish and enhance a better judiciary. Does your university plan to focus on the development of its law school, Principal Ding?"

Professor Luo Xiang asked wisely.

When it came to discussing laws and legal systems, Professor Luo Xiang adopted a serious demeanor.

This was his life's ambition.

He has trained many excellent law students and has made significant contributions to the spread of legal education in Xia Country.

"Absolutely, our law students are dedicated and diligent, and the Comprehensive Legal Solutions chip for our legal robot 'Big White' was collated by them through their hard work. How could I not care for such diligent and lovely students?"

Ding Yue responded earnestly.

"Principal Ding, are you implying..."

After listening to Principal Ding's remarks, Professor Luo seemed to have understood his intentions.

Being experts, they understood the nuances in each other's words.

"If Professor Luo could take an honorary position at our university and teach a class, it would indeed be a significant reward for our students,"

Seeing the timing was right, Ding Yue aimed directly at the topic and sincerely invited Professor Luo Xiang to work at his university.

How much he would teach was not really important, since Ding Yue didn't invite him solely for teaching purposes.

After all, Professor Luo Xiang was already a professor at Xia Country Political and Law University and would rarely have time to teach law students at Mist City Arts and Science University.

But holding an honorary professorship was no problem, right?

The students at Mist City Arts and Science University would certainly find it inspiring.

"Principal Ding, as you know, my main work is at Xia Country Political and Law University. I have been invited to visit other universities occasionally, but not very often," Professor Luo Xiang helplessly shook his head.

"That's not a problem. Whenever Professor Luo has some free time, just come and give our students a lecture. They would consider themselves fortunate,"

Ding Yue assured, dismissing the concern.

Upon hearing this, Professor Luo furrowed his brows, "Really?"

"Of course."

"Honestly, Principal Ding, I am genuinely impressed with the law students from your university. Their ability to compile the Comprehensive Legal Solutions that power Big White is truly commendable,"

Professor Luo Xiang first showered praises on the law students from Ding Yue's University.

Then, he stated seriously, "Well, I can't promise to teach your students very often, but I will try to give a lecture at least once per term. How does that sound?"

Seeing Principal Ding's genuineness in inviting him, he decided to give his sincerest support to the law school at Mist City Arts and Science University, as part of his ongoing dedication to the education of law.

Chapter 280: Kicked the Bad Guy Away with One Foot

Secondly, Professor Luo Xiang really wanted a legal robotic named 'Big White'.

After all, the thing is unattainable nowadays!

Furthermore, Professor Luo Xiang understood that the Medical Health Robot Big White might eventually mass produce and gradually become popular in every household in the future.

However.

Making a legal robot Big White is obviously very difficult.

Therefore, if he wanted to have a legal robot Big White, he could only hope that Mist City Arts and Science University would gift him one.

And just now, Principal Ding had mentioned he would gift him one.

Professor Luo didn't want to just take it, so he planned to take on a position at the law school of Mist City Arts and Science University. Every term he would allocate time to give lectures. It would be as though he didn't receive the Legal Robot Big White for free.

"Wonderful, Professor Luo! Let me thank you in advance on behalf of the students at our law school from Mist City Arts and Science University!"

Ding Yue's face lit up with excitement.

The excitement displayed was purposeful on Ding Yue's part.

Because Ding Yue was confident that he could "win over" Professor Luo, thus although he was excited to see Professor Luo agreeing, his excitement surely was not that obvious.

That's why Ding Yue thought he could go and further his study in the theater and performing arts department at Mist City Arts and Science University, perhaps in the future he himself could become a great actor.

"Principal Ding, I should be the one thanking you. For ordinary people, having a robot Big White is not easy. To the best of my knowledge, the only private individual to own a Robot Big White, is the lucky user 'Flying Wheat Cake' on Twitter. Therefore, I want to thank Principal Ding and Mist City Arts and Science University for making me the second one."

Professor Luo said excitedly.

Being second in the world, how special was that?

At the side, Ding Yue's secretary Wen Ruohan listened to Principal Ding and Professor Luo's conversation. The conversation ended with Professor Luo becoming an adjunct honorary professor at Mist City Arts and Science University?

What a move, Principal Ding!

Of course, all that Principal Ding had given up was a legal robotic Big White!

Ding Yue had successfully "swindled" Professor Luo into taking up a position at Mist City Arts and Science University, smoothly earning 50 reputation points for himself.

What's key is that this move will probably bring a lot of popularity points to Mist City Arts and Science University. Because Professor Luo had said that after today's 'Summer Legal Lecture Hall' live-stream ends, he would work with Mist City Arts and Science University's official Twitter account for the official announcement.

A figure like Professor Luo becoming an honorary professor will not cause any issues, Xia Country Political and Law University wouldn't interfere too much either.

Because Professor Luo had already become an honorary professor at several law-related universities over the past two years.

After lunch.

Resting in the lounge after lunch, Professor Luo and Mist City Arts and Science University then followed the 'Summer Legal Lecture Hall' program team in the afternoon to leave NTS Building and head to the streets to prepare for the outdoor live-stream.

The indoor live-stream in the morning mainly consisted of Professor Luo and Big White explaining various case analysis for legal education.

The afternoon's outdoor live-stream was different, it focused on illustrating legal education through simulation of real-life common legal cases.

At the same time, there was a key part to demonstrate another powerful function of the legal robot besides verbal legal education!

...

At Haicheng.

At Dingli Group Building.

"President Xu, those two students from Mist City Arts and Science University who bailed last time, it was totally unexpected. I don't know what benefits Mist City Arts and Science University gave them that even our Dingli Group became unattractive."

Liu Guanghui said helplessly to President Xu Wei in the phone.

"How's it going now, without those two students you can't even recruit a better mechanical engineer?"

On the phone, Xu Wei vented his annoyance.

"President Xu, don't let your anger affect your health. Our Dingli Group of course has many excellent mechanical engineers. However you see, to manufacture a robot like Big White, we truly don't have a mechanical engineer who could do that and the chip issue is also hard to resolve."

Liu Guanghui really felt troubled.

Even though his Dingli Group was one of the top mechanical manufacturing companies in the country, without the blueprints and the core technology, how could Dingli Group manufacture the robot Big White?

If only they had a Robot Big White as a reference for imitation.

But they didn't.

The manufacturing data of Robot Big White, was entirely in the hands of Mist City Arts and Science University.

Actually, Liu Guanghui was considering partnering with Mist City Arts and Science University. After the Medical Health Robot Big White finishes its pilot test in Mist City

Central Hospital by Mist City Arts and Science University, Liu Guanghui imagined they would surely go into mass production.

So, doesn't it make Dingli Group an excellent choice for a outsourcing factory?

However, President Xu still wanted to manufacture a robot similar to the Medical Health Robot Big White to compete with Big White.

"Good-for-nothing!"

On the phone, Xu Wei grumbled.

"President Xu, since it's hard for us to compete with Mist City Arts and Science University on the technical level, why don't we just cooperate? Think about it, the Medical Health Robot Big White from Mist City Arts and Science University is currently under pilot testing in the hospital. It's certain that it will go into mass production in the future. Why don't we cooperate with Mist City Arts and Science University? We, Dingli Group, can be an outsourcing factory, and your Rentang Medical Technology can be an assigned reseller. In doing this, we can still make money."
