

Pissing off the Alpha

Dean's POV

I am pissed off as I see Tamora running off. I run after her and midway shift into my wolf. I cannot believe that she is this stupid to run away after we have met Vladimir. I have to make sure that she is okay. I lost her scent, which drove me crazy, not knowing if she was okay. I fear the stupid vampire will follow her to her Pack as he is faster than me. As I ran it through the dark wood, I ran into Vladimir again. It looks like he has also lost her scent. He is looking around on the ground as if looking for clues. I quickly changed behind—some of the bushes. We hid clothing all over the woods in case we had to shift. I still wonder how Tamara can shift and still have her clothing on. I walk out of the tree lines.

"I guess you lost her scent," I say from behind him. Vladimir turns around and glares at me.

"I can see you have the same problem. I will find her before you can," Vladimir says.

"Listen, she is my mate and my Luna. She will never be with a vampire. You can have all the women in the world. Why would you want Tamara? She's taken, and you will never have her. I wouldn't say I like that you are playing games with us. I think Maureen may be the one that you are looking for. I will give her to you with the woman that stole her. All

I'm asking is that you leave my mate alone. I do not want a war between the vampires and the werewolves," I say.

"Oh, the Big Bad Werewolf are afraid of this little vampire like me. I like your little Tamara, and she is full of spirit. I do not think you are suitable for her, for I believe I am much more vital. She needs a real man. Why aren't you with her if she is your mate anyway? I can tell that she is an alpha wolf as well. Does this mean she doesn't want you?" Vladimir asks. He is starting to piss me off.

"What happened between us is between us, and it has nothing to do with you. She is my mate, and that is all you need to know. Please stay away from Tamara, or I will kill you and your whole coven. I have no problem killing vampires and don't want a war. There are other problems in this area. It is not only you because you know you bring trouble wherever you go. You understand that the hunters are hunting you, and now we must also deal with them. We have dealt with hunters before, and we were friends with them. But these days, they are helping humans eliminate all supernatural creatures. You brought them here, and now I must deal with them. Vampires are good for nothing," I say, as I do not want the vampires to be around anymore.

"I also know the hunter are working with the humans, so we are here to fetch my sister's child. I know I've been mocking you. But to be honest, I have to tell you the truth. They have started using vampires to make superhumans, and we cannot allow it, and they even use wolves to make creatures

looming in America's parks. We cannot allow this. Yes, I want my sister's child back, but I also need your help. It all started here in America with the National Parks. Humans have labs all over the world. Not only to create superhumans but also to make viruses that can destroy the whole earth. They want to use them in the wars. I'm only telling you this because I know you are a werewolf with pride. I am only interested in Tamara because she is powerful. She can help us with our mission against the humans and the hunters. I do not know what has happened to the hunters. I do not understand why they are helping humans to create super creatures. We will have to find out. Perhaps I know something that we don't. And if we do not find out, it may be too late for the world," Vladimir says.

"How do I know that I can trust you? How do I know that what you are telling me is the truth? I know the hunters have been hunting around here lately, but I do not know for what and why. Usually, we do not have any problems with the hunted, as they do not come to our area. But I have seen them around here lately, and I thought it was because you were around. Hunters don't have problems with werewolves. We used to be friends, and I must admit that they have been our enemies lately. I cannot believe they have gone so far as to help humans with their secret labs. I need to find out if you are telling me the truth. I need to find the hunter, and I need to make him talk. I only noticed this when looking for you the last few days. I always thought that the hunters were our friends and that I would never come after us. But lately, I

have noticed that they are taking the Rogues away. We no longer have as many Rogues as we used to have around here. I wondered what was happening and if you had something to do with it. I know the vampire has always been our enemies. But after a few days, I saw the hunters coming in and taking the rogues. I thought they were taking them away to protect us. Then they attacked the roques. I saw them taking a whole group of rogues with them. I was wondering why they were taking the roques away. I thought it had to do with you being around you. I thought they didn't want the roques to help you. But what you're saying is making more sense," I say.

"I tell you, I've seen what I have done worldwide in their laps. Of course, they want the strongest and the best. That is why they are tracing after me as my family. We are the original vampires, and they will soon come for the Alpha wolves. I got all these reports from everywhere that they are chasing now, after Alpha Wolves, and not using the nokes as much anymore. I do not know what the humans are planning, and I think it has something to do with the viruses they are experimenting with in the labs I have worldwide. As you know, only we, the supernatural creatures, do not have to worry about human viruses. Humans are weak against any virus, while we are strong, as our bodies can heal themselves. Humans do not have bodies that can heal like ours, so they are trying to use us to make superhumans. I have not seen any of the creatures they develop in the labs. It can always be that they are planning a war. And I want

super soldiers fighting their battles. You know that humans want to bring down the world's population every few decades. That is why did is always wars and viruses. I have seen so many things in this work that I am not surprised that humans will go that low to kill of their own," Vladimir says.

Vladimir has me thinking. I can imagine what he is saying to me and that it is what the humans are doing. All we want is peace in the spot of the world. But we know that the humans will eventually come here and destroy everything. If they want super creatures, they will stop at nothing to get them. I do not know what I should do. Should we work with the vampires or try to fight the humans and hunters ourselves? You think that I always thought that our only problem was the original vampires. Now it seems like they are here only to get Maureen and leave. That is, if Maureen is the child of Vladimir's sister. I have never seen her drink blood or use vampire speed. Maybe because she grew up as a werewolf and did not realize she was a vampire, she must have had bloodlust. Can a vampire keep their blood last turned off for so long? I do not know. I do not know much about vampires. We never mix them. 1

"I do not believe that Maureen is your sister's child, and I have never seen her use her vampire powers. I also never saw her drinking blood, so I do not think she could go that long without having bloodlust. However, I do not know how your vampires work. Maybe if you can explain it to me, I will understand. Could Maureen unconsciously suppress her bloodlust because she thought she was a wolf?" I ask

Vladimir.

"She must have starved herself if she did not drink blood. Maybe she drank blood without you knowing and did it secretly, and she must not have known why she had this blood lust. She did not know she was a vampire, but I can promise she drank blood secretly if she was the vampire we sought. No vampire can exist without drinking blood unless we sleep for many years. And that only happens when we get staked, but not through the heart," Vladimir says. I cannot remember seeing Maureen drinking blood before us, which does not mean she did not. But where did she get the blood that she was drinking?

"If she was drinking blood, where would she get it? There are not many humans around here," I say.

"She could have gotten it from animals, or maybe somebody was feeding her blood. Who knows? You know she can still drink werewolf blood; it does not have to be human blood, and the only blood we cannot drink is old blood. We can also not drink from corpses, as a dead man's blood weakens us. But that is because we have been fighting for many decades. You and I know it is not a secret," Vladimir says.

"Yes, I know that, but I am so wondering. Where and how did she get blood? I cannot believe that a werewolf will willingly give a vampire some of the blood unless they love that person, maybe like her mother. Doreen stole Maureen out of

the hospital the night she was born. Maybe Doreen knew that Maureen was a vampire. But why would Maureen think you could get a wolf if she knew she was a vampire? I think at this time, I talk to Doreen and Maureen. I will first have to find out if Maureen is the vampire stolen from the hospital. I will let you know what I find out. Let's meet here again tomorrow night but without Tamara. I still do not want to be near my mate," I say, and Vladimir laughs.

"I cannot blame you for being jealous of your mate, and she is gorgeous. Anyway, if you can help us find the lost vampire. We will not leave this area until the hunters and humans are gone. We will help you to fight them for the first time in history, vampires and werewolves will fight together. It can make an exciting partnership, especially if your she-wolves look like Tamara," Vladimir says, and he is pissing me off again.

"Tamara is off the table. She is my mate, and no one but me will ever touch her. If you try to lay a hand on her, your eye will come after you, and I will kill you. I am not afraid of an original vampire and am a strong Alpha wolf, and we all know that werewolves are more powerful than vampires. All that counts in your favor is your speech, vampire," I say, and I can tell that Vladimir can see that I am angry.

" Now, Mr. Big Bad Wolf, I am only teasing you. I will see you here again tomorrow night. And Tamara does not have to come. I can see that you are jealous of your mate. I don't want to piss you off. We may have to become allies, and I

 +15 BONUS

do not want to piss off the Alpha," Vladimir says, as he runs into the woods. I am still a little angry as I run back to my Pack.
