

## First Strong 1621

Chapter 1621 - Wei Wei Zhao

Shen Lang is very confident about the iron bar. Its trait is tough enough, so it is hard to beat other people's magic weapons. It is to use its own advantages to smash, and it is not afraid of being bad.

Unless it is as corrosive as the dead water whip, just before he did not understand the light, he dare not take risks.

After a scepter in a stick, Shen Lang's already the second stick and the third stick came over!

The scepter was the first to let Mellon shake hands, and then again and again, it was really trembling, almost to fly out.

Raphael's flame is now attacking the back of the Shenlang, but a protective cover that is supported by the swell of the waves directly blocks the flame and can't touch the swell.

The dog \*\*\*\*\* is not idle, it is to suppress his strength, but it is still very powerful, very fast.

The swell of the waves and the smashing of Mellon, it is the attack to Raphael, so that Raphael immediately take care of himself, the flame must attack the dog god, lest he suffer.

And Fan Xueyu has been attacking with a voice in the back until now, and there is no closeness.

The voices have an impact on each of them, and whether they are Raphael or Mellon, they have to deal with each other.

In this way, the Air Gabriel is the only one that is idle, and can only cope with that sound wave attack, and can not hold him.

In the air, he can also see all the conditions. At this moment, Raphael's pressure is still a little easier. Mellon is pressed by the waves, watching like that, sticking to the stick, one without holding, will be Suizhong!

One of the top ten apostles, not to mention being killed, is being shackled, and it is also a problem of losing face.

So Gabriel at this time, I will help in the air!

He held a long sword and stabbed the back of Shen Lang at a fast speed!

His sword is also a magic weapon. Before he arrived, there was already a swordsmanship. Compared to Raphael's flame, his swordsmanship may be able to break through the protective cover of the sinking waves.

Even if the swordsman has not broken open directly, there will be a big impact. When the sword arrives, it can directly penetrate the past.

Gabriel did not want to kill the Shen Lang with such a sword, because the strength of Shen Lang's performance made him a little surprised.

But now this sword, but it must be able to let the heart of the waves, let him transfer the attack on Mellon.

The strategy of Wei Wei Zhao is very effective, unless the other party wants to die.

As long as Shen Lang turned back to face his attack, Mellon had a chance to breathe, and it would form a double pinch effect.

Just as Jianman broke open the protective cover of the swell, the sword tip is coming soon.

The high speed continued to slam the slamming of Mellon, and it was also a quick return to a stick. Before the sword attacked his body, he blocked the past in time.

All this is the same as Gabriel's prediction. What he needs is such an effect of Wei Wei Zhao.

Mellon was naturally tacitly sensed. Shen Lang withdrew the iron rod and went out. His heart was loose. The scepter, who had already shaken off his hand, once again gathered strength, directly aimed at the back of Shen Lang just turned over!

This time the distance is so close, Shen Lang turned back to the past to stop, either to deal with Gabriel's attack, or to bear his blow!

Seeing that the winning vouchers are in the grip, even if you can't kill the smashing waves, you can also hurt a little, and let Mellon be full of excitement.

Wait... What is this ghost thing?

Just when the power of the scepter had not broken out, he found that the scepter did not know when it was entangled with something.

At a glance, it's a chain, and the other one is in the hands of Shen Lang!

Although Shen Lang turned back to block Gabriel's attack, the other hand, but another chain, directly wrapped around his scepter.

No matter what it is, he must attack the waves immediately, and he must never give a chance to Shen Lang!

Just a beat, let him support hard, as if there is no power to fight back, in fact, just because of the loss of the opportunity, the speed of Shen Lang is fast and continuous blow, he wants to move on a stick, only Can block.

Even if it is in front of oneself, this is also very shameful!

So after Gabriel helped him to lift his passiveness, he had to use his actions to prove his strength.

But at this time, suddenly felt the incomparable cold from the scepter!

When his strength was about to go out, he suddenly came over with a cold, cold, and let him calm down. The kind of accidental frightened, almost let him go into flames!

This was the nebula chain that was bought in Tangcheng before. In the time when he went to visit the world of giant beasts, they gave him all the magic weapons.

At that time, I felt that with a few of them, they were basically invincible on the earth, and they did not go to the mainland of the island. There was no problem with the use of treasure. Therefore, even if Shen Bo's strength is extraordinary, he will bring it, lest they worry.

This time it used a nebula chain.

The nebula chain is suitable for the canoe, because it is suitable for the ice palace, because its characteristics are to strengthen the cold air Shen Lang does not understand the ice palace's exercises, but one method is universal Tong, the essence of the ice system, he still knows something, nothing more than a chilly breath, with his current realm, even if it is not so professional, the release of the cold air is far better than the canoe.

I want to use the canoe in the first place, and the cold air can directly break people's complete ice.

Now the chilly air released by Shen Lang is more powerful, and then through the magnifying and strengthening of the nebula chain, its power is naturally not trivial. Also, the realm of Mellon is very high, or else it will be frozen directly, and then it will be crushed.

However, this is so, this coldness also directly invaded Mellon's body, making him almost awkward.

Just after Gabriel's attack on Shen Lang from behind, it was the result of Wei Wei's rescue of Zhao. Now the attack of the nebula chain of Shenlang is also considered to be a Wei Wei Zhao.

If Mellon wants to continue to bombard the waves, then he will be attacked by the cold, even if he will not die on the spot, it will be a very serious consequence. Either he must first revoke the attack and power to defend against the cold.

There is another option, that is, let go of the scepter!

In this case, without the medium of the scepter, it is much safer to pass through some cold and unsustainable influx. It's just that he is not willing to be reconciled. It is his magic weapon.

When it is said that it is too late, the scene is only a fraction of a second. There is no time for thinking and analysis. It is entirely dependent on instinct and experience to make the best judgment and the fastest response!

Mellon has no doubt that personal safety is the first priority. If both lose, then do you know that Shen Lang will be seriously injured? If Shen Lang has a defensive approach, he will lose money if he is injured.

Chapter 1622 - pressing

When the iron bars of Shen Lang and the long sword of Gabriel collided together, the sharp and harsh sound spread quickly. Everyone on the scene heard it, and even the voice of Fan Xueyu was affected.

At the moment, Shen Lang, a hand-held stick and Gabriel battled together, and a back chain with a back chain tied Mellon's scepter. It is clearly an enemy and two postures, which is very imposing.

Although the dog \*\*\*\* suppressed the strength, but the same is still easy, Raphael's flame can not track its speed, but its claws, almost torn Raphael's arms, thighs and the like several times.

At this moment, it became a spectator, but when she was watching, she was also attacking all three of them. The voices were attacked by three people, although they did not cause fatal killing. However, there is still a certain amount of containment effect.

On the whole, the dog \*\*\*\* and Fan Xueyu, this time has become a foil of Shen Lang, turned into assisting him to fight. And he is still in the state of an enemy and two, continue to carry forward the level.

The nebula chain in his hand, in addition to the continuous injection of chilly gas, is also followed by a sudden smashing out!

When Mellon was able to freeze the chill of the person, the hand could not loosen the scepter, and immediately it was pulled up by the sinking waves, and went out to the side.

He took the direction of the past, intentionally or unintentionally, directly to Rafael!

At that moment, Rafael quickly flashed in the other direction.

Because it is being chased by the dog, and his flame is attacking the dog. At this time, Mellon smashed in the past, whether it was bitten by a dog or accidentally injured by his flame, it is not a good thing.

If he is hit by Mellon, the two are tied together, it will be even worse, giving the enemy more possibilities to use.

When he ducked, he suddenly found that the voice was no longer irritating!

Then he found that the dog did not bite him!

This should be a more relaxed state for him, but in fact he immediately realized that it was not good...

Although Fan Xueyu fought for the first time with Shen Lang, she personally fought once again with Shen Lang, and kept the angle of "bystanders clear".

So it is obvious that Mellon's state is the worst, or else it will not be taken out.

Ever since, she immediately concentrated all the voices on Mellon!

Anyway, it is only a little interference to Raphael and Gabriel. It is better to focus all the interference on Mellon, who is in the worst state at the moment.

Mellon is fully defending the cold ice that has invaded the heart. He suddenly grabbed the scepter and pulled it out. Although he was not injured, he would not let him panic, but it was somewhat affected.

However, he still has a tacit understanding with Rafael. He does not need to consider the situation of Raphael. He will naturally avoid it and will not put two people in danger.

But he did not expect that harsh voice, it will suddenly be a few times stronger!

This is a bit bad, it was just a harsh interference, now it is a full-scale drill into his mind!

Just like there is an electric drill next to the wall, you will feel very harsh, but you can bear it. However, suddenly there are a few more electric drills, and the wall is struck in different directions. The ones that are one after another will really make people frantic.

The voice of Fan Xueyu is not simple. When it was against Shen Lang, it was still a mentality of comparison. Now it is the mentality of the enemy. Even if the other party is not regarded as a life and death enemy, there is still mercy, but the effect is very extraordinary.

Fan Xueyu can have a tacit understanding, not to mention the dog god!

When Rafael flashed to the other side, the dog \*\*\*\*\* saw that he wanted to lead himself away, and could he hope to marry him? Immediately met Mellon directly to the past!

When Rafael went back to the other side, the dog \*\*\*\*\* was opening his mouth and biting a leg of Mellon!

Rafael wants to be rescued at the moment, and it is already beyond the reach of the whip.

Gabriel is the strongest of the three of them. Of course, he is not idle. The reason why he did not go to rescue Mellon is because Shen Lang does not give him a chance!

When his long sword was about to stab into the deep waves, Shen Lang turned back in time and blocked the iron rod. Both collided and gave a harsh sound, but there was no damage. The long sword did not cut the iron rod, and the iron rod did not smash the sword.

However, even if the Shenlang is a single-handed stick, the strength is very fierce. After the sword is blocked, the stick is then slammed into the head of Gabriel!

Gabriel had to hold the sword up, and Shen Lang was just like the 碰 Melong, a stick followed by a stick!

Under the rapid attack of Shen Lang, Gabriel can only have one action – block!

He didn't even want to dodge. Once he didn't stop, he had to be smashed before he couldn't dodge.

So when Shen Lang's other hand took Meron out, Gabriel encountered another condition of Mellon.

This makes Gabriel very wrong, because this is purely power and speed! It makes him support hard, but he has no chance to play his own strengths.

“dead!”

Raphael screamed, not only the feathers in his hand, but his own, but also a flame, and then flew to the snow!

He just evaded the other side wants to rescue Mellon too late, and at this moment also used a tactic similar to “Wei Wei Zhao”, by attacking the Fan Xueyu, attracting Shen Lang and the dog \*\*\*\*\* to rescue, Thus boldly aiding Mellon.

It is a pity that they are asymmetrical information. Shen Lang and the dog \*\*\*\*\* know a few of them, and they know nothing about the relationship between Shen Lang and Fan Xue. I thought they were coming together, definitely a partner.

In fact, Shen Lang has repeatedly stressed that he will not help her. At this time, it is absolutely necessary for Fan Xue to swear by himself. When it is time to be in danger, he

will be able to save. After all, she has just been decisive with them, and without retreating, can be considered loyal.

Another point is that although it was only a contest of sound waves, but Van Gogh dared to block them, and also had the ability to fight them, obviously more powerful than the mysterious woman, even more powerful than the fairy.

And Shen Lang can't see her bottom, and at the moment I want to take the opportunity to see what level she is.

At this moment, the Fan Xueyu, but actually still has a voice!

Her appearance makes Shen Lang very speechless, she is not responding, or will only brag about the same thing!

Almost after Rafael's drink, Mellon made a scream!

The dog \*\*\*\* bite a leg of Mellon with countless bites!

In Mellon, including Raphael and Gabriel, it is incredible. Even if he is at a disadvantage, he is most exposed to the fur and should be able to avoid it immediately.

However, in the dog \*\*\*\* here, it is already a sentimentality, because Shen Lang said that the hidden strength, or else, directly swallowed Mellon's whole person, nothing to say!

Chapter 1623 - Swallow apprentice

Raphael originally wanted to surround Wei to save Zhao and attract the dog god. He did not expect the dog \*\*\*\* to be faster than he expected, but also to be more fierce. He actually bite Mellon's leg, which naturally affected his mentality. .

The dog is still like this, and then watching Gabriel is smashed by a wave of iron bars, this woman who has not directly shot, will it be simple?

Especially now that his attack is almost to the side, Van Gogh still keeps boasting, and he has not heard anything in his voice. I doubt if this is a trap!

He is very skeptical that the woman deliberately attracted him to the past, and prepared a powerful magic weapon, killing and recruiting him.

So, Rafael, who had been battling to be close to the flames, had to take his body and then retreat as soon as possible.

However, the flame of his feathers is still completely wrapped in the van Gogh!

At this time, the voice of Fan Xueyu appeared again in everyone's ears, and with the voice, there were countless drizzles around her, and the strong flame, as if it had encountered heavy rain, was directly poured. Went out!

The flame attack is not limited, and these drizzles are kept on.

The voice is of course because Mellon has been ravaged and does not need her more interference. At this moment, in addition to the sound of the rain, the next moment, all the voices have been drilled into Raphael's brain!

On the other side of Mellon, when he was bitten by one leg, in addition to making a scream, the confrontation against the cold was suddenly loose. Through the nebula of the nebula chain, the whole body was immediately attacked!

The advantage is to help him break the leg to stop bleeding, the downside is that he will soon be frozen!

Mellon had already taken care of the above, and completely obeyed the instinct, and quickly let go of the scepter.

Cut off the injection of cold ice, so that his state was immediately relieved, with his cultivation, it is not difficult to get rid of.

But the problem is, just after the dog \*\*\*\*\* bit his leg, he can still look at it!

As a result, he just had to let go, and the arm that was holding the scepter was bitten by the dog god...

As one of the ten apostles, Mellon defeated his injury and directly affected the reputation of the top ten apostles. Gabriel can't stand it anymore!

When Mellon's arm was bitten, Gabriel sent a majestic sing, and he was passively resisting the waves, and immediately began to change.

The long sword in his hand, with white light, seems to have got some kind of blessing, the power is skyrocketing, and the iron bars of Shenlang are shaken off!

Then, as his singing continued, the protective circle he laid down began to fill the white light!

The injured Mellon was not able to take care of one leg and one arm, and regardless of dignity, directly rolled and evaded, and then joined the singer of Gabriel.

Raphael braved the flames and continued to direct the flames to attack the Vatican, and then joined the chanting.

Their humming, like a kind of sci-fi spell, when the three merged together, immediately let the inside of this protection circle sound like a thunderous sound, directly shocking the heart.

And with the singing, not only the white light is diffused, but they have all received a great bonus.

The flame of Raphael would have been extinguished by the drizzle of Yaochi, but now it is forced closer, almost to the flames of Van Gogh.

And Mellon's speed is also fast, almost able to avoid the dog god's catch.

Gabriel is anti-passive and active, starting a sword and a sword to the Shen Lang!

His strength is skyrocketing, but Shen Lang has just been holding a stick, and he is always using one enemy and two!

Now, with both hands holding iron bars, the power exerted is naturally different.

He did not close the nebula chain, but wrapped it on the iron rod. Now that he sticks out of this stick, when Gabriel's long sword touches the nebula chain, he can feel the chill of the passing from above!

However, because the speed of both sides is very fast, the contact between the sword and the iron chain is not much, and the cold is not enough to affect him.

After feeling the affirmation of this effect, Shen Lang continued to confront him, and took the nebula chain out to the front of Van Gogh.

With the addition of its chilly temper, it may be helpful to Van Gogh, just to suppress Raphael's flame attack.

After the nebula chain was disengaged, Shen Lang showed a smile. When the iron bar and the long sword that came over came into contact again, he changed the stick method. It was no longer a hard hit, but a long walk. Drag the sword up!

This actually makes him more passive, but he wants a little more contact time. The lightning that has already been prepared has already passed to the palm of your hand!

The cold is not enough to pass to Gabriel, but the lightning is much faster, and this comes from the special lightning in the chaotic space minefield, the effect is very powerful.

Suddenly being shocked, it also directly affected the humming of Gabriel.

It was only at this time that white light had basically filled the entire space, and immediately they felt a huge invisible pressure!

The control of the field is invisible, but these white lights are their visible light!

God, Augustus, they, in the earth, in the world of beasts, can borrow the light of God through special secrets. Separated by two worlds of infinite space, the power is naturally greatly reduced.

Now this is in the Guangmingshan Park, the power of this light, far from the energy that was encountered before!

“Purify these wicked people!”

Gabriel , which was bombarded by lightning, has already opened the sword and then no longer attacks Shen Lang. His constant sword fight is not to rely on the power of inflation to fight against the waves. It is purely to temporarily suppress the waves, waiting for the formation of the current momentum.

Raphael also leapt into the air like him, no longer personally approaching, even the flames converge.

And Fan Xueyu was blinded by Shen Lang. Just after the nebula chain was thrown over, although she wanted to help her, but she had to reach out and catch it, she could not continue to boast, which is equivalent to giving up the way she is good at it.

Only Mellon is the worst!

After Mellon had merged into their singing, he got a great advantage. The pain of the injury was temporarily stopped, and people could also evade the faster speed.

It is a pity that it is a dog \*\*\*\*\* who is chasing him. It is a great monster that is comparable to the realm of the gods!

When I just bite him, it's not a bite, it's accurate. At this moment, the speed of his addition, in the hidden dog god, is not a problem at all.

And as the white light rises, the dog \*\*\*\*\* realizes that it is wrong. It promises to hide the strength, but it will not put yourself at risk.

Therefore, the random paw behind it directly implied the control of the nearby environment, so that the quickly tumbling Mellon could not escape, and was directly sucked in, and then it did not disregard it. Swallowed it in!

It is very strange to eat the next person with its dog-like body, but for the body of the Emperor's behemoth, it is just a small meaning of the teeth.

“Melong!”

Gabriel and Raphael could not help but scream!

Chapter 1624 - Hikari God

The light of the dominance formed by Gabriel is full of extraordinary power. They are not a white light, nor a direction, but an all-round pervasive.

Just like the water column can be evaded, heavy rain can also block, but the moisture is full of the entire space, and can not be directly avoided by conventional means.

These gods are like moisture, poisonous gas, pervasive, and still able to pass through the clothes, which are all-in-one penetration into the human body.

And with the synergy of the three people, they are getting more and more concentrated, and the power is getting bigger and bigger.

It's just because Shen Lang has their own defenses, and they haven't been attacked yet.

At this time, the dog \*\*\*\*\* swallowed Mellon to chew it, which had a great impact.

First of all, he lacked one of his humming, and he also lost one point. In addition, Gabriel and Rafael were all shocked by this situation, which directly affected the mind and affected the manipulation of the gods.

However, Gabriel is not an ordinary person. As the top ten apostles, although they were shocked and mourned by Mellon's fall, they immediately inspired a stronger war!

In their view, Mellon's death is not because the enemy is strong, but because of his own intentions!

Still not taking the time to get rid of the other side, it is not just a matter of revenge, they will also bother.

Already there have been four deaths in the hands of the other party. This is a huge loss that has rarely occurred in hundreds of years. Now, on the home site, under the control of the steady victory, it has actually let the other party kill one. It is really Can not accept!

Therefore, in addition to sorrow, the two of them immediately became alert and sang loudly.

The white light that has been scattered around has continued to become thicker and accelerated to the erosion of the three of them!

These changes in the light of the gods, Shen Lang is also very important, for the dog \*\*\*\* to eat Mellon, he did not care much, eat it and eat it!

To hide strength, it is not to let the other side press.

The dog \*\*\*\* did not enlarge the move, it is already very suppressed.

Now he is paying attention to how this light is broken!

What he had encountered before was the light of a series of attacks, and now it is pervading around, just like in the chaotic space.

These gods are now attacking without attack!

There is no flash, no escape, no obstacles!

Water columns, raindrops, and the like are all directional, versatile, or block or avoid, and can be calmly faced according to strength.

But for the misty moisture, you dodge to the side, the result is the same, you are holding the umbrella, the same is true.

If these gods are misty and wet, then what is most needed now is a dehumidifier!

Dehumidifier?

The idea of this metaphor is to give Shen Lang a thought.

His thinking was immediately and highly active and expanded.

If the light of the gods of light is the general cultivation of power, it is impossible to cross the space of the world. With Shen Lang's current experience, only the power of faith can be crossed.

If it is the power of faith, no matter how it is treated, what kind of aggression it has, in essence, is an energy based on the power of faith.

If you can absorb these energy in a way that absorbs the power of faith?

In such an environment as full of mist and moisture, if he can do it, it is like a dehumidifier.

Because the time is short, the longer it is dragged, the more favorable it is for Gabriel, so whether it is thinking or making a decision, Shen Lang is a matter of moments.

It is how it is executed.

The power of faith that he had absorbed before was because of the passive influence of faith after doing something that affected the public.

This passive, even if he is in the mainland of the island, in the world of giant beasts, can absorb the power of faith on the earth, and the power of faith in the city.

Strictly speaking, it is reception, not absorption.

To absorb the power of ready-made faith, it is still necessary to have a relationship with the Light God.

The sacred paintings provided by Archbishop Paul were distributed in the core cathedrals of the major parishes. They accepted the paintings of the believers' long-term beliefs and absorbed them with the holy paintings.

The holy water provided later is also a similar way.

Those who are in contact with Shen Lang can directly absorb and quickly transform into spiritual power.

Now Shen Lang thinks of this, that is, there is a breakthrough.

Since on the earth, the Holy See can create holy paintings and holy waters, which can be used to reserve the power of faith and can be directly absorbed. It is also possible to absorb these in theory.

With these understandings, Shen Lang will be calm.

The method of absorption, he will not be inferior to the method of the Holy See. One of the characteristics of his creation of "Yin and Yang Bo Ruozhen" is to absorb energy.

Whether it is to absorb the energy inside the stone, or the surrounding environment, and even the universe of heaven and earth, it is not a problem.

The power of these already formed beliefs is essentially the same.

The average person is not unable to absorb, more is not absorbed, and absorption will not be used, it is to kill himself.

For example, the flame the general monk is going to take the initiative to absorb the flame, it is self-immolation, but like Raphael's power to repair the flame, it is to make up for him.

Like the Yinquan, the average person absorbs directly harms himself, but it is of great help to the practice of the Ice Palace.

It is the same to absorb the soul and vitality of the human being.

Shen Lang is not only because he knows how to absorb, but more importantly, he knows how to use it. The light that is absorbed into the body will not erode his body, but he can also turn it into his own use. .

Under the acceleration of Gabriel and Rafael, the Vatican is now letting the nebula chain wander around the body, blocking the flame with the cold, while continuing to play the hole.

At this moment, she also felt the pressure, the voice is no longer attacking the enemy, but around her, arranged into a layer of protection.

The gods are pervasive, the sound waves are invisible, and there may be a good confrontation.

The dog \*\*\*\*\* has been with Shen Lang for a while, everyone has a tacit understanding, and it is powerful, these lights are not enough to influence it.

So after swallowing Mellon, it clearly found that Shen Lang did not speed up the attack, but stopped, and it seems that he should have thought of what to do.

This allowed it to temporarily converge for a moment, without breaking out the real strength, but to the vicinity of Shen Lang, serving as a cover for Shen Lang.

If Gabriel or Rafael is going to attack the waves and affect his plan, then it can go first.

It is not clear what Shen Lang wants to do. He just thinks that Shen Lang is like this now and needs people to cover and protect it.

And it is also very much want to see what to do in the end.

In Shen Lang's body, it seems to be able to see infinite possibilities.

Chapter 1625 - Wait and see

Unfortunately, Gabriel, they have not realized this!

Their understanding of Shen Lang is limited to just a short battle.

Regardless of whether Shen Lang is against Mellon or Gabriel, the feeling given to them is that the very fierce fighting style is fast and powerful.

Just like his heavy iron rod weapon.

Therefore, even after Mellon was killed, they have attached great importance to it, and they are only guarding against the waves and avoid being killed by him.

They maintain a distance to be able to play better. Once they are close to each other, they will give more play to Shen Lang.

So at this moment, they strengthened the chanting of the spell, making up for the lack of Mellon's piece, allowing the gods to play faster and stronger.

At this moment, the sound wave defense of Van Gogh, the dog god's cover to the sinking waves, and the sinking waves are not approaching. For both of them, it is just what they want.

They need a little more time to be bigger and more initiative.

However, in the process of such a master's trick, the time for this fight is actually in seconds.

They need a few more seconds, even if it is more than a second and a half seconds.

The same is true of Shen Lang. The help of the dog \*\*\*\*\* is to help him get a little more time.

Ever since, Gabriel and Raphael have taken the initiative to control the environmental attack.

Fan Xueyu is the sound wave self-protection.

And what Shen Lang is doing, everyone does not know, the dog \*\*\*\*\* is to protect him.

But soon, there has been a change!

Originally, because of the strengthening of Gabriel, the white light was continuously enriched. Fan Xueyu's sound wave shielding can only be as close as possible to the light.

But Shen Lang and the dog \*\*\*\*\* are submerged in the light of God.

According to the normal state, if they do not have strong self-defense and counterattack, they should be quickly eroded by the light.

This kind of erosion is pervasive and completely invaded from the outside, and the result will soon make the whole person under control.

As long as the other party wants to control the light, you can directly smash the person completely! It is also possible to control people like puppets.

But now, the white light around the Shenlang is more obvious than other places!

Everyone has no direct close combat now, and they are very concerned about the changes in the light.

So whether it is one's own side or the other side, all the attention on the spot is concentrated on the side of Shen Lang.

This flow does not revolve around the deep waves, but the white light all goes to him!

Gabriel and Raphael are a bit puzzled.

Their manipulation is to fill the whole space, and the whole environment is affected.

This is an attack that does not require a separate attack on Shen Lang, because in this environment, no matter how dodging moves, it will suffer the same highest attack.

But now that Fan Xueyu is around, it is normal to be around the dog \*\*\*\* near Shenlang.

As for Shen Lang, there is obviously a large amount of white light going to him, which can be clearly observed, and it is obvious that its surging is not weak.

For a time, everyone has not yet realized what this means.

So whether it is offensive or defensive, everything is as usual, and then wait and see.

Soon, Gabriel and Raphael understood what was going on!

Because the gods are manipulated by them, they are well aware of the changes in the light in the whole environment.

At first, I only felt the flow abnormality, and then I discovered that the light that rushed to the sinking waves disappeared!

Like a calm water surface, there is a underground hole in a certain place. The water leaks down below, which naturally makes the water surface form a vortex, and more water flows there.

The light of the whole environment is balanced. When there is a lot of light disappearing in one place, the surrounding area is evenly distributed according to the conservation of energy.

Because the light around Shenlang disappeared too fast, and the speed of the light that passed around was very fast, which made everyone feel the turbulence.

The reason why the \*\*\*\* of light is the light of the light, from the extraordinary.

God light is impossible to disappear!

If the gods are reduced, it should be invading the target's body. But the tolerance of a person's volume is not enough to achieve such a rapid surge.

Then there is only one possibility!

Shen Lang, this person, through what way, opened a channel, let the shroud within the scope of the light, from that channel to other places to go!

Still the problem of conservation of energy, Gabriel had a protective cover at the beginning, and now white light is in the scope of this envelope.

The spatial extent is fixed, and the more light they introduce, the stronger they will be. Otherwise, in such a uniform way, it will only overflow to the distance.

It is precisely because of this, when the daily attack, the Shenguang attacked out in a way, one way, not a large range.

Since they can control a range of protective covers, it is possible for others to break them or "dig" out a passage.

At the beginning of the wave, they did not care is that everyone followed a tacit understanding, fighting in this range, without destroying and influencing the larger scope.

Now it should be the sharpness of the gods, so in this way, the light is evenly distributed to the entire paradise!

What they can think of is to break the protective cover and open the gap.

It is naturally within the scope of the paradise.

So, after realizing this, the two of them did not panic, but continued coldly!

In their view, Shen Lang is now a hole in his own seat. Since he wants to let the light flow from him, it means that all the gods will sweep him again!

It's like the air conditioning in the house when the weather is hot, or the heating in the house when it is cold. When you open a window, you will naturally convect and let the air and cooling go out.

This method is correct in itself. As long as a window is opened, the air-conditioning or heating in the house will be lightened. If the speed of cooling and heating cannot keep up, the temperature will start to change.

Even if you keep up, the energy consumption of continuous cooling and heating is not small.

And their current cold eyes is because Shen Lang is equal to standing in the window, equal to the convection of the convection!

The flow of moisture and air-conditioning heating is nothing, but the light continues to rush from him, and the impact he has to bear is much stronger than other people's stillness!

Gabriel, they have no fear, because they are still introducing, it must be able to smash him before the sinking!

Fan Xueyu and the dog \*\*\*\*\* quickly realized this. They also waited for the change. They didn't know how long Shenlang could hold it. If it couldn't hold it, the meaning would be small.

Chapter 1626 - Apostle misunderstanding

When they are all watching and changing, Shen Lang will of course continue to be the focus of attention.

And Shen Lang did not let them "disappointed"!

At the beginning, he was still trying to absorb all the light of God with the power of faith.

This is a dangerous process. After all, it is the energy of others, and it is the means of attack by others. So he can't be fast, he must be safe first.

After confirming that it can be absorbed, it is reserved.

In the process of fighting, he is not likely to have time to transform, but to use a safe way to reserve the energy absorbed.

This involves security issues.

In the process of absorbing his reserves, he confirmed that there was no safety problem and began to absorb a lot.

As long as it does not cause problems for the time being, it will do.

Even if there are security risks, you can convert them or eliminate them in the future.

When he uses the "Yin and Yang Bo Ruozhen" to absorb quickly, the effect is different.

I thought that his strength was still very weak. In Qingchuan City, he once absorbed the essence of the moon and the large-scale absorption of the dragons and arches of the Tangyuan. At that time, all the monks in the vicinity felt it.

Then in the underwater world, under the pyramids of the seas, they absorbed the cumulative excess of cosmic energy for a hundred years.

Now his realm is already approaching the great god. "Yin and Yang Bozhengzheng" has also been re-cultivated to the ninth weight. The effect of absorbing energy is very rapid.

Even if these are the gods of faith, but after he tried and experienced it, it is still the speed of whales and swallows!

Presented in the feelings of other people, at first they felt that all the gods were flowing to the sinking waves, and to the back, it was like a storm!

This time, Gabriel and Rafael could not calm down.

Because this speed has already surpassed the speed they introduced, the white light, which was already very thick, was rolled up at the visible speed to the side of Shenlang, and it was also faded at a visible speed!

This means that the channel that Shen Lang opened is getting bigger and bigger. This guy not only stunned, but also led more and more of the gods!

For Van Gogh and the dog god, it is also reflected in the weakening of the attack pressure of Shenguang on them.

Fan Xueyu was surprised at the ability of Shen Lang, and the dog \*\*\*\*\* was very pleased. Shen Lang really did not let it down, but it was very helpful.

“burn this sinner!”

As Gabriel screamed, his sword swayed in the air and Raphael’s feathers danced.

The diffuse light of the beginning began to change. According to the manipulation of Gabriel, the light was scattered, avoiding the surrounding waves, and only continued to attack the dog \*\*\*\*\* and the Fan Xue.

Rafael is very tacit, let the hot flame attack, wrap it away!

But by this time, the situation is not what they said!

Just now they didn’t cut off as soon as possible, and they have already let Shen Lang’s “Yin Yang Bo Ruozhen” into the surrounding environment. Now I want to split the light, I can’t do it!

Because it is not a casual, there is a “hole” to export, but he has already integrated into the whole environment, absorbing the light in all directions!

In the case of water mist and moisture, you can close the window and separate the window with a screen to avoid moisture leakage.

But if there is a high-power dehumidifier in the house, it would be ineffective.

Shen Lang is now like a high-power dehumidifier running at high speed. These gods are already the “prey” that he has locked in!

Gabriel, the only thing they can do now is not to control the light, let alone continue to import, to avoid more losses.

Changing to a direct attack on the waves is the best way for them to stop the enemy.

It’s a pity that they have misjudged this time. They used the highest specification and didn’t think they would be cracked by a mortal.

Out of trust in the light, Gabriel is still continuing to manipulate.

In addition, let the Raphael flame attack, it is half right.

Dog gods are not eating dry rice!

It was just in the vicinity of Shen Lang, which served as a cover and a warning.

Because both the enemy and the enemy have been watching the changes of Shen Lang’s behavior, it has left no room for development.

Now this flame is attacking, there is no need to let Shen Lang shot, the dog \*\*\*\*\* has roared and rushed over!

At first glance, its body seems to be rushing into the flames. This is the act of finding death.

But when it was about to touch the flame, the air that roared out had already pushed the flame away!

Just because it rushed past very fast, almost in sync with the air, so it seems to be thrown into the sea of fire.

In fact, this time, it is equivalent to pushing the flame against the Raphael!

It has not forgotten the shackles of the waves, or has maintained its strength and has not fully played out.

But it rushed into the sea of fire and it had already made Rafael an accident.

However, Raphael is like a fish for the flames. This is the flame that he himself released and attacked. So he will not have the slightest fear in the face of the counterattack, and will not hurt him.

But before the dog god, Mellon first bite a leg, then bite an arm, and then the whole person swallowed it, that is to let Raphael's heart have a lingering fear.

At this moment, the fierce dog rushed over, he did not dare to care, and quickly retired to the back to open more safe distance.

If this time, Gabriel attacks from the side with a sword, when it can help him.

But Rafael's accidental dog god, Gabriel is even more unexpected!

He clearly has manipulated all the divine light, letting the gods avoid the surrounding waves and attacking the woman and the dog.

As a result, Shenguang still passed quickly to the sinking waves and still disappeared quickly.

This is very wrong!

Who is this guy?

However, Gabriel is still caught in a misunderstanding. He did not think of a mortal who came from a low-level civilization. He could still absorb the light!

Therefore, in his cognition, even if a lot of passing, it is just being led by Shen Lang to the outside of the protection circle.

As long as it is still in the paradise, the disappearance is just disappearing from the scope of the front, and there is no loss, and then it can be gathered up.

This misunderstanding, he is still insisting on the continued import.

At this moment, Rafael's attack on Shen Lang has failed. The dog \*\*\*\*\* has already fought with Raphael, and he can't open the waves. He simply pushes the boat!

Can't you export it?

Isn't it getting faster and faster?

Then I will bring everything together and I won't see you bursting!

Ever since, under the control of Gabriel, all the white light in the range of the protective cover that he arranged has suddenly condensed, and at all speeds, all the shrinking rushes to the sinking waves!

Chapter 1627 - Consumption

I have to say that although Gabriel is wrong, the move is correct.

Just like some people drink slowly, they can drink a dozen beers, but if you put all of this beer in a bucket and fill it all at once, you may have to die.

The absorption of Shen Lang is already a very great speed, but it also has limits. No matter how whales swallow the cows, they can't hold all the gods together and concentrate.

The white light, which had been in full-scale invasion and had great pressure, suddenly gathered all over the past, and immediately let Fan Xueyu and the dog \*\*\*\* pay attention to the past.

Shen Lang also felt the surge of pressure. He absorbed the light as much as possible, while thinking about whether there was any way to ease it.

The first thing he thought of in his mind was a towering tower!

Later, it was officially established in the mainland of Nakajima. The Ba Tian Tower is actually an artifact that is left behind here, so it has incredible power.

In the absence of Zhoushan Glacier, it also quickly absorbed millions of huge flying fish.

Living things and dead things can be absorbed, but what about light?

Or is Shenguang not the light, but the energy of the evolution of the power of faith, can pure energy be absorbed?

Shen Lang does not dare to take this risk!

In fact, it's too late...

Gabriel gathered in the past, but it was a moment, waiting for Shen Lang to see and then think about it again, and then try to absorb... The daylily is cold!

And his physical instinct is also the most appropriate and best response before the brain consciousness!

That is dodge!

Although this process is short and rapid, the speed of the waves is very fast.

So when the condensed light of God gathered around him, at about the same time, others had moved more than a dozen meters away.

This avoids the power of strong light, but he continues to absorb the light.

When he found that the waves were dodging, Gabriel could not help but sneer.

In his view, Shen Lang was just in his place, engaged in a destruction, dug a hole, and led the light out.

It is now impossible to withstand excessive flushing of the gods and can only be avoided. That will leave the “hole”, and he will not give another opportunity to Shen Lang!

Of course, he will not let all the gods disappear from it.

Since Shen Lang is afraid of these gods, it is naturally a way of attack!

Therefore, he continued to manipulate the light of a concentrated white smoke, followed by the waves.

What made him feel a little weird was that when the light left, Shen Lang was no longer there, but he did not find anything unusual there.

But now is the time to chase the Shen Lang, under the race against time, Gabriel does not have time to think.

The tactics of Shen Lang are still dodge!

Just the temptation has proved that dodge is the best way for the time being.

What he needs is delaying time, and these gods should have an extraordinary effect. If you miss the next time, you don't know where to have a chance, or try to absorb as much as you can.

Seeing that the waves are dodging, and it seems that there is no danger, Van Gogh and the dog god, they are relieved.

Now all the pressure of the gods is gathered in the Shenlang, Gabriel manipulates the condensed light to chase the waves, and the Fan Xueyu is idle.

The dog \*\*\*\*\* is fighting with Rafael, and Fan Xuexue thinks a little and makes the best judgment!

Her voice didn't stop for a moment, but it was used for defense, but now it is a full-scale attack on Rafael!

She also saw that Gabriel was the strongest of the three of them, and the operation of the white light was very dangerous.

If she takes the initiative to attack, she may not have good fruit to eat.

At the moment, Shen Lang chose to dodge, and it seems that he can hold it.

Then she should, as I have just dealt with Mellon, quickly assist the dog and kill the Rafael who is playing with fire!

By the time they are three together to deal with Gabriel, it is more convenient.

And now, the most stressful, it is really Raphael!

He had just cooperated with Gabriel and thought that he could kill Shen Lang in one fell swoop, at least he was beaten. Unexpectedly, its flame had not arrived yet, and it was held by the dog. Now Gabriel was held back.

All of a sudden he became the front to deal with the dog that ate Mellon – at least the level of the beast, and also distracted to deal with the sound of the nerves.

More importantly, the dodge of Shen Lang can't be back and forth, there must be no fixed route, that is, the dodge in this circle of protection.

It is very likely that he is on his side and he is behind him.

Let Raphael feel insecure, and if he is not careful, he may attack him!

Gabriel was also aware of this problem, so in addition to manipulating the light of chasing the waves, he also joined the containment!

But what makes them depressed is that Shen Lang's footwork is very strange. He could have seen the success of the containment, and suddenly he went from another incredible point of view to another corner.

As apostles of the gods of light, they are not powerful, but because they are respected by status. I don't know how many years have not fought in person. In terms of experience, there is really too much to be lost!

Needless to say, Shen Lang, all the way to fight.

It is the dog \*\*\*\*\* recently and after Shen Lang, there have been a lot of combat experience.

Even if it is a snowy, it is young, still aggressive. Like encountering Shen Lang on the edge of Yao Chi, even if they have already confirmed that they are friends, they also take the initiative to shoot.

It can be seen that even if her opponent level is not too high, but the combat experience is also quite a lot.

This is also the reason why she can immediately have a tacit understanding with Shen Lang and the dog god.

Gabriel has suffered too much in this respect, and Shen Lang originally has all kinds of abilities, such as the current dodge, in addition to its own speed is very fast, “Phantom Meteor Step” is to let him move Change the shadow as you like.

Rafael and Gabriel, still holding for a while, while the dog \*\*\*\* suppressed the strength and the sinking waves kept dodging.

Or it should be said that Rafael supported, Gabriel is the upper hand to catch up with the waves.

But after a while, Gabriel found a serious problem!

The light that has been condensed into a cloud of white has faded!

Originally, because all aspects were kept at a high speed, and there was no observation, it was already obvious that it was already faded.

Then as he looked more closely, he immediately confirmed one thing.

Shenguang chased Shen Lang, and every time he went back and forth, he would be less, and it seemed to disappear on him.

Hell!

Is his own body a loophole?

As he moves, the gods are exported?

Gabriel began to have a headache. It was just the light that the three people gathered together. In addition to being faster, it is also because everyone can mobilize the borrowed light is limited!

Their three apostles work together to have so much light!

## Chapter 1628 - Swallowing performance

Now that Mellon is gone, Raphael is self-sufficient, and Gabriel himself is left. Even if he can continue to import the gods, the quantity and speed will be greatly worse than before.

And, isn't that a busy job?

For him very depressed, for Shen Lang, it is very gratifying!

He showed weak dodge, and Gabriel had the advantage of prevailing, so he continued his pursuit.

In the process, he always gives the other person a "slightly hit" idea, thus delaying the time.

And himself, is constantly absorbing the light of God, and now the already strong light of the gods has become faded, and Shen Lang is satisfied.

This is already absorbed most of the rest, the rest of the small part, can absorb well, and can not absorb the loss is not big.

So he is still evading and delaying.

It's just that Gabriel has realized that it's wrong, and immediately changed the way of attack!

He did not let the gods wrap all the way in the past, but gathered together, in his palm, with a long lightsaber, began to open the big attack!

In this way, he can not only chase the sinking waves, but also attack the dog \*\*\*\*\* and the Fan Xueyu.

Originally, Rafael was tight, but in the Gabriel Lights attack, both the dog \*\*\*\*\* and the Fan Xueyu needed self-protection, which made him calm and relaxed.

But Shen Lang will not be idle!

The continuous dodging of Shen Lang just now is not really bad, just to delay the time.

Now that the other party has changed the tactics, he has naturally adjusted accordingly.

He also did not use iron bars and nebula chains, but he used his hands to throw a thunder!

The scope here is limited, but it also gives him more space to play. The goals of lightning include Gabriel and Raphael.

The thunderstorm that struck out did not have any fear of lightsaber, flames or anything.

Gabriel is not close to me, and the air is not in the air.

His thunder and lightning joined, and suddenly the power of the lightsaber was offset, and the dog \*\*\*\* and the Fan Xueyu did not need so much protection. And Raphael... another time the pressure is getting bigger!

Gabriel was charged before, although it was not enough to knock him down, but if it hit, it really has an impact. The key is that there is no trace, and it is more difficult to defend than his lightsaber.

At this time, Gabriel made an adventurous decision!

He revoked the shield that he had previously arranged himself!

The role of the shield is to isolate the sound and avoid damage to the surroundings.

Shen Lang is looking for the \*\*\*\* of light, and does not want to destroy it, so it is also very civilized and tacitly abide by this unwritten rule.

When he just evaded, he did not destroy the protective cover and went out.

Now Gabriel himself revoked, of course, not to let the Shen Lang run away, but to use the light that was exported by Shen Lang!

As long as there is enough light, his strength can be greatly increased!

But as the shield was removed, he was dumbfounded...

There is no such thing as a light outside!

“The meaning of the Gabriel apostle is to let us let go of it? Then I will be welcome!”

When Shen Lang spoke, he had already slammed his foot and directly shocked the ground to crack a big gap and spread it out.

Fan Xueyu is a slight brow.

She just followed the rules, but she felt that it was also beneficial to everyone.

After all, this is the territory of others. In this small area, there are only three of their enemies. If the spread is big, it will attract more people to participate in the war, then they are more troublesome.

The dog \*\*\*\*\* is indifferent, the Shen Lang is released, it is more open, and directly roaring out the huge waves!

Originally, its attack, if it didn't hit Raphael, would still be in the protective cover. Now it is washed out and the surrounding exotic trees are ruined!

It is Raphael himself, and he must be more cautious about the flames of manipulation.

Because his flame is extraordinary, not inferior to the three real fires in the East, flowers and trees will be burned.

The same is true for Gabriel!

The sword in his hand is not bad, but the scope of the lightsaber is much larger, and the power is extraordinary, and the touch will be destroyed.

But these have been secondary, the key is the gods?

Are those gods not exported by Shen Lang?

Is there any other way to do this, is it transmitted to a distant place?

I was just amazed, and I thought that maybe all the gods would have been transferred to this place, and it would be lost!

Gabriel's face immediately became hard to look at.

"You give me to die!"

He suddenly held the sword with both hands and rushed straight toward Shen Lang!

His speed has reached the fastest, and he is trying to prevent the opportunity of dodging.

The main attacker of the double sword is the lightsaber, which can extend far away, which means that he does not need to be close to the sinking waves to hit.

The other long sword is waiting for a backup.

I thought that Shen Lang would dodge, and he was ready to adjust the angle.

But unexpectedly, the situation has just shuffled for a long time, but this time there is no point to dodge, with a smile, open arms waiting for him to come over!

This is weird!

There must be a demon in the abnormal situation!

According to the instinctive judgment let Gabriel suddenly stop, not close to the past, just by the lightsaber into the sinking body.

He does not believe that Shen Lang will be willing to die, and waiting for him to come near, there may only be a trap waiting for him.

He is not close by himself, but the sword of the \*\*\*\*\* of light has stabbed him, and he is not afraid of being ambushed.

At this time, he saw a scene that made him incredible!

Rafael also had a distraction to pay attention to the situation here. When he saw the scene, he was almost shocked!

Because of the deep waves, I squatted slightly, and then I opened my mouth and swallowed the lightsaber!

The power of this lightsaber is far better than the real sword, enough to strangle a strong, like a magic weapon.

According to Gabriel's idea, continue to pierce the past, the other party may have what preparations can be lower. The bigger possibility is that people have already shunned to the side, leaving a shadow of blindness.

I didn't think of it, he actually swallowed the lightsaber!

It is impossible to enter the throat, and the light will be worn from his mouth and pierced his head!

how can that be?

Even if you practice your mouth like steel, you can't do this.

Fan Xueyu also has wide eyes, but her guess is that Shen Lang may be a magical illusion.

The dog \*\*\*\* is interested, while continuing to contain Rafael while watching the performance of Shen Lang.

Under the stunned eyes of everyone, the light sword turned out to die quickly, as if it had been swallowed into the stomach by Shen Lang!

Under Gabriel's god, the shorter and shorter lightsaber flew from his hand, and finally was swallowed into the stomach by Shen Lang!

Chapter 1629 - With its people

Shen Lang is really not an illusion!

But to count it, it is also like magic, a little blind.

He just smiled and greeted with open arms, just like the magician's transfer of the focus of the performance, let Gabriel doubt in his heart.

But he is not prepared for any attack, but is prepared to "swallow" his last god!

The battle just now, Shen Lang has completed most of the absorption of Shenguang, and the last part remains, after Gabriel changed the way, still absorbed.

Therefore, at this moment, he is quite sure about the amount and power of the remaining gods.

At this moment, dare to perform "swallowing swords", in fact, it is self-confidence that can absorb it within the speed of the lightsaber!

The speed is extremely fast, but now it has become a long lightsaber, which means that Shenlang concentrates only on the front.

Just after all the way down, he absorbed the speed very quickly.

In a large group of white fog that can drown people, every time you absorb one point, it is a little bit faded.

But in the size of the sword, every time you absorb a point, you can successfully absorb one or two inches.

As long as he maintains this speed, he is actually absorbed when he goes to his mouth.

Because this process is continuous, the effect of squinting is that it directly penetrates into his mouth and is swallowed by him.

It was impossible to directly swallow the powerful light of the lethality, and Gabriel and Raphael could not believe it.

But this is what they see now!

And after Gabriel stopped, the lightsaber was still swallowed by an inch...

Confirmed that Shen Lang is really there, it seems that it is really swallowing, so that Fan Xueyu is also surprised how Shen Lang did it.

She was very clear that it was diffused like fog, and it was already amazing, let alone concentrated on the lightsaber.

“Don’t you want me to die? Come!”

Shen Lang finished the “light swallow” of the lightsaber and continued to smile and asked.

Gabriel still does not believe that he really swallowed it. It is estimated that Shen Lang used the same method as before to transfer the light to other places.

But the loss of so many gods has made him very upset.

“Let him die first!”

Before Gabriel had not answered, Shen Lang stretched his finger to Raphael.

In the case that Gabriel and Raphael did not realize it, they saw a white light with a fingertip on the fingertips of Shen Lang!

In an instant, I went straight to Rafael, and I put Raphael, who was avoiding the dog god, into the hole, and almost fell in the air.

“Shenguang! How is it possible!”

Gabriel Dalat!

In the last scene, he is too familiar, this is the \*\*\*\* of light!

But this is the secret of their gods. How can humans coming from this earth manipulate the light?

No matter what I thought, he thought that it should be that Shen Lang sent the light to other places, but now I can directly use the light, is it...

Is Shenguang really eaten by him?

Can you use it directly?

This simply subverts the perception of Gabriel!

Besides Rafael, although he always has defense against Shen Lang, it is also when Shen Lang swims close to him.

Now Shen Lang did not come close to him, and confronted Gabriel. Even if he had just swallowed the sword, he was very surprised and did not expect to attack him.

Another one, the light of the light flashed directly, even if he did not evade the attack of the dog god, it may not be able to hide.

Shenguang directly penetrated his body, but because only the thickness of the finger, the effect of the hole, just like a large-caliber bullet penetrated the body.

This is a must for ordinary people. For the Raphael class, even if it is created by the gods, it can still be supported.

Unless it is just a hole in the head, or the heart.

But this time, it is already to let Raphael and Gabriel have been shocked.

On their own site, as the top ten Situ, they were actually injured by their own gods!

This is spread out and all faces are lost!

And what kind of way is Shen Lang done?

This is even more horrifying and fearful.

This is not like a gun weapon, as long as it is picked up and bullets can be fired.

But no matter how shocked, Gabriel is still sensible, he is more aware that now must leave this person!

It is best to be able to catch people, so that you can force out his secrets and know what is going on.

If you don't want to be good, you can't stay alive, you can't let this secret flow out, or you'll become a flaw in the light \*\*\*\* religion.

Besides, if you spread it out, the reputation of the entire religion will be destroyed. They are a few apostles, and they can't resist death.

So at this moment, he must desperately leave them behind!

At the beginning, they thought that the three apostles were taking shots at the same time.

Now that one death and one injury, the remaining Gabriel is also tossing and losing the light, so that they are under great pressure. Now they have not dared to support any big and underestimate. They only want to keep people, even if they are full.

It's too late to say it!

Shen Lang just actually tried it, and he used his own way to see what they were, and whether he could use it.

Now Shenguang is absorbed by him but it has not been transformed, it is equal to the same light.

And because he has been dealing with the light of God, just Gabriel changed the tactics, the way of manipulating the change of the light, he is also completely clear.

So now I have a try to learn.

Because it was a temptation, he did not directly make a lightsaber, but when he pointed to the past, he let the fingertips emit a small light.

The result is very satisfactory!

These gods are here, and they are manipulated in the right way, and they are equally usable.

That's more reliable, even if you can't convert it into the power of faith, you don't need to go it, you can use it as a weapon of God.

After a successful strike, Shen Lang is satisfied with himself, and can also think of their shock, this is his chance to continue to attack!

So when Gabriel's eyes gathered on Rafael's body, the other hand of Shen Lang's hand had been poked in the past...

Just as Gabriel made up his mind to keep the waves when they died, they found that a \*\*\*\* of light had come over!

He wants to dodge, but it is too late.

Because Shen Lang was still a sneak attack, he did not face the more conspicuous places on his chest and in front of him, but he poked at one of his feet.

When he feels abnormal, he must first look down on the target of the attack. He will have such a little bit of time, and the same kind of finger-sized light will directly pierce one of his insteps!

Gabriel was too late to scream, and people had already leaped out quickly, and then dared not stop for a while, and came a few times.

He couldn't be more clear, just just puncture it, and if he swept it again, he would directly cut his two feet!

Chapter 1630 - Escape and kill

"Get rid of them!"

Shen Lang said a faint sentence, this sentence is to listen to the dog god.

Before everyone was in the protective cover, so the movement will not affect the outside, but now it is different. After a long battle, it will attract more people.

The three of them are apostles, but the Light God has ten apostles!

When the two of them have not been resolved, and seven more, it is very troublesome.

More importantly, even Augustus, the peak of Daxian, did not rank among the top ten apostles. He did not know much about the true strength of the Ten Apostles.

So if the other seven come again, Shen Lang will become very passive.

However, this situation is difficult to avoid. The best way is to solve a few more as soon as possible, so even if you come back seven, you will deal with seven, and you don't need to deal with nine at the same time.

I am ignorant of the enemy, one by one!

The dog \*\*\*\*\* has always been pressing his own strength, quite a bit tied and careful. Now I got the instructions from Shen Lang, I don't need to let go of it, but I don't need to be so constrained to kill the guy who is on fire.

It is not important to have a dog \*\*\*\*\* to personally take it.

Therefore, when Shen Lang spoke, he did not look at the past, but looked Gabriel.

He started out with a light on his fingers. Now both hands are lifted up, and then all face Gabriel.

The predecessor of Shen Lang is the great \*\*\*\*\* who has practiced cultivation and practice, and is the one who combines the secrets of each school to create unique secrets. He does not say that genius is absolutely talented.

The experience of the two worlds has accumulated, and even if you learn a new method, you can quickly grasp the key points.

For Shenguang, he is trying to absorb it. I just tried to attack, although it was only a finger attack, but it has already made him master a certain flaw.

Now come directly to a big upgrade, ten fingers together!

Ten fingers, it does not mean that you need to be distracted, because he is only subdividing the light, but it does not need to be different.

After the appearance of the ten-thickness of the finger, he waved up in the air, and immediately weaved a net of light, and blocked the space of Gabriel's fast dodge!

This change made Gabriel angry and shocked.

The anger is that Shen Lang actually mastered the application of Shengguang, and this light is obviously introduced by him.

This is equivalent to providing guns and ammunition to the enemy. How can you not be angry?

What is shocking is the way of operation of Shen Lang!

The most common way for them is to use the gods as the lightsaber. The power is amazing, the speed is fast, and the distance can be far.

It is already less useful to spread the entire space as it has just been, and to attack the enemy. It is because the enemy is strong and it is difficult to hit a sword.

As for why the attack method is limited, because their original strength is strong, there are very few opportunities for them to use the light, and once used, they often kill the enemy.

Coupled with the rare and precious of the light, it is impossible for them to practice casually, and naturally they cannot explore more ways.

The actual combat experience limits their imagination in their application.

So I saw the light network of Shen Lang's ten fingers, so he was surprised to use it!

I can't help but doubt it. If you look at it like this, the other party is not like a temporary school, is it the same pulse? Or is the other party similar?

But this time he didn't have time to think about it, because the ten gods, with the waves of Shen Lang's hands, can be interwoven into various random nets, so that he can't prevent it!

Even if he can quickly move to the back of Shen Lang, others only need one turn.

Under such circumstances, Gabriel made a decisive decision and made an optimal stop loss plan – one escape!

He knew very well that if he escaped, Rafael would almost certainly be a fierce. But if he doesn't escape, maybe two people are hanging here.

He felt that he was not afraid of death, but if the three apostles died like this, no one would pass the message out. Then white is dead!

If he flees now, he can discuss it with everyone, re-engineer a better strategy, and then he can avenge them and complete the killing of these villains.

Therefore, he did not have much guilty about Rafael. Once this idea appeared, it was executed immediately!

Between the time, he suddenly burst into white light, and then disappeared!

Shen Lang's ten fingers of the light of the intertwined net, sweeping the area where he is located, the result is to destroy the back of a piece of flowers and trees, people have no trace.

On the other side, Rafael, suffering from the multiple voices of Van Gogh, and under the pressure of the dog god, was under great pressure, and he also expected that Gabriel could take time out to help.

Unexpectedly, Gabriel's moment has disappeared. He naturally understands what it means, and immediately chills.

He became a deserted child!

At the crucial moment, Gabriel abandoned him and escaped alone.

Instead, he is helping to help Gabriel delay a little time...

When his chilling ecstasy, the dog's mouth opened wide, and the flame around him was completely swallowed up!

And Rafael is only slightly lost has no chance to dodge, directly along the flame, was swallowed by the dog god.

Fan Xueyu looked at this scene and was also surprised.

Just now the dog \*\*\*\* ate Mellon, in fact, the scene is more \*\*\*\* and brutal. But because I first bite a leg and then bite an arm, I finally swallowed the whole person.

This is a progressive, it seems natural.

Now it is a swallow of all the flames, just like the effect of just swallowing the gods, and then swallowing people, it is amazing.

Especially the voice of Shen Lang just fell, the dog-like beast god, immediately swallowed this Raphael, it can be seen that it has left a lot of room.

She began to realize that before she was next to Yaochi, it was also a mercy for her, or Shenlang replaced it, just to avoid it.

The disappearance of Gabriel, there is no way to sink the waves.

This is a kind of secret method that they use God's light, and it can't be traced directly at this moment.

However, according to their memories of Augustus, they actually know that Gabriel's residence in Bai Paradise is really going to chase him. He can continue to chase it.

Just chasing the past, has lost its meaning.

Because Gabriel's departure is both an escape and a letter. He already knows that they have the memory of Augustus and others, and it is unlikely that they will go back to their homes.

If you want to report, you should not report directly to Guangming, but also immediately join other apostles.

Since he was allowed to escape, there is no need to chase him any more. In any case, there is no personal hatred. What needs to be prepared now is to face the follow-up attack of the Light God!
