

First Strong 1511

Chapter 1511 - Catching

The army should be coming from the night, perhaps the battle of the previous side, let them grasp the clues.

Shen Lang later focused on the information of the behemoths, and they did not come close, but only kept the distance from the foothills, and until now, they have become an encirclement.

These should be after the transfer, quietly approaching slowly. The distance that is now maintained is also to facilitate air bombardment or long-range missile attacks.

“People on the mountain ask you to cooperate! Come down to the military investigation, we suspect that you have a major danger suspect, if you resist, you will encounter a missile attack, please cooperate!”

Soon after the discovery of Shen Lang, the following direction, also began to scream through the loudspeakers.

Shen Lang stood up and glanced at it.

As soon as he saw him move, the soldiers of the following parties all aimed at the muzzle, and they were already buckled on the trigger, just waiting for a command.

At this time, helicopters and bombers came over in the distance. It seems that the time has been counted, and when the siege is good, the aircraft will be notified to avoid the sound of the waves.

Shen Lang's eyes fell on the face of the officer who shouted.

“Who do you want to cooperate with?”

His words are naturally a threatening tone. Since they can find it here, naturally they should also have the influence of his power, even if not much.

“This gentleman, even if you are a superpower, you should also accept the control of the law. We have evidence that you have caused major damage to many cities, military bases, etc., malicious opportunities for military aircraft, dead soldiers, etc. Please cooperate with the investigation!”

They are prepared, and they are all true. When Shen Lang fights with the behemoths, it destroys a lot of buildings. The base, the plane, and the like are also destroyed.

But Shen Lang is very clear, their real purpose is to want resources on him!

Whether it is a deformable robot killing warrior or a giant animal body, it is a great attraction for them!

Superheroes like superpowers are still difficult to copy in a single volume, and it is more difficult for the government to control it. But the morphing robots, as well as the genes of the monsters, etc., can be used in large quantities, not just inward, but it is easy to dominate the world.

But in the end it is a government army, and you have to make a reasonable excuse to get started. In particular, they are not sure whether Shen Lang is obeying the country, so they must be famous.

“I have come to your country and have solved many monsters for you. Do you want to catch me?”

Shen Lang patiently asked again.

“Sorry! Your defense of monsters is worthy of respect, but it cannot be based on the destruction of the law. The monsters are naturally arranged by our government to arrange military treatment. You should not rashly interfere with our plan. No one can replace law enforcement!”

The other party is still talking about the grandeur, emphasizing the violation of the law.

Shen Lang secretly sneered, the invasion of the behemoth world is now a big problem in the world. It is related to the survival of human beings, and the law and the law.

And their intentions are obvious, that is, he was arrested in the name of breaking the law.

Besides, even if you really submit the robot and the body of the monster, they will not let him go!

On the one hand, they can't let his technology be mastered by other countries. Only by monopolizing can he dominate. On the other hand, I will definitely feel that he has more secrets and must constantly squeeze the technology.

However, these sinking waves have not been considered.

This world is rebuilt. Because he started to wake up from middle school, the impact of this life is very great. He does not want to have more intersections with the government departments, so as to avoid unnecessary trouble.

But now it is different. He is already a great fairy. In time, he will be able to return to the realm of the Great God. He is now the deserved leader of the Earth and is not afraid of any forces.

“Since it's decided, come on! You should have a higher level of generals to pay attention to the movement here, then please listen, once you get out of this step, don't blame me!”

Shen Lang slowly said the threat, if they stop here, he still does not want to fight with other countries.

The officer who shouted was serious: “We will not tell the conditions of the criminals! You will deal with the monsters and let you cooperate. If you insist, we must use force!”

His words were just finished, and the voice of Shen Lang passed over.

“I will not kill innocent civilians, but you have listened! I will ruin your presidential palace, the Ministry of National Defense, the National Assembly, etc.!”

Originally, everyone was nervous and fearful about Shen Lang, but in the end the soldiers did not see the image with their own eyes, but just got the order to say that the murderer was very dangerous.

Now I heard that the other party actually threatened to marry the presidential palace, the Ministry of National Defense and other buildings in their country, and they could not help but be angry.

Immediately, many soldiers screamed at the provocation.

“You, the yellow-skinned monkey, ran to our country to arrogant! Do you think we don’t have a superhero?”

“We are the first power, even if you are superheroes, you must obey our orders, or else put you in the prison!”

“Fuck! Get it down immediately! Or else it will burst your back hole!”

The shouting officer deliberately indulged these snorings. He had only one concern, that is, other people did not use loudspeakers, and the voice might not reach the mountains.

“roll—!”

Sinking and screaming, just the sound of the waves, let the soldiers around the mountain in different directions, all overturned!

He is still a lover, after all, they are ordinary people, and they don’t bother to kill them, just warn them.

The result is that the other party directly ordered a full attack!

As a result, the fighters began to bombard the long-range artillery shells, and the helicopters were machine guns and snipers.

Have had previous experience This time, whether it is a fighter or a helicopter, it is not close to the side of Shenlang, and keeps it outside the hill.

They are both air suppression and the main force of the attack, while the soldiers trapped around the mountain act as an interceptor to prevent the sinking waves from escaping. They climbed up and immediately aimed at firing.

According to their plan, this is already a slap in the face, and the purpose is to force the surrender, to catch the living, otherwise, directly on the missile, the whole hills bombarded together.

This time, the number of fighters is more than that of the previous fighters, and fires are fired together in different angles and different weapons.

Unfortunately, their wishful thinking, in Shen Lang here, there is no effect at all!

Standing in the foothills, Shen Lang does not need to dodge, nor does it need to fly past attack aircraft, directly open the field, and completely control the large space around it.

One by one shells, rows of bullets, within the field, as long as the Shen Lang slightly moved the belief, it completely changed the trajectory, and clearly turned to the soldiers around the siege!

Chapter 1512 - 砸 Airplane

The soldiers around, dare to go to the siege because of the firepower in the air, they only need assistance, and then there are so many people.

However, I did not think that my own bullet shells would actually turn in the air, which completely subverted scientific cognition!

At this time, there is no time to think about why the bullets can be turned, because the speed is extremely fast, they can see this scene vaguely, or because they paused in the air.

The bullets could not be seen clearly across the distance, only the shells were seen. The next moment, they have already arrived in front of them!

The bullets and shells that came from the scorpion came from the top, so that they had nowhere to hide.

And because the changes are too fast, the machine guns and shells on the plane are still being launched continuously, and they are still scattered from the air and scattered to attack them.

In particular, the pilots on the fighter planes are all aimed at the computer data, and it is too late to wait until they are not correct.

When the plane above stopped shooting, the army soldiers guarding the hills were basically shot and killed by bullets.

And these helicopters and fighters have found another problem, that is, it is still in the air, but the entire aircraft seems to be entangled, whether it is speed or trajectory, it is difficult to control itself.

At this time, Shen Lang slowly flew into the air, slightly recruited beckoning, a plane of the plane, all flying close to him!

All the pilots were shocked. What a power, it was able to control the plane, and it was so many planes!

There are soldiers on the helicopter with sniper and machine guns, but the situation has already made them understand that it is useless to shoot again now. They can only watch the flight to Shenlang.

People are on the plane, watching the standing waves standing in the sky, it is a very shocking scene.

Originally, Shen Lang was a lot smaller than a plane, but now, no matter which soldier on the plane, he feels like a giant.

Now they have a question – what is he going to do?

In fact, there are answers to this question. There are so many soldiers below that have been eliminated. Although they are bullets fired by them, they are still done by the superpower in front of them.

So... their fate is also coming out!

“Do you have a lens? Is there a connection? Good shooting, the commanders behind, look good. Be prepared to bear the consequences!”

Although the plane roared, but the Shen Lang, but they were transferred to their cabins, so the pilot with headphones is also shocked.

After saying this sentence, Shen Lang's hand appeared an iron bar, and then swiftly swung it out!

The iron rods are getting longer and faster, and the more they go forward!

Before the people on the plane had not reacted, they had already slammed on one of the fighters.

The plane was still flying, but because of the limitation of the field, the speed slowed down.

The power of such a slap in the past has directly smashed it to the ground, and it has exploded before it has reached the ground!

The first stick of Shen Lang puts on the momentum, let them have a camera on the plane to shoot the picture, and then a stick and a stick.

Others are in the air, standing still, so that a stick of the past, a stick of a plane, have been blown up in the air!

The fighters are like this, not to mention the helicopter, because the speed is too fast, the soldiers above don't say that they are not prepared, even if they are ready to jump, it's too late.

In just a short while, a plane of planes was directly blasted by Shen Lang, as if it were fireworks, and the sound was one after another.

After the plane exploded, Shen Lang also disappeared from the air!

He was waiting here to see if there were any monsters coming in. I didn't expect the local military to attack him.

The other party will want to catch him to profit, is to think of it, did not expect that the huge beast crisis has not been lifted, it has been so impatient, completely set the real danger of disregard!

Perhaps, for politicians, he can fix the behemoth, as long as he masters him, naturally there is a way to deal with the behemoth, and the strength of hegemony.

Shen Lang is already angry, and the group of people who have just been ruined is not enough to make him vent their anger.

When he was in control of everything around him, he quickly invaded the consciousness of the commanding officer and read the memory.

So after leaving here, he quickly and quickly came to a large military base they had entangled.

This is much bigger than the previous one. It should be the largest base in the state and a very important base.

This time, the command for the Shen Lang operation is directly at the level of their Ministry of Defense. This base is only implemented specifically.

Inside the headquarters of the base, this time is falling into the debate.

"It has ruined so many fighters and killed so many soldiers. This is a great provocation to us! We are determined to eradicate him!"

“We still have to follow the orders and catch him alive. He is too valuable for us!”

“Do you see that you will send someone to die? You can’t take revenge?”

“Do not hesitate to pay any price! This is related to the key to whether we can truly dominate the world, and any sacrifice is worth it!”

“The Minister of North is very concerned and the President knows about it.”

“You generals, since you have connected me and asked for my opinion, I need to remind you. This is a very dangerous person. He can be regarded as the strongest superpower on the whole earth...”

“Can he be stronger than a missile? Can he be stronger than a nuclear weapon?”

“Oh, I think the generals have misunderstood our superpowers. We don’t need to be stronger than nuclear weapons. We only need to be stronger than those who control nuclear weapons.”

“You are threatening me? I warn you, your attitude is a provocation against the country! The superpower can also catch you!”

“Of course you can warn me can also grab me, but since the Chief of Staff contacted me and asked for my opinion, I should be responsible to say the status quo, instead of catering to the generals. Ambition intentions!”

“Lord, your responsibility is to provide us with the information of that person, his country, his relatives, his loopholes, etc., placed in decision-making, this is not your superpower!”

“Is sorry for...”

“Don’t let go! A superpower in the district, dare to cut off the connection, the Chief of Staff needs to give him a serious warning!”

“You... how did you come in?!”

When they met and argued, they rushed to the base of the Shenlang, directly connected with the heavens and the humans, and sensed the conference room, which appeared directly here, and heard the words just now.

The super-power who was not at the scene also found the Shen Lang when he said that he quickly apologized and hurriedly cut off the connection. The scene was discovered later.

Chapter 1513 - Missile

The generals in the conference room were very shocked when they found out that there was one more person.

In addition to the instinctive swearing, there are also people who want to trigger an alarm and let more soldiers come in.

However, they moved a little, only to find that in addition to being able to talk, the body can not move, including the hands of the fingers can not!

This is not only shocking, but feeling the fear.

This time, the level of the meeting was very high. It was reported to the Secretary of Defense. Of course, it was a senior general. In their capacity, they did not need to bring their own guns.

Moreover, this conference room is the most strict specification of the base command. There is a layer of protection on the outside. It is really necessary to fight. It can be hit here, which is basically equivalent to the collapse of the entire base.

Besides, even if they bring weapons, it is useless now.

“How are you... what do you want?”

One of the generals calmed down first and whispered a question.

I want to ask how to come in, but after I say it, I feel that it is meaningless. Others may not say it, but instead ask the meaning of Shen Lang.

“What do you say?” Shen Lang said, people have gone from the corner of the conference room to the other corner.

After he came in, he was quiet in a corner, so the eloquent generals did not find it, or the superpower who connected it first saw it.

Now everyone is difficult to move around the neck, but their eyes are staring at the deep waves. Suddenly he disappears, and people are on the other side. In addition to making them more difficult to turn their eyes, it is also a matter of heart.

“You have to figure out that this is in our country! We have the most powerful army in the world, with the highest technology weapons and equipment! I know that your superpowers are not afraid of ordinary weapons, but we also have superpowers!”

The general said while adjusting his attitude and stabilizing himself.

“Yes! You are strong and only one person. We can mobilize the superpowers of the country, and even the superpowers of the entire Western world. Can you deal with high-tech, military and all superpowers?”

In addition, some people have joined it, and the tone is even stronger.

“I am looking at the people at the same time to help you solve the monster crisis. I am very clear about your intentions. I warned you that since you insist on ordering, you have to pay the price!”

Shen Lang glanced at them coldly and then released the imprisonment for them.

The officers who had just been fixed could not help but secretly breathe a sigh of relief. Although they felt that it would not be all right, they had already let go of them. It was just that, they had already let them sweat coldly.

“Lord, our goal, but also to solve the monster! Since everyone’s purpose is the same, perhaps you can cooperate well to achieve a win-win goal.”

“You have given us the corpses of the monsters, and we hand them over to the experts to study. As long as they have an understanding of their bodies, they can find weaknesses and target them!”

After someone spoke, more people followed up. If they couldn’t grasp it, try a good negotiation.

“Do you still have a robot? That thing is only used by you alone. It is limited in operation. In your words, it can’t be hydrolyzed. If you give it to us, let us refer to it and equip it to a different one. The troops can work together in all directions and eventually defeat the monsters!”

“We have astronomical research funding that can maximize everything. There are also huge rewards. As long as you hand over these two, we will provide you with a generous reward of billions of wealth. By then, your whole family can pass. On the rich life.”

“Lord, this is your time to contribute to the progress of the human world! These two things are in your own hands, it is a huge waste, handed over to us, and we can develop to truly benefit the world. Then you are a historically named person!”

These senior officers are experienced old guys.

It was still shocking and nervous, but then relaxed them, and saw that Shen Lang was a young man, and he immediately stabilized, and then began to persuade me with a word.

Their words have already covered very important aspects. If you like money, there are huge rewards to attract you; if you don’t want money, then the history name will attract you; if you don’t want money, don’t want it, you may think about the great love that benefits mankind.

Threats and warnings, even the most advanced people have already said.

“Who are you with the highest level and the most authority, are you?”

Shen Lang listened to them after a round and looked at a general who was sitting without the chief.

“Yes.” The general nodded and admitted.

Just finished, he immediately lost consciousness!

His willpower is stronger, but he is just an ordinary person. Shen Lang easily controls his consciousness.

The reason why they did not kill them directly was not to listen to their nonsense, nor to listen to their conditions, but to identify who is the real power.

In fact, before he read the memory of the officer, there is already a rough. However, the officers at the highest level of the base also have a lot of secrets that others do not know.

For example, what Shen Lang wants now – permission.

Everyone else looked at this scene nervously and didn't dare to speak.

“You want to...” One person tried to ask questions.

Shen Lang waved his hand, and immediately he couldn't speak, and then everyone's consciousness was controlled.

He has already figured out that one of the most powerful missiles in this base is the key of multiple generals, who need to enter the key together and confirm the identity before ordering.

Now they are all controlled by Shen Lang, directly in the conference room, confirm identity, enter the key, and then give orders to the soldiers who control.

A powerful missile started to launch!

Although the operators were very confusing and even frightened, they executed the orders of the generals.

These missiles were shot at several domestic military bases and ... to the capital's presidential palace!

When the missile was issued, the Ministry of Defense immediately connected.

As soon as it was connected, the Minister of Defense shouted loudly.

“What are you doing with these idiots? Why did you launch missiles without any instructions, why did you fire missiles at the base and the capital?”

When the Minister of Defense drank, he was interrupted by a general.

The top person in charge of the base said with a smile: “The Minister reminds me that you should send another one to the Ministry of National Defense!”

“Fuck! Are you crazy?”

The Secretary of Defense felt that it was definitely an error in the execution coordinates, but it was not clear why they fired such powerful missiles. They were all long distances. It took time to fly in the past. As long as the attack instructions were cancelled in time, a large number of missiles were wasted.

But now, you have to come to the Ministry of Defense building!

Chapter 1514 - Shen Langwei

This serial missile is of course only a warning. After all, the signals are networked, and the Ministry of Defense will know immediately. Other military bases should also have information.

Before the bombardment, it was still too late to intercept in the air.

Really effective, it is to rush to the nearby cities, so the military bases in other places have no time to intercept.

It's just that Shen Lang has to warn them about the political and military forces, not to kill their ordinary nationals, and has not made such a decision.

However, for these officers, there is no politeness. After cutting off the connection of the Defense Minister, Shen Lang directly turned them into idiots!

Then he left the base and went directly to their capital!

Originally, Shen Lang came for the behemoths. Now there is no information about the behemoths, and they can only go to various places to search. The giant beasts have already left the coastline, and there are so many states in the inland, so many cities do not know where.

In this case, if their country wants to do something, let them do it first!

When Shen Lang went to the capital with super sonic speed, the country began to have a full-scale shock!

The Ministry of National Defense is directing all missiles to be intercepted quickly, but I don't know which ring is leaking, and the information is exposed to the media!

When the missile attack hit the target, it was a matter of minutes. Immediately after all the media in the country had an emergency live broadcast, the big media around the world immediately followed up.

There are many powerful missiles that have been sent out. Before they get the military details, they can only have a rough target. Of course, many people panic.

Although the Ministry of Defense quickly implemented the interception, it only gave everyone a sigh of relief, and then the media were discussing the issue of responsibility. Who is this, because of what missiles were issued.

With the addition of some hackers, the detailed target is the military base, and even the presidential palace, which has caused an uproar.

Is this the general who wants to rebel?

The Ministry of Defence was of course more distracted, and they later got the message that the generals had become idiots. Although there is no clue and evidence, combined with the information before and after, it can be guessed that it is controlled by the superpower.

The Secretary of Defense can't push this responsibility to the superpower. If this information is made public by the Ministry of Defense, it will only trigger panic across the country and the world!

Even the top of the military, in the conference room of the command, may be controlled by the unconsciously, so that the superpower exists in the world, who can rest assured?

Under urgent consultation, you can only push the problem to the heads of those monsters!

It is said that because of the accurate information, it was originally to attack the monsters. The result was misled by the monsters and became a threat to their own fortress.

The last officers all committed suicide!

As a result, everyone has transferred hatred to the monsters. In the past few days, everyone has been very scared of the monsters, and now it has added more than one.

Those officers have committed suicide, and they are even more serious than their resignation. They have won the sympathy of public opinion. Even if they are opposition parties or opposition parties, they are embarrassed to stare at the chase and will be attacked.

These evolutions and fermentations require a process. When traditional media and new media are hot, Shen Lang people have already arrived in their capital!

Because the target of the first missile was the capital, this made everyone very scared, and the specific target was just the presidential palace, so many people rushed home, even outside, away from the president. Places like the government.

At the moment, around the presidential palace, it is also a strict guardian of the special police, not to let any suspicious people approach.

Under the emergency investigation at the base, there were no clues at the moment, but the officers in the secret meeting room of the headquarters became idiots. This result made the parties very nervous.

In case the superpower is mixed into the presidential palace and controls the president, the problem is even bigger!

As the commander of the three armed forces, the president controls the nuclear bomb key. If the president is controlled to launch a nuclear bomb, it will cause huge losses to the domestic launch. Launching a foreign country will trigger a world war!

In the presidential palace, the president is also meeting with the deputy president, the secretary of state, the director of the CIA, the defense minister and many other key personnel. The time is urgent and it is too late to come over. There are also aides who are negotiating how to conduct public relations.

The result of their temporary consultation is that they cannot stimulate this person's superpower in the dark! Try to communicate with the leaders of the country where the superpower is located to see if there is any means of control over there.

On the other hand, it is also to quickly contact all the powerful superpowers in the country.

The intelligence, investigation, homeland security and other departments actually have files and investigations of the superpowers, but the level is high and the secret is unclear. At this time, the president personally ordered, of course, quickly get busy and call all powerful superpowers to stand up. Fighting for the country.”

When I arrived at the Shenlang of the capital, I did not go to the presidential palace. The world's media reporters in the capital are now rushing around the presidential palace, which is the center of focus around the world.

The place where Shen Lang arrived is their Congress!

It is not the meeting time now, but it is deserted and has not been noticed.

He waved the iron rod directly and smashed the entire parliament building!

Because the speed is too fast, and he has not become a giant, plus the vibration of great power, directly like a small local earthquake near the Capitol Hill, waiting for people nearby to feel it, it is already a piece The wall remains ruined!

In the next moment, Shen Langren has already arrived at the Ministry of Defense building.

The building of the Ministry of Defence is famous for its shape. The Ministry of National Defense is a real power department. Apart from the strict protection of the presidential palace, of course, they have also mobilized their military protection.

Shen Lang did not approach the past this time, and did not use iron bars to attack them. Instead, people were in the air, surrounded themselves with vortex clouds, and then used Leiyuan to launch a lightning attack on the Ministry of Defense building!

The power of Thunder's thunder and lightning is far from being comparable to that of natural lightning. It is fearful of the Great God level. Now facing a building, the power is naturally stronger.

What I saw in the outside world was the building of the Ministry of National Defense, which suddenly encountered a thunder and was an unprecedented super lightning. The result was not only the collapse of the house, but also the explosion and fire, so that everyone can quickly escape!

For a time, the journalists in the capital of the country encountered the most tangled day of their career.

Originally, I wanted to go to the presidential palace. I didn't expect to hear that the Capitol collapsed and was rushing to the Capitol. As a result, the Ministry of Defense building was again thundered by natural disasters!

Chapter 1515 - International cumin

Although both sides seem to be like natural disasters, they are too partial. An earthquake limited to the Capitol, a thunderstorm limited to the Ministry of Defense building, is not predictable.

In conjunction with the previous missile attack against the presidential palace, everyone linked these together.

The defenses of the superpowers and the parliament building were attacked, which was an unprecedented major attack. Therefore, at this moment, all reporters have no time to go into detail, and quickly pass some information to their own media.

The big media all over the world also quickly reported this information. Moreover, on the network, some people in the vicinity of the scene also sent their own pictures to the Internet.

Thanks to technology, the mobile phone is very convenient, the camera is clear and the speed is fast. Although the two events are very short, after all, the scope is large and the city has a large population. There are always some witnesses who have photographed the collapsed and ignited parts. process.

These real pictures make the people who are seeing very shocked. The whole process is too fast, and it is simply impossible to resist and cannot be avoided.

In their country, many people began to pray, and some people think this is God's punishment!

Other countries and sects that do not deal with their country, of course, are taking the opportunity to build momentum on the Internet, saying that this is a miraculous display, God is a punishment for them!

In short, in just a short while, people all over the world are surfing the Internet, and they are paying attention to and discussing this explosive hot spot.

At this time, their president made a bold decision!

They are also negotiating countermeasures. The internal and external circles are working hard. Suddenly, both the Capitol and the Ministry of Defense building have been attacked. That is basically a representative of the country.

If the other party still has an attack, then the next step will be the presidential palace!

Therefore, the president's decisive decision is open!

They feel that since Shen Lang has never had public information, it should not be seen before the public, no matter what the reason, since there are concerns, they are opportunities that they can take advantage of.

Now the focus and controversy of the whole world is in their government, all kinds of conspiracy and smearing come out, they need to take the initiative and focus on it.

Ever since, the president has directly connected several major domestic television networks in the government and started an urgent televised speech.

The president's speech has been as concise as possible, and it has not been delayed for a long time. So there is no sorrow and pain. When I come up, I am very angry and accuse this serious terrorist incident!

Then, some of the image information of the Ministry of Defense was made public. Although there was no attack on the Ministry of Defense building and the Capitol, there was a picture of him defeating the fighter.

The images were taken on the plane, and there was distance and speed, which were not very clear. However, in the conference room, there was still a clear picture of the waves, so it was listed directly.

Through the intelligence department, the local superpowers investigated the name information of Shen Lang, and they also released them together.

Their purpose is to list Shen Lang as the world's number one terrorist!

In this way, it is not just their problems. The countries, relatives and friends of Shenlang will put pressure on him, and the eyes of the world and the focus of discussion will focus on the past and put pressure on him.

The sinking waves at the moment are on the top of a building in the distance of the presidential palace. Just no wind has no contact with him, let him use the mobile phone to watch the live TV broadcast.

Their president, even the dog jumped out of the wall to expose the existence of the supernatural person of the comprehension, which made Shen Lang a bit surprised.

After all, this kind of information is actually known to the politicians of various countries. Even the big families and big consortia that support the politicians' debut are behind the shadow of the self-cultivation forces.

Therefore, everyone has always maintained a balance and tacit understanding, as there is no such group exists. The realm of comprehension will not interfere with secular states and politics, or it will cause chaos.

Now the president's disclosure, even for him alone, has broken a line.

At the end of his speech, he called on governments to appeal to people all over the world to protest and resist the abuse of superpower by the superpowers. This is a threat to the lives of all people, a challenge to all major powers, and a global public enemy!

The big hat was very accurate and immediately detonated the social network.

Because of the successive attacks, the world's online names have been almost all online to understand the events of concern. The sudden broadcast of the president's televised speech has made people all over the world watch.

Now that such a big thing has come out, and it is the president of the superpower, it has undoubtedly shocked everyone.

This even includes the leaders of other countries, because this information and attitude have not passed through them.

For a time, everyone talked about it.

Some people insist on science and don't believe in such things. They think this is their conspiracy theory.

Some people think that it is the movie industry to do things, is to promote what superhero new movies, it is not a true president, just an actor who imitates the show.

Many people in foreign countries are more divided, and some of their allies have condemned and called for the suppression of such behavior.

And more people in the country, because they have always been too pleasing to the eye, feel that they are everywhere hegemony, suppressing interference with other countries. So today I saw that they were eating, and the president was helpless and could only come out to complain. They were very excited.

You are also today!

Well done!

They should also kill their presidential palace!

Monsters are mainly in your country, and now the superpowers are also targeting your country, which shows that you are angry and sorrowful!

Comments like this are flooding the web.

After all, the target of this attack is the Ministry of Defense building and the Capitol. It is not aimed at ordinary people. More people feel that they are a superhero against power!

And the release of the screen of the torn aircraft is not a panic for everyone – ordinary people can not have fighters, more is to feel super cool, super cattle.

The result is that the president's live speech just ended Shen Lang felt the influx of some faith!

This made him a bit speechless. He didn't want to be famous, he was passively open, and he didn't expect to win fans.

What is even more unexpected is that the number is increasing rapidly, and that is a change of magnitude, which feels like tens of thousands, hundreds of thousands, and millions of changes.

This makes Shen Lang a little sweaty, I did not expect their country to be so unpopular!

But thinking about it makes sense, and does not say hegemony. A single person can challenge a superpower. This courage and strength is enough for many people to admire. As long as you are not doing your own country, most people are watching the lively.

The continuous improvement of the power of faith, Shen Lang has been known exactly, but it is estimated to reach 100 million, and it is estimated that it will continue to increase!

Although they are the power of ordinary people's beliefs, they are weaker than the self-cultivators, but they can't stand the big base. The sum of the billions of weights is already very embarrassing.

Chapter 1516 - How about destroying you?

Although completely unexpectedly a force of faith, Shen Lang did not enjoy it with peace of mind, but continued to attack him!

He turned here to give a lesson to the politicians of this country. Only let them see his true strength, scare them, let them fear, and they will not find him any more trouble.

Now the president has directly exposed him, this is also a time to show muscle to all the politicians around the world!

Today, the reporters were bombarded with a lot of bombing, and they also had plans for them. There were many direct soldiers in three ways. If there are few people, you have to make a choice.

Both the Capitol and the Defense Department building have been in trouble. Is the presidential palace more likely to be the next target?

Since there is no first-hand information in the past two, they stayed at the presidential palace and waited for possible news.

From the perspective of the news, they certainly hope that the presidential palace will also be attacked, and everyone can witness and film the first time. But from the perspective of reason, I feel that it is better not to attack.

Some of the results came first, and the president's speech was waited. Although for security reasons, I did not come out to speak to the media, but it was also the first-hand news.

But even if the president's speech is over, everyone has not left, but continue to wait here to see if there will be further news.

Even if the president does not come out again, he can also photograph other senior officials to discuss, how much can be analyzed.

Just when the reporters were looking for news points with long guns and short guns, suddenly everyone felt a strange feeling.

Before they even tasted what it was, someone found out that there was a person in the air!

This person is standing in the air in front of the presidential palace!

The special personnel responsible for security, as well as the military police who had just been transferred, found that this scene was extremely tense.

All of them pointed their guns at the air from different angles. At the same time, they immediately asked the superiors to see if they were shooting directly or first.

All the reporters are crazy!

This is the big news for them!

This is very likely to be the most important news of their career!

Everyone is shooting crazy, trying not to let go of any details.

All security personnel, the headset received a command to shoot...

The reporters can only shoot far and then find that everyone is shooting!

This scene makes them nervous and afraid, and they don't want to miss it. They are all recorded as much as possible.

As a result, they saw a magical scene... Although the gunshots continued, the bullets seemed to linger in the air around the man!

For a time, everyone quickly adjusted the focal length and tried to push the past as much as possible.

Then everyone saw that Shen Lang did not pay attention to the bullets that were surrounded by the air, but held a sword in his hand and then looked like a simple sword.

Others waved their swords in the air. Everyone's first reaction was that they wanted to use a sword to stop the bullets.

Although the bullets have stopped, but they have not yet terminated, they are only suspended. They can shoot them down with a sword. Of course, they are also very shocking.

But what they saw, but still exceeded their imagination!

Shen Lang easily swings the sword, the goal is not to deal with bullets, but the presidential palace below!

When everyone finds that they are looking at the past, the random air-to-air sword actually brings a roar of sound.

And when everyone chased the sound and went, it was discovered that it was from the White House Presidential Palace!

Then, everyone saw a very magical scene. The roof of the entire presidential palace was completely cut, and then, like the huge force pushing, directly knocked the roof completely!

The presidential palace was in the presidential park, and it was turned over and fell on the lawn. This time, the control is stricter, and no one has ever reached the innocent.

However, whether it is a reporter or a special service personnel, seeing this scene is completely stunned.

This white house of the presidential palace is basically a symbol of the country. It is a more important symbol than the Capitol and the Ministry of Defense building. Today, it has taken the roof directly!

The practice of overturning the roof is actually more difficult than the direct destruction of the Capitol and the Ministry of Defense building, because the force has to cut all the spaces and cannot affect the following.

The effect of this is not necessarily more shocking, but it is even more humiliating! This is the same as knocking down people and smashing people's clothes.

After a moment of disappointment, the secret service personnel and the police hurriedly rushed to the mansion, and it was necessary to protect the safety of the president. In addition to the president, there are also presidential family members and numerous staff members.

The reporters also quickly used the camera camera of the mobile phone to record all the pictures.

In order to express the feelings of the first scene, they quickly and madly tell the story, and explain the pictures they see to the audience, so as not to be accurate enough.

Some of these reporters are directly connected to the TV station, and some are being broadcast live on the Internet.

Ever since, the picture of the presidential palace was smashed, and it spread throughout the network!

The waves of people in the air, the hands lifted, and all the bullets that had solidified around them were collected and appeared directly in the palm of their hands. It was also intended to let reporters photograph this scene.

Then he took another look and let the bullets fly over to the reporters!

In this scene, the reporters were all scared, and they wanted to run and want to defend.

I thought I was finished. I didn't expect these bullets to appear in front of the camera. I took a close-up on the mirror and then fell to the ground.

As the bullets fell, the reporters who had been stunned and silent had a long breath.

Shen Lang is continuing to show off!

He has already collected the sword and waved it in the air, directly letting the entire large-scale presidential palace roof that has already been turned over flew up from the lawn!

Then the roof of the large-scale roof is completely cut, and the landing has naturally broken a lot. It is difficult to keep it intact. Now it flies up, and many fragments fall immediately.

People in the presidential palace, people on the first and second floors, still learned through the live TV screen, and the third floor directly saw this scene.

Everyone is very scared. Seeing this means to knock down the entire roof again!

“I, coming across the Pacific Ocean, is to solve the crisis of monsters for you! Your military has to take control of me! Today is a warning to you. If there is any disagreement, I will kill you this superpower again. how is it?”

The words of Shen Lang resounded throughout the presidential palace and spread far away, so that reporters and people in the distance heard it.

After telling the warning, he directly shattered the roof of the entire presidential palace and let them fall into pieces on the lawn!

Chapter 1517 - World hero

Just after the swell of the waves, the reporters and the public at the scene have already known the cause of the incident, and they have spread to the world through live broadcast.

This has already shocked everyone, and then a few tens of meters wide roof, so it is very frightening to break the ground in the air.

If he is not crushed by the air, but let this go to the presidential palace, or to other onlookers, enough to cause a large number of people to die!

Moreover, this super-powered person can do not need to do it. The space can crush a huge roof of tens of meters. It is normal to tear the plane by hand. As he said, it is not a bad thing to destroy this superpower. may!

It is not that his strength alone exceeds the military power of a superpower, but the destructive power of him alone can reach this level.

Like a nuclear weapon, Shen Lang does not need to be more lethal than an atomic bomb. It only needs to be able to defend, avoid and not be killed. The atomic bomb has no use for him. The superpower cannot chase him by one shot. The atomic bomb, it will destroy itself first.

The other armies, like today's situation, if Shen Lang wants to kill innocent people, it is no problem to destroy them all!

When all the soldiers' officers are out, and there are more fighter tank weapons left, what is the point?

More importantly, politician officials!

According to the general established procedures, their vice presidents are reserved. Once the president is unable to perform his duties due to an accident, the vice president can take over.

But if the president is killed, the vice president is killed, and the Secretary of State and the Secretary of Defense are killed?

It is not a big deal for the Shenlang to kill all the senior officials of the minister, all the leaders of the intelligence departments, and kill the governors of the states. For this country, there will be a loose sand without a head.

Although there are specific officials at all levels, as well as members of parliament, it will be a long process to re-elect the president. The parties will also compete, and foreign countries will also do things. All forces will screw them up.

So don't look at what he said alone, it seems to be a big talk of cowhide, but with the strength of his show, when there is no superpower to check and balance him, it can be achieved!

This change and the scene made the scene quiet, and the Internet was bursting!

Before the Capitol and the Ministry of Defense building, although everyone saw the pictures, they were all taken by mobile phones. They were not clear enough, the angles were not good enough, and they could not see people.

The same is true of the airplane's picture, but this time all the media are live, which is a complete record of the HD camera.

Everyone saw the side of Shen Lang Superman, which is the picture that can appear in the movie. Now I see the live broadcast, of course, it is very exciting.

The reason for Shen Lang's openness was that he had a lot of neutrality and even condemned Shen Lang, and he understood his shot.

In particular, people who have been attacked by giant beasts have caused their families to be displaced and displaced.

This superhero from the East, originally to help fight monsters, actually let the government remember his power and want to control. Isn't this a delay in playing monsters?

Now this new explosion point is only within an hour. Before that, the hot spot that everyone is paying attention to is the giant beast attack.

Like the city where Zheng Jia is located, the whole city is almost empty, many people are dead, and many people are still on the way to escape.

Many coastal cities are in such a situation, and the inland is getting more and more serious. Everyone has encountered the harm of monsters. Other countries have encountered such a situation, and they have not encountered it, and they are worried that they may come over at any time.

Compared with the problems within the superpowers, this is a disaster in the world, naturally higher than their domestic.

These politicians, the ability of superheroes, want to be used for their own sake, regardless of the crisis in the world, regardless of the disaster of all people!

This outbreak immediately triggered a sniper attack by everyone. Even if it was originally spurting the waves, he felt that he did not make a mistake. For such a government, it is already very benevolent to kill the president directly.

At this time, Shen Lang has no time to access the Internet, and it is impossible to browse the opinions of netizens all over the world. But the power of faith he feels is rapidly rising!

If you have reached the billion level before, then you may now reach the billion level!

The deep waves of people in the air, this moment is very embarrassing.

In the last life, he was alone, even if he helped many friends and younger brothers, he did not accept apprentices and did not create his own martial art.

Because he thinks that it is all about the outside world, and it is not worthwhile to waste his mind to consider the reputation behind him. The name of a founding father is not worthy of attachment.

The previous understanding of the power of faith made him realize the value.

Now is the real feeling of the power of faith!

He is now only because of public appearances, won the respect of most people around the world, and got such a huge belief. If it is a sect with a large number of believers, the power of faith must be more pure and long.

As the founder of the founding religion, or the “God” who guides the worship of the believers, the power of faith that can be accepted is far better than it is now.

It is estimated that the great gods who created the teachings in the past may still be in other time and space such as “the kingdom of heaven” and “the fairyland”, and still be able to inherit the faith of the millions of believers in the name of God!

Although the creation of education is hard, it will take decades to promote development, but the harvest that can last for thousands of years is really a great gain.

Shen Lang is just a feeling of emotion, and does not have the opportunity to create education.

However, since there is such a harvest, the opportunity is so rare, of course, do not mind more harvesting.

“Any superpower, any presidential power, must be the people first! The monsters are in chaos. This is a disaster for the whole country and a disaster for the people of the world! I am coming across the Pacific Ocean because we are all members of the Earth. Fight monsters together!”

“You politicians, don’t think about your own political interests, send the army to take me to study, can you use it for you? Then you are such an intention to the monster?”

“I have killed more than a dozen monstersWhat about you?”

“If you go all out, isn’t the monster already wiped out? The current situation is because you want to catch the monster?”

“This time is me. If the monster comes here next time, it will put your presidential palace and the entire capital city!”

Shen Lang’s words were also spread to the world through the Internet.

Watching the live broadcast, whether in this country or in other parts of the world, most of them are ordinary people, and they are worried that their personal safety cannot be guaranteed.

Shen Lang appeared as a superhero. One person has killed more than a dozen monsters, enough to make everyone excited and satisfy the expectations of the protector.

Politicians want to catch monsters and even use the ugly face of human heroes. In contrast, everyone is cast aside.

For a time, most people in the world attacked the politicians represented by the president on different networks, and supported the support of the waves.

Chapter 1518 - The monster disappears

In the country, there are also a lot of people who have grown a sigh of relief.

Needless to say, there is no such thing as the wind, no squad, and no one. They are all worried about the stability of the waves, especially in this way, they are hard-pressed with a superpower. This is on the site of others.

The earth monks such as Qiao Yuxian have also successfully returned from the mainland of the island. They also want to make a contribution to the giant beasts that appear.

There are only a lot of concerns, not appearing in China, it is not convenient to go overseas.

Today, the news of Shen Lang was exposed. Although the older generation will not pay attention to it at all times, the family also has young people who are responsible for understanding and immediately report the situation to the past.

For the older generation, they have seen a lot in decades and are more sensitive to this aspect.

For a time, everyone was connected to each other. If Shen Lang really wants to be done, then if they can help, they must be united and rushed to help the boxing!

Just like the day before the collapse of Tiandu, Shen Lang does not need their help, they can also be strong.

Now on the earth, not facing the half-scent, they still have a lot to offer.

Then everyone was watching the progress of the matter. The result was a warning from Shen Lang to the presidential palace and a reprimand in speech.

Later, the younger children also reported on the grievances on the Internet, letting them know that everyone is standing on the side of Shenlang, it is gratifying.

However, Shen Lang is faced with a superpower. Even if it is supported by the whole world, it is only the support of ordinary people, and it is the support on the Internet.

Those politicians, it is estimated that they will send troops to each other!

And they are at home, even if they want to help, it is a bit far from being able to hydrolyze. When they immediately rushed to the airport and flew for more than ten hours, everything was settled.

Some of them also have flying magic weapons, but this is a big leap of the earth!

If you don't take civil aviation, you don't know if you can support it for a long time. On the other hand, the speed is not fast, and the flying magic weapon is also a short-range convenience.

The result is that everyone can only wait and see, waiting for further information on the side of Shen Lang.

Through the webcast, everyone also saw the Shenlang, and Shenlong saw the end without disappearing, disappearing directly from the presidential park!

At that time, all the high-definition high-definition cameras were staring at the waves, and many of them were close-ups. Then he disappeared out of thin air, even if it was ultra-high-definition playback, it did not capture the slightest shadow!

This hand, let the reporters have a good rendering.

I was rushing over here, I want to know who is dare to attack the super landmark building, and now it has all changed.

Western media, especially the homeland, have shifted their focus to the mysterious superhero of Shen Lang.

After all, the news that broke out today is too shocking. In the face of the monster crisis, the government does not fight monsters, but instead attacks the heroes who fight monsters. This is a political position. All of them feel shame.

Usually scandals can be tapped, but now it is a shame in the world, so intentionally or unintentionally, they focus on the superhero of Shen Lang.

The "miracle" exposed by Shen Lang, replayed again and again, and then connected with physicists and the like to explore how to do it.

They are well versed in the way the media spread, and as a result, at least not everyone will marry the country and the president. Ordinary people are always most concerned about gossip, and even if a small part is true, it will not cause big public opinion.

Some media in the East have also seized this rare opportunity to attack. But after all, Shen Lang is an oriental, and it makes everyone feel glorious.

The reporters at the scene were not the commentators who wrote the post after careful consideration. At this time, the impact on the scene was relatively large, and they were also keen to introduce the brilliance of Shen Lang.

The result is that the prestige of Shen Lang is even more high, and the power of faith has also emerged more.

And unlike the beginning, they have a small part that starts to become more pure. Probably there is a part of temporary worship and become a fan. And as more and more spread, and he said killing more than a dozen monsters, more and more fans.

Shen Lang himself actually just hid in the world of Tianshu!

What he needs is to show the miracle that disappears out of thin air. If it is just a flash, even if the speed is fast, there will still be traces under the ultra-high-definition, high-speed camera.

What he needs is what really disappears completely.

In doing so, it was really achieved. When the focus no longer focused on the air, he quickly left the scene with his bodyguard.

The power of the world's billion-level faith is an unexpected harvest that Shen Lang did not think of.

But for the warning retaliation of the superpower, he is already finished, and the problem that needs to be solved is still the problem of the behemoth.

Although more than a dozen heads have been solved, including several beasts, how many are there, it is not clear at all.

Especially now, it has been a day and a night, and there is no information about the dog god!

But in terms of his connection with the dog god, you can be sure that the dog **** is still on the earth.

The dog ***** has no information yet, indicating that it has not yet fixed the hurricane beast!

Failure to fix the hurricane beasts means that this disaster has not yet been resolved. These behemoths that have been enchanted have not been brought back in the name of the Emperor.

After finding a quiet place, Shen Lang contacted the wind.

The wind is not excited, saying that the previous exposure made them nervous, worried that they had a big problem, and did not expect that Shen Lang reversed this situation and has now been worshipped around the world.

Shen Lang himself felt very clearly, and did not say much, just asked her about the latest information collected, that is, from the past to the present, the situation of behemoths in the Americas.

Feng Wuji did not forget the work, she immediately reported the information collected.

Because of the crisis of a few days, the information in this area is shared by all countries, and even some of them are relatively simple. The media is also open so that the public can understand that it can be better. Similar to the release of typhoon and earthquake information.

Therefore, she is also collecting the complete, the latest situation, there is no new giant beasts!

Occasionally, there were witness reports, and it was said that the giant monsters had seen the mad rush, and did not stop to attack the human city.

However, for the tracking and the like, only the military and other departments have detailed information, and Feng Jiji is not so powerful.

Shen Lang did not care too much, let her continue to pay attention.

He knows the situation better. In addition to his killing of a batch, there is still the biggest possibility, because the Emperor's behemoth appears, and the hurricane beast god, launched the control of the robbing!

Those monsters may have followed the call and went to a place, is it a dog god, or a hurricane beast?

Shen Lang thinks that he can also sense it...

Chapter 1519 - Challenge the world

Shen Lang has already blended the spirit of the multi-headed beast, and has already had a deep integration into the situation of the beast world.

Before, he only sensed the nearby behemoths. Basically, he was personally centered and spread out to the surrounding. He did not know how much he could sense.

Now this time, it is intentionally trying to sense the Emperor and the Hurricane.

At that moment, Shen Lang's own consciousness seemed to be squeezed and rejected, and the feeling became a giant beast!

And because of the relationship between the multi-headed beasts, his consciousness "view" is a bit strange.

In any case, his consciousness is not easy to understand, but it is natural, and everything is quickly familiar.

It's like learning to ride a bicycle when I was young, and I haven't been riding for many years. I suddenly came into contact with it, even if it's strange, I can ride it naturally.

His consciousness is floating, there is a feeling of openness!

Because of his previous knowledge, even if he reached the peak of Daxian, the scope of diffusion and induction is still limited. The more he wants to extend the wider and wider, the greater the mental stress.

But now, with the perspective of the beast god, it seems to have a bird's eye view of the whole earth!

This is not because the spirit of the beasts is far better than the human beings, but in their beastly world, the territory is much larger, which is a kind of spiritual connection.

Although the earth is a strange environment, but the scope is much smaller, and naturally there is a feeling of a bird's eye view.

Of course, this kind of inductive perspective is also present in the behemoth.

That is to say, Shen Lang can now bird's-eye view of the entire earth. It is all the giant beasts on the earth's sphere, including the beast gods and the king's behemoths. It is not able to sense billions of people on earth.

Just like a person, standing on the top of the building, you can see and count out the people downstairs and even in a square, but there is no way to see all the ants downstairs or in the square.

After all, Shen Lang is not the body of a behemoth. He does not know how much his consumption and influence are, so he grasps the speed and senses the whereabouts of the behemoths.

As he had guessed before, the behemoth has not been wiped out, but has left the Americas.

But it is not from the Pacific Ocean to go back to their world, but to be called to a place.

Antarctic!

Actually, in the past night, they all rushed to the South Pole, which was not thought of by Shen Lang.

The Antarctic temperature is minus tens of degrees, covered with snow and ice. Apart from penguins or anything, there are no animals. What are these giant beasts doing there?

From the point of view of the induction, the Emperor and the Hurricane Beast are also there, and other behemoths and beasts are summoned by them.

Just as Shen Lang can't sense their call, he now feels where they are, but he can't know the specific content, and he can't be sure why they go there.

The current global bird's eye view can only be regarded as a preliminary position, and it is impossible to know what happened there.

Want to know the specific situation, Shen Lang still have to go to the South Pole in person!

Shen Lang thought about it and decided to harvest a wave of faith!

He first contacted Feng Feng, and let her inform other people so that everyone would not worry.

Then came to the top of the Presidential Park again.

Because the "top cover" of the presidential palace has been smashed, it is already a mess, and the president has no face to face the camera. He has temporarily rejected all media interview requests and has not broadcast live.

High-level officials such as intelligence, security, and defense have quickly rushed to the presidential palace.

This is the news center. The major media in all countries are still concentrated here, and some media that have gone to the Capitol and the Ministry of Defense building have also come.

Many individuals from the media and webcasts have also come over. Even if there is no more violent material, when you come to the front line to witness, you can also smash a wave of traffic.

What everyone didn't think of was that Shen Lang actually appeared again!

Suddenly, everyone near the President's Park is boiling!

For a time, the major media and live webcast shots were all aimed at the waves in the air.

The presidential palace is close to the enemy, the agents, the police are all shooting, but they dare not pull out to aim, so as not to anger the superhero.

People who are seen in the distance, or who are watching the live broadcast, are desperately running to see the miracles.

Shen Lang looked around the circle, and the people who looked at him, no matter who, whether it was fear or excitement, immediately quieted down.

Everyone is full of expectations at this moment, and some people are very nervous, waiting for his announcement.

"The monsters didn't completely disappear, they were just expelled and they rushed to the South Pole."

When Shen Lang mentioned the monster, he immediately let everyone listen more carefully. When he learned that the monster has not disappeared, it is also a tight heart.

However, the latter sentence has caused everyone to look forward to it.

Since Shen Lang can be said to be "expelled to leave", it must be done by him. Who else can do it? Is it by relying on these dragging sticks?

Since he can be expelled and successfully killed, should it be able to completely annihilate the other?

“Your president, your government politicians and the military, as well as the politicians of the world, all listened well, managed the country and protected all the people!”

“The monster is handed over to me and it has been proven that you have not dealt with it.”

“Your participation will only hurt more people and more losses.”

“I changed the battlefield to the South Pole, in order to affect the people of the world as little as possible. If you follow the interests, if you attack me behind, the consequences are not so simple!”

“This is a message for everyone, but also a warning!”

After Shen Lang finished speaking, he exaggerated his performance, created a gust of wind, and then flew higher and higher, then quickly flew away!

Just now his words was completely broadcast live to the world.

The feelings of the people on the scene were very strong. The pressure of the ones made them nervous and couldn't say anything. They waited until the Shen Lang flew away, and they ended up with a lively commentary.

However, they all pushed the close-up, and Shen Lang passed the words directly, so it was still very accurate to broadcast to the whole world.

This is information for politicians all over the world, and it is a warning!

Is this not a challenge for all countries in the world?

It's strange to give him a deal, and it's proven that the army can't deal with it. What a hegemony!

When did the people who have challenged the world so much?

This is not like other war madmen. He does not have strong national strength and military power. He is completely alone!

Chapter 1520 - Antarctic ice sheet

Just a moment ago, the Internet is fermenting, bringing more and more fans to Shen Lang.

Even if these fans are temporary, they won't be in a matter of minutes or tens of minutes, and they can stay for a while.

It was because he was able to single out a superpower and directly killed the Capitol and the Ministry of Defense building. He also smashed the presidential palace.

Everyone was originally discussing on the Internet, and there are no more people and things than this.

Unexpectedly, he is coming out again now. This time not only warned the president, but even all the politicians in the world warned together, which is equivalent to challenging the countries of the world!

In this way, the fans who have already been fans have been more determined to support the Shen Lang. Many of them are watching the bustle, and the road is turning pink.

More importantly, the previous target was a superpower. Since there are many who do not understand them, of course, they also support them.

Now for all the politicians of the world, that meaning is different!

In addition to bullish, it is even more important that this is treated equally. That further explains that Shen Lang is for the people of the world, not for personal interests, not for a certain country.

In this way, let alone the support of other countries, it is the nationals of this superpower, except for some extreme patriotism, others are also supporting Shen Lang.

Not to mention the people and the people of the region who have suffered and are likely to suffer from the behemoths.

For a time, the power of faith in Shen Lang was even more rolling.

Shen Lang originally wanted to publicly express this information, so that governments should not mix in, so as to avoid making more complicated and more ordinary soldiers.

The other is for the power of faith. Now on the way to flying, I feel the surge of faith, and he is also gratified and satisfied.

Known as the Seventh Continent on Earth, the Antarctic is the last continent to be discovered and the only one to settle.

But in terms of the area of optics, the Antarctic is the fifth in all continents and the highest continent. The average elevation is over 2,000 meters, and the entire continent is covered by a huge ice sheet.

The Antarctic continent is the only two continents on the earth surrounded by the ocean. It is surrounded by the Pacific Ocean, the Atlantic Ocean, and the Indian Ocean. It forms a huge hydrosphere around the Earth and is completely closed. It is far away from other continents and completely isolated from the civilized world. The continent.

The Antarctic continent is the most difficult to reach continent, the closest continent is South America, between them is the 970 km wide Drake Strait.

Not only is it far from other continents, but it is also surrounded by ice shelves and ice floes that are several kilometers or even hundreds of kilometers. In winter, the area of ice floes can reach 19 million square kilometers; even in the summer of Antarctica, the area is 260. Ten thousand square kilometers.

Thousands of huge icebergs are floating in the ocean around the Antarctic continent, causing great difficulties and dangers for maritime navigation.

These information about the Antarctic is of course not recorded when Shen Lang went to school, but was read through the Holy Grail during the flight.

He has already collected information about the Earth's Internet through the Holy Grail. These are public information.

He does not need to analyze the specific differences between Antarctica, the Antarctic continent, and the South Pole. It is basically certain that these giant beasts should have passed through the South America and passed through the huge Drake Strait of nearly a thousand kilometers!

This may be dangerous and difficult for ordinary beasts. But when you reach the king's level, you won't be able to do it.

Just as they can travel from the Pacific Ocean to the American coastline from the Pacific Ocean, now they have come to the Antarctic continent.

For this piece of ice and snow with less information and no permanent population, Shen Lang is not sure why they chose it.

The Hurricane Beast God has arranged for other beasts to lead the behemoths to invade the densely populated cities of the earth. Why come to this barren land?

Is it because of the dog god?

The dog ***** forced the hurricane beast to the South Pole, and then they brought together other monsters together?

This possibility, Shen Lang feels unlikely.

Although the dog ***** is very friendly now, it is only because he has been with him for so long, with it "seeing the world" and "eat", there is no love for the earth and human beings.

It is willing to intervene, but also because of the agreement with Shen Lang, look at the face of Shen Lang. But it will not take into account that it does not harm other human beings.

That is really true that the dog ***** has forced the hurricane beast to come here, and it should be another reason.

Could it be that this billion-year-old frozen continent has a reiki resources that were not known to the predecessors?

With doubts, Shen Lang came to the Antarctic continent.

After landing on the ice, he felt it again. After a long distance, he could position it more clearly and then flew over at the Sonic Sur.

When the Shen Lang rushed over, the behemoths and beasts were still on the road quickly.

Although they have been ahead of Shenlang for at least one night, they are not as good at speed, and they have to cross the sea, so they have just gone to the call point.

Shen Lang chased in the air, even faster than they arrived at the place where the dog ***** is!

On the top of the ice sheet, the sinking waves descended from the air, and the picture that you saw in the eye made him stunned!

I guess they will come here, maybe there is a huge resource for comprehension in Antarctica. When the behemoths can't find resources in the human city, the hurricane beast may have found it here.

The situation that can be seen now is not the same thing.

On top of this piece of ice, there are two giant beasts at the moment, and three more humans!

What is directly reflected is that three people and two beasts have formed a confrontational state. Both sides have not acted rashly, so they are squatting.

One of the behemoths is naturally the dog ***** of the Emperor's behemoth, and the other one, according to the memory of the beast gods, can recognize the sacred wave, which is second only to the dog god's hurricane beast god. They will appear here, and the waves are not unexpected. This is followed by positioning. What is strange is how the three humans are going?

The hurricane beast ***** should be comparable to the peak of the peak and the half sacred. With the understanding of Shen Lang in the past two years, there are very few celestial beings on the earth. In addition to the pope, there may be a very small number of ancestors who can't hide. It is.

And Daxian is probably not there anymore. It's even more impossible for him to help him break through this time.

That means that there can be no human monks, you can directly confront the beast!

This is also an important reason why the beast gods lead the behemoths and can be rampant in the Americas.

The Emperor and the Great Beast are comparable to the Great God, and there is no need to say more.

But now, there are three human beings who can balance each other with them. That is to say, the strength of the three of them has reached the level of a great god, a peak and a half!

How is there such a strong person on earth?
