

## First Strong 1091

Chapter 1091 - Take the treasure?

To say that this king is a dragon, encountering Shen Lang is enough to make you feel depressed.

Because Shen Lang has no intention to harm it, just want to know its level. So after the temptation, there is no hard battle. And riding on its back, did not expect such a big stimulus.

All the way can not smash the waves, it thought of the pool of the dead, ready to soak the sink into the sea, and then get out.

Unexpectedly, the other person on the tail actually recognized the stagnant pool and warned against the Shenlang, and Shen Lang's ability to respond was even more.

Therefore, it has not had time to get out of it, but it was stepped on by the waves and the back was soaked into the water of the Deadwater Pool!

By the reaction of that step, Shen Lang himself quickly ascended to the sky.

The rising speed of Shen Lang was very fast, and immediately surpassed the leading faucet that had already risen first. Then I heard a scream of screaming!

Then, almost squatting with him, Xiaolong also flew upwards at a rapid speed. In addition to just being hit by a heavy foot, his back was stagnant, and the latter half of his body, including his tail, was completely evaded, and it was pressed against the stagnant water.

You don't have to feel it. Just listen to the sound of the sound, you can also know that it is very painful and uncomfortable.

This makes the Shen Lang strange, but also a bit fortunate, if it is not just the warning of that person, he thought that Xiaolong is going to take him deep into the water!

His current strength gives him enough confidence, and he may really follow a little.

Even the dragon with thick scales, licking the stagnant water, is screaming. If he goes down, even if there is a sacred body, it will not be injured, but it will corrupt the scorpion.

“Roar—!”

After the sturdy long squat, Xiaolong found that Shen Lang was on his lips, and everyone was flying at a speed that was not much different, not only looking at the near, but also slowing down.

Ever since, it screamed and opened his mouth to bite into the waves!

Shen Lang will of course not be bitten by him, directly speeding up and flying a little, and then stepping on the dragon’s head!

Just like this, this foot also uses the “Da Shou Mi Long Xiang Shen Gong”, with his current physique, but in a few tens of thousands of pounds concentrated on one point.

Xiaolong was full of resentment and was about to bite the sorrow and vent his anger. Suddenly, this time, the body of the captain was subjected to a huge impact, directly stagnating, and even sinking a little.

The pain of just hitting the stagnant water, like the mans on the back, makes it a bit shadowy, afraid to fall again. Therefore, if you don’t take a bite, you should stabilize yourself, including the tail, to avoid possible contact with stagnant water.

Such a little fallacy has already made the acceleration of the waves, flying far away. When it went up again, Shen Lang had already stood on the top of the hill.

The local strongman, on the other side of the mountain, just looked at this scene. For Shen Lang did not fall into the stagnant pool, but almost entered the dragon pit, it is quite admirable.

“This friend...”

He wants to say hello to Shen Lang, but now Shen Lang is the appearance of a giant, even if he is opposite, still need to lie on his back, still a little unaccustomed. If it is next to it, it is even more strange.

Shen Lang nodded to him, but did not say anything immediately, but directly reached out, raised a boulder, and then smashed the faucet that had already flown up!

The local strongman is speechless, it is a boulder much bigger than his whole person, but now the other side is a stone that is grabbed by hand.

He really doesn't know which one has such a strange skill...

The boulder that slammed over, for the king, was only slightly disturbed. It turned easily and flexibly, avoiding the stone.

Then the tail rushed to Shen Lang and swept over!

The local strongman opposite, just not leaving, is already very loyal. Now that Shenlang has come up, Xiaolong has come up, and it is not convenient to stay here.

After all, the following is a stagnant pool. If you fall into the trap, you will die!

“Friend, let me take a step!”

He turned and flew away in the direction of his travels. When he first met, he was kind enough to warn him. He was also a fool for Shen Lang. Now he has become a friend.

Shen Lang did not dodge, but opened his arms and hooped directly to the dragon's tail!

His action, the king of the dragon, has a hint of hesitation.

This huge human being has always been very surprised. Before he was on the back, he used the dragon tail to sweep it, and he did not sweep him down. It is not comparable to another small human being, in case...

I have just suffered a loss in the Deadwater Pool, so I have to be cautious.

So in the face of the waves that Shen Lang took the initiative to meet, it was quickly recovered, and then turned around in the air, directly chasing the local strong! That is also the direction that has just come.

Shen Lang is a bit speechless.

Can't beat him to chase that? Is bullying hard to this extent?

But then he moved and thought of a possibility.

The local strongman obviously knows a lot about the situation of the king's beast. I have already lurked in the vicinity of the pond in advance, and I don't know how long it is. His goal is this king.

Or is there any strange treasure in the vicinity?

Highly natural Tiandi treasures are guarded by beasts and beasts, both as guardians and as a resource. Like this king, the dragon can reach the present level, in addition to its own genes and long-term evolution, it must also be related to the environment of the Golden Mile, and related to some rare resources.

When I was fighting with Xiaolong, I saw that the person was far away, but did not take the opportunity to leave, but returned.

Everyone meets for the first time, no loyalty, no morality, nothing more than interest. Perhaps it is afraid that after he hangs, the man is difficult to support, perhaps he wants to join forces to kill the dragon!

Just after the attack on the dragon, Shen Lang that person immediately left. Will you want to take advantage of the dragon, do you want to take things first?

If this is the case, it is normal for the king to catch up with the dragon immediately. It is not a bully or a hard fear.

With this conjecture, Shen Lang has begun to catch up with the past. When I walked, I found that the big stone that had just been hollowed out fell into the stagnant pool, but there was no water and sound, and it was quickly disintegrated!

When these things are sorted out, you can already see the chasing of the previous one. That person's speed is still not as good as his, or may not be as good as Xiaolong, but benefited from the first move, but in the current situation, before he rushed to the place before, he must first be caught up by Xiaolong.

At this time, Shen Lang once again saw the previous beast tide!

If you are catching up at the same speed, you can escape for a long time, and see who will slow down first. But if it is relative, at the speed of everyone, it is going to meet soon!

Regardless of the heartlessness, Shen Lang is still in love with the person who warns the dead pool, and at this moment is also accelerating to catch up with the past.

Chapter 1092 - Front and rear pinch

The local strongman is on his way to the fastest speed, but he also found the situation ahead.

When the king 蛟龙 summoned the herd, it was in that place, so the fierce beasts who came back from afar, still gathered in that place.

Now he is rushing back from the direction of the Deadwater Pool. Although it is not a direction, it will still hit.

At this time, the situation was urgent. There was a herd in front, and the beast of the king was chased after him. He is also clear. I must go all out and dare not let the speed lag, so I can't distract it so much.

However, based on experience, he estimated that at the latest ten miles away from the pond, he would hit the herd!

And it is very likely that, before hitting the herd, it has already been caught up by the latter king.

However, he has no choice. He can only clench his teeth at this time, try to make his speed to the extreme, and hope to win the other side.

In the back of the waves, you can be more calm.

With the closeness, plus his current height, the naked eye can take the overall situation.

At this time, Shen Lang actually has a little hesitation, and has a little thought of himself.

Let this local strongman be attacked before and after, attracting the firepower of the fierce beasts, he can easily rush over the pond.

However, he did not understand the king of the dragon, and he did not know what the local strongman was plotting. Even if there is a chance to pass, it does not make much sense.

And by being attacked before and after, this person will certainly not support for a long time, and the returning king will still lead countless beasts to chase him.

Therefore, Shen Lang only slightly hesitated, but he still returned the other person's feelings.

Seeing that the king of the dragon is about to catch up, Shen Lang is still a little distance, he directly raises his hand and slams out with a holy armor!

The change behind him, the king of the dragon is still the first time to feel, before hearing the sound, you know that something has been attacked, but it has absolute confidence in its own strength.

Therefore, it did not pay attention to the attack behind, but the body swimming dodge, still continue to attack the local strongman!

But... Shen Lang is now attacking through the sacred armor. After the target is locked, the shells will only track the past directly, and the speed is also fast.

And for its scales, Shen Lang is naturally clear, so the target aimed at this moment is directly the injury to its back!

Just after all the way, Shen Lang has already seen it clearly. He was trampled on the back of the dragon with the stagnant water. Although the range is not large, the scales have been greatly corroded!

That piece looks like it is like the muscle skin is burnt. This is still due to the strength of the scales, or else it is estimated to be a bad one.

The shells hit its scales, which is estimated to be a shock of the giant earthquake, and may not be able to break. Now that the target is placed on the back injury, the effect is different.

When the shells approached the wound, the king's dragon also felt it, and immediately issued an angry roar.

“mean!”

Shen Lang sensed the meaning it conveyed.

At the same moment, the body of the king, Xiaolong, quickly reversed and accelerated as much as possible. At this time, the shells had already been hit, and it was too late to change the tracking. It was directly hit by a few feet next to the wound.

The defensive type and vitality of this king dragon are undoubtedly very strong. Even if some scales are eroded by the stagnant water, the surface healing will be maintained at this moment, and there will be no bleeding.

It has just been bombarded by shells, even if it avoids the frontal wounds, but the huge impact that is close at hand still causes its wounds to crack and there is blood.

Before it hurts, it has made it crazy, but still hold back, chase another one. Now Shen Lang has given it to him in the back, so that it can't stand it.

As the scorpion continued, the dragon rushed to the beasts not far from the front, and at the same time turned the body and attacked the back waves.

This time it was a real rage, and the surrounding winds swept through the sand!

Its flexibility has once again been revealed. Although the body is huge, the faucet is suddenly flicking up and down, and the minions are greeting the waves from time to time.

Shen Lang turned into a giant, has the advantage of strength, the overall speed is not weak, but the flexibility naturally sacrifices. In the face of this mad mad beast, after he evaded a few times, he immediately retracted his body and became a normal size.

Normal size, so that the body's dodge can be more calm, more flexible and more agile, the block is small, and the space that can be evaded around is also mostly.

However, the pressure of the king's dragon is much bigger!

At first glance, the attack of the dragon is very common, purely using the claws and tails of the body. But in fact, as a beast of the king, no matter whether it is a bite or a claw, it is a very powerful hurricane, and it is weak, and it may be broken without being directly caught.

And similar to the field, it has a certain degree of control over the space environment within the scope of its attack.

This is even more obvious after Shen Lang's body has shrunk. From a far-sighted point of view, he is always shredded and swallowed.

The local strongman in front, though not afraid to be more distracted, but he still knows the changes behind him. At the crucial time, Shen Lang was dragging him to the king, and he was very grateful.

But he can't go back and join hands to help, because the front is already a herd, and the first beasts that can be seen have reached hundreds of heads!

For the herd, he was mentally prepared, but actually encountered it, and it was a different feeling.

Just like the monks on the earth before, they should be prepared to face many beasts, but hundreds of thousands of beasts will appear in front of them. The majestic scene will directly make people nervous and will be gone. confidence.

When there are many people, they can still unite to resist it. But it is difficult for people to be united. Once there is a lead run, the herding effect will appear, and everyone else will follow.

If you have fewer people, will be embarrassed directly from the momentum.

This local strong is just like this. He wanted to see if he could be lucky enough, but now he has no success. In the face of the surging tide, he decided to turn around and leave!

“go—!”

He had no time to say so much, and he couldn't come back to help Shen Lang. He could only make a loud scream, and the man flew out in the direction of the side.

And the countless herds have already received the command of the king, not only to chase him, but also from the side, fanned out in the past!

I kept the sinking waves under the attack of the dragon, and noticed the situation on his side. I can see that the guy was completely discouraged. Without the impetuous escape, under the chasing of more and more fierce beasts, it will certainly not last long.

Shen Lang took the opportunity to act, and displayed the “Phantom Meteor Step”, which pulled the speed to the fastest, and immediately caught up with the local strongman. Then he grabbed him before the other party reacted, and then took him and disappeared instantly. !

Chapter 1093 - Cooperation proposal

Shen Lang did not think about killing these fierce beasts, or killing the king's beasts. Now they see that they are basically converging. Don't say that he alone, even if he adds this local strongman, he will fight for both.

The reason why he dares to go deep into the ground alone is because he can leave without certainty.

Nowadays, the people who meet with this Pingshui have taken care of each other several times, so at this moment, he brought this person with him in the past, and then left the supersonic speed through the holy armor!

When the fierce beasts reacted, they waited until the king's dragons chased them. They had disappeared into sight, leaving only a trace in the distance.

The king of the dragon has its own realm. According to this speed, it may not catch up with it!

There are hundreds of thousands of beasts, some are fast and slow, and the number is huge. They will affect each other along the way. Trees and rocks will also form obstacles. It is suitable for a wide range of strong pressure, which is not conducive to speed tracking.

Although it was not reconciled, it ordered the group beasts to stop.

After flying the tens of miles with the man, I felt that I didn't chase after it. Shen Lang landed on a vast hill.

Just being taken away, this local powerhouse was also taken aback. However, he still gambled, gambling on the waves is to save him, instead of taking the opportunity to kill him.

The speed behind him also surprised him, so the magic weapon really made him a bit envious.

"It's safe for the time being, they haven't chased it."

After Shen Lang said that he nodded to him, he said hello.

"Thank you for helping me!" The man was also well-informed and thanked him seriously.

If it wasn't for the waves that dragged the king's dragon, he would have been besieged and there would be no chance to get out. If it wasn't for Shen Lang to bring him here, then he is now dying.

"You're welcome. When I was alone, you didn't leave first; and the police stopped the pool." Shen Lang smiled and said that he was also a reciprocal.

Up to now, even if the human condition is repaid, he does not like to owe someone else's feelings, especially if this is another world. It is very likely that there will be no chance to see you again in the future.

"Hey! Watch me, my strength is better than me; and the pool of death, it is also the counter-attack dragon."

The local strongman is really a bit embarrassed, because in his opinion, he did not leave at the time, is afraid that he will not help later, but also want to see if he can use the power to kill the king.

As for the stagnant water pool, because Shen Lang did not leave immediately after the warning, it was still above the stagnant water, and in turn pitted the dragon. So in his opinion, it must be counted.

In this case, people can put this out and say that it is undoubtedly not wanting him to feel guilty!

This made him feel good about this young man who met with each other.

"In the next Lu Feng, from the Phoenix Lu family. I do not know how you call it?" The man gave a gift and took the initiative to introduce himself.

Shen Lang simply returned to a ceremony: "My name is Shen Lang."

This self-proclaimed Lu Feng, the appearance looks like the age of forty or fifty. However, looking at his strength, it should also reach the level of Weiqingcheng, which is equivalent to the semi-precious realm, and the actual age may be even larger.

Of course, just because there is such a realm, I dare to go deep into this, and dare to play the idea of the king's beast.

Shen Lang did not say much about other information, Lu Feng can understand. After all, Ping Shui meets for the first time, and normal should be a little wary. If there is a strong teacher, the forces behind it are weaker, and they are more afraid to expose more information.

He did not do more questioning, but smiled and greeted.

"Fortunately, I will be lucky! Please forgive me much older than you, I have never heard of it, so I don't say long-awaited, haha." Lu Feng deliberately joked.

Shen Lang also smiled: "Han is so wide, it has not been heard that it is normal. Of course, Phoenix City, Lu, I still know."

In fact, he only knows that Phoenix City is an impression of the maps he has seen in Tangcheng. They are very far apart. As for the Lu family, they are just polite.

Lu Feng was very happy to hear, although she did not hear about his personal name, but I can know that Lu is not bad. After all, as Shen Lang just said, Han is so wide.

"Is a small friend coming alone?"

Shen Lang shook his head: "When you came with a friend, it was gone when the animal tide."

This explanation made Lu Feng completely believe that there was a beast wave before, and he also knew it. However, he was lurking with peace of mind and did not move.

Although the strength of Shen Lang is amazing, but in the end, such a talented person, any family genre, will not let him take risks. Even if you really want to come to Jingu Valley to practice, or have a purpose, there will be someone who will help.

Just because it was gone, it was only a person who rushed to the restricted area of the king's beast.

Shen Lang is looking at him, and did not ask directly.

Lu Feng certainly understands this. People want to ask him, and they are afraid of abrupt.

He immediately smiled and said: "I came here alone. Because I have lived for more than a few decades, this Golden Valley has forbidden the land. I am not the first time to come, so I am still more confident."

Seeing Shen Lang nodded, no evaluation, Lu Feng stunned.

What is the use of self-confidence? If it wasn't for the help of others, it might be confessed here!

"Cough... I still want to thank Xiaoyou for helping me today. Right, your friend, have you agreed to meet somewhere?" Lv Feng generously thanked him again, and then transferred the topic that made him a little embarrassed.

"Yes, in the peripheral area. But I am alone, just want to go to the core area, I did not expect to encounter the king's beasts so soon."

"..."

In the words of Shen Lang, let Lu Feng be speechless.

Deaf people! At a young age, a person must be alone in the core area. Sure enough, the hero is a teenager!

What makes him even more helpless is that this is not the rash of "the newborn calf is not afraid of the tiger", but it has this strength.

"That... If the little friend doesn't mind, you can walk with me. I am confident... Of course, I am not talking about my strength. I mean, I know more about this Golden Valley. I have more confidence and too much. Times."

Shen Lang smiled and said: "Let Mr. Lu act as my guide, I can't dare to be this!"

"What dare not be dare! Speak straightforward, my brother, I still hope that you can help."

Lu Feng earnestly said: "Actually, I am really telling the truth. The core of the forbidden land where the king is a beast. The person is really dangerous. Just like I do my homework, and I have experience and danger. If we can walk together, it is Can help each other."

"This is..." Shen Lang looked hesitant.

Lu Feng is a bit embarrassed: "I understand that the strength of Xiaoyou is stronger than me. I am taking advantage of it with me. But you can rest assured that I will not be cheap, I have valuable clues!"

Chapter 1094 - Dragon Ball?

Shen Lang and so on is his sentence!

Everyone meets, and in addition to the human condition, he will leave with him. This is to see what information he has here.

However, everyone just knows that it is inconvenient to make a deep statement. If Shen Lang asks directly, it will inevitably make people suspected of jealousy. Now he takes the initiative to mention, of course, the best.

"Mr. Lu misunderstood. I just hesitated. It is not who is strong and who is cheap. I just think that you may have a business, and I am unintentional. If you are together, it will make you inconvenient. It is not what you ask for." "

Shen Lang said this, let Lu Feng nodded secretly.

In his view, this young man has such strength, he dares to be alone in the depths of the land, and inevitably has its own advantages in all aspects. Just now, with the shot of the king, you can also see that the experience is extraordinary.

Such a character, can you not see that his lurking is purposeful?

I really don't know what to say, either I don't have a picture, I am ready to rob him; or I just wait for him to exchange benefits.

Now that this is said, it will make him confuse. People don't want to go with them, they just have to see what he has to do, and don't want to be misunderstood by him!

“Mr. Lu... Cough, Shen brothers don't be so polite, if you don't mind if I climb high, I will call my brother.”

“Yes. Then I will be welcome, Lu brother.” If this is refused, it seems a bit defiant.

Even if the strength or equipment is weak, he has a lot of experience. This gesture is really enough, and Shen Lang has not insisted.

Lu Feng then said seriously: “Little brother, you and I have just been fighting comrades who have fought side by side. I still need to cooperate sincerely. I will tell you some information first... Don't refuse, I know that you are not jealous of me. I want to let you know.”

Shen Lang nodded: “Then I am really welcome, I am listening.”

He is actually a little embarrassed. Originally, he wanted to know about Lu Feng's picture. Now he is doing something that others want to let him know, and then he is hypocritical.

“I just said that I have a deep understanding of Jin Mao Gu, and I have come here many times. Of course, there is a very important goal...”

Shen Lang's understanding of Jingui Valley is from Yuxianmen, and his knowledge is limited. Now Lu Feng is giving him a good popularity.

Lu Feng's statement is not magical. The Golden Valley is divided into two layers. The large-scale Golden Valley is the whole of the Golden Valley. A small area of the Golden Valley, specifically the core area.

However, he said it is more detailed, such as the place where the king of the dragon is located, in fact, it can only be regarded as the edge of the core area of the Golden Mile!

The peripheral area is very large, but the scope of the core area is actually not small. The king of the beasts inside is not as simple as two ends, but has a small number.

Because of this, the calendar has come to the Jinyu Valley to experience the adventure, no matter which direction into the Golden Valley, have encountered the king of the beast.

According to everyone's analysis, in the most central place, it is likely to be more advanced than the king's beast, generally called the beast!

However, no one has ever verified this. After all, it is necessary to go to the most central place, and go deep into the boundary of the king who does not know how many kings are. At present, there is no such person who has this experience, and perhaps there are super strong people who have entered, but have not shared it with others.

There are a lot of forbidden places like the Golden Valley, which is not so special and rare in the Han Dynasty. It will not be of interest to many people.

It is extremely remote here, so there are not many people who come here to explore the adventure. The nearest Yuxianmen is rarely seen here.

Therefore, information about Kanazawa is also limited. Lu Feng will come here again and again because he came here from a young age. There is a certain emotional tendency, plus also know more.

Over the years, he has also collected a lot of information about the Golden Mile, and he has also explored it step by step from the outside.

This time, his goal is that the king is a dragon!

Strictly speaking, it is not the king of the dragon. After all, with his ability to kill a king beast, even if it is fully prepared, it may not be able to do it. Today, this is also verified.

His goal is the same baby guarded by the dragon!

What is specific, he has not seen it. The legend is the same baby that can make the beastly beast evolve rapidly. It can evolve into the king of the dragon, which is probably due to this.

Because it is the relationship that Xiaolong occupies, this thing is called “Dragon Ball”.

According to the summary and analysis of various clues, Lu Feng feels that Dragon Ball is likely to be fixed in one place!

Because the king of the dragon will certainly not leave the dragon ball too far, if it is really just a bead, it will be taken away in the mouth, and there is no need to be afraid of being stolen by other beasts.

Always in a place, it can only be the so-called Dragon Ball, it can not be carried, perhaps to combine the local environment. Or it is not a dragon at all, but a spirit spring.

Because of this, he was a little closer, and finally he lurked for a long time and slowly observed. I was not discovered by Xiaolong before, because he also carried the mysterious stone and covered his breath.

He had been there for almost a month, and the dragon had been a sign that the water was in the pond and there was no movement at all.

The beast tide that was triggered before was also the beast of the earth monk who was alarming. Because of the large number of people, the linkage was caused by the command of the dragon.

Of course, for a month, don't say that for the beasts of the king, even the more powerful beasts and monks can do it.

Therefore, if it is not Shen Lang who has alerted the dragon in the past, he will continue to lurk there to find more direct clues at close range.

“Although there is no evidence yet, I guess it is the pond that it was shaped before!” Lu Feng said with certainty.

Shen Lang nodded: "It makes sense. Originally I have been entangled with it today, and it has been eroded by the backwaters. It should hate me the most. It is also going to attack me, but when you leave, it will give up immediately. I am going to chase you. And, we have just left, and it has not been chased."

"Right! Explain that it does not dare to leave too far, not only do not worry about us, even other beasts, it is also not assured, must be personally guarded!" Lu Feng heard the addition of Shen Lang, excited to say.

"But... if that's the case, then it should have gone back to the pond and turned into a water shape. It has to be taken away, and then check to see if there is anything weird in the pond."

When Shen Lang said that he was here, he saw Lu Feng's eyes on him and he understood it!

by! This is to let him go to the king to lead the dragon, and then Lu Feng himself to check what Dragon Ball!

Chapter 1095 - Kill a carbine

Seeing the reaction of Shen Lang, Lu Feng's eyes flickered and evaded, and there was obviously a hint of embarrassment.

However, Shen Lang does not feel that something is wrong!

A person who meets for the first time, a person who does not know the details at all, even if they fight side by side, even if they see it at the same time, they should be wary.

Lu Feng just took the initiative to call the brothers and brothers, and the heart of the heart to share the information he knows one by one, it is too warm and generous, even if you need to help the waves, it is still not possible.

Now that I know that I might want to use him to lead the dragon, then everything is normal.

For Lu Feng, Shen Lang does not trust, he is more trustworthy than the verbal ones.

He wants to get benefits, and others must get benefits. If there is interest, it can be a win-win situation, which is the correct way of cooperation.

“That... little brother, I don’t mean to use you to attract firepower. It’s just that we cooperate, we still need a division of labor...”

Lu Feng explained a bit awkwardly.

Shen Lang nodded and understood in his heart that he certainly did not completely say that the secret of the “Dragon Ball” must still remain key.

This is also normal. If you change it, he will not say it completely. Otherwise, do other people still need to cooperate with you? Just do it yourself!

“There is a need for division of labor. But the dragon...the wisdom should not be low, it will not be so easily fooled. Even if it is taken away, it may be very short-lived.” Shen Lang first did not agree positively, but said the problem. The essential.

“You can rest assured! I will try my best. I believe that it will not take long. I just need to have such an opportunity. Just like that, just as long as it reaches the distance of the stagnant pool, I should return. I have time.”

Lu Feng quickly packed the ticket.

It can also be seen from this statement that he did not know much about the dragons. He himself also understood that Shen Lang had guessed it, but he pretended not to know.

“There should be no problem.” Shen Lang nodded.

Just taking the dragon out, for him, there is no danger, just a matter of time. Since Lu Feng said that it doesn’t take long, it doesn’t matter.

Lu Feng listened to the rest of the mind, and then quickly said: “Shen brother, you can rest assured, I Lu Feng is not a person who does not believe, I can swear in the name of our Lu family! After I get Dragon Ball, I must thank you!”

Shen Lang smiled and nodded: “I just wrestled with Xiaolong after I turned, and you didn’t take the opportunity to pick up the treasure, but to join me. Just at this point, I believe in you too.”

Although I said this in my mouth, my heart was secretly sneer.

oath? If you swear by words, if you are useful, the liar can die for more than half. Those who borrow money, which one is not vowed? If you have to pay back the money, you will be rid of it.

Besides, the name of Lv, Phoenix, including Lu Feng, is only his own, and there is no way to verify it. Who knows whether it is true or not?

If Shen Lang is willing, he can also say that he is Yuxianmen. He lived in Yuxianmen. He read the memory of Jingrufeng and understood the upper and lower sides of Yuxianmen. He would not reveal any flaws at all.

When you want to swear, swear directly in the name of Shimen Yuxian, isn’t it just a mouthful?

After getting Dragon Ball, will it run? It is a problem.

Even if you don’t run, you only say “must have a thank you”, then there can be a lot of interpretations, give you a few Lingshi, it can be said to be thank you.

In general, even the river can murder him for the benefit, and Shen Lang naturally cannot believe a stranger.

However, there is no need to break it at this time. On the other hand, he can suppress the other side. If Lu Feng takes the treasure, he will run it. Let him alone bear the anger of Xiaolong. When you don’t blame him for killing the treasure. Now!

Looking at Shen Lang and not seeing the meaning, Lu Feng was relieved. "Then we... when is it better to start?"

On the bright side, he was seeking advice from Shen Lang. In fact, he already had a plan in his heart.

It's just that this requires Shen Lang to lead Xiaolong. Everyone's friendship has not yet arrived, and he dare not order.

Shen Lang thought for a moment and said directly: "Go now!"

"Now?" Lv Feng stunned. Although he was in a hurry, he was not going to go soon.

"In the past, the ordinary people's army was fighting, it was riding. One side looked at the fight, and the horse was going to run. The one who had the upper hand, the enemy lost, of course, took the opportunity to chase the past. At this time, escape The generals, suddenly come back with a shot, often can sneak attack success. This is called back to the carbine tactics."

Shen Lang originally wanted to simply kill a carbine, but suddenly remembered that this is the allusion of the Earth China, people here may not understand what it means, so simply spread the down.

Of course, Lu Feng is not a stupid person. If he hears this allusion, he will not pursue the truth or not, or the specific origin of it, and immediately understand what Shen Lang said.

He slammed his thighs: "It makes sense! We just fled. In the eyes of the king, we all rushed to escape. There are also the herds that they called. How dare to go back? At this time, we will go back. It is the least alert!"

"But going back, it's a bit of a hassle."

"What trouble?" Lu Feng asked.

Shen Lang shrugged. "Although I don't know much about you, I estimate that even if he is vigilant, he will only be more vigilant than usual."

“That is natural.”

“So, whether we are a magic weapon, or fly by ourselves, a little bit of movement, it will be discovered in advance, and it is time to kill us!”

“...” Lu Feng is a little sweaty, it seems that this is really the truth. “That... that...”

“The trouble I said is here We need to use no strength, just run our legs and legs.” Shen Lang said, took out the mysterious stone.

Lu Feng reacted at once: “Yes, yes! There is still a way, although it is a little trouble, but it does not matter.”

The property of this mysterious stone is to cover up the atmosphere, making people feel like a stone. But that is to keep the body’s breath in the case of staying still. If they are flying forward, or using magic weapons, they naturally have a change and can be perceived.

If you walk with your feet, it is very small, so there are countless mountains and stones, and you will not notice a little change. It is only when you get close.

Although it is decided, it is still a little difficult to rely on both feet to walk and run over for dozens of miles. In particular, as they advance with the realm, they will get used to the fast.

Shen Lang is a little better. After all, in the cities of the earth, there are people everywhere, or it is not convenient to fly quickly. This territory is extremely large, sparsely populated, and is a high-level comprehension world. Lu Feng is used to magic weapons and flying. It is really tangled to rely on his feet.

Chapter 1096 - Quail dragon

Although it takes a little more time, Shen Lang is willing to do this. After all, the beast cluster has gotten there, and it takes a little time for the king to let them go back, or to guard the ring.

If they go back too soon, they will still face countless beasts.

He can only lead the king to the dragon. If there are still hundreds of thousands of beasts there, there is no way, and Lu Feng will not have a chance.

In the process of going back, Shen Lang also looked for an opportunity to release a miniature detector attached to Lu Feng's hair.

If it is normal, even if it is very small, for such a master, it can be immediately noticed.

But this time is not the same, without using the slightest temperament, the perception of all aspects is also greatly reduced, plus a large number of vegetation trees around, giving the opportunity to Shen Lang.

Finally, when I returned to the previous place, according to the experience they had come before, it was less than a kilometer from the pond.

Both of them became extra cautious, and each step did not dare to have a slight sound, trying to match the surrounding winds and leaves.

The voice can't be done, the talk is not convenient, and the two people have not yet reached the level of tacit understanding that they can understand each other. They can only express themselves through expressions and gentle gestures.

Shen Lang actually has a big advantage over Lu Feng. It is inconvenient to use the vitality, but he can reconnaissance through the Holy Grail!

At the present distance, he can clearly know that the king is in the pond before.

However, the current situation is a little different from what I saw before. It used to be a pool of water. After the flight left, the pond almost dried up.

It is different now, there is a part of the water in the pond, and the king is in the middle of it, and the water surface has covered its back.

It is not difficult to understand that there will be groundwater seepage at the bottom, whether it is a pond or a well. However, there are various reasons such as water pressure. Once the water level reaches a certain level, the following will stop seeping out, or the groundwater will not overflow.

Before the king's dragon-shaped water, he had already occupied the space, so there would be no more water seeping out. It left blank, and there was an empty pond inside.

If the groundwater is sufficient and the penetration is strong, a large amount of water seepage will begin when it leaves.

Although the time is not long, in fact, the actual amount of water in the present is far less than the water level seen. Because the body of the dragon is in it, it has occupied a lot of space. Just like a bathtub, after a person lie in, the half-cylinder water can reach the full cylinder effect.

After they left, Xiaolong returned to the pond. If there was no eccentricity, Shen Lang would not believe it.

He made a plan with Lu Feng, indicating that he was ready, and then the two men were divided into two ways.

Lu Feng continued to slowly approach a little bit and be safe. Shen Lang is separated from him, bypassing the side and going forward.

After a while, Shen Lang passed the micro-detector and knew that Lu Feng had returned to the rock underneath him. This is already a cover job.

Look at him now!

Shen Lang immediately put the mysterious stone into the storage ring, and then directly used the "Phantom Meteor Step" to instantly flash to the edge of the pond.

Sure enough, it was very effective. When he had just put away the stone, the king's dragon felt it. When he went to the pond, he had already tapped the faucet from the pond and directly and accurately bite the place where the waves stood. Come over!

Shen Lang will of course not be attacked by it, just a few meters high, and one foot directly on its faucet.

Juyue Sword appeared in the hands of Shen Lang, and it was very good to smash it on its head!

The weight of Juyue Sword is very heavy, and the hardness is not comparable to that of trees. When it was transformed into a giant, it was not used again. It was mainly asymmetrical, like holding chopsticks.

Under normal conditions, of course, I can afford a tree, but it is asymmetrical, and it is more flexible with the Juyue sword.

In addition to the heavy weight of the sword itself, he just slammed, but also applied the “Da Shou Mi Long Xiang Shen Gong”, and actually gave the leader a crit!

However, the king of the dragon will naturally not be killed or stunned by this, so his body has slipped down the back of the neck and went straight to the injured back of the dragon!

This man actually dared to come back, but he could still sneak around it. This has already made Xiaolong very angry, and just after the pain, it even stimulated him.

Seeing that Shen Lang still wants to lick its wounds, let it ignite, the whole body has already flown out of the pond, and the tail smashed directly into the waves!

Shen Lang is just acting, but to be realistic, it is necessary to poke its pain directly. Seeing that it had already become a fire, it began to prepare for the retreat.

When the dragon tail came over, he used the Juyue sword to top it, and then seemed to be over but almost slipped from the dragon back to the pond, and then quickly flew out from the side to the side.

The king of the dragon has been angered by the real fire, seeing that this slamming is not a hit and wants to open, can you be willing to give up?

It has now regretted that it has not been pursued, just let them run, and then come back to engage in it. If he is allowed to run now, he will definitely come.

This time, it is very fast, and it is also a full-scale attack such as the claw tail, and it will trap the sinking waves.

For Shen Lang, it is on a tightrope.

He has to show that he will be knocked down. If he uses the Serie A supersonic flight to leave, the king may give up.

Therefore, while flying to the front, he must counterattack, to show the strength just right can not let Xiaolong find the water, but also must give it hope to hit.

The dragon is fast, the speed of the Shenlang is also fast, and everyone has just arrived more than ten miles away. Seeing that he couldn't hold the waves, he was more anxious.

Suddenly, in addition to the all-round attack, it slammed a sip into the front!

However, this time it was not a water column, but a myriad of scattered water arrows. When the spit is a water arrow, when it is flying out, it becomes an ice arrow. The road is fast and hard, and immediately covers a large area in front!

The intention is obvious, and the road that escaped in front of Shen Lang was directly blocked. If he continues to run to the front, even if he can't directly kill him, then many ice arrows will inevitably affect his speed.

Shen Lang saw this scene, and it was just what he wanted. He immediately danced the giant Yuejian sword to form a protective layer, and then directly rushed to the front of the range of ice arrows.

When Xiaolong wants to curb his speed, he just shows his full defense, no need to take care of its attacks, let himself "destined" to escape.

Chapter 1097 - Spiritual pulse

The king of the dragon did not think much, in fact, this time it only wants to do everything to kill Shen Lang!

Seeing that Juyue Sword danced out of a protective layer and blocked its ice arrows, the speed of the Shenlang was obviously affected, and it was unable to cope with its attack, which made it feel refreshed.

Ever since, the dragon has spit out a large number of water arrows, and in the way of ice arrows, all the way to the front of the sinking waves, let him fatigue.

At the same time chasing after the back, its claws a little bit a little bit and shattered the sinking waves.

Under such a state, everyone's speed has increased. What Shen Lang has shown is that he can't cope with it. He can only find a chance to escape.

In the eyes of Xiaolong, it is impossible to grasp the Shenlang at a time, and must always push in. Otherwise, as he has just given him the opportunity, there will inevitably be a magic weapon to fly away.

Between the chase and the rush, it quickly reached dozens of miles away.

It's a while to leave and go back at their current speed. In order to win a little time for Lu Fengduo, Shen Lang still has to perform the current role and continue to walk straight on the tightrope.

However, the king was a dragon, but after the resentment, the area began to calm down.

Perhaps it is leaving its position, let it be instinctively alert. It began to realize a problem, before another human being was gone!

When I think of it before the end of the dead water pool, the man was first rushed to its base camp.

These one combination, it immediately realized that this is a trap!

Looking back at the performance of Shen Lang, it is very wrong. In the past, Shen Lang became a giant, and it did not fall into the wind. But now, except for the shots that started at the pond, the whole process is dodging.

And every time it was a little bit of attack, let it be unwilling to be hung, now it seems that this is probably deliberately pretending!

Realizing this, the king of the dragon began to slow down.

Then it went on to find that Shen Lang seemed to be physically weak, and the speed was also slower than appropriate, or to the extent that it seemed to be caught as soon as it lifted its claws.

“Human! I let you go! If you come to harass me, then don’t blame me, you will face thousands of beasts!”

As it grows, a voice is sensed by the sinking waves.

After this warning, the body turned in the air and immediately turned around and turned back.

Shen Lang had no choice but to sigh, he had tried his best, and the other party finally reacted.

He immediately followed the direction of the king, and continued to catch up. At this moment, I have time to check the situation of Lu Feng to see if he has succeeded and can leave.

The range of micro-detectors is relatively small, but it is still a full-scale view, and can return information to the holy armor. In the Holy Grail, you can watch “live” or have a “video” of all the information.

Shen Lang is now on the road, generally looking at the front of the king, while watching the image of the micro-detector.

When he led the dragon from the pond, Lu Feng immediately rushed to the pond hundreds of meters away. For the water inside, there is no reason to go directly into it.

Of course, the water did not break the WeChat detector, and the deep waves could clearly see its activity under the pond.

I saw Lu Feng go deep into the middle of the pond, accurate to the bottom, and then quickly excavated the bottom with the prepared tools.

Immediately below the pond, there is a bright place!

Sure enough, as he guessed, it is not a “Dragon Ball”, nor a Lingquan, but a spiritual pulse!

Lingquan, Lingshi and Lingmai are all formed by the numerous years of heaven and earth. There is a huge relationship with the environment, and there is not necessarily any influence between them. The level of effect varies.

Simply put, it is a condensed aura.

Lingquan can be directly absorbed, the effect is very good, but whether it is artificial or natural, the number is limited, it takes a long time to accumulate a little.

Lingshi has formed the existence of crystal ore in countless years. Once the search has been discovered, there may be a huge amount of it that is both portable and long-lasting.

Therefore, Lingshi is the most common resource, and it can even be regarded as hard currency. The difference is only the quality of the quality.

The spirit is more spiritual, and there is no conclusion as to how it is formed, but basically only the aura of feng shui is very strong.

The Lingmai is a natural aura that absorbs the surrounding environment, nourishes and grows itself. Once the aura has dried up, it will change and leave!

Of course, this departure, usually a thousand years, a little bit of 10,000 years to leave, just like the changes in rivers and mountains. Very rarely because the environment deteriorates and suddenly disappears.

Because of the existence of the spiritual pulse, it is often able to gather the aura of the weather, even if it will absorb the surrounding aura, the overall will still keep the local aura full of long-term.

Therefore, since ancient times, those who have cultivated the true powers have chosen to open a sect in the famous mountains and rivers in the aura of enrichment. In essence, it is because of the imperfections!

This is also why there are very few sects, and will be happy to share the famous mountains and rivers with other martial arts. In addition to sharing the concerns of thin aura, but also in the case that the place occupied by others, just happens to be the spiritual path, then the anti-customer is the main.

Generally speaking, the dragon vein is also an evolution of homology with this.

The mainland of the Nakajima is far from knowing how many times the resources are depleted. The places where the emperor's sects, such as Yuxianmen, will be chosen, are naturally located because of the spirituality of the mountains.

As for the depth of the ground, or where they already know, it is the secret of the core.

Like the land where the soul of Qiulin's swords is located should be the abyss of the cold and autumn retreat. That is both a guardian and a close-up monopoly of resources.

This Golden Valley area is an undeveloped and unoccupied ban, with a huge amount of resources, and naturally includes the spiritual veins.

The place where the king's fierce beast is entrenched is probably the place where there is a pulse. It is possible that they can find and occupy such a place, or they may find and occupy the spirit, and they can create a king-level beast.

The most core area that Lu Feng said, there is probably a beast god. From this situation, it is very likely that there are more spiritual threads or rare resources of the same level.

It is too simple for the spirit to be under the pond. Shen Lang estimates that the environment has also changed. For a long time in a few hundred years, Xiaolong moved away from the hill a little bit. It is not a big deal. Digging a pond is even more of a trivial matter.

The current state should be that it is arranged to absorb the spirit as much as possible!

Just like this, it is convenient for Lu Feng to take it away. No wonder he has the confidence to finish it in a very short time.

Chapter 1098 - Cheap

Shen Lang just watched the video and speeded up the progress. When I saw Lu Feng taking the pulse, it was the current situation.

He had just touched the spirit, and the king had already sensed it, and immediately gave a long sigh! Suddenly disappeared from the front, and quickly rushed back!

Shen Lang did not dare to neglect, although he did not understand Long Yao when he did not sense him, but he could compare it sideways. This sound is not the sound of the time of resentment, but it is like the time to summon the herd!

Lu Feng in the pond naturally heard it, and quickly accelerated the progress.

However, although he is well prepared, the spirit is, after all, a spiritual vein, which is directly related to the earth, and it is not so easy to dig it out.

The result is that he has not had time to take out the spirit, here the king of the dragon has returned!

He didn't know if there was any blame for the waves that didn't contain the king's dragons, but he was already ruined. If he continued to dig it down, he might not have dug it out, and he was directly engulfed by the dragon!

And just as he just flew out of the pond, the king's dragon had returned, and he snarled directly to him!

Lu Feng fled in desperately and fled in the other direction.

For this thief who dares to lick its spirit, can the king 蛟龙蛟 bear it?

I have just had no anger from Shen Lang, and I poured it directly into Lu Feng's body. It can't even look at the situation of the Lingmai, anyway, it is determined that it has not been taken away, so it directly chased the past.

Don't tear this thief away, it can't be calm!

It's already like this. Lv Feng's want to hide is too late. He wants to use the treasures too late. He can only maximize his speed and fly as far as he can.

Under such a state, the speed is even faster than when Shen Lang led the dragon to leave. So after a few seconds, I have already left very far.

At this time, the accelerated wave that was chased over was at the pond.

When he came over, he already understood the whole picture and knew that it was not easy to take this thread away. However, now Lu Feng has taken the dragon away with his life, so the opportunity is in front of him, missed the impossible to come again, I am really sorry for myself.

So he was also prepared to wave all the water from the pond to the edge of the woods before landing.

Then Shen Lang fell directly at the bottom of the middle of the pond, and the giant Yue sword in his hand had already stabbed in the past!

The thorn is not the spirit, but directly with the sword to the relationship between the spirit and the depths of the earth!

This rude way, coupled with direct aiming, made him successful. This is also the experience of the previous Lu Feng, knowing that his way is too time-consuming.

Immediately after the Juyue sword, the entire vein was dug up.

When the spirit begins, Shen Lang immediately puts it into the storage ring, and immediately turns the sac to the supersonic speed!

When it was said that it was too late, the Lingmai could almost be said to be connected with the dragon, so Lu Fengyi felt it directly when he touched it. The close contact of Shen Lang is also the same. In particular, Shen Lang directly cut off the maintenance of the spirit and the earth, and even makes it shock.

Originally, its claws almost caught Lu Feng, and they couldn't take care of it. They immediately turned around and flew back.

Tune the tiger away from the mountain! It was seen by it, and the final anger turned into another one that turned the tiger away from the mountain, and the people behind it succeeded.

This makes it roar again, since it is anger, it is also the death command for all the beasts!

Lu Feng, who had escaped from the robbery, was almost scared to death. But he immediately understood what happened behind him. Only the spirit was taken away by the waves, so that he could let him go.

This made him involuntarily stop and look back, full of helplessness and bitterness.

After working hard for so long, is it necessary to marry someone else?

However, he can't blame the sinking waves for not being meaningful. After all, Shen Lang is really like the discussion. He has already led the king to the dragon for a while, but he himself is not sure.

And just after he was almost killed, he couldn't take the pulse again. Shen Lang took the pulse, but indirectly saved his life.

At this time, there was a powerful impact on his side!

When Lu Feng stayed on the alert, he found that it was a deep wave, because it came too fast, and brought a strong impact. The landing also directly smashed the ground into a ditch.

“go!”

Shen Lang grabbed him.

At this time, Lu Feng heard the sound of the roaring winds—Shenlang had just arrived at the supersonic speed, and immediately felt the sound of the resurrection of the king.

Have had previous experience, let him understand that if he wants to escape, it may be difficult to escape, and Shen Lang has a way. Therefore, it was also released from the defense, but it kept the defense state, and it was flying away by Shen Lang.

For Shen Lang has already achieved the spirit, he did not leave in the other direction, and did not forget to bring him, which also made him very moved.

After all, everyone is only meeting for the first time. Even if they are involved, even if they help each other, but if they are in a life-and-death crisis, even if they are good friends, they may be the first to escape.

Not to mention that Shen Lang has got the pulse, the biggest gain, and does not need him to pay any more. Keeping him can delay the time and no need to face him.

But still can stop to bring him, have to admit that this young man’s character is very good!

In fact, it is also true. After Shen Lang took the pulse, he left directly in the other direction, and it was already far away.

He rushed over here, absolutely not the king of the dragon did not expect, as long as they did not directly hit still can leave. The king, Xiaolong, regained his head and chased it. The first thing he faced was Lu Feng, which was able to delay his time.

But Shen Lang did not do this, he wasted a little time, stopped to bring Lu Feng!

You know, even if it is a super-sonic speed, it is also the longer the distance. Now this distance, almost the same brakes, can not save much time, and if the tide super high speed to stop, it will take a little time, plus restart...

Even if this time can be compressed to two or three seconds to complete, for the case of being chased by the crazy king of the dragon, every second is related to life and death!

What Shen Lang will do, on the one hand, has been obtained by him because of the benefits of Lu Feng's plot. It is a bit unfortunate to let someone else die.

He certainly does not give the spirit to Lu Feng, but people can still save it.

On the other hand, of course, it is still because of enough confidence. The speed advantage of the super-sonic speed of the sacred armor made him still have time to save people. If he is difficult to protect himself, of course, he will not care so much.

Chapter 1099 - White rainbow

However, the current situation is actually not optimistic. Because of the time of pause and restart delay, the king has been approached, and a large number of beasts have been gathered in front!

Especially after the restart, it takes a little time to accelerate to the supersonic speed. This has led to the fact that at the current short distance, it is not possible to fly supersonic.

At this time, the dragons of the king are constantly screaming, and the hundreds of beasts in front of them are blocking the waves!

These fierce beasts may not be alarmed for a few years on weekdays, but today they have traveled back and forth several times. And apart from some of the gains, most of the benefits are not harvested.

It has provoked fierceness and has not been released, making them even more violent. At this time, under the command of the king, they are all ready to fight, and never let these two humans escape!

They also have to face! Hundreds of thousands of people chased a group of humans, even if they escaped most of them, it does not matter, after all, the number is large.

But just because they all contain only two, but they can't get stuck, it's a bit embarrassing. If you come back now, you can still run away, it is even more embarrassing.

Except for face, if this is to be carried out, isn't humanity not seeing them?

Will there be human beings to provoke their existence in the future?

Therefore, when Shen Lang and two people flew past, they already had a prototype of "formation". The fierce beasts formed three layers, and the flying beasts were in a higher area. Then there are those tall beasts that are small and agile, and are added below.

As for the high altitude, there is a ban, so don't worry about flying away.

Because of their huge number, it is equivalent to forming a large net, directly to Shenlang and Lu Feng cover.

The distance is already very close. If you want to circumvent this "net", you will need to turn a corner. It is not only that they can re-enclose, but also let the dragon catch up!

This time, for them, it is a rare and large amount of cooperation, and it is also a matter of stability.

Although Lu Feng has already experienced the magical speed of a "magic weapon" of Shen Lang, the current situation is indeed not optimistic.

It's too easy to find a gap through the heads of the two of them. The network of these beasts, the mesh is very large, it is estimated that a helicopter can also find space to fly over.

But the problem is that they are not standing still. Once they are close, they will move, block, and pile up!

Moreover, the strength of the beasts is strong and weak, but they can be summoned by the king's beasts, and the first batch can be reached, the realm is not low. In the case of their power attack, there are more invisible protective nets in front of them!

That is troublesome. You don't need to kill them. As long as the impact force makes them slow down, hundreds of beasts will drown them.

Shen Lang did not care. In all these situations, he learned more than Lu Feng one step ahead and made an analysis.

If you want to walk through the past, it is not impossible. As long as the speed is fast enough, it is entirely possible to find a gap, especially such a large area. There is always no defense.

But in that case, it is more risky behavior. If there is no success, it will lose the opportunity and be immediately rubbed by hundreds of beasts on the ground.

So at the crucial time, Shen Lang had already made a decision. Seeing that the front distance was getting closer and closer, the latter king was almost near, and he paused in the air, and there was something in his hand.

All the beasts were waiting for him, and now that he was stopped, he thought he was afraid and he saw it more clearly, so they rushed more excitedly.

At this time, Shen Lang's hand suddenly appeared a white light!

The white light illuminates the past, like a sharp laser light sword, and the range that comes into contact with it immediately penetrates the past!

The white light is not flashing, but with the hands of Shen Lang, the scope has been swept up.

White Rainbow Day!

After this thing was obtained, Shen Lang was only tried and used, and has not been practical since then. Now looking at hundreds of beasts, he has to take this out.

For Light Power, it may not be much bigger than his own hands. But there is a benefit, that is, it can keep attacking faster and faster.

Because it is a relationship of white light, unlike other large weapons, it takes time to adjust the angle. As long as he moves his hands, he can sweep in front of him! The angle is the same, the farther the range is.

The surviving beasts in front of them did not expect that there would be such a magic weapon waiting for them, and immediately a large piece of injury!

The characteristics of the beasts are different. Some of them have thick leather and strong defense. Even if they are swept by white light, they are not broken down. But not all of them, especially the flying beasts in the air.

Flying is their advantage, and the body is also inferior. Just as the pterosaurs could not have the weight and the head of the Tyrannosaurus Rex, they were swept by white light, and some of the wings were directly torn and fell to the ground.

Originally, they were getting closer and closer to Shenlang. However, after being swept by Baihong, they were injured and not injured. They did not have the courage to go forward. They should try to run on both sides to avoid sharpness.

The power of this light has already caused them to fear.

In fact, even if the light of Baihong's day can be broken, there are some beasts whose defensive power is very strong. As long as they are in front, others follow the back, and with their current distance and speed, they will soon rush to Shen. In front of the waves.

Once approached, Bai Hong's distance advantage will be gone.

But don't talk about the beasts, even human beings, at the moment of life and death, are also different, even if anyone is willing to sacrifice themselves in front, others can not believe it. Once it is broken, will it not be hit in the back?

In this way, directly hit the front of the giant network to a steadiness!

It's just a time delay at this time Let the king's dragon have arrived directly behind them!

Lu Feng, who was caught by Shen Lang, did not do anything. He was dancing to the back, trying to stretch the flame to the limit, forming a net behind him, hoping to delay a little time. .

The wrath of the king, Xiaolong, simply ignored his flame and long-selling magic weapon. A paw directly grasped the past, quickly pulled a roll, and the powerful force, directly ignoring Lu Feng.

“Despicable humans! You are looking for death! Give me down!”

When the king screamed at the dragon, both Shen Lang and Lu Feng sensed this meaning.

Lu Feng's hand was loose, and the flame was directly put away. Otherwise, others would have to be pulled. At this moment, the king is only a few tens of meters away from them.

You don't need a few tenths of a second, you can attack both of them with one claw!

Chapter 1100 - Get away

Shen Lang has already turned around, once again deducted the white rainbow, and quickly swayed, and instantly woven a simple white light network in front.

This is actually similar to the effect of Lu Feng, but the difference is that this light will not be caught. As soon as it is shot, it will be attacked. If you want to stop it, you will only take the device in the hands of Shen Lang.

Another point is the eyes!

The way to long cable, it is not so easy to attack its eyes. In comparison, the light is much easier. As long as it is sighted, the eyes can be protected without scales.

The king of the dragon was chased after him. He just saw the picture of the white light in front of him, and naturally knew the power of this thing.

As a result, the flame cord did not slow it down, but now the white light of the simple light net, it has to be carefully protected the eyes, and even the entire head.

Even if its scales are strong, it will not be broken down, but the pain is inevitable, especially if it is corroded by the stagnant water before the back. If it is hit, it will be much more serious.

Shen Lang did not expect Bai Hong to be able to turn over the king. The need is to fight for a little time.

When turning around, he has already controlled the Serie A to accelerate!

When the king's dragon approached the tens of meters, Shen Lang took Lu Feng, and it was already rushing out at a faster speed.

When the white light turned to attack the king's dragon, the other beasts also hit and attacked the waves, and it really turned into hundreds of sieges.

But the time required for the speed of the holy armor is so weak, not so long as all their attacks are close, they have entered the supersonic speed and went far away.

Because it is too fast, far beyond the speed of sound, behind the dragon and all the other rogues, they can not hear.

Even if it is a super-sonic flight, even if it is the attack of hundreds of beasts led by the dragon, the Shen Lang is still methodical.

He did not forget the information about the Golden Valley that Lu Feng popularized!

According to Lu Feng, this is just the edge of the core area of the Golden Mile, and this core area is still very broad. In it, there are not a few king beasts, it is likely to have a large number, the core may even have the existence of the beast!

Although the ban here cannot fly through high altitudes, according to his current supersonic low-altitude flight, if there is no high direction, it is likely to crash into the most core area.

Because there is no detailed map, Shen Lang can only refer to the incoming direction, so the trajectory of the flight of the sacred armor is not straight, but draws an arc and wraps around the peripheral area.

Get a thread, Shen Lang did not have more greed, went directly to the peripheral area.

Considering that there are many monks on the earth, he did not go directly to the meeting point of the landing, but slowed down in advance.

“Shen brother, this time thanks to you, or else my old life is hanging here. Loss I still say what to understand, what confidence.” Lu Feng smiled and laughed.

Shen Lang shook his head: “You don’t blame me.”

This does not say anything strange, but Lu Feng understands. This way, he has already figured it out.

If Shen Lang can lead Xiaolong a little further and delay longer, he should succeed. But this must be done, and the dragon must be very vigilant.

Besides, the time behind Xiaolong chasing him is much shorter than the time he was led by Shen Lang. Shen Lang can succeed, but his personal ability is not as good.

“Don’t say that, you can’t blame you. You have already fought for me a lot of time. I didn’t do it myself. You can get it, which means that you are more powerful than me, and that it is related to you.”

He can only comfort himself like this.

Shen Lang nodded, and did not have a lot of things, did not show it to him, so as not to hurt. The matter of falling down makes him more cautious.

“But... since you have got the baby, you want to come and know its value. I will not be polite to you, no longer give you any benefit.”

Lu Feng smiled a bit and wanted to ease the atmosphere, mainly through the joke of the tone, let yourself relax, so as not to be embarrassed.

“I am not polite with you, everyone should stop here! Goodbye later!”

The words of Shen Lang’s resignation made Lu Feng nod.

Of course he is willing to make such a young genius, but this kind of thing, even if he can figure it out, can’t be bearish right away! When you look at the dark waves, you will think of the spirit, and you will feel uncomfortable and embarrassed.

It’s better to say goodbye to everyone, and then you will have a good time.

“Phoenix is also relatively large. This is the token of my Lu family. When I look at it casually, I can find someone who leads you. I am looking forward to the visit of the little brother!”

Lu Feng took a Lu family token to Shen Lang to express his sincerity in inviting Shen Lang to visit. It is true that he is invited as a guest, not verbally.

Shen Lang also took it seriously: “I don’t have any trust. If one day I went to Phoenix, I would definitely have been harassing one or two!”

“Just say it, then let’s not!”

Lu Feng didn’t have much to worry about. He also knew that Shen Lang would land here. It should be agreed with the friend he said, and he left before he left.

Seeing that he left, Shen Lang entered the world of Tianshu and brought them out of the canoe.

It took a few hours for Shen Lang to leave alone. For them, they have been practicing for ten days. I have harvested a large number of Lingcao elixir before, and I don’t want to find someone to make a prescription for alchemy. I can take it directly and have a luxury.

Come out now, everyone's mental state is very good.

For other situations, Shen Lang also said a little. They don't need him, they can understand that this can't be disclosed. Whether it is information about the king's beast, or information about getting the pulse, after all, the heart is unpredictable.

And the two boats, the sorrowful and the sorrowful, are a bitter and bitter.

At the beginning of the palace in the ice palace, it was because of the treasures that were obtained that caused Master to have a great greed, attempting to kill the waves and winning the treasure. The final result caused the fall of Master.

They will not be greedy for the waves, and of course they will learn the lesson.

"Let's go, where we used to gather. See how other people are doing, and hope that there are more people living."

There is no confidence in how many people are still alive. Because they all saw the scale of the beastly frenzy. Quantity suppression, momentum suppression, this is almost no injury, once the injury fell to the ground, it will be crushed immediately, shredded and swallowed, can only hope to minimize damage.
