

F. University 741

Chapter 741: Spring Tournament Home Opener

The head of the Architecture department, Director Chen Ping, made a phone call to Principal Ding after receiving a call from Wen Ruohan, to report on the situation at the graphene factory.

Chen Ping stated.

He had already started work earlier with the construction team of Tianfu Construction Group, according to the factory design drawings provided by the Architecture Department.

However, this did not interfere with the ground-breaking ceremony.

After discussing with Chen Ping, Ding Yue decided to hold the ground-breaking ceremony in three days.

At that time, leaders from the Mist City region will participate in the ground-breaking ceremony for the graphene factory of Mist City Arts and Science University.

Not only that.

Some news media outlets are bound to want to join in on the 'festivities', as the news of Mist City Arts and Science University's major breakthrough in the field of graphene has been hot recently, with no signs of cooling down.

More and more netizens are increasingly recognising what graphene is and its role.

In fact.

Many people believe that the major breakthrough in the field of graphene by Mist City Arts and Science University is the 'graphene battery' that the university announced earlier.

However.

Only the core personnel within Mist City Arts and Science University, as well as the Xia Country Academy of Sciences, the International Patent Office and other higher authorities, know that the University's major breakthrough in the field of graphene is a machine that can efficiently produce high-quality graphene.

After discussing the ground-breaking ceremony with Director Chen Ping, his sister Ding Xiaoyou, Luo Peng and Tong Yihang came over.

"Brother, did you ask for us?"

Ding Xiaoyou asked Ding Yue as she walked into his office.

"Come on over."

Ding Yue called over his sister Ding Xiaoyou and Luo Peng and Tong Yihang, then asked, "How are things going with the team-building for technology I mentioned last time?"

The national support policy was about to come into force.

The bank loan should also be finalised soon, and the land has been acquired and even started construction.

A crucial step on his side, University of Mist City, then is to form a technical team, which must keep up with the pace.

Otherwise, it might become a set back in the establishment of the entire graphene industry system.

"Oh, Principal Ding, we have been actively preparing for that. We have selected quite a few people from the department of Mechanics," said Luo Peng, immediately responding.

"Yeah, Luo and his team are in charge of this," said Ding Xiaoyou, shrugging her shoulders.

As the production of graphene mechanical stripping machine involves a lot of knowledge and technology in the field of precision machining, it is hard for Ding Xiaoyou to provide any significant contribution.

Ding Yue let out a sigh and said earnestly: "Professor Luo, you must speed up the pace. Construction has already begun in the graphene factory area, and the bank loan should be approved soon. After obtaining the raw materials for manufacturing the graphene mechanical stripping machine, the production of the machine will go on schedule."

"So soon?"

Luo Peng was somewhat surprised.

Originally, Luo Peng thought that it would take a year to get everything ready, including money, land, national policies, construction of the factory, etc. on the school's side before everything was set in place. But it was happening so fast?

The money was almost in place, and construction had already started?

Once the factory construction started, Luo Peng knew that it would not take more than a few months to complete. After all, the pace of constructing a factory building and a school building were different.

The former can obviously be quicker, perhaps only taking two or three months.

"Yes, things are moving faster than expected. But the faster we go, the better it is for us and for our country, Xia."

Ding Yue nodded and said earnestly to them: "Do you know? Companies specializing in energy technology in America and Europe are ready to chase after us."

Upon hearing this.

Whether it was Luo Peng, or Tong Yihang, or even Ding Xiaoyou, they all began to feel a sense of crisis.

"Can... can they catch up with us?" Ding Xiaoyou questioned in a soft tone from a technical perspective.

In Ding Xiaoyou's view, although foreign research on graphene is relatively advanced, it would be unlikely for them to catch up with the scientific achievements of Mist City Arts and Science University in a short period of time.

The reality is just as Ding Xiaoyou thought.

However.

Because the vast majority of people do not know how strong Mist City Arts and Science University truly is, both Ike Technology Group in the United States and Mantech Group in Europe believe that they have the ability to compete with Mist City Arts and Science University in the field of graphene.

This is also why both Ike Technology Group and Mantech Group have increased their investments in graphene research.

"We don't know if they can catch up with us, but we should never underestimate the strength of foreign technology companies," said Ding Yue, still looking serious.

Although Mist City Arts and Science University has mastered the manufacturing technology of graphene production machinery, Ding Yue was not sure about the strength of these foreign technology companies in the field.

Chapter 742: Spring Tournament Home Opener

So, maintaining a certain level of vigilance is necessary.

"Yes, what Principal Ding said makes sense."

Luo Peng strongly agreed with Principal Ding's view that one should not overlook or underestimate the enemy.

"So, brother, how long will it take to build the technology team?" Ding Xiaoyou asked.

"About three to five months or so. Of course, the sooner the better." Ding Yue thought for a while. Although speed is preferable, he can't put too much pressure on Luo Peng and his team.

After hearing this, Luo Peng glanced at Tong Yihang.

Tong Yihang's face showed some complexity.

Establishing a team capable of leading the production of graphene mechanical exfoliation machines is not that easy.

A lot of knowledge and technology needs to be taught and trained to the members joining the team.

The specialization of the graphene mechanical exfoliation machine is overly complex. Compared with the previous medical health robots, the difficulty is slightly higher.

Luckily, it seems that the students of Mist City Arts and Science University's mechanical engineering department all have decent individual abilities and solid foundational knowledge.

"Principal Ding, we will do our best." Tong Yihang said somewhat hesitantly: "But we really can't guarantee that we will have a large technology team in three to five months."

"Yes, Principal Ding, after all, the specialty involved is really strong." Luo Peng also presented the situation.

Ding Yue nodded slightly: "I can understand that, but you all have to have confidence. Just do your best."

Ding Yue indeed understood the pressure Luo Peng and Tong Yihang were under.

However.

I am still here.

Pertaining to the same [Graphene Mechanical Exfoliation Machine Technology], Ding Yue can fully impart it to the new members joining the technology team at that time.

Then let the proficient Luo Peng, Tong Yihang, and Liu Tiefei train them. I believe that there should be no problem forming a core technology team capable of smoothly producing graphene mechanical exfoliation machines.

The reason Luo Peng and Tong Yihang lack confidence is because they don't know that their Principal Ding has an edge.

"Great!"

Luo Peng saw that Principal Ding was so supportive of himself and believed in everyone. Thus, in the next period, he would do his best to guide and train a technology team capable of bearing heavy responsibilities for the school.

Knock, Knock, Knock!

Just as Ding Yue and the others were discussing this important matter, there was a knock on the office door.

Wen Ruohan went to answer, and saw Jian Zihao, the Director of the E-sports Institute at the door: "Director Jian, are you looking for Principal Ding?"

"Yes."

After Jian Zihao entered the office and saw Principal Ding discussing matters with everyone, he tactfully sat on a sofa on the side.

Everything that Ding Yue needed to remind everyone of had been mostly covered. The next steps fell on Luo Peng and Tong Yihang to assemble the technology team.

"Alright then, after everyone goes back, we need to get moving. Let's aim to collaborate smoothly with the other processes."

After Ding Yue finished speaking, he let Luo Peng and the others go back to their work.

"Brother, like Liu Yan and I have been training the students at the college of chemistry recently, I should keep going, right? But there are too few people at the college of chemistry, you still have to ask An to hire more people from her company later."

Ding Xiaoyou's thinking was actually very clear.

Although she couldn't be of much help on the matter of graphene mechanical exfoliating machines.

However, after the graphene is produced, she and her team specialized in manufacturing graphene technology products with graphene.

But there are too few people in the school who are good at it. The team of Ding Xiaoyou and Liu Yan's Energy Chemistry Research Laboratory is just a few people, and besides Liu Yan, the others do have some gaps.

So, when producing graphene technology products, such as graphene batteries, with graphene, it is still necessary to recruit some talents from outside.

"Yeah, I know about that. I'll remind An Yujia," Ding Yue nodded.

"Then, I'm leaving."

After saying that, Xiao You also left.

Then Ding Yue's gaze landed on Jian Zihao, the director of the e-sports institute who was sitting on the sofa.

"Director Jian, it's been a while, hasn't it?" Ding Yue asked with a smile.

During the past year or so, Ding Yue had been busy with several things. His Mist City Arts and Science University had also developed well, so he hasn't been putting much focus on the e-sports institute.

However, Ding Yue has always been quite supportive of the teaching work at the e-sports institute, with the investment in teaching funds increasing year by year.

If Ding Yue remembers correctly, the professional team "FY" formed by the e-sports institute of Mist City Arts and Science University has made it into LSPL - in other words, they qualify to compete in the League of Legends Professional League LPL, right?

Perhaps Jian Zihao came to see him today to discuss the League of Legends Professional League LPL.

"Principal Ding, it's indeed been a long time. This year during the New Year's I went back home with my girlfriend," Jian Zihao replied with a smile.

His initial plan for this year was to stay at Mist City Arts and Science University for the New Year's since he and his girlfriend were already living in Mist City.

However, due to various reasons, Jian Zihao ended up going back to his hometown for the New Year's with his girlfriend.

"Did you come here because there's something you want to discuss? I heard our e-sports institute's FY team has made it into the LPL. Has the LPL Spring Competition started yet?"

Ding Yue asked curiously.

Hearing this, Jian Zihao was taken aback for a moment, then quickly responded: "Principal Ding, I came to discuss the League of Legends Professional League Spring Tournament."

"Oh, I see. Go on," Ding Yue nodded and smiled.

"Principal Ding, the League of Legends Spring Tournament officially kicked off yesterday. Tomorrow afternoon at five, it's our FY team's first match. It's also our home game, taking place here in Mist City and we'll be up against the QD team from Haicheng."

Jian Zihao explained in detail, "I was wondering, Principal Ding, do you have time to come watch the game tomorrow afternoon?"

As for tomorrow's FY team's debut in the League of Legends Professional League, Jian Zihao takes it very seriously. Of course, if Principal Ding could come and watch in person, that would be best.

"Sure."

Without a second thought, Ding Yue immediately nodded, then turned to his secretary, Wen Ruohan, and asked, "Secretary Little Wen, do I have any important schedules tomorrow afternoon?"

"No, Principal Ding."

Wen Ruohan, who has a good memory, immediately answered.

"That's good. Tr. Jian, I'll be there to root for our FY team. Where is the venue for the competition?"

Hearing that Principal Ding had confirmed his presence, Jian Zihao asked cheerily.

"It's in the Mist City e-sports stadium."

"So, how does the professional league's rules work? Why is it being held in Mist City?"

Ding Yue asked curiously.

Because he had been busy developing and building up Mist City Arts and Science University, it had been a long time since Ding Yue had played League of Legends.

"The main principle is that the professional teams' club cities serve as their home ground. So since our FY team is the home team tomorrow, the match will be held in Mist City, the city where our FY team is based, and the QD team from Haicheng will have to come over in

advance," Jian Zihao briefly explained the current League of Legends Professional League LPL competition system.

"Oh, I see. So when we play against other teams, if their team is hosting, our FY team will have to go over, right?" Ding Yue finally understood.

"That's right." Jian Zihao nodded and added, "Principal Ding, the spring tournament has quite a few matches. The results will be added up to advance to the playoffs. Principal Ding, you're extremely busy and occupied, so if the match is being held here in Mist City, you can come over to watch if you have time. For other matches, even if we aren't the home team, we'll still give it our all to fight our way into the playoffs."

"Sounds good!"

Ding Yue had the exact same thoughts.

He would definitely go to the arena tomorrow for the debut match of his FY team in the LPL. As for future home games, he'll decide whether to go or not based on his schedule. For games in other cities where they aren't the home team, there's no need for him to personally attend.

Chapter 743: Home Field Advantage, Blowing Up the Opponent

Mist City Esports Stadium.

With the rapid development of the eSports industry in recent years both domestically and globally, eSports stadiums have now been established in nearly all major cities.

As one of the top cities in the country, it goes without saying that Mist City set up its eSports stadium a few years ago.

Within Mist City, there are several professional gaming teams. One team, in particular, has gained tremendous fame within the eSports circle over the past year.

Even average gamers have heard of it.

It is - FY team!

This League of Legends professional team comprises students from the Mist City University of Arts and Sciences e-sports institute with eSports as their major.

In just over a year, this FY team from Mist City University of Arts and Sciences has used their powerful personal skills, team cooperation, and comprehensive operational abilities to fight their way from city-wide League of Legends competitions to the A-level professional league.

Then from the A-level professional league to the League of Legends LPL professional league!

They are like a dark horse, full of vigor!

Moreover, FY team from Mist City University of Arts and Sciences also won the national college league championship last year.

However, because not many people pay attention to the national college league and its standards are not as high as the LPL professional league, the championship won by FY team did not cause much of a stir.

Nevertheless, just being able to fight their way into the LPL professional league from having nothing is quite an impressive feat!

The 2022 League of Legends spring competition has already begun.

Today.

The match will be held in Mist City. Naturally, the home team is the FY team from Mist City University of Arts and Sciences. Challenging the FY team is a veteran powerhouse team from the League of Legends LPL Professional League from Haicheng - QD team!

Also known as the Starting Point team!

Interestingly, there is a connection between QD team and FY team.

This dates back to when the FY team was first established. The FY team members, led by Xiong Jiahao, stumbled upon the QD team while in the game's peak valley.

As the team captain and ADC, Xiong Jiahao and his support team managed to completely overthrow the QD team's bottom line strategy.

Today.

The two teams are facing each other in a fully-fledged confrontation for the first time.

Inside the locker room of the Mist City eSports Stadium, the seven players of FY team are ready.

The starting lineup consists of the five team members: Xiong Jiahao, Feng Jin, Qian Yu, Yao Jing, and Wang Shilin.

Substitute players Ming Qiang and Zhou Genshuo are ready and waiting as backups.

Jian Zihao, acting as the coach and team leader of the FY team, occasionally checks his watch.

"Director Jian, will Principal Ding really come back? The match is about to start, and Principal Ding has not come yet."

Student Wang Shilin looked at Director Jian Zihao and curiously asked.

"Principal Ding said he would come unless something very important came up. I think he's just going to be a little late," Director Jian Zihao comforted his student players.

At this moment.

Outside the Mist City eSports Stadium, an Audi slowly drove into the parking lot, followed by a Mercedes and a BMW.

The appearance of these three brand vehicles undoubtedly indicated that the young leaders of Mist City University of Arts and Sciences had arrived.

Yes!

It was Ding Yue, Huang Youjie, and Xu Bin arriving at Mist City eSports Stadium.

Secretary Wen Ruohan, who was sitting in Principal Ding's car, promptly took out her phone and sent a message to the head of the eSports institute, Jian Zihao: "Director Jian, Principal Ding has arrived."

In the FY team's locker room, when Jian Zihao received the message from Principal Ding's secretary Wen Ruohan, a smile immediately appeared on his face: "I told you all not to worry, see? Principal Ding is here. I'm going out to welcome them."

With that, Jian Zihao stood up quickly, rushed outside, saw Principal Ding and his group, waved at them and shouted, "Principal Ding, over here."

Since Director Jian had come to the competition with the FY team's players, they had to arrive early. So they were already at the Mist City eSports Stadium in the afternoon.

However, the start time of the competition was five o'clock, and Ding Yue had a lot of work to do every day, so he couldn't come directly in the afternoon like the team. He was busy until around three to four o'clock and then drove over.

Luckily, the location of the Mist City eSports Stadium wasn't far from the University Town, so it didn't take long for Ding Yue and others to arrive by car.

"Principal Ding, the students thought you were too busy to come today." Director Jian led Principal Ding and his party to the locker room of Mist City University of Arts and Sciences FY team.

"Hahahaha."

Upon hearing this, Ding Yue laughed heartily, patted Director Jian Zihao on the shoulder, and said, "If I say I'm coming, I'll definitely come."

With the conclusion of Ding Yue's words, as they entered the locker room, the players of the FY team immediately stood up and shouted in unison, "Hello, Principal Ding."

"Sit, sit, sit."

Ding Yue motioned for everyone to sit down. There was no need to be so formal, as they were all part of the same team.

"How much longer until we go on stage?" Ding Yue looked at Jian Zihao and asked.

"Soon, just a few minutes," Jian Zihao quickly glanced at his watch and replied.

With only a few minutes to go, Ding Yue seized this opportunity to say a few words: "Everyone, today is our FY team's debut in the League of Legends LPL Professional League. Many students have bought tickets to support you, and I will be here to supervise the battle. I hope you can give your best and start off with a perfect victory. How does that sound?"

Chapter 744: Home Field Advantage, Blowing Up the Opponent

"No problem!"

Xiong Jiahao, Feng Jin, Qian Yu, Yao Jing, Wang Shilin, and others answered in unison.

"Alright, let's go!"

Ding Yue also encouraged the players.

At this point, Jian Zihao received a message and told the players, "Alright, everyone, get ready to play."

In the e-sports hall, there were still quite a few audience members. Some of them were hardcore fans of the game League of Legends. They had come to watch since a competition was being held in Mist City.

Of course.

Most of the audience in the e-sports hall were from Mist City Arts and Science University.

Because this was a home game for the FY team of Mist City University of Arts and Sciences e-sports institute, classmates came to cheer for their alumni.

Especially, many students from the e-sports institute had come over. The popularity seemed very explosive now.

"Next, please welcome the home team, the FY team from Mist City!"

Accompanied by a loud voice, the shouts at the scene reached a high point. Under the dazzling lights, the five players of the FY team orderly walked onto the stage, and then entered the competition area.

"The next team to appear is the challenger team, the QD team from Haicheng!"

The introduction still sounded loud and clear.

However, the cheers and shouts at the scene were almost like mosquitoes. Only a handful of hardcore QD team fans were waving flags and cheering there.

This home court advantage was suddenly apparent.

First of all, in terms of momentum, the FY team had already defeated the QD team, but this didn't really affect the experienced QD team much.

Having played in the League of Legends Professional League for so many years, the QD team had seen this situation before.

The QD team had its low periods and its highlights!

After seeing the atmosphere of the scene, the captain of the QD team, Li Xing, showed even more killing intent towards the FY team.

"Brothers, don't see how the fans of the FY team are cheering now. The happier they cheer now, the harder we'll make them cry later!"

Li Xing said to his four teammates.

"Got it!"

Li Xing's teammates all responded in unison.

Soon, Li Xing and his teammates also entered the competition area, each sitting in front of the computer, starting to get familiar with and adjust the computer equipment.

About five minutes later, the computer equipment adjustment was almost completed, and then the players began to log into the competition server.

In a short while, they entered the stage of banning heroes and choosing heroes.

The battle between FY and QD thus initiated.

Ding Yue sat in the team's rest area backstage, watching the situation on the screen while asking Jian Zihao through the headset, "Director Jian, I heard that the QD team is powerful and is an old team in the League of Legends Professional League, and it has entered the S Competition many times. Does our FY team have the confidence to beat the QD team?"

Ding Yue had not kept up with the state of his Mist City University of Arts and Sciences e-sports institute's FY team for a long time, he definitely needed to ask about the situation when facing such a strong team.

Jian Zihao was also on the court as a coach at this moment.

What if they lost later?

"Principal Ding, the QD team is generally considered top-tier in the Professional League, but they do have weaknesses. If we exploit these weaknesses, their overall strength will decline. Plus, I'm quite confident in Xiong Jiahao and the rest."

Jian Zihao smiled and said to Principal Ding, "Principal Ding, our FY team is very young and bursting with energy, aggressive yet steady in its approach. All strategic operations are up to date, and each player's individual strength on the line is top-notch. We're practically invulnerable."

"Oh?"

Ding Yue saw Jian Zihao so confident, and the players were also full of confidence before they went on stage.

It seems that Ding Yue had somewhat "underestimated" his own FY team.

Since this was the case, Ding Yue would have to pay close attention to how his FY team performed against the QD team today.

Both teams finished their banning and selecting, and both lineups looked good. Since this was the first time the two teams officially faced each other in the Professional League, they didn't have a thorough understanding of each other's combat style.

However, as the coaches and players of the team, they had undoubtedly studied their opponents.

After picking the heroes and entering the game, both coaches retreated to their respective rest areas.

The competition began!

Once again, the students of Mist City Arts and Sciences University cheered.

"Brothers, let the hunt begin!"

Li Xing, the captain of the QD team, said confidently with a smile.

"Let the hunt begin!"

Li Xing's teammates were also very confident.

At the beginning of the match, it was apparent that QD team was very aggressive in the jungle. However, under the FY team's field of vision and communication, they avoided collisions in the jungle. Then, the FY team seized an opportunity. With a numerical advantage in the jungle, they drove the QD team out of their own jungle.

Once the lanes started, the players of the QD team showed a very strong offensive.

Top lane!

Mid lane!

Bottom lane!

They all played aggressively!

"Oh wow, I didn't see that coming. The QD team's strategy has suddenly become very aggressive."

Jian Zihao in the backstage resting room was somewhat surprised after seeing this situation.

"This strategy of the QD team, weren't they usually not this aggressive?"

Chapter 745: Home Field Advantage, Blowing Up the Opponent

Ding Yue looked curiously at Jian Zihao and asked.

Jian Zihao nodded, and analyzed rationally: "Previously, QD's strategy has always been to play steadily online, then rely on mid-term jungle rhythms, or a strong bot-lane to set the pace. It's rare to see them play so aggressively right off the bat."

"It seems they're trying to get inside our heads?" Ding Yue inferred the likely reason for QD's aggressive strategy after hearing Jian Zihao's analysis.

The aim was to unsettle their opponents with a strategy they hadn't anticipated.

"Guys, keep it steady online. If I'm not mistaken about the enemy jungler's path, he should be top-lane. Be careful, Wang Shilin."

FY's jungler, Qian Yu, communicated this with his top-lane teammate, Wang Shilin.

"I noticed something while fighting the lines just now. Old Qian, counter ambush?"

"Ambush it is!"

Sure enough, as Wang Shilin and Qian Yu were discussing strategy, the enemy top-laner displayed extreme aggression.

This intention should be pretty clear to professional players.

Taking advantage of a blind spot on the map, Qian Yu slipped into the first bush beside the tower at the top lane.

At this moment, the enemy jungler came around from the triangular bush, preparing to encircle Wang Shilin with the QD top-laner. At the very least, this assault was meant to force out Wang Shilin's flash.

However!

In a split second, the battle between the two teams' junglers and top-laners erupted.

The next second, a TP was activated, then another.

Both teams' mid-laners rushed to the top-lane for support, turning this into a full blown six-player team fight!

First blood!

FY team's top-laner successfully took down an enemy, killing their jungler, but was swiftly killed as well.

The jungler and mid-laner went on to kill the enemy top-laner, and the mid-laner made the kill.

The QD team's mid-laner was severely damaged and fled towards the tower at the top lane.

This round!

FY team went two for one, trading their top-laner for the enemy jungler and top-laner. Additionally, their top-laner also made a kill.

No matter how you look at it, FY team tremendously profited from this. Moreover, the first blood was theirs.

That means, they have successfully established advantages in the top, mid, and jungle lanes!

"My God, in the first mini team fight, FY team has gained a significant advantage with their perfect operation!"

"Now, QD team is at a complete disadvantage!"

The commentators clearly outlined the current situation.

After gaining an early lead, FY team's snowball effect left the QD team dumbfounded.

Harvesting heads again and again.

With each trade of one for two, two for three, three for four, FY team's lead was becoming unbelievably great.

The 20-minute dragon team fight was also won and claimed by FY team.

QD's team members were utterly flabbergasted.

"Stay calm, guys. Keep our heads..."

Even though Li Xing was saying this to his team, he knew full well that they were totally falling apart in this round. The only chance for a turnaround would be if FY team made several grave mistakes in a row.

However, clearly, this was not going to happen!

Still, QD team proved resilient, holding off opponents for a while with their high tower within reach.

The game was dragged into almost 30 minutes.

However!

Again, FY team initiated a marvelous attack, which resulted in wiping out five enemies by sacrificing just two players.

This move completely broke down QD team, destroying their two high-ground lanes.

As expected, the result of the match ended with FY's irresistible momentum, leveling the crystal of QD team's base in the final assault.

"Let's congratulate FY team! They won their first game in their home base, Mist City, since entering the League of Legends Professional League. Congratulations to our young dark horse team!"

The commentary became quite animated after the game.

The applause in the venue surged like thunder and tides, and the FY team's five players also got very excited. After all, it was their first fight in the League of Legends Professional League - and it was a victorious one!

At this moment.

QD team's members, Li Xing and Wu Yong, were dumbfounded.

They never imagined they would lose so terribly to a new team that had just entered the LPL. To simply put, they were badly battered!

Chapter 746: The Lord of Mist City personally came

[Underdog FY Team Wins First Game in League of Legends, Defeating Veteran Team QD Decisively!]
— Esports Headline!

#FY Defeats QD# Trending on Twitter— Heat 45.67 million, 1.275 million discussions.

After the FY team from Mist City Arts and Science University defeated the well-known QD team that night, it immediately sparked discussions among many netizens who love League of Legends.

An overwhelming majority of netizens couldn't believe that the powerful veteran team QD was defeated by the rising star FY team.

The most crucial point was, the defeat was so absolute, there was virtually no hope for a reversal throughout the game.

This battle let netizens appreciate the formidable strength of the FY team from Mist City Arts and Science University. Not only are they excellent students majoring in esports, but

they also have the well-known retired player, Jian Zihao, as their coach. Many people think that the future of the FY team is immeasurable.

"Today's match absolutely crushed QD."

"If I'm not mistaken, QD tweeted before the game started that they would finish the game quickly and then go for hot pot, hahahaha."

"Who would have thought that a newly promoted LPL team could be so strong."

"Hehehe, what's there to be excited about? It's just one game. It's still uncertain who will have the last laugh."

"QD simply lost because they underestimated and didn't use their skills properly. During the next match with FY, they will definitely blow FY away."

"No way, they won just one game and they're already being praised like this?"

"Stop it with your blind loyalty QD fans, can't you see the domination in this game? QD had absolutely no chance to catch their breath."

"Exactly, even the newcomers from FY team performed better online, are you all pretending to be blind?"

"Is it that hard to admit that a new team is strong?"

Netizens expressed their own views, and many of them became fans of this newly promoted team FY in the League of Legends Professional League after this match.

The official team FY Twitter account suddenly gained over two hundred thousand followers.

However.

Being a veteran team, QD has gathered quite a significant number of fans over the years.

But.

QD fans are peculiar, they look like insane fans, no matter which team they play against, they could start arguments with the opposing team's fans after the match.

Naturally, they just finished a match against team FY and even lost, yet QD's fanatic fans still started quarrels with the casual players.

This extraordinary operation directly pushed many casual players to team FY's side, turning them into FY fans.

After the game that night, Ding Yue brought all the members of the FY team for a good meal to celebrate.

After all, they won their debut match in the League of Legends Professional League and even defeated the strong team QD. It was indeed worth celebrating.

After dinner, everyone went to a bar for a round; all expenses were paid by Principal Ding!

After the party, it was already past twelve, and everyone returned to Mist City Arts and Science University cheerfully.

This debut match of the FY team allowed Ding Yue to see the tremendous potential and strength of Xiong Jiahao, Feng Jin, Qian Yu, Yao Jing, and Wang Shilin.

"Everyone should fight hard in the professional league, strive for a chance to make it to this year's S Competition. The rewards are generous if you make it to the S Competition, and even more generous if you win!"

When Ding Yue returned to the university, he made a promise to all the members of team FY.

On hearing this, Xiong Jiahao and the others were immediately more excited.

The generous reward promised by Principal Ding is undoubtedly super generous. As for how generous it is, no one dares to imagine.

Perhaps, it could be more than the total prize money for the S Competition world champion?

It's not impossible. After all, Principal Ding is so wealthy that taking out several millions or tens of millions is nothing to him.

"Principal Ding, we've got our eyes on that reward. We will strive to compete in the S Competition and keep this year's S Championship in our LPL!"

Xiong Jiahao and others said enthusiastically.

"Great! I'm looking forward to your good news!"

After that, Ding Yue went back to rest.

Since he has an important task the next day, Ding Yue has to get some rest, he has to get up early tomorrow.

In fact, this is the first time Ding Yue, as a principal, has gone to bed the latest and has to get up the earliest.

In the past, Ding Yue would sleep until naturally waking up unless there was something very important.

...

The next morning.

Ding Yue was awakened by the alarm sounding in his ear. In his drowsiness, he extended his hand to turn off the alarm without getting up.

Who gets up as soon as the alarm goes off At any rate!

"The sky is blue and foggy, and I'm waiting for you. Smoke rises in the distance, apart by millions of miles..."

After the alarm went off, a ringtone of Lin Zhirou's "Blue and White Porcelain" that Ding Yue had set began to play.

"Um."

Ding Yue grunted, picked up the phone, and answered the call in a daze.

After going to bed nearly past one in the morning, and being awakened now, the amount of sleep is clearly not enough considering Ding Yue's optimal sleep duration and quality.

"Hello, who is this."

Ding Yue did not even look at the caller ID before picking up the call.

Chapter 747: The Lord of Mist City personally came

"Principal Ding, are you still asleep?" The secretary, Wen Ruohan's adorable voice came through the phone.

"Little Wen, what's up?"

Ding Yue asked in a drowsy voice.

"Principal Ding, it's time to get up, have breakfast, and then we need to head to the graphene factory area for the foundation-laying ceremony."

Seeing that Principal Ding was still asleep and hadn't yet gotten out of bed, Wen Ruohan began to urge him to get up.

He had reminded her the previous night to ensure he was awakened, so as not to delay the foundation-laying ceremony.

"The foundation-laying ceremony!"

Upon hearing these four words, Ding Yue became suddenly alert: "Alright, I know... but, let me snooze for ten more minutes."

"Principal Ding, how about this? I'll go to the canteen and buy you breakfast. After breakfast, we can leave?"

Seeing that Principal Ding still wanted to sleep a bit more, Wen Ruohan offered this arrangement.

"Sounds good. You're a big help, Little Wen."

Without hesitation, Ding Yue agreed and then put his phone aside.

About fifteen minutes later.

Knock knock knock!

Knock knock knock!

"Principal Ding, I'm here. Principal Ding, open the door!"

Accompanying the knocks was Wen Ruohan's shouting from outside the door.

Oh dear!

Such a loud voice not only woke up Principal Ding but also roused Director Huang Youjie and Director Xu Bin from next door.

"Secretary Little Wen?"

Huang Youjie came to the door and muttered in surprise upon seeing Wen Ruohan.

"Good morning Director Huang." Wen Ruohan greeted Huang Youjie: "Director Huang, you are also attending the foundation-laying ceremony at the graphene factory area, aren't you?"

"Yes." Huang Youjie nodded.

As the director of the logistics department at Mist City Arts and Science University, his position in the university administration was very important. Moreover, he had a good relationship with Principal Ding, so he would certainly participate in the foundation-laying ceremony.

"Then, Director Huang, you should hurry up and get ready for breakfast."

"Isn't what you're holding breakfast?"

"No, this is for Principal Ding." Wen Ruohan held the breakfast closer to her chest and quickly shook her head.

Click!

At this point, the door opened, and there stood Principal Ding, sleepily clad in his pajamas.

"Principal Ding, you finally woke up."

Ding Yue scratched his head, muttering: "Your knocking and shouting is much more effective than my alarm clock."

"Principal Ding, this is your breakfast."

Wen Ruohan brought in the breakfast, then started eating hers too.

She had initially planned to have breakfast with Ding Yue at the canteen when she called him earlier. But since he wanted to sleep a little longer, she had to buy the breakfast and bring it back to have it in his apartment.

After getting ready quickly, Ding Yue finished his breakfast, called for Huang and Bin, and, along with Secretary Wen Ruohan, headed straight to the graphene factory area in the south of University Town by car.

The graphene factory zone was just over three kilometers from Mist City Arts and Science University, not too close but not too far either.

They arrived relatively early. The other officials who were expected hadn't arrived yet.

But that was to be expected.

The foundation-laying ceremony was scheduled for ten o'clock in the morning.

Ding Yue and the rest of the university personnel had naturally decided to arrive early.

Upon arrival, while Ding Yue waited for the city's leaders to arrive, he also asked Chen Ping, the head of the architecture department, for updates about the graphene factory area.

At this time, the CEO of the Feiyue Group, An Yujia drove over.

"Principal Ding, the construction of our graphene factory area started a couple of days ago. Even though we only arranged this foundation-laying ceremony a couple of days ago, it's not too late. In our initial estimation, we agreed with the Tianfu Construction Group that within two to three months of working overtime, we should be able to complete the main structure of the graphene factory area."

Chen Ping, the department head of the architecture school, was reporting to Principal Ding.

Now, all civil construction work related to Mist City Arts and Science University is presided over by Chen Ping, the department head of the architecture school.

At the same time, Chen Ping also brought many excellent students from the architecture school. In this process, Chen Ping mentioned that several architecture students have grown very quickly.

Then, the architectural design part is given to students from related majors in the architecture school to handle.

For instance, people like Liu Chuanjie and Zhao Chi, are very competent architecture design students.

"I like this efficiency,"

As for the work progress that Director Chen Ping mentioned, Ding Yue seemed quite satisfied.

Truth to be told, more and more vehicles began to arrive at the foundation laying ceremony site, but one couldn't be certain which department they belonged to.

However, it could be easily distinguished that there were vehicles from the TV station because they stood out so much that one could tell at a glance.

"Is that NTS's vehicle?"

Huang Youjie looked at a TV station vehicle not far away and asked curiously.

"It seems so, NTS is also coming for the news coverage," Xu Bin replied.

"Of course, do I need to mention how important our graphene industry established by Mist City Arts and Science University is?" Huang Youjie boasted.

Although the graphene industry project of Mist City Arts and Science University has not much to do with Huang Youjie.

No!

To be precise, there is a connection.

As the director of the logistics department, Huang Youjie is in charge of the procurement of raw materials for the graphene mechanical exfoliation preparation machine.

Xu Bin is also connected to this, as he is currently writing a set of intelligent management system for the graphene plant area, which will make the production and management of the graphene factory more convenient and quicker.

"Principal Ding, the bank loan has already been finalized," CEO An Yujia also reported some work progress to Principal ding.

Money!

This is crucial.

Because without money, the graphene factory area cannot be built.

However, the first loan of ten billion yuan from the bank has now been finalized.

Upon hearing this, Ding Yue was delighted and said, "Excellent, we can now go full steam ahead with our graphene factory."

"Principal Ding, isn't that Director Xiao's car?" Wen Ruohan pointed at a slowly approaching car in the distance and asked.

"Indeed!"

Ding Yue looked over and saw that it was indeed Director Xiao's vehicle.

Following Director Xiao's vehicle were quite a few cars, which seemed like cars used by high-ranking officials.

"Let's go, let's go, it seems like the leaders have arrived. Let's quickly head over to welcome them,"

Upon noticing this, Ding Yue immediately called out to all the key personnel from Mist City Arts and Science University who were participating in the foundation-laying ceremony, and they headed towards where Director Xiao Wenxing and the others had parked.

Meanwhile, the reporters and cameramen from the TV station were also quite proactive, following them over.

"As you can see, today we are at the foundation laying ceremony of the graphene industrial park, supported by the national government, established by Mist City Arts and Science university and Feiyue Group. Key city leaders will come to attend the ceremony,"

The NTS news reporter was reporting live from the scene.

Usually, for the establishment of large-scale projects, NTS would be present on-site for news coverage.

NTS's live coverage is currently being broadcasted on the NTS news channel, and the live broadcast can also be viewed on platforms like Twitter and TikTok.

"Director Xiao, you're here. Which leaders are arriving today?"

Upon seeing Director Xiao Wenxing, Ding Yue went up to welcome him and asked quietly.

Because Ding Yue knew that the leaders of Mist City would be attending the foundation-laying ceremony, but he did not know exactly which leaders from Mist City would be coming.

"The city head, deputy city head, City Construction Department, Planning Department, City Development Department, and leaders from the Science and Technology Department, are all coming,"

Director Xiao Wenxing patted Ding Yue's shoulder and said with a smile.

The city head of Mist City is also coming!

As the top leader in Mist City, attending the foundation-laying ceremony personally indicates the city's strong support for the establishment of the graphene industry system by Mist City Arts and Science university!

This surely gives a lot of face to my Mist City Arts and Science University, hahaha!

Chapter 748: Foreign Predators

"Come on, pan the camera this way a bit. Make sure to get Principal Ding, Director Xiao from the Department of Education, and Mist City's Mayor Li Xian in the frame."

"Sure."

At the founding ceremony of the graphene factory, news outlets like NTS and Mist City TV station are presently broadcasting live reports on the ceremony.

"Wow, they're already starting to build the factory?"

"Did I hear that Mist City Arts and Science University can start manufacturing graphene?"

"Seems like quite a big deal."

"Holy shit, is that the Mayor of Mist City? He came to the founding ceremony?"

"Mist City Arts and Science University is really making a splash."

"Are they preparing to build a graphene factory? That's rather impressive."

"Hurry up and release the graphene batteries. I read online that graphene batteries are at least a hundred times more powerful than regular lithium batteries."

"Hehe, a hundred times? Are you undervaluing graphene batteries?"

"I wonder what they plan to do with the graphene factory once it's built, production of graphene batteries perhaps?"

"Of course, they'll be making graphene batteries. Didn't Mist City Arts and Science University claim to have developed graphene batteries?"

"The production is likely not going to be on a large scale. If graphene can't be mass-produced, how can they mass-produce graphene batteries?"

"Even if they do make graphene batteries, they will be so expensive that us ordinary folk wouldn't be able to afford them."

In the live broadcast room of NTS, netizens are fervently discussing today's founding ceremony of the graphene factory at Mist City Arts and Science University.

As there have been news reports, and live broadcasts today.

Everybody knows that today's founding ceremony is related to the graphene factory, but nobody seems to know exactly what the factory will produce.

According to available information, many speculate that it's for the production of graphene batteries.

This is because Mist City Arts and Science University previously announced that they had breakthroughs in the field of graphene batteries.

That is indeed the case!

However, what the majority don't know is that besides producing graphene batteries, the factory will also manufacture machinery to mechanically exfoliate graphene, which will then be used for mass production of high-quality graphene.

In fact, many overseas are also keeping a close eye on the founding ceremony of the graphene factory at Mist City Arts and Science University.

This is because news of significant breakthroughs in the graphene sector was first released by Xia Country.

Thus, irrespective of whether it's the United States, or European energy tech companies, they are all taking notice, albeit skeptically. Both the United States and European energy tech companies believe that this by Mist City Arts and Science University is just a publicity stunt.

At the founding ceremony site...

This is the first time Ding Yue has met Mayor Li Xian of Mist City in person. Up until now, he had only seen him in the news.

Being the Mayor of Mist City, his rank is indeed high, equivalent to the governor of a province.

"Principal Ding, for someone so young, you have a great potential," Mayor Li complimented him upon meeting.

Being the Mayor of Mist City, Li Xian understands the importance and key role that Mist City Arts and Science University and its graphene technology play for the country.

Therefore, in Mist City, whenever Mist City Arts and Science University needs support in establishing its graphene production system, the city will provide considerable backing.

"Mayor Li, you're too kind," was Ding Yue's humble reply.

"Although I don't understand the technical details, I heard from my superiors that the technological breakthrough in key material research achieved by Mist City Arts and Science University is of great significance for the future development of graphene. For Mist City Arts and Science University, a privately-owned institution, to achieve this is indeed no easy feat."

After praising Ding Yue, Mayor Li proceeded to compliment Mist City Arts and Science University.

It has been many years since a college in the Mist City region has been given such attention by the authorities. To everyone's surprise, it was Mist City Arts and Science University, a privately-owned college, who made groundbreaking research findings that drew the attention of the top brass.

Mayor Li had no choice but to prioritize Mist City Arts and Science University.

After speaking to Ding Yue, Mayor Li asked Director Xiao Wenxing from the Department of Education for information about Mist City Arts and Science University.

"Director Xiao, do you think Mist City Arts and Science University, a private institution, has the chance to become a top-ranking educational institute in our region?" Mayor Li Xian asked Director Xiao Wenxing.

"Mayor Li, I have been paying close attention to Mist City Arts and Science University for the past year or two. This university is brimming with a vitality that's really quite remarkable. From its learning ethos to its pedagogical model, I see great potential," answered Xiao Wenxing to Mayor Li's question, taking it as an opportunity to highlight the merits of Mist City Arts and Science University.

We mustn't be biased simply because this is a privately-owned university.

In actuality, from the current situation, it's unlikely that the leaders of Mist City would have any prejudice against Mist City Arts and Science University.

After all, Mist City Arts and Science University has already demonstrated its capability.

"Go on," urged Mayor Li Xian, eager to hear more of Director Xiao Wenxing's opinions and assessments of Mist City Arts and Science University.

"As long as we provide enough space and support for Mist City Arts and Science University to grow, I believe that within ten years at most, Principal Ding should be able to lead the university to become one of the best private key universities in the country."

Chapter 749: Foreign Predators

Xiao Wenxing continued to speak.

"Hmm."

Mayor Li Xian nodded, somewhat surprised and pleased with Director Xiao Wenxing's view.

What surprised him was that a very young university could become one of the top universities in the field of private education within a decade.

To be one of the best private universities in the country, one should be on par with Double First Class Universities in terms of strength.

So far, no university has been able to do this. Even Westlight University, a private university that is strong and has a good reputation, can hardly compete with Double First Class Universities.

"Mayor Li, Mist City Arts and Science University is a private university that can bring us unexpected and incredible achievements. Thanks to Principal Ding's substantial investment, coupled with the excellent learning atmosphere among the students, I, as the head of the Education Bureau, am very optimistic about Mist City Arts and Science University."

What Director Xiao Wenxing said was in a way standing up for Mist City Arts and Science University.

Seeing that the Director of the Education Bureau spoke in such a way, Li Xian couldn't help but have some expectations for this private university.

After all, to make such notable achievements in the field of energy technology that are valued by the country shows that it is really not simple.

Next, Xiao Wenxing told Mayor Li that the reason why Mist City Arts and Science University was able to make achievements in graphene energy technology was due to the young super genius, the College Entrance Examination Champion Ding Xiaoyou, who was

personally praised by the vice-president of Xia Country Academy of Sciences as a promising student.

Thus, under the introduction of Ding Yue, Mayor Li Xian chatted with Ding Xiaoyou.

The foundation-laying ceremony here was all ready.

The head of the Architecture Department, Chen Ping, came over and informed Principal Ding: "Principal Ding, everything is ready, it's about time, shall we start the foundation-laying ceremony?"

"Okay!"

Upon hearing this, Ding Yue said to Mayor Li Xian: "Mayor Li, we can start now."

At this moment, Chen Ping, with the help of the on-site staff, started to distribute shovels to the leaders of Mist City Arts and Sciences University and the leaders of Mist City.

In front of everyone was a pit filled with soil. In the middle of the pit, there was a stone tablet, with the word "Foundation-Laying" written on it, and a line of small characters that read "Graphene Industry Project".

The leaders of Mist City Arts and Science University, and those from Mist City, holding their shovels, began to lay the foundation!

The solemn foundation-laying ceremony officially began.

This process was actually a ceremony. During the ceremony, the media rushed forward to take photos or live stream.

This foundation-laying ceremony mainly conveyed the message that Mist City, or more specifically Xia Country, was starting the construction of the graphene industry.

The netizens couldn't help but get excited.

Foreign netizens, on the other hand, were mostly skeptical, believing that Xia Country was just putting on a show.

After the foundation-laying ceremony, Mayor Li Xian of Mist City delivered a speech, mainly expressing strong support for the establishment of the graphene industry of Mist City Arts and Science University and Feiyue Group.

Meanwhile.

In the tower of Ike Technology Group in the United States, Der • Eckx and Christopher Brown were watching this live broadcast from Xia Country.

"Christopher, look at this, Xia Country is really good at showmanship," Der • Eckx said with disdain while smoking a cigar, "Wait until our Aike Tech's graphene technology is officially released. Let them see what real technological prowess is!"

In Der • Eckx's view, everything Xia Country was doing seemed to be throwing up a smokescreen.

Not to mention the incredible graphene technology developed by a private university in Xia Country, he thought this was just a pipe dream.

"Der, we have invested \$850 million in the research of graphene-related technology in the first phase, you know? It's not a small investment," Christopher Brown said with a bit of anxiety.

"The birth of technology often involves piling up money. Don't you understand this, Christopher?" Der • Eckx shrugged and replied.

"Of course I understand!" Christopher • Brown nodded, "What I mean is, we must have a certain understanding of Xia Country's progress in the field of graphene technology."

"How are we supposed to understand that?" Der • Eckx asked, puzzled.

"Didn't they say that the technology wasn't developed at Mist City Arts and Science University? We could..."

Christopher Brown leaned in close to Der • Eckx, whispering something in his ear.

...

After the groundbreaking ceremony at the graphene factory.

Ding Yue courteously invited the leaders of Mist City to visit his Mist City Arts and Science University.

Mayor Li Xian was initially quite busy.

However, after hearing Director Xiao Wenxing's opinion and evaluation of Mist City Arts and Science University, Mayor Li Xian eventually decided to visit the university to see for himself whether it really was as Director Xiao Wenxing had claimed.

In theory.

Ding Yue's invitation to the city leaders to visit his university was just a formality, a polite gesture.

After all, he thought leaders like Mayor Li Xian must be very busy, and they would surely leave soon after the groundbreaking ceremony.

Unexpectedly though, lo and behold, Mayor Li Xian did agree to visit the Mist City Arts and Science University.

However, this didn't worry Ding Yue, who believed that the everyday appearance of his university would impress the leaders without doubt.

"Mayor Li, let us head to the campus now," Ding Yue cordially invited Mayor Li Xian and his retinue.

"Sure!"

The group promptly departed from the ceremony site, leaving Chen Ping, the head of the architecture department, to handle the follow-up tasks at the site.

Ding Yue had to lead the city's leaders on a thorough tour of his university.

"Yue, this is the first time that the top leader of Mist City and all the department heads have visited our university, isn't it?"

"If we could get the top official personnel to visit our Mist City Arts and Science University one day, that would really be something."

"We're already pretty impressive."

On the way to Mist City Arts and Science University, Huang Youjie and Xu Bin engaged in a car voice chat with Ding Yue, subtly boasting.

"Alright, already! You two are getting excited already? Our university is poised to rise to the status of a world-leading institute. At that time, everyone in the world will yearn to study here! Huang, you must instruct the logistic staff to check the situation on campus straight away. We can't have any problems."

Ding Yue interrupted Huang Youjie and Xu Bin's conversation, instructed Huang Youjie, who's in charge of logistics, to check the university's situation while there were still no visitors around.

At the very least, he had to make sure that the university was functioning normally without any minor or major issues today.

"Okay," replied Huang Youjie.

Since graphene factory was not far from Mist City Arts and Science University, they reached the road outside the university gate after a short drive.

Just as they were about to arrive at the gate, Ding Yue noticed that Mayor Li Xian's and Director Xiao's cars seemed to have stopped by the roadside.

"What's happening? Weren't they allowed to drive directly in? Huang, didn't you inform the security staff at the gate to let them through?" Ding Yue asked Huang, puzzled.

"They were informed," Huang replied.

"Then what's going on?" Ding Yue frowned.

By rule, on this inspection visit to his university, Mayor Li Xian and the others' cars should have been allowed to drive straight in and park in the parking lot and not stopped outside the gate.

However, their cars had stopped by the roadside.

As Ding Yue's car pulled up a little closer, he saw students crowding the square in front of his university's gate.

"Huang, did you inform the students to come and welcome the visiting leaders?" Ding Yue asked Huang urgently.

"No, I didn't!"

Chapter 750: Don't Be Too Extreme in Love

This left Ding Yue somewhat stunned.

Given that Huang hadn't informed the students to assemble at the school gate to welcome Mayor Li and his party, why then were there so many students gathered there?

This was not normal.

Usually, there were quite a few people coming in and out of the gate of Mist City Arts and Science University, but they were transient, some would leave the university to explore and enjoy University Town, and others would return to university after their outing.

However, this large gathering of students was surely indicative of something happening.

"Could it be that something has happened?"

Huang Youjie muttered.

"Huh?"

Upon hearing Huang's words, Ding Yue's heart jumped, as there could indeed be problems given the circumstances.

"Quickly! Let's go and see!"

After stopping the car, Ding Yue immediately got out and jogged over to assess the situation.

At that moment, Mayor Li Xian and other several leaders from Mist City had already arrived at the outer edge of the crowd.

"What has happened?"

Seeing so many students gathered, Mayor Li Xian looked towards Director Xiao Wenxing and asked.

Director Xiao Wenxing had no idea what had happened, so he quickly shook his head and hurriedly called Principal Ding over.

"Principal Ding, what's going on?"

"Director Xiao, Mayor Li, I also have no idea what has happened," answered Ding Yue truthfully. He then made way through the crowd: "Excuse me, excuse me."

"Principal Ding is here."

"That's Director Xiao, isn't it?"

"Principal Ding, you must stand up for us."

"Principal Ding, there was a fight, our classmate was beaten up."

"How can people from Mist City Fine Arts College bully people like that!"

"What happened? I just got here, I don't know."

Seeing Principal Ding arrive, the students immediately stepped aside. The students surrounded a student who was sitting on the ground, his face showing signs of bruising and swelling from a punch, but there was not much blood.

"What on earth happened here?"

Upon seeing the scene, Ding Yue found himself involuntarily becoming angry.

"Principal Ding, a couple of guys from the Mist City Fine Arts College came over and beat him up," a student explained loudly.

"How badly is he hurt? Does he need to be taken to the hospital?" Ding Yue immediately approached the injured student and asked.

"Principal Ding, I'm fine, it's just a flesh wound," said the injured student, shaking his head.

Even though Ding Yue didn't know the male student who was sitting on the ground, it was apparent that he was one of his own students.

"Although it's not severe, you should still go to the university infirmary to have your injury checked," Ding Yue still cared deeply for his students.

So he instructed other students to accompany the injured student back to the university infirmary for further examination.

"Make way, everyone move aside, don't crowd around, disperse."

Huang Youjie's voice was heard from the crowd's periphery.

Mayor Li Xian and Director Xiao Wenxing then came over.

"Principal Ding, what happened? Was there an incident?" Upon seeing the scene, Director Xiao Wenxing immediately asked Ding Yue.

Though Mayor Li Xian didn't ask, from his expression, it was clear that he too wanted to know what had occurred.

"Director Xiao, one of our students was beaten up by a few students from Mist City Fine Arts College at the university gate, the specific reason why is unclear at the moment," Ding Yue helplessly shook his head and reported the sudden incident that just occurred to Director Xiao Wenxing and Mayor Li Xian.

"All of them are university students, adults. It's a failure of moral education if they resort to fighting at the drop of a hat!" Director Xiao Wenxing's tone immediately turned serious after hearing this.

After all, Mayor Li Xian was right next to him, and as the Director of Education, Xiao Wenxing had to exhibit authority.

"But leader, it was clearly those few male students from Mist City Fine Arts College that started the fight, Zhang Yang didn't fight back, nor did he have a chance to. There were four of them!"

At this time, an upright student explained the situation.

"So you're saying that Zhang Yang, didn't fight back and was simply beaten?" Ding Yue asked the upright student again upon hearing this.

"Yes."

"Principal Ding, we saw it too, we can vouch for it."

"Principal Ding, if you don't believe us, you can check the surveillance footage."

"Yes, the surveillance camera at the gate should have recorded it."

"That's right! Those four from Mist City Fine Arts College acted very quickly. They ran back to Mist City Fine Arts College after beating up Zhang Yang, we all saw it."

The students said indignantly.

Upon hearing what the students of Mist City Arts and Science University had to say, Director Xiao Wenxing couldn't help but frown.

It seemed that the student named Zhang Yang from Mist City Arts and Science University was the one who got beaten up. It appeared that he had misplaced his anger earlier.

"Mayor Li, it seems like students from Mist City Fine Arts College came over and started a fight. I'll handle this matter right away."

Although Director Xiao Wenxing shouldn't be involved in such minor problems between universities, he happened to be present and the leaders were there too. Therefore, he couldn't avoid dealing with the situation.

"Principal Ding, how is the student?"

Director Xiao Wenxing turned to Principal Ding again, asking about the condition of the beaten student from Mist City Arts and Science University.

"He was most likely punched a few times in his face. I have already sent him to the university infirmary," replied Ding Yue. "Director Xiao, this matter has to be properly

handled. An incident like a fight in a college campus can escalate dramatically and become very dangerous if not addressed."
