Chapter 321: Soft and Hard Measures, The Girl Almost Fell

Xu Jia slowly put down her phone, her expression suddenly turned blank. After a long while, she reluctantly looked at her medical health robot, Big White.

Should I sell?

She was really torn.

"Jiajia, what's wrong?" A roommate noticed that something was off with Xu Jia and quickly approached her.

"I'm currently scanning the health status of my owner. I detect a decrease in dopamine secretion and a depressive emotional state. Friendly reminder from Big White: You can do what you like to cheer up. Keeping a happy mood is essential for good health."

Big White's voice suddenly chimed in.

Then Big White opened its arms and gave its owner, Xu Jia, a big hug.

"Wow, Big White is so warm!"

Seeing this, the roommates were all envy. They wished they could also be hugged by Big White like this.

However, Big White's programming only allows it to behave like this towards its owner. Unless you own a Big White medical health robot, you wouldn't get to enjoy this treatment.

"Thank you, Big White. Big White, go give my roommates a hug too, heeheehee." After getting a hug from Big White, Xu Jia's mood seemed to improve slightly.

Hearing her roommates say they also wanted a hug from Big White, Xu Jia commanded her medical health robot to go and give her roommates a hug.

Big White, adorable and naive, turned around and walked towards Xu Jia's roommates.

"Ladies, I've encountered a difficult decision. Can you give me some advice?"

Xu Jia decided to listen to her roommates' opinions, as she had a great relationship with them.

"What's up?" A curious roommate asked.

"I have been advertising with the Rentang Medical Technology Group lately. Just now, President Xu of Rentang Medical Technology Group called me, wanting to buy my medical health robot, Big White."

Xu Jia shared the situation with her roommates and added: "President Xu also said that if I'm unwilling to sell, Rentang Medical Technology Group would basically no longer collaborate with me on advertising in the future."

"What?" One of the roommates was very surprised upon hearing this.

"Jiajia, this...this is forcing you to sell, right? Currently, all your ad collaborations are with Rentang Medical Technology Group, you rejected all other advertisers."

"Yes, exactly!"

"Jiajia, how much is President Xu offering?"

"One million." Xu Jia answered.

"My god, one million!" A roommate couldn't help but exclaim after hearing the price.

One million was an astronomical figure for ordinary students.

"But Jiajia must be very reluctant to sell Big White. After all, Big White has been with us for so long, it would be too bad if it was sold." A roommate made an emotional argument.

"But that's one million! And if she doesn't sell, Jiajia won't be able to continue advertising with Rentang Medical Technology Group."

"Hmph, it's not a big deal to not advertise with Rentang Medical Technology Group. We can find other advertisers."

"Exactly, I've never really liked Rentang Medical Technology Group anyway. You must have heard of the controversies they were involved in before."

"Indeed, if it weren't for the hefty fee, I would've suggested that Jiajia stop taking Rentang Medical Technology Group's ads."

In just a few sentences, the roommates just made Xu Jia even more indecisive.

"I feel like Rentang Medical Technology Group was setting a trap for Jiajia right from the start when they asked her to advertise."

Suddenly, a roommate started formulating a conspiracy theory.

However, this conspiracy theory actually seemed quite logical and believable, intriguing the roommates: "Explain?"

"Think about it. Rentang Medical Technology Group started by giving Jiajia such a high advertising fee, running an ad almost every few days. Now they tell her that if she doesn't sell Big White to them, they will stop giving her ads. Isn't it obvious?"

The roommate who suggested the theory explained.

"It makes sense!"

"Yes, exactly, I feel the same."

"That Rentang Medical Technology Group is such a bad company, isn't it?"

"So what should we do? It's one million. Jiajia, maybe you should sell?"

"If she sold Big White, Jiajia would definitely regret it."

Some of the roommates supported Xu Jia selling Big White, after all, Rentang Medical Technology Group had offered one million.

Some roommates did not, because Xu Jia had formed an attachment to Big White, and they felt that the tactics used by Rentang Medical Technology Group were downright despicable.

After hearing her roommates' opinions, Xu Jia was still struggling with the decision.

After a long period of hesitation, Xu Jia picked up her phone and spotted Wen Ruohan, the secretary of Principal Ding of Mist City Arts and Science University, whom she hadn't texted in a while.

"Should I ask Xiao Wen for her opinion?"

Since Xu Jia found making a decision to be so difficult, she decided to seek advice from Wen Ruohan.

After all, her medical health robot, Big White, was initially a gift from Mist City Arts and Science University.

Chapter 322: Soft and Hard Measures, The Girl Almost Fell

Right now.

In a gymnasium far away in Shencheng.

Wen Ruohan sat in the stands next to Principal Ding, watching the basketball match happening in the venue.

Today was the final match between Mist City Arts and Science University and Guangcheng University. The winner would become the champion of the basketball competition at the National University Sports Games.

It was also the last time for their fellow student Yang Chen, to play basketball with his teammates on the court.

After today, Yang Chen would officially join the National Track and Field Team, giving up the basketball that he loved the most.

The first half of the game was extremely intense and thrilling, with even Ding Yue cheering and clapping his hands in excitement.

In the final match, the five members of the Mist City Arts and Science University worked together as a team, with Yang Chen playing a central role and delivering one splendid performance after another.

The Guangcheng University team, on the other hand, was also very strong. After all, they had made it to the final match. They managed to keep the scores very close and often took the lead, increasing the pressure on Mist City Arts and Science University!

"Principal Ding, this Guangcheng University is quite powerful. Their three-point shots are hit so accurately; they feel like they have a kind of location tracker installed on them."

Wen Ruohan couldn't help but exclaim when she saw Guangcheng University taking the lead over Mist City Arts and Science University with another three-point shot.

"Indeed, they are quite strong!"

Ding Yue nodded his head, not denying the impressive strength of the Guangcheng University basketball team. However, his own Mist City Arts and Science University basketball team was no less impressive either.

"Mist City Arts and Science University team, keep it up!"

Wen Ruohan suddenly yelled, cheering for the Mist City Arts and Science University basketball team.

On the court, Yang Chen was playing the game with full efforts.

Because Yang Chen was very clear, this was his last official match, fighting alongside teammates on the basketball court.

This was also the final of the basketball competition at the National University Sports Games, there was no reason for Yang Chen not to give his all.

His aim was to present a championship to Principal Ding before he left the university's basketball team.

As expected, effort paid off. Yang Chen once again initiated an attack with the ball and successfully scored a two-point shot.

In the stands, after cheering for her own Mist City Arts and Science University basketball team, Wen Ruohan noticed a message on her phone and proceeded to check it.

Flying Wheat Cake Missy: Are you there? I have something I need your advice on.

"Hmm?"

Wen Ruohan let out a curious murmur.

As far as Wen Ruohan remembered, Flying Wheat Cake Missy, the one currently messaging her, should be the lucky Twitter user who won the first medical health robot Big White given out by Mist City Arts and Science University, right?

Wen Ruohan had added her on Whatsapp to communicate with her about the delivery details.

After Flying Wheat Cake Missy received the medical health robot Big White sent by Mist City Arts and Science University, they basically didn't exchange many messages.

But now, out of nowhere, Flying Wheat Cake Missy had messaged her, saying there was something she wanted Wen Ruohan to consider for her?

Had something happened?

After some thought, Wen Ruohan replied, "Miss Flying Wheat Cake, what's the matter?"

Flying Wheat Cake Missy: Thing is, a company called Rentang Medical Technology Group wants to buy my medical health robot Big White. Do you think I should sell it?

Upon reading the message sent by Flying Wheat Cake Missy, Wen Ruohan took a contemplative pause before replying: "Hmm... This medical health robot was gifted to you by Mist City Arts and Science University, it belongs to you now, so you have full ownership and the right to dispose of it."

Flying Wheat Cake Missy: But... I don't know whether I should sell it or not. Rentang Medical Technology Group has offered a price of one million yuan.

"One million?"

Wen Ruohan was genuinely surprised upon seeing this price.

Because Wen Ruohan knew the manufacturing cost of the medical health robot Big White, along with the price it would be sold at in the future, would not be so high. Even according to what Principal Ding had said, it seemed the selling price would not exceed one hundred thousand yuan.

Wait a minute!

Wen Ruohan seemed to recall something and re-read the message sent by Flying Wheat Cake Missy.

She noticed the mention of the "Rentang Medical Technology Group" in the message.

"Did you just mention Rentang Medical Technology Group?" Wen Ruohan cautiously confirmed to Flying Wheat Cake Missy.

Flying Wheat Cake Missy: Yeah, the Rentang Medical Technology Group. Initially, they contacted me for a video advertisement collaboration, and then today, their President Xu called me to say that they want to buy my medical health robot Big White for one million yuan. Furthermore, he said that if I don't sell it to them, I might not receive any advertisements from them in the future, which would cut off my source of income.

After confirming that it was the "Rentang Medical Technology Group", Wen Ruohan was immediately on guard. She replied: "Hold on, something doesn't feel right. Let me first consult with our Principal Ding. For now, could you refrain from responding to Rentang Medical Technology Group?"

Flying Wheat Cake Missy: ???? Alright.

Wen Ruohan immediately turned to Principal Ding, who had been engrossed in watching the match. Although she was hesitant to interrupt Principal Ding, this matter had to be discussed.

That's because Wen Ruohan suspected that Rentang Medical Technology Group harbored ill intentions. After all, they had previously wanted to purchase the patented technology of the medical health robot Big White by Mist City Arts and Science University at the National Science and Technology Innovation Exhibition. However, they were directly and resolutely rejected by Principal Ding.

Chapter 323: Soft and Hard Measures, The Girl Almost Fell

Now, Rentang Medical Technology Group wants to buy the health robot that Mist City Arts and Science University gave away to Twitter user Flying Wheat Cake. Their motives don't seem pure, do they?

With such speculation and suspicion, Wen Ruohan felt it necessary to tell Principal Ding about this.

"Principal Ding."

Wen Ruohan called out to Principal Ding.

However, because the crowd was so lively, with loud cheers and applause, Principal Ding did not respond to her.

So Wen Ruohan reached out and patted Principal Ding's arm, and called out again: "Principal Ding?"

Ding Yue felt someone patting him, turned his head and found it was Wen Ruohan, and asked curiously: "Huh? What's up?"

"Principal Ding, about something, do you still remember the Rentang Medical Technology Group?"

Wen Ruohan quickly spoke when she saw that Principal Ding had heard her.

However, just then, Guangcheng University scored another three-pointer, and the arena erupted in cheers and applause.

The wave of sound drowned out Wen Ruohan's voice.

"What?"

Ding Yue apparently did not hear clearly what Wen Ruohan had just said. It seemed like she was asking if he remembered something.

Remember something? What?

"What were you saying, Wen Ruohan? I didn't hear you clearly" - Ding Yue asked, frowning.

Fortunately, the cheering and applause had died down a bit. Worried that Principal Ding could not hear clearly, Wen Ruohan leaned in and said: "Principal Ding, do you remember the Rentang Medical Technology Group?"

"Rentang Medical Technology Group? What's going on?" Ding Yue nodded his head and asked with a puzzled expression.

"Principal Ding, here's the thing. Our Mist City Arts and Science University gave away a health robot called Big White to Miss Flying Wheat Cake through a Twitter lottery. Then, the Rentang Medical Technology Group approached Miss Flying Wheat Cake, saying they wanted to buy Big White for a hefty price!"

Wen Ruohan explained the situation to Principal Ding, then handed him her phone.

Ding Yue, having heard this, looked at the chat record on Wen Ruohan's cell phone with Miss Flying Wheat Cake.

Immediately, Ding Yue had a bad feeling.

This Rentang Medical Technology Group seemed to have set a trap for Flying Wheat Cake, digging a hole for her to fall into, with the clear aim of getting the health robot Big White from her.

"Can't give up, huh?"

Ding Yue muttered to himself.

Previously, at the National Science and Technology Innovation Exhibition, Ding Yue had firmly rejected the Rentang Medical Technology Group. This is a pharmaceutical and medical device company with no limit. There's no way he would sell the health robot to them.

Didn't they also propose to represent and distribute our product a while ago?

Ding Yue even turned that down.

So why would Rentang Medical Technology Group now want to pay a large sum of money for the health robot Big White from Flying Wheat Cake? What's behind this?

"Principal Ding, Rentang Medical Technology Group previously wanted to distribute our health robot Big White. Now they want to get Big White from Miss Flying Wheat Cake, do they have some sinister plan?"

Wen Ruohan expressed her concerns and felt it necessary to remind Principal Ding.

"There's a strong possibility."

Ding Yue nodded, murmuring to himself.

This Rentang Medical Technology Group keeps showing up in his line of sight. If there was no issue, Ding Yue wouldn't believe it.

Probably Xu Wei, the boss of Rentang Medical Technology Group, is still thinking about the health robot Big White from Mist City Arts and Science University, right?

"Principal Ding, we should be careful." Wen Ruohan once again reminded Principal Ding.

"About this... well, Wen Ruohan, tell Flying Wheat Cake..."

Chapter 324: Principal Ding! Entered!

Ding! Dong!

Flying Wheat Cake finally received a Whatsapp reply from Wen Ruohan.

She herself could not make a decision, unsure if she should sell her medical health robot, Big White, to Rentang Medical Technology Group.

So she chose to ask someone at Mist City Arts and Science University.

After all, this Medical Health Robot, Big White, was manufactured by Mist City Arts and Science University.

Wen Ruohan: I asked Principal Ding, he said if you are short of money, you can consider selling it.

What?

Mist City Arts and Science University suggested it could be sold?

After Xu Jia saw Wen Ruohan's Whatsapp message, the scale, which had been evenly poised between selling and not selling, began to tilt towards selling.

At the Shencheng Stadium.

"Principal Ding, why are you suggesting to Flying Wheat Cake to sell the medical health robot, Big White?"

Wen Ruohan, unable to figure it out, looked at Principal Ding and asked: "It's clear that Rentang Medical Technology Group just wants our medical health robot, Big White, probably intending to do something malicious, Humph."

Wen Ruohan had already seen "everything".

In fact, Ding Yue agreed with what Wen Ruohan said.

Ding Yue realized the small scheme of Rentang Medical Technology Group, they are trying to acquire Mist City Arts and Science University's medical health robot, presumably to study the technology of the medical health robot, or even imitate production, and then sell it for a profit.

After all, the concept of the medical health robot had been pitched by Mist City Arts and Science University.

They just want to reap benefits without sowing?

Fine!

Ding Yue would let them pick!

"Yes, but all the technology of Robot Big White is protected by patents applied by Mist City Arts and Science University, Rentang Medical Technology Group is preparing to copy or plagiarize our medical health robot, we can use legal measures to solve this when the time comes."

Ding Yue, with a faint smile on his face, said: "The most important thing is, after Rentang Medical Technology Group invests a lot of money to mimic Big White and create their medical robots, we will then file a lawsuit...Hehehe."

Ding Yue had already decided, seeing the Rentang Medical Technology Group trying several times to get the medical health robot, Big White, from the Mist City Arts and Science University, why not play along with them? When it comes to filing lawsuits, he could let the students from his own Law School get a taste of real-life action.

Learning law from monotonous legal texts is not as effective as participating in a real lawsuit.

"Wow, Principal Ding, you are cunning!" Wen Ruohan couldn't help but exclaim.

"For a cancer like Rentang Medical Technology Group, it's better to eliminate it in one fell swoop." Ding Yue coldly laughed.

If he had just suggested that Flying Wheat Cake not sell the medical health robot, Big White, to Rentang Medical Technology Group, then Rentang Medical Technology Group might have given up on getting a robot as a template and invested their money into other sectors to sell health products that scam the elderly?

That wouldn't be fun!

Ding Yue wanted to play with Rentang Medical Technology Group because the parallel world's Xia Country had very robust laws in patent technology and intellectual property rights.

Yet, even so, people, like Rentang Medical Technology Group, would disregard the law and pirate products for massive profits.

If so.

Ding Yue's plan was to wait until the Rentang Medical Technology Group invested all of its funds, began massive production of the medical robots, and then with a legal weapon, dealt a lethal blow that would completely eradicate this cancer with no chance of recovery.

"Principal Ding, but what if Rentang Medical Technology Group sells a lot of medical robots, makes a lot of money, and then absconds with the money?" Wen Ruohan asked worriedly.

"Do you think Rentang Medical Technology Group, in order to save costs, will manufacture a medical health robot of better quality than ours at Mist City Arts and Science University?"

Ding Yue had a profound understanding of these deceptive medical equipment companies.

In the guise of a medical equipment company, they exploit every loophole, and Ding Yue firmly believed that the quality of the medical chip program developed by Mist City Arts and Science University's joint Medical and Computer Science Departments was not something Rentang Medical Technology Group could replicate.

And Ding Yue's medical health robot, Big White, even if it was mass-produced in the first batch, would not be immediately available to the general public.

It would be in cooperation with official hospitals.

Ding Yue would be taking a legitimate route; clearly, Rentang Medical Technology Group would sell directly to the public, taking the wilder route.

And from a quality perspective, Ding Yue was confident that Mist City Arts and Science University's medical health robot, Big White, could crush the knock-off made by Rentang Medical Technology Group.

And when the time comes, people would vote with their feet and know which to choose.

Also, Ding Yue would use legal procedures to trap Rentang Medical Technology Group when the time was right.

After Ding Yue asked An Yujia to investigate the relationship between Rentang Medical Technology Group and Dingli Group last time, it was clear that Rentang Medical Technology Group was plotting against Mist City Arts and Science University's medical health robot.

Because An Yujia found out, nearly all of Rentang Medical Technology Group's medical equipment was produced by Dingli Group.

Chapter 325: Principal Ding! Entered!

By combining what happened at the National Science and Technology Innovation Exhibition—when Xu Wei, the boss of Rentang Medical Technology Group, wanted to buy the patent technology of Ding Yue's medical health robot Big White—and the subsequent actions of Dingli Group, who specifically poached Big White's core R&D manufacturing students Tong Yihang and Liu Tiefei.

It now seems that Rentang Medical is directly and indirectly attacking him.

Could Ding Yue remain indifferent?

Suddenly, an outburst of cheers erupted from the scene.

Ding Yue looked up towards the basketball court and saw that Guangcheng University had once again scored a three-pointer, and the score had already overtaken Mist City Arts and Science University.

He could see that the second half of the game was quickly coming to an end.

Ding Yue pondered, could it be that in their last match at Mist City Arts and Science University, they won't even be able to win the championship?

That would be too tragic! Just now, Ding Yue was thinking about waiting to see Yang Chen and his team win the championship, and then happily wrapping up the National University Sports Games with the "University Honor" reward.

...

On Xu Jia's side, after a final debate, she reluctantly decided to sell her health care robot Big White to Rentang Medical Technology Group.

Although Xu Jia loved Big White, the amount of money they offered was simply too much.

Additionally, Xu Jia had considered the robot's purpose in her life. Big White served primarily as a companion, interacting with her every day and appearing in videos to be uploaded online.

The healthcare functionalities of Big White were practically useless to her, given that Xu Jia was healthy overall and only got sick a few times a year.

Moreover, once Feiyue Group, which was behind Mist City Arts and Science University, begins mass production of Big White and sells it in the market, Xu Jia could always buy another unit.

So,

Xu Jia picked up her phone and dialed President Xu Wei of Rentang Medical Technology Group.

At that time, Xu Wei was in his office when he received a call from Xu Jia.

"So, Xu Jia, you've made up your mind? Great, I'll contact you immediately and fly to your city to sign the agreement in person and pay the full 1 million yuan purchase price!" Xu Wei couldn't help but reveal a triumphant smile as he spoke these words.

Once he got his hands on the medical robot Big White from Xu Jia, his Rentang Medical Technology Group could replicate their own medical robot. Then they could let Dingli Group handle the production and manufacturing.

They might even be able to go public before Ding Yue of Mist City Arts and Science University could begin producing on a large scale.

Xu Wei could already foresee that the profit from this deal would be the largest in the history of Rentang Medical Technology Group.

Although Xu Wei knew that this might infringe on some patent rights,

the tremendous profits made risking such infringement worth it. They just needed to discreetly sell their copied robots without letting Mist City Arts and Science University know.

Once he confirmed Xu Jia's agreement to sell her medical robot to Rentang Medical Technology Group, Xu Wei immediately dialed Liu Guanghui from Dingli Group.

"Hello, President Xu, what's up?"

"We are about to get it."

"Really? So the girl agreed to sell?" Liu Guanghui was a bit surprised when he heard this.

"Ha ha ha ha, it's just a young girl. Just give a price that she can't refuse, right?" Xu Wei said with a hearty laugh.

"But, the price I offered to Tong Yihang and Liu Tiefei from Mist City Arts and Science University was also irresistible, right?"

Liu Guanghui began to doubt himself.

Something didn't seem right.

Everyone offered the students an irresistible price. However, the students he approached refused him, while the student Xu Wei approached accepted.

"We don't need those two people now. You're not telling me that Dingli Group can't even come up with a few robotic engineers, are you?" Xu Wei asked about the real issue.

"You can rest assured about that. As long as we have a model of Big White, we can manage to imitate its functions. Don't you remember how Dingli Group got its start?" Liu Guanghui was very confident about this.

Developing and manufacturing a robot like Big White could be a bit of a struggle.

But with a sample in hand, would I not be able to make a high-quality replica of it?

This wasn't precision machinery like chip production!

"Great. I'll be waiting for your good news then," Xu Wei said with a smile. "By that time, we will launch our product before Mist City Arts and Science University. The market research department of our company has already completed their research—those retired elderly men and women simply love this robot."

"Of course! Those retired old men and women, full of ailments and money. You have a good keen eye, President Xu!"

Liu Guanghui had already seen the tremendous market potential.

Indeed.

In Liu Guanghui and Xu Wei's view, as long as they can create a medical robot identical to Big White and market it under the slogan "monitoring health condition to ensure physical and mental health", they could definitely make a killing among the wealthy retired senior demographic!

...

"Nice!"

Inside Shencheng Stadium.

Upon seeing Yang Chen's precision three-pointer, Ding Yue couldn't help but shout, "Nice!"

Chapter 326: Principal Ding! Entered!

Because of this three-pointer, Mist City Arts and Science University's score successfully took the lead by one point.

And there was only one minute left in the game.

The Guangcheng University players made another strong push, but it ended in interception.

After Yang Chen gets the ball, he launches a counterattack like lightning, and finally scores a two-pointer!

"Nice!"

Ding Yue excitedly clapped his hands,

We were three points ahead.

The game was about to end. Even if Guangcheng University scored a three-pointer, it could only lead to a tie.

"Principal Ding, oh, Guangcheng University is about to shoot a three-pointer!!! Ah!!!"

Seeing the quick counterattack by Guangcheng University, Wen Ruohan suddenly became a bit nervous, with a player seemingly preparing to shoot a three-pointer to turn the tides.

That shot, even Ding Yue, was terrified.

They weren't really going to score and tie the game, were they?

Ding Yue was so nervous that he didn't dare to watch. He closed his eyes hoping for the saya theory — if I don't see it, then it didn't happen!

"Ah!!! Principal Ding!!! It's in!!! Oh no, it hurts, my heart hurts!"

Wen Ruohan screamed out loud.

Uh!

Xiao Wen, you just watch the game, why are you yelling?

I was already employing the saya theory, and you're telling me Guangcheng University made that three-pointer?

Ding Yue opened his eyes, wondering what kind of nonsense Wen Ruohan was talking about?

Anyone who didn't know better would think that he'd done something wrong to her.

On the court, the Guangcheng University players were very excited, because they had scored that three-pointer and managed to tie the game.

However, there were only about twenty seconds left.

Yang Chen and every one of his teammates were filled with a spirit of counterattack. There was still a chance!

Yang Chen quickly organized a counterattack, and the Guangcheng University basketball players actively defended. If they intercept this time, they could even launch a counterattack. If they score, it would be a true comeback.

However!

Yang Chen did not give Guangcheng University the opportunity to realize this fantasy because Yang Chen broke through the defense with the ball and reached under the basket!

"The ball is in!"

The announcer was very excited. This goal was scored like flowing water. The cooperation of the Mist City Arts and Science University team was seamless.

The final few seconds, and the Guangcheng University player who got the ball knew it was over.

They ran out of time mid-chase and the player had to forcefully throw the ball towards Mist City Arts and Science University's basket.

Obviously, such a long shot was unlikely to go in.

Just as expected, the shot did not go in, and the game was over!

"Mist City Arts and Science University is impressive!"

"666! After getting caught up at the last moment, their mentality didn't falter at all. The final two-pointer was perfect."

"Their coordination was too good."

"This player from Mist City Arts and Science University, Yang Chen, is simply terrifying!"

"Congratulations to Mist City Arts and Science University!"

"Impressive, this Mist City Arts and Science University won the basketball championship, and I remember this Yang Chen also broke the record in the 100m sprint at the National University Sports Games, didn't he?"

"Yes, yes, yes, it's him, he has a very strong burst of energy, and his speed on the field is simply amazing!"

The spectators began to cheer and applaud for the champions of this game.

Ding Yue stood among the cheering crowd, feeling very excited at this moment. Not just because of the applause and praise for Mist City Arts and Science University winning the basketball championship, but also because of the glory at this moment.

Mist City Arts and Science University finally ended the National University Sports Games perfectly!

At this time, the campus of Mist City Arts and Science University.

Many students who were not in class sat in front of computers in their dormitories, watching the live broadcast of the game.

When they saw Mist City Arts and Science University's basketball team successfully beat Guangcheng University, they immediately burst into cheers.

"We are the champions!"

"Yang Chen is awesome! The basketball team of Mist City Arts and Science University is awesome!"

"Perfect ending!"

"You guys are incredible!"

"Another gold medal, my school is amazing!"

Excitement and jubilation ran through the campus of Mist City Arts and Science University, the forums, and student groups.

Just like the day when Yang Chen broke the 100-meter record at the National University Sports Games, the students of Mist City Arts and Science University felt very excited and enthusiastic.

Because it was their schoolmate who broke the record, rounded up it was them who broke the record!

We're just that good!

Ding!

"Congratulations to the host for completing [A-level University Honor] — National University Sports Games Gold Medal +1."

"Congratulations to the host for winning the [A-level University Honor] reward: Reputation Points + 50, [Level 1 University Treasure Chest +1]."

Just as the Mist City Arts and Science University basketball team was being awarded, a notification sounded in Ding Yue's mind.

Another successful [A-level University Honor], and there was a [Level 1 University Treasure Chest] among the rewards.

Great, can open another treasure chest.

"Principal Ding, we've perfectly ended our participation in the National University Sports Games, haven't we? Hehe."

Wen Ruohan standing by the side said happily.

Chapter 327: Principal Ding! Entered!

"Mm hmm, everyone did quite well!" Ding Yue nodded very satisfactorily.

The feeling of a perfect ending is completely different from the regret of defea

Half an hour after the awards ceremony, the spectators in the gymnasium had basically all left.

Ding Yue also led the Mist City Arts and Science University basketball team and other athletes out of the gym and back to the hotel.

For this last game of the school basketball team, all the students and teachers from Mist City Arts and Science University who were in Shencheng came to the scene to cheer for Yang Chen and his team.

Fortunately, Yang Chen and his teammates did not disappoint everyone's expectations and finally won the championship at the last moment.

After returning to the hotel, Ding Yue called all his players from the Mist City Arts and Science University basketball team to his hotel room, he was definitely going to praise them and reward them!

"You all did well, this championship couldn't have been achieved without the effort and dedication of each of you."

Ding Yue looked at the neatly standing row of students in front of him and praised them with a smile.

Everyone was quite happy to hear Principal Ding's praise.

What Ding Yue said next made them even happier: "As I said, at this National University Sports Games, anyone who wins a championship will get a reward. I will personally pay a reward of fifty thousand yuan to each of you!"

Ding Yue, according to the previous rule of rewarding Liu Xiaojuan and Yang Chen, rewarded each champion by fifty thousand yuan.

Although the basketball championship is a team championship, Ding Yue still rewarded each member with fifty thousand yuan.

Because such team matches cannot be separated from the hard work and dedication of every individual.

"Thank you, Principal Ding!"

"Principal Ding is so generous!"

"Fifty thousand yuan, my god, thank you Principal Ding!"

The students were instantly overjoyed.

Because the prize money for National University Sports Games championships is generally very little, but Principal Ding very generously rewarded fifty thousand yuan to each person, who wouldn't be thrilled?

Yang Chen was even more excited.

He had previously won the championship in the 100-meter sprint and had already received a reward from Principal Ding. Now that he has received another reward, he is extremely excited.

However,

soon Yang Chen thought about having to leave the school basketball team and could no longer fight on the basketball court with his teammates. He suddenly felt a little lost.

Ding Yue noticed Yang Chen's emotional state, and as all members of the school basketball team were present,

it was time to tell them about Yang Chen's situation.

"Although we have won the basketball tournament at the National University Sports Games, there is a regretful news that you must know."

Ding Yue sighed helplessly, speaking to the other basketball team members.

Yang Chen understood instantly what Principal Ding meant by saying this.

As the news of Yang Chen joining the National Track and Field Team had not been made public, his teammates did not know yet that today's match was actually Yang Chen's last one.

"What's wrong, Principal Ding?"

"What happened?"

The basketball team members curiously asked.

Ding Yue immediately looked at Yang Chen.

It would be best if Yang Chen himself broke this news.

After understanding Principal Ding's intent from his gaze, Yang Chen took a deep breath, turned his attention, and looked at his teammates with reluctance.

"Yang Chen, what's wrong?" Yang Xiong, who had the best relationship with Yang Chen, asked with a frown.

"Brothers, I'm sorry, I can't continue playing basketball with you all." Yang Chen still painfully told his teammates this "unfortunate" news.

"Ah? Why?"

One player asked in shock upon hearing this.

At this point, Ding Yue explained with a tone of regret, "Yang Chen is about to join the National Track and Field Team and become a professional track and field athlete, so he has to give up his beloved basketball and you guys..."

Chapter 328: The Cunning Merchant in a Difficult Position

Haicheng.

In a manufacturing factory of Dingli Group, a brand-new product has officially started its production.

In just a few days, Dingli Group began replicating and manufacturing Rentang Medical Technology Group's health robot, modelled after Big White.

Rentang Medical Technology Group named this robot "Rentang Health Robot", and its functions are similar to Big White health robot, capable of scanning human health conditions.

However,

To cut costs, Rentang Medical Technology Group took an extremely simple approach to the body scanning function.

The robot's medical chip can't be compared with the one programmed by Mist City Arts and Science University.

In terms of quality and functionality, it's almost filled with vibes of a fake product.

Despite this, thanks to Rentang Medical Technology Group's "reputation" among retired elderly, market research found that a significant number of elderly people favor their company's affordable health robot.

Rentang Medical Technology Group seized upon the elderly's frailty and their desire for good health.

"Hahahaha, Liu, Dingli Group deserves its reputation as a big corporation; the speed of your production line's operation is amazing!"

Xu Wei came to Liu Guanghui's Dingli Group production line for an inspection.

Seeing one Rentang Health Robot after another from his Rentang Medical Technology Group being assembled on the production line, Xu Wei was beaming as if he was seeing piles of gold.

"President Xu, you're underestimating us at Dingli Group. No matter how big the order, we at Dingli Group can handle it."

Liu Guanghui said proudly.

"No wonder you guys at Dingli Group are considered the big players in the domestic manufacturing industry." Xu Wei joined in Liu Guanghui's business praise exchange.

"Ahem, President Xu, keep a low profile. Speaking of which, we have already started production of the health robot. Have you been certified for the medical device yet?"

Liu Guanghui asked with concern.

After all, only if Rentang Medical Technology Group's Rentang Health Robot sells well, will his Dingli Group receive more orders.

Due to the deep cooperation between Dingli Group and Rentang Medical Technology Group, the profit of each Rentang Health Robot order is extremely considerable.

Like Xu Wei, every time Liu Guanghui sees a Rentang Health Robot roll off the production line, he envisions gleaming gold nuggets.

"Fuck! Just talking about the medical device certification pisses me off!" Xu Wei suddenly said angrily.

"What's wrong, President Xu? Is there a medical device certification that even you can't handle?" Liu Guanghui asked with a smile.

In the past, whenever Rentang Medical Technology Group launched a new product, they could obtain medical device related certifications easily.

That's because Xu Wei had connections working in the relevant departments, making the process a breeze.

"Ever since my wife transferred jobs, it's become more difficult to sway the people up top. But as long as we put in the effort, there's no connection we can't make!"

Xu Wei said with a cold laugh.

"I still trust President Xu's skills in this area!" Liu Guanghui genuinely trusted Xu Wei's "skills".

Otherwise, Rentang Medical Technology Group wouldn't have come this far over the years.

"Do you know how much money I spent on making these connections?"

Xu Wei looked at Liu Guanghui helplessly.

"Given the current situation, I assume it's more difficult than before. This much?" Liu Guanghui estimated a figure, extending one finger.

Xu Wei shook his head.

"Could it be this much?" Liu Guanghui extended another finger.

Now, he was showing two fingers.

Xu Wei still shook his head. This time, Xu Wei stretched out his left hand, all five fingers raised.

"It's not easy, with such a huge investment and cost, President Xu, have you staked the entire Rentang Medical Technology Group's fortune on this?"

Liu Guanghui asked in surprise.

"But do you know how much profit we can make this time?" Xu Wei chuckled, "There are at least tens of millions, or even hundreds of millions of elderly people in the country who need health robots to take care of their health."

"Indeed, our country's elderly population is growing." Liu Guanghui nodded.

"Apart from their own retirement pensions, most of the elderly also receive maintenance from their children, which is not a small amount. According to data from previous health product sales in our company, over 65% of the elderly can afford, and are willing to buy our health robots."

Xu Wei said with a proud smile.

"Brilliant!"

Liu Guanghui mentally calculated the immense market size and high profit margin. It was no wonder that Xu Wei would take such a big risk for this.

...

Mist City Arts and Science University.

A few days after Ding Yue led the team back from the National University Sports Games in Shencheng, it would be the freshman registration day for the class of 2021.

Last year's batch of old students started trickling back to school one after another.

Ding Yue was quite expectant, wondering how many students the Class of 2021 would enroll. The admission target set by the system was 15,000 students.

Ding Yue felt this goal wasn't difficult to achieve.

After all, Qi Chunsheng, the Director of Academic Affairs, told Ding Yue that the number of enrollees in the self-recruitment plan had exceeded 25,000.

That is to say, even after deducting 30% of students who registered but didn't show up to school, there would still be at least 18,000 enrollees.

Compared to last year, it could almost double, and Ding Yue felt it might be even more than double.

After all, Mist City Arts and Science University had a lot of bright spots over the past year that attracted many high school graduates to study here.

In addition to this, the promotional video of Mist City Arts and Science University released a while ago also gained the attention of many university dreamers who didn't do well in the College Entrance Examination.

Whether in terms of qualifications or the learning and living environment, Mist City Arts and Science University is a good choice among private universities.

Of course, one would certainly prefer to study at a public university, but clearly there were many students with poor grades in the College Entrance Examination, scoring too low for public university admission, leaving them with private universities which don't demand high scores as their only choice.

In this crowd of universities, Mist City Arts and Science University stood out, with its only shortcoming being that it's relatively "new," having only been established a year ago, and therefore lacks a deep foundation.

After returning from Shencheng.

Due to Yang Chen's departure, the basketball team of Mist City Arts and Science University was temporarily "disbanded".

Because without Yang Chen, the basketball team lost its backbone, and the remaining players had lost their fighting spirit.

There were no outstanding basketball players to be found in the same batch of students from the sports college.

Out of desperation, the team was temporarily "disbanded". It would wait for the injection of fresh blood from the 2021's incoming students, and then select excellent students to supplement the school basketball team.

August 22.

Today is the busiest day for Mist City Arts and Science University.

The logistics department is actively preparing the materials for student registration, while Qi Chunsheng from the Academic Affairs department is arranging for each admissions department to get ready for tomorrow's new student registration.

Tomorrow is August 23, the day when the 2021 incoming students of Mist City Arts and Science University officially register.

Even Lin Zhirou, as the president of the Student Union, was organizing students as an "upperclassman" to assist the Academic Affairs Office in preparing for the admission registration tomorrow.

Without realising it,

The students who were originally freshmen were about to become seniors, and many of them were quite excited, eagerly waiting for the arrival of cute juniors and beautiful girls.

Since it was the returning season, University Town which had been quiet over the summer break suddenly became lively.

However, Ding Yue didn't care about this.

Ding Yue didn't need to participate in the admission registration as there were other people to take care of it.

After lunch, Ding Yue and An Yujia arrived at the practical operating base of the Mechanical Department of Mist City Arts and Science University in the afternoon.

This is also the first production line of the Rentang Health Robot, Big White.

The production line is now complete, and the equipment has been moved and almost installed.

"Currently, our Mechanical Department Practical Operation Base's Big White production line can produce approximately 50 units of Big White per day. However, unfortunately, we don't have that many students majoring in mechanics," An Yujia explained regretfully while walking around the Practical Operations Base.

"Then how many can we produce in a day if we bring all the mechanical students from the class of 2020?" Ding Yue asked An Yujia.

"10 units." An Yujia shrugged and replied.

"Actually, that's not bad. For a long time in the future, the Rentang Health Robot, Big White, will only be supplied to hospitals. As the degree of intelligence is not high enough yet, it is not available to the general public market for the time being. The popularization of hospitals is also a long process, so there's no rush," Ding Yue said,

indicating that being able to manufacture ten Rentang Health Robots a day is already very good.

After all, Tong Yihang, Liu Tiefei, and their team only managed to manufacture eleven Rentang Health Robots in over a month before.

"By the way, Wen Ruohan," Ding Yue suddenly turned around and asked Wen Ruohan, "Did Tong Yihang and their team return from their global luxury cruise tour?"

"Yes, they returned to school the day before yesterday."

Wen Ruohan hurriedly nodded in reply.

"Alright, tell them to come to my office later." Ding Yue commanded.

"Okay, Principal Ding." Wen Ruohan immediately pulled out her phone and sent a message to Tong Yihang on Whatsapp.

"Principal Ding, I recently heard some news, I'm not sure how reliable it is, but it's quite important..."

Suddenly, An Yujia beside him carefully told Ding Yue.

"Oh? What news?" Ding Yue raised his eyebrows slightly and asked curiously.

An Yujia thought for a moment, then bit her lips lightly and said, "It's like this, a friend of mine in the mainland, her brother..."

Chapter 329: Positions offered to Mechanical Department students

"What's the matter with your friend's brother back home? Is he thinking about attending our Mist City Arts and Science University?"

Upon hearing the question, Ding Yue responded with a laugh.

"Principal Ding, my friend's brother is a graduate in mechanical engineering and works as a mechanical engineer at the Dingli Group."

An Yujia shook her head and said, "I only found out this a couple of days ago."

"Oh? The Dingli Group?"

Ding Yue furrowed his brow again.

Lately, he had been hearing a lot about two companies: the Dingli Group and the Rentang Medical Technology Group.

If he kept hearing about them, he was sure to develop callouses in his ears.

However, Ding Yue was cautious of both companies, and he'd even prepared a trap for them, waiting for them to fall in.

He wasn't sure if they'd taken the bait yet.

"Yes, the Dingli Group. My friend's brother mentioned that the Dingli Group is currently manufacturing a medical device product that is very similar to our medical health robot at Mist City Arts and Science University!"

An Yujia spoke convincingly.

This implied that some companies have started to imitate Mist City Arts and Science University's medical health robot, Big White.

And it was even a leading domestic mechanical manufacturing company like the Dingli Group.

"This fast?"

Ding Yue muttered, slightly surprised.

"Principal Ding, what do you mean 'this fast'?" An Yujia asked, curious.

Why wasn't Principal Ding surprised when he heard this news?

Other companies had begun to mimic Mist City Arts and Science University's medical health robot Big White, and the Dingli Group had even started manufacturing it. Wasn't this a huge threat?

What if Rentang Medical Technology Group took over the relevant market first?

"Miss An, I understand your concerns. Don't worry, I won't let Rentang Medical Technology Group or Dingli Group succeed. I will ensure they pay a heavy price."

Ding Yue said with a smile, then suddenly brightened, looking at An Yujia: "Miss An, your friend's brother, could he... collect some evidence for us?"

"Huh?"

An Yujia was taken aback.

"Isn't your friend's brother a mechanical engineer at Dingli Group? When it comes time to resort to legal measures, we may need some evidence from Dingli Group. I was thinking that your friend's brother might be able to help."

Ding Yue was only making a suggestion, not coercing An Yujia's friend's brother into becoming a so-called "traitor" in the company.

An Yujia understood Principal Ding's meaning. After careful consideration, she nodded slightly and said, "I'll ask, but this kind of thing may not work out."

"Good, it was just a thought. If your friend's brother can help us, he can work at Feiyue Group in the future, and I can offer him better treatment and career prospects."

Since his opponents had previously schemed against him, such as trying to steal Tong Yihang and Liu Tiefei from Mist City Arts and Science University, Ding Yue saw no need to show leniency.

"Principal Ding, I would actually be glad if a company like Rentang Medical Technology Group went bankrupt. I can't understand why such a company could prosper in our country."

After learning more about the Rentang Medical Technology Group, An Yujia was utterly disgusted with the company.

They even deceived the elderly out of their savings. They touted products with manufacturing costs as low as mere tens of dollars as medical and health products, selling them for thousands.

This was simply...

Spit!

In An Yujia's mind, the only word that could describe the Rentang Medical Technology Group was "spit".

"Although Xia Country has been relatively corruption-free in recent years, it's inevitable that there will be some parasites. Besides, with a rich company like Rentang Medical Technology Group corroding things up, I'll leave it at that. You understand what I mean, right?"

Ding Yue shrugged and said.

Xia Country was vast with a large population. Although Ding Yue had encountered some highly reputable organizations, like the Education Bureau, parasites inevitably hid in the dark corners.

Behind Rentang Medical Technology Group were such parasites, weren't there?

Otherwise, how could a company like that thrive so enormously?

"Oh, I understand what you mean." An Yujia nodded.

They toured around the mechanical engineering practice base while having their leisurely chat.

After the tour, An Yujia left to attend to her affairs.

Ding Yue returned to his office in the Administration Building.

By this time, Tong Yihang, Liu Tiefei, and professors like Yang Jie, and Li Shengbin were all waiting in the office.

"Principal Ding."

Everyone stood up from the sofa and called out when they saw Principal Ding.

"Sit down, how was it? The global luxury cruise, was it enjoyable?" Ding Yue asked, looking at Tong Yihang and the others with a smile.

Going on a global luxury cruise for over a month, without having to spend a penny, with the school covering all expenses, if they didn't enjoy such an experience, there would really be nothing to say.

"Hehe, Principal Ding, the global luxury cruise this time was truly unforgettable! The Crystal Cruise was so luxurious!"

Liu Tiefei replied very excitedly.

Previously, Liu Tiefei had not much concept about luxury cruises. Only after experiencing this one, did he understand what is real enjoyment.

Every day on board the Crystal Cruise was a super relaxed enjoyment. The luxury cruise had everything one could wish for.

"Yeah, Principal Ding, the global luxury cruise this time was absolutely mind-blowing!" Tong Yihang also looked at Principal Ding excitedly.

"I'm glad you had fun and enjoyed the experience. This is a reward you all deserve, and there will only be more of such rewards in the future,"

Ding Yue said calmly, looking at Tong Yihang and the others with a smile.

"Really?"

Yang Jie was very excited upon hearing this.

"Principal Ding, now that we have returned from the global luxury cruise, are there any new instructions?"

Professor Li Shengbin broached the main topic.

He was sure that Principal Ding didn't just summon everyone to ask about the luxury cruise.

"Hmm."

Ding Yue nodded, looked at Tong Yihang, Professor Li Shengbin, and the others, and said seriously: "Wasn't it mentioned before, our school will establish a production line for the Robot Big White and also use it as a practical training facility for the mechanical department? Your team will provide technical guidance and train the students' mechanical production skills."

Tong Yihang and Liu Tiefei were listening to Principal Ding's words very seriously.

"Now, the production line has been set up, and starting from this academic term, the university's Feiyue Group will officially provide job positions to the students of the mechanical department. However, before starting work, you need to train the students from the mechanical department. Do you have any issues with that?"

Ding Yue continued.

The next second, Tong Yihang, Liu Tiefei, Yang Jie, and Professor Li Shengbin all nodded simultaneously and replied, "No problem!"

The practical training facility of the Department of Mechanics at Mist City Arts and Science University and the production line for Big White are the same place. The students from the mechanical department can practice operations here, and at the same time, it is also a workplace. Without a doubt, this is a great opportunity for the students of the mechanical department at Mist City Arts and Science University.

After graduation, if you study mechanics and want to find a job, you'll probably end up at various mechanical manufacturing enterprises. You might not even be able to join a large mechanical manufacturing enterprise since most of them want graduates from key universities in mechanical engineering.

So, it's only small factories that remain as an option.

In reality, they might as well stay at Mist City Arts and Science University, that is, the mechanical manufacturing plant of their own school.

Wouldn't Principal Ding treat everyone much better than the bosses of those mechanical factories in society?

Therefore.

Since the message spread in the group of mechanical engineering students, many of them have been looking forward to signing an employment agreement with the school in their sophomore year. How great is that?

"Great, I look forward to seeing our Mist City Arts and Science University's medical health robot, Big White, in hospitals all over the country. This is a project benefiting the people, and the common people will be grateful to you all."

Ding Yue encouraged everyone.

Then, Ding Yue took out his mobile phone and let Professor Li Shengbin add him to the student group of the mechanical department at Mist City Arts and Science University.

There are two big groups for the Mechanical Department, which cover specialties like Mechanical Design, Manufacturing and Automation, and Material Formation and Control Engineering.

In reality, among these students.

Apart from top-performing students like Tong Yihang, even though most can smoothly graduate from the strict requirements of Mist City Arts and Science University, the jobs they could find related to their major after graduation are mostly in various mechanical factories.

Maybe some with better grades and skills could join a large corporation specializing in mechanical production.

But that's something two or three years from now.

And right now, the school can offer them a job opportunity.

[Mist City Arts and Science University Mechanical Department Group ①] -

Ding Yue: @everyone, students of the Mechanical Department, I believe you should have heard. Our school has officially established the production line for the robot Big White, which is also your practical operation base in the Mechanical Department. Now we can provide you with formal (including social insurances and housing fund) job positions. Anyone who passes the training guidance can join the Feiyue Group under the school. The salary and benefits are guaranteed to be generous. Those interested can consult your Mechanical Department's Professor Li Shengbin.

Ding Yue announced in the mechanical department group.

Then he asked Director Liu Hongxia of the Publicity Department to post an official announcement on the official website of Mist City Arts and Science University.

Once the announcement was out, students from other departments and majors of Mist City Arts and Science University cried in envy.

It's just sophomore year, and the students in the mechanical department already have job opportunities.

In an age where graduation equates to unemployment, how happy is this?

What's most important is!

The field of employment all involves the production of the popular robot Big White, very much in line with what the students in the mechanical department have been studying.

Chapter 330: Opening day, Sci-Fi reading experience

Starting from August 20th, freshmen have been successively reporting to various universities in Mist City University Town.

The registration date for freshmen at Mist City Arts and Science University starts on August 23rd and lasts for an uncertain number of days, depending on the situation, as Ding Yue can't determine how many self-recruited students will report this year.

However, some students actually arrived in Mist City from mid-August.

Because Mist City is a popular online destination and a city full of delicacies, many college entrance examination graduates from middle-class families who are preparing to register at Mist City Arts and Science University have already come to Mist City to have some fun.

Then they would go to Mist City Arts and Science University to register.

On August 22nd, many college entrance examination candidates who failed to get recruited, and are preparing to register at Mist City Arts and Science University, also arrived from all over the country. They found hotels in University Town to stay overnight, waiting for the formal registration the next day.

For these soon-to-be-freshmen at Mist City Arts and Science University, the most inconvenient part is that there are no hotels on campus.

The campus hotel project was not included in the first phase of the expansion plan, because Ding Yue planned to assign this project to the students of the Architecture School at a later date.

As long as the architectural students try hard and obtain certifications, Ding Yue might even set up a Feiyue Construction Company for his Feiyue Group!

In fact, the reputation of the School of Architecture at Mist City Arts and Science University has been on the rise.

Because the School of Architecture at Mist City Arts and Science University designed the Book Ship Library.

Ever since the last live streaming event, the Book Ship Library has become popular.

At first, the students from their own school came to the Book Ship Library to take pictures and check-in.

Then, students from other universities in University Town came when they heard about it.

The Book Ship Library of Mist City Arts and Science University can be said to be the most spectacular and most novel university library in the entire Mist City.

People from Xia Country always like to follow the trend.

When they saw more and more young people coming to the Book Ship Library of Mist City Arts and Science University to check-in, more people also rushed over, including some online influencers, TikTok celebrities, and video creators with a lot of followers.

The few highly followed bloggers at Mist City Arts and Science University also did some promotion for the school's Book Ship Library.

Gradually.

From August 6th, when Ding Yue led the sports team of Mist City Arts and Science University to Shencheng to participate in the National University Sports Games, Mist City Arts and Science University gradually welcomed tourists checking-in from all over the country.

Unfortunately, at that time, the Book Ship Library of Mist City Arts and Science University had not officially opened yet.

By today, August 22nd, the Book Ship Library of Mist City Arts and Science University welcomed more and more check-in tourists and students.

Because today is a very important day.

The Book Ship Library is about to officially open. Only on the opening day, the Book Ship Library of Mist City Arts and Sciences University is open to all for free, which means that students who are not from Mist City Arts and Science University can enter the Book Ship Library to experience the feeling of being immersed in a sea of books.

Therefore.

From this morning, more and more people started to gather at the plaza in front of the Book Ship Library.

There were even quite a few people who rushed here from all over the country when they heard the news.

Not only tourists from all over the country who came to check in, but also many news media outlets came to Mist City Arts and Science University.

At this time, in the president's office of the Administration Building.

Ding Yue was chatting with Director Qi Chunsheng of the Academic Affairs Office about the opening day of the Book Ship Library today.

"The selection of today is good, the new students will come to register tomorrow, by then the Book Ship Library will surely be for the students of our school to use. Today's official opening is open to all for just this one day, a nice idea."

Ding Yue was quite satisfied with Director Qi Chunsheng's arrangement.

The current opening day allows all tourists who have come to check in to experience this magnificent library, which is not only a "benefit" for out-of-town tourists, but also a positive infographic of knowledge and culture.

However.

After all, the Book Ship Library is the university library of Mist City Arts and Science University. After today, it is only available for use by students of Mist City Arts and Sciences University after registering.

Otherwise, with the current popularity of the Book Ship Library, if it is open to everyone every day in the future, wouldn't that be chaotic?

In fact, it's very clear to everyone that the countless people who come here are only here to check-in and take photos.

Therefore, if this situation is also open on weekdays, it will definitely seriously affect the library learning and reading experience of the students at Mist City Arts and Science University.

Therefore, the decision made by Qi Chunsheng to allow all access today and only access to students of Mist City Arts and Science University from tomorrow, is quite good.

Today is the perfect day for the grand opening.

The on-site popularity of the Book Ship Library of Mist City Arts and Science University has been pushed directly to a peak. The huge plaza in front of the library is full of people. It is even busier than the major tourist attractions during the Golden Holiday of May Day and National Day.

The lively grand opening is actually quite good for the reputation of Mist City Arts and Science University.
