

Female Alpha

Chapter 1: beginning

There's different kinds of wolfs. But I am a special alpha. You might ask how well my mother was an alpha, she was the most beautiful alpha female but now she never to me seen again. The most important part was that I was a true alpha, that only happens once in a life time. Female alphas have died long ago that's why my father, the alpha king has hid me. He hid me in a forest close to the kingdom, so no one can find and hurt me. What he wasn't expecting is me finding my mates in the forest. Yes mates I have 3 mates that I haven't met. I know why I have 3 mates is because I smell 3 different wonderful smells. Anyone can find their mates and if they can't that means their mate is not living. Plus I know all my mates are beta because they have a strong scent but not an alpha scent. My father came to see me when he can he has black hair with beautiful blue eyes and he stands about 6ft tall. Some people fear him but that's because he can get scary when he's mad. Others think he is the kindest because they haven't done anything to him. For some reason though he always wears black since my mother's passing. He used to hate the color black because when he thought of it he became completely scared to lose me or my mother. You're probably asking yourself well how does my mother look well. She stood at 5'2ft she had silver hair and she also had silver eyes. Every single time I would see her with blue dresses because it was her favorite color. My mother and father loved each other a lot but then one day it came to my father to choose, between me and my mother. It was the hardest thing to do but he chose me, that's exactly the same moment my mother said save our child. I know I won't make it out of this one alive, so take good care of her. And that's how I'm here telling you this. My apologies for not saying this sooner but my name is Roselyn Bree knightly king.
