

First Strong 1291

Chapter 1291 - Group battle giant

Everyone's speed is very fast, the front is slightly slowed down, the back has already arrived, and the situation ahead, everyone can see very clearly.

However, in addition to Shen Lang, at least men of forty or fifty years old, will not impulsive heroes to save the United States, let alone a woman who has never seen a true face with a veil.

Therefore, even if everyone is concerned about the situation ahead, they are still calm, waiting for the big talkers to speak.

Shen Lang also saw clearly that the huge mountain, although only a single foot, but the movement is very light, and will not be smashed by the fast-moving mysterious woman. Moreover, it has a long arm and can control a large encirclement, so that the mysterious girl wants to jump and leave.

And as it was last night, in the vicinity of its huge body, all the snow and snow can not be approached, and there is no other pressure on the mysterious woman at the moment.

Overall, the mysterious woman seems to be swaying by the big waves, and it seems that it will be destroyed at any time, but it can always be thrilled at the wave.

The speed of the battle between the two sides was very fast. In just a few seconds, everyone saw the strength of this mountain, and let everyone see the strength of the mysterious woman.

As for the power of its head, it can be so light and fast, no need for others, it can already force people to squat. Not to mention being close to it, there seems to be a strange gas field.

In Shenlang's view, this is similar to the control of the field. Now the mysterious woman can't get out of it, not only the obstruction of its arms attack, but also the helplessness trapped in it.

It is estimated that she did not think of this layer at the beginning. After being blocked, she wanted to take advantage of the flexible advantage of the body gap and shuttled from it. The result was instead stunned.

But then again, this mountain is big and fast, even if it is not shuttled from it, if you want to detour, it will be caught up and blocked by him.

“Hero! It’s crazy!”

“This attack attacked my humanity, except for the magic guard, everyone attacked it!”

“Don’t be soft! Quick and quick, try not to delay time!”

“kill!”

With the opening of Shangguan Tianyuan and others, everyone immediately rushed to the past.

Last night, everyone had already seen the power of the mountain, but in the end it was not a fear of the mountains, but also a dark environment.

The size of the snowman last night has proven that the night of the mountains is very dangerous. Last night, it may be that a mountain is coming out of trouble, and there may be more mountains and the like hidden in the dark.

So as long as the stone house can still stand it, everyone will not go out, in a passive way.

Now it is different, the other party has stopped the way, even if they want to go through, when they want to leave, the mountain will still attack them.

What’s more important is that now in the daytime, everything around is clear, and there are no other mountains hidden. It’s just that, everyone, together, is not a problem.

Even if there are other mountain ambushes, there is still a chance to leave.

So whether it is their strongest amnesty, or the weakest of them, they are rushing out with high morale.

Compared with their positive, it is still the last wave of Shen Lang, which is considered conservative.

Shen Lang really feels a bit weird.

This mountain can accurately stop the road of their advancement, and can also identify the inconvenient detour of the present, it can be seen that it is quite wise.

Perhaps it was the previous few days that it had already attacked other teams, so I touched the direction of this road.

But will it still have accomplices?

What is its purpose? Eat people?

There are all kinds of doubts in my heart. Now there are more than a dozen of them together. Shen Lang does not need to intervene, but keeps behind the back edge and observes the surrounding situation.

As soon as the people near the foothills felt different, the area where the wind and snow could not be close to them seemed to be trapped in the quagmire.

However, the weakest spot on the scene also has a semi-prestige realm. There is no panic, but the first thing to keep yourself is no problem, then try to attack.

Shangguan Tianyuan, Jisheng, Lu Yang and Yu Mingxun have fully demonstrated their ability to approach Daxian. The environment has not restrained them. Instead, they quickly attacked the mountains from different directions!

A dozen helpers joined, and the dangerously mysterious girl, it was easy. The mountain madly waved two huge long arms and had no time to take care of her.

At this time, the mysterious woman did a move that everyone did not expect!

When everyone saved her and helped her fight the mountain, she had a breathing space for her, and the first time was to leave quickly and leave the road!

This scene has caused more than a dozen people to sneak up.

In particular, Lu Yang, who did not want to be nosy, even sneered. They are all ironic to Shangguan Tianyuan – see! Your bad heart, but in exchange for being a stepping stone for others!

However, the state has already been like this, and the mysterious woman has already left very far, and it makes no sense for everyone to marry her. It can only be hoped that she will encounter danger in front of him. At that time, everyone will be schadenfreuded.

Fortunately, at their moment, under their attack, is the upper hand, but after a while, the giant mountain is falling into the wind.

It won't delay too much time, and it won't hurt everyone. The price can still be afforded. If you pay a heavy price, you can't ask for a mysterious woman to get back to justice.

The behavior of the mysterious girl, Shen Lang is not too surprised, from her performance all the way, are completely for their own sake, do not want to cooperate with other people, it will be so private and normal.

Even so, Shen Lang is still concerned about the surrounding, and did not join the battle circle. Because they have more than a dozen people in the four sects, they can handle it.

Originally, I didn't need much strength from the mysterious woman. She had been fighting for a while. If she consumed a lot, she would stay at the side to rest, and no one would blame her.

The tactics that everyone discussed, it was originally a quick fix, and try to delay the time of the road. Now the mysterious girl has been rescued, and we have left everyone running. They also have no intention of entanglement, they do not have to kill it. Just push it back and knock it down, and everyone will leave together.

So they all played their full strength and put the attack speed to the maximum. Originally, there were four or five people, one martial art and one family. They were able to cooperate with each other, and the power was much stronger than that of singles.

So for more than ten seconds, the giant mountain is obviously a bit too fast to support.

At this time, it seems to be very angry and grow up, and the one foot moves quickly, and the attack on everyone is also more rapid.

Shen Lang was a move in his heart, and immediately let the body rise rapidly. When it was not finished, it had already flown to the height of the top of the mountain, and the horizon naturally expanded to a very far distance.

At first glance, let his face change immediately!

Chapter 1292 - Glacier flying fish

In the far side of the other side of the mountain on both sides, there are giant mountain ridges, which are rapidly coming to this side!

Although they only have one foot, they are big, they are very far apart, and they are fast.

A cursory look, there are about a dozen giant mountain ridges on both sides. If you wait for them to join the battle, even if everyone can win, the result will be a fierce battle. At least half of the people will be confessed here.

Shen Lang quickly sank down and said quickly: "Go! There are a lot of mountains coming!"

When his voice reached everyone's ears, Shen Lang's body had fallen from the top to the top of the giant skull. In his hand, the iron rod directly smashed in the past!

At the moment, the mountain is still issuing a long scorpion, but in general it has been attacked by a team of Ji Sheng.

Its purpose is very simple, as long as it is dragged to other mountains, there is an odds. It may even be that the current dilemma is to pretend to infiltrate the enemy, that is, to make them feel that they will solve it soon.

At this time, the top-down Ling Tianyi stick, the speed is unparalleled, but also with powerful power, even if this mountain has a hundred feet of block, after the brain is hit, it is also a dizzy, directly let the long scorpion stop The body is also shaking.

Everyone also heard the words of Shen Lang, Ji Sheng and others immediately took the opportunity to join forces!

“go!”

Lv Yang shouted, and when he first took the Lu family, he went ahead.

This incident just made him feel that only his concept is correct, and it will become very decisive.

As the mountains slowly fell to the back, the people of Jiuxian, Zhenyuan, and Jijia also rushed to leave.

From the warning of Shen Lang to this short time, everyone has already begun to hear the sound of footsteps from a distance. They all squeezed a cold sweat and quickly accelerated to leave.

Shen Lang is still behind the back hall. Of course, he also has a little thought about the mountain that is slowly falling down. With this scale, if you can take Nedan, you should not be weak.

However, this mountain is still a one-legged giant, and overall it is still a bit like a human being, so that he is also a little inconvenient to start, plus time relationship. He also gave up and did not want to be besieged by a dozen horned giants.

The mountain is here, in the middle of the two peaks. When you find it, you will have trouble when you want to go around again.

But now the peaks on both sides are fighting for time for everyone. When they want to get here, they must first read the two peaks.

By the time they appear on the top of the cap, even in the last swell, they have already passed through this zone and left far away.

Everyone left quickly, and after a long walk, I found that there was no mountain trail behind, which was a little relaxing.

Because there are still people on the road, everyone has not stopped or reduced the speed, just to follow each other more compact.

“Shenlang Xiaoyou, thank you very much!”

Ji Sheng lowered a little speed, stayed at the side of Shen Lang, and then kept the same speed as him.

Shen Lang is undecided: “Everyone is a partner.”

Honestly, everyone was involved in the battle before, and Shen Lang stayed at the end, and how much still made Ji Sheng look a little bad.

It is not that he is alone, but that Shen Lang is the name of a member of the Ji family. Such “lazy” affects the reputation of the Ji family.

However, it has been proved later that Shen Lang does not participate in the war, in order to send out the whistle and observe the enemy situation, but also the first time to bring important information for everyone, so that everyone is free from the quagmire. And in the end, he also came to a critical blow.

Ji Sheng’s thank you now, but there is also an apology for understanding the mistakes before—even if he didn’t say it.

Shen Lang’s answer made him very satisfied.

This young man is not a good accountant. He is lazy and will affect the reputation of the family. His merits will also be counted on the reputation of the family.

Although everyone feels uncomfortable, but fortunately, there is no delay in too much time, just a dangerous acceleration, but also recovered a little.

But wait until today's first break, it's almost noon.

In this way, to take two more breaks, the task is still quite arduous.

Originally, according to the plan before the departure of everyone in the morning, of course, it is accelerated to leave, and will not stay at the rest point, that is, the second rest point will not stay.

But this time, there was another situation.

The mysterious woman who had left the battle just now came out from the inside when they were about to go to the rest, and shouted at them outside.

"Danger ahead!"

I believe you have a ghost!

Just now everyone saved her, but she did not fight against the enemy with everyone, but she ran first. Such a person, how come the credibility?

Even Yao Chi and Xuan Nu, she said, may be fake. Of course, everyone will not believe her anymore. Stop and say no to fight, and fly directly.

Only the last swell of the wave slowed down a bit, because through the reconnaissance of the sacred armor, magnifying the close-up, we can see that she brows up, it is indeed a worry.

It is said that she does not need to lie to everyone, this is something that can be verified quickly. She has lost her credibility, and then lie to others, it will only make her even more nowhere behind.

Then, it is dangerous to lie to everyone, and it will not have any benefit to her.

According to the style of these two days, she is the first to take the lead, that is, she ran first in the morning, also in order to grab the front, but now it stopped.

“Whatever you guys!”

Shen Lang’s deceleration paused, but she did not persuade the meaning. After dropping a sentence, she went straight back to the rest point.

Of course, Shen Lang will not chase in and ask, and immediately speed up to catch up with them.

“Shen brother, you are still too kind, she is a liar!” Ji Qiancheng reminded Shen Lang.

Just now he also noticed that the speed of Shen Lang’s slowdown stopped, and he was worried that Shen Lang would stop and talk to Xuan Nu.

“But what good is she to lie to us?” Shen Lang asked, not to talk to the mysterious woman, but the doubts he could not solve.

Ji Qiancheng certainly did not consider this issue and did not want to consider it.

“Maybe she was injured in the morning, I don’t want us to overtake her!”

“...”

“You think about it, she is alone in front, in danger, she can return, as long as she is cheeky and follow us, can’t drive her away? But if we leave, leave her alone here, next I don’t know when to come, but when it’s dangerous, she doesn’t have any retreat.”

Shen Lang smiled and said: “There is a certain truth in what you said.”

The two men were talking, but found that the front was slowing down, so that they caught up with it, and quickly slowed down and looked ahead.

On the way they were going, there was a glaciers!

In the river, there are a lot of flying fish flying like ice, flying over the glaciers. If you want to fly over this glaciers, you will first encounter these flying fish attacks!

Chapter 1293 - Road to repression

Everyone immediately reacted, this should be the danger that the mysterious woman said!

The mysterious women are not slower than them, and they have gone a little longer than them. It should be here, and this is the case. She did not pass, but returned to the rest point, it should have been tried, a glacial fish that could not help.

Everyone exchanged a look and understood.

However, the mysterious woman does not dare to pass, can not pass, does not mean that so many people can not pass!

“try it!”

When Yu Mingxun said, he raised his hand and grabbed a big snow group from the side, throwing the past over the glaciers.

When they are not close, the glaciers have been constantly flying out of the glaciers. From this perspective, they should have sensed the atmosphere of these living people, so they gathered in this film.

Now that the snow group threw it, it immediately became a target. I don't know how many slender flying fish, and quickly tore it into slag.

This is not surprising, the snow group, anyone can be broken.

Lu Feng immediately took a weapon and it was a less important knife. Of course, it is natural to have him keep it, but it is not important.

He raised his hand and directly let the knife fly out!

When the knife flew forward, Lu Yang raised his hand and waved it.

The knife that was originally very fast, immediately became more fierce, not only faster, but also a lot higher than Lu Feng's angle of throwing directly to the other side.

Everyone secretly nodded. The snow group was just a temptation to ask for directions. Now, with weapons, you don't have to throw it. Now the height is already tens of meters high. If the flying fish can't attack, you can fly safely. Then they can rest assured that they are on the road.

But the reality is to make their eyes burst!

The knife that flew out, near the glaciers, seemed to encounter invisible strong resistance in the air, falling directly, and Lu Yang's force did not disappear, the whole process still wants to continue to drill forward, but But did not do it.

The whole degree was very fast, and it had been falling to three or four meters before it continued to fly forward.

Just after being just dragged, the degree at this moment has been greatly reduced.

However, after flying into the glaciers, it was only a few feet. Immediately, there were a large number of flying fish, such as arrows, and an intensive “叮叮” shock was heard.

But in an instant, that knife has been beaten!

It no longer has the strength to continue moving forward, and then continue to fly two or three feet, it has already fallen into the river, and before the fall, it has almost completely become a fragment. At the moment of the river, a large number of ice layers were broken, and there were constantly flying fish, and the pieces of these knives were completely swallowed up!

Everyone is silent for a while.

These flying fish like arrows are not as simple as piranhas, but even steel can penetrate and can be swallowed.

If people are in the past, they will have to bear countless attacks that can break through the steel. If they are not careful, they will be ruined.

What makes everyone helpless is that from the situation just now, the top of the glaciers was suppressed by a certain kind of great power!

In this way, everyone can not fly from above, but the height of three or four meters, so that they must all be close to the target of these flying fish.

Yu Mingxun waved a hand and a large number of snowballs flew out. This time, they were completely scattered and covered up.

As a result, there was no accident. As long as the height of three or four meters passed, no matter how high or low, it was completely blocked by the invisible barrier and fell to the river.

He didn't give up, he manipulated a few stones and went straight to the height of more than 100 meters.

The result is still the same, it is still blocked, and it cannot be passed.

"I will try again!"

Shangguan Tianyuan still has some disbelief, the body flies to the height of more than ten meters, and he pats the past with his hand. After feeling that he is indeed blocked by the void, he continues to fly high.

Everyone watched him turn up vertically, still until a few hundred meters away!

In the end, Shangguan Tianyuan can only give up, he can not always try to go to heaven.

When Shen Lang was in the meditation, he passed through the Deadwater River and had a similar experience. It was a river sandwiched between the two sides of the mountain, but the entire hillside was crushed and could not fly directly. It is necessary to pass through the vast army of mountains and plains and fly over the river.

So he was not too surprised to see the situation of the glaciers here.

“There is no way, this river is weird. Whether it is natural or someone has cast a great power, now the top is basically blocked, and can only cross from this height!”

Shangguan Tianyuan sighed.

Obviously, even if they haven't met before, they all know that this kind of situation exists, and they don't feel too incredible and accept the reality.

“Perhaps, this is the test that the predecessors gave us. We are here, it is already far away, but going further, it will be even more dangerous. This test is also to verify our strength. If we can't go, then be honest. Go back, or else there may be no life in front of it Ji Sheng is still more kind.

Shen Lang faintly added: “I can't say... Someone raised such fish, in order to find food for them, so control the river.”

“Fish farming...food...”

The words of Shen Lang, let everyone feel a cold, these fish are not ordinary fish, it is not too much to say that the beast monster. Such a dense number, a ferocious means, who is raised?

And there won't be people coming here for 180 or 80 years. Where are so many people serving as food?

“Shen brother, do you think... Is there any way to go? Are you not watching a few people coming in? They have not stopped, it should be past. They can pass, we should be able to pass!”

Ji Qiancheng couldn't help but ask Shen Lang. This young man who is less than half of his age makes him feel very mysterious and powerful. He seems to understand everything is normal.

Shen Lang smiled: “Would you like... Let's grab the mysterious woman and throw her down to sacrifice the **** of the river?”

Although Ji Qiang was asking, but other people's eyes were also seen, they all wanted to hear his high opinion. After all, from the night before yesterday, last night, this morning, Shen Lang has a good wave.

Unexpectedly, the result was that the goddess was used to worship the river god... everyone was very speechless.

“Shen Lang, talk about your views, I believe that you still have unique insights.” Others are watching, Ji Sheng can only speak.

Shen Lang is of course joking, and the reason why he will make this joke is because he noticed that the mysterious girl followed behind, which was deliberately disgusting with her.

“Other people can pass, it is very simple, it should be borrowed a magic weapon!”

“magic weapon?”

Chapter 1294 - Entice

“It's obvious. The weapon will be broken and shredded, and the magic weapon can still stick to the river.”

Shen Lang pointed to the opposite side, everyone can see clearly, just the knife, is against the suppression of the top for a long time, has been a bit strong, or else can fly a little distance.

The distance of the river, visually, is about a hundred meters. The magic weapon can be stronger than this knife, and it can last longer, plus the speed is faster, it will pass.

Of course, this is only a reference. After all, the knife just flew a few feet. If you fly out, there will be more flying fish attacks. The number of them is so large, the target is bigger, and the attack range is larger. variable.

However, Shen Lang's words still inspired everyone.

If you use a flying magic weapon, bring everyone together, as long as you can hold it for a second or two. At most, it is the same magic weapon. Compared with exploring the remains of Zhoushan, this sacrifice can still be paid.

Just... There is a new problem right away, who is coming out of this magic weapon?

If every family cares about each other, of course it is the most fair, but it will make four magic weapons damaged, and it is not so wasteful. If one is out, one sacrifices, three pure benefits, and no one wants.

This is the same as hitchhiking, with more than one person, and will not let the car consume more oil. If this is the case, then no one cares, you don't have to drive more than one car, you don't need to waste.

But what if the car is scrapped if it is finished? Generally not so generous. Either everyone will scrap it together, or... Anyone else will at least make some compensation?

"Of course there are other ways."

Just when everyone was waiting for others to express their feelings, Shen Lang spoke again.

"What is the solution?" Everyone immediately asked.

No one wants to sacrifice himself, but if he asks others to compensate and looks stingy, he is waiting for others to take the initiative and does not mind making compensation.

If there is a better way to solve the problem now, then of course it is best.

Shen Lang smiled and said: "It's not a fish! We just have to kill them, can we pass safely?"

"..."

Everyone was silent for a while.

Just visually, there are countless flying fish that are flying like ice, not to mention that there are definitely more. From the perspective of river changes, other regions will be coming over.

Can this be killed? Even if it can, it will be exhausted and waste a lot of time?

"Although it will delay a little time, it is also very cool. You see, we came in to meet snowmen and mountains, basically did not do a big job, now we have some small fish, but also afraid?"

"..."

Everyone is speechless, this is not a problem of fear, but a delay does not know how long it takes.

"Big big, we don't go three times today, but this can get the momentum up, and everyone's confidence will be more complete." Shen Lang is serious.

This is to let Ji Sheng discuss with each other's eyes.

Last night was an obvious example. Everyone was because the momentum was not enough, so they would be more nervous. They would not be afraid to meet the mountain again during the day.

At that time, only Shen Lang was alone, and there was no worry at all. He was able to sleep while lying down. That is the momentum!

Just when everyone was still hesitating, Shen Lang came to the river, and then took out the Ba Tian Tower.

“If you don’t do one of them, then follow me!”

Originally these flying fish leaped on the riverside, but they kept a little distance, so except for a few jumped to the shore, most of them were still in the water.

Falling on the shore, without water, they can’t be calm, only a few times.

But when Shen Lang approached the river, he immediately let countless flying fish, like a sharp arrow, shoot at him quickly!

At this time, the Ba Tian Tower showed a strong suction, close to the side of Shen Lang, no matter which direction it came from, it was quickly included in the tower.

These flying fish have very strong penetrating power, but they are also very powerful, but they are not big in themselves. For the towers that the trolls can earn, it is simply not worth mentioning.

The current Ba Tian Tower has also been upgraded by the “Twenty Years of Elemental Beads”, and the effect is not the same.

Moreover, this “twenty-year” has not absorbed refining and refining, and quite a bit of temptation. Therefore, for these flying fish, they did not disappoint them. They were all not enough.

The next moment, Shen Lang went straight out, and the volley stood two feet above the surface of the glaciers. This step is already two meters away from the river.

For the flying fish, it is more than double the scope of attack. They were standing on the bank of the river. They can only attack in front. Now it is all-three-hundred and sixty degrees to attack him!

For a time, Shen Lang was like a grass boat borrowing arrows, using himself as a target, and letting countless arrows fly toward him.

And in the back of everyone, it is stunned!

When I first saw Shen Lang in the past, I thought that he wanted to “kill the fish.” He felt that he was too playful. When he saw him near the water and then on the water, it is more like now. To be shot like a hedgehog!

The knife before, but in a moment it was smashed into pieces, and then swallowed up, everyone is still vivid. Looking at Shen Lang now, I am worried that he will become a pool of blood in the next second, and the meat and bones may not be broken.

Then the power of the smashing palms of the tyrants, let them see, no matter which angle of the flying fish, when they are not close to the body of the swell, they all sucked into the tower.

Although these flying fish are more than ten million, the speed of absorption is now whale-swallowing, and every moment there are thousands of disappearances!

Looking at the sinking waves, everything is a spirit, so it is okay, so waiting for the flying fish to attack, but it can be completely absorbed.

If the Shen Lang walks in front and attracts the flying fish and then absorbs them, then they will be safe in the past.

They immediately went to the river, but there were still a lot of flying fish thorns coming over, so that everyone had retreated a little.

Shen Lang also realized the situation behind.

He just walked out two meters and stayed still. He didn't pose, but waited for the people behind him, lest he should leave, and the flying fish would not follow him, but attack the closer descendants.

But now, there are too many attacks on him, and the number of fish is too much, and there are enough attacks.

“You step back!”

After Shen Lang finished, he stepped on the ice layer directly, then quickly flew up on the glaciers. The work in the blink of an eye had already reached the edge of the bank!

When everyone heard the words of Shen Lang, they just quit a few tens of meters. I didn't expect that he would have passed away alone.

Chapter 1295 - 0 million harvest

This guy is too pitted.

This is to put everyone here.

Can you find the remains alone?

Of course, the secret of Shen Lang is mainly a few people in addition to Lu Feng. In addition to the meditation, they almost have to open their mouths.

However, the eyes have already seen that the waves on the other side have not come ashore. Instead, they have turned around and continued to come back here. The same feet kicked fast and destroyed the ice of the glaciers.

The ice layer, which was originally drilled by the flying fish, was destroyed by the sinking waves, and more flying fish flew toward him.

The result is that in the process of running back and forth, the “hedgehog aura” around the whole person is more dense and more absorbed by the flying fish.

Seeing this, everyone was secretly relieved.

It's really awkward. I thought people were going to leave them. I didn't expect people to use their bodies as bait and try to attract flying fish as much as possible.

Let them go back a bit, but also to let these flying fish mainly sense him.

The whole process did not last long. These flying fish did not know whether they were wise, or they were controlled by the existence of another kind of “God” and “bee queen” with wisdom. They were destroyed by a wave of Shenlang. It was just a large number of attacks by instinct.

But soon they realized that it didn’t work. No matter how many attacks, they were just sent to death.

So the number began to drop sharply, and soon there were sporadic flying fish that were attacking the waves.

This result is within the expectations of Shen Lang.

On the banks of the Deadwater River on the same day, his destruction of the army and the army in the wilderness was also a pain in the death of the “King of the Kings”. Finally, he emerged from the Deadwater River and sent him a magic weapon he called “the dead water whip”, which was regarded as a truce. .

Although there are no similar creatures coming out of the glaciers, it is obvious that these flying fish have been controlled to sneak into the bottom of the water and prevent them from continuing to attack to preserve their strength.

“You can go as close as you can to be safe, and fly over in a parallel way. I will deal with the remaining flying fish below.”

Shen Lang returned to the shore and made an arrangement.

Regardless of their status, this is the most affordable way. You don’t need to pay too much. Although there are risks, but the waves are below, you can still eliminate them to the minimum. Besides, they are not a knife, there will still be The defenses, as long as the number is not enough, can still be self-protected.

When they were ready to come over, Shen Lang saw that the mysterious woman in the distance had come over, but he was a little hesitant.

“You come and wait, then you have trouble.”

Others, of course, have also appeared closer to the mysterious woman, but everyone is not willing to take care of her. Although she has warnings, it does not help. These dangers can be seen visually, nothing.

Now Shen Lang also brought her on, so that everyone feels a little surprised. However, since it is the main role of Shen Lang, they are not good at saying anything.

Time is life, and even quarrels and arguments are a waste of time, so everyone is ready soon.

Because the remaining height is about three or four meters, everyone flies in parallel and takes up one or two times, a little more space from the river.

This space can't stop flying fish, but it can make Shen Lang more comfortable to absorb flying fish.

Whether or not these flying fish are controlled, when a large number of “living people” appear, they still can't come out and come out again.

Of course, the results were not unexpected, and all were collected by the Ba Tian Tower.

This time, everyone is going to walk together. Shen Lang can't run too fast. Other people can't fly too fast because they concentrate too many people. The overall degree is still slow.

But it didn't add up to ten seconds, and everyone flew safely.

After landing, I watched the glaciers that had never been flying, and now there are no large layers of ice, and there are no flying fish that have become calmer.

The degree of intensiveness has just been judged by the human eye. However, the level of black technology of the holy armor, or through high photography plus all-round detection and other means, collected a rough data.

Tens of seconds before and after, actually received more than one million flying fish

Although the degree is too fast and the quantity is too dense, there may be a large error, but how is it a million?

Shen Lang is also secretive about this number. If you use conventional methods to kill, it will really be very tiring.

This huge batch, he estimated that even if the flying fish in the glaciers were not cleaned, it is estimated that a fraction of it was eliminated.

“The friend in the hands of Xiaoyou is the tower of the sky”

Shangguan Tianyuan is now very polite to Shen Lang. After two days of contact, through the attitude of several people in the Ji family to Shen Lang, he basically understood, this is an outsider who is attached to the Ji family.

Shen Lang smiled slightly. “I don’t know. When I got it, it was called the Tower of Heaven.”

He said that he had collected it and that he was guilty of sin.

Shangguan Tianyuan has quite a leadership temperament, and his performance is also very right, but Lu Yang is different. The old boy always thinks about the things of the spirit, and he can’t try to figure out his magic weapon.

“This is really a thank you, and even the most friends have contributed most of the time.” Shangguan Tianyuan officially thanked.

Others also followed up to Shen Langdao including Lu Yang and others, they also had to say “thank you”.

When they spoke, the mysterious girl had disappeared and left.

“That woman really shouldn’t save her,” Lu said, uncomfortable.

Others have also echoed, and the mysterious woman thanked me for not saying the style, and I ran first, which really made everyone unhappy.

Shangguan Tianyuan saw Shen Lang did not care about these, could not help but secretly nod.

Have the ability to help people, but will not ask for a return. Others, though not seeking reciprocation, just want a thank-you and a good attitude, but in essence, obsessed with verbal and friendly attitudes, they are still seeking rewards and performances.

Shen Lang is the youngest, but his mood is the best.

“We are also on the road, although it has delayed a little time, but maybe we can catch up.”

“Oh, Xiaolang Xiaoyou has collected these monster flying fish, but it is convenient for those who come later. They are not so dangerous when they come here.”

When everyone simply talks, it is also once again on the road.

Still as before, the four people with the most information are still identifying the direction and the road ahead. Others are in the middle, and Shen Lang is still behind the back hall.

Shen Lang’s mood is actually very good. Let the mysterious woman keep up with it. It’s just a little effort. There is no unnecessary burden on him. Covering one person and covering a dozen, one more and one less is the same.

This million-plus monster flying fish is a big fortune for him.

Take things with sharp spikes in the fish head, you can wear steel holes, and you can smash steel, so the number reaches a million, once refining, what effect will it be?

Chapter 1296 - 1 group of dragons?

I have to say that the “importance” that Shen Lang said affects all of them.

Everyone was careful to be safe first, but after summing up, from countless snowmen, giant mountains to glaciers, it was all the limelight.

He is the youngest one, and his strength is not the strongest. What is it? Isn't it that the newborn calf is not afraid of the tiger?

They are all famous people. How can they be compared to a young man?

So in the next few days, everyone changed their minds and became more powerful. Whether they were in danger of being a beast, or hiding in a rest, they kept enough fighting spirit.

There was another person who worked together, and there were no casualties. Although the danger behind it was getting bigger and bigger, it was still safe.

According to the speed of everyone's progress, this has already gone a long way. Although it may be a very small scope for the whole Zhoushan, it is not far from the historical records of the Zhoushan ruins.

Of course, there will be a lot of ruins in Zhoushan. The predecessors of the Han Dynasty can develop and explore, that is, the most recent ones.

They are now coming, and they are also the relics of the predecessors, and there is no expectation to be able to explore all the remains of the entire Zhoushan area.

“It's her again!”

On this day, everyone is on the road, and they are far from seeing the mysterious woman standing on the boulder of a valley. The wind and the snow are fluttering, and it is beautiful.

After crossing the glaciers that day, she ran first, letting everyone have no good feelings for her, and even expected that in the back, she was in trouble, and everyone was gloating.

But because the speed of all of them is still almost the same, even if there is a first-come, it will not be a half-day away from a break. So after a few days, everyone still had to settle for the same rest point overnight.

Only the mysterious woman probably learned the lesson. In the morning, no one ran first, but let them walk first. She followed her back, but instead smashed a lot of cheap, dangerous animals, all of which were solved by their entire team.

This of course makes the people who have had opinions on her even more uncomfortable, and it is inevitable that the innuendo will refer to the irony of Mulberry.

This morning, the mysterious woman probably couldn't stand the irony and left early.

As a result, they are now catching up and seeing her stop at Taniguchi. This valley is the road that must pass.

It is one thing to be unhappy with mysterious women. For her reaction, everyone still has to pay attention to it.

She does not dare to go forward alone, what else? Of course it is dangerous ahead!

This is another want to let them take the lead!

Everyone is upset, but helpless. Can't you spend it with her? And if they go forward, they can't stop her, she doesn't have any embarrassment, and she goes straight from the side.

"Yao Chi Fairy, waiting for us to explore the road?"

When I arrived at Taniguchi, some people couldn't help but sarcasm. This time I asked her directly.

The mysterious woman in the wind did not speak, but just pointed her finger.

Everyone looked down and saw a lot of people fighting in the valley.

“That is... dragon?!”

Someone screamed in a low voice.

Everyone naturally stopped on the boulder and saw the situation below.

There are two huge dragon-shaped beasts in the valley, which are attacking a group of people, and there are dozens of small flying beasts in the air, which are also in line with the attack.

This group of people, Shen Lang is recognized, that is, before they came in than the previous ones. It has been a few days, and now I can be caught up. I can see that they have encountered a lot of difficulties and have lost a lot of time.

It may have been a long time since I was trapped here.

Attacking their two dragons, it should not be a real dragon, a powerful beast with a dragon's blood. Shen Lang roughly waits and sees, like the iron armor, but the iron armor that he encountered in the forests of the river basins before, is much larger and stronger.

“Looks like it... the iron armor of the king level.” Shen Lang directly said his guess, it doesn't matter if it is wrong.

Shangguan Tianyuan voted to appreciate the eyes and agreed: “Yes! It is the Iron Armor Red Dragon, the two kings of the beasts, can trap them more than a dozen people, indicating that its strength is very strong, has entered the king level for a long time.”

“Which fly?” Zhen Yuanzong's one quickly asked.

“Those are the red-winged dragons. Don't look at them. They are not big and their power is still very big. Their biggest problem is that they can spray poisonous fog!”

Both Shen Lang and Shangguan Tianyuan spoke, and Lu Yang didn't want to be robbed, so he rushed to say it.

This news really surprised everyone. Because of the current visual inspection, I did not see the situation of the spray fog. If there is no such alert, when I encounter it, I will suddenly come up with a poisonous fog.

Although they are all half a cent or more, the red pterosaurs that can survive in the depths of the Zhoushan area will not be simple. The speed and destructive power of this poisonous mist are certainly not comparable.

"Then we..." Someone wants to stop and say Lv Yang immediately said: "I don't recommend going down to help! There is already experience in the past, we will save people, others will take the opportunity to run. The baggage was thrown at us. When we were trapped here, it was us. Maybe we will wait until the next group of people come in, and the next batch will come to help us?"

This is of course aimed at the mysterious woman, and there are several unhappy people who have turned to the mysterious woman.

The mysterious girl did not look at them, or looked at the situation inside the valley, she is undoubtedly completely self-interested, do not care what others say.

Shangguan Tianyuan and Jisheng exchanged their eyes.

They are also a bit helpless. According to their concept, everyone is righteous and righteous, and they have trouble with the fierce battle. They can help one.

But the mysterious woman is indeed a ready-made example.

And compared with that mountain, the two kings of the iron armor, plus a group of red pterosaurs, no doubt threatened most. If you entangle everyone, or hurt a group of people, it is not easy to explain.

Speaking of that day, I was fortunate enough to find out in time that everyone was withdrawing quickly. Otherwise, it would be very troublesome for a large group of mountains to be trapped.

On the same day, Lu Yang was obeying the majority, and now it has proved to be a little unworthy. Now they are not good enough to let the minority obey the majority. Moreover, perhaps in addition to them, their family members may be the same concept as Lu Yang.

After all, these days, mysterious women are very uncomfortable for everyone.

“Friends on the top of the mountain! Help! Everyone is one!”

The mysterious woman alone on the gorge of Taniguchi may not have been noticed or paid attention to, and no one has helped. Now a group of people appear on the boulder, and the monks trapped underneath are asking for help.

Chapter 1297 - Shenlang opinion

The following people spoke up, so that they were even more awkward.

Although Shen Lang had seen them before, he did not catch up and didn't even know them. Shangguan Tianyuan is the grandmother of Zhenyuan Yuan, Ji Sheng, Lu Yang, and Yu Mingxun. They are all old people, and of course they are well-informed.

In this other martial art, many of them are also divided into one generation, and they are all familiar with each other.

I just saw it here, they can still be too far away to see clearly, but if people ask for help, they will not be able to install it again.

However, Lu Yang is unmoved. He is indeed a relatively self-interested person, plus the predecessor of the same self-interested mysterious girl, so that others can not say anything.

“Shenlang Xiaoyou, what do you think?”

Although these days, Shen Lang did not make a big splash, but the performance of the previous few days has already made Shangguan Tianyuan look at him with amazement. He did not look at the youngest junior, but became the same level as Ji Sheng and Lu Yang. Treated.

So now when he is tangled, he naturally asks Shen Lang's opinion.

Shen Lang can see that they are really very tangled. Emotionally, I also want to have the same attitude as Lu Yang. After all, the mysterious girl made everyone chilling. In case the other party ran, everyone was dragged.

But morally, this is contrary to their principles and concepts.

Shen Lang faint smile: "The fairy of Yaochi, but very chicken thief, if she can slip away from the side, she should have already ran?"

"Whose chicken thief you said?" Xuan female frowned.

Even if other people are ridiculed, there is no such direct name.

When I heard this, more than a dozen people on their side felt very happy.

Everyone wants to talk about mysterious women, but because of their identity, they are not difficult for a woman. It seems that a dozen men are bullying her. I used to refer to the irony of Mulberry, but also did not want her to follow the back.

Now Shen Lang said that she was a chicken thief, so that everyone had a bad breath. It was Lu Yang, who was full of the first wave of Shen Lang, and for the first time felt that this kid was doing a good job.

Shen Lang did not care about her, but continued to talk to Shangguan Tianyuan: "That means that you can't go. From here, it seems that there are cliffs on both sides of the valley. It is not easy to wrap around."

For these situations, everyone has observed that Shangguan Tianyuan is nodding again and again, but what he needs is Shenlang's suggestion on the decision, not the analysis of the situation.

"If we can't get around, we can't wait for them to have results, then we can only help..."

“I object!”

Shangguan Tianyuan felt a little loose in his heart, and Shen Lang was able to accept his principled concept and let him agree. Perhaps asking Shen Lang, that is, wanting Shen Lang to convince him.

However, Lu Yang is the first objection!

“Help doesn’t mean to replace them. We can concentrate on each other and keep attacking from each other. If you can avoid the iron armor and let you open a road, you can go along. So even if they have two hearts, we I won’t get myself in.”

After hearing the silence, I continued to talk, and everyone was thinking.

The current situation is a bit unpleasant, as Shen Lang said, if you can go around, the mysterious woman of the chicken thief must have passed.

She can’t go around alone, so many of them, it’s even harder to go around, and they will inevitably encounter attacks by the iron armor and the red pterosaur.

Since it is necessary to fight, it is better to go to the war, and to have a good reputation, but also to fulfill its own principles.

Shen Lang is not only giving advice on the decision, but also has a feasible solution.

Everyone is concentrated together, and the team is combined to attack. It becomes a level master and can make everyone safe. The air-to-air attack that keeps the distance can help the other side and not be pitted.

“I think that Shen Lang Xiaoyou said it makes sense.” Yu Mingxun also directly expressed support for Shen Lang.

His opinion of course represents the Jiuxian faction, together with the Shangguan Tianyuan of the Yuanzong and the Jisheng of the Ji family, Lu Yang and Lu Jia, once again had to obey the majority.

Invisible, Shen Lang can control the decision of the entire team.

However, compared to the last time to save the mysterious woman, this time everyone has reservations. Once the following monks have something wrong, they will leave immediately.

Since they decided, of course, they are not bad for a mysterious woman. They don't want her to take advantage of it together. They flew directly from the boulder to the valley.

“kill—!”

Shen Lang suddenly screamed and made everyone a little surprised, then a little speechless.

Only a ***** boy can be such a style. With the realm and age of all of them, it is a violation of this. But think about the age of Shen Lang, they did not feel exaggerated again.

In fact, Shen Lang will suddenly be in the middle of the second, just to enhance the momentum!

They are now a dozen people who come together to attack each other. It is quite powerful. If it is combined with the sound of drinking, it is really powerful.

Others didn't follow him. Even if he was alone, even if the sound was loud enough, it still looked a little thin But even so, it still had a big impact on the valley.

Looking at their group joint attack, for the monks who are deeply involved in the battle, it is equal to finally ushered in the rescue, and the spirit is uplifted.

The two iron armor and the more than a dozen red pterosaurs are inevitably jealous of the dozen or so people who will join the battle. In terms of quantity, light can be twice as much combat power!

The monks were inspired and morale was high, and they spurred a greater attack.

At the beginning of the iron-clad red dragons, they wanted to destroy them before the reinforcements arrived.

For a time, the war that had been glued up had escalated.

This is not as cautious as the glaciers, and the degree of participation in the war can almost match the usual road. So in a few seconds, the battle has just escalated, and Shen Lang and others have approached.

They are ready to maintain a safe distance from the air attack, but this situation is not known to the iron armor, red dragon, red pterosaur, etc., look at this huge force of a large number of new forces, in order to not passive, can only be separated most of The red pterosaurs came to block the waves and others.

For Shangguan Tianyuan and others, this is also a positive intention. After all, if you have not yet approached, you will stop and directly show your fullness. Even if you complete this help, the other party will not be grateful.

But now there are a number of red pterosaurs to block, they can take the opportunity to fight with these red pterosaurs, do not need to face the main iron armor.

Before Lu Yang said that the biggest threat of the Red Wyvern is that it will spray poison fog, so everyone is careful at this moment. Different divisions have also been made, some people defend for everyone, and some take out weapon weapons to prepare for attack.

Chapter 1298 - Amazing language

At this time, a situation that everyone did not think of was born!

When a dozen people, such as Shen Lang, attacked together, they ignored the mysterious woman. Don't say invitations, even if she wants to follow them, everyone will reject them.

But everyone still thinks that she will definitely be cheaper to follow, but there is no way to do this, and she must not be allowed to follow.

However, when everyone encountered the red pterosaurs that were blocked in front of them, they were now in the back of the mysterious girl, but they quickly passed their entire team and went to the front line of the Red-winged Dragon!

This selfish and self-interested girl will actually rush to attack? Didn't you read it wrong?

Everyone was surprised, the first reaction was doubt!

Do you suspect that there is any greater danger behind, or else she should be quiet and cheap at the back.

Another suspicion is that these red pterosaurs are not smoke bombs, and they will not attack them.

But soon, everything has an answer!

After the mysterious woman crossed them, they voluntarily greeted the Red-winged Dragon. I saw her arms flying and waving, and each had a long tulle flying around.

Those red pterosaurs are very fast, the minions are very sharp, and they will also spray poisonous mist!

But when the two long gauze danced, they seemed to have blinded their eyes, forming a thin black mist in the air. Suddenly, the red pterosaurs that had been attacked by Shen Lang and others all began to sway and turn around.

But this has aroused their fierceness and began to scream, while the minions are attacking wildly.

Looking at this scene, everyone could not help but squeeze a sweat for the mysterious woman.

Although these red pterosaurs are the helpers of the iron armor, they are trapped by more than a dozen self-cultivators!

If they are a group of more than a dozen people, facing the less than ten red pterosaurs, it is natural, but now the mysterious woman is just a person.

In particular, she is a woman who has already involved herself in the red pterosaur at this moment, as if everyone is a group.

And the crazy attack of the red pterosaurs gives the impression that it seems to tear her apart at any time!

Everyone was silent.

Originally, there was no good feeling for the mysterious woman. But now she took the initiative to rush out and attack, and it was considered a piece of competition. Use actions to prove that she is not a selfish person!

This makes everyone feel soft, after all, this is a girl, and maybe her partner has already been sacrificed in the mountains, leaving her alone, to complete the task of Yao Chi, of course, must be life-saving first.

At this moment, they are all the same in their hearts: Why? Everyone is not a person who does not make sense. It just wants you to have an attitude. It is not really going to force you to die!

“Everyone is together!”

Shangguan Tianyuan immediately opened.

This time, Lu Yang did not speak. Although it is uncomfortable to see this woman, but dare to attack alone, it proves her courage.

But at this time, there was a sound blocked.

“Wait!”

Everyone was surprised to see the past, it was a deep wave!

Before I saved the mysterious woman for the first time, I basically didn't say it. Basically, most of them agreed. But when I was behind the glaciers, it was Shen Lang who covered everyone, that is his personal opinion. If he decided not to bring a mysterious girl, the mysterious woman could not follow.

So at this moment, the waves will stop, and everyone did not think of it. Lu Yang, who is most likely to stop, has no voice. What is the situation of Shen Lang?

“Let her handle it alone! Let's deal with an iron armor!”

When Shen Lang went on and said it again, it was amazing again, and everyone was taken aback.

“Shen Lang... You didn't make a mistake? Let her a woman face nearly 10 red-winged dragons alone!” Ji Sheng couldn't help but questioned.

Shen Lang smiled slightly: “You seniors, don't think that people are weak women, can live alone until now, although we rely on a little bit, but in general still rely on herself. How can it be without a little strength? Rest assured! She can fixed!”

This makes everyone feel a bit reasonable.

They also encountered a lot of dangers in this trip. It is of course because the four people of the four groups are almost 20 people. It is a very powerful team.

However, I thought that mysterious women were all cheaper. Now, when Shen Langyi said, she realized that even if she was cheaper, she was alone, and it was not easy to get here.

And she didn't come in from the entrance, who knows what dangers she had encountered before.

“Good! Then do an iron armor!”

It has always been uncomfortable, but this time it was the first one to agree.

He didn't say anything to the mysterious woman, but he didn't have any good feelings. As mentioned above, the help of the former Tianyuan is just out of morality.

Since it is moral, the following dozens of monks are also moral. Compared with this Yaochi disciple who does not know the true and false, the following are more widely known.

To sell favor, he is more willing to sell to the following people!

Shen Lang said so, Lu Yang took the lead to support, Shangguan Tianyuan and Ji Sheng, Yu Mingxun and other people, there is no objection, but everyone together to attack the past Ironclad Red Dragon!

Originally, the following dozen monks are to face the two kings of the iron armor and the more than a dozen red pterosaurs, now less than ten red pterosaurs, have been significantly reduced, Coupled with the high morale of everyone, it has already pulled back a lot of situations.

Coupled with more than a dozen new force forces, directly attacking a Tiejia Red Dragon, everyone's pressure has plummeted.

Compared to the dispersion they have been fighting for a long time, they are still fighting together in groups. If they really share half of the pressure on them, those people will run straight, and they can pick up the clips faster.

Fortunately, everyone's concerns have not appeared, and these are all famous people. I can't be as self-satisfied as a woman, and after everyone gets rescued, it is even more exciting, and together they attack the remaining iron armor.

This decision was suggested by Shen Lang, so he has to be responsible and can not give everyone a pit.

Just let everyone not help the mysterious woman, because when everyone is in various emotions, he completely observes the state objectively, and determines that the mysterious

woman does not need help and will not lose. These red pterosaurs may not be fully settled, but she should not be injured.

The core is the two iron armor, and if they can't get it, the monks are still trapped. Therefore, he decisively let everyone not go forward to help, directly to help share the iron armor.

This is the differentiation of each one, and the mysterious woman only needs to be able to hold back for a while.

However, Shen Lang himself is still behind, as a bystander, to guard against other situations that may arise, such as the iron armor and the reinforcements, such as those monks who will hang them.

Chapter 1299 - Needle

When everyone united and attacked, Shen Lang retired to the air and made Lu Yang very upset. Directly darkened up, but also said that other people chicken thief, this kid is more chicken thief than anyone else!

However, now facing the king-level iron armor, even if they have a team to act together, Lu Yang can not be distracted, can only look at the front.

Shen Lang eyes pay attention to the three-party battle situation in the valley, and the knowledge extends to the front of the valley to see if there is any danger waiting in the past, and there will be danger of continuing.

The result was good and there was no obvious danger. This also made him feel at ease, and then focused on the group of people who were trapped before.

If they have signs of picking up the road, Shen Lang will be rudely attacking them directly!

After all, the situation is different from that of the mysterious woman. She is a woman and can understand it when she ran. And there was only one mountain at the time, and everyone could handle it.

If these dozens of people want to pick a child, it is really a pit person. Once caught by the two kings, the armored red dragon, the trouble is on them.

Fortunately, so far, the results are good.

After receiving the reinforcements, the monks of these famous schools, in addition to the morale, also broke the grievances that had been crushed. Everyone vented their anger on the iron armor and finally got a chance. Revenge!

Just when Shen Lang felt satisfied, suddenly there was an unexpected situation!

One of the situations he is concerned about is the possible danger of the external environment. One is that the monks may be pitted. But I did not expect the mysterious girl to go out of the situation!

He is not overestimating the mysterious woman. She is indeed a man who has dealt with nearly ten red pterosaurs.

The problem may be underestimating these red pterosaurs!

There are more than a dozen heads in the Red Wyvern. Except for most of them fighting with the mysterious women, there are still several other players who are attacking both sides in the battle to help the Iron Horse.

They are far more than the sharpness of the claws, but every time the claws go out, the claws can be drawn like a knife-like wind blade!

Because the distance is far, the effect will be general, so it will not be used frequently, and Shen Lang did not notice it.

However, they are flying beasts, red-winged dragons, agile, speed, and can fly, so that they can be suddenly and near, so when they get close, the claws of the claws have a double effect!

In other words, if you defend against its claws, this will be hit by the wind blade when the claws are still a few feet away!

Just now they assisted the attack in the air. Although there were more than a dozen heads, there were more than a dozen targets. On average, they were one-on-one, and the effect was not obvious.

Now the mysterious woman is dealing with nearly ten people, and it is a close attack on them!

The advantage of flying beasts is that there is no mistake in the distance, close-knit tactics, but at close range, their minions, plus the wind blade brought by the claws, and the poisonous fog that needs to be guarded, let the mysterious girl It became very passive.

She had just started a long tulle attack like a sleeve, but it was surrounded by the red pterosaurs, but now it is constantly being attacked in the circle.

Fortunately, her crepe should not be a versatile product. Whether it was attacked by the wind blade or directly clawed by so many claws, it was swayed without being torn.

But the red-winged dragon that was forced to go crazy, in addition to the constant attacks, also completely spit out the poisonous fog!

The red-winged pterosaur spewed for almost the same time, directly allowing the battle group to be completely covered by the poisonous mist, and the concentration was higher.

This led to a short period of time, the mysterious girl has appeared a little left and right.

Originally, Shen Lang estimated that even if she couldn't get rid of these red pterosaurs, she should be able to hold on for a while. As long as everyone cleans up the iron armor, they can easily clean up these red pterosaurs.

And she is not taking advantage of it, let her out of force, it is also appropriate, but also to calm down the "public anger", so that everyone will not hate her so much, it can be said that one more.

But now, in this case, he needs to be shot.

Although Shen Lang instinctively feels that since he was born in Yaochi and can come here alone, the mysterious woman must have many means not displayed.

But he can't take the risk.

What I originally intended to assist you is that he is trying his best to let everyone go to the Iron Horse Red Dragon. If the mysterious woman was killed by the red-winged dragon, the responsibility would fall on him.

Responsibility doesn't care much, but can't see her die.

Slightly hesitated, Shen Lang still kept moving, but a 鑒月針 has been attacked quickly!

Now the enemies and targets of these red pterosaurs are mysterious women, only to tear her away immediately. The attack of Shen Lang is of course equal to a sneak attack.

The traces of the lunar needles are not obvious. Under the control of Shen Lang, almost no attention has been given to the red pterosaurs, and they have entered the battle circle.

After entering the battle circle, the one moon pin was a fast spin, and the red-winged dragons who attacked the mysterious girl suddenly screamed incessantly!

Shen Lang wants a small soldier to make a great contribution Of course, it is the key to direct. The defensive attributes of these red pterosaurs are certainly not low. It doesn't make much sense to use the moon to attack their bodies, but the eyes are weak!

It ran rampant inside the battle circle and quickly pierced the eyes of the red-winged pterosaur. A sudden blink of an eye immediately made them even more crazy.

The claws are desperately biting, and the poisonous mist is also sprayed without money. At this point, I can't see the target clearly. I can only attack it without any difference. The result is that they are doing each other.

"Kid! What are you doing for you!"

The voice of the mysterious girl is in the ear of Shen Lang.

Originally, the combat circle was controlled by her, even if it was a little left and right, it could still be controlled. Now these red-winged dragons have become as crazy as headless flies, and the poisonous mist is constantly vomiting, so that she can not retreat.

Because of the loss of the eye's judgment, the red pterosaur is completely unable to determine the target, and the companion will also be accidentally injured, and the mysterious woman can not evade the defense according to the routine.

After she quits now, her sleeves and black crepe can't limit the red pterosaurs to a circle, so she is angry and screams.

Shen Lang was too lazy to care for her, and received the Yueyue needle directly. Anyway, she has already helped her out. It doesn't matter if they don't get rid of these red pterosaurs. Anyway, she is temporarily safe.

The following two people have already had the upper hand on the two armored red dragons. These red pterosaurs will not have much effect even if they assist again. Not to mention that he had stabbed at least four or five heads at the moment, and they were not enough.

The retired mysterious woman did not have the heart to quarrel with Shen Lang. At this time, she had to get rid of these red pterosaurs as soon as possible, or else she would be confused by the sneak peek.

Chapter 1300 - Escaped king

The mysterious woman may not want to expose the real strength before, or it may be to show the hard work of the battle, in order to reconcile their convenience before.

But now that I am here, I can no longer trap them in the same way, so she must show real technology!

I saw her fingers flying fast, the two black gauze sleeves that had been in her hands, immediately seemed to be alive, and quickly flew out to the front, and the vivid appearance was like a dragon and a snake.

The red-winged dragons who have just got rid of the difficulties have no intention of fighting at the moment. The natural beauty of the eyes is the chaotic attack and flying. If there is no blinking, they are ready to flee away from the distance.

At this time, the two black yarns that wandered around were like ink dragons, and they quickly wrapped around a red-winged dragon. Then they were very fast. When they turned to other red-winged dragons, they saw that. The necks of the two red pterosaurs have been “twisted”!

Shen Lang looked at this scene and was a little surprised.

She is a “prey” spell, or it is a magic weapon.

Then, the red pterosaur that had just twisted its neck had not fallen from the sky, and two red pterosaurs were clasped around the neck! At the same time, black yarn covers their eyes.

Soon, the two red pterosaurs were also twisted off their necks!

All that is left is blind, so you don’t have to worry. After you have solved the four heads, you can now clean up.

These blind-eyed red-winged dragons are flying in the air, and they are desperately attacking when they catch something. They have been biting each other in the air. Now the mysterious woman manipulates the black yarn in the air, and it is easy to annihilate them one by one. .

The whole process is very fast, and it is reflected in the horizon of Shenlang. They are falling from the sky in order, the first two have not yet landed, and the others have all been solved.

The two black yarns were quickly taken back by the mysterious woman. They floated on her body and immediately covered her body. They were very low-key and looked like a decorative shawl with a ribbon.

Shen Lang looked at it and couldn't help but appreciate it. This kind of magic weapon is something that most people would not think of. It is used for sneak attack, and the effect should be good.

Xuan Nv took a look at him, and then a little arrogant cold, and then flew away!

Originally, the valley was not big, and on both sides of the cliff, the two kings, the iron armor, the red dragon and a group of red pterosaurs, controlled the entire passage.

Now the two kings of the iron armor, the red dragon, have been restrained by more than a dozen monks, the red pterosaur has wiped out the majority, and the remaining few are not climate, so the mysterious woman has no worries, directly shuttled from the past, preemptive Others, go ahead.

Again!

The style of the mysterious girl is to make Shen Lang more appreciate.

There is one person left in this mountain, and everything is for himself. It is a normal choice. Change it to him, it will be the same.

Just now, the mysterious woman will rush to the front and attack the red pterosaurs first. Instead, she will make Shen Lang a bit strange.

Because everyone's cold words, they gave up the principle and used actions to block everyone's mouth. Others are satisfied, but they may be guilty.

But now it seems that the decision of the mysterious woman is no problem. She can deal with the iron armor of the iron armor alone. She can't cope with it, but only the red pterosaur, she has no problem.

Therefore, her action is not only blocking their mouths, but also making them difficult to ridicule, but also paving the way for the first time!

Appreciation and appreciation, Shen Lang did not leave with her first, he chose the road with other people, because Yaochi will have their information, and he needs to follow other people, get more information from their different sects.

The mysterious woman shot down the red pterosaurs and then left early, which also made everyone more or less perceived.

For a time, the faces of the big men are a little bit hanged. If someone else is a woman, they can all be so overbearing and quick, how long will they last?

To be exaggerated, others are a female repair who quickly solved nearly ten beasts; and they are a dozen people besieging a beast...

Of course, the king of the iron armor of the Red Dragon, not the red pterosaur can compare, this can not talk to the number, but still make everyone feel a little embarrassed.

For a time, both groups of people began to break out!

The two iron armor are all king-level, and the wisdom is certainly not low. Otherwise, they will not command the Red-winged dragon to stop it.

In the course of the recent engagement, although they were huge, their defensive power was extremely high, and their power was great. The rampage blocked the entire valley. But to deal with more than a dozen human monks alone, it is not an opponent at all.

A simple analogy, they are similar to the strength of the semi-Xianfeng. It only has a huge advantage in the body, but it can also be fire-breathed, so once it breaks out, even if more than half of the Xianfeng peaks join hands, it is difficult to quickly take it.

But they also understand very well that if they continue to fight, they will only be the same, and human beings will certainly kill them!

Therefore, under the "race" mentality that the mysterious woman has caused everyone, they can't take care of it.

Suddenly, the two kings of the iron armor, the red dragon, merged together, and then slammed together a large piece of high temperature flame!

When the former human monks were forced to open they quickly gave up the attack and stormed together!

When they are merged together, more than 30 human monks are difficult to unify and merge, and the merger cannot be surrounded. If they are to be surrounded, the scattered forces will not be able to stop the combined impact of the two kings.

So when the flames swooped over, the people in front of them quickly dispersed, and they were unable to stop the two beasts who followed.

Immediately, in the cover of the flames, they quickly rushed toward the mouth of the valley!

This is the direction of coming. If they go to the other side, it means that they are running away and will not stop everyone from going.

As a result, everyone has not so much motivation to continue to pursue, after all, they will appear again, it is also blocking the people behind, they are not obliged to help all the others to clear the road.

And just the mysterious woman has gone to the front, and no one wants to fall behind.

“Thank you for helping each other! Today, if you don’t arrive in time and generously help, we can always be trapped here. Oh!”

Although there is mutual understanding and even friends, but for the help, everyone still officially thanked.

Shangguan Tianyuan and others also represented their respective martial art families.

However, everyone’s purpose is very clear, especially those who come first, have been caught up by the people behind, indicating that they have delayed a lot of time. So soon everyone is aiming all the way and going straight ahead.

After this Taniguchi, after going out, everyone showed the look of expectation!

Just ahead, at a distant mountain, it is a piece of information in the legendary ruins that is consistent!

Finally, I have to get to the site of the remains!
