

Female Warriors Broken Heart

Chapter 3. First shift

Chapter 3. First shift

Connor POV

Annalise pauses and gives me a look that tells me I need to explain the rest. "We've both always been faster and stronger than everyone else but didn't think anything of it until we both had to get our blood drawn about a year maybe two years ago when we were trying to find our parents. It turns out that we are both of alpha blood." I say and pause to give everyone a chance to process what I just said. I go to continue when my sister suddenly screams in pain. I start to panic. I have no idea what's going on, just that my sister is in pain. After what feels like an hour but is really only a few minutes the alpha speaks. "Connor, she's shifting, you need to get her outside now." Alpha Aiden says with urgency in his voice. I pick her up as carefully as I can so I don't make the pain worse. I walk as fast as I can without jostling her too much and set her on the ground in the forest behind the pack house.

Annalise POV

I listen as Connor is explaining everything to my friends, their parents and the alpha. He pauses, I assume to give them a chance to process what he told them and just as he goes to continue I feel extremely hot then nothing but extreme, blinding pain and the sound of my bones breaking which is when I realize I am shifting. I was in so much pain that I didn't even realize that Connor had picked me up to carry me outside until I felt the cool ground under my back. Almost as soon as Connor sets me down, alpha Aiden stands in front of me and begins to talk me through the shift. "Annalise whatever you do don't fight the shift, fighting it will only make it hurt worse." Alpha Aiden says. I take a deep breath and stop fighting my shift. Within minutes to the shock of everyone I had fully shifted and was standing on my 4 paws. I look down and see that although my fur is grey my paws are pure white kind of like socks. I am standing in my wolf form as everyone admires me when I hear a voice in my head. *"Hi my name is Rose and I am your wolf. It's a pleasure to finally meet you."* Rose says. *'Hi Rose, it's nice to meet you too. Could you please explain why we shifted 2 years early?'"* I ask. *"I knew you were gonna ask that. I am here early because we are special and the events that are set to*

take place the next couple years are going to be too much for you to handle without me but they need to happen for you to reach your full potential. So yes there will be pain but on the other side of that pain is your true destiny waiting to be unlocked. But now it's time to shift back and finish explaining what you know to everyone, as much as I would love to run, there isn't time for that now." Rose says. " Ok, how do I shift back? " All you have to do is picture your human form, and before you ask, yes , shifting back is going to hurt but nowhere near as bad as shifting for the first time." Rose says. I begin to picture my human form and like I expected there is pain but nowhere near as bad as when I shifted just moments ago for the first time. I am fully shifted back to my human form in 2 minutes and the conversation happening between my friends their parents my brother the alpha and his Luna who I think had joined us at some point during my shift freezes as they all stare at me which is when I take the second to look down and notice I am fully clothed but I am not wearing the clothes I was wearing before I shifted. Instead I am wearing a dress fit for a goddess. It's a white Aline off the shoulder dress that drops just below my knees. The fabric is the softest silk, I look down and notice I am also wearing white flats. We are still just standing there in a stunned silence when a white light flashes and momentarily blinds us.
