

First Strong 105

Chapter 105 - Search 1 empty

Shen Lang can basically be sure that when the previous opening, Yue Gang's grandfather should have been murdered in the tomb by several of their predecessors. The five of them went out before closing.

Tonight is a bit different. If he goes out first, people outside are out of doubt, and it is very likely that someone will come in to investigate. That is, he does not go out, waiting for the time to arrive, they may still arrange for people to come in and meet.

Because the generation sixty years ago, it has been determined that there are no organs on the first to third floors. This is what Yue Gang did not know, but the other five know! Therefore, after waiting for Li Hang and others to come out, they will suspect that it is a mess, and it is entirely possible to join forces to rescue.

Shen Lang is not afraid of killing, but it is not a hobby!

If Li Hang and Ye Shiguang really return to cooperation, there is no harm to him. He really will not kill them. It is after they leave, they will deduct the fierce name on him, and that is what happened.

However, they first had false news in the real news, and they wanted to let the organ sneak into him, and when they heard the movement and suspected that they were in the middle of the organization, they thought about ambushing him and going out to destroy him!

So he decisively killed the two, but did not want to let the people who came in to rescue also kill. Inside the Phoenix Valley, plus the winds on the peaks, at least forty or fifty people, all of them have killed the movement is too big.

After thinking about it, Shen Lang did not go out, nor did he wait until the natural tomb of the King of the King was closed. Instead, he directly searched for the off-sun array in the shade, took the power source that started at the beginning, and then he closed the tomb of the king in it!

From now on, it will not be open for another sixty years.

But if he wants to come in, he can still come in. As long as the two yang and yin arrays are not destroyed, they can still be manually turned on and off.

Then Shen Lang extended his knowledge to the top and peered into the movement inside the Phoenix Valley.

All of the above, including Li Lao, who was just injured, are all shocked!

Although except for a few veterans, almost everyone else has not participated in the last time, but all the core children can come to know the legend. It is opened once in sixty years, and the time of one time is two hours of the child.

It's been an hour, but it's suddenly closed!

Their head is still inside!

However, because of the relationship of mutual restraint, whoever stands in the entrance will be regarded as ulterior motive by other sects, in case of attacking one's own people? So everyone has formed a tacit safety distance, in the stone array.

Because it has been proven that it will be closed in two hours, it is less than an hour now, which is the lowest time for everyone's psychological defense.

When the accident was discovered, the entrance was closed, and the tomb of the King of the King re-messed on the ground, leaving only the dirt traces that had moved.

Several veterans also took the initiative to immediately decide to direct the disciples in the door and began to move those boulder.

First, disrupt the movement and then follow their drawings. After no effect, according to the position adjusted by the previous wave, I hope to open it again manually.

But there is no doubt that they can no longer be opened after they are not closed, unless they are a master of deep detachment.

Like the people of the Yue family sixty years ago, everyone is also comforted. Whether they are hands-on or not, at least their advantage is to get it.

But this time it was different. There were no five people at the scene, and it was obvious that there was a change, and it was probably related to Shen Lang! But whether it is caused by Shen Lang, or the fact that five of them attacked Shen Lang, the consequences have already appeared. What is needed now is to save people!

When Shen Lang came in, he confirmed that this “Ban Wang Tomb” underground palace is very firm and it is impossible to dig it out unless it is bombarded with a large amount of explosives.

So when they watched them find ways to be busy, Shen Lang did not care much more.

His current performance is trapped here with five of them to avoid being attacked by everyone. After they leave, go out alone.

But dozens of people outside, obviously not willing to go now. Because they are not dangerous outside, and their very important people are in trouble here. Maybe I will be busy outside in the evening!

If you don't want to open it again and they fight hard, Shen Lang can only wait.

After thinking about it, he didn't idle anymore. He began to search through the first floor one by one and opened all the stone rooms. Then I found out that all the things in the room have been searched out!

He didn't even know what was there!

In some rooms, you can also see some cheekbones. Obviously in the history of the past, not only the Yue family was trapped inside.

But in a room on the third floor closest to the passage, Shen Lang saw a skeleton in it, and he suspected that this was Yue Gang's grandfather!

Sixty years have turned into dead bones. Even so, it can be seen that many bones are broken, indicating that they are not trapped inside, but they have already been killed. Of course, the skeleton inside is basically the same situation!

If you really have been trapped inside, even if you have lived for sixty years, it is possible to live for a few more days. Under the instinct of survival, they will explore other ways, including other stone doors that have not been opened, including exploring below. The result of death should also be killed by the agency!

He would think that this is the Yue family, because according to Ye Shifeng, the last time they basically swept the third floor. In this way, Grandfather Yue Gang, the greater possibility is that he was killed on the third floor.

However, there is nothing to prove. After searching a little, I found a brand in the bones and rotten clothes, which looks like a close-fitting one. The things that have been obtained must have been searched and scraped away. This is not worth much. I will keep it Shen Lang will take it up and prepare to bring it back to Yue Gang to see if they are their home. Not throwing it.

Thinking of being searched, Shen Lang re-examined and searched Li Hang and Ye Shifeng's pockets, and did not look at them. All of them were in the storage ring.

Because the top was closed and could no longer be ventilated, Shen Lang also took one of their oxygen absorbers and oxygen cylinders, and several other people also collected them.

They just prepared enough for two hours, but he should still be out for two hours now.

In the following time, Shen Lang went down again, and all the stone rooms on the fourth floor were opened one by one. This time it was a little dangerous. Many institutions have not been triggered yet. In the end, they took everything away from the ring.

Originally, Shen Lang still thought about getting the most important things to go. The other is Zheng Man's gift, let them continue. Now he is forced to "snap out" the entire tomb of the king.

After he was busy, he returned to the entrance, and the gods sensed the situation above.
