

First Strong 1401

Chapter 1401 - Baby, behemoth

After reading the information of Yue Zhennan, Shen Lang was serious and looked away quickly, and quickly flew to the Yuefu Garden.

This is a place he was familiar with before. The community of this Yue family has already been renovated.

He sensed the location of Yuezhennan and rushed directly to his house.

“Who is it?” Yue Zhennan, who found it wrong, quickly turned back. “Wave... brother?”

Like the Shennan couple, he was very excited to see Shen Lang, but he was also a bit cautious.

Shen Lang smiled and nodded and walked to his side.

Yue Zhennan is now in a children’s room, just a little tea for a few months.

“This is my son.” He smiled a little embarrassed. “I know you are busy, I have not notified you.”

Shen Lang looked at the children, and then a little gratified.

When the troll appeared in Pingxi, Ye Yao asked Shen Lang to save the south of Yue, and then she knew that she was pregnant.

“It looks like you and your sister-in-law are very good.” Ye Yao can adjust his mentality and will seriously treat Yue Zhennan. It is really a good help.

Yue Zhennan also showed a happy smile: “Yes, Ye Yao... She is very capable, and now it is for me, for the Yue family.”

Shen Lang found some medicinal herbs and some Lingshi.

“No, no... Langge, we are very good now, and resources are not lacking in all aspects.”

For Yue Zhennan's resignation, Shen Lang directly into his hands: “These are to supplement the scorpion, Lingshi keeps slowly after the flower, you know, this is also a scrap that I don't need.” ”

Shen Lang's present gift to Yue Zhennan is just like Zheng Man's previous life. It's too high-grade to use it, but it's a scourge, so it's something that he can't use.

“Thank you.”

“I can see a little **** at this time. It is also a chance. Do you want me to help him?” Shen Lang looked at the baby.

Yuezhen South is a glimpse, and then a surprise.

After being a parent, I can understand the mentality of giving everything to my children!

Every time Shen Lang is a big gift to him, he feels very embarrassed. Just that is not a friendship, really do not want to accept. I would rather have everyone's friendship last longer, without being diluted by the interests.

But now Shen Lang said that he would adjust for his child, but he was very surprised.

Although I don't know what the specific situation of Shen Lang is, it must be the height that he is far from being able to reach. Such a strong shot will definitely benefit his son.

When I was just a few months old, it was the best time, shaped like him, and Shen Lang wanted to take him to a higher level, and it was limited.

“Really? If it is too much trouble...”

Seeing that he is vomiting, he is very willing. Shen Lang smiles: "The trouble is not, but you have to be sure. Because I have adjusted his qualifications, the future will definitely embark on the road of comprehension. And people... choose More than one, maybe it is not necessarily happier to be an ordinary person."

Yue Zhennan nodded firmly: "This child was born in Yuejia. As my son, I must shoulder the responsibility of the Yue family in the future. It is destined to live the days of ordinary people..."

Shen Lang nodded. Since he couldn't live an ordinary life, he should start as early as possible and try to go higher.

Several family sects in Pingxi benefited from the resources left by Zheng Man. But for centuries, it has been a constant grievance. When he first started, he personally witnessed their many grievances.

Balance has the advantage of balance, and the big one has the advantage of being big.

The current Yue family is the only one who is supported by Shen Lang. Of course, he does not want to see that one day he has been turned over by other family sects, and he is unlikely to pay attention to it in the future.

To adjust the qualifications for a baby, it is only an instant effort for the Shenlang in the realm of Daxian.

The baby is born shortly, or a blank sheet of paper, which is the easiest time to adjust. When it grows bigger and bigger, everything is fixed, it is difficult, such as his parents.

However, in order to appear to be grand, Shen Lang is still pretending to do something, of course, is also careful adjustment, lest Yue Zhennan think he is perfunctory.

After the completion, I started talking about business.

A few days ago, Yuezhen sent a message to Shen Lang, asking if he could help!

“I actually left for a long time. I just came back today. It is not clear what happened. But my women seem to have participated in the past. I haven’t contacted them yet. You should tell me first.”

Yuezhen South point him. He knew that Shenlang’s realm was high. “Leaving for a long time” refers to where he went. He is not convenient to ask, but he can basically guess. Because he did not return to the sea, he was not qualified to participate, but he also heard the wind and gossip.

“Things are like this...”

Shen Lang, they have been in the past for a long time, it is a month or two after the return of the boat. However, it is still at least a year’s time limit from the time when the Haizu said that the non-return of the sea is dead.

But in the recent period, it has changed from nowhere to hell.

A giant monster has been discovered in the Pacific!

This giant monster is capable of attacking ocean-going vessels and is completely a creature that has never been recorded before.

However, this news is regarded as the rumor of nonsense, the most common routine in the past, and the sci-fi movies have been repeatedly shot.

But then there were a lot of reports, and then the governments of all parties began to suppress the news, and at the same time they launched an investigation.

This is what the ordinary people know about, and in the realm of comprehension, the news spread.

Some people say that this monster, in fact, is from the non-return to the sea, is the fairy bet from the fairy world!

This naturally inspired many people’s enthusiasm.

It was the most powerful forces in the world that could have gone to the Hellless Hell Expedition. Those who were almost the same, and because they were not guilty, had another team to follow in, and finally they did not.

The first batch was sent back by Shen Lang. Those who followed later may not have arrived in the mainland of Nakajima, but may also go to other worlds. They are more likely to stun in the chaotic space forever and turn into nothingness and nutrients.

Those who stay on the earth are not qualified. Now they have the opportunity to come into contact with the fairy who has fallen into the dust. Of course, no one wants to miss this opportunity. Maybe they can step into the sky?

Some of them were brought back by Shen Lang last time, and the batch of Jinjiu Valley survived and the strength was worse.

They will not be superstitious about fairyland and fairy beasts, but they are very clear that these giant monsters are actually high-grade beasts!

No matter what the name is, in short, they are very dangerous, and they are also of great interest. Therefore, whether it is for the protection of human beings or for personal interests, it is necessary to solve them before the arrest of the countries!

Chapter 1402 - Island

Before the Yuezhen Nanfa sent information to Shenlang, he asked Shenlang how to look at this situation. Does he have anything to help?

Without the reply from Shen Lang, he suspected that either Shen Lang had not returned yet, or he did not want him to participate, so he did not ask more.

Now that Shen Lang was looking for it, he realized that Zheng Yumeng and others had left a few days ago. I believe it is also for this matter.

“Okay, I know this, I will go over and see, you are taking care of your wife and children now.”

Shen Lang responded to the inquiry in Yue Zhennan’s information and let him be at home.

Listening to his such understatement, Yue Zhennan also nodded with confidence.

He is very clear that with his strength, he will not be able to save the world. It's just that he wants to say that the weak is not weak, and if he needs it, he also wants to contribute.

Now the attitude of Shen Lang, so that he does not need to worry at all. It feels like saying which program has a little bug, or which work has gone a bit, and he can solve it by looking back.

And Yue Zhennan is also from the heart, I believe that Shen Lang can really solve!

This is the confidence that existed in the past. When dealing with the trolls, it is also more strengthened, so he does not need to know how the strength of Shen Lang is now, and he believes in him completely.

Shen Lang then left the Yue family. It is no longer necessary to say hello to Ye Yao and Yue Gang. Only Yue Zhennan is his friend.

After coming out, Shen Lang called the wind directly.

To talk about the comprehensiveness of information, it is certain that there is nowhere in the wind, and that a few of them should now be regarded as the mainstay of the earth's comprehension.

The result is that the phone is not working!

This makes Shen Lang a bit speechless.

This does not mean that they are in danger, because the information network has not yet reached the high-tech of the river basin, even if it is a satellite signal, it needs a ground base station.

Like in the snowy mountains of Tianshan, because of the lack of base stations, the Ice Palace and Jianzong did not have any signals, and later they pulled the cable network straight.

The place where the giant monsters appeared this time is the Pacific region. Now they may have arrived in a foreign country, or they may have arrived at some islands, which may lead to no signal.

However, Shen Lang is still a bit worried.

Because when he was in the city of the river basin, he did not think about leaving quickly, but going to Xiaoxian Island, and he was not afraid of delay. But after returning, I didn't go to Tiancheng again and chose to come back directly.

So, even if there is no dangerous feeling, I still worry that this is a signal of foreboding.

They all reached the half-sexual situation. Even if there are still masters of the same level on the earth, they are old monsters who have not been born for a long time, and the enemies that can let them join hands should not be there.

But now this enemy is not on earth, but from no return to hell!

“No return to the sea” is a statement of the ancients hundreds of years ago. According to modern science, this is a space crack, wormhole and the like.

Moreover, Shen Lang has personally visited it many times. The connection is a foggy space that he calls “the world of chaos”. Where there may be infinite existence, it is only one of the space outlets.

In other words, those monsters are probably not coming from the mainland of the island, because there are no gaps in the space between the two known gaps.

If there are other world entrances, close to the entrance to the earth, causing monsters to inadvertently come in, that is a dangerous signal!

Even the comprehensible resources, the aura, etc. are far better than the mainland of the mainland, and the later disciples of the big son of Bao Puzi are thinking about killing and monopolizing the earth's resources.

In other unknown worlds, Shen Lang is exposed to the world of trolls, which is the cruelty of the thousands of yellow sands. According to the legend of the extraterrestrial demon, they are the predatory races that destroy everything.

Last time, the trolls and the watershed city-states were still fresh in their memory.

If these giant monsters are similar things, then they are all dangerous, and the whole world is in danger.

However, the current Shen Lang has long been a thing of the past. In order to find those big men who should have returned earlier than him, they still have a connection with each other through Bagan and the Black Dragon King.

Now Shen Lang wants to sense a few of their seats, but it can also be done, but it takes a little more mental power.

There is a benefit here, that is, the territory of the earth is far less than the mainland of China and the city of the river basin. It is difficult to play in that world, and it can be done more easily here.

And Shen Lang has a general direction, then they must have gone to the Pacific Ocean. After all, no return to the sea is in the middle of the Pacific Ocean.

Therefore, he directly used the Kunlun mirror of the Three Realms, and quickly passed to the vicinity of the sea.

Crossing in the same space requires much less mental energy. And he is also very familiar with the return to the sea, can be accurately arrived, but will not go directly.

After appearing at sea, and then sensing from here, it is much closer than that from Pingxi. Soon, I feel that several of them are in one direction Because it is just a general feeling, Shen Lang can no longer Go straight through the past, but use the St. A high-speed flying search.

Not too long, I found a desert island.

The islands were all parked and rested before, but now there is a clear difference. The desert island is still a desert island, but there are already many more people!

Shen Lang circling around the island in the air, and took a bird's eye view of the general situation.

The island is not very large. It is exposed to the surface of the water, which is equivalent to the area of a small town. There is also a mountain in the middle, and it is surrounded by the sea.

They used to stop and rest, just by the sea, and not on the mountain. But now, the people on the island are in the middle of the mountain, and at the top of the mountain.

Around the island, they are all smashed by some giant beasts!

The targets of these behemoths are the monks on the mountain, and each of them has a large field, and no other behemoths are allowed to come close. The whole island is circled, and there are dozens of giant beasts. They are separated by a certain distance.

But this distance is not a safe distance that can make people rush. When the two sides are caught, there is often no way to escape.

And they gather from the island to the middle, and if they reach the top of the mountain, there is naturally no distance.

Now the situation seems to be that the monks on the top of the mountain, the strongest surviving monks on the planet, came out for the purpose of protecting the world or robbing resources, but now they are trapped here by these behemoths.

Perhaps at the beginning, they all fought on the beach and the behemoths, but in the end, they stepped back to the top of the mountain. They relied on everyone to work together on the mountain to make these monsters not close.

Chapter 1403 - Beast

The speed of the Shenlang Shengjia flight is very fast, but when the bird's eye view of the island is hovering, the speed is reduced. Even if the height is maintained, it is still found below.

He did not pretend to be mysterious and went straight to the top of the mountain.

When you land at a certain height, the bottom is no longer a group image, but you can clearly identify everyone.

In the middle of the five people, it is raining, falling canoe, Dorothy, Zheng Yumeng and Feng Wuji, and then the core circle is the master of the realm sent back.

The rest of the early days of the realm of the gods, and some of them are in the true level of the realm, from the perspective of skin color, etc., can be seen from all over the world.

When the waves fell, all eyes were drawn to the past.

Then soon, many people recognized Shen Lang.

“Shen Lang Master!”

Those who followed the mainland of the island and saw the waves, they all showed a pleasant look.

After all, Shen Lang went to that world, and still took them, and the people who opposed the indigenous sects there. Now that Shen Lang is back, other big men of their major forces may be back.

This can not be said to be an exciting news!

Five people, such as the canoe, naturally showed a happy smile.

Others want to rely on Shen Lang, they are seeing the waves, they are relieved. Before I knew that he was going to a dangerous place, they just sent them back because they were not sure.

Other earth monks, even if they are unfamiliar, heard the shouts of everyone and reacted.

However, they did not personally experience it, and did not have the point of worshipping Shen Lang.

Shen Lang waved his hand and said hello to all of them. He fell directly to their side.

“what’s the situation?”

The canoe that has had the experience of the master has served as the commanding responsibilities of the leader.

“A huge group of monsters, from no return to the sea. I don’t know which world to come from, but it is different from what we have been before. Governments are still searching in the Pacific Rim, everyone came here, through different ways, They are unified here.”

At the time of the introduction of the canoe to Shen Lang, Feng Wuji arranged for other people to continue to defend against these giant beasts that attempted to attack.

Originally both sides were squatting, but Shen Lang just landed and attracted a lot of people’s attention, so that these giant beasts seized the opportunity, has quickly rushed over, and soon it is halfway up the mountain!

“Original... We think there are so many people who want to deal with a few beasts. It shouldn’t be a problem. Some people are even arguing about the distribution of interests. I didn’t expect the size to be so large, and the strength of each head is very strong. ”

Needless to say, the situation is now that these numbers and strengths have surpassed their expected behemoths and trapped them on the island.

They said that they are the top-ranking powerhouses on the planet, but in fact, even in the era of decline, they are just “existing” batches. The true top-level ones have not returned in mainland China.

These reserve players can persist until now, and there should be a big reason for relying on the five people who are in the canoe.

These behemoths were in different directions, but they were quite inductive. After a while, they organized another attack.

For them to attack halfway up the mountain, all these monks, all try to attack remotely.

The emphasis of each other's exercises is different, and many of them do not have magic weapons. They can only use energy from stones to achieve the purpose of long-range attacks.

They were besieged for a few days, and many of the big stones on the top of the mountain have been hollowed out. For these giant beasts, in fact, the attack power is not big, that is, a block.

The key to blocking them is still relying on their high realm and magic.

"Don't try to break through?" Shen Lang asked.

The canoe shook his head slightly: "They also have a lot of attack power. They basically blocked the island. You just came in from the top right. If you are in any direction, you will be attacked."

"In fact, some people wanted to escape before, but they were swallowed up in the air. Besides, bringing them here is to solve the problem. If you log them on to all continents, it is the people of the world who suffer together." It is."

Shen Lang looked at them and they were too tired to fight, and smiled.

"I will give you a magic weapon!"

Last time, in order to make him more secure, they insisted on returning various magic weapons to him.

Although several of them are in the middle of the mountain, they are not meant to protect other weak people on the side, but to facilitate immediate observation and assistance in different directions.

Just before the canoe was introduced to the situation with Shen Lang, the other four people are busy.

Now Shen Lang gave them the golden magic, the heavenly seal and other magic weapons, and immediately gave them a spirit. Although they have a semi-prestige realm, all aspects of the attack can have a great bonus, but the magic effect is completely different.

Shen Lang is now the realm of Daxian. These magic weapons are somewhat bit of a chicken in his hands, or they are given to them as before.

Chaotianmen's treasures of the town's treasures were given to the wind, and the wind and the boat were still the chains of the ice and the nebula; the rain was the golden dragon of the Weiyangzi; and Zheng Yumeng was the autumn sword and the willow sword.

Dorothy's body is very powerful Speed is also invincible, and no need to give her any magic weapon. Now on the top of the mountain, those behemoths can't attack, and she has credit for it.

Whenever a beast breaks through the line of defense and is overwhelmed by her, she is directly defeated by her. It is a very qualified firefighter.

In fact, if the iron bar is given to her, there will be a lot of room to play.

But the iron rod can drive, because he absorbed most of the undead, so others can't do it.

After the distribution was completed, they immediately began to act. There were sinking waves here, and the canoe was no longer acting as a conductor. Let Shen Lang come to command, and she himself rushed out.

Shen Lang is at the top of the mountain, paying attention to the situation of confrontation in all directions.

They attacked the stones on the top of the mountain, leaving the stones very few. The size and strength of the behemoths are very large. Many times they rushed up, and they caught a lot of mud and collapsed. It is not impossible to dig up the mountains with dozens of beasts.

According to the normal progress, everyone is a little too optimistic. If the waves don't come, they may be confronted for a while, and then they will stick to the day for a maximum of one day.

At this time, the wind has no glory, it has been the first attack!

Her manipulation was not very skillful, but it also made Chaotianyin smashed out like a small hill, and the speed was very fast, and it was directly on the head of a giant beast.

Everyone was excited too. The stones on the top of the mountain had been dug very little. Suddenly there was such a huge magic weapon, and of course it was very exciting.

But seeing that the behemoth is going to be hit, it is a sigh of relief!

Just a breath, even blocked the huge sky!

Chapter 1404 - King of the beast

Not only in the sky, but also in other magic weapons attacks. Just this spurt of the behemoth can stop the magic weapon in the air!

In fact, even if stones, dirt and the like go down, they are not afraid at all, just the impact, let them slide down, and can not let them hurt.

And everyone's coordinated operations can only achieve such a degree, and these giant beasts are forced to retreat.

Perhaps because of their superiority, let them not give up, but to eat these human monks. And their repeated attacks have also eroded the middle of the mountain.

Every time there was an offensive to the top of the mountain, it was up to a few of them to go out, especially Dorothy, whose speed and strength were extraordinary, could directly turn the rushing up.

But they did not dare to rush, and did not even dare to attack at close range without adequate assistance in protection.

After just getting the magic weapon, everyone is more active offensive, but the effect is still limited.

They were not surprised, because in this case, they have seen it, just like someone wants to fly away from the island, and they are swallowed up in the air.

Although the magic weapon can not be directly crushed, it can greatly contain the behemoth.

The gas ejected by the behemoths can withstand the attack of the magic weapon, and naturally it is not ordinary gas, similar to the original infuriating, which also makes them need to deal with God.

For example, when the rain falls, her golden dragonfly is blocked, but at the same time, the ice flower and the like can hit the giant beast accurately, and the effect is obvious for the eyes and the like.

Those who can come here are all on the scale of the earth, even if the strength is not as good, but life experience is still there. Just a few of them had a magic weapon attack, and of course others would not wait, but immediately cooperated with the attack.

As a result, there is a better synergy effect immediately. Originally, their limited attack power, now being held back, can have a greater play.

The result was this wave of attacks, which was quickly controlled halfway up the mountain, and did not let some of the behemoths go up as before.

Because the island is not big, the mountain is not high, once it is rushed up, it is very dangerous.

Shen Lang did not directly participate in the attack, but carefully observed these behemoths to understand their strengths and weaknesses.

After his preliminary observation, the strength of these giant beasts should be basically the level of the king's beast!

However, if there are dozens of kings and beasts attacking together, they will only be able to protect everyone for so long. The geographical advantage of this point is actually limited.

So there is only one possibility – space shock!

Just as everyone enters the sea of innocence, the powerful space impact, immediately allows all the powerful people above the realm to stun directly. Wait until a few hundred people join hands and enter at the same time, and spread the impact, the state is much better.

And then enter another space, it will still receive the impact, the larger the space crack, the greater the impact. The weaker strength, like the real person of Xiangyang, was directly hanged by an impact.

These monsters have entered the chaotic space from their world and have already suffered an impact.

From their huge physique, the cracks in the space there are not small, and it is difficult to enter at the same time, so the impact is not small.

In the chaotic space, perhaps they have a directional coming, or they may accidentally enter the crack of the earth, and then they will be hit by a wave of no return to the sea. When you get down twice, you will be hurt!

The environment in which they lived was not known. If it is a terrestrial creature, it is not easy to keep swimming in the water in this Pacific Ocean.

The key is that the Pacific Ocean is big enough, no matter which direction they travel, they are not seen for a long time. And without directionality, it is likely to have been swimming in the sea.

This should be an important reason why they have not landed on the east and west coastlines, and why they are quickly gathering on the island.

According to this inference, the longer they recover, the more recovery they will get, and the stronger they will become!

Now there are dozens of giant beasts here, and Shen Lang feels that it is not just accidental.

He has been to the chaotic space many times, and he does not know how big the specific scale is, how much space he can contact, and how many worlds.

There, there are only two space cracks entering the mainland of the island. One of them was in the direction according to the signal of the predecessors of the Tianji, and the other one was that Yuxianmen took the initiative to “fishing”.

In other words, you have not explored any new space cracks yourself!

In the thick fog, it is invisible, inaudible, floating in the air, floating randomly, and it is extremely difficult to find a space crack.

The reason why these behemoths are still beasts, wisdom will certainly not be stronger than humans. They are still awake after being shocked, and they benefit from strong physical skills.

But if there is no fixed direction, it is impossible to have dozens of heads coming in in a short period of time by chance.

How can a giant beast have a fixed plan and route?

What is the dominance of their world? Is this a tentative advance force?

Standing at different heights, the issues considered are not the same. These big men on the earth want to hunt and kill the beasts and win the resources such as Nedan. They are trying to protect the world and avoid the impact of countless people on the behemoths.

Shen Lang is different. He not only wants to see the situation on the earth side, but also sees the situation outside the earth!

If you can't solve the source, even if you kill them, you will continue to have monsters.

If there are new ones after ten days and a half? After a year and a half?

He can't do it, and no one else can guard it here. Even if the return to ***** is completely gone, there is still a long time.

“Master Shen! Please take it!”

Some people couldn't help it. When Shen Lang came, he gave me a few magic weapons and made the war situation change obviously. If he can personally take it, he should be able to lead everyone to rush!

After being trapped here, some people wanted to fly away and the result was swallowed up. The ships they came from were also sunk. There is no cell phone signal here. It is useless to ask for the cannon to save the plane ship.

Now the arrival of Shen Lang is bringing hope to them. Everyone wants him to hurry.

“Master Shen! Please take your shot! You can take us to kill a ***** road!”

After someone spoke, more people immediately yelled.

Originally, everyone was following the attack of Luo Yu and others. Now they all look at Shen Lang and hope that he will have another miracle.

Shen Lang smiled slightly: “If I take it, do I still need to bring you? What kind of blood road do you need to kill? Just kill them all!”

Chapter 1405 - stunned

Shen Lang said this, everyone thinks this is very pretentious.

These are dozens of giant beasts, these monsters can resist even the magic weapon you just took out!

Especially those who have been to Jingui Valley, although they are not as clear as the Shenlang, the strength of these giant beasts. But it is living under the iron hoof of the animal tide, knowing the power of the beasts, these giant beasts are far more than the beasts of the day!

And their impression of Shen Lang is still in the time of Jin Jingu. At that time, the Shen Lang, just half a fairy, the king of the beasts can only deal with one!

Now that Shen Lang is not the same as before, Tiandu has already been promoted once, and the ruins of Zhoushan are promoted to Daxian. Now the king of the beast, in front of him, has a difference in magnitude, the number is more, as long as they are separated, it can be easily broken.

If you come to a beast, even if there is a group of king beasts, you can't offend.

Just like the king of the day, you can manipulate so many beasts in the entire region, even if the power of the beastly frenzy has exceeded its individual strength.

However, even if everyone feels that the waves are forced to be forced, they will not dare to say it at this time. They can only laugh and even agree.

Shen Lang does not need to get their approval. He is far better than them. Just like a master of the real world, he does not need to be recognized by the Yuan.

However, for these behemoths, he also needs further understanding, and he must personally feel the next step.

“Hey!”

Shen Lang patted the palm of his hand: “You all take defense, don't let them attack. Just leave me the rest!”

His words are said to the five of them, but everyone else is completely obeying his arrangements.

In addition to defense, everyone's eyes and minds are on Shen Lang's body, want to see how to "give him."

But it is suddenly, the figure of Shen Lang has disappeared!

In the face of different directions, I can't see it. It is the face of Shen Lang's departure. I just feel that the shadow is flashing, and I don't know where he is.

There have been some fierce beasts, still fighting against their magic weapons, still being blocked by the above attacks, now losing the magic weapon, there are no more attacks, let them all violent.

After being besieged for a few days, these behemoths were a little impatient, and they were eager to quickly dig up the mountain and swallow up all the humans above.

At this time, Shen Lang appeared on the body of a giant beast.

The shape of this behemoth is a bit like a crocodile, and the skin is very hard, but it is much bigger than a crocodile.

Feel that he was on his body, the crocodile-shaped behemoth, immediately mad!

Don't look at its huge body, the speed is very fast, and it's very agile. The head is twisted at an incredible angle, and the swell of the back is biting!

At the same time, its long tail was also swept from behind, directly blocking everything around the sinking waves.

However, the body is too big, and its head can't bite the swell of the younger generation, but it is a strong originality with the screaming!

This is exactly the previous breath that can be countered by the magic weapon. Now that Shen Lang feels close to himself, he understands its wonder.

This is not only a huge lethal breath, but also a strong airflow with a roundabout. If you are not careful, you will be hooked back.

If it is a human being, it will be directly swallowed up; it is a magic weapon, and it can be robbed and used for it.

Shen Lang is of course as stable as Taishan. Whether it is the impact on him or the power of maneuver, it does not have much effect on him.

He didn't leave and waited to bear it. It was just a matter of personal experience to understand what the power was.

This moment is also obvious. This should be an energy belonging to the world. It is the original qi of these giant beasts. It is a natural ability similar to the iron armor.

But this should not only belong to a certain kind, but these giant beasts have such ability.

When it was said that it was too late, Shen Lang had a feeling of a moment, and he had a lot of information. After the tail of the behemoth was surrounded, he slammed into the top of his head.

At that moment, Shen Lang disappeared directly!

The people on the top of the mountain, only seeing the huge tail, squatting on the back of the crocodile behemoth!

Then they saw the shadow of Shen Lang.

Shen Lang seems to have just evaded the attack, and people have not left far.

But now, in his hands, it seems that there is more than one thing...

The next moment, everyone saw that Shen Lang fell on the hillside, and quickly lifted up one thing in his hand. It was a dark stick weapon.

The other end of the stick has been directly smashed into the mouth of the crocodile behemoth!

If you have a sharp eye and a good angle, you can see that it is not just breaking into the mouth, it is simply breaking into the throat from the mouth!

What is even more incredible is that Shen Lang's hand is like a common stick, and after breaking into the **** mouth of the behemoth, there is no effect like a toothpick or a chopstick. It is actually filling the whole mouth!

Then everyone saw that the waves were so loud that they directly danced the iron bars in their hands, and the iron bars were getting longer and longer The crocodile monster was lifted up in an instant!

His stick can grow bigger and longer, and it can be big!

He can win the great beast without resistance!

He can lift such a huge, so heavy behemoth directly!

Except for the five of them, everyone else was stunned.

The whole movement is like a dragon dance, but the dragon dance is made of paper, cloth, and a group of people, but now the waves are a person, holding a huge beast...

However, everyone's shock has not ended yet, and they have seen new shocks.

Because the Shen Lang is not fixed, it is not to lift it up and play, but directly into the throat after the giant beast, lifted directly, and then smashed to the other giant beast!

There is a distance between the two beasts, which is that they are kept at a distance from each other and are also convenient to cooperate.

But now Shen Lang directly held this behemoth, directly over the past, and then hit another monster.

His attack on the crocodile monster has also caught the attention of other beasts next to him. However, with their experience of the siege on these days, they will not feel that humans here can threaten them.

Strictly speaking, their concern is that they are somewhat envious of the crocodile-shaped behemoths who have eaten meat immediately. They also want to see if they can't be cheap if they don't eat them.

Unexpectedly, the crocodile behemoth became a weapon, and it was smashed into its head!

Chapter 1406 - Kill the behemoth

This behemoth is shaped like a wild boar, very strong, and the impact is obviously much stronger than the crocodile behemoth. The cavities are also very large and sharp.

For the crocodile-shaped beast to come over, it also spewed out a piece of original instinct, with strong force, blocking the crocodile-shaped giant beast in the air.

Even the heavenly seals can block them. Their energy is indeed extraordinary. Even the power of this past is still blocked in the air.

But for this, Shen Lang is also prepared.

When he had just passed, he had quickly narrowed down the iron bars in the mouth of the crocodile giant beast, and then slammed into the mouth of the "wild boar" when he sipped a breath!

Its body is shorter than the crocodile-shaped behemoth, and the throat is much shorter, so this is directly into the body.

Big!

Shen Lang continued to manipulate the iron rod to become bigger, one foot, two feet, three feet...

This wild boar monster has undoubtedly suffered tremendous pain, but the iron rod began to be small, so in its big mouth, it is free to break into, but now it becomes huge, directly supporting the surrounding. Let it want to spit out and want to go back, it can't be done at all.

The final enlargement has also been suppressed, because it has been firmly hooped, unless it can completely blast its mouth!

When the Shen Lang attacked the first beast, the other behemoths did not react. Now it is different. When he attacks the second head, the other giant beasts have already reacted.

They were supposed to continue to attack above. Now that they found this strong enemy, they immediately made a madness and then rushed over here.

The crocodile-shaped beast in the air lost its infuriating support, and there was no iron rod in the throat. It also regained its freedom and immediately bite into the side of Shenlang!

This became the two giant beasts of Shen Lang, and the two most recent beasts, the next second will be able to arrive, and the farther beast will also come over here...

Everyone who looked at the top of the mountain, including the rain and smashed them, all sweated.

They all understand that Shen Lang is their hope. If they are killed, the chances of everyone escaping will be small. And they are worried about what is wrong with Shen Lang.

At this time, everyone saw the wild boar behemoth, and rolled over to the back!

The iron rod of Shen Lang has already been drawn from its mouth. He returned directly to the eyes of the crocodile beast and directly flew its huge eyes out!

They can only see the outside, but they don't know how to do it.

In fact, Shen Lang is now in the realm of the Great Immortal. There is no need to rely on strength and weapons to suppress. He uses iron bars to slap, but he likes this kind of destructive feeling. This is what he experienced when he was in countless times.

Just after hitting the throat of the wild boar behemoth, after the iron bar became bigger and hooped to a certain extent, he did not support it, but directly with a vitality, slammed along the iron rod!

The wild boar's mouth is supported by the chest and abdomen, and it is impossible to exert a little force. The throat and mouth must be blasted, and there is no other defense at all.

As a result, the vitality directly from the iron bar directly blasted into its abdominal cavity, causing all the internal organs to be smashed!

These giant beasts have strong thick shells and flesh, and except for the weakness of the eyes, even the abdomen is generally difficult to break open. Speaking of the huge stone, it was smashed at most, and it was not afraid of being killed.

But no matter how strong, it can't make the internal organs become like steel. Under the bombardment of Daxian, it is directly broken and killed from inside.

And a stick back, Shen Lang is also looking at the start, hitting the top of the crocodile boulder eyes. Because of the large size of the iron rod, the power is huge, directly hit the piece, and the two huge eyes are all high pressure to fly out!

After completing this stick, the Shenlang iron rod lost a hook, and the crocodile-shaped behemoth that had been smashed was brought to the back of a monster that was thrown over him!

He himself went forward and greeted a giant beast that rushed to the other side!

This giant beast looks a bit odd, it has been difficult to describe with the animals on the earth, mainly because it is obviously land animals, but there are many legs like octopus.

And the length of the legs is different, and the fit is also very good. Some legs are used to run, and some legs are like hands, like octopus claws.

When he flew in, he did not know whether to call his hands, legs or claws. He had already embraced him quickly and gathered the waves together.

The above people are even more nervous. This multi-legged beast has a total of ten legs and four legs running, and the others can be used flexibly. It is also the toughest one when it comes to the top of the mountain.

Because other things run up, limited to a huge body, after being hit, attacked, it is easy to fall down. It can hold stones, branches, etc. firmly, and it is more stable than others.

At this moment, it directly embraced the dark waves. With the huge disparity between the two bodies, the waves were swallowed in an instant. Everyone was on the top and could only see its huge back, and could not see the wrapped waves. It is.

Of course, Shen Lang will not be afraid. Even if he is pressed or bitten by such a giant beast, he will not be able to kill him.

But the great fairy, if it is rubbed like this, it is too faceless. So when he just rushed over, he already had an attack plan.

The power of that iron rod, they are all in the eyes, with the strength of their king level, there must be enough wisdom to know that this thing is not easy to provoke.

He will now rush him in an encircling manner, and he will avoid being thrown into the entrance with his iron rod.

But Shen Lang actually put the iron rods up, but instead used the dead water whip!

With the corrosion degree of the dead water whip, even the scales of the king's dragon, in a slight touch, immediately corrode the meat. What's more, is this behemoth pressed under the belly?

As a result, this behemoth has not used its four legs to attack Shenlang has been opened up!

Shen Lang directly penetrated into his body. Wherever he passed, the dead water whip rotted all the organs. And he accurately sensed the location of Nei Dan, and directly picked it.

The people on the top of the mountain watched the waves slammed into the air, and then pressed the multi-legged beasts that he pressed, and made a wild violent temper, as if the waves had been crushed.

Everyone is pinching a sweat. If they are, they must not be able to support for a few seconds. They also want to attack the monster from above to save the waves.

Those who are in the canoe are of great concern, but they have greater confidence in Shen Lang, but they still insist on not taking it.

The result is also a bit of interest, Shen Lang has turned this behemoth out of the body, the huge body, has been opened up, ***** breath directly drifting away.

Looking at the waves and coming out safely, there was no blood on the body, and everyone cheered.

Chapter 1407 - God operation

When Shen Lang and the multi-legged beasts are close to each other, not far behind, there are two giant beasts fighting together!

One of these behemoths came from behind to help. The other one is the crocodile-shaped behemoth.

After the two eyes of the crocodile beast were burst out, they immediately became a scorpion, and the violent pain, and the sudden impact of the smashing, made it crazy.

It was completely desperate, and the mouth was madly biting, and the tail was also stunned.

The purpose is very simple, you make me jealous, I will die, but also to bring you back to the back!

Just after Shen Lang gave it a stick of his eyes, he immediately tapped it and pulled it to the front of the behemoth.

At that time, the most exciting and crazy time, the crocodile-shaped behemoth took care of so much, and with the residual influence before the blink of an eye, I felt that the enemy in front was madly biting.

And the behemoth that came over to help, watching the partner blinked, the first reaction was to save, and then avoid it.

In other words, it did not think about attacking at all, its goal is to sink!

Unfortunately, its hesitation in the moment has lost the opportunity to dodge. The crocodile beast has already bitten it. If it does not want to be killed, it must fight back.

They can come here, basically at the same level, and the severity of the impact on the space is not much different.

At this moment, although it has the advantage of both eyes, but the crocodile-shaped beast has been crazy, and has a desperate momentum, but it lost the opportunity and has some scruples, but the result has fallen into the disadvantage.

It's all in the middle of the mountain, so the big behemoth, if you don't have a good grasp, it's easy to roll over. The bite attack at this moment, and soon let them both roll down and go down!

Shen Lang did not immediately chase the two, and the other beasts are still approaching.

Under the arrogance of the past, the behemoths around the island have already known the situation here, and they have all come quickly.

They have just attacked halfway up the mountain, so the distance of the entire ring is much smaller than the island, and the time coming will be very fast.

But now Shen Lang still has a little free time.

He is standing on the head of the multi-legged beast, and looks like he is watching the excitement of the two giant beasts. It is actually a spiritual invasion!

Although he has already smashed many of the organs in the belly of the multi-legged beast, he also took the inner dan, but after all, it is the king's level. After all, there is such a large volume, and it is still alive.

At this time, of course, when it was the weakest will, Shen Lang was indiscriminate and invaded in an instant.

Although people and beasts are not the same, they are only different in external structure, or different in form. In essence, life is common, and the spiritual aspect is the same.

At the level of the king, it is possible to communicate with a certain degree of will, and the beast ***** can communicate directly.

Therefore, the invasion of Shen Lang, like the human powerhouse, directly entered its consciousness, using its remaining weak state to read all its information.

With the information of this behemoth, there are a lot of memories and pictures in the mind of Shen Lang.

These are naturally the conditions in their world, but now Shen Lang does not have time to understand so much, he needs information about other behemoths!

They are all high-level beasts that can communicate, each other's strengths and weaknesses, and they all have a certain understanding, and they can communicate with each other.

This information does not require careful reflection of the echoes. When you see other beasts, you will have their names and information.

Those behemoths come very quickly, and Shen Lang will work for a while, and they will face their siege.

This time it is not a two-headed one, but it continues to come from both sides!

What needs to be faced is the siege of dozens of behemoths!

Shen Lang instantly flashed in one of the directions, stopped in front of these behemoths, and then broke out with a roar.

“stop!”

His roar is not to drink casually, but to use what he has just perceived, and to sing out the beasts of their world.

The behemoth rushing to the front, immediately stunned, and the behemoths coming back later are a bit strange, I don't think why this different world humans will speak their language.

What Shen Lang wants is such an effect!

When he spoke, the eight-needle has been flying fast with him!

Originally a needle in the eyes of the behemoth, it is already insignificant, easy to detect. They have just shifted their attention, and they have let them relax.

Shen Lang passed directly from the first beast and did not stop.

The two lunar needles have been shot from the eyes into their brains. Not only are the eyes smashed, but the power of the explosion in the brain directly shocks them.

As his body passed, several giant beasts were settled in this way.

The Yueyue needle is a magic weapon, and with his call, he can fly along.

It's just that these behemoths are not stupid. They watched the first few partners suddenly stop and did not respond. They also knew there was a problem. The defenses are stronger in the back, and although they are suppressed, the lunar needle is not so easy to hit.

However, there are so many means of Shen Lang, and it is not a full moon. It is only a convenient way. After all, there are too many behemoths, and he must do it in the most economical way.

The attack of the lunar needle is difficult to detect. The attack of the stagnant water whip can ignore their defense power, and the iron bar in the hands of Shen Lang can not only be arrogant and violent, but also become slender and sword-like. Come attack.

In fact, his attack process is quite dazzling.

Just because the body of these behemoths is too big blocks a lot of sight, and his whole speed is very fast.

In the eyes of many powerful global players, Shen Lang seems to be surrounded by a circle. As soon as they pass, the behemoth is knocked down. Even if it is not immediately killed, it is also a heavy blow.

This picture, let them hold their breath, it is hard to imagine what the eye sees.

When Shen Lang said that he had shot, he did not need to bring other people, and he did not need to kill a **** road. Everyone still felt that he was a big man.

Now this scene directly makes them feel that their faces are sore, this is simply a godly operation!

And when everyone has been shocked by a wave of waves, and made a little numb, Shen Lang once again challenged their shocked bottom line, let them almost screamed.

It was the people who fell in the rain, the raft, and so on. They were very familiar with Shen Lang. This time, they were also greatly surprised. I did not expect that Shen Lang had entered this level.

Chapter 1408 - Surrender surrender

The behemoths are half-mountain around the mountain in the middle of the island. The deep waves are at one end. They are going to be surrounded, and of course they are close by.

The final result is about half of the left and right, around the seat where he was.

The Shenlang is facing the past in a clockwise direction to the left. The whole process is very fast, and the oncoming behemoths are directly hunted and hit hard.

Because everyone's speed is very fast, when he goes to the left, the other behemoths on the other side, the last one is to the right, the front has already caught up in the front, and the rear of the island is already empty. of.

Originally, according to normal, Shen Lang had to go around the mountain for a long time. If you want to meet it, it would be a direct turn to the back.

But they all looked at the left side of the mountain, and they didn't blink their eyes. They found that he actually went to the right side of the mountain!

Everyone looked at it on the top of the mountain. The monsters also felt like this. No one thought that he would go straight to the back.

The result is that Shen Lang easily sneaked from behind, killing them one by one, and when the behemoths reacted, many of them have fallen, and the last ten or so are left.

Dozens of behemoths, in such a short period of time, were hit by a wave of people. The remaining dozens of heads have already lost their hearts.

So they just turned back and a little confrontation with Shen Lang, and immediately ran down the hillside to the edge of the island!

Their purpose is very clear, as long as they flee into the sea, with this boundless sea, there is still a chance, and there is no need to wait to be killed as it is now.

This made the people on the top of the mountain, sincerely admired.

“Master Shen Lang is not a master of Shen Lang!”

“We were forced to defend the defenders here, and they were all eaten if they wanted to escape. Now Master Shen Lang is alone, just let them escape for a while!”

“Would we like to help? Don’t let them escape into the Pacific, it’s hard to catch.”

“Brother! Just measure your strength, there is Master Shen Lang, are you still getting your shot?”

“Haha, you probably haven’t rushed down yet, haven’t caught up yet, Master Shen has done it directly!”

Seeing here, the people who fell in the canoe and so on were completely relaxed. Shen Lang has far better than their understanding and made them confident.

“Everyone is going to kill the monsters that are not dead! If you can use the things you can, you can take them yourself, don’t grab them! All Nedan turned in!”

Feng Wuji is a quick arrangement.

In the last round of Shen Lang’s round, many of them were heavy-duty. For the time being, they have not yet died. These jobs can be done by others.

And she is also ugly to say that in front of other things, they can choose themselves, but the most important Nedan must be turned over and handed over to Shen Lang.

Others immediately agreed, this is not their credit. Now it is only necessary to complete the slaughter, and it will be able to share a benefit. Of course, it is very satisfactory.

As for the inner Dan... Everyone is afraid to think about it. I was still worried that I can’t leave it here and I will be swallowed up. It’s good to be alive now and get a little benefit.

Besides, killing these behemoths is entirely a credit for others. They also want to take Nedan!

The dozen or so behemoths quickly rushed to the beach, but they found that Shen Lang did not know when it had floated above the sea.

This is undoubtedly blocking their chances of escape to the sea, and it is unlikely that they will return to the mountains.

“Please spare us a life!”

There was a behemoth who took the lead and screamed at Shen Lang. Before I heard Shen Lang say the animal language, let it also negotiate with the animal language and Shen Lang.

Shen Lang also screamed.

“What benefits do I spare you?”

Between the talks, Shen Lang has reached the top of its head.

The behemoth and other behemoths were taken aback. I don’t know how Shenlang did it. They couldn’t see the speed so fast, and the eyes were so big...

“We... can listen to your dispatch, and if you need it, you can let us do anything!”

Of course, they want to encroach on the world. It’s just that they have been in the sea. It’s not easy to have a small land here, or whether the world is like this.

But they are wise. When there are so many humans coming, when they come to the ship, they realize that there must be more people, but they should be in a farther place.

Now that the emergence of Shen Lang, the situation is stronger than the people, they have been unable to continue the strong, even stubborn resistance will not work, only begging for life. As long as you are alive, everything is possible.

Listening to the dispatch, there is nothing you can do... Shen Lang is secretly funny, this is not the cold weapon war era, it can also make them serve as war machines.

In this age, if they want to fight, they will be murdered by missiles. And what can you do on a daily basis? Going to the zoo to visit, or to do research?

Without his personal suppression, it would only harm the party. Once they are let out, it is not known how many people are killed or injured.

“We are willing to surrender to you! You are the master!”

Other behemoths are also spoken together in the language of the beast.

Others don't know that they are communicating, it sounds like a beast.

“This can be considered, but I have to test it first, are you really loyal...”

After Shen Lang's “Hurricane”, the mental power dispersed and directly interfered with their consciousness.

The behemoths certainly understand what this test loyalty means. If they resist, the other side naturally feels that it is not sincere.

But if you don't fight, the other party can directly occupy its mental power, which may be their life!

But at this time, there is not much time for them to think about it Most of them are open-minded and give up resistance so that Shenlang can directly enter their spiritual world.

But there are still two giant beasts that are not convinced.

“Human! You must be not well, I will not be fooled!”

When they were arrogant, they flew directly, and they smashed the left and right sides. They wanted to smash the waves on the back of the giant beast and smash them at close range!

Before, how did Shen Lang do it, they did not see it with their own eyes, naturally do not believe that he has such a god, still want to try.

I saw that the waves were not moving, and I raised my hand a little, and the two lightning strikes went out accurately!

The heads of these two behemoths are almost the same creatures as the Tyrannosaurus Rex on Earth, but now he is hit by two lightning strikes out of thin air, and then falls directly, and the whole body is already burned!

Other behemoths are greatly astonished, and even more afraid to have any resistance, let Shen Lang enter their spiritual world.

Chapter 1409 - Beast world

The resistance of these two giant beasts just shows how much sincerity they can surrender. There is nothing more than a cure.

And it is not good to leave them at all, so after entering the spiritual world of them, the first is to quickly extract memory, mobile phone information, and then directly collapse their spiritual world!

Everything was done in an instant, and the ten behemoths immediately became idiots, and there was no consciousness.

Shen Lang waved again, and Lei Yuan attacked again, killing all the beasts!

This scene is another big shock for the earth monks who rushed down.

Even if you can master the lightning, is this still human? And just now, he seems to be able to communicate with these behemoths!

Everyone is completely convinced about Shen Lang.

At this moment, they have quickly developed the power of faith!

Not to mention the long-term, at least in the present, they are sincerely treating Shen Lang as a god.

The next moment, Shen Lang is leisurely appearing on the top of the mountain. Everyone is already eccentric.

Some of them have also helped. After all, the behemoths that have not died can have a lot of unknown risks, and they must also supervise whether anyone possesses Nedan.

This is a king-level behemoth. Even if it is shocked, the blood is still very precious. It also has a certain appeal to Dorothy, and she is also used to blood stasis.

Shen Lang is on the top of the mountain. It seems to be disdainful to do the chores, but in fact, it is necessary to restore energy.

After all, he has just been a one-time control of the spiritual world of more than a dozen behemoths, and it is not easy to make them all idiots.

On the other hand, he also needs a little time to digest their memories.

The memory of these behemoths is actually mostly rubbish. Not to mention eating and drinking, there is no value in the process of their long life cultivation and the memory of a little evolution.

Shen Lang needs to extract a part of it, that is, what kind of world they are, and how they got into the earth!

These are the real aspects that are dangerous.

Fortunately, he is now in the realm of the Great Immortal, the spirit is very strong, and there are a large number of powerful gods to provide the power of faith, and even feel the power of faith from the city.

All of this made him recover quickly, and he was able to complete the relevant information more easily.

The result is from the first multi-legged beast, to the memory of these dozens of giant beasts, together with the cross, comprehensive extraction of some essence.

Just like the dinosaur era of the earth, basically the world is the world dominated by giant beasts!

They are also human beings in the world, but they are only enslaved, and many are treated as food by giant beasts.

The behemoths have natural qualifications, and the cultivation and evolution of the day after tomorrow, such physique and longevity, human beings and other races cannot be called with them, and they live very miserable.

And these giant beasts, of course, have the pressure of resources!

When a civilization develops for a long time, it will always encounter the lack of resources. External expansion is undoubtedly the most common solution.

Just like the race of the demon outside the realm, they are to drain a world, then find another world to continue to multiply, wandering in countless spaces.

These behemoths are also looking for a way out, and recently, they finally encountered an opportunity and there was a space crack!

For them, of course, it is a great joy, just as the earth has disappeared from the sea.

But they are more cautious, not all of the most powerful behemoths are rushing in.

For the sake of safety, they first sent several giant beasts into the temptation. After the results were not obtained, hundreds of giant beasts were dispatched one after another.

Now the dozens of behemoths here are among the hundred behemoths, and some of them are lost in chaotic space.

As far as they can reach the earth, it is not like Shen Lang thought that there is no clear direction to guide, it is purely a coincidence!

The coincidence is that their space cracks, and the cracks of the earth without returning to hell, are not far from each other!

And because they are very strong in the flesh, even if they have suffered a huge space impact alone, they are not comatose and can still struggle to move.

Of course, they are invisible, inaudible, and not sinking long distances like Shen Lang, just undoubtedly struggling to move.

As a result, because their bodies are large, they move into the sea of innocence.

The result is a huge space shock, which is directly injured and greatly reduced.

Because of the relationship that is too close, and because they come from the king level, it is equivalent to the semi-fair realm, and the strength is strong enough. So most of them have entered the earth, and others may be left in the fog.

Of course, these are also analyzed by Shen Lang based on existing information.

But basically it should be inseparable.

This result makes Shen Lang feel a little heavy.

He remembered that the universe is a metaphor of a dark forest. The earth wants to explore the outside world, but it must also be wary of others killing you.

Just like in the days of Tiandu, there were disciples of Bao Puzong who met the same ancestor, and the descendants of Bao Puzong who stayed there, in the name of confession of the ancestors, wanted to go back to the earth to see.

But the purpose is obvious. It is to take this whole world directly into the back garden of their martial art.

Even if the earth's comprehension resources are poor, it is also a land, and there is a huge population.

It's just out of the mix, and I know that the site is a resource, and there are talents and money.

For the mainland China Shen Lang is not so worried, because the information has been dispersed, and Weiyangzi also killed. Even if they can't catch people, they know the entrance, and it is extremely difficult to find the earth in the chaotic space.

And in another two years, no return to **** will disappear, and that will close a back door.

But now this new space crack, which is opened next to a door, is worrying.

On the side of the couch, let others sleep?

Even if these giant beasts have not returned, the giant beasts of the world will be arranged to explore again, and even more powerful beasts.

Once the earth is discovered, the world of billions of people, for them, will be a feast for the feast!

Bao Puzong only uses the resources of the earth and will serve as their site. These giant beasts will really eat people directly, and they will eat a lot of people!

Chapter 1410 - Spatial research

All the monks, put all the beasts together and divide them together.

Dorothy drained their blood and made them save a lot. The flesh, the internal organs, the marrow, the bones, everything is a good thing.

The beast of the king's level!

Even in a small world like the Dead Forest, it is not easy to have a king of beasts, including Xu Haoyue who has lived for hundreds of years before seeing it for the first time.

Then when the relics like Qiangjialing are opened, you may find a bit of a savage beast that does not know when. The vicious beasts of the king level, they have hardly seen it.

Just like the brothers of Nanliuchuan and Nanliushui, they were almost empty for the Ironclad Red Dragon, let alone this level.

The wind did not make a decision instead of Shen Lang, as long as the most precious Nedan, the other basically did not.

It is also a rafting and falling rain, to see if there is anything suitable for the Ice Palace, but it is also limited.

For other monks, part of what was originally here is to defend the responsibility of the earth, and most of it is for the benefit.

Now they have not worked hard to pay anything. Basically, one person is divided into a king behemoth. He is already very happy. He is very respectful and grateful to Shen Lang.

Just take the inner Dan, they will be more convenient.

They have to clean up the whole behemoth, and it will not be solved in a single moment. Shen Lang will leave with them directly.

Of course, they will not be trapped here. Even if the ship that was coming before was destroyed, there are also ships that are scheduled to follow.

It's just that it's a good time, and there's no way to contact it. When I was trapped before, even if I came, there would not be enough powerful artillery and there was no way to save them.

Now that they are safe, they can wait patiently.

Shen Lang took them into the space of the heavenly book, and then directly sent away and took them back to Pingxi's home.

It took him half a day to go all the way to the Pacific Ocean.

They all said something to Shen Lang. After returning, I have not heard of a large number of monks coming back. Qiao Yuxian and others seem to have not returned.

Shen Lang also briefly tells about the situation after another.

For Bi Haihuan, he also used them before. When I heard that it was not the ancient ruins of Zhoushan, it was actually a city-state of 80,000 years, which made them all incredibly messy.

However, since Shen Lang is unclear, they all can't press and think more. Anyway, they can still see Bi Hai Huan, and Shen Lang will not be embarrassed.

Then Shen Lang said that it is a very serious problem.

The world of behemoths.

For such a possibility, they can also be guessed, basically the same as the previous trolls, just do not know that it is so close.

Why is there such a situation? The Shenlang conjecture and the pyramid of the Haizu still have an influence, that is, the space of the batch becomes weak, so cracks will appear.

However, these can no longer be proved, even if there is no closure of the sea, there will be no space cracks in the next wall, which will not affect the earth.

But there is still a year or two, for the invasion of the behemoth world, that is enough to complete ten times eight times.

This situation has made them all worried.

Needless to say, Shen Lang must walk in person...

Shen Lang has already decided, and this matter must be solved immediately!

Because from the time, the second batch of hundred beasts has been for several days, and this is still not known whether there is a time difference.

In general, there may be a third batch soon, and the third batch is not just a quantitative upgrade, but more likely a level upgrade.

If it is a few beasts, it is even easier to invade the earth. It is not so easy for Shen Lang to control them.

Shen Lang has left them with dozens of king-level Nedans received by Feng Jiji. This is the most useful for them now. He does not need to use it. In fact, he has a lot of spirits. It is a better thing.

However, they insisted that all the magic weapons be brought to him.

Because for them, it is almost impossible to use on the earth. This time it is also a behemoth outside the earth, or it will not be used. It is also a waste, but when it comes to the waves, it may be useful.

Afraid of their fears, Shen Lang also accepted.

Then he did not say goodbye to his parents. Anyway, just after seeing it, he left himself directly!

This time he was transferred to the middle of the Pacific Ocean, and he patrolled around the sea of innocence. Compared with the trajectory data of the Holy Grail, it really shrank a lot.

Then prepare, Shen Lang once again entered the non-returned sea prison, came to the familiar chaotic space!

After entering the chaotic space, even if his current strength is far better than the first time, but still can not see anything, still can not hear everything.

However, he has extracted and compared the memory of more than a dozen behemoths, and has already had an accurate positioning. Even according to how big the different beasts have turned, how much has been moved, and the specific direction is compared.

Although there is no directionality here, he has been here before. The Holy Grail has recorded the trajectory of his movement, which is self-referential.

Under the check of each other, Shen Lang moved his body and slowly came to the side of the crack in the space.

He is far from the body of a behemoth. He can't make a few mistakes and slam into it. He must swim carefully. However, it was discovered at the scene that the distance is really close!

It's like the hotel's rooms, there is another door next to you, or opposite you. When there is no light, it is really easy to go wrong.

After arriving at the edge of the space crack, Shen Lang was mentally prepared and then plunged into it!

He originally wanted to study it. In this chaotic space, he closed the door of the other party and wiped out the crack in the space.

But in fact, I can't do it at all. I can't see anything here. I can't hear anything. I don't feel the sense of God. I can't study it. If it is not assisted by the Holy Grail, he wants to find it, it will be many times more difficult than the behemoths.

In this case, you can only go there in person.

To worry about it, Shen Lang himself is certainly not afraid. He just worried that the earth was destroyed and hundreds of millions of people were swallowed. That is a problem.

And he himself entered the world of others, this should be worried and scared, that is, the other side. How to destroy is someone else, he is alone.

Not to say that the world has been destroyed, there is no problem with self-protection.

After entering the world, Shen Lang could not help but shine!

Although he was also subjected to two space shocks in succession, he was prepared, and there was also a protective armor, so there was nothing wrong with it.

What surprised him now is that there are many different worlds in the memory of the behemoth.

Probably the eyes of the behemoths are color cast, and in all their memories, it is a dark world. But now the world that Shen Lang sees is a bright, green world that feels like the Earth.

It will be green, of course because the place where he is now is in a forest.

To be precise, he is in the water!

This is a pool surrounded by lush trees, and this entrance is in this lake.

The giant beasts don't know when it's starting to appear, but one day, a giant beast enters the swimming pool, but it disappears directly!

They know this pool very well, and they don't have much depth. They can let these land creatures swim and bathe inside, and they won't drown.

But now it is directly disappearing!

At first, I thought that the pool was weird. I wanted to test it. After the trees and stones that were tested, I was thrown into it and I didn't even go into the water.

Their wise men and beasts realized that there was a problem. After some research, it was confirmed that this is the miracle that generations want to seek.

This place is now protected as a miraculous place.

So when the sun waves appear from above the pool, there are actually no creatures around!

Because the behemoths, they have completely protected a large area that is far away. It is the behemoths that can't be casually approached, let alone ordinary animals and humans.

Shen Lang has the essence of the memory of the behemoth, and naturally understands the environment here. After he came out, he did not stop and quickly observed everything around him.

For the sake of safety, he took the mysterious stone out and kept the way of hiding the self-cultivation.

According to memory, this is in the middle of a forest. In any direction, the distance is similar and far away.

However, Shen Lang did not explore the interest of the world. The world dominated by this behemoth did not think of any good resources to snatch. It is good to hunt the giant beast to win the inner Dan, but it will soon become the target of public criticism.

There is also a kind of spirituality, but it is not easy to find it suddenly. If you find it, people must be protected by giant beasts.

In the end, there will be a big fight...

So he did not forget the initial heart study this space crack, if possible, make damage from here, let it disappear!

As for himself, of course, he wants to leave before he disappears, but even if he does not leave, there is the Kunlun mirror of the Three Realms, he should still be able to transmit back to Earth.

For natural space cracks, Shenlang did not directly study it before. nonsense! If you have encountered it, then you will go straight to the world, and you don't need to suffer.

But for a small world like the Death Forest, he has seen a lot. That can be achieved through the transmission array, which is also the use of space cracks.

It's just a small world in the world, space in space, and this is a different space. Like the billionaire ring array, there are still space cracks in it, so that you can shuttle the two worlds.

As for the difficulty...maybe it go out of the province and go abroad? Primary school and university? Shen Lang is not sure!
