

## First Strong 1311

Chapter 1311 - Shocking conjecture

Everyone is alert!

Everyone is ready to prepare for the battle, and at the same time they are also concerned about the place where the Shenlang dead water whip corrodes.

Shen Lang took the stagnant water and collected it, and did not continue to destroy.

Then he reached out again, but it was not directly used, but the armor extended to wrap the palm of his hand, trying to touch the wall of this special material.

When I was studying there, Shen Lang used the sacred armor to analyze the statistical data and other laborious work. I still have to explore by myself. After all, the product of scientific and technological civilization and the exploration of the cultivation of the true civilization are somewhat uncorresponding.

But after entering the building and carefully exploring the first five floors, Shen Lang has a strange feeling.

This weirdness comes from architectural styles and layouts.

Simply put, the world is like the ancient style, and this ancient ruins should be more quaint. But what he saw is more like the style of modern earth, but also more advanced!

The back has been going down, and now it has been thirty-five, and still has not bottomed out.

Shen Lang already has a bold guess!

He thinks that the ancient times of this ruin will not be more primitive and primitive, but will be very developed in all aspects? For example... This building is not a few floors on the ground, but dozens of floors underground. It may have been a tens of layers of ground buildings, but the latter is buried under the ground for other reasons!

If for some reason, everything is overwhelmed and covered, many buildings may be destroyed, but the building was not destroyed because of some protection, but it was covered up.

Later, for a long time, the soil was lost, and several layers were exposed on the ground. When the relics appeared, they were discovered by the predecessors and then began to develop here.

Of course, if you want to bury any treasures, or other factors of cultivation, these ancient powers, dig dozens of layers of several hundred layers should be able to do. But the exploration just made him feel that it is more like a public building than a cultivation place.

If it is an ordinary office building, it is impossible to build dozens of floors in the ground.

Of course, these are all guesses and there is no evidence. When I used the stagnant water whip to destroy this special material building, I suddenly gave a warning sound and flash, and immediately gave Shen Lang a verification!

This special material room is like a large safe in this underground building, or a secret laboratory, confidential room and so on, so there will be such a style of alarm.

The span of the millennium has made it possible to get in and there is less information. In addition, there is no such concept in this respect. It may be encountered and found in science and technology buildings. It has nothing to do with the cultivation of resources, and it is directly skipped.

So now Shen Lang can only explore by himself. Combining the huge square and huge cubes before, it is completely like a science fiction scene, let him boldly guess that this ancient era, once had a high degree of scientific civilization.

If this is the case, try to use the highest crystalline sacred armor of technological civilization to get in touch.

Of course, Shen Lang is also not sure. After all, this ancient ruins, I don't know how many years ago, and Shengjia is the latest product of the current overseas city-states. It is extremely difficult to match.

However, they are all in the same world. If in the ancient times, it was a double civilization of science and technology and cultivation, then I did not know why, the whole civilization was destroyed. After a few years, I don't know how many years, the mainland of China has been inherited from the comprehension part, and other continents in the world have received the inheritance of science and technology... Then there may be such a magical situation!

No matter what, you still have to try it, even if the holy armor has no effect, then continue to "cut" with the dead water whip.

After trying for a while, Shen Lang suddenly felt the feeling of the palm being sucked!

The protection of the holy armor is very good. Even if it is "electric shock", it will not hurt the deep waves. Even if it is compressed to be transparent and light, there are still many levels. After all, this is with space technology.

Now Shen Lang immediately pays attention to the state of the Holy Grail, and vaguely understands what is going on.

The wall of the special material is very protective and can block all kinds of damage, and the holy armor cannot be touched. But the violent corrosion of the dead water whip is equivalent to peeling off its epidermis, so at the same time as the alarm, it is similar to "leakage".

The sacred armor continues this layer and expands to a layer of connectivity!

Shen Lang estimates that this technological civilization, regardless of the name of the law, should be similar to a supercomputer-like technology. The same is true of the Holy Grail. Perhaps it has certain wisdom, and it can find a connection.

Or simply, let the G-3 invade the system here – if there is a system and can still serve.

After a while, there was a result that made Shen Lang stunned!

This is equipped with a super-bionic light-brain micro-warfare system. The latest black technology achievements in the city of the river basin are mastered by the core of the royal family. But now, it is not the system that the holy armor invades here, but is controlled by the other system. feel!

“The version is too low, is it upgraded?”

That system did not have a problem with the Holy Grail, but a reminder appeared.

The owner of the holy armor is Shen Lang, which is written into the root program, so even if it is intelligent encountered such a situation, it is also decided to sink.

Shen Lang is of course very tangled.

The Sanjia, which was later sent by the Bihai family, was sent privately by Bihai, and I don't know where to go. Even if he is now strong enough to reach the peak and the half, he can still give him a lot of help.

Such a good thing, if it is the Bihai family, to upgrade the program, of course he is happy. In fact, as long as he enters the world of the city, the Holy Ghost will automatically contact the main network and update all aspects that can be updated.

But now this is an unknown source – it is an antiquity system, and it is too risky to upgrade it. If the cause of the crash is directly caused, then it will be a big loss!

The wisdom system here, of course, will be guarding this side. The sacred armor is an invading hacker. It will be annihilated and annihilated. How can it help to upgrade?

When he was hesitant, the system appeared again.

“The version is too low, the risk of the vulnerability is too much, please upgrade now.”

This reminder makes Shen Lang a bit puzzled. If this system has already controlled the system of the Holy Grail, what do you want to do? Why are you asking for permission?

What surprised him even more is that it is not just from the G-3 itself, it is also recommended to upgrade the system!

However, this is not in the world of the river basin. The current situation is not the scope that it can decide to upgrade, so it is still necessary to get the permission of Shen Lang.

Shen Lang is once again full of suspicion. If the system of the other party controls the system of the holy armor, is the “willingness” of the holy armor forged? But if you have already controlled, you can control the holy armor system, and you need to fake what you want, is it more convenient to directly wash the system of the holy armor?

Chapter 1312 - Restart ancient civilization

After hesitating for a while, Shen Lang confirmed it.

As he suspects, if the system can control the system, it does not confirm that it is just a form. Now he confirms and wants to see what the consequences will be.

At the moment of confirmation, his consciousness is also highly alert, and he is ready to cut off the connection with the holy armor. In order to avoid this system is to invade his brain through the Holy Grail!

“Shen brother, are you okay?”

The red light flashed, the alarm stopped, and everyone’s alert did not disappear. However, looking at Shen Lang’s appearance was very weird, and He Lan’s smile was still a question.

Shen Lang can only shake his head slightly, it is not convenient to say more, but also needs a high degree of alert.

Because the super-advanced, the speed of the holy armor is not necessary to say, for the earth civilization, it is the black technology product in the science fiction world. Shen Lang has become accustomed to its convenience, but now, I feel that the upgrade seems to be very slow...

Everyone looked at him, he didn’t care so much.

After a few minutes, there was a reminder that the upgrade was complete.

Then, Shen Lang found that the holy armor can directly access this system!

He remained alert and then opened the building through the Holy Grail.

Soon, in addition to the stagnant water, there was a rapid fade on the wall without any traces, and then a quick change. In less than a second, an open door appeared.

It seems that the door is hidden, but technically it has no trace, plus complete integration, the same structure, so people who are not clear, carefully inspected outside, can not find the door.

“The door is open!”

Everyone was screaming.

“Shen brother, you are really a god! How did you do it?”

Everyone saw it. Just now, Shen Lang destroyed the alarm, and then did not know how to get it. He opened the door.

Shen Lang smiled a little and did not say much.

He no longer has to press the wall. After the upgrade, he can now remotely control the system through the sacred armor.

Although he generally does not dare to relax his vigilance, he is always careful to be countered by “smart technology”, but it is still very easy on the surface.

“Let’s go in and see!”

Everyone nodded again and again, because it was Shen Lang who had been stunned for a while, and even if it was not said, it was certainly difficult, so everyone was too embarrassed to grab advanced.

Now, when you open your mouth, you will naturally go in.

Entering this room, everyone was disappointed.

Except for some strange things, there is no comprehension resource, let alone the treasure, that is, the most basic spiritual stone.

Shen Lang is also carefully looking around.

After the upgrade, he has already mastered the system through the Holy Ghost, knowing the situation here. Simply put, it is like a confidential computer room, protecting the core host in the most rigorous way.

Therefore, the things inside have no effect on the realm of comprehension. It's just a bunch of weird and precise "scrap iron".

Through the upgrade, Shen Lang can infer that one of the systems is more advanced than the technology of the river basin. It can be passed down to the present without destroying and disappearing. It is not a model of "perpetual motion". It should be the use of super energy supply such as Yuan Lingshi.

As for the factors that they can "connect" and "communicate", what is the general machine language, and the Shenlang is not clear. It can only be said that this piece of the mainland, perhaps as he had guessed before, may be the watershed city state and other inheritance of the ancient science and technology.

And through the "up to a few minutes" upgrade, the holy armor can not only open here, but also seems to have been greatly improved, including the control of the entire building.

"Rubbish!"

Lv Yang suddenly raised his hand and was ready to ruin these things.

In his opinion, if you have such a well-protected room, there is actually nothing, and it is a bit of a deliberate deception.

Shen Lang immediately applied his field control to block his blow.

“What are you doing!” Lu Yang blinked.

“What are you doing?”

For his roar, Shen Lang directly eyes: “You don’t have any culture, don’t mess! This is not a resource, but this is the control mechanism for this place. You have to ruin it directly.” may!”

Lv Yang did not expect that it would be the organ that controlled this place.

“You said yes! How do you prove that this is an organ that can be controlled?”

He Lan smiled and they saw that two people had to fight again and they were all nervous.

It’s also curious to hear the words of the waves.

“Yeah, Shen brother, do you see that this is an institution? Is it possible to control the entire underground building?”

Shen Lang nodded to him: “I am even guessing, I have to try.”

Everyone looked at him.

Shen Lang is of course “pretending to be a ghost”. In fact, he can now remotely control through the holy armor. After doing enough, he immediately controls the switch and tries to turn on the light.

Between the time, the outside suddenly lit up!

Sure enough, like his guess, the building was protected and buried as a whole, so the facilities inside were not affected.

Although I don't know how many years here, but because I have never used , the energy consumption is kept at the lowest level, most of them will not start, so now it is turned on, except for equipment that is aging. Everything else will work fine.

He was just the simplest “organ” – the light was turned on.

The outside suddenly lit up, so everyone was taken aback and immediately went out.

“Do not worry, it is the light source that I manipulate the organs and release.”

Everyone thought that there was any change. I didn't expect it to be the manipulation of Shen Lang.

“Shen brother, then can you manipulate the organ... that is, there are other places, there can be light. In this case, our search will be much more convenient.”

Shen Lang nodded: “I will try.”

Of course, there is no problem, but it is still necessary to pretend that, after a while, all the lights are turned on.

“Okay, this institution is open. If there is no problem with the light source equipment, it should be able to light up.”

“Good! Then we will continue to search below!” The red son of the four sons excited.

Even Zhong Zhizhi and others who had resentment against Shen Lang now have to take it. This kid is really a genius. For the magical organs in the ancient ruins, he can study the application method so quickly.

When the four sons of Hongdian and He Lan smiled and said hello, they went out first.

After all, they came from the earliest, sharing some information, it is already very interesting, and now they can continue to explore, of course they will not be more modest.

Lu Jiayi saw it, of course, he continued immediately. Even he and Shen Lang greeted him without leaving a call.

The mysterious girl stopped, and looked at the waves like that.

Chapter 1313 - Fight for mystery

“You don’t hurry up? Are you robbing them after a while?”

Shen Lang casually dealt with her, and at the same time began to copy more data information here through the Holy Grail.

Of course, until now, he has not given up his guard, and he still maintains a high degree of vigilance against this smart system.

However, it is very strange that he read the data information through the holy armor. The system here seems to be completely silent. There is no defense at all. It seems that all the initiative is given to the holy armor.

This also makes Shen Lang more careful.

After all, not long ago, he encountered an artifact that he wanted to swallow his master. This artificial intelligence system is similar.

At the time of high-speed data transmission, Shen Lang also asked the Holy A to investigate the information of all aspects of the building and display it.

“I am leaving to protect you.”

“protect me?”

Shen Lang looked at her with a smile.

“They won’t let you go.”

The voice of the mysterious woman does not carry any emotions, but the meaning is very obvious. It is Lu Yang.

“Of course, I just put it down temporarily and there is no reconciliation.”

“Your friends are leaving, they may be killed. So, I am leaving to protect you.”

What the mysterious woman said, it seems a bit reasonable, Lu family is concerned, whether it is He Lan and a smile, five people and Shen Lang teamed up, still take the profit.

But if they are separated, maybe they will be back. After all, they are also afraid that Shen Lang will lie to them to say that there is light, and then they slipped.

However, Shen Lang does not believe in mysterious women!

In the past ten days, I have seen her “face” and confirmed that she is a self-interested person. It is impossible to stay in such a good heart to protect him.

“I don’t need human protection, and I won’t give you any benefit.”

The mysterious woman is undecided.

Shen Lang slightly analyzed it, and already had a plan.

Both of them, thinking about going out to the entrance of the corridor, to see if the following is really bright, if it is bright, it may be the first to search. But the mysterious woman obviously thinks more deeply!

Since Shen Lang already knows how to manipulate the organization, will he know more?

For example, will there be an institution that shuts down other people below, or directly know where to store good resources?

If she asks Shen Lang, even if she knows, she will definitely not tell her. Therefore, she volunteered to stay and protect him. She could both have a good impression and an excuse to stay with Shen Lang.

Between the conversations, Shen Lang also has all the information.

This building is considered a military scientific research site, so from the time of design, it has a strong protective effect on the outer wall, and it is also the case that they have been protected for a long time without collapse.

But I don't know what happened at the time. All the researchers and most of the equipment inside were basically evacuated.

The existence of this core computer room, that is, maintaining the basic maintenance, can be directly activated if it comes back.

The smart system here is a long guardian, but it can only maintain systemicity. There is no way to stop repairs when someone comes in, or if the building is rationally broken.

There are more than 60 layers in this building, that is, from here, there are more than 30 layers, but basically the same is empty.

Before seeing the waves, I felt that the top five floors were weird, because it looked like a large empty office and office building. Now it is confirmed.

Originally, he was not in a hurry to leave, just to learn more information. If there is any resource, then go directly and do not search like them.

But now there is no value, and there is a little resources that can be dug up here, that is, the supply of equipment support.

Since the smart system has not invaded him yet, he has not done any damage. Not only has he not gone to the Lingshi, but he has also found a energy box in the core computer room, and it is actually Yuan Lingshi.

He added two Yuan Lingshi directly to it, so that it can continue to support it.

“Thank you, the world god.”

In addition to the beginning of the prompt, there is no more intelligent system that appears to be active, but at this time, the contact with the holy armor presents such a sentence.

This is its site, and there are certainly various kinds of monitoring. It knows that adding energy supply is not surprising.

However, it is a little bit ridiculous that I did not expect an artificial intelligence system, but it would also be “flattering”, because he gave the “benefit” and directly respected the “world god.”

But think again, I feel very normal. Even if you develop AI artificial intelligence on the earth, you should try to make them smart. They will disguise and understand the “flattering”, which is the performance of wisdom.

Since there is nothing good here, instead of getting information about this ancient civilization, there is no need for Shen Lang to continue here.

He came out of the room and controlled that the door would not be closed again.

The mysterious girl followed him, and her eyes were looking at the front.

Under the light, the whole piece was very bright, and three people appeared in front, blocking the direction of the stairs.

“I want to cheat us away, then you are going to sneak?” Lu Yang sneered.

They have just been verified, and indeed the lights below are already on. However, Lu Yang thought of another question. If there is really something good, why do you get nothing in dozens of layers?

Does that mean that there is still nothing below? The best protection here, that is, just the room, but there is nothing inside. It can be seen that this building is purely of no value, perhaps just a place for a large population to live.

Compared to the hopeless search, he felt that it is better not to let Shen Lang run more reliable!

So immediately they returned, and they saw that Shen Lang came out of the room, and it seemed that they wanted to slip away.

“Is there no light below? Yes. If there is, I lied to you? No.”

Shen Lang smiled and asked himself, “So, I want to go, I want to stay, it is my own freedom. Besides, I want to go, can you stop me? I need to lie to you.” Come to slip?”

“Mysterious girl! We cooperate, after taking him down, all his magical benefits are all for you! We just have a hatred with him, just need revenge!”

Lu Yang suddenly issued an invitation again. Now Helan smiles that the four sons of Hongdian are not here, and he himself shows to the mysterious woman.

This mysterious woman, he has never had a good face, and if he talks about friendship, at most it is not helpless. It is impossible to help him. And if there are no more helpers, Shen Lang may actually run invisibly.

It is best to deal with mysterious women, selfish and self-interested people, as long as they give enough benefits.

When Lu Yang spoke, she said that all the magic weapons of Shen Lang were owned by the mysterious woman. The mysterious girl had at least seen the tower of the tower, and it should be quite attractive.

As for whether it is really time to give it, then wait for the first to kill the waves.

Chapter 1314 - Human fine

“I know that you will come back to kill him, so I stayed to protect him.” The mysterious woman had no feelings and directly overturned Lu Yang’s wishful thinking.

Lu Yang originally thought that such a big interest was sent out, and the mysterious woman should promise it. I came in this place, and now everyone has not got anything. It is also a good thing to get so many benefits from Shen Lang.

I did not expect that she would actually say to stay to protect the waves.

“To the old man! That Laozi will kill you together!”

Lu Yang was furious, and she couldn’t take it for herself to fight for the mysterious woman.

The mysterious woman said to stay to protect him, Shen Lang did not care, but now he expressed his disdain for Lu Yang.

Originally, he was able to leave invisibly at any time. Anyway, Lu Yang could not stay here for a long time. But now the mysterious woman directly said that it is to protect him. If he runs alone, it seems that he is not enough loyalty.

Although he feels that the mysterious woman is plotting his idea, but it seems that it is still not very good.

“Do you really feel that you can do it? I am stunned by the people of your Lu family.”

The mysterious woman still has no feelings, but there is an invisible arrogance.

This also verified that Lu Feng was stunned by her.

Even if there is a sneak attack, but Lu Feng is also a half-scent, placed on the earth, are the top of the strong, so she was easily stunned by a woman, showing that her strength is definitely not weak.

The bigger problem is that they don't know what methods they have, and they can hide them. It is Shen Lang, and I can't see through what realm she has reached.

Lu Yang is also the same, which is why it is a scruple for the mysterious woman.

A sinking wave is already difficult to do. Another mysterious mysterious woman, Lu Jia is the three of them, and Lu Yang is only sure of himself.

The direct confrontation is opposite, and the atmosphere makes him jealous.

Let's do it... I don't know; don't do it... I have already said it.

Just as the tiger was riding hard, a voice came from far away.

“Shen brother! We are in the end! Nothing underneath!”

The voice of He Lan smiled, although he was the only one, but the sound of light came over and brought variables.

He Lan smiled and the four sons of Hongdian, just rushed out first. They are friendly allies, everyone wants to make money by their own skills, so they made an agreement. Since there is light now, everyone should search as fast as possible, and act separately, one layer at a time!

In this case, they can search for five layers at a time, and everyone gets a bigger range.

Everyone's speed is very fast, and before they have searched for more than 30 layers, they are already familiar with the environment and conditions. So for many places, you can skip it quickly.

As a result, Shen Lang collected data from the room and came out. During the time when he talked to Lu's family, they had searched several layers.

He Lan smiled and searched for no results. He went straight to the bottom and went to the bottom. He found that it was more empty and there was nothing, so he returned while talking.

“Look! It really lie to us to search, you know that there will be no resources below!”

Lu Yang, who was riding a tiger, immediately shifted the topic to attack the character of Shen Lang.

After he finished speaking, Helan, who gave up searching other floors, smiled and quickly returned.

“Hey? You are all here? Do you have a foresight, so you don’t search for it. Haha, we are a few too greedy! They are more greedy than me, still searching for it.”

He Lan smiled and made a haha, want to be active.

This is a person!

When he first encountered the Shen Lang, he could be proud of his arrogance and arrogance in order to stimulate the waves. But now facing Lu Yang, and the situation of all parties, it is the balance of long-sleeved dance.

Just now, I want to be active, he will come back in advance, it is estimated that it is the same as the mysterious girl, guessing that there will be such a possibility, so come back to the round!

Shen Lang nodded to him and expressed his gratitude with his eyes.

Although he does not need anyone’s help and maintenance, but people can be careful to maintain a balance when the strength is weaker than Lu Yang, it is already very difficult to get.

“I can’t blame me, I just found the door and found the organ that turned on the light source. As for the following, there is nothing to gain, it is purely a relic.”

“Of course, of course, how can you blame you? You have helped to make out the light, which has saved us a lot of time and made a big convenience. Searching for dozens of layers has not been harvested, we have not embraced too much. Hope.”

He Lan smiled and smiled and talked, and people came closer.

When he rushed back quickly, because of the tension in the situation, he did not dare to come close. It's not afraid of accidental injury, but because of his relationship, it's causing everyone to get rid of the fire.

Now, while talking, and walking without any vitality, is to make yourself a goal, blocking the two sides, and further dilute the atmosphere.

This result is Lu Yang they are willing to see, so there is nothing to say Helan smile, you are already in the end? What is below? Lu Yang asked a question intentionally.

He Lan immediately replied: “Lv predecessors, the next layer, is the same as above, I just reached the bottom, there are probably 30 layers, nothing.”

His speed back and forth, in fact, is already very fast, and it is estimated that there is no search. The four sons of Hongdian who went out also did not return.

“Let's go! Are you waiting for the four sons of Hongdian to come up?”

In the words of Shen Lang, Helan smiled and said: “No need to wait, they must be very disappointed, they will come up soon.”

Then he made an invitation gesture.

As long as you don't leave quickly, go slowly, and the four sons of Hongdian will naturally catch up soon.

Lu Yang looked at Shen Lang and then let the other two of Lu's family walk in front, then he followed.

He only needs to be in front, and Shen Lang can't fly out of this underground building. The other two of Lu's family are running up to pick up Lu Feng.

They are even a bit grateful at this moment. Fortunately, Lu Feng is stunned by the mysterious woman. This is the person who knows about Shen Lang. It is somewhat old-fashioned. If someone else is changed, follow the sinking waves coming down and see the coma. Family members should be killed directly.

The mysterious woman, as she said, followed the side of Shen Lang and protected him.

When they went up, it didn't take long for the four sons of Hongdian to catch up. Naturally, there was nothing to gain, and everyone was discouraged.

Compared with Shen Lang and others, they have been advanced for many days. They have been searching for a long time. They have never encountered such a building, but they have nothing.

Chapter 1315 - Screw your head

When I went up to the top, the other two people who went up the Lu family had already rescued Lu Feng and took it to the ground.

When everyone came out, I looked at the layers that were exposed on the ground, and I was a little embarrassed. I couldn't think of such a magnificent building in the underground.

There is no "light off" in Shenlang. There is also artificial intelligence system control, which will turn off the lights naturally.

"Shen brother, or... let's go together?"

"In any case, we have similar interests. We are five people, and there are not many of you."

He Lan smiled and Miao Zhongtian, who represented the fourth son of Hongdian, issued an invitation.

Their intentions, of course, have two layers, which are to help the smashing of the waves and avoid the Lu family attacking him when he orders. It is also felt that Shen Lang is very useful. Like the buildings in the ancient ruins, he can find the organs without any clues.

“I want to protect him.”

The mysterious girl said something again.

Her meaning is also very obvious, if you want to invite Shen Lang peers, then she has to follow.

This is to make Helan laugh a little strange, I did not expect this mysterious woman, also joined the Shenlang camp.

Then there is a secret feeling, this young new friend is really powerful! This woman obviously does not see anyone in the eyes, including Lu Yang has not seen it once, but actually will take the initiative to protect the waves.

The attitude of both of them, of course, also makes Lu Yang very unhappy, which is equal to their Lu family, is to protect the waves!

“Sorry. I don’t need people to protect, and I won’t be aligned with anyone. I’ve always been used to it, everyone still has to go!”

Shen Lang directly rejected their kindness.

“...”

When the words were spoken, Helan laughed directly and they were speechless. Lu Yang is on alert. Since Shen Lang does not need their help, it is naturally dependent on stealth.

Lu Yang can’t let himself fall in the same place twice!

“Well, everyone has the idea of everyone. But we can come in and come in, maybe even afterwards. I wish you all the best!!”

After He Lan smiled, he still sent a blessing to the generous.

Originally, the five of them were together. It is good to have one more wave, but it is also necessary to consider the problem of distribution. After all, it is not mature enough to cooperate and save trouble.

“I am following you.”

The mysterious girl still looked at Shen Lang, regardless of his refusal, insisted on being with him.

Lv Yangxi sneered: “You want to go alone, do you want to come back after we leave? Can you know the organization, do you know the treasure, but don’t want us to know?”

Now the mysterious woman still wants to be with Shen Lang, He Lan Yi Xiao and Hong Dian Si Zi are still here. Let him not do it directly, but he can’t let Shen Lang run away. He can only shift the direction and let others entangle him.

Shen Lang glanced at him. “You still want to find me trouble, but because they are here, you think it is a variable, and you don’t dare to do it. Is it very wrong?”

“...”

This is undoubtedly a provocation. Helan is laughing and the four sons of Hongdian are helpless. Why bother? I am here, everyone is here, and I will leave first, and it will be separated from the Lu family.

Lu Yang looked at him coldly: “You can rest assured that I will untie your head sooner or later!”

“I am coming to you now, first screw your head!”

What Lu Yang said is to let go of the words. Shen Lang said that now, it is not just provocation, but a direct declaration of war!

So this statement came out and everyone was shocked.

He Lan smiled and the four sons of Hongdian, quietly retreating to the back, they did not want to get involved, and the mysterious girl was also guarded.

A few people in Lu's family were even more nervous because they knew the "trick".

And the reality is as they suspected, after just finished, Shen Lang's body disappeared out of thin air!

The four sons of Hongdian looked at this scene and could not help but be surprised.

Xuan Nu and He Lan smiled, but they also widened their eyes. They did not see how Shen Lang left.

Lu Yang and other Lu family people turned quickly.

Shen Lang can be invisible, they all know, and it is very clear that the invisible means is very bright! They caught for half an hour and they didn't catch a trace.

So what I just said is that "to the back of your neck" is a very critical point, it is likely to be attacked behind.

As a result, at the moment they turned around, Shen Lang appeared again, and then went straight to the back of a few people in Lu, grabbed one of the Lu family, and quickly retired tens of meters!

From his invisibility, to all this, no more than one second before and after!

A few people in the Lu family just turned around and found that something was wrong. When the counterattack was ready, it was too late.

The one that Shen Lang took, is that the strength is about to solve the peak and the half, but it is stronger than Lu Feng. If you are not a person you know, it is undoubtedly the easiest one to catch Lu Feng.

However, because he has no intention of heart, such a quick layout and then sneak attack, but also full force, so this person is also no resistance, he has been imprisoned.

“Shen Lang! You are a despicable traitor! Let’s put people away!”

Lu Yang was naturally the first to turn around found himself deceived, and the object of the attack was not him, could not help but anger.

He Lan smiled and looked at Shen Lang and grabbed a Lu family. It seemed that he really had to break his neck, so he also quickly pleaded.

“Shen brothers, they are merciful. Anything can be discussed. In this ancient ruins, we still have to unite.”

Shen Lang grabbed the Lu family and could not help but sneer.

“Just who said that I want to break my neck?”

Lu Yang can’t directly beg for mercy at this moment. It must be hard to support: “You dare to move him to try!”

“I will move, how are you?” Shen Lang bluntly slammed the past and hit the face of the Lu family.

However, this is not a big deal. In fact, the hand he caught is directly taking the man’s mental power out!

Just this slap, as if playing on Lu Yang’s face, made his face hot, and also saw that the person’s face quickly became wilted.

“Shen Lang! You are the evil door, do you want to be the public enemy of the heroes of the world!”

He Lan laughed and couldn't help but he had used it before. It wouldn't work for Shen Lang, but it would irritate him.

“Shen brother, give a face, have something to say...” He could only persuade one more.

Shen Lang looked at him: “You are not easy to get your face for Lu family. I will give you face today, don't break his neck, ask him a leg!”

He said that he directly threw the person out. At the moment of leaving, he added one foot and kicked the one's leg directly.

Chapter 1316 - Sacrifice project

“dead!”

When Yang Lang threw people out, Lu Yang had already screamed.

His threat did not work at all, and Shen Lang also deliberately gave Helan a smile, which is clearly to face his face!

So when the person was thrown out, he directly started. As a result, he saw that Shen Lang said that he really wanted to kick a leg, so that he would be more merciless, regardless of Helan's smile, mysterious girl, etc. People will not be cheaper.

Now Lu Yang, really irritated to a very high point, desperate to kill Shen Lang.

Shen Lang did not want to fight with him now. For Lu Yang, who was rushing over, he simply ignored it. After kicking a kick, he had already flew away through the super high speed of the Serie A!

The speed of Lu Yang is already very fast, and the distance between them is tens of meters. However, when his shadow swayed to the place where Shen Lang was standing, everyone found that Shen Lang disappeared once again in an incredible way!

But this time everyone faintly saw a trace, not directly disappeared out of thin air, but flew away at a very fast speed. It's just that the speed is so fast that they can't end up with their eyes, and the moment has disappeared beyond sight.

Before the disappearance of the air, everyone was amazed by the cleverness of stealth, but now it is the speed of realism, which has exceeded their imagination, which is impossible for them to track.

Of course, Lu Yang could not track, even if he rushed over, he could only look at the distance.

At this moment, he suddenly understood why Shen Lang was able to leave the last time. With this speed, plus stealth, it is simply invincible – escape invincible.

The last time I was in a stealth, I left at such a fast speed that his field had not yet been monitored.

Then he regretted it!

Shen Lang has such a means of escape. If he wants to catch him again, it will be difficult. Today, there is still a perfect opportunity, just in the next thirty-five.

At that time, the space was limited. Even with this speed, it could not be played out. Even if it was invisible, it was easier to be discovered.

At that time, because of the direct and supportive support of the mysterious woman, he hesitated, and now he regrets missing the best opportunity.

“So what... we will go first, there will be a period after you!”

This scene has already begun to smash, and He Lan immediately greeted him with a smile and left with the four sons of Hongdian.

The mysterious girl looked at the direction of Shen Lang's departure, which was a bit unscrupulous.

She has repeatedly said that she has been protected, and with him, the result is that Shen Lang is not convinced, just want to go and say no to fight one, not to bird her.

Originally, just because of this building, I feel that Shen Lang may have learned more information, so I want to follow him. After coming up, it will be said.

Now the attitude of Shen Lang indifferent, but she is very unhappy and very unhappy, at this moment a bite, even if it can not catch up, but also followed the direction of Shen Lang to chase the past.

Shen Lang had already calculated it. Before Lu Yang came over, he had already left the supersonic speed. He was confident that Lu Yang could not catch up.

However, after the real start, he is still a little surprised.

Because of this speed, whether it is just the start speed, acceleration time, or limit speed, it has been greatly improved than before!

This should be the effect of the upgrade of the Santa Claus system?

The effect is amazing, but it reminds Shen Lang to be vigilant. The current Shengjia system, I don't know if it is not the system that was controlled before.

I don't want to be with them because Shen Lang has a goal!

The place he is going to now is the super huge square, the super huge cube.

At the 35th level, the system was touched, the "crack" opened the door, and the transmission collected a lot of data and information.

Shen Lang now has no time to analyze this massive data one by one. What he wants to do now is to see if he can use the upgraded sacred armor and open the huge cube.

The gadgets are a few hundred meters long, wide and tall. How can it not be a huge computer room? It is a super-powerful computer that can fill that space.

Because the supersonic flight is too fast, the Shenlang can't fly for too long, then it slows down and adjusts the direction. According to the previous trajectory, it turns to the huge square.

After landing, Shen Lang did not immediately try again, which cost him a few days, so that he wants to open more and more.

The data that was transmitted in the computer room before is really a huge amount of money. It is not like reading a person's memory, you can filter it yourself.

Shen Lang can only let the holy armor to screen. As for the current holy armor, is it already controlled, will not give him the illusion, and can not care so much.

He did not understand so much. This ancient world is obviously a high level of science and technology, and both civilizations have reached extraordinary heights. It doesn't make much sense to understand too much. What is needed most now is to figure out this giant square and this giant cube.

Now that it has been positioned here, and scanned the environment, the Holy A instantly analyzes the data here.

A lot of detailed data parameters including nouns, etc., are not the same, but the basic meaning is understandable.

This place is called Sacrifice Square. This building is called the Temple of Heaven. The data shows that the construction of this "sacrificial project" is actually to communicate different time and space!

Probably because it is a special "sacrificial project", it was later destroyed, and it can still be maintained.

Just this "sacrificial project", the public data is still relatively limited. Even if the system is upgraded at the core of a military research institute, more detailed information is still not available.

Even so, Shen Lang does not believe that this festival will be solid. He even suspects that the “Sacrifice of Heaven” is a cover for foreign media. It is probably a larger research laboratory!

For the self-cultivators of the Han Dynasty, they came to this ancient ruins to search for comprehension resources. Other irrelevant ones have no meaning.

But it is different for Shen Lang. He has a broader concept. The knowledge of the earth and the city of the river basin allows him to accept and understand these, and the existence of the holy armor allows him to use some black technology.

Just like the upgrade, the G-3 has been upgraded in speed, which is only used in this part, and others have not tried.

For example, if you can collect some super-era technology weapons that can be used here, it is also an excellent resource to be equipped on the top of the holy armor.

There is also a part, that is, information is a more important resource!

If you can get more information about the world and you can directly grasp what resources there are, you can save time and effort.

Chapter 1317 - World god

After filtering more information, Shen Lang asked the Lac to screen how to open the information of the building.

He has made the worst plan, since the dead water whip can destroy the special material of the surface, it is possible to connect to the inside of the line, then if it can not be opened normally, then use the method of forcibly “invading”.

However, soon, the sacred armor has screened out relevant data. This giant cube, the same material as the room, has the same seamless construction model. Even if the same person is not designed and built, the general direction is the same.

According to the comparison of the three-dimensional model, the seat where the door is located is determined, and Shen Lang immediately rushed there.

Because the surrounding is a huge distant square, just standing there, you can't see what direction the door is facing. However, it is the same as he had previously guessed, in the middle of one of the sides, in line with the symmetry aesthetics.

After the scanning of the holy armor, a specific point was determined. Shen Lang stretched his hand and opened it through the holy armor.

In the process, he certainly has expectations, but more is to be vigilant, not to worship the Temple of Heaven, but to be vigilant against the Holy System.

After a while, a large light screen ghost appeared flashing above the press, and Shen Lang did not remove his hand. For this shadow, he did not know whether to operate or confirm anything.

“Welcome! Dear World God!”

This time it was a sound, and it was a respectful tone.

Is it the world god?

Shen Lang is a little sweaty. The world \*\*\*\*\* is like a “master”. Is this a polite statement in this ancient era?

Originally, Shen Lang also wanted to let the sacred search the data to see what the meaning of the “world god” in the ancient world, but as the sound just fell, the front immediately changed, attracting his attention.

As with the previous room, this special material was made without any traces, but after it was turned on, it quickly faded apart. There was a small door in the room, and there was a tall archway.

After all, this is a huge building with a length of several tens of meters and a height of several hundred meters. Opening a small door is too disproportionate. And it is estimated that it is also convenient to enter and exit like a vehicle like a vehicle!

The door has already been opened. I have studied here for four or five days without the result of the Shen Lang. Of course, I was a little excited and immediately kept on guarding and going inside.

This channel is also a very sci-fi sensation. As his footsteps move forward, the natural light source appears, shining up and down. After the passage went forward for a while, it began to be the step up.

Shen Lang, while waiting to move forward, while observing the surrounding situation, has entered the building and has already satisfied him. It is not so important to see the resources of science and technology or the resources of comprehension.

After a layer of stepped passages, there is a sense of ritual of a little pilgrimage. The surrounding area seems to be the wall made of special materials, and it is impossible to explore more situations.

All the way back and forth, about two-thirds of the height of the building, the position is in the middle of the cube, the front step does not continue to extend out.

What appears in front of Shen Lang is a door.

As Shen Lang approached, there was a shadow of the screen in front of the door.

“Respected world god, please put your palm and open it for you.”

Then there is a piece of light that detects the palm of the hand.

They have already arrived here, and Shen Lang will certainly not shrink back and fear, but he still keeps his guard and then reaches out and presses it up.

The screen has probably scanned his avatar and the like, and now the detection area is scanning his palmprint fingerprint or something.

The whole process was very fast, and it was completed in one click. Then the door quickly faded and turned on, and the sound was heard again in the shadow of the light screen.

“Welcome to your return, the respected world god!”

This time, the waves are more and more inexplicable. If the “world god” is the same as the “master”, it is understandable to call him “the world god” by scanning and knowing his realm strength.

“Welcome” and “Respect” can also be understood, but how do you use “return” now?

But now that the door is open, Shen Lang still doesn’t want to be so much, just stepping forward.

After entering, I saw a small enclosed room with a technically-sounded seat in the middle, nothing else.

If Lu Yang and He Lan smile at them, they may be inexplicable. However, Shen Lang has seen the world in the end. Perhaps this chair is equipped with all the equipment for operation.

So he kept his alert and walked over to sit down in his chair.

As a result, after he sat down, the surrounding situation changed immediately!

Originally, he was in a closed small room, but now, the floor of the room is gone, the wall is gone, everything around it is gone, and the chair he sat in is hanging in the air!

The scope of the emptiness seems to extend directly to the entire cube building space, and because the light in the distance is dim, there is an infinite extension feeling, as if it is now in the depths of space!

This place is called the Sacrifice Square and the Temple of Heaven. It will be a simulated universe. It is not surprising. But according to the information, this is to be able to communicate different time and space, which is a little weird Is it possible to sit in this chair and talk to people in different space worlds or different time and space?

Dialogue is meaningless. Then, should this time and space be communicated through time and space?

That sacrifice project can transfer the people in this chair to other time and space?

Shen Lang is full of suspicion, but also a bit of drumming, in case of directly sending him to which does not know where and where the time and space, it is finished. After all, this is the legacy of the ancient times. Even if there was time and space in civilization, I don't know what it is now.

However, since he sat down, he did not disappear immediately. He still had to wait for his operation.

Shen Lang looked around and contacted the smart system that had just "talked" through the holy armor.

"What is this used for?"

"Respected world god, this is to welcome your altar of heaven."

"Welcome to me?"

"It is convenient for you to come back from other time and space."

"Is it convenient for me to come back from other time and space?"

Shen Lang is getting more and more inexplicable, and it feels like a fool to keep repeating, which is really weird!

In the ancient ruins of another world, there is an artificial intelligence of super-scientific civilization, and it is all that I prepared for him, to build him in order to welcome him back...

This is simply no reason!

Was it the time before the room, the upgrade of the Invaders, let the artificial intelligence system in the building, what was modified, and disguised him as the world \*\*\*\* of this ancient civilization?

The system of the small room is more advanced than the intelligent system of the huge cube of the Sacrifice Project?

Chapter 1318 - history? Virtual reality

“You first explain who I am and why I will come back from other time and space.”

Shen Lang is too difficult to understand, and he will not be able to expose the conspiracy of the system. He will ask directly and be alert at all times, so that the system will control him through the Holy Grail.

“Respected world god, you are the only true God in the supreme world. You can transcend time and space, cross the universe, and we all look forward to your return.”

The wisdom system answered the question of Shen Lang more humbly and respectfully.

Shen Lang is really speechless. Its answer is not helpful to him, but it explains what the “world god” is.

In the current situation, should he still be regarded as the “world god” of this ancient civilization?

Shen Lang did not communicate with it any more, but directly asked the holy armor to search for information about the “world god” and select the most recognized and representative information.

If the holy armor does not control the smart system, then you can search for the information from the information transmitted in the computer room and learn about the ancient civilization.

If the current sacred system is already controlled by that intelligent system, the information given to him is the information that the system wants to let him know.

The true and false of this information is that Shen Lang is used to judge whether the Holy Grail is controlled. Of course, it is not so easy to determine the true and false.

Just searching for the existing information, the speed of the holy armor is fast, almost the idea has just given instructions, and the moment has already appeared in the mind of Shen Lang.

“The Great God of the World: refers to the only true God of the supremacy of the whole world. His name is Shen Lang...”

The information in the first sentence of the light made Shen Lang almost scared.

Just this wisdom system has already said that he is the world god, the only true God in the world, but the data that is now searched directly indicates that the name of the “world god” is called “Shen Lang”!

Shen Lang now feels that he has lost his authenticity. Is this system through the Holy Grail and knowing his name, so he prepared such information in advance? Or is it just the time to search, directly present this result?

It is impossible to be the only true God in this ancient world. The name is just called Shen Lang. It just happens to be the same as him. Even his palm print fingerprint can be verified.

Will come here again, will open this building, because of the relationship between the intelligent system of the underground building room. All of this should be its layout!

Shen Lang is in incredible suspicion and speculation, but at the same time he continues to understand the information filtered by the Holy Grail.

Seeing the back, he was once again deeply shocked!

“The world’s great gods and waves can cross the universe in time and space. They are the masters of the world gods and the only goddess of Bi Haihuan...”

What the hell? The goddess of the world god, the only goddess Bihaihuan?

Shen Lang wants to swear a little...

The holy armor was sent by the Bihai family. Bihaihuan also made adjustments for him, and cleared the loopholes that the Bihai family might have left.

In other words, the holy armor system is a world view of the river city, with information about the blue sea.

So now this control of the wisdom system of the holy armor, directly using the set of watershed city state to compose a story, and even compile the blue sea joy into the \*\*\*\* of the world god, the only goddess, and he is the world god.

Shen Lang wants to break out and communicate, but he can only communicate with the holy armor, and the holy armor is as usual, completely obeying all his instructions, and can not communicate with that system.

“I have been away for too long, show me the changes in the world! Compress the time and present the key historical events.”

Take Laozi as a \*\*\*\*\* to fool? Shen Lang secretly sneered, then look at what medicine they are selling.

“Good, respected world god, as you wish.”

This wisdom system of the Temple of Heaven undoubtedly has huge equipment support, and the speed is fast, and it takes almost no time. The “speech” that responded to Shen Lang was just finished, and all the information was filtered and arranged, and then it began to appear.

Shen Lang asked the Holy A to read the materials, which was united and presented directly in his mind. And this system is of course external, so the data it presents is external.

The darkness of the space around the universe, which has become a background of the screen, has begun to have a variety of light curtains flashing, they are scattered in all

corners, let the Shenlang look when they fly over the front The huge presentation, finished and contracted.

Among the pieces of information, the earliest is when Shen Lang and Bi Haihuan fight against the extraterrestrial demon in the Great Rift Valley.

Just seeing these, Shen Lang is also a bit embarrassing.

What surprised him, however, is that there is not much that he knows except this. Instead, there are a lot of pictures that he has not seen before, including the Bihai family, including the rivers and cities, where Bihaihuan is the key figure. , all kinds of pictures have him.

According to the changes in the scene, it is faintly seen that Bihaihuan is getting more and more matureThe temperament changes are getting bigger and bigger. She has a lot of war scenes, and the strength is getting stronger and stronger. Pinch the battleship!

A variety of pictures, photos, videos, matching words, etc., basically tells about the changes and achievements of Bihaihuan.

From the princess-like Bihai family, she became a unique general, and became the female \*\*\*\*\* of war on the battlefield. It became the core and home of the Bihai family and became the leader of the world gods...

Shen Lang began to be angry, and then went to the end, and finally completely stopped.

What he has seen so far is not the information he has experienced in the city of the river basin, but it seems to be the life of Bihaihuan after he left!

The holy armor left with him, and the latter information is impossible. All the struggles, battlefields, creative teachings, etc., may be concentrated in tens of seconds for decades, but they are vivid, like watching movies, and they are like real facts.

Up to now, Shen Lang has been a bit confused and can't distinguish between true and false...

Of course, with the black technology level of the smart system here, the information obtained from the Holy Ghost should be compiled and produced in an instant, and it should be achievable.

But what are their reasons? What is the picture?

The final scene of the freeze is the face of the sea and the sea. Although it looks like a model, it is 20 or 30 years old. However, from the front of so many “historical events”, she is only because of the high inconvenience of the cultivation of the realm, this is already after a lifetime.

Looking at the shadow in front of the sky, Shen Lang remembered the girl she met for the first time in the dead forest many years ago.

Chapter 1319 - The plot? Confused?

Shen Lang did not have any special feelings about Bihaihuan. However, when he was in the forest of death, he was restricted by the medium Lingshi at that time. He searched for a long time and finally met someone, and she was willing to give him a spiritual stone. Not to mention is very impressive.

Therefore, he was willing to teach her the method of cultivation, in return, while Bihaihuan was commensurate with the teacher and sent her personal sacred armor.

I thought that there would be no more intersections. I didn't expect that I would actually go to the river city. Later, after a few times, the time spent there was not too short. It also directly increased the strength of Bihaihuan and changed her destiny.

Before this time, I have already been to a river city, even if I can't go back for a few years, this is not a big deal, unless I can't go back here.

However, later developed a new Kunlun mirror of the Three Realms, basically confirmed to return to the Earth, then naturally can also go from the hundreds of millions of ring to the city.

Therefore, Shen Lang did not think that he would not see Bihai Huan, but now that the system has just released it, it seems that after he left, he never returned to the river city.

According to the “drama” presented here, Bihaihuan is the more powerful a person cultivates, becomes a female strongman of the family, and eventually dominates the Bihai family, and has become a female warrior who may affect other city-states!

Later, he created the world \*\*\*\* and became the only goddess, so that the whole world believes in revering her. And she will spend the rest of her life, and she wants to see Shen Lang again, and regard Shen Lang as the only true God “world god.”

And she should have gone to the forest where hundreds of millions of rings appeared, or outside of Talo, and possibly to the dead forest. But it may not be able to find a way, or have other changes, so that she can not come to the earth world to find the waves.

In the end, she did a “sacrificial project”, perhaps in this world, not just in one place, the purpose is to travel through time and space, in order to find the sinking waves, or wait for the waves to come back...

Throughout this, Shen Lang was very moved. The original girl, who was looking for his life, would never be moved.

But reason has made him understand that this can't be a reality. This can only be a “drama” made up of the wisdom system!

Because the river city, and the mainland of the island, is the same world, that is, on other continents overseas.

The earth traveled to the city of the river basin, and the earth came to the mainland of the island. There was no deviation in time, indicating that the two circles are in parallel, and this should be the same world at the same time.

But now that it is not open to Zhoushan, it is an ancient ruins. Although the information circulating by various factions is vague, the longer it is, the less it is, but at least it should be the ancient world tens of thousands of years ago.

This ancient era, with the dual civilization of comprehension and technology, is still understandable, but how can it be an era with the rivers and cities of the city? Isn't that a mess?

“What about Bihaihuan?”

After a while of silence, Shen Lang asked.

Even if this is a virtual “drama”, he also wants to know her ending, so lonely and old? She has cultivated to the realm of God. It should be a long time. Her family and friends will naturally grow old. She keeps her promise and will not spread the exercises. Only she has a long life. Living alive...

Shen Lang is stronger than her strength, so she firmly believes that Shen Lang must be alive, so she has been looking for him for the rest of her life.

“The Sacrifice Project did not wait for your return. Later, the goddess Bihai went to the Central Fairy Island alone. This is the last trace.” The system respectfully answered.

Bi Haihuan came to the Central Fairy Island? This is the mainland, then she is not on the other side of Zhoushan? Or can’t you enter?

At that time, the city of the river basin, with the most advanced technology, could not explore the mainland of Nakajima, so it was called Immortal Island. She has cultivated into a god, and she should not know how many centuries and millennia have passed. The technology is different.

and many more.....

If it is empty at the same time as the river city, then Bihaihuan is only a few months away from him. It is impossible to have cultivated into a god, and it is even more impossible to be an ancient goddess tens of thousands of years ago.

If the mainland of the island and the city of the river basin do not belong to the same time and space, the era of Bihaihuan is the era of the ancient ruins mentioned here. At that time, the central fairy island of the time could not be explored because it was the future world.

Time and space are completely confused!

This confusion makes Shen Lang difficult to accept. He would rather believe that this is a systematic storyline.

“How long is it now?”

The system is more respectful: “More than 80,000 years. You are the only true God!”

“...”

Shen Lang was speechless for more than 80,000 years!

If you follow this “drama” setting, then he will return after 80,000 years, it is really the life of God, or as the legendary “can travel through time and space” came to 80,000 years later.

“What happened later?”

The system said: “The Sacrifice Project is independent. After the completion of the Temple of Heaven, it is closed. We have no information flow with the outside world. Until today, with your information, the door is reopened.”

“...”

Hearing this, Shen Lang has understood a few points.

The wisdom system of this festival is naturally very powerful and advanced. But after it was completed, it cut off the network. The system of the underground building should appear later, so even if the functionality is not so strong, it has a leading position in terms of information and so on.

So, all this may be that the system is doing a ghost!

But what is it trying? It is just a host in a research institute. Give me the data to dock it! ”

Shen Lang makes the sacred armor present, and wants this smart system to connect with it.

If it is really the smart system to engage in ghosts, this should be one of the attempts?  
Should you show your true face now?

The smart system is very cooperative, and it has been upgraded and upgraded to the holy armor, and the data of the world that Shen Lang wants is transmitted.

After completing this, Shen Lang discovered that he could directly transfer those “dramas” through the Holy Grail, and even if he wanted to know, all aspects and more detailed “history” materials could be mobilized.

I don’t know if this is real or a huge amount of data that is temporarily fabricated. Basically, he went to the city of the river basin. Behind the blue sea, he did not unify the entire city-state and other city-state continents. Instead, he became a world-famous heroine and female \*\*\*\*\* of war. In the end, he became a goddess.

According to the information, the whole process is not simple, it is not completed in a few years, but it took decades. Also because her appearance has not changed, the power is getting stronger and stronger, so her world gods have a great believer.

She basically conforms to the road of creation that was studied before Shen Lang, but Shen Lang is inconvenient to do on earth, she has no problem at all. Her identity and record, coupled with the spread and packaging of high-tech civilization, directly let everyone witness her artifacts.

Generally speaking, if you know a little about cultivation, you can call it a psionic master, not to mention her final realm. Known as the hero, the \*\*\*\*\* of war, to the end of the gods, more and more fans, believers, but also let her accelerate the power.

Chapter 1320 - 80,000 years of change

He can only continue to verify if he is not sure whether it is a system-made story or a real time and space disorder.

The information can be retrieved at random, what about the resources?

The square of this festival can be as large as a city. This altar building is also so large that it can last for 80,000 years. In addition to the level of technology, it should also have strong resources.

His current authority, and he can just arrange it.

Now hanging in the “universe”, after switching the picture, all aspects of the entire building are presented in a “perspective” form.

The search for the past one by one is really made by super-civilized technology, and it should be much more advanced than the river-state. However, Shen Lang’s knowledge of this aspect is limited and he is not interested.

So whether it is a variety of materials, equipment, structures, etc., have skipped, seeing its energy reserves, it really is the most abundant Yuanling Stone.

Of course he will not dig up the Yuanling Stone here. Since this altar has existed for 80,000 years, let it continue to exist.

But Shen Lang is still very awake – all this, it may still be just what the system wants him to see.

Then he wants to search for resources in the comprehension, but the record is not!

If this ancient times, it was really a city-state in the basin, it was not a double civilization of science and technology, but a super-developed technological civilization. Comprehension is only a prototype of a spiritual master.

If Bihai Huancheng is truly a god, it is also made by Shen Lang, and she promised that it would not be passed on to other people, including the people of the Bihai family. The natural comprehension is not recorded in the history of scientific and technological civilization. Bi Haihuan holds the core secrets alone.

However, this does not make sense. If it is really a relic of a super-technical civilization, how can these comprehensions be keen to come?

This is not a casual walk, coming over the mountains, there is a very long distance, the environment is bad, there are a variety of beasts dangerous, more likely to be lost at any time.

It must be said that the first time someone came over, after the predecessors came, there was nothing to gain, how could they leave a record, and how could there be people who came here once in a thousand years? Not to mention the establishment of two Optimus Prime to make a road sign.

There are other relics that should be different entrances and exits, and there will be no relics of different eras.

That is to say that all the information he has now is probably what the system intends to see him!

But soon, Shen Lang realized a misunderstanding.

Time has passed for more than 80,000 years!

Even if the original city of the river basin was only a technological civilization, it still had ample aura, and it possessed a rich source of mineral resources. He also encountered a beast like the iron armor.

Such an environment, once there is no human being, there is no technological means to dominate, let alone 80,000 years, 800 years will be a huge change.

For example, the elixir, no one picks at all, is directly the result of the flowering to the end of the natural “end of life” defeat. And if there is a powerful elixir, it is entirely possible to have a real panacea.

There are also beasts and beasts, even if the number is scarce, hundreds of millions of years, it is enough to let them open branches and leaves, evolve and cultivate into beasts. Even if there is no danger, the beast will eventually die in the end, and the inner neil and the like are excellent resources.

Therefore, even if there are no harvests such as ancient gods and super secrets, these natural comprehension resources are enough to make everyone covet.

If this is the case, the things that Shen Lang can use are limited. Because these are not recorded in the information of the year, they are slowly formed and changed in the following 80,000 years. He wants to get it, and he can only try his luck like everyone else.

However, after all, he still holds the map of the “old times”. Even if the 80,000-year-old battle moves to the sea, he can still infer a positioning and maps through the remains of such a sacrifice project and a deep underground research institute. Matching, at least it will be much more convenient than the average person.

but.....

It has also returned to the question of “time and space disorder” – how can the relics of the city-states appear on the mainland of the island?

Shen Lang secretly vomited a breath, since these problems have no solution, then they will be dispelled first, do not think about it, and then come to it.

He did not think about where there are weapons and equipment, even if this is a later era, more advanced, but after 80,000 years, can you use it? The system can be upgraded. After all, it is only the software side. The holy armor is improved, and the advanced algorithm makes its hardware better optimized.

But the other weapons that were left in the past were purely physical hardware, and 80,000 years ago had already broken the copper.

There is also a message, that is, this offering of the Temple of Heaven, suspected of really reaching the shuttle time and space, is probably a transmission of technology.

However, it is only theoretically possible, and there has not been any experimentation, so their existence is also waiting for the goddess Bihai Huan to use it to go to other time and space, or one day the world \*\*\*\* will return from here.

For this, Shen Lang will not try, after all, it has not been verified more than 80,000 years apart.

So after thinking about it, he decided to leave here first. Go outside and look around to see if everything is really as described in the information.

The data in this system has a lot of secrets about the Sacrifice Project, but it is closed after completion, and many of them are not as good as the system in the computer room. However, the system level is not enough, or because of the early withdrawal, the knowledge is limited.

For this ruin, is it the tip of the iceberg of the city-state, or any other problem, you need to explore yourself.

The “world god” is leaving, and the system is of course a very good attitude.

However, when Shen Lang came out, it was a matter of heart. When I came in, I was expecting it, but I never thought that I would give him a “surprise” of such a time and space.

The great \*\*\*\*\* of the world...

After coming out from the inside, the door was closed again, and once again, there was no trace of the wall.

Where are you going now?

He now has a variety of maps, but this is a map of 80,000 years ago. It is no longer the right one, and he doesn't know the truth.

Shen Lang looked up and looked at the top of the building!

“You really eat a single food.”

As he looked at the past, a voice came over, and then a figure quickly flew down from the top of a few hundred meters high.

Yao Chi mysterious girl.

Shen Lang was a bit surprised. The time he was inside was not too long overall, and the speed of the process was extremely fast, and the route was a turning point. The mysterious woman can actually get here so soon, even if she is coming straight, it is very fast.
