

First Strong 1361

Chapter 1362 - man of Steel

Shen Lang did not know what Gao Qiuqiu did, but probably guessed it.

It's no coincidence that the cold autumn will appear here!

He may also come for the ruins of the ruins, and then the situation of the flame giant, so after the ruins have been visited, guard here to wait for it to recover!

At the beginning of the Qiulin Sword, Gao Hanqiu was in the abyss of the Houshan retreat, where the temperature is very high, with a large number of fire spar.

This side shows that no matter what his practice was in the Tianshan Jianzong, he used the sparkling energy to improve.

Now this flame giant should have the same purpose, and it may be a bit small compared to its energy.

If the cold autumn road passes the sign that it is waking up, the harvest waiting here is the biggest for him.

Just as he shot the Flame Giant, he let the countless flames go out. It should be to take away the source of energy in the giant body.

The giant of the flame can reach the height of a few kilometers of mountains, and the range of the flame is also huge. The source of energy that can be created and supported is inevitably a precious and rare treasure.

Not only the sinking waves, others should be able to guess.

But no one said anything, this flame giant, but Gao Hanqiu shot, or else they have to escape. Besides, even if this thing is given to them, it may not be able to be used.

It didn't take long for Gao Hanqiu to come back.

"This flame giant may be an ancient race, and it does not know whether it will last. But its destructive power is too great, it will mess up the mountains. Once you leave the mountains, the rest of the world will not be opponents." &1t; /

Gao Hanqiu simply said a bit, it is said that he killed this flame giant, not just for the benefit, but for the world.

Of course, this is to explain to Shen Lang that other people can't do it.

"I have also seen it in the past! This is a rare life after all."

Shen Lang does not care about this. Just like the appearance of a prehistoric Tyrannosaurus rex on the earth, animal protection, genetic research, etc., it will feel like it should be protected like rare animals such as giant pandas.

However, it will rush into the ordinary people's settlement city, and it can't be controlled. From the perspective of ordinary people, it should be decisively killed to avoid death and injury.

Shen Lang is indeed curious, because he was so close, and there are dozens of meters of flame parcels, unable to find specific information. And for the missile can not kill it, still want to know what the structure is.

"Let's go check it out! It may be ruined later."

Gao Hanqiu nodded, and what he wanted has been taken away. Others have long-term knowledge for everyone. Who knows if this is not the case? I can't rely on him alone in the future.

The huge flame has stopped, but it just stops the fire, and many of the original burning continues. Ice and snow are burned and a lot of water mist is also emitted.

The giant reached a height of three kilometers, but now it has fallen, that is, a lot of hundreds of meters.

Shen Lang landed in the past, waved a gust of wind, dispelled the white water mist, and let the giant's will be presented.

In addition to the high cold autumn, including Mo Feiliu has passed. Because the scope is huge, you don't need to be in the same place. You don't need to wait for someone who is the first to go in different directions. Of course, you want to see if there are any good things to get.

Shen Lang is looking at the whole situation and is not directly approaching.

He wandered around in the outer air, keeping a scan of the huge remains, the naked eye, and the sacred is also a full-scale scan close-up.

Go down and let him stay for a long time.

This is not an ancient race, but a giant robot with reinforced iron bones!

Although the cold autumn is also from the earth, when he came, hundreds of years ago, the earth has not yet entered the modern scientific and technological civilization, and all aspects of the vision are very limited.

Therefore, he can only classify to the ancient race according to his own traits and this special environment.

The Shen Lang is different, not only the scientific and technological civilization of the earth and the river basin, but not long ago, in the ancient ruins, it has witnessed the traces of all kinds of science and technology that were 80,000 years ago.

This is a robot, which has a huge body of two or three kilometers, and can be explained. After all, as long as there is no technical problem, it is just a pile of material.

The body of flesh and blood, to grow so large, has all kinds of natural problems.

Since it is a steel giant, it is normal to be able to tear open the mountains and be able to play around at will. The beam of light emitted by its eyes is actually similar to the use of laser weapons.

Because it is the body of steel and special metal, even if the bombing of a missile is just to make it deform, it will not be seriously injured.

Through comprehensive observation, it is basically certain that the sword of the cold autumn is actually very crucial, and the key joints of the torso of the skull have been cut off.

It is equal to cutting off its energy supply, or else, even if it cuts its head in half, it can continue the battle.

This also proves the extraordinary power of the Great God!

Just a few tens of meters of flame, blocking the investigation, Shen Lang can not get more information even if it is close, and Gao Hanqiu, does not understand the robot, but can accurately cut off in a hundred miles, it is obvious that he is Completely clear.

Now there is a problem with Shenlang This huge robot is not the ancient world in the ruins?

According to the river city state he has been to, he can create a variety of spaceships, and there are all kinds of robots that can be manufactured with technology. Just from the situation just now, this should be a war machine!

In the watershed city states he has been to, it should not be allowed to have such “weapons” out, and the information obtained in the relics and wisdom system, behind the city-level big 6 war, is likely to appear.

If it was of that era, but it is now buried in this mountain, not in the remains, is it out? Is there still an entrance to the ruins?

These are not known, but the mountain peak is probably the accumulation of tens of thousands of years after it landed. So it wakes up and smashes the mountain, just shaking off the dirt that falls on the body.

Are the monsters such as snowmen nearby hiding in the gaps in their bodies? This is like an internal cave in the mountain.

And are they formed because of the variation caused by radiation?

These mysteries have no answer. After Shen Lang inspected it, it was close to the past. But he is not looking for resources that others feel good, but looking for a control system.

Gao Hanqiu first cut off the main connection, and then took the energy core, but the giant robot is still not dead. As long as its control system chip is still there, it is equal to the soul still.

Chapter 1363 - Deformation robot

Such a huge robot, of course, what controls the chip, of course, will not be a single, but a lot of collaborative processing. Shen Lang is still estimating, looking for chips that are probably “heart” parts.

Between the steel skeletons that are still hot and hot, the legend of Shen Lang came into its body.

This main control chip, naturally connected to the source of energy, has now been disconnected. However, Shen Lang is not worried. A system like this will inevitably have backup energy. It will not last for so long, and it is not so strong.

After approaching, Shen Lang has already seen it. This is a set of chips. The combined area is estimated to be several tens of meters, but it is not the shape of the heart, but attached to different skeletons.

The person who looks like the design is also considered to be the target of the attack. Since it is built according to the human structure, the heart and the brain will be the key targets. The thick bones will be ignored.

He now uses the sacred armor to contact and control the steel giant’s control system.

If it is an era, then according to the previous system information, Bi Haihuan was once the goddess dominated the whole world, and he is the only world god, with the highest authority.

“Through permission.”

“The Killing Warrior 377 suffered damage and requested support and repair.”

“The Killing Warrior 377 suffered severe damage, requesting support and emergency repair.”

After the communication, the feedback information immediately confirmed the conjecture of Shen Lang. This is indeed the world of the river city, which is leaked from the ruins.

“I can’t fix it for a while, is there any other backup solution?”

Shen Lang asked about it through the holy armor.

This super giant robot should be the war machine named “killing warrior”, and the 377 is probably its model, or the 377th generation. Now it is a big hit, and if it can be recycled, it can be repaired.

But the world has died for more than 80,000 years. How could Shen Lang fix it? Even if there is, he has no such thoughts and interests.

However, since he can control, he also asks about the backup plan – in fact, this is a temptation. In case it has a self-destruction procedure, it will explode on this scale, and it will be destroyed and ruined.

“Backup plan 1: Open the destruction program.”

“Backup scenario 2: Turn on the sleep mode.”

“Backup scenario 3: Turn on lean mode.”

The destruction program is in the first sequence, which really makes Shen Lang feel a bit shocked, and has to look at it, or else its energy core has been taken away. If the explosion is destroyed, it will still be enough for everyone to eat a pot.

Of course, except for the mysterious woman, the others are all above the big fairy. After all, it will only be a wolverine. It is unlikely to be killed.

Destruction is well understood, and the sleeping mode should be that it has not changed in the mountains for tens of thousands of years before, so it is really lifeless. This is a closed self-protection, to avoid getting more information from the enemy.

Shen Lang will definitely not choose the first two options, followed by the streamlined mode, but also look at the specifics first.

However, the data that was transferred is a large number. It is too late to look at it one by one. Only the key points can be refined through the Holy System.

“Lite mode” is actually an escape mode!

With such a huge scale, it is very difficult to escape, and the target is too big. The missiles are aimed at it.

It has already been hit to this extent, and it is impossible to escape normally. This is similar to the plan of the golden hull.

After confirming that there will be no harm to the surroundings, Shen Lang directly let it start the Lite mode.

Then the steel giant, who had already collapsed, began to change rapidly.

This change has caused everyone to quickly retreat a little distance, that is, the attention of the cold autumn has come.

Then in the incredible eyes of the people, the two or three kilometers of huge robots began to have some devices falling off, some of them were quickly shrinking, and there were many deformation folds.

Since it can be regarded as the “escape mode”, the streamlined process, of course, is very fast, and whether it is contraction or deformation, it is dazzling.

However, in just a few seconds, many large parts that cannot be deformed have been abandoned. Before some of them are still falling, they have been reduced by hundreds of times, and they have been recombined into robots with only a few meters!

Just after the change, let the cold and the autumn are vigilant. Waiting to look at all this, everyone is stunned!

The robot that re-simplifies the deformation combination falls in front of Shen Lang and waits for him to give orders.

According to the plan, after streamlining the mode, it is started to escape. However, there will be remote control. Now, the higher authority is in the swell, so it is the order to wait for the swell.

There was also the sound and fire of huge steel falling around, and everyone came close, and their eyes were attracted by this strange “squat”.

“Sir, this is...you let it change?” Mo Fei couldn’t help but ask.

Obviously, everyone is curious, his master is also curious, this can not let Master ask, so he first asked.

Shen Lang smiled and said: “This thing and the ancient ruins opened now is an era. I got some operations in the ancient ruins, I just tried to control it.”

During the conversation, Shen Lang has taken a thread to install this new robot and replace its backup energy.

Although a spiritual pulse is not comparable to its original source of energy, it is also a very powerful energy source, enough for it to remain in use for a long time.

Then Shen Lang directly manipulated its deformation, from a few meters to tens of meters, a hundred meters, but did not continue to become taller, and finally let it retract to a few meters, and then into the space.

“Lang brother is a wave brother! Even the ancient ethnic creatures can conquer, I really admire!”

There is nothing wrong with the cold autumn. After all, he knows that it is limited, and Shen Lang was originally his boss.

“This is a ... mechanical swearing, has all the power, wisdom is the same as people, even stronger, but this is made by people, or controlled by people.”

The words of Shen Lang are simply suitable for the interpretation of this era, so that everyone is stunned. I did not expect that in ancient times, it was already possible to create mechanical swearing, which is almost going to catch up with God to create people.

Xu Haoyue and Count Dracula wake up, this is the robot they know on Earth! Just advanced, I don't know how many times.

Everyone is convinced of this explanation. And he used to be in the warehouse of the “Ancient Xiangong”, the two big fairy and the flowing clouds have seen them, and the mysterious woman knows more.

“When the fire is gone, there will be a lot of dark creatures coming back. I will rebuild this rest point!” Gao Hanqiu observed the surroundings and immediately went back to the Death Valley.

Everyone confirmed that those rest points were built by the great gods of the past.

Chapter 1364 - Cross again

The first three hundred and sixty-four chapters cross again &1t;

Gao Hanqiu took on the responsibility of a great **** and rebuilt this foothold. There are still people out there, and there are still people who want to go into the mountains. If there is no protection, the risk is great.

Then everyone left together.

Although the Great Immortals, including Shen Lang, don't want to hurry in the dark, so as to avoid unnecessary troubles, but now it is different, and walking with Gao Hanqiu, everything is not a problem.

When everyone comes out to the entrance of the two Optimus Prime, it is still early from dawn. However, the situation outside is much better than that in the mountains. It is a brilliant star, so that the surrounding is not gray.

At the entrance, it is time for everyone to part ways.

No matter the two big immortals, or the two people in Yaochi, they are not climbing high and cold autumn, and there is no small gap between them and Mo Feiliu. This is also the right time to meet them.

Therefore, everyone is interested in saying goodbye to the cold autumn, and then left.

“What do you have for Lange? Is it better for us to bury for a while in Zhoushan?”

After they left, Gao Hanqiu made a suggestion.

Obviously, he had already planned to practice in Zhoushan, and he has now got the resources he wants. The environment of Zhoushan is definitely better than that of Tangcheng. Just because it is too far away, it may only be a time to come back to retreat when it hits a higher realm.

I didn't say it directly in it. I just kept the style of the seniors and brought them out. It didn't take much time for him.

When talking in the cold autumn, there is no such thing as Mo Fei, they are quietly listening.

Shen Lang slightly hesitated.

“This is indeed a good place to cultivate. It’s hard to come here. It’s really a good time to retreat for a while.”

“But?”

In the end, Gao Hanqiu still knows him. Although it is separated by hundreds of years, everyone is still a bit separated, but still can know exactly that he has a turning point.

“But I still have to go back.”

Shen Lang smiled and said: “There are still some things that can’t be put down.”

“Understand!”

Gao Hanqiu showed a tacit smile.

The last time in the autumn forest Jianzong, Shen Lang’s side was followed by a canoe. There is no such thing as a beautiful woman. In his view, it should be that this world’s brothers are re-being, young and full of people, and men and women.

Xu Haoyue showed a smile of fascination. When he was in the forest of death, he saw Shen Lang carrying a lot of beautiful women.

“You guys! I don’t fix it.”

Shen Lang didn’t have a good smile, but he didn’t correct anything.

This time he is not really unable to let other people, but only for more than a month, it is nothing. Now he wants to find out the situation of Bihaihuan!

First of all, we must figure out whether we can enter the city from the earth, the world is still the same era, or it is already 80,000 years later.

Even now, there have been examples one after another. He still wonders if the system is making stories. It is unbelievable that Bihaihuan is already a young goddess of 80,000.

However, this is not known in Gao Hanqiu. Others don't know, and they don't know how to tell them.

"Then I will not leave you more. I am going to take them for a while without Zhoushan!"

Gao Hanqiu did not have any politeness with Shen Lang.

The last time I met, everyone was very excited. But I have been living together for a while, and now I will see each other again. Shen Lang has already reached the realm of Daxian, which means that there will be more opportunities to meet in the future.

After that, Gao Hanqiu took a few of them and re-entered from the entrance and entered the mountain.

They are going to retreat somewhere, Shen Lang does not care, safety will not be a problem, and there is nothing in the cold autumn.

Now he is left alone at this entrance. I think it was a little embarrassing here a month ago.

Because it is night, no one will come out from the inside, Liu Yunxian and others have gone far, and Shen Lang has no place to change. He directly took out the Kunlun mirror of the new Three Realms.

This artifact has been verified and can be traversed directly from Earth.

Now I just want to see if I can directly cross the river city!

When Shen Lang was manipulating, the idea directly locked the water city city of Tiancheng, and accurately reached the tall building in the blue sea family.

Soon, he realized the massive consumption of mental energy before, but there was an accident, he was still on the edge of this mountain!

The consumption of mental energy, that is because the need to start this time and space to cross, indicating that it has indeed been successfully launched, but people did not leave, it means that it eventually failed.

This makes Shen Lang frown.

The earth is in a different space world, and it can pass through success. The city-states that are different from the world in this world can't shuttle successfully.

Does that mean that the scene in which his mind was locked is the river-state that was more than 80,000 years ago, and now it no longer exists?

Whether it is the door of the Three Realms or the Kunlun mirror, it is said that it is time and space, but in fact it should be said that space is not time. So after the merger, the same is true for the change.

If so, it means that it can't take him back more than 80,000 years ago.

Because the spirit consumption is not small, even if Shen Lang now has the spiritual power of Daxian, he can't stand the trial again and again.

He still decided to go back to Earth and then enter from the hundreds of millions of ring arrays.

This is also the only way he has determined. The ancient transmission line outside the city of Tallow in the West was considered to have invaded the earth. After returning, he personally destroyed it.

In the dead forest, although I saw Bihaihuan there, it is not clear where they came from and how they came in.

This mystery plagued Shen Lang, and in order to save time, he did not go home first. Once again, I locked my mind on the cliff.

With the consumption of mental energy, there have been changes around Shenlang.

At a closer look, the place where it is now is on the edge of the cliff.

He immediately collected the Kunlun mirror of the Three Realms, then descended the waterfall river and passed through the jungle to enter the underground river inside the mountain.

Come here again, it is already a light car.

He has been opened several times in the hundreds of millions of ring arrays hidden inside the mountain. But this time, it was not easy and casual, but it was a bit nervous.

He is very worried that the opposite of this formation has been destroyed!

In that case, it is impossible to enter the river city, or it is also a description of what happened to the river city.

The current realm of Shen Lang is far better than that of the previous two times. The degree of breaking is faster and it will soon reach the last one.

Chapter 1365 - Goodbye Bi Haihuan

When the last layer was cracked, Shen Lang appeared again in the forest!

The space portal that saw the cover of the array was still there. It seems that it has come to the river city, and Shen Lang is a little relieved.

However, he is still not sure whether the world of this river basin is now the one he is familiar with, or 80,000 years later...

The system of the Holy A, after the arrival of the world, automatically search for the connection network, and then upgrade some programs that can be upgraded in the scope of authority.

But this time, there was a reminder that the upgrade was wrong!

Shen Lang didn't care too much, because the current system of the sacred armor has been upgraded in the ruins of the Temple of Heaven. According to the statement, it is a more advanced procedure of later generations. It is already earlier, The error is also normal.

He now used the sacred armor to search for the time, the world situation, and the situation of Bihaihuan.

The Holy A system quickly presented relevant information.

Seeing this, Shen Lang finally got a sigh of relief.

The world that comes in now, or the world he is familiar with, coincides with the time of departure, which is the normal past few months. And Bihaihuan, still popular, because last time became a heroine.

However, this also makes him a bit confusing. If the Earth time is used as the reference standard, the Earth and the time of the Nakajima 6 are parallel, and the time of the Earth and the rivers are parallel. The Nakajima Grand 6 and the watershed city-state are the same world, and they should have been parallel—and have always thought so.

But how can it be different for more than 80,000 years now?

In the absence of Zhoushan, I can cross the earth, but I can't reach the city of the river basin because of the time difference?

In this case, it can only show that the earth crosses the two time and space that connects the world!

Now that he is based on this land, the Nakajima Big 6 is still a wild age? Or there are other comprehension civilizations now, at least with the cold winter they are in, not an era.

Why is it so strange, Shen Lang does not think about it anyway, anyway, the problem of time and space, scientists have not yet studied clearly, the watershed city state is leading so much, the research is limited.

Since the world is still the same, he will be relieved. At least he will see the present blue sea, not the goddess who will find him in the future.

A few, the holographic avatar of Bi Haihuan appeared, she came to call.

Shen Lang came because of her, although it has been proved side by side, but still want to see her. After all, the image of the goddess that was known to the system 80,000 years ago is indeed a bit sad.

So he did not hesitate and connected directly.

“Teacher, is it really you?” Bihaihuan is like every time, it is such a happy surprise.

“It’s me. Hey...”

Shen Lang is also very happy, seeing her all the time, showing a happy smile.

But look carefully, but it is a bit embarrassing, because Bihaihuan seems to be bathing... She is setting a special reminder for Shenlang, and whenever I see it, I will know it for the first time, just like before.

And she has the news of Shen Lang, always the first time to confirm. On the battlefield, even if you can be distracted, the war in front of you will remind you to pull back the status quo. But just just bathing, not so much, the first time rushed to contact.

“So what... you are busy first, wear clothes first...”

Hearing this, Bi Haihuan reacted, and he was shy, sorry, and rushed to wear the clothes first, but did not remember to close the communication first.

Although the scenery is beautiful, but Shen Lang is a gentleman, first cut off the call from here. In fact, he can close the screen, but that is what he knows on his own, or break the call.

Bi Haihuan was quickly dialed over again. She obviously ignored it and wiped it. Then she simply came over with a bathrobe and could still see the exquisite figure.

Moreover, the beauty of this vacuum state is more than a complete presentation, and it adds a little more temptation.

Bi Haihuan, like before, has arranged the fastest spaceship to pick him up, and then avoid the boring waves, she connected to chat with him.

This somewhat makes Shen Lang a bit embarrassed, except that she now has the appearance of hibiscus, but also from the ancient ruins, she already knows her longing for her mind.

Fortunately, there is no such thing as the current Bihai Huan, especially when I see Shen Lang, I am very happy. He is comfortable with a few sentences. She is very satisfied and has not noticed that he is a little different this time.

What surprised Shen Lang was that it didn't take long for a spaceship to come!

Then he interrupted the contact of Bi Haihuan and sent him to Tiancheng by the spaceship.

After asking up, he only knew why.

It turns out that he has recently emerged from this forest, so that the Bihai family also attaches importance to it. In order not to sin him, he has not checked it one by one. Instead, he has blocked a large area around him to avoid idle people entering .

To do all this is to arrange a military stronghold directly on the edge of the forest.

Bihaihuan arranged a ship with the fastest speed and was on standby. The task of this pilot and the spacecraft was to wait for the waves, even if there was no mission for one year, only to send the waves at the fastest. To her.

With the technology here, even when the spacecraft is flying high, it can communicate. However, Bihaihuan did not wash before the shower, just afraid that he was bored, and could not always accompany him to chat.

She is so looking forward to and paying attention to Shen Lang, of course, it is also a good dress to dress up.

On the road, the calm waves that have been relieved, but have time to think about it, should it affect the history of history?

According to the history of the remains of more than 80,000 years later, after all, I did not come back to the world after all, whether it was coming or not. After that, it was to let Bihaihua concentrate on cultivation, and after the city-state war, it became a hero, affecting the whole world. She became a goddess, and it was invincible and could affect the control technology.

In the end, the creation of the teaching, the Shenlang was pushed into the only “world god”, using the influence, built a hugely unparalleled sacrifice project, and launched an in-depth study on the passage of time and space.

These are already established history. He is here now and has not affected history. But if he takes Bihai Huan away or tells her about what will happen in the future, it may affect the course of history.

He came to this world and helped Bihaihuan become a master. It has already attracted the butterfly effect. If you upgrade it again, will it directly affect the balance of the world?

The chaos of time and space collapses, will it be because of him?

Chapter 1366 - Bihai Huan's surprise

When the spacecraft arrived at Haotiancheng and landed at the base in the city, Bihaihuan was waiting to be waiting. Later, to the Bihai family, it is necessary to go to another special aircraft.

“teacher!”

Looking at the dark waves, Bi Haihuan's eyes are shining, and I can see that I am happy from the heart, although everyone has not been away for too long.

Then I saw the blue sea joy of young and young, and Shen Lang also showed a happy smile.

On the day of the rituals of the ancient ruins, I saw that she had become the goddess in the future. I don't know how long it was, it was very embarrassing.

This feeling has nothing to do with the feelings of men and women, just like the earliest in the Pingxi City, now Zheng Man's burial palace, learned the experience of Zheng Man hundreds of years ago, but also made him quite embarrassed.

Compared to Zheng Man, who is just a follower, Bi Haihuan is of course much more important. In addition, when he was in Nakajima, he also had a long retreat in the space of Tianshu. From a feeling, it was not a few months, but he had not seen her for many years.

"How come you?" After the aircraft was on, Bi Haihuan asked a little curiously.

"Not welcome?"

"No, no, of course, I am very happy, but every time you come over, it seems that there is something, just like the last time to help me. So I guess..." Bi Haihuan explained quickly.

"This time I came to see you specifically, miss you."

Shen Lang is naturally said, this is his intention, not even with the old friends Gao Hanqiu, they have to wait, return to the earth did not go home, directly rushed over.

However, after this was said, he realized that he was a little embarrassed.

Bi Haihuan really blushes immediately, but the whole person is more excited.

"You, you are really... I am so happy!"

Shen Lang slightly stunned.

On the way, he always thought about it, and he did not decide whether to tell the truth to her. Because it is not the two of them, but it may directly affect the historical process of this world!

Emotionally, he is not willing to look forward to the process of his long journey; from the intellectual, to change the process of a world, what kind of butterfly effect will be introduced, he is still cautious.

Of course, Bi Haihuan did not have this point. Her whole person was very excited, but the subtlety of the girl made her not be able to express it too directly. She could only talk to him and tell him about his departure.

With the last battle of the battle, and then through the packaging of the Bihai family, her princess-like Miss Bihai family has become a well-known female hero, an idol who is loved by the public.

After all, in addition to being noble, she is still young and beautiful, and is not between the city-state and the city-state. She fights the enemy of the Terran, and is a terrifying alien in the history.

Therefore, after the fermenting of these days, the influence is not only the city of the river basin, but also spread to other city-states and other big cities.

Of course, this is indispensable to the behind-the-scenes push of the Bihai family, but it also meets the political requirements of other city-states. Such a person comes out and, to a certain extent, can act as a peace ambassador, avoiding the escalation of some small-scale conflicts to the extent of war.

In fact, Bihaihuan didn't know much about it. Before Shen Lang had already talked directly to Bihai Chuntang, they wanted to create God in disguise, and shaped him into the messenger of God from Xiandao, while Bihaihuan was a secular Spokesperson.

The information that Shen Lang now has is their "history of the future". It is clear to know that in the future, the creation of the blue sea is the foundation of the present!

It seems that the road ahead will still follow this exhibition.

For the current Bihaihuan, of course, this is not clear, and there is no world-class ambition. She even complains a bit and feels that the propaganda is excessive. And she is also taking advantage of the opportunity to promote the key role of the teacher.

It can even be said that if she does not want to spread the teacher's merits, she may not cooperate with so much publicity. Of course, these are not directly related to Shen Lang, and they seem to be inviting.

"Teacher, the way you teach me is really good, but you still don't have to practice with me."

"That is natural. But I can't stay with you all the time, or you need to work hard."

Bihai cheerfully nodded: "I understand that with my strength, I am far from being able to follow the teacher. I will work hard to improve my strength. But if you look at me, is it a little progress?"

Because Shen Lang has now advanced to the realm of Daxian, it is not so sensitive to lower-level changes.

However, after Bihaihuan said it, he immediately noticed that Bihaihuan had already reached the middle of the realm!

The last time I was here, he took the blue sea joy in the space of the heavenly book, helping her to improve in a hundred times of time, until the beginning of the realm of the gods.

What he was thinking at the time was that, in the capacity of Bi Haihuan, he had the strength of the early days of the transformation of the gods, and it was enough to cross the city in the basin. And this strength can also make the Bihai family absolutely value her.

However, after the transformation of the realm, I want to rely on cultivation, even if there is no shortage of Lingshi, it is not a short time to advance, unless there are more good resources such as Yuhuatao.

However, Bihaihuan himself has actually cultivated into the middle of the realm of the gods.

That's really not easy!

It is necessary to know that the greatness of the earth on the earth breakthrough into the medium term, it may take decades. Even if it is in Nakajima, it will not be so fast.

The environment here is better than the earth, she also has enough resources, but from the qualifications, she does not have the innate conditions like Rain and Zheng Yumeng.

"You have progressed through my expectations, how did you do it? Day is also practicing?"

Seeing the astonished look of Shen Lang, Bi Haihuan was quite gratified. Her efforts were to prove in front of Shen Lang that she did not rely solely on him to practice, and she still had certain achievements.

"I found a way. Did the teacher not take me to a special place last time? The time lapse there is different..."

Shen Lang listened to her heart, "And then?"

He always felt that something was happening, but he couldn't think of it for a while.

"I think the teacher is really amazing. The way I think of it is something others can't think of. So I mimicked you..."

Speaking of this, she is a little embarrassed, as if she had not been allowed to imitate.

"I have also designed such a place, although it is far from your effect, but it can also delay more than ten times." Bihai said weakly, and looked nervously at the waves, fearing that he was angry.

Shen Lang is wide-eyed.

"You... designed such a place?"

“No, no, it’s actually a lot worse. I made such a room. It’s not me alone. I gave a plan and let a group of scientists study it.” Bi Haihuan explained it.

Shen Lang captured what he just thought!

Chapter 1367 - Space prototype

It turned out that Bihaihuan actually designed such a space!

Can be more than ten times slower, she is also equal to a few years have not seen, no wonder so excited, no wonder the progress is obvious.

just.....

Before Shen Lang got the golden sky book, he had such a hundred times of space, but he did not know its origin, but he could only be sure that it appeared on the earth in ancient times.

But no matter how many different ethnic groups on the earth, there are no similar legends. From the book itself, there are no traces of clues.

Now I heard the words of Bihaihuan, but he was involuntarily connected.

In such a short period of time, she was able to design a tangible “room”, which was a dozen times more effective through space technology. It is already amazing.

If you give her decades and more scientists to participate in the research, it is not impossible to design and manufacture the “golden book”!

If this is not the case of the ancient ruins, Shen Lang will not have such a connection, can only marvel at her bold ideas, and the research and execution of scientists in space technology.

But the system of information in the Temple of Heaven allowed him to know what he had later, such as his “world god”, who still had the highest authority in the civilization of more than 80,000 years ago.

Then you can't help but doubt, will the "Golden Heavenly Book" be left by Bihaihuan?

She is likely to have visited the earth, but it is the earth of the wild age of more than 80,000 years ago, and naturally there will be no traces of the waves. And that can tell the passages of the two ends of the earth and the golden book, it may be because of the legacy of that time.

In the later period, the goddess Bihaihuan may not be just a gold book like that. It may be that she spent thousands of years searching for the world of all parties and finally arrived at the earth, but the time is not right, so she has no way to reverse it. And eventually fell to the earth.

As for the Golden Heaven Book, at that time he could accept the integration so smoothly. It is very likely that, like those smart systems, he was injected with the highest authority by Bihaihuan, and he felt his "world god" and naturally integrated.

"Sorry, I am infringing on your rights..."

Seeing Shen Lang watching her for a long time, Bihai was nervous and apologized.

Their world can be exhibited to such a level of civilization, and it is very respectful to intellectual property. Just like the basic exercises given to her by Professor Shen Lang, she was not allowed to teach her relatives of the Bihai family.

The behavior that is now imitated is naturally wrong. At that time, she did not know how long it would take to see Shen Lang again. It may be that after a year or even a few years, she started work in order not to delay so much time.

It is also because of respect, so now it is frank.

"No, no, no need to apologize. I just surprised you with your wisdom and talents. You can design a similar one by relying on one. You have never understood, nor designed, just knowing a creative idea. Nothing infringes on my power."

Hearing the comfort of Shen Lang, Bihaihuan was relieved.

“It is not my talent. Scientists have been studying space technology for a long time. I have only given them a directional turn.”

Even if Shen Lang is not pursued, she is still a bit embarrassed.

“Very good! You have a lot of ideas and great ability. After going back, I can let you study it and see if you can upgrade your room.”

“Thank you, teacher.”

Hearing that Shen Lang is really not blaming her, but also to help her improve, Bi Haihuan quickly thanked.

Shen Lang is secretly feeling at the moment.

The butterfly effect has emerged!

Because he knows Bi Haihuan and came to this world, the help of Bi Haihuan has affected the progress of this world.

If everything is true, then the world exhibition will be able to cross the space, but in time, this is the world more than 80,000 years ago, whether it is the reappearance of Nakajima or the left earth, A distant past.

The ancient ruins of Zhoushan, which is not on the island, have affected many of the sects of the Nakajima University. Whether the Golden Heaven Book and the underground passage have any influence on the history of the earth do not know, at least now it affects the Shen Lang.

Now that it has reached this level, how much influence can it affect?

The current earth, once and for all, can prove that it can enter the Nakajima and the river-states, all of which are different spaces at the same time. On the contrary, this same world has a time gap of more than 80,000 years. The problem should be here.

Nakajima Grand 6 continues to have “flying up”. Several hundred years ago and last year, there were two waves of collective shuttles, and there was no obvious impact. That problem should be here, that is, the impact of Shen Lang.

If the deviation of 80,000 years is huge because of him, then if it is exerted, will it return to the orbit?

Originally, Shen Lang was a bit entangled. Now that he knows this, he has made a decision!

When I returned to the Bihai family, Bi Haihuan went directly to where she lived.

They have received news from Bihai Chengtian and Bihai Chuntang. However, under the inability of Shen Lang to express their desire to see them, they can't be too hasty and can only wait and see.

“That room is here Are you going to see it now?”

Even if Shen Lang is not pursued, Bi Haihuan will take the initiative to talk about it, let Shen Lang go to the scene to see, she will observe the words again, if he is still not happy, then it will be dismantled.

“Alright.”

She lives in a building of dozens of floors. If she wants to build a room, of course, she can arrange a layer at will, and it will not affect her residence.

Coming to this layer, Shen Lang immediately has layer protection here!

Because this area is already the living area of the Bihai family, the surrounding area is also heavily guarded, and there will be no outsiders. But there are so many people in the Bihai family. There are one building for the immediate members, and one for the ones.

Usually, everyone rides on a small aircraft and can fly directly. There are some floors on Bihai Huan, and there is no limit on it. It needs her verification to get in, of course, because of that room.

In other words, even if she used the family resources to build, she did not hand it over to the family. She is still alone.

However, Shen Lang did not care much. This is not like the practice of cultivation. It can be enjoyed by individuals. It can be done by advanced technology. It must be done by many scientists. Even if the sea is not happy, the Bihai Chuntang can also be from scientists. I know everything there.

In the middle of this layer of protective layer, there is a special room. It seems to be transparent, but after they enter it, they feel the same as the outside world.

Shen Lang is now rich in experience in Tianshu space. It can be clearly felt that this is the design of the imitation of Tianshu space, but it is very rough. Just like the master paintings and the newcomers imitate, but already have the prototype!

Chapter 1368 - No logical truth

After the personal experience, let Shen Lang more confirm that the golden book he owns is probably the product that has been upgraded in the space of decades and hundreds of years later!

Although he has only seen two such, there is no more data comparison. Even now, he searches for information in that era through the Holy Ghost, and there is no record of the Golden Bible.

But it is giving him such a feeling.

“Teacher, I will...” Bihai’s weak and weak mouth asked.

She already had a decision. Although the teacher said that she didn’t care, she could even let her study abundance. But after talking about this, she was always distracted. Obviously, it was said to him that he should still be unhappy.

Shen Lang interrupted her: “This is a prototype, but in the future, it will certainly develop into the same space as mine.”

“Well, I will terminate it.”

This is heard in the blue sea, but it is another layer of meaning – you copy a rough one, it is no problem, but if you can gradually improve the same as the original, it will affect other people’s rights and interests.

“No, no, can’t terminate.”

Shen Lang felt a bit. In this space, it will not be monitored by the outside world, and it will be released directly.

“This prototype is probably the prototype of my space. If you terminate it, I may lose it.”

“Ah?” Bihai had a big eyes and couldn’t understand.

“I didn’t lie to you just now. This time I came to see you specifically, and it is very urgent...”

Originally, Bihaihuan was puzzled, but when he heard the words of Shen Lang and emphasized one sentence, he immediately pulled back to this side, and he was relieved of speed and his face was blushing.

“But you haven’t said anything wrong, it’s a thing. It’s also worried that if you have something, it will be urgent.”

“But recently... very peaceful. Shouldn’t I have anything?” Bihaihuan is of course very happy.

Whether Shen Lang is an excuse to be shy, or really worried that she has something, it shows that she is hanging in her heart.

“I am very worried that I will not come here again, I will never see you again.” Shen Lang said seriously.

The blue sea is full of joy.

In fact, she always has this kind of worry. Every time she meets, she is afraid that she will meet for the last time. Therefore, even if it is not convenient to express, she is very cherished every time. She is also desperately trying to keep herself up to the point of a wave of deep waves. .

Originally, Shen Lang said that she was happy, but I don't know why, he is serious and makes her feel that it is likely to be the same.

"I am in the big island in the middle of the sea..."

"Well, you are from Xiandao." Bihai nodded.

They all think that the Shenlang is from Xiandao, although the first place to meet is the small world on the earth called the dead forest. But in her opinion, Shen Lang is just like them, going there to exercise.

"On the island of Xian. There is a super mountain on the island. Every thousand years or so, some civilization relics that have disappeared will be reproduced through the overlap of time and space."

Bihaihua listened carefully and didn't think there was anything incredible. After all, it is Xiandao. It is the mystery of modern technology and the inability to snoop and log in.

"This time I went to the ancient ruins, and the result was different from other people. That is... the holy armor can access the wisdom system in the ruins, and I also have the highest authority."

"Holy Armor?" Bi Haihuan began to realize that it was a bit strange.

Although the last time to give the sacred armor of Shenlang is the latest high-tech product of the Bihai family, it is also the technology of the river basin city. Now, whether it is a city-state or a city-state on other continents, it is impossible to log in to Xiandao.

Why is the holy armor of the city-state in the river basin able to access the wisdom system of the ancient ruins of Xiandao?

“After the access, I got a message that they called me the world god, I have the highest authority, even if it has been more than 80,000 years.”

“Island... It’s amazing.”

“The ancient civilization of 80,000 years ago, the reason why the holy armor can be accessed is because of the same origin, and I will be honored as the world god, because in that civilization, there is a unique goddess, she is the one who took me. Be regarded as the great **** of the world.”

When Shen Lang said it, he looked deeply at Bihaihuan.

Bi Haihuan is not stupid. From his burning eyes, combined with these words, there are more associations immediately, which makes her heart beat sharply. If this truth, this truth...

She is not excited about being a goddess who may become the world’s only **** in the future, but panicking for “80,000 years ago!”

Is she and her teacher different in time and space of 80,000 years?

No wonder the teacher will worry that he will never come again, and he will never see it again...

“that is you.....”

Shen Lang said that while the shadow was projected through the sacred armor, the influence of seeing her in the Temple of Heaven was also presented, and the situation was known.

Bi Haihuan has already guessed this possibility, and then verified, directly let her almost stand up.

In the future, cultivation will become stronger and stronger, reaching the level of God directly, and even dominate the whole world. But what about it? I will never see the teacher again. Even if I have tried my best, I will not see it again by the time and space of the project, when I arrived at Xiandao or other time and space.

This possibility of light has already made her emptied like the uncomfortable not to mention this “future”, in fact, it is the ancient history of 80,000 years ago!

“I think... it might be wrong, it’s too hard to understand...”

Seeing her face ugly, Shen Lang sighed: “I also think that even the wisdom system over there is more advanced. I have compiled such a story through the information about this side in the holy armor. But then again and again... ..it really obeys me in authority, can verify, and certainly can’t make a story like this.”

“I was still hesitant to tell you, but you just mentioned it here...”

Shen Lang pointed to the room. “The space I have. The biggest possibility is that you made it 80,000 years ago. You can also cross the space and come to other worlds because of your legacy. Let me get it. Then bring it back here and give you the inspiration of the present.”

“You mean, this was originally made by me, and then left in your world. After 80,000 years, you got it, and brought it to the present 80,000 years ago, which inspired me?”

“It’s awkward and a bit paradoxical, but it’s probably a messy relationship.”

Bihai Huanhuan smiles, but actually smiles: “So...you are people after 80,000 years, and I...we have already disappeared into the ancient civilization of history?”

Shen Lang shook his head: “I don’t know how to explain it. I am not actually in your world, but I can come to you and go to Xiandao. You can’t go to Xiandao here, and Xiandao can’t go directly here. It seems like...you are separated by 80,000 years.”

“That is... the fairy island you have been to, may it be the fairy island after 80,000 years?”

Change to this possibility, to make Bi Haihuan feel more acceptable.

Chapter 1369 - Lonely repair road

People are inherently dead. This is something that no one can deny and resist. The road to self-cultivation against the sky is just to delay the arrival of this day. It is impossible to live forever.

But even if you know that you will die in the future, others tell you that you are already dead. Now it is just a shadow of history, or it is difficult to accept.

This is 80,000 years ago, and after 80,000 years, it is the same in comparison, but for the specific person, the latter is more acceptable.

at least.....

She hopes to share the same time and space with Shen Lang, not the ancient history of the Shen Lang era.

Shen Lang listened to her words and also stunned.

The information he received at that time, the time accumulated from the wisdom system, has been more than 80,000 years, so he did not think about it.

If the past Nakajima was 6, the world was 80,000 years old? It seems to be ok.

But soon he shook his head.

No matter which one, it is essentially the same, and there is no difference. Time and space have been chaotic, and what he cares about is not what is the “present time”, but the future of Bihaihuan.

Besides, time is also relative. Compared with the ruins of Zhoushan, the current city-state is the ancient civilization of overseas 80,000 years ago. Compared with the city-states at this moment, the era in which Gao Hanqiu was located is 80,000 years. After the cultivation of the true civilization.

Looking at the eyes she expected, she turned back to the waves and smiled.

“Yes, that place may be the time and space I entered after 80,000 years.”

Bi Haihuan did not say anything, but obviously felt a relief.

“But that’s not the point, the point is that you will be in the future...”

Shen Lang’s words did not go on, and Bi Haihuan naturally understood it.

Yes, even if it is now, 80,000 years later is the future, but never seen, it is already doomed to her life. She will not see Shen Lang, she will cultivate herself into a god, and then embark on the road of finding him, it is likely to end up being... lonely and old!

Suddenly, her heart was sad.

Being alone and being old, it is already very sad for ordinary people. For a self-cultivator with a much longer lifespan, and if she is a god, she may be a life of thousands of years, thousands of years or even longer. Such loneliness is far better than the average person.

After the sadness, Bi Haihuan immediately thought of a possibility, could not help but feel the spirit.

“Teacher, you saw my future ending...you came to me, you...will take me away?”

Shen Lang did not respond directly, but reminded me of it.

“Perhaps the two of us are a connection that is destined. You helped me at the time, I guided you. Your life has changed, and the sacred spar you gave me has helped me a lot.”

“If the future is just as I said, my space is also from you, helping me to greatly improve. And I came over to help you improve, it is a complementary cause and effect.”

“So...” Bihai Huan thought thoughtfully: “If I leave with you, then my future will change, and it may affect you?”

“There is this possibility. On the other hand, your parents and relatives, your friends, etc. are all here. If you leave with me, you will break all relationships in advance.”

Bihai opened his mouth and couldn't speak.

Although these years, Shen Lang has had a great influence on him, but after all, she has grown up from a young age, and all her relatives, even the entire city-state, have her responsibilities. It is also a great challenge to really give up to a completely strange place.

If you can still come back like this, you will come back from time to time. Just as he sees the future, can't come here again, or because the change has affected the future, maybe it won't come back at all...

“Cultivation is such a process.” Shen Lang is a bit embarrassed. He has experienced it before, and this world will inevitably experience.

“Your relatives can only pass the ordinary ones, you will send them away one by one. Your friends, partners, will be updated with time, and in the end, you must be able to look down on all love and love!”

Shen Lang is a two-person person. These are experiences that have already existed before, which can be said naturally. Bihaihuan is still young, and love and love have not experienced anything. It is difficult to let him down.

However, because she had just said the situation after 80,000 years, she also had a little empathy.

“cultivation is a lonely and long road. I don't know if I will take you on this road. Is it good or bad for you...”

Bihai cheerfully shook his head: “I am very grateful to be able to learn from you, I am willing to embark on this road.”

Shen Lang smiled and said: “However, there is nothing wrong with it. It is time to rush. Life is old and sick, life is dead, when you see more, you will eventually be indifferent. No matter what the future, let you have a mentality first. Ready, still good.”

This is the solution to her, but when it comes down, Shen Lang himself has calmed down a lot.

The information of the 80,000 years he saw was only a small part of the record of the wisdom system, not the real situation of Bihaihuan at that time. Perhaps for her who has become a god, looking for him through time and space is not a time to let go, but a reason, a driving force to continue to explore other worlds!

Just as in the past, when everyone cultivated into the realm of the Great God, it has reached the extreme that the earth world can bear, and then it will usher in the robbery. In modern words, it should be regarded as the constraint of the law of natural space.

If you are not bound by this space law, it will disappear and everything will become empty. If you pass by, it will rise in the day and go to heaven, fairyland and the like. That is to use the opportunity of space law constraints opened the door of space, shuttled to another world.

Judging from the many historical traces of Nakajima's Big 6, such as the Jade Emperor, Bao Puzi, etc., many of them are in that world, and may also be the shadow of the legendary Tiangong and the fairy world.

However, since ancient times, there have been countless self-cultivators in China, and there are many other self-cultivators in other territories around the world. There are also many people who have accumulated history and reached the realm of great deities.

However, it is not possible to correspond to Nakajima 6 one by one.

This also shows that not all of the rising gods are in the same place. Maybe some worlds are similar to the earth, and they are more likely to fly in the past, but different places can be broken into different worlds. .

In Pingxi, where the pre-existing squadrons of Shenlang had space gaps, the intrusion of alien trolls was a proof of the side. Perhaps if the previous generation of Shen Lang had survived the ravages, it might be the world, not the Nakajima.

If Bihaihuan becomes a great god, plus technology, it will be normal to want to leave the world and explore other worlds. If it really becomes a god, it will not be limited to one party.

Looking for Shen Lang may be just an introduction, a obsession.

Chapter 1370 - City State 1st

Shen Lang's own knot has already been opened, but the obvious emotion of Bihaihuan has been greatly affected.

At her age, if Shen Lang would take her away, she would definitely be able to get out.

But like all the girls who are elopement, even if they want to get out of their feelings, they must think about their parents in the future and they are full of embarrassment. Unless the relationship between the family is very poor, or else there will be no perfect happiness.

As the daughter of Bihai Chengtian, the general identity of a country's princess, she has been educated since childhood, the interests of the family, the responsibility of the city state, can not simply let go, just as she can go to the front line of the battlefield.

In the past two years, her outstanding performance has made the family focus on packaging and training, including the brainwashing of ideas.

So even if there is emotional impulse, it also has far more reason than the average person.

"Do not worry! You are still young, and the time is still long. You need to consider these, it is decades, a hundred years later. I still have a lot of opportunities to come, you can also go to my world to play."

Shen Lang comforted her and postponed this point to a hundred years later.

In fact, the information he saw was 80,000 years later. It was the message that Bihai had already become a goddess and left the world. Relative to her now, at least it was only a few hundred years later.

So now it's true that it's been a few decades and a hundred years later.

Bihai Huan heard that there was still a long time, and finally it was a lot of emotions.

“Well, if I can, I am willing to follow the teacher's world.”

In fact, she had such an idea long ago, but it was not convenient to open her mouth. The place where she first met would definitely not be the hometown of Shen Lang. After all, Xiandao could not go anywhere.

Now that he is not a fairy island, but another world, it is said.

Shen Lang and her came out of the room, and then took her into the world of the Book of Heaven, and re-emerged the golden book of the integration, let Bihai feel the feelings carefully.

Bihai Huan was originally uneasy. Now I understand the cause and effect. I know that this thing is probably made in the future, and I went back to the past to give Shenlang.

Therefore, she also carefully remembers and understands every detail, strives to make more improvements for this prototype, and invents this thing according to the process.

Her present realm is higher, and there is a more than ten times the space to cultivate, and the progress will be much faster than others in the future. It is only a matter of time before she cultivates herself to half a cent.

Therefore, now Shen Lang, who also teaches her “the yin and yang wave if the truth is true”, has already realized the mental strength and other aspects, so that she will not have bottlenecks and restrictions.

Bi Hai Huan also made a brand new upgrade to the sacred armor of Shenlang.

However, in terms of software, the armor has been upgraded to a higher level by the future system, and the hardware will not change rapidly in such a short period of time. Therefore, the routine upgrade is to consume the weapons and ammunition of the miniature space. Product, re-filled.

Shen Lang also gave the data in the holy armor to the blue sea Huan.

This is the future technological civilization, and it is bound to be far ahead of the current stage. Such cheating is very easy to cause problems. However, since it has already been said, Shen Lang has no good scruples.

Besides, this is also a part of the logic of this paradox – he created the leading edge of Bihaihuan's personal strength and technological ability, so that she can override the whole world in the future.

Bi Haihuan also knows what it means, and she is very serious about not going out.

The outflow does not flow out, now Shenlang has not cared, anyway, the world has been changed.

After a day or two, the official invitation of Bihai Chuntang came.

Although Shen Lang only contacted Bi Haihuan, as the patriarch of the Bihai family, such a thing is naturally when Bihaihuan mobilizes the spaceship to pick him up. Bihai Chuntang already knows.

However, he is inconvenient and too enthusiastic, and he seems to be monitoring at any time, so he will wait until now.

This time, it was still Bihai Chengtian personally invited, and Bihaihuan accompanied the same, went to the huge spherical building.

This spherical building is the residence of the patriarch Bihai Chuntang. With his position in the city of the river basin, it is basically equal to the king and the emperor. So to say the palace, it is similar.

For the realm of Shen Lang, no matter what the palace of the world is, nothing is wrong. It is the earth or the most important military base here, and it can come and go.

However, after entering the “Imperial Palace”, Shen Lang felt a strange smell.

He did not ask to say that it was broken, calmly entered with the father and daughter of Bihai, crossed the palace, and came to the garden.

“Master Shen, I met again.”

Sitting in the Bihai Chuntang, naturally stood up to meet the waves.

The strength of Shen Lang is so strong, they have already understood through the picture of the World War. But I don’t know the limit, and the last time after he left, he knew his horror through the contrast of the strength of the sea.

So short time, can lift Bihaihuan so powerful, does it mean that he is more powerful?

So this time Bihai Chuntang’s attitude is better, last time just smiled and said hello, this time took the initiative to stand up.

However, this time, there are also preparations for seating refreshments, but in addition to Bihai Chuntang, there are two other people. These two people were also sitting, but they stood up and said hello in Bihai Chuntang, but they still did not move.

“The patriarch is polite.”

Shen Lang responded with a touch of faintness.

Bi Haihuan is obviously very happy with her grandfather. After all, her limelight is now more powerful than Bihai, so she is also natural past the Bihai Chuntang.

The identity of the sea is much more subtle.

When he was outside, he was a famous general, but here he was the son of Bihai Chuntang, more similar to the role of Prince Chu.

“Master Shen, let me introduce you, these two are also the top psionic masters. This is the first master of the river basin city, Master Jiang Yan, this is the first master of the ancient city of Lucheng!”

These two were honored as guests by Bihai Chuntang, and of course they just meant to be proud of their arrogance. At the moment, Bihai was introduced to the day, and he squinted at Shen Lang and nodded. He said hello.

When Shen Lang came in, the spherical building sensed them. At this moment, I saw the attitude of the father and son of Bihai Chuntang, and of course understood the intention behind it.

Whether these two are invited, or take the initiative to come, they have received their treatment. And now when I meet him, putting them here, there is no doubt that they have a taste of three.

Bihaihuan certainly didn't have any doubts about her grandfather and father, so the state was still good, but when I heard this introduction, I couldn't help but change my face.
