

First Strong 1171

Chapter 1171 - Array

After checking the surroundings, Shen Lang tried to use the gods to sense the situation inside the building.

Unsurprisingly, it was impossible to detect the situation inside, and the reason was not complicated. It was nothing more than an enchantment such as a shield on the outer layer.

In this place, the building will appear. It is not normal. If there is no protection, it is an ordinary building. It is impossible to keep it. If the beast passes by, the **** will also smash it.

This further confirms that they may have entered, causing the detector's signal to be blocked.

What needs to be understood now is that they are inside, is it safe?

According to Shen Lang's speculation, they disappeared two days before he came out, and it has been four days since then. Is it out of this building?

With the strength of their entire team, they are basically in the middle of the realm of the gods. If they are not directly at risk, they are trapped inside. If they are four days, they will still be alive.

This building is obviously made by human beings. It should not be the beast of the king who lives in it. Even if there is a beast, it should be a small beast that is raised by people.

The biggest danger is still from this master!

If you really have a master, you can live here, and you are definitely a master – the master of the world. Then it may not be possible to see them, and they are very bullish on the earth in the middle of the realm. It is not enough here.

Since they will not plot them, they will not be allowed to bother them, and they will stop before they break in.

Inferred from this, when they go in, there should be no owner inside, and the house does not know how long it was left.

In this golden valley, the house is not supposed to have too many organs and the like.

If you want to come and think, the biggest possibility is still a dilemma!

In other words, this building has a set of methods that make people go back. There is no limit to the time of entry, but you can't come out if you don't know how to open the portal.

Shen Lang is a very cautious person, even if he is quite versatile about the formation, there is no rush to break into. This is not the earth, maybe there are many things he has not seen.

After such an analysis, he already had a general understanding.

Instead of rushing in, he walked around the circle and recorded all the details of the entire building with the sacred armor. He also observed it all with his own eyes.

Then it was to retreat a distance, observe the surroundings, and finally fly into the air.

Although there is a ban on the sky above the Golden Mile, this height is enough for observing the following.

After some observation, Shen Lang has further understanding.

Unsurprisingly, there is a formation here, and it is an extraordinary big battle!

As far as his current preliminary observations are concerned, in simple terms, this array of methods is actually very large. It borrows and mobilizes the surrounding environment. The surrounding mountains and trees within a few miles are all carefully arranged!

Those who don't know will enter the building. If they can't come out, they will find a way of doing things. If you know a little about the law, you will feel that this building is weird. It's a set of methods, and you will ponder the crack before you go in. .

But in fact, before going to this building, it has already entered the battle.

This building is actually a big array of eyes! Or it is a battle!

Shen Lang is only a glimpse of a general, has not yet observed the core, after all, he has not entered the line of sight.

However, according to his analysis and reasoning, I feel that this array is a dual mechanism. That is to say, if a person, a beast, or a general animal beast passes by within the scope of this array, nothing will happen.

Even if it is touched and destroyed to some stone trees, it does not matter, and the formation method is a slap in the face.

However, if you want to destroy and crack this building, it will inspire the protection of the array. The specific method is unknown.

It took only four days for this to happen, and there was very little chance that the beasts and beasts would destroy the traces. From the scene, there are no traces of any attacks.

It can be seen that Qiao Yuxian, a group of them, still took the initiative to go in.

Strictly calculated, Shen Lang, they are familiar with many, such as Liu Yuchang, in fact, the last time they have been together. What really understands more about all aspects is the Qiao Yuxian brothers and the Nanliuchuan brothers.

However, the last time for the idea of keeping the fire, Qiao Zhantian and Nanliushui, both of them, together with other people, returned to the earth with the harvest of the spiritual medicine.

The South Stream is above the array, and it is still quite a bit rumored. Or it should be said that Nantian family has family studies in terms of formation.

It's just a matter of learning, not only taking a lot of time, but also talent!

If you don't have talents and interests, you may have nothing to gain for decades, so more people are willing to cultivate themselves instead of studying the array.

Judging from the division of labor that last cracked the hundreds of millions of ring arrays, Nanliushui is the person who is in charge of the modern attire of the Nantian family. Nanliuchuan may only know the fur.

Therefore, their squad may feel wrong with common sense plus look at the inference, I think there may be a formation. But this strange and special existence is also a huge temptation. They are courageous and eventually go in.

There is only one choice in front of Shen Lang.

If you have nothing to do before, see this building, discover the formation, know that it is a glimpse, or you will take risks.

If you come back from the meditation domain and no team is missing, he will only pass by, but he may pass by directly and not go back to adventure.

It can even be said that if this team is a foreign self-cultivator who has no impression at all, Shen Lang may hesitate to go in.

After all, even if he is the leader, it is not the nanny of everyone, what is dangerous, or who is responsible for it. They are all seven, eighty, or even one hundred years old.

But now it is Qiao Yuxian, their team, Qiao Yuxian, Nanliuchuan, Liu Yuchang, etc., is the most familiar of the entire earth monk, Shen Lang can not give up.

If he can give up all of them, then he will not need to be with other earth monks, and let them kill themselves.

Perhaps in the invisible, Shen Lang has shouldered the responsibility of the first strongman in China and even the strongest in the earth!

Perhaps the absolute strength alone, there must be hidden old monsters on the earth, even if China is also Crouching Tiger, Hidden Dragon, there are strong people hidden.

But now here, they are the ones who represent the earth. He is the first strongest of the earth's monks, and the Pope has to obey him.

Responsibility makes him not give up all the earth monks, and Qiao Yuxian, etc., is a more important part of it.

Chapter 1172 - Labyrinth

The sharpening of the knife did not accidentally cut the woodworker. Shen Lang had not rushed in, but prepared to make sure that there would be no new discoveries before moving on to the building.

The outside of the building is a flat stone. There is no abnormal situation all the way, and it comes directly to the gate.

The door is closed, and of course there is no lock or anything.

When Shen Lang has not arrived at the door, there is a feeling that it seems that this door has an attraction!

Attractive?

He was a clever man and quickly woke up.

Suddenly, the feeling is different, and I immediately re-read the door.

Sure enough, everyone is a squad, a ring, a ring, in addition to the big array, the eye, in addition to the protection of the law, the door is also a small array of methods, is a confusing mind!

Because Shen Lang is proficient in the formation of the law, he was just a global observation, and did not stare at the door, plus his cultivation, his strength and mental strength, etc., are very high, so did not affect him before .

It was not until I approached, looking at the door and feeling the attraction.

It is not strong, but it is a way of moisturizing things. It makes people feel that there is definitely something like a treasure in it, and they want to push the door in.

As soon as he discovered the attraction, he immediately became alert, and then he could see it at a glance.

But the people who came here before, like Joey Xian, they have more than a dozen people, certainly not found.

After all, they dare not go deep into the core area. When they see such a special existence, they will guess whether they are the remains of the seniors. They themselves expect that there will be good things in them, but when they look at them, they don't Waiting close has been attracted.

This discovery made Shen Lang more vigilant.

Originally, he felt that this should be left by the ancestors, and everything was for protection purposes. But looking at the door that attracts people to enter, it should not have any effect on the beasts, perhaps with ulterior motives.

However, Shen Lang is only paying more attention and is not worried about anything. After all, this is definitely not aimed at the earth, and everyone is just a mistake.

After the care, he naturally walked over and walked to the door.

The gate does not open automatically, but it is heavy and requires a lot of power to push it open. According to the observation and analysis of Shen Lang, this is also a part of the array method, not the weight of the door, but a process similar to screening.

Judging from the strength of his push, it is estimated that according to the standards of the earth's real existence, it is not always possible to push this door open!

Because it is a fusion of one, it is a part of the formation, pushing not only the door, but also the entire building, but the whole environment integrated with the square.

Therefore, unless you are proficient in the array method, you can find the law to follow the trend, or else you must at least be above the gods, in order to push the door.

It seems that even if the master does not have a picture, there is still a good thought, so that those young people whose strength is low to Jin Haogu will not be mistaken.

Of course, it may also be a kind of disdain, and the strength is too weak to fit in.

After the door was pushed in, there was no such thing as a cold arrow weapon, and there was no such thing as a cold and dark atmosphere. Presented in front of Shen Lang is a hall with a corridor on the left and right, and an upward staircase on the front.

The door was naturally closed after his hand left.

At this time, no one has been found yet, and Shen Lang is not in a hurry to open the door from inside.

The atmosphere inside the hall is very ordinary, with windows on the front and the light coming in.

In short, this building is a bit awkward and somewhat strange, but it is ordinary. Of course, it is also a strange thing here.

Shen Lang tried to use the gods to inspect the two sides of the passage and the upstairs. After discovering that the gods were greatly suppressed after coming in, they quietly ran a bit of energy and were also suppressed.

He did not have any surprises. In the temple of the seas, there was such a ban. Compared with the chaotic space, it is nothing.

Then he tried again to detect with the sacred armor, and the unexpected discovery, unlike the chaotic space sacred probe was also banned, where you can explore farther places.

Wait... far?

From the outside, the building is a big house, but at most it is a few hundred square meters. – Otherwise, you won't think it's a building, but a building. Not a house, it is a village.

But the investigation of the holy armor can be extended to a farther place, that is to say, the space inside is much larger than what is seen outside!

Shen Lang then carefully observed, the left and right channels, to turn around, extending in all directions, can lead to a far away place, on the side is a room, and the holy armor can not cross the wall to detect the inside of the room.

Going up the stairs in front, it is also a corridor of the road, constantly extending, and then there are many rooms. And there is a third floor on the second floor, which is also the same!

Shen Lang is a bit speechless. This is a battle. It is unlikely that it will lead to another space. The biggest possibility is that it creates a maze through the magic array.

He came in very calmly and knew that it was in the lineup, so he could stay awake, and the detection of the sacred armor also found the problem.

When Qiao Yuxian and others came in, they were already confused by their minds and attracted to come in. That kind of confusion is not to give them an illusion, but to induce inner desire.

What kind of baby they want to get, after being confused, they will expect to find what baby. After coming in, everyone will think that it is not a while to search for a house in this district.

Even under the confusion, everyone's reason will be weaker, greed and other aspects will be magnified, worried that others will be the first. It is very likely that after coming in, they will split up and find a way to search.

The result is naturally trapped inside this maze.

Shen Lang has already sneaked through, of course, I don't believe that there are countless rooms and passages. In terms of the scope of light, even if there are several layers, the workload of the overall search is not much better.

Considering that ten people are likely to be split-headed, they will be trapped in different corners. Shen Lang can only search for carpets. It doesn't matter which direction you choose.

The first thing he chose was to go to the left channel and watch the wall while walking.

Others, under the ban, can not contact other people, can not reach a large scope, they can only rely on the eyes to see, since it is a fascination, of course, will deceive the eyes. They don't have the same way as the sacred armor, but find that after entering the maze, they will at least use the most stupid way to make a mark.

After a few turns along the passage, Shen Lang discovered that the holy armor could not find the hall that came in!

Whether it is according to the distance he feels to travel, or the trajectory of the record of the holy armor, it is not far from leaving. However, it was impossible to find out there. Shen Lang refused to believe in the path and returned. The result was that he could not return to the inquisition. The track coincided with the starting point, but it was still at the crossroads of the maze!

Chapter 1173 - Break the door

Toss for a while, Shen Lang did not find a earth monk, but he was trapped inside the maze!

This made him a bit shameful.

Because the sacred armor can record the trajectory that has passed, it can magnify the exact contrast, so even if it is restricted, he does not care. After all, this has been tested in chaotic space, and it is very good in the meditation domain and in the Golden Valley.

So now let him feel a little overturned in the gutter.

However, Shen Lang was not discouraged, and his mood and momentum were not affected. After all, he has not explored it carefully, even if it was in the pastoral garden of Yuxianmen, or the space below the pyramid of the sea world, it will take some time to study.

According to the analysis of Shen Lang, he decided that he had returned to the hall!

The hall and the labyrinth intersection are actually a place.

After coming in from the gate, I saw the hall, the left and right, the stairs, etc., which are all intentionally seen by the owner. The crossroads that are now well-connected are also intended to be seen.

Simply put, one is blind, or both are blind!

Just walking to the left, he carefully identified whether there were any marks on the wall. If they were trapped in the maze, they would inevitably confirm whether the route had passed by marking them.

When he looked at it, he did not see the mark. But he himself has left a more eye-opening. When entering the left channel, he used the willow sword to engrave a trace.

Now I found that I came back along the track of the Holy Grail and I have disappeared from the hall. He carefully checked it at this “crossroads”.

Sure enough, on one of the walls, there was a trace!

This proves his conjecture. The masters here use the way of the magic array to let the incoming people see the picture, which is different from the actual one. Perhaps it is at this crossroads when they come in, just seeing an illusion.

It is also possible that the crossroads that are now seen are also the display of the magic array, and the walls he engraved, even if they are oriented in the direction of the entrance, are not the left side.

He didn't know it because it was a little different from the fantasies outside the gate. It was a small array of methods attached to it, but now it is entering the core area of the entire array.

Therefore, even if he has a certain direction now, he can't completely understand the situation in the entire labyrinth.

The magical array and the maze, in the view of Shen Lang, are nothing, as long as the law is found, it can be solved.

What makes him a little worried is that this line of sight is turning!

Just like the nick, the direction is different now. Is it the direction he is in now, which is different from what he saw outside?

Because of the relationship between the blockade and the prohibition, the Holy Grail will be greatly restricted. The direction may not be absolute, it may be circulating.

If it is fixed, even if he does not break the law, he only needs to use stupid and other stupid methods, and the carpet search can still find them one by one.

But if you turn, you are in trouble.

For example, he is in a district, and Qiao Yuxian is in the 9th district. As long as he walks from the first district to the nine districts, he can find it; but if he changes, when he walks to the third district, the nine districts may become four districts. In the fourth district, it may become a district...

They are all old guys, even if they are not proficient in the formation, they will always find them through stupid methods. And even if the ten people are divided into two or three roads, they will have several times more chances, plus four days, it should be found together.

No matter what, Shen Lang must speed up, he can't spend time here.

When he left, he continued to portray the sword directly on the wall!

In this case, as long as you see the scratches, you will know that it is the road you have traveled. It will not always be rotated in one place, and you will not have to wait until the intersection to identify again.

But after two intersections, Shen Lang thought of a wrong place.

When I came in, in the "hall", I saw a window light source above, so the light inside was not dim. Now it is in the channel that extends in all directions, surrounded by walls, can not see the light source, but it does not feel dim!

Shen Lang slowed down a little, then dropped the target on the door next to the room.

The walls on either side of these passages, some of the walls have no doors, and some have a door that looks like there is a room next to it. Others are coming for treasure hunt. They should not just open the door, but open different doors.

For the time being, I did not find the law of the formation. Shen Lang decided to start from the room first.

Before stopping a door, I saw that the door was not locked, but I tried to push and pull, but I couldn't move it!

Shen Lang began to increase his strength, although the power was banned here, so that the mana could not be displayed. But the power of the ontology is not affected.

But soon he was surprised again, because his strength is getting bigger and bigger, the door is still not moving! As if this is not a door, but a wall, no, a wall may be pushed away, as if it were a solid mountain wall.

This also makes Shen Lang a bit skeptical. Is it that these doors are just a fake door, in fact, there is no room behind?

Or is it that the “gate” he sees now is just a illusion, actually a wall?

Since I can’t find a clue for the time being Shen Lang decided to come hard!

The stagnant water whip appears in his hands...

He portrayed the dead water whip on the “door” and portrayed a big box.

The soldering iron cuts the foam, and the door immediately opens a door in the middle.

What surprised Shen Lang is that this special thing is just a door!

After melting, the middle piece fell down. He could see it directly. It was really a room. This is a door. And he just used the power to push a house, but he couldn’t push it away...

Obviously, these doors are also integrated with the whole big array. If you don’t look for the shackles and want to push them away, it seems to want to pull the rails out by hand.

The effect of just stagnant water whip is equivalent to cutting the rails that are connected together and cutting them straight, so they can be pulled apart.

Shen Lang stepped from the hole in the hole, but it was a bit disappointing. There was nothing in the room, it was an empty room!

This situation makes Shen Lang a bit impetuous.

I have to admit that this is a masterpiece of the battle, and it should have been a great effort for a long time.

At present, if you want to break this method, Shen Lang feels that it takes a lot of time.

But now the most important thing is to quickly find them. In four days, various situations may have occurred. If you wait until he breaks, I don't know what will happen.

Thinking of this, Shen Lang immediately withdrew to the corridor channel.

He put away Liu Yejian, too lazy to trace the traces again, and the stagnant water trembled, he decided to come to a violent burst!

Chapter 1174 - incredible

When Shen Lang went further, he still maintained a relatively fast speed, while the dead water whip in his hand continued to dance rapidly.

The walls and doors here are all integrated with the big arrays, and they are destroyed by power alone. Even if they are effective, they will be very expensive.

But the stagnant water whip is not the same, the destructive power of this thing is simply ignoring everything!

What these walls are, they are not the walls of the copper wall, but because they become a giant part, they want to be moved, they will be shared by the whole whole, and naturally there is no effect.

But the stagnant water whip does not need to face the Big Mac overall, it is everything that is encountered is blown and cut.

Therefore, where the Shenlang passed, the walls on both sides showed a series of melt marks. The degree of damage varies with the time and area of contact.

So scarred, they did not completely destroy them, but there is no camouflage effect. When there is a face in front of Shen Lang, there is no need to look at the identification. At a glance, I know that this is the place to go.

He only needs to go to the new area at the crossroads where there is no damage.

For the wall, it is a road of destruction, but when it comes to the door, the Shenlang is directly cutting the door, and by the way, there is nothing hidden inside.

People are not worried, after all, even he is difficult to push open, and Qiao Yuxian and others are definitely more impossible to push open when the mana is banned.

Of course, in addition to seeing if there is anything, it is just in case. Maybe a room, a trap, let them in.

The style of this road destruction is quite similar to the killing on both sides of the Deadwater River on that day. If the owner is still watching it, he should be distressed.

However, this time, it did not run out like the King of the King. There was no change here, and the formation was not destroyed.

However, Shen Lang has also confirmed a problem. The circulation of the formation is just a detour. This is a huge space for the investigation of the Holy Grail. In fact, it is not so big.

After he made the walls devastated, the area shrank.

Finally, in a passage, Shen Lang saw ten people like Qiao Yuxian!

“who?”

After discovering that there was movement, ten people were alert and looked back to each other and looked nervously.

Because the mana can't be displayed, they can only rely on the amount of physical ability, and there is no such enchanting physical energy, so it is much weaker than usual.

“it's me.”

Shen Lang took a step forward and saw these old men, and this is quite a bit embarrassing.

“Shen brother?”

“Master Shen Lang?”

Everyone looked at Shen Lang’s passing, and they were all questions. I can’t believe that it’s really a wave.

After all, everyone is completely gone, even if Shen Lang gave such a locator, the changes after entering, let them all know that they will lose their signals.

So even if Shen Lang can really find them, there must be a point of positioning.

The back is sleepy here day after day. There is no day or night. There are always bright moments. They don’t know how many times they ran. The final result is that all the people who have separated will be gathered together.

But even if all of them are gathered together, everyone is still helpless. I feel that all the routes have already passed, and I don’t know how many times I have passed.

Of course, they use the method of engraving the mark on the wall. However, when I walked to the end, I walked through and could not find no nicks.

Today, everyone still tried to go for a long time, has been here, stopped to discuss countermeasures with each other, and ultimately there is no good way.

The only thing that is clear is that everyone has entered a big puzzle. If you can’t crack it, the end result will be exhausted in the maze!

At this time, I saw Shen Lang appear. The first reaction of everyone is not that Shen Lang really came over, but this array of methods, let everyone have an illusion!

As for everyone, we will see Shen Lang, which is not difficult to understand. Because in Yuxianmen and in the underwater world, it was a moment of despair in everyone, and Shen Lang saved everyone from the sky.

Now I feel that I have already reached a dead end, so everyone's biggest idea is to expect Shen Lang to save lives, so there will be similar illusions.

Shen Lang has already arrived in front of them, watching them still remain confused, as if they are not sure about him.

"It seems that you are all fine, very good. I will take you away!"

Although they are all in poor physical and mental condition, but no one has broken it and persisted for four days, which is already rare.

"You... are you really a sinking brother?" Nan Liuchuan slammed his forehead and seemed to make himself awake, then grabbed the arm of Shen Lang.

His expression made Shen Lang cry and laugh, but he was also a big man. How did he get bored for a few days, and he was nervous?

Then he saw other people, all in a similar state, and immediately reacted.

These are big shackles on earth, but in this much higher world, there is quite a bit of awkwardness, and the environment is unfamiliar. In this clever battle, they were besieged for a few days, which allowed them to join in the experience of being a prisoner twice.

Especially from the beginning of the entry this method is mixed with the magic array, perhaps they have also lost a lot of illusions, so now I can not believe that he is real.

Shen Lang estimates that using words to explain to them will still make them unbelievable, and he is also suppressed by the spirit and mental strength, and can not help everyone to clarify.

After thinking about it, he took out the yin yin spring that Ji Qian took it.

This thing has just been taken out, and immediately the surrounding area is cold, and the wilting old man is all excited.

“Shen brother! You are really a sinking brother! You really saved us!”

Although Nanliuchuan is not as good as his brother in the formation of the law, but still has a family, the scene is more calm than everyone. He just slaps hard and makes himself awake.

While grasping the arm of Shen Lang, the real touch made him understand that it was not an illusion. Waiting for the quenching around, let him be more confirmed.

Everyone else was immediately excited and surprised.

“Master Shen Lang really came to save us!”

“I have finally waited!”

“I thought we were going to be stuck for another month!”

Looking at these old men, almost old tears, Shen Lang is also a little emotional. With their realm, they can be called the king on earth. They are respected by their age, and they are willing to explore this new world. They are also courageous.

However, in less than a year, I encountered several difficulties and it was a big blow to them.

“follow me!”

Chapter 1175 - Crack the exit

In fact, Shen Lang has not yet found an exit, but just found them, of course, they are taking them together, otherwise they may not be able to find them again.

However, Shen Lang’s recent rush is not purely a carpet-type mine-clearing, but also adds “data” to the holy armor.

It has not been found to be the key to cracking the array method along the way. It is very important to use the data calculation of the holy armor.

Because he directly destroys the routes he has taken, and each one is a new road. These will be analyzed by the Holy Grail. By now, they will find a few of them. They can also analyze different ones according to their own data. route.

These holy armor are purely through the existing data, performing hundreds of millions of massive calculations, calculating various combinations, and then cross-comparing to accurately optimize the route.

What Shen Lang needs to do is to try according to the possibility.

Of course, if these routes are not going out, you need to continue to search for new areas and increase data operations.

On the way back, Qiao Yuxian and others, as well as a short story, told Shen Lang about their experience of coming here.

Basically, it was similar to Shen Lang's conjecture. They came here on the same day and they were surprised. But the risk is greater and the gain is greater, and this does not go deep into the core area, so they are still lucky.

Perhaps at that time, they were affected by the door-to-door, so that they all had an urgent mind to come in.

After they came in, they saw the same situation, and then everyone dispersed into several ways. After that, everyone was in the labyrinth corridor. It took them three or four days, and they finally came back together.

But no one has gained anything. The doors of those rooms, none of them opened.

So now I walked back with Shen Lang and saw the broken doors, I couldn't help but look inside.

"Oh, don't envy me. Although these doors are broken, I don't have anything." Shen Lang smiled and teased.

The door that he just broke open can be quite a lot, don't let them misunderstand the bumper harvest.

Although he does not care, after all, there is a gap in the strength of everyone. They are not like Mo Lun and Li Tianqing. Ten of them can't move him.

However, after all, all the earth monks are relatively close, and in one sentence, Shen Lang does not want to make everyone feel guilty.

The holy armor is only equipped with a super computer, which is a black technology product of the river city, and it is not strong enough to understand the law. Therefore, it calculates and analyzes the route, which is based on the will of Shen Lang, through data analysis.

When Shen Lang has not found the law and the key, he can't calculate the exit, so what he needs is to return to the original point!

He has traveled more than once in many channels, so the Holy Gap has calculated this out through data comparison. Shen Lang took everyone and came to a crossroads.

At the mouth of this passage, there are also his previous nicks on the side. It has not started to use the dead water whip to destroy it, but it remains the same.

"You keep a safe distance!"

The position that the sacred armor is now determined may not be the direction of the incoming, so Shen Lang let them retreat, and then the dead water whip directly dances around!

He is standing in the middle of the cross channel, so this dance immediately destroyed the four corners around!

Everyone else stepped back and watched Shen Lang use the magic weapons to destroy the wall.

If you really want to rely on violence to destroy, you should also find the outermost wall, and then dig a hole out, just like the hole he dug on those doors.

Now this is a cross channel, which has a passage and a wall, and it is impossible to rely on the outer wall. Isn't it doing useless work?

However, they dare not say anything more. Shen Lang is too mysterious, and he knows far more than the "older" they know.

Besides, everyone saw it along the way. Shen Lang has already done a lot of "useless work" and will always try out the rules.

Everyone is still looking forward to Shen Lang, after all, this is a genius boy who has created miracles!

Whether it was the previous two life-savings, or the aftermath of this new world, Shen Lang was completely impressed by them. It can even be said that these big brothers have inadvertently worshipped the waves.

Even if it is pessimistic, if the waves can't be broken, then they really can't live!

As the speed of the waves spread faster and faster, a large number of the walls that were touched were all quickly disintegrated, centered on him, forming a circle around them, and the surrounding corners were gone.

Just when Shen Lang was a little impatient, the surrounding situation suddenly changed!

"That is! That is!"

"door!"

The old men can't help but get excited. Originally, Shen Lang was destroying in the middle of a crossroad. Now the situation around him has changed greatly. Even those damaged corners are gone. What happened is the hall they saw when they came in.

And they are the channel next to it, just like when they first arrived.

Since this is the entrance, it should be the exit, and finally found it, so that they are very excited also afraid of being trapped by the maze. Seeing that Shen Lang received the magic weapon, he quickly rushed over and surrounded him.

“Is this where we come in?”

“The labyrinths I saw before were all hallucinations?”

“No wonder! We want to find the edge, and we can’t find the edge.”

Shen Lang waved his hand and gestured to the old man who was screaming.

“In a nutshell, just breaking a layer of magical arrays does not mean breaking this array. This array is far more powerful than you guessed!”

Shen Lang poured a cold water and everyone was taken aback.

With the ability of Shen Lang, they thought that this had solved the problem, but I did not expect it to be a broken layer. More than a hundred times more powerful than they guess? What is the scale!

Seeing that they calmed down, Shen Lang nodded.

“Well, we have already seen the door to export. Now look at this array and let us not go out!”

When Shen Lang said this sentence, he looked around, as if someone was watching the situation here by monitoring.

This expression, this discourse, makes Joe Yanxian feel a little hairy.

Just look at the “this array of law” to let it not, should not be the person who manipulates the array? Shouldn’t the array be fixed if no one is manipulating?

Looking at the meaning of Shen Lang, is this array of methods very spiritual? What trapped them here is this array... spirit?

They know a little about the array, and at most understand some of the most common ordinary small arrays. So at this moment, I thought that there might be an omnipresent turf who monitored them for a few days and nights, and it was a bit chilly.

Chapter 1176 - The solution and the solution?

Shen Lang is actually talking about it, not trying to scare them.

I don’t know what era was built. The host is definitely no longer there. It is the big array itself. Whether or not he formed a will, he is not sure.

Under the tension, everyone dared not say anything more. They all looked at the waves and waited for him to open the door together.

Shen Lang was also prepared. When the door was pushed in, it was felt that the following may not be able to push the door.

As far as this pressure is concerned, it is actually more difficult to open in it, because it is impossible to use the vitality, and it is purely dependent on the strength of the body. For example, if they find it here, even if they find it, it will not be able to open the door.

However, Shen Lang himself has no problem, he can do it with his strength, and then, if you can’t do it, then use the dead water whip to destroy it!

When Shen Lang pulled hard, it was unexpectedly light, and the door was instantly opened. Fortunately, he is very good at controlling the power and has not let himself be embarrassed.

Although there is a very strange inside that has a light source that does not know where to come from, but the moment the door is opened, everyone seems to see the excitement of light in the dark!

However, before Shen Lang did not step out, everyone did not dare to go out first, and still waiting for him.

Shen Lang nodded to everyone, and then the first step went out.

Although it seems to have arrived at the entrance, the door is the exit, but this place is very strange, any possibility is still there, he also made a defense when he stepped out.

In the footsteps have not come out, the eyes can already see the situation outside, the Holy A can also detect a larger range. Shen Langxin has been slightly sinking!

Because outside is not what he came in!

But this is already the case, and it is only one step away.

Shen Lang did not stagnate, and resolutely stepped out.

Everyone else quickly followed, and he followed him out.

“This...sit seems not the place we came in?” Someone whispered a question.

I have been in the maze for a long time, so that the judgments they see on their eyes are not so certain. I am afraid that what I see is still an illusion. At this time, only Shen Lang can be authoritative.

“Yes! It looks like this is not where we come in, but it’s not certain that it’s really another place, or what we’re seeing now is the illusion.”

If you are in the dark, let everyone be relieved and worried.

Rest assured that it is not their personal problem, but everyone sees the same, Shen Lang is also determined; fear is that I am afraid of falling from a maze to another maze!

However, there is a backbone of Shen Lang, everyone is still more excited than before, or full of hope.

While talking, Shen Lang has completed a complete observation of the outer space.

To put it simply, the place where they are now is like opening a door from the house and going to the garden and yard.

But when I first came here, Shen Lang was carefully searching around and it was a garden and yard that could be confirmed without walls.

He also does not need to look back, the Holy A has already reflected the situation behind him. After they came out, the door closed. Presented in front of them, as if they were in.

In other words, from the surface, this is not the back door, nor is it the other place, that is, the main entrance!

“What do we do now?” Qiao Xiaoxian whispered a question.

He asked for a voice on behalf of everyone, but did not dare to disturb the thinking of Shen Lang.

“go out!”

Shen Lang just came out a few steps, others are just following out, the last one, because the heart is being watched by the spirits, and dare not wait too much, for fear of falling behind. So it was hurrying out, and the result was that I forgot to stand at the door.

Now there is no retreat in the back – even if you can push the door, everyone does not want to go back, these days and nights are a nightmare to them.

Qiao Yuxian is the leader of their squad, has always played the role of command, everyone also listened to his arrangements.

Now that Shen Lang is moving forward, he immediately signals everyone to open sideways, forming two rows followed by the back of Shen Lang, forming a guard against the left and right. Liu Yuchang and Nanliuchuan are behind the last temple.

This garden yard looks like the garden of the general community is almost large, from the door to the faint visible front wall.

But no one will feel that it is so simple to walk over. The flowers and trees inside are probably the props of the array. After entering, maybe it is a new maze!

It used to be in the corridors that extend in all directions, and now it is possible to detour in the jungle.

After all, now they are in the same house, and their mental strength and vitality have been banned.

As they walked forward, they did not take a few steps, and there was a fog around them. It was looming and there was a tendency to gradually increase!

Everyone immediately closed their breath and stepped up their alert, followed by the waves.

Before the sun came in, it was very clear. Don't say that the grass and trees here are the mountains and trees in the square. They are all merged into one, and even this piece of land is used.

So for this garden, he is too lazy to spend time to crack, directly use the dead water whip ruin them one by one!

When the fog began to appear, it did not wait for it to become more intense. Walking in front of the sinking waves, immediately swaying the dead water whip, the place where the whip passes, destroying and melting everything!

The walls and doors that were previously integrated with the entire building and the entire array were destroyed, not to mention the flowers and trees that looked weak on the surface.

It can be said that with each step of the Shenlang, a large number of flowers and trees fall, which is different from the integrity of the wall. Once the bottom is blown, it will fall without support.

Everyone walked out about a dozen meters together, and the building behind it has become faintly visible, and the fog is even more intense.

Whether Shen Lang will go wrong in the direction of going forward, it will continue to destroy these plants.

After walking more than ten meters, the fog suddenly dispersed and the surrounding became clear.

What appeared in front of them was a passageway with trees on both sides, about twenty or thirty meters in length, and at the end, but an open door. From the perspective of Shen Lang, you can see the outside of the door, just before you come in and out.

“This time is... really export?”

“Shen Lang master seems to have cracked the battle!”

Shen Lang continued to move forward and said faintly: “No cracking, it is like a reconciliation of this formation, let us leave.”

Reconciliation?

Everyone is a little bit surprised. Is it because of the destruction of the swells of the waves that the law is awkward? Doesn't that mean that this big array is really spiritual and intelligent?

“Will it be a trap?” Still someone worried about it.

Chapter 1177 - Shaoguan prizes?

“Oh, is it a trap, it doesn't matter!”

Shen Lang can care whether it is a trap or not, if there is anything, he will continue to destroy it!

From the beginning of the destruction to the present, it did not cause the counterattack of the other side, so that he was also relieved to further confirm that there is no master. There are some organs in the array, such as killing, etc., may have been triggered by people who have entered before.

Therefore, even if this large array already has a certain sense of intelligence, it can be manipulated, and it is also the array that the master set at the beginning. For example, by inviting people into the puzzle, they trap people through the labyrinth of overlapping corridors.

As for what will happen to people in the end, what is the purpose of doing so is temporarily unknown.

Since it is so passive, every part of the destruction is a weakening of the law, and it is nothing more than a delay.

Shen Lang is not just talking about it, nor is it to cheer everyone up. He is now with an impetuous momentum, and the stagnant water whip is still eager to move, and has not been collected.

However, similar to his analysis, when he went forward, there was no abnormality, the fog spread, and the flowers and trees in front did not change.

More importantly, even if the exploration of the gods is suppressed here, it is still possible to confirm through the sacred armor that it is really a door leading to the outside, and it can be confirmed that the outside is the area of the Golden Valley, including the flat stone floor at the entrance. .

This is at least a few more possibilities than just now.

Only the road of twenty or thirty meters, even if everyone keeps vigilant and walks slowly, it will soon come to an end.

Not far from the open door, Qiao Yuxian and others are excited. They can't detect it, but now they can see more places in the eyes. It is really outside, it is the place to come. .

It was at this time that there was another change around them!

The trees on both sides disappeared as if they had disappeared, and a new picture appeared next to them.

Everyone was nervous, and they couldn't watch the surroundings. They all stared at the door. If the door disappeared at this time, they would not be able to collapse, and they would be hit hard.

Shen Lang did not go to see the door, but focused on change!

If the door is going to disappear, it will rush over and there may be other changes. If it doesn't go away, don't worry too much.

Conversely, if the changes around you are offensive, you need to defend first.

However, as the eyes saw, Shen Lang was surprised.

The change just made the trees disappeared. Instead, a new tree appeared next to it, and this is a fruit tree.

At first glance, the fruit that bears is like a jade peach!

After being surprised, his first reaction felt that this was a phantom, and the purpose of the illusion was undoubtedly to let them pick and enter the trap.

As he analyzed earlier, they are certainly not the first people to enter the building. There are some institutional traps that should have been stepped on first, so they are safe for days and nights.

And this array itself is difficult to attack them on its own initiative, unless it is to let them trigger the authorities that have not expired.

Going here is relying on the destruction of Shen Lang. Those who have come in before may not have this advantage. It is very likely that no one has come here, so there is a possibility of an institutional trap.

“Fortunately, okay, the door has not disappeared!”

“Try it?”

“Fight!”

Other people’s concerns are at the door, and they have already reached the door.

They all add up to a thousand years old, and they are hiding behind the waves. It is actually a bit shy. Coupled with worry and nervousness, I also want to take the initiative, even if there is danger.

Therefore, when I spoke, two people had passed from the side and kept a high degree of alert and directly rushed to the door.

Others are also staring at them, both wanting to see if they can go out, and they are worried that they will be in danger.

As a result, the first person who went out gave a little excitement.

“Nothing!”

“Out!”

When I heard that I was safe, I didn’t need anyone to order it, and I quickly went out.

There are also a few left of Qiao Yuxian, Nanliuchuan and Liu Yuchang, or stay with Shen Lang.

They feel that this is not so good, and they should accept the arrangement of Shen Lang. However, they are all a person of the same age and identity, and I am embarrassed to pull down my face and say something.

However, they themselves are still with Shen Lang's side. If there is any danger, then they must face together.

After watching other people go out, their minds are completely concentrated in the direction of Shen Lang.

The whole process was actually very short, and there was no crisis, so they did not face it.

“this is.....”

Looking at the jade peach of this tree now, the three of them are a little unbelievable, and instinctively think this is a trap.

However, they are not good at saying anything, completely watching the waves and obeying his arrangements.

If Shen Lang decides to leave, then they will not be greedy and safe. If Shen Lang wants to try picking, they will also cooperate fully!

“Perhaps this is a reward for our success? Haha!”

Shen Lang tweeted, then took out a vessel and picked it up directly.

He is now also maintaining a high level of alert, if there is any danger can be the first time to respond. The stagnant water whip was also collected. He held the willow blade in his hand and picked it with a sword tip. He took the jade peach from the tree and dropped it into the vessel.

Three people, such as Qiao Yuxian, are vigilant and guarding Shen Lang.

Those who have already gone out, after the excitement, have also quickly looked over, not knowing why they did not come out.

After Shen Lang really shot, he found that this was not a illusion, nor an institutional trap. Perhaps as he is ridiculous, this may be the prize left by the owner of the year.

The fairy tale of the Tiangong Temple in Taoyuan, some three thousand years of flowering, three thousand years and one result; some six thousand years, some nine thousand years.

The jade peach here is not so long, but it is definitely an extremely long process.

This peach tree has not been known for many years. There are a lot of peaches accumulated on it. From the visual inspection, we can see that there are different maturities, and some of them are still very small.

Of course, even if it is not mature, it has extraordinary effects.

However, Shen Lang was not insatiable. He only picked the most mature fifteen jade peaches, and the rest remained in the trees.

“go!”

Seeing the process of picking up the waves, there is no danger. Joe said that they were three of them, and their eyes were also eager to see. However, it was Shen Lang who brought them here. Everything was dominated by Shen Lang. They did not dare to pick them up rashly.

Now Shen Lang said to leave, they looked at the remaining jade peaches, all of them are reluctant, a little bit, and good things!

However, the three men still decisively followed Shen Lang.

Chapter 1178 - Touched

After coming out of that door, I felt that everything was back to normal. The big men who were restricted for a few days and nights had a little happiness and comfort.

Look at the door again, still open, you can see the situation in the garden, so that everyone is a little embarrassed, and then dare not rush into it.

Shen Lang is looking at the whole thing. The door is still the door. It is the door in front of the building. It is not inside the house. It seems a bit weird.

However, he understood a few points.

To put it simply, the building that I saw outside is actually like a blind eye. In fact, between the “door” and the building, there is a large yard and a garden.

After they entered, they thought they were inside the house, and they should actually be trapped in the maze of the big garden. The previously destroyed walls, as well as the empty room doors, are probably the labyrinth of the garden. In fact, people have never been to the main body of the building.

So I went back to the original point and opened it in the garden, but now I see the garden from the door.

Of course, the specific implementation is not as simple as the blind method, but through the array method, the space is hidden from the fold, and may actually be as large as the square.

Exaggerated a bit, even can be said that the owner, he built a “small world” of his own.

When they paused, the door opened, there was a slight change, and after a while, it was automatically closed.

When I saw that the door was closed, everyone was lucky. Fortunately, it was just out. Fortunately, Shen Lang did not delay too much time. If it was closed, it would be troublesome.

Looking at this mysterious and strange house, there is still a bit of a lingering sigh. If it is not for the swells, you may have been trapped inside!

“Have a rest, I will take you away.”

Shen Lang reminded them because their status is still very weak.

Everyone did not dare to go to the stone floor in front of the house, but to retreat to the farther grass, and then take out the drugs, or drive the body to comb the body.

They are not injured, but they are wilting because they can't use their strength for three or four days. They have a body and they can only rely on pure body to face. After the recovery, it will be adjusted soon.

Shen Lang is looking for other people's situation through the Holy Grail. It is also a comparison of the time, and it is confirmed that it is delayed for less than an hour.

As for everyone leaving a little distance, it doesn't matter. It just looks a little farther away from the house. In fact, it is still within the scope of the law.

Although other people don't understand so much, they understand that they are still in a dangerous area, so they quickly took a break and let the state recover. They immediately gathered around Shen Lang.

"You have nothing to gain in it. It has been four days. This is what I picked before I came out, one for one!"

Shen Lang has just been verified, this is the jade peach.

He has just picked 15 of them, and he is prepared to give everyone one.

"How good is that? We are trapped here, and we are still losing money to find us and save us."

"Yeah, we followed you out, and I didn't help anything. I am already ashamed!"

"Master Shen, these are your gains, really don't have to give us any more."

This is not just Joey, but everyone else. After all, I just got out of trouble. Compared with the long labyrinth experience of these days and nights, everyone is very grateful to Shen Lang for another life-saving grace.

“Hold it! I took fifteen, which is to prepare your share. One by one, I still have five.”

When I heard Shen Lang say this, everyone took one of them with a trace of embarrassment.

This spirit has not been touched, and it can feel the extraordinary effect, and the quality of the elixir that they have picked all the way is high.

After everyone took one, Shen Lang introduced it faintly.

“This is the jade peach. It is said that eating a single can directly raise a level. Of course, it is still a bit inaccurate. When the realm is low, it may not be possible to upgrade a realm. Like your realm, it may not be enough. Raise a level.”

This is a very good quality fruit, everyone can see it. However, here, everyone has harvested a lot of spiritual medicine, and did not think much.

Now I heard that the jade peach in the legend of China is a surprise.

“Master Shen, that can’t be! This is too expensive!”

“Yes, yes, no power, no, we really have no face to accept such a heavy gift...”

I have already taken the jade peach and found it expensive. I want to return it to Shen Lang.

Shen Lang has already collected the vessels and the remaining five inside.

“You’re welcome. Not to save you, I won’t get it. Say it...”

Shen Lang smiled and said: “You are different. You are not only domestic compatriots, but also familiar with me. I regard you as friends. To be honest, if it is a completely foreigner, I will not Ask for help to find a rescue.”

“Since I am a friend, I will not eat a single food. Hello everyone, it is really good!”

These are the old ancestors who have experienced vicissitudes of life, and they would not have been touched.

However, in this environment, they have been compared a lot weaker, and again and again the dangers are undoubtedly fragile. Shen Lang is far better than them, and they are favored by them. They are not as strong as they are, and they are friends. They are good and can think of them...

For a time, these old men were moved a little bit wet Nothing to say! What does the sinking brother look like in the future, we are going to the fire! ”

“Yes, go to the fire and not leave!”

Under the leadership of Qiao Yuxian, everyone was excited.

Shen Lang just nodded with a smile, and did not care much. With his current strength, to continue, it will only open the gap with them, and it is very unlikely that they will need to go through the fire.

“Go!”

Shen Lang took everyone, and went straight to the outside direction. Everyone is not searching for resources. It is just a matter of concentration and speed.

After reaching the peripheral edge of basic security, Shen Lang pointed the direction and let them hurry. He had to go find other people first.

Of course they want to be with Shen Lang, but they also understand that they have been pulling for four days and others have gone far. Shen Lang said that he was looking for other people. In fact, it was for the people in front to stay and wait for them.

There are also nine teams, and Shen Lang can't be a nanny to take them on the road. He must quickly bring them together. The way is of course very simple, let them go along the outermost circle, and the front team stays waiting.

Chapter 1179 - City of business

According to the plan, Shenlang first finds the front team and takes them to the outer circle to find a more prominent hill, let everyone wait, and pay attention to other people.

Once the meeting point has been determined, it is convenient for him to find other teams. They can directly tell them the direction and approximate distance, and describe the reference objects.

However, in the end, there were ten teams, and in the past month, they were very scattered. After Shen Langyi took them together, it was still a few days later that everyone gathered at the meeting point.

Among them, there is no clue to the Pope. The Pope did not reveal the signal of the detector. The one with whom he was accompanied was Archbishop Paul. Shen Lang did not worry about his safety.

But what surprised Shen Lang was that the Pope and Paul followed a team.

It can only be said that the squad may be familiar and reassuring, and there is a contact between them that everyone does not know.

It doesn't matter, Shen Lang doesn't want to control everyone.

For almost a month, everyone has more experience and more gains in the exploration of the Golden Mile. And obviously, they have all encountered dangers.

So once again, everyone needs to be more enthusiastic and close to a few points.

The leaders of the various teams also reported to the Shenlang about the situation. The dangers encountered and what is harvested are of course simply taken, mainly by taking the route they have traveled and collecting them in the form of maps to Shen Lang.

After a month, they have a deeper understanding of the world. Not to mention farther places, the Golden Valley area of light can be explored for a long time.

Such maps are very important things, they don't, and there are no waves. Now it can only be recorded by everyone, and they will be recorded one by one, and they will be sent to Shen Lang. After he has combined the reference, he may be able to draw a better map.

In addition, of course, the most important thing is that the personnel are damaged.

Ten or so teams are considered by Shen Lang, so that they can both take care of each other and not move too much. The latter also proved to be correct, they did not alarm the tide of the animal as before.

However, in the past month or so, if you want to hunt for treasure, you will inevitably encounter powerful beasts, and you will also encounter local people to experience the crowd. For example, there are more than a dozen in the field, and only three of them are in, and the rest are still in the same area.

It's fortunate that they fought each other and eventually lost less than ten people.

But then again, in a month's time, there is nearly 10% of the damage, for the entire team of only a hundred people, is also a big problem.

In the first half of the year, according to this death rate, half of the people will eventually hang!

All of these problems are unsolvable and can only be given to Shen Lang. I hope he can lead everyone and make a good decision.

"Everyone, let's talk about the current situation!"

"The speed of everyone's travel is not slow. One month, two or three thousand miles are there. This Jinji Valley is very forbidden, but according to our way of doing things, the summary will still be around."

“I believe that everyone has some gains and is tired of it. As you, continue to hunt for treasures in this restricted area, you may be unable to withstand it.”

“Next, I decided to take everyone to the largest Tang City in the Han Dynasty. When you want to buy other items, you have a chance. If you don’t change, you can open up your eyes.”

This resolution makes everyone a little excited.

Although the original consultation was to go back within a maximum of two years. But this month’s experience and crisis have made them have a little bit of sorrow, and they continue to die. I am afraid that they will be finished in less than a year, or go to other places to sway.

After confirming, there is no need to rest any more, and immediately lead by Shen Lang, everyone will leave Jinni Valley together.

Shenlang Shengjia has the track record of Tangcheng, which is more useful than the map. However, from here on, thousands of miles away from Yuxianmen, the time required for the whole process will not be short.

Shen Lang did not give the spacecraft magic weapon to everyone as a means of transportation, or everyone else to hurry, he did not use the holy armor.

At the beginning, everyone was still full of excitement, ready to learn about the world along the way. As a result, there were not a few people in the thousands of miles, and the excitement was quickly overwhelmed.

If you can practice in the spacecraft, it is still a very good experience. However, before Shen Lang said it, the spacecraft magic weapon is something else of others, it is consumables, you must keep them with them.

On this day, they passed by and encountered a city. In fact, they are far apart. Without a map, they simply rely on mistakes. This day, it is faintly found that there is a city there, and then they have specifically found the past.

Shen Lang will be willing to take everyone together, on the one hand, continuous journey, everyone is boring. And Tangcheng still has a long way, so since you have encountered a city, then go and find out.

When I came near, I found out that this is a big city. For this, Shen Lang actually went to the small town of Yuxianmen, and there is Tangcheng, and there is no more reference.

From a preliminary point of view, this is not a level with Yuxianmen. Even if it is not as good as Tangcheng, it is close to it.

When everyone entered the urban area, they found that the bustling degree here is not normal.

Yuxianmen there is the first two waves into the city, and also stared at the whole process, you can confirm that it is a foreigner. But now even if they have a large team of nearly 100 people, they have not caused vigilance.

To put it simply, those who pay attention to them are just some vendors and think of them as business opportunities. Just like when I entered Tangcheng, someone immediately came to visit the store.

Other people, if they look at one or two eyes at most, have no interest.

Shen Lang noticed that the city gate had the word “天都” and immediately recalled the situation here. He took Moore and Li Tianqing’s memories, and Ji Qiancheng told about the situation here. The information about the world is far better than before.

Tiandu is also a big city, even qualified to be a big city in Tangcheng. However, there is a big difference with Tangcheng, that is, most of the daily capital is a floating population!

Because the territory is extremely wide and the land is sparsely populated. Generally speaking, whether it is a family martial art in the realm of cultivation, or an ordinary person, they settle down in a place where they have developed steadily. Some are like Yuxianmen, covering a small place to live and work in peace, and some are like Tangcheng, and many sects have made it a big city.

The sky is different. This is a place similar to a transportation hub. It is a place where many out-of-town people take a break and later become a large trading market. For thousands of years, the original Xiaoyan became a business center.

Residents and monks who live in the local area are only a part of it. They are more migrants who live here for ten days and a half months and one and a half years. Many people have items to sell, or to buy, will stay here for a period of time, deep understanding of the market and so on.

It is precisely because of this that Shen Lang, so many people, is only regarded as a caravan-style passenger, and did not cause too much attention.

Chapter 1180 - Day is suspended

A caravan of 100 people, even if it is commonplace, is a big business for local vendors.

Someone soon came to do business, but Shen Lang was playing.

Last time in Tangcheng, I had already had experience. I needed to go to the city gate to pull the business. It was generally a remote inn.

At that time, I didn't understand it. Now I don't need to.

They wandered all the way and went straight to the city. The Earth's males have never visited the small city of Yuxianmen. They came here and looked at this ancient style of the city. It is also very interesting.

Compared with Tangcheng, Shenlang feels that the prosperity is still inferior, although it is already very difficult.

Both Moron and Li Tianqing had been to Tiandu City, so he was a bit familiar, and came directly to the center of the city before stopping, and then looking for a place to stay.

Of course, the city center is not lacking in the inn, and the grade is relatively high, but there is no shortage of guests.

Shops such as hotels, restaurants, and wine cellars are basically operated by ordinary people who are attached to the forces of comprehension. For the high grades, the guests are basically self-cultivators.

After all, for the comprehension, that overhead is nothing, and the environment is as good as possible.

Of course, the comprehensions are also relatively poor, or some who like low-key, will live in more ordinary, or more remote inns.

Shen Lang, they found it, like them, nearly a hundred people, basically no hotel has so many vacancies.

However, they don't have to live together. They are separated and look for different inns. Just try not to be too scattered, and after confirming, arrange someone to come and join him.

There have been squads before, this is a familiar team, and now of course the same, with the squad as far as possible to live in an inn.

Shen Lang also made a preliminary agreement with everyone, and spent half a month here. Keep in touch during the period. If there is no unified arrangement, everyone can move freely.

He also told the situation of Tiandu City, and told everyone about it, so that everyone has a spectrum in mind, and then it is safe first.

Qiao Yuxian, the squad of their team, of course, is determined to live in an inn with Shen Lang. Shen Yi, four of them, of course, also want to go with Shen Lang, indicating that there is something to run errands, they are convenient.

Shen Lang is of course not good at saying anything. Anyway, he has priority in having his own room. Others look at them.

Others, some of them want to live in an inn with Shen Lang, after all, there is a sense of security. However, I don't know how to do it. There are also some, have their own plans, prefer to live in another.

After staying in the house, Shen Lang was actually a little helpless. When he came to such a place, he also wanted to release the rain and other people.

After returning to the Earth before, he asked them to practice in the world of Tianshu. Others thought they were sent back. If you see them coming out of nowhere, you will naturally associate.

If only Shen Lang lives alone, it is indifferent to see people in this world.

Fortunately, this is not the most important thing. They are more important to improve. These earth monks are also carrying this time, and everyone will still be very different in the future. And these partners, who will always follow the companion, need stronger strength.

Although there are memories of Moron, they are not resident in the local area, nor are they often traded. It was a long time ago when I came here last time.

So after the check-in, Shen Lang directly gathered everyone, and then found a guy to come over and pay a generous reward, so that the guy told everyone about the situation in Tiandu.

The buddies of the City Center Inn have seen more of this situation and have done their homework, so they are all about the story and they all have the information they need.

The comprehensions to and from Tiandu City are all rushing through trade transactions. Whether it is buying or selling, it is most interested in the trading market, as well as the market situation of the big environment.

According to the folks, there is a street in the center of the city, which is a big trading market. There are all kinds of shops inside, whether you want to sell items, buy items, or just want to go shopping, it is the best choice.

Of course, this street is also occupied by wealthy and powerful stores early, and later it is more difficult to squeeze in. Naturally, it will open to the side and other places.

In general, if you are not anxious, you can live here for a year and a half for a few months, naturally will touch the whole place, naturally find the most suitable store.

For those customers who have limited time and need urgent needs, they can go to this market and have the fastest shopping ratio. They are guaranteed in terms of safety, security and reputation. Only the price will be sensitive. Buying will be more expensive, and selling will lower the price.

The buddy also revealed that there is a moon-holding building on the market floor, which is dedicated to auctions. They do not trade on a daily basis, but only do the seller's goods, the registration of the buyer's guests, etc.

There will be an auction every ten days in the Moon Tower, two small ones one large one. According to the buddy, there will be a small one tomorrow, and after eleven days, it will be a big auction this month.

As the name suggests, the large-scale event is naturally larger, with more resources and higher quality. But the small ones are not chicken. Because this is a lot of screening, it is more time-saving than a shop in a shop in the market.

And not everyone has a lot of time here to stay here, and some have to go in three or five days, only to meet the auction which auction.

As for the deconstruction of the forces in Tiandu City, the buddy could not answer. Perhaps because his level is too low, there is not much contact, and some may be willing to allow them to disclose it.

Shen Lang does not care. Anyway, the more people there are, the more complicated the environment, the smoother they will be.

Seeing that everyone is already excited and uncomfortable, Shen Lang is not holding it. With everyone, they simply eat and drink a little, and they go out together.

Customs and customs have seen all the way from the beginning, including various trading shops on the road, but did not enter. Now go directly to the market. For these "outsiders", Tiandu City is too deep, and there is not much time to slowly figure out, or to go to a point where you can rely on a little bit, and buy a rest assured.

Shen Lang has already told them that the cultivation of real resources here is mainly the hard stone of Lingshi. If it is relatively high-grade, there is no problem with barter.

In fact, everyone has no more choices. After all, they are from the earth. They really want the coins here, and they don't.

So before we go, everyone has prepared for each, and what they want to sell, how much to buy, and a preliminary budget.
