

First Strong 1411

Chapter 1411 - Cloud mound

The first thousand four hundred and eleven chapters

Really want to study, the difficulty is still very large, especially this space crack is no more than the general array method, is to confront the space law.

Shen Lang knew before that the billions of ring arrays were to cover up the cracks in the space that went to the rivers.

But in the past, I just thought that the great **** who built the formation method wanted to monopolize such a resource. In particular, through the layer-by-layer cracking of the billions of rings, it has not been affected by space.

But now I feel different, and the construction of the billions of ring arrays may be a cover-up compromise!

The purpose should not be to monopolize, to avoid the invasion of the earth by the city-states, or to make the earth strong, to prevent more people from invading the city.

Just as Shen Lang has seen such a space crack, when there is no way to eliminate it, it can be concealed by a matrix that cannot be cracked by ordinary people. It is also a solution.

Although this can be referred to, the problem now is that Shen Lang has no way to build a billion ring array!

Although he can open it, but with construction, the difficulty is far from a level.

Just like the average person, encountering an electrical appliance that has not been seen, even if it is more complicated, with reference to the experience of other electrical appliances, it is not difficult to find out how to open it.

But if you want to design and build an electrical appliance that you haven't seen before, it's harder than using electrical appliances.

The experience of Shen Lang against the law is to open the scope of application such as cracking, but it is still insufficient to build.

However, the experience of Shen Lang is not limited to the array method. He has experienced a lot of space cracks. He has seen cracks in different states and different worlds. These may also have certain reference.

It's just... I'm not waiting for the research on the cracks in the space, and I feel the change immediately!

Although still far away, he took the memory essence of more than a dozen behemoths and directly felt the breath of the behemoth.

Obviously, he appeared from this place and has already discovered the behemoth here. And because the guardians of the behemoths are relatively large, they did not come right away.

However, they have already been defensively ok. It can be confirmed that the behemoths will not steal privately. Now there is a change. They should not have thought of other worlds. They are more likely to think that the behemoths sent out are coming back.

For the enemy, they will immediately come over to guard and attack. For the returning scout spies, the normal process should be to inform the boss bosses!

Thinking of this, Shen Lang suddenly became a big man.

The behemoth here has not been subjected to two space shocks in succession. Basically, it is like a half-sex, and this is not so good.

And if you report above, it should be the beast god, and it will not be one, it may be a batch!

When you don't say time to study space cracks, it is a question of whether you can leave safely.

Shen Lang can only quickly collect the data such as the size range of the space crack by means of induction and scanning.

Then directly to the super-sonic speed of the holy armor, just choose a direction to quickly leave.

Shen Lang originally wanted to get the problem directly here, but this situation is also expected.

Because in the memory of the behemoth, this is in a forest. Unlike no return to hell, it is in the middle of the Pacific Ocean, and the average person will not be mistaken.

Therefore, he also made such a plan, and it is impossible to go deep into the world.

He is not worried that he will not come back after the in-depth, because he also uses the new three-door Kunlun mirror, which can pass through the place of transmission, mainly to see his own thoughts.

For example, a place he has not been to, can not be located and transmitted.

I have already arrived at the crack in this space, so now I can easily get back to the world.

Under the supersonic flight, the protection circle of the behemoth was quickly broken, and the giant beasts only felt the change and did not figure out what was going on.

After the flight left a thousand miles, Shen Lang stopped.

Now he needs to find a place to study the crack in the space. The research is of course also a side study. With his current understanding, he can only step by step.

After stopping, Shen Lang immediately compared the current situation with the memory of the behemoths.

This place is called Yunqiu. Strictly speaking, it is a large area nearby called Yunqiu.

Yunqiu is the territory of the llamas and beasts. The llamas and beasts are very powerful in strength. This is also the capital they can dominate for thousands of miles.

The llama and beast also sent to explore, which is one of the great beasts that have been remembered by Shen Lang, so he can immediately understand this territory.

According to the impression of the llama and beast, Shen Lang compares horizontally and feels that the contemporary hunchback king should be also the beast ***** level. The overall number of camel tigers is not too large, and the scope of the territory is large and scattered.

Within the “territory” of Yunqiu, a giant beast like a camel tiger is a well-deserved lord. Other birds and beasts, including the human race, are inferior creatures that have been exploited.

Basically, it is to contribute food to the young. And to a certain extent, such as the king’s level of beasts, beasts and the like, there is no need to eat ordinary animals.

But the problem is that the growth period of these giant beasts is different, even for the cubs stage, it may be decades. With this physique, the amount of food will not be small.

Other creatures in the territory can respond to future generations, mainly because of the inability of these dominant behemoths to multiply, and the overall number is limited, or else they will be extinct.

These circumstances did not make Shen Lang feel like indignation.

Natural selection, weak meat, this is the most basic barbaric law in any world.

Isn’t it the same on earth?

But the ruler on earth is human beings, and other races are eaten and killed.

Are pests such as cockroaches, mosquitoes, and mice not relying on human reproduction to continue the race faster? There is also desperately hiding.

In the world dominated by this behemoth, human beings have the same fate as other animals.

Shen Lang can't do the Father of the Father. He wants to protect only the human beings on earth. The human beings of this world have no intention to "liberate."

It will now fall in the clouds, purely occasional. All he wants is to temporarily stop the rest of the land in order to better study the cracks in the space.

But things are so clever, he just saw the surrounding environment clearly, and found the powerful atmosphere of the wild, the dust in the distance, obviously there are camels and beasts are coming, and more than one end, two ends.

He can find that the other party should also find him.

Shen Lang is very calm, this is not a coincidence, it should be rushed to the forest of space cracks, so with him in one direction, now only hit him first.

Really want to study, the difficulty is still very large, especially this space crack is no more than the general array method, is to confront the space law.

Shen Lang knew before that the billions of ring arrays were to cover up the cracks in the space that went to the rivers.

But in the past, I just thought that the great **** who built the formation method wanted to monopolize such a resource. In particular, through the layer-by-layer cracking of the billions of rings, it has not been affected by space.

But now I feel different, and the construction of the billions of ring arrays may be a cover-up compromise!

The purpose should not be to monopolize, to avoid the invasion of the earth by the city-states, or to make the earth strong, to prevent more people from invading the city.

Just as Shen Lang has seen such a space crack, when there is no way to eliminate it, it can be concealed by a matrix that cannot be cracked by ordinary people. It is also a solution.

Although this can be referred to, the problem now is that Shen Lang has no way to build a billion ring array!

Although he can open it, but with construction, the difficulty is far from a level.

Just like the average person, encountering an electrical appliance that has not been seen, even if it is more complicated, with reference to the experience of other electrical appliances, it is not difficult to find out how to open it.

But if you want to design and build an electrical appliance that you haven't seen before, it's harder than using electrical appliances.

The experience of Shen Lang against the law is to open the scope of application such as cracking, but it is still insufficient to build.

However, the experience of Shen Lang is not limited to the array method. He has experienced a lot of space cracks. He has seen cracks in different states and different worlds. These may also have certain reference.

It's just... I'm not waiting for the research on the cracks in the space, and I feel the change immediately!

Although still far away, he took the memory essence of more than a dozen behemoths and directly felt the breath of the behemoth.

Obviously, he appeared from this place and has already discovered the behemoth here. And because the guardians of the behemoths are relatively large, they did not come right away.

However, they have already been defensively ok. It can be confirmed that the behemoths will not steal privately. Now there is a change. They should not have thought of other worlds. They are more likely to think that the behemoths sent out are coming back.

For the enemy, they will immediately come over to guard and attack. For the returning scout spies, the normal process should be to inform the boss bosses!

Thinking of this, Shen Lang suddenly became a big man.

The behemoth here has not been subjected to two space shocks in succession. Basically, it is like a half-sex, and this is not so good.

And if you report above, it should be the beast god, and it will not be one, it may be a batch!

When you don't say time to study space cracks, it is a question of whether you can leave safely.

Shen Lang can only quickly collect the data such as the size range of the space crack by means of induction and scanning.

Then directly to the super-sonic speed of the holy armor, just choose a direction to quickly leave.

Shen Lang originally wanted to get the problem directly here, but this situation is also expected.

Because in the memory of the behemoth, this is in a forest. Unlike no return to hell, it is in the middle of the Pacific Ocean, and the average person will not be mistaken.

Therefore, he also made such a plan, and it is impossible to go deep into the world.

He is not worried that he will not come back after the in-depth, because he also uses the new three-door Kunlun mirror, which can pass through the place of transmission, mainly to see his own thoughts.

For example, a place he has not been to, can not be located and transmitted.

I have already arrived at the crack in this space, so now I can easily get back to the world.

Under the supersonic flight, the protection circle of the behemoth was quickly broken, and the giant beasts only felt the change and did not figure out what was going on.

After the flight left a thousand miles, Shen Lang stopped.

Now he needs to find a place to study the crack in the space. The research is of course also a side study. With his current understanding, he can only step by step.

After stopping, Shen Lang immediately compared the current situation with the memory of the behemoths.

This place is called Yunqiu. Strictly speaking, it is a large area nearby called Yunqiu.

Yunqiu is the territory of the llamas and beasts. The llamas and beasts are very powerful in strength. This is also the capital they can dominate for thousands of miles.

The llama and beast also sent to explore, which is one of the great beasts that have been remembered by Shen Lang, so he can immediately understand this territory.

According to the impression of the llama and beast, Shen Lang compares horizontally and feels that the contemporary hunchback king should be also the beast ***** level. The overall number of camel tigers is not too large, and the scope of the territory is large and scattered.

Within the “territory” of Yunqiu, a giant beast like a camel tiger is a well-deserved lord. Other birds and beasts, including the human race, are inferior creatures that have been exploited.

Basically, it is to contribute food to the young. And to a certain extent, such as the king’s level of beasts, beasts and the like, there is no need to eat ordinary animals.

But the problem is that the growth period of these giant beasts is different, even for the cubs stage, it may be decades. With this physique, the amount of food will not be small.

Other creatures in the territory can respond to future generations, mainly because of the inability of these dominant behemoths to multiply, and the overall number is limited, or else they will be extinct.

These circumstances did not make Shen Lang feel like indignation.

Natural selection, weak meat, this is the most basic barbaric law in any world.

Isn't it the same on earth?

But the dominance of the earth is human is eaten and killed is other races.

Are pests such as cockroaches, mosquitoes, and mice not relying on human reproduction to continue the race faster? There is also desperately hiding.

In the world dominated by this behemoth, human beings have the same fate as other animals.

Shen Lang can't do the Father of the Father. He wants to protect only the human beings on earth. The human beings of this world have no intention to "liberate."

It will now fall in the clouds, purely occasional. All he wants is to temporarily stop the rest of the land in order to better study the cracks in the space.

But things are so clever, he just saw the surrounding environment clearly, and found the powerful atmosphere of the wild, the dust in the distance, obviously there are camels and beasts are coming, and more than one end, two ends.

He can find that the other party should also find him.

Shen Lang is very calm, this is not a coincidence, it should be rushed to the forest of space cracks, so with him in one direction, now only hit him first.

Chapter 1412 - Forbidden information

If Shen Lang wants to dodge, it will not be avoided. After all, under the super high speed of the sacred armor, one second can be more than ten miles. In different directions, the llamas and beasts can't catch up.

However, since he found that he landed here, he will leave again and this information will be transmitted. Because they also have the means to transmit information from a distance, then he will be chased by the various territories.

Therefore, Shen Lang is now deciding, positive and these hunchbacks, if you can solve them, then you can delay the dissemination of information, then he has more time to hide.

In just a few thoughts, the wild camel beasts have already appeared in the line of sight, even if they stopped dozens of meters in front of the sinking waves.

What you see in the eye is the three-headed camel and beast. From the point of view of the block, they can all be called giant beasts, and their momentum is obviously much stronger than the dozens of giant beasts.

Basically it is the beast of the three-headed king level, and the state is full, without the slightest discount.

“A small human! Kill him!”

Shen Lang immediately heard that one of the llamas was using the vomiting of the animal language.

“Wait a minute! This man is not simple, just the movement, it should be what he made!” Another one was careful.

“How is it possible? Humans are not enough to eat even the teeth!” The third llama is also unbelievable.

Shen Lang listened to them and thought it was interesting. They were unbelievable at both ends and simply gave them a shock.

“Since it is here, don’t leave. You are also eating too many people. Let me eat this person today!”

He also called it out in the animal language, and he really surprised the three llamas and beasts.

It feels like three humans have encountered a chicken. The chicken is not only inferior to human beings, but also can spit out people’s words. Can you not think it is a monster?

They immediately determined that this is not an ordinary human being, and in any case, they must be arrested immediately.

It was at this time that they discovered that the surrounding environment has changed!

Yunqiu was originally the site of their camel tigers, not to mention that every corner is familiar, at least the land attributes, etc., are basically the same, and they understand.

But now Yunqiu seems to be controlled by people, as if they are wrapped in dumplings!

The earth actually moved!

Is this bent both right and left?

They are even more unbelievable, and then madly rushing toward the sinking waves, you must seize this sly human!

But when you look at the distance from Shenlang, you can’t get away with it. Instead, the surrounding earth is wrapping them up, and it’s getting faster and faster. When you look at Yunqiu, you really have to wrap them up.

The camel and beasts began to feel terrified.

“You are not human! What the **** are you!”

“There is a kind of let me go, I will crush you!”

Realizing that this is a human being, they began to scream, and they categorically did not believe that a small human could have such power.

However, they immediately realized the seriousness of the problem. They could disguise themselves as human beings, and they must be powerful beasts. No matter which side of the beast, the three of them are not opponents.

Seeing more and more close, they are helpless, can only give up swearing and shouting, and instead beg for mercy.

“We are near the Yunque King of the llama, and you give me some face!”

“We are not your opponent. Why do you want to do it to the weak?”

“The beast god! We are Yunque and people are good, but also in response to the call of the Emperor of the Emperor, everyone is the same, and still look after the mercy!”

Shen Lang just shot ahead and used the ability of the field to control them.

The whole cloud-cloud roll is wrapped up, but it feels very real in the field, but it is not actually wrapped up in the ground.

Their swear words, Shen Lang is not in the eyes, but the change in attitude behind, but a little meaning.

The king of Yunque is naturally the king of the cloud mound, the beast and the beast, and the existence of the beast ***** level.

And they seem to be treating him as a beast!

It seems that the behemoths here are powerful to a certain extent, such as the beast god, but can be familiar with human words and become human figures. Or what other races look like.

And the last mentioned Emperor, Shen Lang does not need to search for memory, fully understand what kind of existence.

In the memory of the dozen or so behemoths, the Emperor is a special existence and is the object of awe.

To put it simply, the behemoth that is revered as the Emperor is the king of the world dominated by this behemoth! It is the emperor among all the beasts.

This sentence makes everything clear. There is a change in the space crack. The Emperor does not know where he is, but he has ordered the nearby behemoths to rush to support!

There are thousands of miles in the cloud hills, which are connected to it, and naturally they are ordered.

The three llamas and beasts are rushing over, and they first encountered Shen Lang, but they did not know what kind of enemy they were in. So they saw Shen Lang's human form, but it was so powerful that they thought it was the beast of other territories. God is coming.

Shen Lang did not give them any chances. With his field of Daxian and the first shot, even the king of the behemoth, who is very strong in physical fitness, could not help.

Soon, the three kings of the hunchbacks lost their consciousness in the field. Among their own feelings, they were covered by the Yunqiu land and died.

After confirming that they were in a coma, Shen Lang was able to concoct, enter their consciousness, and extract their memories.

But he already has a lot of memory of the behemoths, so you don't need that much, just need to filter their recent memories.

From this memory, Shen Lang got a rough situation.

The forest where space cracks appeared was on the edge of the Yunqiu. It was originally an ordinary nameless forest, just like a piece of the vast Pacific Ocean.

But now, it has become a forbidden place and has been blocked from entering.

The two visits are all hosted by the giant beast. The first wave is a few death squads, and the second wave is the behemoths of all kinds of territories. There are dispatches to participate.

A few days later, the behemoth was also sitting in person.

But because there is no response after the first wave, the second wave does not know when it will react. Finally, the Emperor left, but left the behemoth guarding.

After all, this is just an ordinary forest before the space crack appeared. Now even if there is a benefit from the crack, there is no attraction for the level of the behemoth.

It didn't waste a lot of time here before it could determine the outcome.

The beasts of other ethnic groups naturally participate in this plan, and they all leave. The nearest Yunqiu is naturally entrusted with a heavy responsibility, and Yunqiu Wang is the beast ***** responsible for supervising the supervision of the forbidden land.

Yunqiu King can't leave too far, is the area near the forest in Yunqiu. Just before the change, Yunqiu Wang naturally knew, but did not care too much, but waited until the report to pay attention, and then Shen Lang has gone, it randomly summoned the hunchback of Yunqiu.

Chapter 1413 - Hide

According to the estimation of Shen Lang, the leader of the giant beasts here, these beast gods, is also the equivalent of the power of the great fairy. And the behemoth of the behemoth should be the level of the great god.

With his current strength, it is natural to deal with a beast god. There are no more than two. But if you reach ten or eight dozens, there is no way.

At the level of the Great God, he is the clearest and has no suspense of any challenge.

These cognitions have given him more plans for how to live longer in the world dominated by this behemoth.

However, the way they transmit information over long distances is a bit of a headache.

Shen Lang knows from their memory that it is equivalent to the spiritual power of the king's beasts and above, and can communicate with each other at a certain distance. If you want to contact the beasts of the same family, and the beast ***** wants to contact them, the scope Can fight.

And between the beast and the beast, the same can be transmitted from a distance.

The dozen or so giant beasts have this experience, indicating that all behemoth races can be done. Then he may be quickly transferred regardless of which direction and which territory he left.

This is also why Shen Lang has exhausted the three llamas as soon as possible.

And there is still a problem, because the monsters that can reach the king's beastly level, in fact, for a territory, a race, the number will not be too much, so here, once there is death, the beasts of the same group of kings will be sensitive To.

Not to mention the beast god, you can feel more real.

Probably the world, their spiritual power is linked in some way, such as the way Black Dragon King and Bagan, so that information can be transmitted from a distance, and once it is hung up, it can be found.

This kind of networked mode allows Shen Lang to stun them now, without directly killing them all at once.

The coma will not let other kings and hunters and beasts perceive them, but if the beasts continue to summon them, the three heads are fixed in one place and there is no response, and the beast will also be sensed!

However, the memory he had previously extracted was a king-level behemoth, and there was no beast, so he did not know the state of the beast.

Looking at the three giant beasts, Shen Lang hesitated for a while, and then made another decision.

Raise the willow sword with the power of the Great Immortal, see the sword smashing the three beasts in a coma!

The blood has flowed to the ground in an instant, and Shen Lang also took the inner Dan directly, and the others did not pay attention.

In the process of his sword, he has already made a directional guide, letting the blood of the three giant beasts flow in different directions.

The distance from the outflow is also a few feet. It is impossible to really flow into the river, but this is a confusing crime scene!

The most dangerous place is the safest place!

Killing the three kings of the camel and beast, this will definitely make the other kings of the cloud hills have been perceived, and let the distant Yunqiu king feel it.

However, according to normal thinking, the murderer who committed such a big case will inevitably hurry.

In particular, if the Yunqiu King Beast God already knows that this is from other worlds, it was just when Cangjie fled, and he accidentally bumped into the three giant behemoths. After killing and killing, it must be an accelerated escape.

And people in other worlds can't know how the world is delivered.

From this point of view, let Shen Lang not go far, but find a mountain in the vicinity, directly dig a cave, and then hide in. Let the G-3 release the detector and broadcast the full HD in the nearby picture.

In order to be more safe, he also took out the mysterious stone.

After doing all this, Shen Lang began to study the crack in the space.

Judging from the data from the Scandinavian scan, it is only part of the lake, and the entire area is much smaller than that of the non-refuge.

However, it is bigger than the crack in the space that goes to the waterfall in the mainland of China, or the cracks in the hundreds of millions of ringholes that hide into the rivers.

In general, a behemoth can go straight through, but it is difficult to get more monsters to enter at the same time.

This is also why they are subject to two space impacts, and the impact will be so obvious, because there are no other partners to share.

The direction that Shen Lang needs to study is very simple, whether it is damage or repair, including hiding with the array method, as long as they do not exist in the space cracks, they will not enter the chaotic space, and will not climb into the side. Earth crack.

He once did such a destruction, that is on the other side of the ocean, an ancient forbidden place, through the blood sacrifice of the vampire, opened a transmission channel to the city of Tallo in the city.

At that time, the accidental discovery was the world of Bihaihuan, which was thought to have no more intersections. However, after considering the technological gap between the two circles, it was unilaterally destroyed.

But in fact, strictly speaking, he did not destroy the space crack, but only destroyed the array that covered the space crack.

That is to say, the ancient candid discovered such a space crack, but it was covered and protected by the array method. Like the hundreds of millions of ring arrays, those who knew the array had the opportunity to go, but they would not be exposed and flooded.

And Shen Lang is destroying the array, and can't directly start the array, and it can't make space cracks appear.

Now this is a brand new space crack. If you want to apply the same idea, you must first build a matrix to lock it up, then destroy the "lock" and the natural behemoths will not be able to open.

But he couldn't finish building a battle!

He does not possess the rumors and theoretical knowledge and materials of the array, and he does not have the time. That's not like a lock, you can do it right, just take it and put it on, you have to build it on the spot.

But the giant beasts didn't even have time to observe him After a while, Shen Lang felt a strong impact. Immediately put away my mind and focused on the crime scene.

With the momentum of the raging, there are five giant beetles on the scene!

Shen Lang quietly observed through the sacred armor. After they saw the situation on the spot, they immediately discussed it. They could only judge that it was not the attack of other behemoths. They could not determine how they were killed. Then one of them went to Beast God reports.

The way to report is to complete the mental power. Specifically, it is not clear what the Shenlang is. He does not need excessive supervision. He does not say that the enemy is dark, and he is able to solve the problem with only five giant beasts.

"The King wants us to confirm what direction the enemy has fled. This is from the world. I don't know what it is. I must figure it out and master his information!"

After the report, the llama and behemoth immediately conveyed the command of the beast.

Chapter 1414 - Emperor

At the time of its reporting, the other four llamas and beasts had examined their bodies, including knowing that Nedan was captured and analyzing the extent of bleeding.

However, they also have a problem, that is, they can't see any traces of Shen Lang at all!

Shen Lang was the sacred armor, and then the giant beasts came from the ground. Now he is hiding in the vicinity, and naturally there is no footprint.

Of course, the breath of human beings is definitely different. The sense of smell of the behemoths must be more sensitive. However, when Shen Lang was hiding, he had intentionally swept a whirlwind, plus a large amount of blood. breath.

So now, they just want to smell the direction of the waves from the breath, and they are not available.

Of course, this situation can only be reported to the beast. As a result, the behemoth was greeted by the beast god.

Soon, their five giant beasts were separated from the scene, scattered out in five angles, and expanded the carpet search to see if they could catch up with the signs of the waves.

As for the sinking waves of the nearby mountains, a behemoth rushed past the side, but did not think that the murderer was under the eyes, and it was already far away.

After they left, Shen Lang continued to study the space crack.

Of course, the three bodies were not cleaned up, so they stayed, **** spread, and began to let some beasts around know. It's just that they have deep fears. After waiting for a long time, they slowly come closer and then eat away as soon as possible.

As for the beasts who have eaten the body of the king's beast, will it be mutated, will it become stronger, and it will not be known.

The status quo of these mountains and the wilderness makes the hiding of Shen Lang more risk-free. Even if there is a beast god, if you see this picture, you will not feel that he is still here.

In this way, he continued to immerse himself in the study of space cracks. Shen Lang did not have his own closed doors. Without the knowledge system of more arrays, he used the computing power of the holy armor.

Every time I think of a plan, I can fill in the data through the Holy Grail, simulate the operation, and calculate the success theory.

About a few hours have passed, and more beasts have come to lick the body of the llamas.

But Shen Lang inexplicably felt a guilty heart!

He immediately converges on his mind and then observes the detector of the Holy Grail.

The scene is still a lot of saying that the beasts are licking, they have not noticed anything, and there is no abnormality.

Shen Lang was wary, just a moment of guilt, let him realize that there is absolutely a super strong person!

Can make him feel the heart of the present, and even is not the general beast.

Will the Yunqiu King come over?

Or are they the gods and behemoths of this world coming?

And in the next moment, a strong breath has landed!

The reactions of the beasts were much slower, but they were much less tolerant. At this moment, they felt desperate, and no one could still care about it, and desperately escaped privately.

This time it appeared in the scope of surveillance, but it suddenly appeared out of thin air, without the huge momentum of the previous llamas.

When Shen Lang saw it, he was half-hearted.

Which one has come over... Look at this, it is the King of Yunqiu and the behemoth of the beast!

Yunqiu King is a beetle-level hunchback, so you can see it from the appearance. The beast ***** is not enough to let Shen Lang feel the pressure of the heart.

The other more powerful behemoth, the appearance is to make Shen Lang feel a bit weird.

This is clearly... a dog!

Although it is very huge, but the appearance of light looks different, it is not like a dog, a bulldog, it is more like the appearance of a small pet dog.

From the point of view, like a pet dog, but the body is huge, it looks weird.

Obviously more fierce and violent, the hunchback beast god, but this time it is behind the “God of the Gods”, let Shenlang have the illusion of seeing the fox and the tiger.

The gaze of the ***** dog dog glanced at the scene and directly locked the detector of the holy armor.

This is a very small thing, and it is not a technological product of the world. It is generally ignored as a small stone.

But the Emperor’s behemoth is not ordinary, directly found that this thing is not the Yunqiu thing!

And today, just another thing in the world came in, and then seeing it, it is naturally linked.

Shen Lang looked at the picture and the detector was sucked into the air and appeared in front of the Emperor.

Then I saw that the Emperor’s gaze shifted away. From that point of view, it should be looking at the place where Shen Lang is now hiding!

Then the detector shattered and the picture disappeared.

Shen Lang immediately jumped out and left the small cave that was newly dug in the foothills.

However, the expected attack did not fall in the cave, the Emperor and the Yunqiu King, so he looked at him, did not shoot.

There is no doubt that the Emperor has already discovered him, but he has not attacked.

Now they look at Shen Lang, which is also a weird look.

Shen Lang knew it, just like he saw something like a pet dog, it was a weird monster.

Since the other party found out his existence, there is no direct attack, so Shen Lang is also embarrassed to run, or sneak attack.

Of course, this is also because this ***** is powerful enough, it is completely a ***** level, it can crush him, and it is not so easy to escape. Others have decided to take him, no need to attack.

“You are Yunqiu King and Emperor?”

They were even more surprised when they heard the words of the waves, and they looked down at the waves, as if humans were teasing small animals.

“Human, are you coming from another world?” The Emperor asked directly.

Shen Lang nodded: “You can say that.”

They are very much looking forward to this answer After hearing it, the obvious eyes are brighter—with their eyes, the increase is really bright.

“You shouldn’t have come by coincidence, but you have seen our ethnic group, so come with it?” The Emperor asked again.

In front of the Emperor’s behemoth, Yunqiu King did not have a mouth.

“You can say that too.” Shen Lang nodded.

The Emperor is a god-level, not so easy to lie, even if it has not traveled behind the crack in the space, there may not be experience of crossing, but he still guessed the key.

Shen Lang, a different world of people, can also say that the animal language here, can also guess that it is in contact with the behemoths.

“You... what kind of world is that, are our past races still alive?”

This ***** is probably the longest life in the behemoth, so it is not too much value for the life of other behemoths, and is more interested in understanding the world outside.

Chapter 1415 - The guests

However, this problem makes Shen Lang difficult to answer.

What kind of world is good to say, how do those giant beasts still alive?

Did you say that you have all been killed by me?

“It’s not like you. Our world is the world dominated by the human race. There are not many powerful orcs like you.”

Shen Lang answered the previous question and avoided the latter question.

“The people of your world are all like you?” The Emperor’s behemoth was obviously a little surprised.

Shen Lang smiled: “Of course not, I have the strongest one, and the rest of us in the world are much weaker than me.”

He is telling the truth.

Of course, it is also deliberately telling the truth.

Just like the Emperor sent to explore, it is a monster above the level of the king, but it will not be a stronger beast, nor a weaker behemoth. This is a strategy.

If there is danger, or if you can't come back, those who can't afford it, the loss is not big; but they must have a certain strength, too weak to support.

The same goes for the earth to explore the return of the sea. The Holy See is led by the Archbishop of Paul. After the success, the Pope personally went into battle.

So, in turn, Shen Lang thinks that the Emperor will treat him like this, and he thinks he should be medium. The more he said that he is the strongest, the more the other party will not believe.

“They... are you killing?”

When the Emperor's behemoth asked this, the Yunqiu King was aggressive. This is its ethnic group, there is hatred, just because the Emperor is here, it does not dare to surpass.

Shen Lang does not care to say: “Obviously. And ... the one hundred that you sent out is basically what I killed.”

Originally, he heard that he admits that Yunqiu Wang has been angry and soaring, but he was shocked to hear the latter sentence.

Killing three llamas and beasts, there is nothing, it can do it. But if you want to kill a hundred, then it can't be done.

This seemingly small, different world of human beings can kill hundreds of giant beasts, and it can't help but reevaluate.

The Emperor looked at Shen Lang with great interest and did not have anger.

It still has a lot of interest in this world dominated by mankind. The Shen Lang in front of him is one of his entry points.

As for some of the dead beasts, there will be sacrifices when they open the territory!

The hunchback beast ***** Yunqiu King, gave up the question of Shen Lang, but waited for the Emperor to speak.

“You don’t have to escape, you are our guest.”

The words of the Emperor’s behemoth made Yunqiu Wang a little anxious. Did the three llamas and beasts die like this? Is it possible to explore the hundred giant beasts to die?

“If you leave again, you will be in danger. It is not good to kill our herds. So please come with me and talk to my place.”

When the Emperor’s behemoth finished, he intentionally converged his breath, did not give a little pressure to Shen Lang, and also showed that it was not hostile.

Yunqiu Wang was still anxious. When he heard this, he was surprised.

And it also understands that this can’t change the opinion of the Emperor, and can only give up his head and give up.

Shen Lang smiled and said: “If this is the case, then please ask the Emperor to lead the way, I am willing to accompany.”

He also showed a look that “can’t run anyway.”

In fact, if you want to escape, even if you build a sacred armor, you can’t escape from the Emperor’s hand when flying at supersonic speed.

For example, the same high-level cold autumn, with Mo Fei flow three of them, can quickly come from a hundred miles away. It can be seen that its speed, let alone the field, can be blocked directly.

However, Shen Lang certainly won't be unsure, he still has two leaning!

One is the space of the heavenly book, which can be hidden at any time. As for whether the **** can find it, it is not clear.

There is also a Kunlun mirror of the Three Realms. As long as you have been there, you can go straight through!

Even if you can't directly cross the earth, you can still do it through the crack near the forbidden space.

In that case, it is a thousand miles away in an instant, and at the speed of the Emperor, it should not be able to catch up.

Thousands of miles away... I want to be clear and let Shen Lang be a little surprised. At the speed of the Great God level, a thousand miles may arrive in a few dozen seconds.

And his crossing is limited, and he is not familiar with the environment here, unlike the earth or the mainland of the island can travel farther.

In any case, the Emperor invited, for the time being, did not show any malicious, Shen Lang decided to go to the appointment.

He came here to solve the problem.

The space crack has been studied for a long time, and there is no progress. If the gods who have affected the problem can be settled, then the matter can be solved satisfactorily.

In the realm of the Emperor, there should be no interest in the human beings and civilizations of the earth. It pursues a higher realm and a broader space for evolution.

When the Emperor left, he let Yunqiu King not follow, and then left with Shen Lang.

In order to show sincerity, it did not directly carry the Shenlang, but slowed down and waited for the waves.

Later, it was discovered that the speed of Shen Lang was also very fast, which made it more and more interested in the speed.

Shen Lang is also accelerated by the holy armor to keep up with it.

Walking with the Emperor, I also let Shen Lang be a little scared. I thought it was too simple. Just a thousand miles away, it's already far away for ordinary people and ordinary beasts. It's not a big deal for the gods of the Great God level!

So it's only looking for it now, it should be far away, it takes time to pass it to it, or it's a carpet search, or something else is delayed.

Otherwise, it will come soon.

The place where it travels with the deep waves is already tens of thousands of miles away. According to the memory of the behemoths, the place where the Emperor lives, is called Hengshan, where the emperors are all there.

Yokoyama is also equivalent to a forbidden place in the hearts of the behemoths No ethnic group dares to arrogantly rush.

Now, Shen Lang is following the Emperor and directly enters the Hengshan Mountain where it is entrenched.

After coming in, you can clearly feel that the aura here is far better than the general place. Although it is not a small world, it is also as special as a hole in the sky.

“That is... that is...”

Shen Lang suddenly stunned and pointed at a building below, could not help but screamed.

When the Emperor saw this human being, he felt that this little thing had a different calm and calmness. Now he finally saw that Shen Lang was a little surprised and disappointed, so that it could not help but show a proud smile.

“That’s not a big deal. Your world hasn’t seen such a majestic thing?” It’s a deliberate rush, and it’s also a side of the world.

Shen Lang could not help but smile.

This is not a majestic thing, it is simply too unbelievable!

Chapter 1416 - Cottage construction?

The building that makes Shen Lang marveled is a cube building, the style is exactly like the 80,000-year-old temple that was seen in the ruins of the past!

Of course, this is just an architectural style that is also likely to be seen on Earth. It’s just that this is the world dominated by the behemoths. Everything is a beast style, but it is incredible to see such a building.

However, after careful observation, Shen Lang still noticed the difference. First of all, the material is incomparable. This is simply too rough.

Moreover, the specific height and texture of the building are far from being comparable to the Temple of Heaven. It’s just like color, it’s done a lot, including a square.

Shen Lang has a feeling, as if this is a poor quality version of the festival.

“Is this what you built?”

Shen Lang couldn’t help but ask, his eyes and tone clearly revealed that he did not believe it.

The Emperor was questioned by him and made a slap in the face.

“This is what the ancestors left behind.”

It is also a helpless response, they do not need such a building at all, and naturally they will not develop such aspects.

If this is not something left by the ancestors, it may not be preserved.

“Can you let me see this guest?”

Shen Lang asked, but immediately realized that don't really treat yourself as a guest, no such qualification. This is what other people want to know about the world of the earth.

He immediately added: “I have seen similar buildings, I want to compare them and see what is different from ours.”

The big eyes of the Emperor's behemoth are staring at Shen Lang, and sure enough, the response after hearing the next sentence is different.

“of course.”

The Emperor's behemoth flew directly to the square, and then Shen Lang followed.

Both of them are in front of the cube building, which is more majestic in the near future, but Shenlang feels more like a cottage version.

“Can you go in?” Shen Lang looked at the appearance for a while and asked again.

The Emperor's behemoth looked at him a bit strangely: “Did you have seen something similar? This is a whole, where is it going? Is your building empty?”

Although Shen Lang can't explain why there is a cottage version like the Sacrifice Project, I still think it should be hollow.

“Yes, I have seen, the style of our side, which is hollow inside, can go inside, can hoard items, can live in it, etc.”

In the conversation between Shen Lang, the sacred armor has been added to the naked eye, and the walls of the cube have been scanned together.

Then he approached the past and reached out and touched it.

However, with the sacred temptation, there is no intelligent system, and it cannot be invaded.

He was a little disappointed, but he felt a bit relieved.

If the world of this behemoth has a sacrifice project, and all of them are respected as the great ***** of the world, it is really ... that Bihaihuan has come here.

Since not, it may just be a coincidence. There is no such thing as a thousand worlds, perhaps a building made by the ancestors of the Emperor.

With some retrieval, soon, the texture of one of the sacred nails was slightly different.

“Please rest assured, I am not malicious, just want to compare it, and will not destroy it.”

I first hit a vaccination to prevent the Emperor from attacking him.

Then Shen Lang flew to the place, tried to press, and then used his arm to push and suck. Soon, there was a looseness in that place!

The behemoth beast that looks like a pet dog, because of its huge physical advantage, does not need to leap, the probe can be close to see.

When Shen Lang pushed the door away, let it surprise.

Obviously, it never thought that this could be opened!

With its wisdom, it is also discerned that it is not Shen Lang who has done damage, but normal opening.

Probably because it was something left by the ancestors, it was provided for generations, and it was not going to be touched casually. I did not expect such a portal.

Although Shen Lang has opened a door, it is far from being able to follow the smoothness of the Temple of Heaven. It will not open naturally, and it feels very card.

“Can God Emperor become smaller and go in and see?”

Shen Lang made an invitation at the door.

The Emperor’s behemoth is somewhat awkward. This is what his ancestors left behind. The result is a day when he came to the world, or a human being, but discovered a secret.

But it also has a strong interest right away, because this human means is more than imagination!

It also feels wise for its own strategy. If it is oppressive at the time, even if it can capture memory, it may not know how to use it.

It has surpassed the beast **** and reached the same level as the human god. It is of course not difficult to reduce the body.

Soon, the Emperor’s behemoth was reduced to the size of Shen Lang.

In this way, it is more like a dog.

It just looks like a small pet dog, but now it is a person who is so big, still a little weird, like a fat dog.

“Let’s go in and see.”

Shen Lang took a piece of glowing stone and then walked in.

I was able to find the door, I was able to go in, and I was skeptical about the project to the cottage.

The light of the stone is limited, but the Emperor's behemoth is the realm of the great gods. The Shenlang is also a realm of the Great Immortal, with a slight brilliance, enough to let them see everything clearly.

After entering, Shen Lang soon discovered that it was completely empty, far from being comparable to the high-tech of the Temple of Heaven.

However, the thickness of the wall is still very large, and it is left by the ancestors of the Emperor. It has always been well maintained, so it is still well preserved.

Just a hollow building, let Shen Lang a little relieved.

"I didn't expect it to be empty! You have seen such a building. Are there many such architectural styles on your side?"

Under the sigh of the Emperor, I couldn't help but ask the world again Shen Langzheng wants to say it is not the time, but found a huge wall above, there are many characterizations!

There are many patterns to depict, not simple totems, but detailed paintings.

After discovering this, the Emperor also instantly became bigger, and immediately used the body to cover the mural.

Undoubtedly, its ancestors left such a building, and all the ancestors thought it was useful, but they never knew it and slowly gave up the research.

But now I have entered it and found a mural, which is probably a secret!

At this moment, it even hesitated to kill the waves.

But considering the attraction of different worlds, there is still no idea.

In fact, its occlusion, for Shen Lang, is nothing at all, he can use the sacred armor, scan and even close-up observation.

“Hey?” The two were surprised at the same time.

Chapter 1417 - 1 dog with a mission

The Emperor’s behemoth and Shen Lang were both surprised because they both saw the first thing that surprised them.

Or, can’t say something...

On the murals on the wall, some vivid patterns are depicted. They are not ordinary people. They can observe a large range, and there is a general understanding of the extensive.

But among them, there is a place right away that attracts their attention.

Inside this wall pattern, there is a life-size image that can be faintly recognized, like a swell!

The surprise of the Emperor’s behemoth, of course, is because of the human beings portrayed in the buildings left by the ancestors, and it is also a bit like this human being in a different world.

Surprisingly, Shen Lang found a new footnote.

This is a cottage festival project!

In the Sacrifice Project, there is the same effect of Shen Lang, but it is a product of black technology, a huge projection of complete virtual reality, which can be changed at any time, and can also display many videos and details.

And here is the original depiction of hand-polished, so I just carved him on the wall.

Surprised, and then quickly observed other patterns, Shen Lang finally had a general cognition.

In addition to the vivid image of these waves, these patterns are more realistic. One is a woman, which is more realistic than him. There is no doubt that nature is Bihaihuan.

The other one is a dog, a pet dog that looks like a giant behemoth.

In addition to the image, the other ones only have a few appearances, and the others are simple and thick lines.

But basically the content can still be guessed.

Of course, this speculation is because Shen Lang has a brain for guessing, let this dog **** guess, it will still be embarrassing.

The general idea is that this dog is a test piece of the world goddess Bi Haihuan!

Bi Haihuan and the scientists jointly built the Sacrifice Project, which is to travel through time and space, in order to find the Shenlang. But even her, she can't take risks in her own life, mainly because she is afraid that it will not be sent back.

Therefore, it is natural to have a test article. As for why it is a dog, it is not known. It may be that the dog is used first, then the person is used, or it may be different test items for different days.

In short, this dog is not a product, but a blessing guide from Bi Haihuan, basically making it a beast.

After all, there is more wisdom to bring back more information.

In the end, of course, it was a success. Through the Sacrifice Project, this pet dog was transferred from the world of the city to the world.

After it arrived here, it was a barren land, and certainly not the earth world that Bihaihuan was looking for.

And it wants to go back, but there is no way!

In the end, the dog began to practice in this world by relying on the cultivation method of Bihai Huanhuan. In the end, it became stronger and stronger. It also relied on itself and, according to the impression, wanted to build a sacrifice project.

It is not anxious to go home, but wants to bring the information back, this is its mission!

It is only a dog after all, even if it becomes a beast, if you have seen the sacrifice of the heavenly project, you can only barely build a skin.

Sacrifice to the sky project, that is the big sea-air shuttle machine built by Bihai Huan and the most powerful scientists in the world of the city, can you imitate it by looking at the appearance?

Even if Shen Lang has all the information, he wants to build it, and he can't build it.

Technology, materials, hardware and software are all indispensable.

So there is no doubt that this dog, who is loyal to the task, can't go back in his life. In the end, it cultivated itself into a spirit of the gods, but it could not change this reality.

It is not known how many years have passed, and the world has slowly risen with many other behemoths. It has not forgotten the task. In this world, and other behemoths have left the blood of future generations.

And this cottage sacrifices the heavenly project, it is the clue left by it, and now the portrayal on the wall is all its own hands. Its purpose is to let future generations find a way to go back.

Just looking at the appearance of the Emperor's behemoth, this secret should have been lost. It does not know that there is such a thing inside.

After analyzing this, Shen Lang is also embarrassed.

It seems that the timeline here is probably the same as that of the mainland of China, that is, the world after 80,000 years of civilization.

This kind of beast dog, transmitted to the world, is already 80,000 years ago, until it is dead, until the generations of its descendants are dead, until now, the generation of the Emperor and the behemoths have not been able to go back.

“Do you know what this means?”

The Emperor’s behemoth heard the surprise of Shen Lang and saw the reaction of Shen Lang.

And after reading it carefully, it also recognizes that this is not a secret.

However, it is still a little embarrassing to ask it to ask a human to ask the ancestors, until they look at the way it is.

Shen Lang looked at it.

The Emperor’s behemoth narrows the body and maintains a height similar to that of the Shenlang to show respect.

“If I didn’t guess wrong, this should be the origin of the ancestors of the Emperor, and the legacy of it.”

“Please continue.”

The Emperor and the Great Beast also think that this should be such an idea, but it can’t be understood. There are human beings in it, and there are many things that it can’t understand.

“I will recognize that I have seen this real...”

Shen Lang pointed to the Sacrifice Project on the portrait. “This is incomparable. Your ancestors are great, but this is something that many humans can build. It has no helpers and no materials here, so it cannot be made.” ”

The emperor’s behemoth seems to understand.

“It is transmitted from the human world through this thing. It wants to go back. Finally it becomes a **** of yours, but still has not found a way back, so I left this information and hope that future generations can go back.”

Shen Lang avoids the specific information, just sorts out the incident to it In the end is the big **** level, even if it is not a world thing at all, after listening to it, it also understands a general.

It has already reached the peak of its inability to break through, and there is a space crack that has made it think of a better world.

Now I know that the ancestors originally came from a more powerful human world, and naturally more fascinated.

“This? Why is it like you?”

“Hey...” Shen Lang said what to say.

Tell the truth to it, when it was empty, he couldn’t figure out what he was, and he thought it was a compilation. If you don’t tell the truth, it’s a pity that you can’t use it in a relationship.

“The people around you are almost the same?”

After all, Shenhua has only seen Shenlang, a man of different time and space, and the human races and beasts here are similar in the eyes of their high beasts.

Chapter 1418 - Game

“Correct!”

Since the Emperor's behemoth has such a misunderstanding, Shen Lang will admit it.

"But the Terran also has gender differences. You see this is not the same as me."

Shen Lang refers to the image of him and Bi Haihuan to all men and women.

The Emperor's behemoth feels that what he said makes sense. "So, my ancestors came from your world? And in the end, all want us to go back?"

Its gaze sparkles with a different brilliance.

Originally, it wanted to go to a whole new world to understand. The human being in front of us is the world from the source of ancestors. A long time ago, the ancestors could be sent here, and the world must be much more advanced.

Shen Lang helpless staller: "Unfortunately. It is not from my world, but I have seen this in another world."

The first reaction of the Emperor's behemoth is definitely not to believe that this human being is afraid of its invasion.

"You can rest assured! This is the source of my ancestors. I will never have any malice. I just want to see it. You also saw it. This is the wish of my ancestors..."

When it comes to it, it suddenly reacts.

"Wait, you said that you have seen it in another world? Have you been to other worlds besides your world? Can you have more worlds?"

The Emperor's behemoth is completely excited.

There is a space crack that makes it feel like there is a chance to pass another world, which is already very attractive. Someone has come over now, and said that there is a third world that has exceeded its expectations.

Compared with its personal strength, Shen Lang can safely shuttle several worlds, then it is even more problem-free!

Shen Lang was just telling the truth, and he said it.

Now look at his reaction and think about how to round it up.

“I have indeed been to other worlds. If the Emperor wants to go, whether it is going to our world or other worlds, I am willing to take you there.”

When I said this, I immediately hesitated the Emperor.

I thought about it for a moment. Just now, Shen Lang did not mean to let it go. It just said that it was not their world, but another world.

Just like Shen Lang said that he is the strongest on the earth, the Emperor and the Great Beast do not believe the same. Now he is willing to take him past and make him doubt.

If this is the building left by its ancestors, and it has just come in together, it is doubtful that these are the illusions created by this person!

Even so, it is now distracting, and carefully touched the picture on the wall, confirming that it is not an illusion, nor is it just emerging, but a very long-term depiction.

“Very good, I really want to see it. Please tell me more about these paintings!”

After the Emperor’s behemoth is finished, let the Shen Lang continue to observe.

Shen Lang did not deny it, and looked carefully. However, there are also other aspects, and the other faces have not been portrayed. And in this space, it is much smaller than the temple.

However, the first pictures in it can be further confirmed, and it should be basically inferior to what he speculated. And he searched for the content of the Shengjia upgrade to

the heavenly engineering wisdom system, and indeed there was a record that once sent a puppy.

“The Emperor, your ancestors, have you left anything special?”

I can't see anything from the picture, but according to the record, the puppy has something like a collar, it is a signal transmitter.

At that time, the scientists had no way to take back the things that were transferred in the place where there was no base equipment. In fact, even if it can not be transmitted successfully, it is not sure.

Therefore, in the living thing, there is a signal transmitter. If it arrives successfully, it will send the pictures, data, etc. taken over there according to the original channel.

Compared to a living animal, it is only a short period of data that will undoubtedly be much easier.

However, this is only an idea. From the experience of Shen Lang, it is impossible to transmit anything other than the magic of faith.

He now wants to see this dog, and there is no signal transmitter at the time.

“No.”

The Emperor's behemoth shook his head directly. It was already unknown how long ago it was, and it was completely unrecognizable.

Then both of them searched for it and the results were nothing.

“What do you think is there?” The Emperor Behemoth asked.

“I don't know, I think that since I sent it over, there should be something to let it go back, so your ancestors will always think about going back.”

Shen Lang's words made the Emperor's behemoth nod.

"But in the age of your ancestors, you may not know how many thousands of years have passed. Even if there is anything at the time, it completely collapsed."

It's not hard to imagine that no matter what the collar or anything else can be placed on a puppy, it won't be too big. And finally the puppy is cultivated into a behemoth, and it should have been broken and destroyed.

It's not destroyed, it's not going to last for 80,000 years.

After checking it again, everyone was a little disappointed.

The building was closed again, and the waves were watching the outside.

I didn't expect a dog to be so loyal and never forget my task!

With its size at that time, even if it was already a beast, it would be impossible to make such a cottage base, and it would be after the behemoth of the great gods in the future.

It is a puppies that come from a strange land in the world. It is not easy to survive. Even if there are various factors such as the environment, if you want to cultivate to this extent, you don't know how many thousands of years have passed!

And when it comes to the end of life, it also remembers its own tasks, can not make people feel embarrassed.

It will make Shen Lang feel, and of course, because of Bihaihuan, this is almost a projection of Bihaihuan's lifelong search for him.

The future cannot be expected, only cherish the present!

After coming out, the Emperor's behemoth came to a large cave with Shen Lang. This is the Dongfu in Yokoyama It is directly cutting through the middle of a mountain, just like a ghost, and looking at it. That scale should also be repaired from generation to generation.

Such a huge-scale Dongfu is already very popular for the Emperor's behemoth, but for Shenlang, the space is wide. The Emperor's behemoth is also as tall as him, so everyone is strange here.

"Guests of the Terran. You killed our Orcs and took their spiritual memories. In the presence of Yunqiu King, I didn't care about you. And I also let you see the architecture of the ancestors. It is already very sincere hospitality. It is."

When the Emperor's behemoth said this, the words turned: "It is now your turn to make all the details of your world clear! If there is concealment, I don't mind doing it myself."

It is already a realm of great deities, although it will not be the same as a human monk, but it must also have the same means.

It is impatient, and Shen Lang knows that it is time for a positive game.

Chapter 1419 - Shocked the Emperor

"The orcs that you sent arrived in our world and let us discover this possibility, so let me come to understand the situation. I have not concealed it. The Orcs of the past have basically been killed by me."

Shen Lang looked at it very calmly, and single-handedly broke this state.

The Emperor's behemoth is also watching him, trying to figure out what is in the words of Shen Lang.

"Why just let you come alone?" It couldn't help but ask.

Shen Lang smiled faintly: "What do you say? Of course, because we are not malicious, we don't need to send a large number of people to come over, just let me be a representative."

He said it was natural, but the Emperor's behemoth could not believe it.

If he can kill a hundred behemoths by himself, then he will come alone, the effect is better than the hundred behemoths, and there is no need to make a big move.

And before the emergence of Shen Lang, he left the forbidden land at a rapid speed. If it wasn't for himself, it might have left far now, or hidden under the eyes of everyone in Yunqiu.

Such a person is indeed more effective than the army of the hundred giant beasts it sent.

Such a character is just a scout for a path, and the world over there, how powerful it is!

Such a world, said no evil, who can believe?

Looking back on what I saw before, the ancestors may have come from that world. It is already tens of thousands of years ago. What is the level now?

Shen Lang's current personal strength cannot be compared with this sacred beast. He can only win the game through psychological game.

In theory, it is necessary to let the Emperor's beast give up to the earth!

Otherwise, even if it is alone, it will find that the earth world can't stop them, and can push forward directly with the giant beast.

"When the Emperor is also interested in going to our world, how can I go with me? Bring a group of kings."

Shen Lang's enthusiasm was invited, just like the average person invited to go to the house as a guest.

The more enthusiastic he is, the more vigilant the Emperor Behemoth is!

It was also a warm invitation to Shen Lang and took the initiative to express sincerity, but that is because he has absolute control, this is its territory, its world, it is the master of this world.

But for the same reason, going to the world of others, that is, others are dominant.

Moreover, human beings have killed hundreds of giant beasts that they have sent in the past. How can they sincerely invite them to the past?

Is this unclear conspiracy?

With their physique, when they shuttle through the cracks in the space, they can only come one by one. If the other side is ready for a group of masters, it will be slaughtered one after another!

Even if it is very confident about its own strength, it does not dare to underestimate humanity. After all... even his ancestors were sent by the human world!

“I am interested, now please tell us more about your world!”

The tone of the Emperor’s behemoth is a bit serious, indicating that Shen Lang is in a correct posture and honestly confessing the situation. This is not your world!

“No problem. It’s ambiguous to say, I will let you see it!”

As soon as Shen Lang’s hand was lifted, he immediately presented a realistic holographic stereoscopic projection through the sacred armor, and then screened all aspects of the picture.

The pictures recorded in his holy armor are not only the earth, but also the watershed city-states, as well as the mainland of the island, and now they are presented, and they have been intentionally screened.

For example, the situation on the earth can be presented without any presentation. Whether it is the density of the population or the high-tech city skyscrapers, the situation of the city can be presented.

To present the natural status quo, it is to present the mountains of the mainland of Nakajima!

That time I went to find the ruins, walked for so long, and climbed to tens of thousands of meters. It seemed that I only went to the mountainside. It is not known how the peak is. When he quickly presented the progress of the journey, it was undoubtedly very shocking.

Of course, there is a bit of “inadvertent” revealing strength, such as killing the extraterrestrial demon, as well as killing the three-kilometre giant flame robot in the cold autumn, killing the warrior 377.

These are the data recorded in his sacred armor, and there is a huge amount of information, so there is no time to filter so much.

In the end, it is the sacrifice of the heavenly project, let the Emperor behemoth, understand that he did not lie.

The whole process didn't last for a few minutes, so let's take a look at it.

But for the Emperor's behemoth, no doubt directly shattered the three views!

It is powerful and intelligent, and you can imagine other worlds. It may be different from here, or it may be stronger than it. But these things have never been seen before.

If you don't say anything else, then Shen Lang now presents the means to let it “look”, that is, it is hard to do!

And this strength is not as good as its human beings, but it can be done easily, and there must be some advanced exercises, or artifacts to complete.

Seeing what he doesn't care about seems to be very common in their world.

Think again about the majestic and incomprehensible, it is a small muddy hill compared to the Hengshan!

As for the giant physique they are proud of, it is indeed far better than human beings, but people are not afraid of it, and there are also “giants” who are bigger than them, and there are more “flame giants” that can crush them and mountains. ...

These lights have already shocked it, and these are easily defeated by small humans!

Humans... terrible!

The world of mankind, what a dangerous place!

“Is this the place where our ancestors were sent? It’s a bit like it.”

After a long while, the Emperor’s behemoth put away the shock and vigilance, and let his mind be placed on the Sacrifice Project.

“It’s not like it, it’s really passed down tens of thousands of years ago. Look at this scale and the texture!”

Shen Lang gave it some panoramic views and close-ups, making it aware of the huge gap between the cottage and the original.

This makes the Emperor’s behemoth a bit of a taste.

When Shen Lang first saw it, it also proudly introduced that the human world is not such a majestic building. I didn’t expect it to be done in the human world and it’s a lot smaller, it’s a long way off!

Think about the countless high-rise buildings that I saw before, that is so majestic! And the number is so much that countless human beings can have it. It’s just a god...

“This is just outside, show you inside!”

Anyway, for the storage space of the holy armor, that point of data is almost not the same thing, so Shen Lang is a comprehensive record for many special places.

What is presented now is the picture of the day of the Sacrifice Project, which contains the Sacrifice Project and him.

Followed by his perspective, I saw the tremendous changes in the wall. It was not the same as the one that was just the same, and the magical picture that was presented inside was even more incredible.

Think of the rough picture that his ancestors exhausted their lives, compared with others, it is simply no match.

It's a guilty conscience...

Chapter 1420 - The human world is terrible

Shen Lang is very enthusiastic to see the image data, but also secretly observe the reaction of the Emperor.

Through the reconnaissance of the Holy Grail, he does not need to use his own knowledge and eyes to observe, but also through the close-up of its eyes, and then use the analysis of the sacred armor to confirm the possible emotional changes.

There is a sentimental analysis of the human world, and the high-speed computing of black technology, coupled with what it sees, is not at all civilized. Even if the ***** of the gods is a great god, it is a dog!

It is not a discrimination dog. When its ancestors came, it was already a beast. It has been tens of thousands of years. They are already the masters of this world and have a high degree of wisdom.

Now is the problem of knowledge, then do not say it, even the human god, there is such a blind spot.

For example, the mainland of the island is a super-cultivation civilization, but in terms of the pattern, it is more like the ancient China. I don't know anything about technological civilization, even if there are similar products.

Even if Shen Lang himself, just remembering the memory of his previous life, it is unbelievable. He benefited from the memory fusion of the two worlds, rather than replacing the world with previous lives.

If there is no common sense of science and civilization (including scientific fantasy) of this contemporary earth, then when he encounters the sea and city civilization of Bihai, it is also difficult to understand, and it can be thought of as evil spirits.

The experience of the city of the basin, the experience of the mainland of the island, the experience in the chaotic space, and the 80,000-year space-time paradox, etc., make his three views far beyond the imagination of the average person.

That is to say, the current cold autumn, can not compare with him, let alone the giants of the giant beasts and civilizations.

Feeling the imperial behemoth's momentum is invisibly declining, and the Shenlang is also hot.

“No matter which world, it can't be eternal. You have been fixed for thousands of years here. But for our world, it is changing rapidly.”

Shen Lang stretched his finger to the sky.

“Where is there?”

The Emperor's behemoth stunned and then shook his head.

Shen Lang has presented some pictures for it. It is a cosmic picture of the simulation of the city-state in the basin, and some pictures that have been detected by the spacecraft. In general, it is the same as the picture in the earth science fiction movie.

“The sky is not empty. In more distant places, the sun, the moon and the stars are all reachable and can be explored.”

The Emperor's behemoth was once again shocked.

“You... you can already explore the sun, the moon and the stars!”

Even if it is the master of the world of giant beasts, it is only the king of the earth. For the celestial bodies such as the sun, the moon and the stars, they are still in the era of myths and legends. There is no research on “great beast scientists”, and there is no strong ability to fly and explore.

What’s more important is that they have not brought about breakthroughs in their concepts. They all think that it is the category of “days.”

Now these human beings have already challenged the sky!

Although it is unimaginable, people directly show this picture to it. If it is not really, how can these pictures be recorded?

Besides, tens of thousands of years ago, human beings could send their ancestors, isn’t that a natural challenge to heaven and earth?

Thinking of it, its confidence is completely gone.

It was its powerful strength to support it and explore and even invade another world. But now that the human world has been discovered, there are already many weapons that it cannot understand, beyond the power of imagination, and where to dare to commit again.

In case... use something, send it directly to the sun, moon and stars?

Or, like the ancestors, directly send it to a world that has no other vitality... Even with its current practice of thousands of years, it is impossible to bear such loneliness.

Besides, not every world is good, but it is also possible to go to the world. If it is a side effect of cultivation, it can only be spent waiting for death.

Now, the question of further thinking is not to look at the world outside the “door”, but to think about how to close the door. Don’t let the other side of the human being give it a pot!

The missile bombardment of the extraterrestrial demon, the fire giant of several kilometers, can be killed, think about it and let it be afraid.

But now it is impossible to kill Shen Lang, which may only make the human world go straight to war!

If you want to come and think, you can only turn to this human messenger and everyone will reach a peaceful agreement.

“Sun, moon and stars are all available for me. You have also seen that there are too many humans in our world, buildings must be higher and higher, and various resources are not enough. It is not enough under the ground, in the mountains and in the sea. Now, you can only ask for the sun, moon and stars.”

If you are in the dark, let the Emperor beast startle!

Their world has not enough resources, the earth and the sea are not enough, but also to the development of the sun, moon and stars!

Now that we have discovered such a new world, isn't it a new continent that can do whatever they want?

By then, all the resources of this world, including all their beasts, may have to be used!

“Human friends, what do you call?”

Shen Lang slightly glimpsed.

Because until now, he used the animal language to talk to the Emperor's behemoth. He learned the memory of more than a dozen behemoths, so he can do it.

But just now, the Emperor's behemoth does not use the animal language, but direct mental induction, and conveys its meaning to him.

This is a kind of thinking communication, and you don't need the translation of words to understand the meaning of the other party.

Just from this detail, the Emperor's behemoth seems to treat him to another degree.

"Shen Lang."

"Shen friends, we should be able to talk better, there are... we can cooperate and win together."

The emperor's behemoth, which originally occupied the imposing manner, used the attitude of "cooperation and win-win" to be a kind of swaying summation.

Of course, Shen Lang will not ridicule it, and immediately expressed his willingness.

"Of course, I am coming for peace. We are completely unscrupulous, and we welcome the Emperor of the Emperor to visit our world.

The Emperor's beast has a bit of hair, and the more enthusiasm, the more it feels that this is a trap.

Shen Lang has just searched with the holy armor, confirming the type of dog that year, and now there are such classes in the city. So at the moment, I searched a lot of pictures and presented them again.

"These should be of the same race as the Emperor. Of course, they are not as powerful as the Emperor."

At the level of the Emperor's behemoth, even if there is interest in the mother, it is impossible to have a mother dog. This is not to seduce it, but to give it a sense of identity with homologous species.

As a result, Shen Lang didn't think that the Emperor's behemoth was a little shivering...

Here, it is the emperor, the emperor among the beasts, but in the human world, there are so many similar kinds! The human world is terrible!
