

## F. University 281

Chapter 281: Kicked the Bad Guy Away with One Foot

Liu Guanghui proposed a strategy that he had recently come up with.

If we can't beat them, join them!

As one of the leading manufacturing companies, Dingli Group could handle the manufacturing aspect of the healthcare robot Big White, while Rentang Medical Technology Group, a medical device sales company, could handle its sales. It's a perfect match.

"Oh, I had planned to acquire the healthcare robot technology from Mist City Arts and Science University at the National Science and Technology Innovation Exhibition, but that fellow Ding Yue wouldn't agree to it!"

Xu Wei was also quite helpless.

He had originally planned to collaborate with Dingli Group to develop a robot similar to Big White, but found it rather difficult.

Now that Liu Guanghui has suggested a collaboration, this could indeed be a money-making opportunity. However, Xu Wei still found it hard to let go of his grudge.

"Alright then, we'll collaborate. No one can fight with money."

After some thought, Xu Wei eventually agreed to Liu Guanghui's proposal.

Although obtaining the patent technology of the healthcare robot Big White would have been the most profitable for Rentang Medical Technology Group, there's nothing to be done if we can't secure it.

"It's good that you've come to terms with it, President Xu," Liu Guanghui said with a smile. "Let's make money together."

"Wait a minute..."

Suddenly, Xu Wei seemed to have an idea: "We still have a chance!"

"A chance? We can't even make a good imitation now. Even if we had a Big White robot to study, that would be great. But we don't have one, so how do we have a chance, President Xu!"

Liu Guanghui was unaware of any chances.

"Mr. Liu, have you forgotten that Mist City Arts and Science University just gave away a healthcare robot Big White on Twitter?"

"Eh, indeed they have...hehehe, now here's a great opportunity!"

...

At a pedestrian street in Yancheng.

A young man, with a stocking over his face, was holding a weapon in his hand.

Upon seeing the armed man, passersby screamed and scrambled for safety. However, one girl didn't manage to escape in time and was almost captured by the young criminal.

At this critical moment...

A large, fat, and white figure appeared before everyone's eyes, swiftly placing himself between the armed young man and the girl who had been left behind.

"Big White gently reminds you: Your actions constitute the crime of endangering public safety, posing a threat to others' lives. Please immediately stop your criminal behaviour!" Big White cautioned the young man in front of him.

At the same time, Big White's system had already dialed the police.

"Hello, this is Yancheng Beicheng Street police station."

"Hello, there's a stabbing incident happening at the west end of Tianming Street Pedestrian Street. I am the legal robot Big White, requesting police assistance!"

Big White reported the incident to law enforcement.

The dispatcher, after receiving Big White's report and quickly receiving a video clip of the crime scene, could see the offender wielding his weapon and causing indiscriminate harm.

"Get outta the way!"

The young man with the weapon glared, seemingly teeming with murderous intent, and growled at Big White.

"Big White gently advises you: Please stop your criminal behaviour. An act as stabbing can lead to severe injury or death, and according to our country's criminal law, can result in a life sentence or even the death penalty!" Big White gave one last legal warning.

"Are you trying to tell me what to do?"

The young man scoffed and began to chase the young woman with his weapon raised.

Beep beep beep!

Big White's eyes turned red in an instant.

Whoosh!

Accompanied by a swooping sound, the seemingly clunky Big White suddenly moved at high speed!

Thud!

A solid punch!

Thwack!

The pudgy Big White kicked the young man.

The young man was sent flying with just one kick from Big White.

"Crack!!! Stop stop stop. Quickly check on Xiao Wang, this fall looks painful." The person in charge of the "Summer Legal Lecture Hall" program hurriedly shouted as one of their staff was sent flying by Big White's kick.

"Big White, what are you doing? You're hitting way too hard. Quickly switch to the medical chip mode!" Seeing this, Ding Yue shouted at Big White, finding the situation simultaneously amusing and exasperating.

Chapter 282: Gradually falling into the trap of Sister

Such a surprise!

It was just a simulated crime scene, where Xiao Wang from NTS TV Station bravely offered to play a "criminal".

The simulation of a street crime was followed by Professor Luo Xiang and the legal robot Big White dispensing legal education.

But then.

Big White reported the emergency and moved forward to stop the crime involving physical harm.

Except...

It was slightly too forceful, just a teeny weeny bit, hehe.

Xiao Wang was first stopped with a punch from Big White, and then kicked away, keeping him at a safe distance from the woman he was chasing.

Although Big White's fist and that kick felt quite soft, that didn't mean the force wasn't powerful.

The braking power of Big White could reach over 400kg. Of course, in this situation, Big White's force exerted would not exceed the point of causing severe harm to a person.

So Xiao Wang was only kicked away but didn't fly very far, it was just unexpected, he fell to the ground and took a tumble.

"Ouch~"

Xiao Wang was holding his right arm, as he seemed to have scraped it against the ground when he fell, causing a slight skin injury.

"Medical health mode switched successfully."

Big White was originally a legal robot, but Ding Yue had just shouted for Big White to switch to the medical chip.

So, the Number 1 robot transformed instantly into a medical health robot.

"Quickly take a look at him," Ding Yue gave the order.

Big White immediately scanned the injured people around, only one, that was Xiao Wang, a member of the program crew who he had just kicked away.

"Hello, I'm medical health robot Big White, I detect that you may be injured, I will carry out a body scan next."

After Big White finished speaking, the robot began to scan Xiao Wang.

"Scan completed, analysing injuries, analysis complete, medium abrasion on the arm, it is recommended to clean the wound, wipe with iodophores, then apply local dressing. Wishing you good health!"

After Big White completed diagnosing Xiao Wang, it gave treatment suggestions.

"Xiao Wang, how are you feeling?" The director of the program crew quickly asked.

Xiao Wang nodded and answered, "Just my scraped arm hurts a bit. Nothing else."

"Quick, Xiao Zhang, Xiao Li, take Xiao Wang to the nearest community hospital to treat his scrape." The director of the program crew told the other two crew members.

"Alright."

The three temporarily left the crew.

"I'm sorry, when Big White encounters this kind of emergency physical harm, it triggers the stop function. Sincerely apologise for causing harm to the staff."

Ding Yue came over, apologizing to the person in charge of the program crew.

"It's fine, these things are unavoidable, very normal, this legal robot of yours, Big White, is really good, and how can it switch to a medical health robot all of a sudden?"

The person in charge of the program crew asked curiously.

Even Professor Luo Xiang was curious, it was definitely a legal robot at the start, the functions it displayed when it was live streaming with Professor Luo Xiang in the morning were all law-related.

In the blink of an eye, it transformed into the warm and caring medical and health robot Big White.

Ding Yue smiled calmly and replied, "In fact, this is our Number 1 robot Big White from Mist City Arts and Science University, it can now freely switch between the legal and medical chips."

"So you mean it has two chips inside it?" Professor Luo Xiang asked in surprise.

Ding Yue nodded and said, "Yes, in the future, we will develop more functional chips for Number 1 robot Big White."

What just happened was witnessed live by internet viewers in the Summer Legal Lecture Hall.

The viewers in the live streaming room were going crazy with laughter.

"HAHAHA, oh my god, that was an incredible kick!"

"The staff was innocently kicked, no, wrong, innocently... kicked."

"Big White: I hope the staff member is okay."

"Staff member: Don't come over here, stay away!"

"Why can you guys send voice messages?"

"HAHA, I'm dying with laughter, Xiao Wang was sent flying by Big White's kick, but luckily he's okay."

"Isn't the funniest part when Xiao Wang got kicked by Big White and then Big White diagnosed him?"

"Big White is hilarious, also, hope the staff member is okay."

"Big White already diagnosed him, it's just a scrape, it's not serious."

"Indeed, it looked like he fell down gently."

"But I must say, Big White's emergency function to intervene after a legal warning is pretty good!"

"Haha, could even be a bodyguard."

"Big White usually walks like a clumsy oaf, but during the simulation when someone was in danger, Big White's speed and burst of power suddenly increased dramatically."

"Mechanical engineering student here to explain, it must be Big White's braking system that's awesome; the braking force indeed looks pretty powerful, of course, this is relative to an average robot."

Although there was a small unexpected incident during the outdoor simulation, it didn't affect anything since the program crew member who was kicked flying by Big White was not seriously injured and quickly attended to the skin scrape.

As today's Summer Legal Lecture Hall live stream had an exceptional number of viewers.

Chapter 283: Falling gradually into the trap, Missy

So the video of Big White "jio" kicking a staff member (playing a criminal) spread around the internet immediately.

Of course.

The video was treated as a comedy and shared on TikTok, Twitter, and Bilibili, complete with hilarious BGM.

Big White was trending again.

Not half a day after the "Big White affectionate reminder" memes trended in the morning, a video showing Big White swiftly thwarting a violent crime and kicking a staff member masquerading as a criminal has gone viral on the web.

"Hahaha, our Big White is too strong!"

"It always looks so silly, who knew it was this strong!"

"Big White is cute and strong, I'm in love!"

"I wish I had a Big White."

"Is this a combination of a legal robot and a health robot? Awesome!"

"You can check out the official Twitter of Mist City Arts and Science University. They mentioned that this is Big White number one, the same one that won the National Robotics Competition and was exhibited at the National Science and Technology Innovation Exhibition. This Big White number one now has both medical health functions and legal education functions."

"Mist City Arts and Science University is awesome! This robot covers several department specializations, that's impressive!"

Netizens were all "wowed" by Big White number one.

Many girls expressed that if they had a Big White like this, their sense of security would be off the charts. Both guarding their health and stopping acts of violence against them in a crisis.

Such a good Big White.

Who needs a boyfriend when you have one of those?

After dealing with the small accident that just occurred, the NTS Summer Legal Lecture Hall live show crew resumed the outdoor live law dissemination simulation.

However, this time, the person in charge asked the staff to take all possible safety precautions.

Some adjustments were made on Ding Yue's side at Mist City Arts and Science University.

"Bin, can you adjust the intensity of Big White's response when stopping violent crimes?" Ding Yue asked Bin by his side.

"Well, I can do that, but give me some time." Xu Bin nodded and quickly asked Chen Jun to bring over the computer, then he connected to Big White number one.

Ding Yue talked to the program director and told him that they were planning to adjust Big White's force settings when thwarting violent crimes to ensure that the staff participating in the simulated crime would not be "jio" kicked again.

"Alright, ten minutes is no problem. I'll let Professor Luo Xiang give a legal lecture first." The show director nodded.

They then sent Professor Luo Xiang on stage to give a legal lecture about the stabbing incident that just happened in the outdoor simulation.

"Zhang San just attempted to stab people with a knife in a public place. Although our Big White stopped him and no one was injured, Zhang San's criminal act has already culminated in a crime of endangering public safety. The crime of endangering public safety can actually encompass many acts."

Professor Luo Xiang started his lecture for the live viewers: "Actually, an incident that happened a few days ago and made the trending news was related to this law. Do you know what event I'm talking about?"

"What event?"

"Something that happened a few days ago?"

"Professor Luo, don't keep us in suspense."

"Will it be about that bus driver from the other day?"

"Yeah, yeah, the drunk driving and Mr. Liu's act of righteousness."

"Did anything major happen these days?"

After a brief pause, Professor Luo Xiang continued: "This incident is somewhat related to Big White's alma mater, Mist City Arts and Science University. Yes, I believe you all know by now, it's the incident where bus driver Mr. Liu acted heroically."

"In this incident, our bus driver Mr. Liu was undoubtedly a righteous hero. Now let's analyze why the drunk driver of the Audi Q7 committed the crime of endangering public safety."

As he lectured, Professor Luo Xiang segued into the incident featuring the heroic act of the Mist City Arts and Science University's bus driver, Mr. Liu, which happened just a few days ago.

Meanwhile, Xu Bin had just adjusted the braking force setting in Big White's program.

"Yue, it's done."

Xu Bin's computing skill was beyond question. He connected directly to Big White's chip and could optimize or change the program on-site.

Ding Yue believed that Xu Bin was likely to become a master of computer programming at Mist City Arts and Science University in the future!

"Big White can go back on stage." Ding Yue told the show director.

...

In a certain university campus.

Today, Flying Wheat Cake with her twin ponytails and a mini-skirt is interacting with the health robot Big White.

Now, she records interaction videos with Big White every day and uploads them to Bilibili and YouTube.

Indeed, even on the international site YouTube, the interaction videos of Big White and Flying Wheat Cake attract a lot of attention.

Foreigners show a lot of interest in this health robot called Big White.

However, many foreigners think that this health robot, besides diagnosing common diseases, can't treat diseases or perform surgeries. They say it is just a "toy".

Chapter 284: The Missy Gradually Falling into the Trap

Flying Wheat Cake would sometimes engage in debates with foreigners.

However, on Bilibili in China, Flying Wheat Cake's videos are extremely popular, with each video generating at least hundreds of thousands of views.

The number of fans Flying Wheat Cake has on Bilibili also successively exceeded 100,000, 200,000, and 300,000.

After all, she is the owner of the first medical and health robot on the web, and more impressively, she's a pretty woman. It would indeed be strange if she didn't gain a huge following.

"Big White..."

Just as Flying Wheat Cake called out for Big White, her mobile phone, which was on the table, rang.

"I'm here, master."

Big White responded.

"Hold on a second, Big White, I'll answer this call." Flying Wheat Cake said and picked up the phone. The call display showed an unfamiliar number, but it wasn't a strange one, just a regular number.

There was no marked note referencing delivery service or anything similar, so Flying Wheat Cake decided to answer: "Hello, how may I help you?"

"Hello, may I speak with Ms. Flying Wheat Cake?"

"Who are you?"

Confused, Flying Wheat Cake responded. She was surprised that the person on the other end knew her internet handle.

"Hello, we are from the marketing department of Rentang Medical Technology Group. We've noticed that you have a substantial following on Bilibili. I was wondering if you would be interested in partnering with us for some advertising works?"

The person on the phone, with a sweet voice, asked.

"Wow! Are you planning to have me do advertising for you?" Upon hearing this, Flying Wheat Cake became incredibly excited.

Any Bilibili content creator would love to generate income through advertising.

After all, earning through advertising can be far more lucrative than simply getting views, with regular content creators rarely landing advertising deals.

Only those creators with high popularity would attract advertisers to actively seek out partnerships, just like what was happening with Flying Wheat Cake right now.

Within a short period, Flying Wheat Cake amassed over 300,000 fans. Bilibili's fan base is known for its loyalty, and getting this many fans in such a short time shows how active they are. Plus, Flying Wheat Cake is diligent about uploading new videos every day.

So it's hardly surprising that advertisers have reached out to her.

And as far as she knew, Rentang Medical seems to be one of the larger domestic medical and medical device manufacturers.

As the videos Flying Wheat Cake creates are all related to Big White, when Rentang Medical Technology approached her about advertising, she didn't think too much about it.

After all, Rentang Medical's business type perfectly matched with the kind of content she creates.

Just like a gaming channel creator would usually get adverts for gaming keyboards, mice, gaming chairs and the like.

A gaming channel creator wouldn't usually get adverts for beauty products, would they?

Beauty product advertisements are best left to the beauty bloggers, and snack advertisements are fit for food bloggers.

"Yes, are you interested? If so, we can go into details about the advertising placement and revenue." Rentang Medical Technology Group's marketing manager asked over the phone.

"Sure, I'm definitely interested. However, if I'm going to advertise your products, they must be legitimate and qualified," replied Flying Wheat Cake, displaying her sense of justice.

She definitely wouldn't collaborate with unethical businesses or manufacturers just to get advertising dollars.

Not only would it ruin her reputation, but it would also harm others. She swore never to do such a thing. She intends to be a responsible content creator.

"You can rest assured that all our Rentang Medical Technology products are fully compliant and legitimate," the marketing manager replies.

"Oh, in that case, let's talk about the specific products we're collaborating on and the mode of cooperation," Flying Wheat Cake responded with high hopes.

Rentang Medical Technology Group doesn't exactly have the best reputation, mainly because of an incident where they were exposed for selling health supplements.

However, Rentang Medical Technology Group also has some products with no issues at all, and Flying Wheat Cake thought that all she needs to do is to be cautious when choosing which products to advertise.

For Flying Wheat Cake, she won't accept adverts for health supplements, but she is open to other types depending on the circumstances.

"The product we want you to advertise is..."

After listening to the explanation from the marketing manager at Rentang Medical Technology Group, Flying Wheat Cake felt that the proposal was quite practical.

More importantly, the proposed advertising fee was very generous.

If she inserts an advert in her video and the video has a good response, she could then earn an advertising revenue of 50,000 yuan per video!

50,000 yuan!

Flying Wheat Cake was astonished! Such a hefty advertising fee is already quite substantial for many content creators. Most creators earn just a few thousand yuan per ad deal, sometimes just about ten thousand, if they're lucky.

Only superstar creators could command such high advertising fees.

Flying Wheat Cake could hardly believe that her first advertising deal could earn her an advertising fee of 50,000 yuan.

What a stroke of luck!

In the meantime, at the headquarters of the Rentang Medical Technology Group.

Xu Wei stood next to the marketing manager in her office.

After the Department Manager, Zhou Li, hung up the phone, she looked at President Xu and asked, "President Xu, she has already agreed to the advertising collaboration, but did we really need to collaborate with a Bilibili content creator like her?"

Chapter 285: The Missy Gradually Falling into the Trap

Looking at the doubt in Zhou Li's eyes, Xu Wei said coldly, "Don't ask questions. Just invest more in advertisements for her in the future and offer more favorable prices. Understand?"

"Yes, President Xu!" Zhou Li nodded, taking his words as final.

Xu Wei's current plan involved making his move through Flying Wheat Cake, giving them a taste of the benefits to come.

Then, he would see whether Rentang Medical Technology Group could secure the healthcare robot, Big White, from the clutches of Flying Wheat Cake.

If they were able to do so, then, in collaboration with the United Dingli Group, they would clone Big White to manufacture their own medical robots, which would yield considerable profits.

Capitalists, when it comes to profits, can risk it all.

If the potential profit doubles or even triples, then moral boundaries or legal standards won't be viewed as obstructive by them!

Xu Wei, when it came to making money, never cared about his reputation. Otherwise, Rentang Medical wouldn't have had the health product scandal in the past.

Xu Wei believed that as long as his company launched a healthcare robot priced lower than that of Feiyue Group, they would easily win the market outright. As for quality, Xu Wei didn't need to pay too much attention, just keep the costs at the bare minimum.

Especially with elderly people, fooling them would be straightforward!

Of course.

Xu Wei and Liu Guanghui had discussed implementing a two-pronged tactic. On one hand, they would continue reaching out to Mist City Arts and Science University, as Rentang Medical Technology Group wanted to become the distribution agent for the healthcare robot, Big White.

As for Liu Guanghui's Dingli Group, they intended to become the OEM for the healthcare robot, Big White.

It happened.

While on a business trip to Yancheng, Wen Ruohan received a phone call from Mist City Arts and Science University.

"Hey, An, is there something important? I'm currently conducting a live broadcast event with Principal Ding in Yancheng. Have you seen it?" Wen Ruohan asked after picking up CEO An Yujia's call from Feiyue Group.

"Um, I watched the live broadcast for a bit. Seems like Big White's session was trending, right?" An Yujia said with a laugh.

Her sisterly manner had eased significantly as she interacted with Wen Ruohan, a younger woman with whom she was steadily forming a closer relationship.

However, An Yujia's voice was still as commanding as ever!

"The thing is, Xiao Wen, I have received multiple business partnership propositions from several companies regarding the production and sales of the healthcare robot, Big White. So, I would like to hear Principal Ding's thoughts."

Earlier in the day, An Yujia received a call from Rentang Medical Technology Group, who expressed interest in acting as the distributors for the healthcare robot, Big White, both online and offline.

About ten minutes ago, An Yujia received another call from Haicheng Dingli Group, where they proposed to become the OEM for the robot.

Dingli Group is rather prominent in the manufacturing and production sphere.

An Yujia wasn't sure a decision that could involve outsourcing production and distribution should be made, and thus decided to consult Principal Ding on the matter.

As with all major decisions, they would require the final approval from Principal Ding.

"Okay, I'll pass the phone to Principal Ding." Wen Ruohan, after hearing An Yujia, walked over to Principal Ding, leaned over, and whispered, "Principal Ding, An has called. She said there's vital business dealing with the Feiyue Group that she wants to discuss with you."

Ding Yue looked up and glanced at his secretary, Wen Ruohan. This girl seemed to have developed a close relationship with An Yujia, referring to her with such familiarity as 'An'.

"Alright."

Ding Yue nodded, took the phone from Wen Ruohan, and said, "Hello, this is Ding Yue."

"Principal Ding."

Hiss!

At the end of the phone line, when he heard the commanding voice of An Yujia addressing him as 'Principal Ding', Ding Yue felt his skin crawl. It sounded way too commanding! How can anyone tolerate it?

Chapter 286: Refusing to cooperate with unscrupulous enterprises

"Principal Ding."

"Miss An, what can I do for you?"

Ding Yue regained his senses from An Yujia's assertive voice and then asked.

An Yujia is the CEO of Feiyue Group, personally appointed by Ding Yue. Knowing that he was out on a trip, she still called him. There must be something important.

Otherwise, for usual trivial matters concerning the Feiyue Group, Ding Yue had told her that she could make decisions on her own.

As long as it does not affect the overall direction of development of the Feiyue Group.

Because the operation of the Feiyue Group is closely linked to the construction and development of Mist City Arts and Science University.

"Principal Ding, here is the thing, Haicheng Dingli Group contacted us, saying that they want to be the OEM for our medical health robot, Big White."

An Yujia first talked about the phone call she received from Haicheng Dingli Group.

"Haicheng Dingli Group... I've heard of it. It seems to be a well-known domestic manufacturing company."

Ding Yue felt that this company seemed very familiar.

Aside from its reputation, Ding Yue vaguely felt that the Dingli Group had something to do with his Mist City Arts and Science University?

But where exactly the connection is, Ding Yue, who had been very busy lately, really couldn't recall at the moment.

"Principal Ding, so would you see if we should establish a production partnership with Haicheng Dingli Group? I've checked their capacity, and it has no problem with OEM production. They have even taken orders for state-owned machinery manufacturing in the past."

An Yujia analyzed, then asked.

In fact, An Yujia was not particularly optimistic about the strength of the Dingli Group. Despite being a decent manufacturing company in the country, the mechanical products it produced were not very precise.

As everyone knows, there are very few companies in Xia Country that can manufacture machines with high precision. In this regard, there is indeed a gap when compared to foreign companies.

However.

There should be no problem for Dingli Group to manufacture the robot, Big White.

"Miss An, what's your opinion?"

Ding Yue wanted to see if An Yujia's view on this matter was consistent with his own.

If not, it would mean that An Yujia's vision for the future development of the Feiyue Group might be a little bit short-sighted.

If so, it would mean that Ding Yue could completely trust An Yujia's judgment on the company's development strategy.

"Principal Ding, our medical health robot, Big White, is one-of-a-kind. Therefore, the amount of products shipped is determined by us, not dictated by market orders. Besides, we have already begun to establish the production line. After graduation, our Mechanical Engineering students will want to find a good job. Therefore, the production line of our medical health robot Big White could provide positions."

An Yujia saw that Principal Ding wanted to hear her opinion.

So she seriously said: "In the future years, our Mist City Arts and Science University will continue to enroll students and cultivate university graduates in the field of mechanical manufacturing. Therefore, we do not lack manpower. In that case, there is no need for Dingli Group to act as an OEM."

After hearing An Yujia's words, Ding Yue nodded in admiration.

This An Yujia really had some ideas. She had already foreseen the chess game that Ding Yue was playing, using Mist City Arts and Science University to lay out the plan for Feiyue Group.

"Miss An is right. So, from the beginning, I never thought about looking for an OEM."

Ding Yue said with a smile.

The upstream core technology is owned by us, and the downstream production factory should also be ours.

Otherwise, how would we provide job positions for so many students who graduate from Mist City Arts and Science University every year?

"By the way, Principal Ding, besides the Haicheng Dingli Group, another company approached me wanting to discuss a sales agency."

An Yujia continued to report on Rentang Medical Technology Group's interest in becoming a sales agent.

"Which company?"

Ding Yue asked curiously.

In fact, just like the production link, Ding Yue also never thought about handing over the sales link to someone else.

Doesn't his Mist City Arts and Science University's College of Business and Administration have students majoring in Marketing?

"Rentang Medical Technology Group." An Yujia answered.

"What company?" Upon hearing this, Ding Yue subconsciously asked again.

"Principal Ding, it's Rentang Medical Technology Group." Thinking that Principal Ding did not hear clearly, An Yujia repeated.

In fact.

Ding Yue heard it the first time. He knew Rentang Medical Technology Group all too well.

Not to mention that Rentang Medical isn't exactly high on morals, even the first time that their boss, Xu Wei, dealt with Ding Yue at the National Science and Technology Innovation Exhibition, it left a bad impression on Ding Yue.

Rentang Medical had huge ambitions in the past, wanting to buy the patent core technology of the medical health robot, Big White, from Mist City Arts and Science University.

But Ding Yue declined.

I would be mad to sell to you!

If it was a common robot made by a mechanical engineering team, facing Rentang Medical Technology Group CEO Xu Wei's offer to buy the patent technology for fifty million yuan, or even possibly one hundred million yuan, they might have accepted it.

Chapter 287: Refusing to cooperate with unscrupulous enterprises

They would probably sell it.

Because for an ordinary team, if the robot they have developed is successful, it's all for making a good deal. Who they sell it to doesn't really matter, as long as they can make good money from it.

However.

Unfortunately for Rentang Medical Technology Group, they're dealing with Ding Yue.

The patent for the medical health robot, Big White, is in Ding Yue's hands, and Ding Yue is not the kind of person who is short of money.

Moreover.

Why would Ding Yue possibly sell a robot product like Big White to a company with little to no ethical standards?

In the field of medicine, the consequences of abandoning ethical standards are simply horrifying!

"Has Principal Ding ever had dealings with Rentang Medical Technology Group?" An Yujia asked curiously, after hearing Principal Ding's tone.

"Heh, Rentang Medical Technology Group wanted to buy the patent technology for our medical robot Big White. This company makes medical devices and they don't respect the ethical line. I could never consort with them!"

Ding Yue said dismissively.

An Yujia was somewhat surprised when she heard this.

Domestically, management of such businesses may not be very strict, which is why companies like Rentang Medical Technology Group can survive on the margins.

Principal Ding's choice not to do business with such a company is indeed the correct one.

"Then Principal Ding, I'll just reject these two companies straight away." An Yujia said seriously.

"Sure, go ahead."

Ding Yue expressed no objection. Suddenly, Ding Yue heard that An Yujia had just mentioned two companies.

Two companies...

Since Ding Yue had deep distaste for Rentang Medical Technology Group, did the Dingli Group also seem to have some connection with Rentang Medical?

Ding Yue had been wondering why Dingli Group seemed vaguely familiar.

Now he remembered!

Wasn't his Mechatronics team, including Tong Yihang, previously poached by Dingli Group?

In the end, however, Tong Yihang and Liu Tiefei did not disappoint. They refused the lucrative offer from Dingli Group, choosing to stay at Mist City Arts and Science University and join Feiyue Group after graduation.

Of course, Ding Yue also offered excellent conditions, and Tong Yihang and Liu Tiefei had certain feelings for the university.

This managed to resolve the crisis caused by Dingli Group's poaching attempt.

Why did Dingli Group want to recruit Tong Yihang and Liu Tiefei, students from Mist City Arts and Science University?

Could it really be as simple as the fact that they had won the first prize and the innovation award at the National Robotics Competition?

This is what Ding Yue thought at the time.

Thinking about it now, it seems it might not be that simple.

Could Dingli Group have some connection with Rentang Medical Technology Group?

"Miss An, could you look up the relationship between Dingli Group and Rentang Medical Technology Group for me?" Ding Yue asked, very curious.

"Ok, Principal Ding. Do you suspect there's some connection between these two companies?" An Yujia asked, curious as well.

"Yes, both of these companies have had direct or indirect interactions with me!" Ding Yue couldn't come to any conclusions just yet.

His curiosity was simply about the relationship between the two companies.

Based on the current situation, it doesn't seem that these two companies will have any impact on him. It's just that he is proactive in not wanting to cooperate with them.

"Alright, Principal Ding. I'll look it up now, and I'll let you know when I find out."

After An Yujia finished speaking, she hung up the phone.

After talking to An Yujia, Ding Yue continued to watch the live broadcast of Professor Luo Xiang and the number 1 robot Big White's "Summer Legal Lecture Hall".

Apart from a small incident, the afternoon's outdoor live broadcast went very smoothly.

Big White's performance was very impressive, earning countless online praises.

Most importantly.

Because of today's trending topics, Big White had become an Internet sensation loved by everyone.

Yes, it's just a robot, but it has its own official Twitter account.

And the fan base has exploded.

After Director Liu Hongxia of the Mist City Arts and Science University's Publicity Department set up and verified Big White's official Twitter account under Ding Yue's instructions, it gradually gained a lot of follower attention.

Before today, Big White had hundreds of thousands of Twitter followers.

Today.

Big White once again made it into trending, with two incidents trending; one was "Big White's Warm Reminder Emoji", and the other was "Worker kicked away by Big White". At this time, more netizens realised that Big White actually had a personal Twitter account.

So they followed en masse, and in a matter of minutes, the number of followers surpassed one million and continued to increase at a terrifying rate.

Big White's popularity was so great that it made the Internet celebrities and stars green with envy. How great would it be if they had such real popularity?

After the afternoon's outdoor live broadcast of the "Summer Legal Lecture Hall" ended, the people from Mist City Arts and Science University took Big White back to the hotel.

Professor Luo Xiang also went home.

Because Professor Luo Xiang himself lives in Yancheng.

After returning home, Professor Luo Xiang called Ding Yue and said he planned to announce his secondment to Mist City Arts and Science University on Twitter.

That refers to what was agreed upon this morning.

Chapter 288: Refusing to cooperate with unscrupulous enterprises

Then, Ding Yue's Mist City Arts and Science University would also make an official announcement in response.

"Okay, Professor Luo, we will also issue a notice immediately," said Ding Yue after speaking with Professor Luo.

"Alright."

"Thank you again, Professor Luo, for your support of our School of Law at Mist City Arts and Science University. However, regarding the matter of making a legal robot, Big White, for you, it may take a bit longer."

Ding Yue remembered this and had to explain it to Professor Luo.

It wasn't a cunning move on Ding Yue's part.

The machine team at Mist City Arts and Science University that can currently make the robot Big White, namely Tong Yihang, Liu Tiefei, Yang Jie, and Li Shengbin, had already boarded the Crystal Cruise for a global tour.

So, they can only make Robot Big White after they come back. However, the legal chip can be programmed in advance by Xu Bin's computer team.

"That's okay." Professor Luo Xiang wasn't in a hurry.

Since Principal Ding had given his word, Professor Luo Xiang figured he wouldn't renege instantly, and he suspected that Principal Ding must have some difficulties.

"Professor Luo, here's the situation," Ding Yue had to explain, "The mechatronics team, who made Robot Big White last semester, they really worked hard. So, I let them go out and relax after this semester by arranging a global luxury cruise tour for them. They boarded on the 15th, so your Robot Big White can only be produced after they come back."

"Haha, it's okay. Principal Ding, you treat your school team very well. I've been at Xia Country Political and Law University for so many years and never dreamed of such good treatment."

Professor Luo Xiang calmly said, expressing his admiration for the luxurious treatment of the global luxury cruise tour arranged by the school.

"How about this, Professor Luo, For the Robot Big White we are giving you, in addition to the law chip, we'll add a medical chip. It will be dual function, it can also take care of your health. Consider this as an apology for me neglecting the time factor this morning."

Ding Yue said with a smile.

"Haha, thank you, Principal Ding." Professor Luo Xiang understood that this was not intentional from Principal Ding, so he didn't say much.

After finishing the call with Professor Luo, Ding Yue called Liu Hongxia, the head of the publicity department at Mist City Arts and Science University, and told her to keep an eye on Professor Luo Xiang's Twitter. Once Professor Luo Xiang posted an update, the official account of Mist City Arts and Science University should immediately follow up with a notice.

About three minutes later.

Ding Yue refreshed Professor Luo Xiang's Twitter homepage with his cell phone and saw the newly published tweet.

[Professor Luo Xiang]v: I had a great collaboration with the Robot Big White from Mist City Arts and Science University today. The appearance of Big White is going to make a positive impact on legal literacy in our country. After today's conversation with Principal Ding of Mist City Arts and Science University, I had quite a few thoughts. I have accepted Principal Ding's invitation and am honored to become an Honorary Professor at Mist City Arts and Science University. Let's work hard together, law students of Mist City Arts and Science University!

Repost (19), Comment (54), Like (119)

Not long after Professor Luo Xiang's tweet was posted, there were many comments and likes.

"Wow! Professor Luo is actually collaborating with Mist City Arts and Science University."

"Congratulations to Mist City Arts and Science University for gaining Professor Luo."

"Any law school that can have Professor Luo as an honorary professor must be good."

"After watching today's live broadcast of Professor Luo and Robot, Big White, I knew that the law school of Mist City Arts and Science University is impressive!"

"I guessed it. After all, they collaborated, and although Mist City Arts and Science University is a private university, it's quite good. At least, the legal robot Big White opened my eyes."

"Does this mean that if I, a law-biased student who doesn't think I will get into Xia Country Political and Law University, can still go to Mist City Arts and Science University?"

"Hahaha, buddy, the differences in your grades are huge. Xia Country Political and Law University requires more than 600 points, while Mist City Arts and Science University can recruit without asking for grades."

"Then I'm going to Mist City Arts and Science University this year. I didn't do well in the college entrance examination. I'm such a loser, but I really like law."

"Not bad, not bad. I hope that with the name of Professor Luo, Mist City Arts and Science University will become better and better."

"Did anyone notice that Mist City Arts and Science University has a lot of potential? In just one year, it's achieved quite a lot. It's much better than most private universities, right?"

"Is the teaching at Mist City Arts and Science University really that good?"

"I, a dropout from the college entrance examination, am preparing to go to Mist City Arts and Science University now and am working to save up for the tuition."

After scanning the comments section of Professor Luo Xiang's Twitter, Ding Yue made a welcoming post for Professor Luo on his personal Twitter account, and many netizens came to the comments section to congratulate him.

Some even stated that they were optimistic about the future development of Mist City Arts and Science University.

Because over the past year, although Mist City Arts and Science University has not achieved anything hugely impressive, they have made some achievements, big and small.

Chapter 289: Refusing to cooperate with unscrupulous enterprises

Reputation is the most important thing!

Throughout this year, the reputation of Mist City Arts and Science University have been maintained at a pretty good level, to the point where the students treat the school like their own home.

Not every university can achieve such a reputation. Perhaps it's only those century-old, elite universities that have such a good reputation, right?

Of course.

But some elite schools seem to have disregard for their reputation?

Like Zhecheng University, for example?

The news of Professor Luo Xiang joining Mist City Arts and Science University quickly became a trending topic.

After all, Professor Luo Xiang is a highly popular law professor, and Mist City Arts and Science University, undoubtedly, is one of the most popular universities recently.

Many bystander netizens expressed their surprise, commenting that Professor Luo Xiang actually formed a cooperation with Mist City Arts and Science University.

Some unaware netizens started with a barrage of keyboard typing, questioning what Mist City Arts and Science University even was, stating they had never even heard of it before.

Well, okay.

Although Mist City Arts and Science University had trended numerous times over the past year, it did not trend every day, so it was fairly normal for some people not to know about them.

After Professor Luo Xiang's tweet came out, Ding Yue used his personal Twitter account to welcome the addition of Professor Luo Xiang. Then, the official Twitter account of Mist City Arts and Science University also tweeted about this news.

At this moment, the law students of Mist City Arts and Science University in the dormitories were beyond excited!

As law students, they know Mist City Arts and Science University doesn't have the resources and standing like those of Xia Country Political and Law University.

Hence, after they graduate, finding employment will undoubtedly prove more difficult.

But now!

Professor Luo Xiang has become an honorary professor of Mist City Arts and Science University.

This undoubtedly has become a resounding symbol for the Law School at Mist City Arts and Science University!

After having Professor Luo as an honorary professor, it will be much simpler for the law students to find jobs after graduation.

They might even get a chance to pursue postgraduate study, and go to Xia Country Political and Law University to become a genuine student of Professor Luo Xiang!

...

On a construction site in a remote county of Xia Country.

A young man, with dark skin from working under the sun, sat on a pile of bricks, looking at a trending topic on his outdated smartphone.

"Learn law! For my dad! I must study law!"

Liu Ping clenched his fists, once again, reinforcing his resolution.

However.

Because his hometown had significantly insufficient educational resources, Liu Ping's exam scores from the recent College Entrance Examination made it very tough to enter any provincial or municipal Political and Law University.

But just now, Liu Ping saw a trending topic about his favourite law professor, Luo Xiang, becoming an honorary professor at Mist City Arts and Science University.

This suggests that the Law programme in Mist City Arts and Science University is not too bad, otherwise Professor Luo Xiang wouldn't have accepted the honorary professor position.

The most important point is.

Liu Ping knew that Mist City Arts and Science University doesn't strictly need scores for admission. Even those who failed the College Entrance Examination could still gain admission through independent recruitment as it is a newly established private university.

So, Liu Ping quickly picked up his phone, opened the browser to find the official website of Mist City Arts and Science University, filled in his information as a prospective student, and signed up for independent recruitment!

While generally anyone who registers will be admitted to Mist City Arts and Science University.

Yet one significant problem for Liu Ping was the tuition fee.

Mist City Arts and Science University is a private university, unlike public universities with a tuition fee of a few thousand yuan, Mist City Arts and Science University charges 25,000 yuan!

For Liu Ping, who grew up without a mother and whose father was sentenced to life imprisonment, this was an astronomical figure.

So the day after the College Entrance Examination, he went to the construction site to work hard and earn money.

"About Financial Aid Loans for needy freshmen at Mist City Arts and Science University for the 2021 Academic Year..."

Suddenly, just as Liu Ping was feeling desperate, he absentmindedly scrolled down the official website of Mist City Arts and Science University and saw this announcement.

Hope was reignited in the young man's heart!

Chapter 290: TV Station Interview!

July 18th.

Morning.

At Yancheng Airport, Ding Yue led a group from Mist City Arts and Science University to the airport, ready to catch a flight back to the university.

Professor Luo Xiang also specially came to see-off Principal Ding and the students of Mist City Arts and Science University, as well as the robot Big White numbered ①.

Although they had only spent a short one or two days together, Professor Luo Xiang genuinely took a liking to the university's robot Big White numbered ①.

"Student Wen Ruohan, you go ahead and get the plane tickets for everyone," Ding Yue instructed his secretary, Wen Ruohan, in the airport terminal.

"Alright."

So Wen Ruohan, together with Chen Jun from the computer science department and Zhang Yang from the law school, went to get everyone's tickets.

"There's still some time before boarding, Professor Luo, let's sit for a while."

Ding Yue looked at the time and saw that there were still two hours before boarding, so he found a place with seats for him and Professor Luo to sit and chat for a while.

Huang Youjie and Xu Bin also joined them.

Especially Huang Youjie, the "ace student" of the law school in Mist City Arts and Science University, who had a very solid grasp of professional knowledge.

Yesterday, Huang Youjie had several professional discussions with Professor Luo Xiang, and Professor Luo praised Huang Youjie for his solid and thorough understanding of the basics of legal studies.

"Xiao Huang, your future in law is boundless," Professor Luo Xiang commented, bringing up Huang Youjie again in their conversation.

"Haha, he is our future Chief Legal Officer of both Mist City Arts and Science University and Feiyue Group. Of course, if Professor Luo is willing to join, then the position of Chief Legal Officer belongs to you."

Ding Yue laughed heartily as he patted Huang on the shoulder.

Upon hearing this, Huang Youjie immediately shot a glance at Ding Yue.

Professor Luo Xiang simply laughed and shook his head, "I'm too old and don't have the energy for that anymore. I'm quite happy with my role in education and teaching right now. Principal Ding, you guys should focus on developing the law specialty in Mist City Arts and Science University. There is a great demand for law students in the future. Our country actually needs more grassroots lawyers."

"Definitely, we certainly have to develop in good faith. I also hope that Professor Luo can come and teach more often," Ding Yue replied resolutely.

Professor Luo nodded slightly, "Principal Ding, rest assured. Whenever I can spare some time, I will come over to Mist City Arts and Science University to teach."

"We appreciate that, Professor Luo."

While Ding Yue and Professor Luo Xiang were deep in conversation, Wen Ruohan, the secretary, approached.

"Principal Ding, the chief editor of the news channel at NTS is on the phone. He is looking for you," Wen Ruohan reported, holding a cellphone in her hand.

"Hmm?"

Ding Yue frowned slightly, then took the phone from Wen Ruohan, wondering why the chief editor of the NTS news channel would be looking for him.

Most recently,

Ding Yue had already had interactions with the main channel and the legal channel of NTS.

Now the chief editor of the news channel was reaching out to him. Ding Yue thought it seemed he had an innate ability to attract attention from NTS.

In fact, having a certain connection with NTS was quite beneficial, after all, this was NTS.

"Hello, I'm Ding Yue, Principal of Mist City Arts and Science University," Ding Yue introduced himself, as he had no idea what the chief editor of the news channel's name was.

He didn't even know his surname.

"Principal Ding, hello. I'm Liang Zhengyi, the chief editor of the 'Exclusive Interview' column on the NTS news channel. I knew you were visiting NTS Delight Tower yesterday, but I was too busy with another news piece and couldn't come over. Today, when I arrived, I discovered you all had already left," a middle-aged man's voice came from the phone.

"Hey, we just left the hotel and arrived at Yancheng Airport. What can I do for you, Chief Editor Liang?" Ding Yue asked out of curiosity.

"Principal Ding, our column is in charge of conducting exclusive interviews for NTS. The event involving Mr. Liu, your bus driver, has caused quite a stir in the past few days

and Mr. Liu's act was very touching. Therefore, we wish to seek your opinion on conducting an exclusive interview with Mr. Liu and your university. What do you think, Principal Ding?" Liang Zhengyi asked cautiously.

Even as a staff of NTS, if the other party was not willing to accept the interview, there was nothing he could do about it.

However, Liang Zhengyi felt that it would be a pity not to interview this courageous act. After all, it was a good opportunity to promote positivity to the public.

"Oh, an interview. That's a good thing. Mr. Liu's heroic act in this incident is worth promoting. However, Mr. Liu's consent is needed," Ding Yue praised NTS's idea of conducting an interview.

However, this matter,

Despite being the principal of Mist City Arts and Science University, he couldn't represent Mr. Liu's opinion. Therefore, Mr. Liu's consent was still needed.

"Principal Ding, we have already contacted Mr. Liu about this, and he said it was fine. He mentioned that he wanted to know your opinion," Liang Zhengyi explained with a laugh on the phone.

"Hahaha, in that case, there is no problem. When will you come for the interview, Chief Editor Liang? We will definitely cooperate fully from our side at Mist City Arts and Science University," Ding Yue echoed with a hearty laugh upon hearing this.
