

First Strong 1801

Chapter 1801 - River of calm

After the decision of Shen Lang, there is no further delay, let the dog **** continue to cultivate inside, he himself returns to the outside world, and then begins to identify the direction, and goes west to the west.

The great wildness is in the extreme west, and how far it is, in the memory of the elk, it is also vague.

Because that has not been visited since ancient times.

This world is extremely vast, and the population is relatively rare. It is a remote sect of Yuxianmen, and there are no other sects in the vicinity.

The spirit is lush, the cultivation environment is good, the competition is relatively small, and there are many forbidden places like the Golden Valley.

Nature is also not guilty of going to the faraway wilderness.

In the impression, the Great Wilderness is like the Zhoushan Mountain. It is a place where you know that there are great difficulties, and there are usually no one except the few people who will challenge.

There is still a thousand miles of ruins in Zhoushan, but there is no such advantage in the Great Wilderness. According to ancient legends, it may even be a barren land.

Shen Lang also has no accurate route, and there is no detailed map. Now I can only roughly recognize one direction and then start to hurry.

This is a bit like going to Zhoushan.

The last time I went to the Light God, and Augustus had their memories. Even so, there was a deviation, and the result came to Yaochi. After returning to the road, it is also constantly calibrated all the way.

Now, I am going to the west for the night, and Shen Lang is also using the holy armor to drive the speed to the maximum.

He also has a general direction. It is not necessary to find a tyrant, nor does it have to go to the Great Wilderness. Maybe it is no problem in other places.

So he is not anxious and nervous, but enjoys this trip, no matter what, at least he is so stunned, it is also a huge map.

Shen Lang left overnight, but it was not until the afternoon of the next day that he heard the information of two jade.

Stop and check it out, the information is the same.

Basically, he said it with Xue Feixue, but Xue Feixue objectively sorted out the words with a third party and simplified some of them, mainly to inform the incident.

For the content, Shen Lang is still satisfied.

After thinking about it, I was more satisfied with the arrangement of snow and snow.

Because if he just left yesterday, Xue Feixue will release information, others will doubt, how did he do so quickly from Kunlun to Yaochi?

In turn, it will pay attention to the magic weapon of the Three Realms.

Wait until this afternoon to release, on the one hand, you can give Shen Lang more time to “return to Yaochi”. On the other hand, you can also give Shenlang more time to leave Yaochi!

Even after someone received the news, they immediately rushed to Yaochi, or in a place not far away, and soon rushed to the vicinity of Yaochi, and Shenlang had already left.

Snow and snow are broadcasting a message to all the sects through the frequency of Yaochi. But if other people don't pass the broadcast, or the private frequency, Shen Lang has no way to know.

However, anyway, he is only onlookers. As long as there is public information, it can be collected. The private communication of other people may not let him know.

Only, soon he found something interesting.

People who started to have other sects sent a private letter to Ginkgo Valley and Kunlun, and asked if this was true.

Shen Lang is not good to pretend, it is deemed to have not received.

He continues to travel to the West.

After leaving the vicinity of Yaochi, Shenlang does not need to work day and night, and the latter is the daytime, you can have a broader view, see and record more reference objects.

So flying for a week, even if you don't hurry in the evening, there are stops in some places, as well as detours, route changes, etc., but they have also left very far, more than a million miles!

This distance has exceeded the distance from the day when he rushed to Guangmingshan and rushed to the mountains.

And the wilderness still appears!

However, the concept of the Great Wilderness has been blurred. There is no specific map or any reference in the memory of the Elk.

Therefore, I don't know where to start the big wilderness. It's not known what the Great Wilderness is like.

Always in the process of his high-speed flight, in addition to mountains or mountains...

On this day, Shen Lang stopped in front of a river.

The current in this river is not rushing, it looks very peaceful, and there is no sense of greatness.

However, its scope is extremely large, and there are probably more than ten miles in visual inspection.

Such a huge river, Shen Lang does not believe that there is no weirdness, so there is no direct leap in the past, but stopped at the river.

Before he had encountered two weird rivers, one was the backwaters of the meditation.

After that, what was touched, it was eroded. It seems to be homologous to the dead pool in the Golden Valley, or at least the same substance.

In fact, the name of the river, Shen Lang is not known, just because of the name of the dead water pool in the name of the Golden Mile, he was called the Dead Water River.

Including the whip magic weapon that the king gave him, he was also called the dead water whip.

The other one is the glaciers that are not encountered in Zhoushan. There are countless strange fishes below.

These two rivers have a similar problem, that is, there is a seal ban on the top!

Directly from above, it is impossible to fly past, forcing it to be close to the water.

I don't know if it is a natural environment, or when it was ancient times, there were means of super-powerful people.

Now this huge river, watching very calm, Shen Lang still dare not take a nap.

Of course, in addition to such pure rational analysis, let him be cautious, there is the induction of the wheel of the universe!

He can clearly feel that this huge river is dangerous!

But he did not have the idea of a detour, because in addition to the feeling of danger, there is also a feeling of opportunity.

However, this “danger” and “machine” are vague and uncertain. It is impossible to determine which one will be the upper hand, or it may be the result of complementarity.

After Shen Lang landed, he approached the river to the past.

The river looked very calm He was close to the river and still very calm.

There are no smashing bones in the mountains and mountains, and there is no smell of human beings to attack the strange fish.

Everything is so calm.

He kicked some grass with his feet and fell into the river, just like ordinary grass fell into ordinary water, without any abnormalities.

Is this really an ordinary big river?

Shen Lang reached out and took a trick. A stone of a size head flew up, and then thought about throwing it over the other side of the river more than ten miles away!

The distance of more than ten miles is very wide, but with the strength of Shen Lang now, not only can the stone be thrown over, but also the speed, height and curvature of it can be manipulated.

Therefore, this stone, according to his thoughts, began to fly to the other side to test whether there is any abnormality in this river.

Chapter 1802 - huge?

The stone flew past the opposite shore at a speed that was not fast, but the result was that no obstacles were encountered!

This is a stone, so it flew to the other side of the river more than ten miles away.

There is no ban on the top, and the river is very calm.

Shen Lang could not help but smile, this is to scare yourself!

Perhaps this is a big wasteland, no matter big river or big mountain, it is very common.

He has already been here, and of course he will not stop, or go home. Seeing that the river was so calm, he was ready to go to the other side.

However, since there are dangers and opportunities that can be felt here, there is still something extraordinary.

There is no ban in the air, then the crisis can only come from one place – the river!

Shen Lang slowly flew up, not fast, but only maintained a height of more than ten meters, going to the other side of the river.

If there is no problem on the river, the problem is in the river, out of the water.

Shen Lang uses himself as a bait. In the past, I will experience it and see what will happen.

His speed and height are all making his goals more obvious.

There are no problems flying out of tens of meters. There are no problems with a few hundred meters. Even if you fly a few miles, there is no problem.

The river is still very calm, flowing slowly, and there is no big wave.

However, through the use of sonar and other equipment, you can still measure the depth of this river, full hundreds of meters!

Such a large river, such a deep water area, is not in a dangerous place, it is really difficult to pick up waves.

Seeing that it has passed halfway, there have been no abnormalities.

Shen Lang hesitated whether or not to stay on the river for a while, otherwise, the other half of the past should not have any problems.

This river is so big, it is an unimaginable long-term. Even if there are any strange creatures in it, or if there are any treasures, it is impossible for him to be hit by him.

After all, he did not explore it along the map, and it appeared randomly here.

The stagnant river and the glaci are different, and the whole river is kept in the same condition. This happens regardless of where it appears.

And that twice, you can count as a fixed route.

When Shen Lang hesitated, naturally slowed down a bit.

It's already halfway through the flight, and even if it's slower, it's not going to take long.

In the middle of the river, he unfolded his knowledge and went out along the river's two ends, spreading out far.

Still nothing!

In his current realm, the two sides add up to at least a few dozen miles, but there is no abnormality.

This makes Shen Lang a bit disappointed.

Originally, in accordance with normal thinking, he was able to pass the other side smoothly, and he was satisfied. He did not need to stay and continue to the west.

However, because of the hunch of the wheel of the sky, he felt that there might be dangers and opportunities in this river, so there was more hope.

It's just that now, there is nothing to wait for.

Such a large river, stretching for tens of thousands of miles, inevitably has a lot of beasts living in the water, there will be beast ***** level, it is not surprising.

But it is also a coincidence that in a river of tens of thousands of miles or more, a random point can meet the watery beast.

Thinking of this, Shen Lang did not stay in the middle, or kept the speed before, and slowly went to the other side.

When he flew to two-thirds of the width, the remaining shores were already clearer.

At this time, I feel a strange exception!

When Shen Lang's heart moved, the gods extended the past.

The anomaly comes from the waters below, and the water surface is still calm, but under the water, it has already fluctuated.

That is twenty or thirty miles away, but the speed of the fluctuations is very fast!

It's like a torpedo shell coming down the water quickly.

The river has a width of more than ten miles and a depth of several hundred meters, so even if there is an object moving at high speed in the water below, it will not affect the surface.

There is also plenty of room for it to move quickly in the water.

Is it finally here?

Shen Lang had a little more expectation, and immediately stopped in the air.

This is in line with his rational analysis.

It's not a random point, it just happens to have a high-level beast, but if you zoom in up and down a hundred miles, it is possible. Although it is still a coincidence, at least the scope is much larger.

These aquatic creatures have been active in this river and certainly have different perceptions.

Now, like this, there should be something that feels that he is here and is coming from a distance.

Shen Lang waited quietly, but also made a good defense.

Even hesitated, do you want to release the dog god?

This world is really a hidden dragon and a tiger, and the realm of the great gods is everywhere, at least not unique.

Now, he is more likely to be a land of great desperation that has not been visited for hundreds of years. There are many mysterious objects.

The thing that is coming over is very fast.

After entering the range that the holy armor can detect, immediately through a variety of high-tech means, quickly sketched out an approximate.

Shen Lang had an understanding before it became visible.

This should be considered a huge embarrassment!

Oh, or squid, in the myths and legends, is in the sea, you can take advantage of the huge existence of the mountain. There is also the saying that “the dragon is nine sons, and the head is squatting”, that is, the kiss, also known as squid, dragon.

Of course, it is an ancient legend. Modern people generally feel embarrassed, that is, big turtles.

Ancient people may not have seen the big turtles, and compared with the average turtle, they have evolved the legend of the squid.

It's a turtle, it's not going to be fast, but now it's not only very big, but it's swimming at the speed of the water, like a submarine.

When the sketch of the giant python was sketched in the sacred armor, it has already reached the front, and it is less than one or two miles away from the place where Shen Lang is located.

Under the gaze of Shenlang defense It did not continue to come under the water, but began to rush to the surface of the water quickly, the above oblique posture, began to stun a lot of water waves around.

The two-inch oblique rush, when the giant python came out of the water, has already reached the front of Shen Lang!

And it should also be calculated, no matter the speed and the distance of the upslope, so at the moment of jumping out of the water, the huge hoe, has already stretched out, and then swallowed the mouth and swallowed it!

“This is a bit ugly.”

Shen Lang muttered to himself, and the people had already moved away like the wind. With the numerous splashes of water, they did not touch him.

Others have already reached the back of the giant python, stepping on the heavy giant shell, and slamming down the ***** that has not been retracted.

Is this dangerous?

What about opportunities? This stuff... is it good for men?

Chapter 1803 - Layer water hammer

The giant python leaped out of the water and was prepared to swallow the swell of the waves directly, but it did not work, and it was not too unexpected.

After all, this human being, since it is sensed at such a long distance, naturally it will not be an ordinary person.

The more powerful it is, the more interested it is!

If a quick rush comes over, it is only a small shrimp level, then it will be disappointing.

At this moment, its ***** was directly shrunk back, and then the whole body continued to top out!

The sinking waves that had been trampled on the back shell immediately flew up.

According to its plan, this is to change the situation of the two people again, not letting Shen Lang step on it.

Just the one that can smash the waves is not only pure power, but the power of the field with powerful water capabilities.

Shen Lang did not give him the opportunity, and did not change the other attack methods, directly sinking into the body, with a powerful force, quickly crushed on its turtle shell.

Just throwing it up, but giving him the space of acceleration and gravity, with his feet down, his feet have already carried the power of the force.

This is the use of “the heaven and earth domineering”, as well as his own “Da Shou Mi Long Xiang Shen Gong”!

Now the Shen Lang, the real strength is already comparable to the strong man of the realm of the gods. Under such a state, the effect of “the heaven and earth domineering” and the “Da Shoulong dragon like the magical power” directly makes the giant scorpion seem to be crushed. A mountain in general!

The giant python that was still on the shackles was immediately suppressed and sank to the surface of the water. For a moment, the four feet had already fallen on the surface of the water.

A human being in this area is so powerful that it is beyond the expectations of the giant.

However, it is not a vegetarian. In this huge river, it is a hegemon!

On his own site, can you be suppressed by a human being in the district?

I saw that it stepped on the four feet of the water surface, and synthesized a field, directly pressing the water surface to sink, forming a large pit on the water surface, and the water was all discharged to the surroundings.

Originally it was to be squeezed into the water, but now, the water surface has become its self-proclaimed, and the greater the pressure, the greater the buoyancy, which is equivalent to giving it a strong boost.

This is only one aspect. The giants did not focus on the following. It is always concerned about, or the sun above the waves.

Shen Lang’s “Heaven and Earth Domineering” is actually the power of calling the surrounding environment.

The giant clam is the water hegemony here. This huge water area with a width of more than ten miles and a depth of several hundred meters is the source of its continuous strength.

As it indented the hoe, Zhang mouth inhaled, immediately let the water that was crushed and flew out below, like the spirituality, began to wrap up from all directions to the strong waves of Shen Lang!

This water is not a one-time package, but has many levels.

Some are like ferocious monsters, as if they have opened their mouths and swallowed the waves!

Some are like countless sharp arrows, aiming at Shen Lang from all directions in all directions, and want to put his arrows in the heart!

Some of them are like the dragons and snakes, who continually wander around and sneak into him without any holes.

And the huge amount of river water flowing over it suddenly flew up in a huge body of water with a length, width and height that reached tens of meters, and came straight here!

Good guy, this is at least a few hundred thousand cubic meters of water!

It's like hundreds of standard swimming pools – 50 meters long pool of water, all gathered together, flying into the air, facing it!

The scene is really spectacular, and the different types of water attacks on each layer make Shen Lang a bit stunned.

At this time, the giant python did not struggle to get rid of him, still he was stepping on the back of the shell, seeing this, is to want the body to contain him, and then use water to attack him.

Shen Lang whispered: "It's useless, it's just for you. For me, it's just a little trick."

In the middle of the conversation, there was a smashing iron rod in his hand.

He didn't pay attention to all the water that was attacked in front of him, just holding the iron rod and smashing it down to the underside of the back shell!

His disregard, not because these various water attacks are hallucinations, in fact, these are real water attacks.

And even if it is an ordinary river, at this moment, after the operation of this giant cast, it becomes powerful.

Shen Lang ignores it because he forms a protective cover directly around the body. This is the protective cover of the Great God!

If it is a direct attack by this giant, perhaps this protective cover needs more reinforcement and can only play a certain role.

But it is only the river that it commands and commands, there is no problem at all, and it can be completely blocked easily.

Even if the huge water block in front of hundreds of thousands of cubic meters is coming over, Shen Lang's self-confidence can still be protected!

And he just got a stick down, the following giant python, there is no cleverness to take!

Even if the waters below can support its body, it can be supported by buoyancy, but the strength of the iron stick is still to bear it!

Specific to the details, its body is a large body, and then use the field to press the water surface to a larger piece, equal to one layer of the pressure.

But when Shen Lang attacked it, it was not the case. When the iron rod went down, it was on its back shell, it was only concentrated on one point!

Therefore, even if this power can be divided in layers, at the point of being stressed, it is still subject to the greatest impact.

“Boom!”

After a moment of squatting, Shen Lang quickly lifted up, and then continued to smash a stick.

He is now standing on the back shell, and there is no cleverness. Without flying high and borrowing power, he is using the “Heaven and Earth Domineering” and adding “Da Shoulong Like the Spirit”, with great power, direct Go down.

This giant tortoise shell is undoubtedly very hard.

For it, it is like a solid house or a defensive magic weapon.

But the question is, what kind of attack to look at.

For example, the hundreds of thousands of cubic meters of water smashed down, as long as its body is indented, the impact on the back of the shell, it can be fully withstood will not hurt it.

The same is true of other attacks with swords and magic weapons.

But the Shen Lang is different now. It is an iron rod that concentrates on one point with great strength and directly hits a point on the back shell.

This puts the pressure it bears is not the same.

Hiding in the tortoise shell, on the one hand, it has to worry about the huge force that has been at one point, whether it will shatter the place.

On the other hand, it must also withstand the fluctuations of the shock resonance, which is a layer of attacks on it!

When the giant scorpion attacked, Shen Lang had confirmed that the danger of this giant river was from this giant.

And the opportunity should also be related to it.

In this case, he must use absolute power, you must first convinced it!

Other tricky attacks can't make it convincing.

Chapter 1804 - Chasing

At first glance, Shen Lang is slowly smashing with a stick and a stick, but in fact his speed is still very fast.

Because the water-shaped attack in the previous layer has been blocked, and the huge water body is in front, now it is just pressed to the top, and has not yet fallen.

It can be seen that the time is very short, but his iron rod has already been smashed and does not know how many sticks!

The giant python is now a little difficult to ride the tiger.

It just controlled the layers of water hammer, it is to cast spells, before those are still appetizers, these hundreds of thousands of cubic meters of huge water body, is a big guy!

Now if it wants to attack Shen Lang in other ways, then it must undo the huge water body above.

This is a pity, what if it works?

But such a large amount of water is a huge weight. If you don't use water resources, use the environment and spells, and rely on pure power, you can't lift hundreds of thousands of cubic meters of water in the air.

Even if it does it now, it won't be fast.

So it can only continue to support now, holding this water body down!

The result is that it has smashed a few sticks...

What makes it so depressed is that Shen Lang is always in the same place, very precise, which makes it suffer.

If you can, of course, it is better to have a stick in different places, at least to balance.

at last!

These hundreds of thousands of cubic meters of water have already reached the top, no need to support, and dumped directly!

In the case of the giant scorpion's cast, this length, width and height have a huge body of water of several tens of meters, and it is not squarely down.

If you squat down like this, it is a large-scale sniper effect on tens of square meters, which is not what it is now.

Dealing with a person, if you are tens of square meters, although the hit rate will be very large, it is also a great waste! That is equal to only a fraction of a mile of power falling on Shen Lang.

So he manipulated the fallen body of water and turned it into a cylinder of about a meter or two!

This causes all the water to continue to smash down, and it is hundreds of thousands of cubic meters of water, all of which fall over the head of the sinking waves!

Shen Lang is secretly funny, although his physics is only at the high school level, and he is not very good at learning.

But this giant is purely based on feelings and has no physical knowledge.

So now this effect, just like a huge reservoir of water, is indeed a huge impact of water pressure.

But in fact, the reservoir discharges water, which is a greater water pressure, and hundreds of millions of cubic meters of water pressure are concentrated in one place.

Now it is carrying hundreds of thousands of cubic meters of water in the air, although it is very heavy, the power is very large, but can not gather the weight of these hundreds of thousands of cubic meters into a little.

These are the fluid water. After being transported into the air, the water pressure can't even be compared with the bottom of the river. When the impact is on the body of the sinking wave, even if the range becomes smaller, the impact is greater, but after all, it is constantly impacted. The collection, not the impact after the collection.

One side of the water continues to impact, even if it all acts on Shen Lang's body, the impact on him is not the same.

As a result, this huge scouring was blocked by the protective cover of the sinking wave, and then slipped to both sides. First, it landed on the giant python and then fell back to the river next to it.

After scouring for a while, the giant python felt that there was no effect, it wasted mana, it was just a huge momentum, and did not achieve the attack effect.

This seems... very stupid!

In the process, the impact of Shen Lang has continued.

The original shock is continuous, and when the thoughts are held, the giants can withstand it. But now when I am upset, I feel even more uncomfortable.

After another chaos, the following fields were almost unsupported, and the body almost did not enter the river.

But the giant python is the overlord of this water, water is its advantage!

So after a wave of spellcasting attacks that had just been organized became a silly joke, it immediately changed its strategy. Without any hard support, it accepted the support field below and let it sink into the river!

The river is a few hundred meters deep, and as soon as it sinks, it can quickly go deeper down.

Shen Lang did not follow, he is also very clear, in the water, it is someone else's territory, is to use their own disadvantages to counter the advantages of others.

But he still laughed!

Do you think that you can escape the stick?

Others are in the air, but the iron bars in their hands are quickly extended!

Its speed exceeds the speed of the giant squat, and the result is still a stick of shackles in the area that continues to hit before!

This stick occurred in the water, encountered a certain buoyancy block, and the giant python did not have a hard support. After the squat, its body sank faster.

But it didn't even think of it!

It did not think that the iron rod actually followed, clearly that this human being did not dare to sneak into the water...

Because it has just been subjected to the attack, it has not been re-defended after launching, but it has been used to eliminate the pain of being hit.

The result is that this stick is down, although the strength is worse than just now, it is solved by buoyancy and sinking, but because there is no defense, it bears more power than just now!

This directly collided with it and almost vomited blood, and the whole ***** was stretched out...

“How about this?”

The sound of Shen Lang has not yet arrived. The iron bar in his hand has been extended longer, and then transferred from the top of the turtle shell, and directly smashed over the gimmick protruding from it!

The ***** is shrinking, naturally because it is the vital part, and it must be absolutely good defense. It also shows that compared with the back shell, it is very fragile, not as good as the flesh.

With the power of a stick and a stick, if it is ruthless, it may explode it directly!

The giant python quickly shoved the ***** back to completely hidden under the back shell...

As a result, the stick was still lying on the back of the shell, and its body was accelerated and sinking.

Ok... sinking deeper, this man is afraid to come down on the water, at least safer?

Just wait for it to slow down, it will let this human see, who is the master here!

When the giant cymbals were secretly screaming, they suddenly found something wrong!

If it is not deep enough to sink into it, you can also explore the iron rod, but now it is getting deeper and deeper. How come the iron rod is coming over?

wrong!

Not that iron bar, now a huge pillar-like thing, directly to the side of its body, when it has not figured out what is going on, the pillar is swayed and directly puts it huge The body turned over!

Chapter 1805 - Stir up the river

What is this ghost thing!

This is in its territory, it can be very certain, this is definitely not what is in the water, it can only be a magic weapon for this human.

Turtles, their shells are extremely protective, but if they are turned over, the back shells will fall into the sky, which is a great burden.

Some turtles have been reversed on the beach by human tourists, so they are alive and dead, and they cannot flip over themselves.

Generally, you can only wait until the high tide, float down the water, and then flip it again.

This giant, naturally, will not be like this.

And this is in the water, flip it over, there is no obvious effect, it can flip over at any time.

However, its abdomen is still a fragile part. The enemy is on the top and has a back shell to protect it.

In his own territory, in the waters, he was actually overturned, stirring a four feet in the water...

This not only makes the giants feel that dignity has received the challenge, it is a kind of humiliation, and even a sense of security has been destroyed.

This is simply not the case!

This is teasing it!

On this site that it dominates, it should only be that it teases other people, and how can it not be played by others to tease it!

In order to make this evil, the giant cockroach suddenly looked up and cast a spell again in the water!

Between the time, the place where it looked up and opened its mouth began, suddenly formed a huge vortex in the water!

The vortex made the water that was originally smooth, and immediately became chaotic. From the bottom, it went straight up, and the layers became bigger and went to the surface.

In the place where the Shen Lang is suspended, the vortex that has appeared has reached a width of several tens of meters!

If this is just a whirlpool in the water, it must be in the water to understand and feel the pressure.

Will be involved in being involuntarily involved.

But now Shen Lang is in the air above the water, still feeling a strong suction.

This suction is to get him into this whirlpool, in that case, let him not want to go into the water, and be involved in the battlefield that others are good at.

Shen Lang sneered a little, and the whole person suddenly flew up!

He pulled up to a height of a few hundred meters in the air, not only far away from the suction of the vortex, but also wanted to fly directly to the other side, the giant python in the river was too late to stop.

However, Shen Lang certainly will not leave so easily, and I am looking forward to any opportunities.

Now in the air, but he wants the giant to think that he wants to escape, but also for better momentum!

After arriving in the air, the iron bars in his hands changed again.

In order to turn the giant python, the head in the water has become very big, and now it has become the same, but the length is very long, and then from a few hundred meters in the air, facing the surface of the vortex, smashing a stick!

The body of Shen Lang is very fast. When it falls, it is not in the whirlpool, but in the water beyond the tens of meters of vortex.

Like the foot on the water, he bears the pressure support of the water surface, and then the iron rod is on the vortex!

The following giants, because they felt the flying away from the waves, originally felt very boring.

The goal is gone, and its whirlpool has no meaning.

But it didn't want to give up directly, so it kept the whirlpool, but it continued to rise a lot.

As a result, Shen Lang's stick went down!

This stick was hit on the surface of the water, but when it was not on the water, it was already shocked by countless waves of water.

He seems to be a strong stick that can make the river break off!

This giant river has reached a width of more than ten miles. Naturally, it is not a stick that can be cut off. However, the tens of meters of river surface in the iron rods are directly separated, and all the water surfaces are arranged to form a tens of meters. The general gap!

The giant python that floated up below suddenly found that there was no object in its casting. All the water above was forcibly discharged, and the vortex naturally disappeared.

And it was exposed to the air without water...

At this moment, it looked at the waves standing in front of the water and felt a hint of threat.

If you come back with a stick...

This idea has only just begun, it will be darkened!

But of course it is not that it reminds Shen Lang that Shen Lang has just had a strong stick and has drained tens of meters of water, of course, to create this potential!

Even if the water is forcibly discharged, after the loss of power, it will immediately reunite and smooth.

So his speed must be fast enough!

Then the iron rod has been raised, and when the giant python has this idea, he has come over again!

Under the urgency of the giant python, it was instinctively retracted into the shell, and then continued to dive, so that he did not enter the deeper water.

Shen Lang's second stick went down, but the range of the water surface was broken, but he could not chase the giant python.

This is hiding...

But hiding is just an attack, the momentum is gone!

On its site, being chased by others, he must hide under the water...

Before I smashed so many sticks, I can say that it was attacking the spell, but it just really just escaped.

This result makes the giant clam very depressed.

However, Shen Lang did not let it go!

“Get it up!”

With the scream of Shen Lang, his body was suspended above the broken water, and the iron rod quickly extended and became into the water!

He still holds the same size in his hand, but the more he goes down, the more he goes into the water, the same as the pillars, and when he catches up with the giant python, it is like a big banyan tree.

The Shenlang people are in the air, but their hands are spinning fast!

With his rotation, the iron bars began to draw in the water. The circle of painting became faster as the speed of the waves became faster, and it was getting bigger and bigger, but a moment of effort has formed a vortex in the middle of the river!

Over the river!

In addition to the darkness, the giant python is also very depressed!

It just made a whirlpool, and the result did not work for Shen Lang.

Now Shen Lang replied with a whirlpool, but let it take care of it.

Its whirlpool is to drag the sinking waves into the water, and now the whirlpool of the swaying waves in the air is directly dragged into the water with a powerful swirling force!

With its power, this naturally makes it impossible to turn dizzy and the like.

But I can't go on the face!

However, in a matter of seconds, the giant leaps out of the water!

“Hey mankind! Dare to face me with a battle?”

After it flew over the surface of the water, it immediately roared out.

Shen Lang laughed and said: “The old tortoise, what is the courage to dare to face you with a battle? It is clear that you dare not face me with a battle! When I shot, you will run directly under the water, you are also very embarrassed to say this !”

“You, you are the old turtle!” The giant cockroaches could not help but be angry!

However, as soon as the huge irons of Shen Lang were pulled out of the water, let it quickly and quickly retreated a few hundred meters along the water.

Chapter 1806 - Chengdu Zatian

When Shen Lang’s hand trembled, the iron rod had been quickly recovered, and it became about a mile. He played in his hand.

“Look! This is the positive battle you said? I haven’t shot yet, you are scared to run!”

“Who ran? I want to open the battlefield! The scope is bigger, so that I can spread it!”

The giant python insisted that there is a range of a few hundred meters, and the width of the entire river surface is more than a dozen miles. This is only a small part, and it really can make it better.

“I said the old tortoise, what are you doing all the time? Want to eat me? At your level, would you like to eat me?”

Shen Lang said, then the iron rod pointed: “It is worse than this, you have any good baby, offer to the young master, I can spare your sins of disrespect! Otherwise, I have to drink your soup. !”

Giant anger!

Originally, an old turtle, which had already made it very angry, felt that it was greatly insulted. How can it be an old turtle?

Now, I still want to ask for it, and ask for it to tribute, this is simply arrogant!

Also said what to rid of its disrespectful sin! Say you want to drink it!

With the long years of its existence, no humans dare to disrespect it!

“Hey mankind! Where are you from? Actually, I don’t know how high the earth is! I don’t know if this Tongtian River is my landless territory!”

“Tongtianhe? Nothing... Xinjiang?” Shen Lang was a bit surprised, and quickly searched the memory of the elk.

The giant anger is angry, but in fact it is still sensible.

If Shen Lang is just a general monk, it will be swallowed.

It’s just a simple fight. It has proved that this human being is very strong. If you want to continue the battle, it may not be cheap.

Therefore, it suppressed the anger and began to ask questions to come back. I hope that the seniors will hold back the waves.

“Look at your little appearance, when is the child in Chengdu? I advise you to leave early, otherwise I will not give Chengdu a face, directly swallow you!”

Tongtianhe!

Chengdu is carrying the sky!

I am recollecting the deep waves of the elk’s memory, and I heard another keyword.

When I heard Kuafu's message before, Shen Lang had already recalled the relevant memories.

In the memory of the elk, there is no memory about the Tongtian River and Chengdu, which is the memory of the earth.

Just heard the Tongtian River, and then for this giant, the Shen Lang is still slightly different, and now combined with Chengdu, the sky is also linked.

There is a version of Kuafu, does it mean that there is a mountain in the wild, is it called Chengdu?

Just Python said that he is a child in Chengdu, and it is a human being who reflects the life of Chengdu in the sky. It is a giant, and it will make it think like this.

“Actually, I am not a child in Chengdu. I heard that there are giants in Chengdu, and I am going to see Chengdu in the sky.”

“...”

When Shen Lang said it, let the giants say nothing.

Originally it was just a step. If the other party went down, it could be regarded as looking at the face of Chengdu, not eating him.

That will not damage its face.

Now Shen Lang said that it is not from Chengdu, it is just passing by, I want to go to Chengdu to see the sky.

Then it will be paralyzed.

There is no excuse to stop, and we must continue to fight to the end!

It is also tangled. This human being is very powerful. If it is swallowed, it will be a big gain for it. And such a harvest may not be able to hit the last time in decades.

But the degree of risk is not small!

Of course, it has not yet been smashed, and this human being is obviously not using all its strength.

If you continue to fight, it feels that on your own site, the chances of winning are still relatively large.

But the problem is that if you can't overwhelm your opponent, you won't be able to swallow it. The other side has spared no effort to escape.

Just win, there is no meaning for it!

On his own territory, he was defeated by a small human being. It was extremely lacking in face.

But in turn, defeating a little human on your own site is a matter of course and will not be glorified.

Therefore, we can't eat the human battle, lose a big loss, and win nothing.

Turtles have longevity, and the life of this giant is not known for thousands of years. Even after encountering a human being for a long time, it has encountered a lot, and the life experience is very rich.

It just rushed over and found a good thing and a huge harvest.

Now I feel that this thing does not have to go down. Even if I am irritated, my attitude has changed.

“The size of your giant python should be regarded as the level of Super Beast God? Do you know that Chengdu has a specific seat?”

The silence of the giant python makes Shen Lang feel its mentality immediately, and immediately changed a way.

Before, I had to fight each other. Of course, I wouldn't be polite with it. I went straight to the old turtle. Now realize that it may have the meaning of stepping down the steps, and it gives it a little face.

From the old tortoise, to the giant clam, the super beast god, this makes the giant cicada listen a lot more comfortable.

“Hey! Why don't I know that Chengdu is there?” Then...

When it comes to the mouth, it reacts.

“You little villain! I want to cover my words! Why should I tell you?”

From its point of view, Chengdu has a sky, Shen Lang has already understood that it sees more human beings, is the Kuafu giants in Chengdu. Therefore, people who think that he is such a normal size are just young children.

Now the word “little man” is used, of course, not a “little man”.

“No, I am not setting you up because this huge site is yours. Here, I want to ask for directions, I can't find a second one, I can only turn to you!”

Looking at Shen Lang's helpless tone, he said that such a huge site is itss, can only resort to it, so that the giants listen to very useful.

“You, this little man, is also clear about the facts. You are right, the whole big piece is my site! You want to go to Chengdu to carry the sky, there are really no other people who can tell you the direction!”

“But...” Shen Lang wants to stop and stop I just played with you, I guess you will not tell me. ”

When the giant cockroaches watched his words and stopped, he was a little curious. Hearing the latter sentence, he could not help but stretch his head and his eyes were round.

“I don’t know tens of thousands of years when I live. I will be as careful as the little ones like you. Chengdu is just the sky! From here, cross the river, go over there and see the biggest mountain!”

Refers to a road, there is no loss for the giant python. However, it has nothing to gain, so I am not willing to be talked about.

Now being provoked, it also has a broader sense of superiority than the human heart.

As for living for tens of thousands of years, it may be bragging. After all, it will not live for too long in accordance with the human timekeeping method, and will forget the years.

“That won’t work!”

“What can’t you?”

The giant anger is angry, telling you kindly, can you still say no? Am I going to be wrong?

Chapter 1807 - Water shield

“I can’t ask for your information, you told me that Chengdu is in the sky, I have to think about how to repay you!”

When I heard Shen Lang’s face and said it seriously, the giant python reacted. It turned out to be this.

It was originally a sense of superiority in front of human beings, and immediately shook its big turtle... hoe.

“That won’t work!”

“why not?”

The two just reversed.

“I tell you the way, because I know, I don’t want to show you anything.”

The giant python is completely indifferent.

“You are like this... I am very embarrassed. I was originally bothered to offend you, but you are still kind enough to guide me...” Shen Lang sighed.

The more he performed like this, the more he felt comfortable and got a sense of satisfaction.

It flew over to Shen Lang and pulled everyone closer to a few tens of meters.

In the time it came over, it didn’t mean any sneak attack, and Shen Lang didn’t mean to guard against it.

“Small people, the human races in Chengdu are all giants you said. You used to be when you were not the same kind. I advise you not to go.”

Because of the sense of superiority, it may be because I don’t know how many years humans have communicated with it, and the giants began to persuade.

“It’s all human races, even if we are a little smaller, they are bigger, it doesn’t matter, everyone should be able to get along with each other peacefully.”

“Hey! Childish! Have you ever heard of big fish eating small fish? Fish is the same, human beings are the same! The little ones like you, in the past, will definitely be eaten as food!”

The giant scorpion is deeply disdainful. In this huge stream, in countless years, it has seen too much.

Big fish eat small fish, small fish eat shrimp, it can evolve to this extent, and the process has swallowed the same kind.

This time, it was originally intended to swallow the waves, but it was only because it could not be eaten, but it was also possible to die. This changed the way of dialogue.

“You make sense. So, I used to go to Chengdu in the past. Is that a very dangerous situation?”

The attitude of Shen Lang’s humility and seeking advice has made the giants very satisfied.

“That’s for sure! Just like you, go to Chengdu to go to heaven, and you will definitely have no bones left by them! You really have to see it, it is better to stay here.”

It is not necessary to find the Kuafu Giants in this trip.

It’s just a sudden whim, coming along with such a goal.

It will stop here now, it is a new goal. This giant python also proves that it is a new goal.

Otherwise, Shen Lang can’t do this with it, flicking directly, and not losing. If the dog **** is also called out, even if it escapes into the water, it can turn it over.

Now, if you are a giant, you can’t believe it is honest. Maybe you want to leave him and then find a chance to get rid of it.

However, Shen Lang does not matter, he now wants to find the “machine” in this “danger”.

“It’s good to stay here to see it. After all, this Tongtian River will not be worse than Chengdu. But...”

Hearing the waves and praising the Tongtian River, he was willing to stay, and the giant was busy asking.

“but what?”

“But I am human, not water. If I stay, I can’t swim in the water like you, it is very boring.”

“What am I supposed to be!”

The scorpion’s disdainful appearance seems to be impervious, and it should be despised here.

After a while, it spit out a fist-sized bead.

“Take this, you can also walk freely in the water!”

Said, the beads flew directly, in front of Shen Lang.

“This... is too big?”

Shen Lang reached out and took the beads.

He can be sure that holding the hand is okay and there will be no toxic effects.

But let him eat it, still can’t do it.

Because the size of the giant clam is very large, the spit-sized beads are actually very small for it.

But for Shen Lang, it is still a big one. It is not easy to swallow it directly.

Besides, what will this thing do? Will it be toxic?

The giant scorpion did not think so deep, but looked at the beads in the hands of Shen Lang, compared the mouth of this “little man”, I think it is a bit big.

It was a bit disdainful, and then spit a sigh of relief.

As the wind came, the fist-sized beads began to shrink and became a chocolate size.

“Eat it, let you not be afraid of water!”

Shen Lang is a bit sweaty. Now that others have made it smaller, it is not appropriate to use this excuse.

He started out as a smashing scorpion. Later, he said that it was a good thing to say. If it is because of this, it will make the friendly atmosphere stiff, and it is not worth it.

“Thank you.”

Shen Lang thought about it. Even if it was a poisonous bead, he couldn't do anything with his current level, so he swallowed it decisively.

Originally, he still had a mind, that is, after the beads were swallowed, fix them and don't digest them.

But I didn't expect this bead to be swallowed in, and it was automatically digested immediately!

Just like a sigh of relief, it can make it smaller. After swallowing it, he obviously feels that even if he has not yet reached the stomach, he quickly dissipates!

As a result, he immediately understood that this is the spirit of the giant scent of some vitality, not the pearls of pearls.

“Go!”

Jue looked at Shen Lang's decisive end of eating, no hesitation, and he was very satisfied.

After that, it directly plunged into the Tongtian River.

Shen Lang's feelings about the body are not obvious, but he can't go down the river. It's also a bit of a resignation.

With the body of the Great God, the heavens enter the earth, and the fire enters the water, there is no problem.

Now that the giants are down, they will join in.

Shen Lang is ready to form a thin protective cover around it, so that all the water is repelled outside the shield.

However, at the moment of entering the water, he immediately felt a different feeling!

This is a fresh feeling, as if the beads had been scattered aura, and it has spread to the whole body. Now, for water, there is no trace of terrestrial creatures, but rather a feeling of closeness.

When Shen Lang's heart moved, he received a protective cover and let his body go directly into the water.

In an instant, he got a brand new experience!

He is not only free to walk freely in the water, but also has no obstacles to breathing and opening his eyes. Even the water flowing around is not invading his body.

Not only the body, it is the clothes on his body, as if they are waterproof and not invaded!

This effect seems to be similar to his personal protective cover, but it is not separated, but the integration of water and water, the surrounding clothes, etc., are integrated into such a state.

Chapter 1808 - Underwater racing

The giant python is also a bit unexpected. It was originally intended to eat the swells. How did it become invited to stay?

However, it also found a reason for itself, because there is no chance to eat, staying is not more opportunities?

When mixed, this human being has no war, and he has more chances to eat him!

After entering the water, it quickly sinks to the bottom of the water, and soon reaches a depth of one or two hundred meters.

Shen Lang understands what it means, and this is what he wants to do.

He had a different feeling at the moment of entering the water, and now he immediately sank down to the bottom of the water.

The deeper the water, the greater the buoyancy and the greater the resistance.

But for Shen Lang, it is actually nothing.

Because when he was looking for the Earth group who went back from here, he was dive to the bottom of the Pacific Ocean under the sea.

The strength at that time was far from being comparable to the present.

Don't say one or two hundred meters, even if it is a few hundred meters under the Tongtian River, it is just like this.

But now Shen Lang has a relaxed and casual experience, not because of the feeling of strength, but the real body has a fusion of joy.

His current feelings are as if he was a fish-like freedom.

"Is it okay?" The sound of the giant cymbal sounded.

Obviously it is transmitted through the water, but it can still be heard clearly.

“Not bad, thank you!”

Shen Lang returned a sentence, he can feel it, can speak easily, will not be affected.

“Then come with me!”

The giant python continues to dive, and Shen Lang is also following the dive.

The light below is dim, and his current eyes have changed. It should not be clear, and there is no need to add lighting. It seems that nature can clearly see the following situation.

Under the water of several hundred meters, Shen Lang also felt the water flow different from the above.

The water flow is very urgent and it is a bit bitter cold.

The giant python is like a fish, until it reaches this stream, and then begins to speed up and quickly leave in the direction it comes!

When it came, the speed was already fast, and it was in the rushing river.

Now it's downstream, and the speed is naturally faster.

And it has been taking the Shenlang to this level before going, it should also have the meaning of the school.

Shen Lang did not show weakness, he was able to get the respect of this giant, without him – strength.

Now that I am under the water, although I have gotten help from it, if he is not able to perform well, he will still be swallowed up.

However, in order to show the shocking effect, Shen Lang did not rush to follow the past, but waited for the giants to swim out for a long distance before they began to exert their strength!

At the speed of the giant python, flowing down the water, a few seconds has already opened a great distance.

Just when it suspects that Shen Lang can't keep up, Shen Lang doesn't need to use force to directly use the sacred armor to accelerate. It is faster than the torpedo that is launched. After a while, he has already caught up with the giant python.

After catching up with the giant python, he intentionally controlled the speed and kept it the same.

Of course, the giant python is not convinced. This is not only its territory, but also in the water. This human being has just relied on its help to be in the water.

If this is the speed of the competition, it is better than a human being, how can it be!

It immediately accelerated, and the speed was already very fast, and the speed was once again pulled up!

In an instant, it has been leading the tens of meters, and then a few hundred meters!

Just when it felt that some face was saved, it was discovered that Shen Lang suddenly came over and kept the speed parallel to it!

This kid has a ghost!

The giant python is not convinced, but begins to feel the pressure, and feels a little panic.

If it is true that the speed of this little human is better than that, how can it be good?

It's not just using the water spells, but the four legs are sliding fast, trying to make your speed faster.

But no matter how fast it accelerates, Shen Lang is always kept parallel with it, and will no longer be opened by it.

The acceleration of the giant python directly reached the limit!

But Shen Lang still can follow it steadily, which makes it really flustered and helpless.

How much energy is there in this little human being!

It seems that this is not a left hand, but I don't know how many hands I have left.

It began to rejoice that he kept his reason, did not continue to fight with him, or else he had already suffered a big loss.

“Oh! God, you slow down a bit, I can't keep up.”

The sound of Shen Lang sounded, and the stunned giant sighed out a sigh of relief!

Finally, the stamina of this kid is still better than it!

Think about the size of the two human bodies, certainly not its opponent!

It just got a little smug and immediately reacted.

Not right...

If this kid really can't stand it, then the speed should gradually weaken and be pulled back. There is no tendency to slow down now, and I can talk to it fluently.

It will react immediately, and people will leave a face for it and give it a step!

If it is really proud, continue to compare, it may be humiliating.

“Well, the speed is slower, it’s coming soon...”

Since the other party has given the steps, it can’t stop. While talking, slow down.

Shen Lang is also natural and slows down like it.

It’s coming soon!

Shen Lang is not sure where the giants want to take him. If it is the place where it just appeared, it has already passed.

Because of the speed of this limit, it has already left a few hundred miles.

When I found it before, it was only a few dozen miles away.

Of course, there is another factor, that is, in the farther places, Shen Lang’s knowledge is not sensed, but it is discovered after it enters the scope.

There may be other ways for the giant python, perhaps when he first arrived at the river, it may be that it is possible to rush from a few hundred miles away and thousands of miles away.

Shen Lang just worried too much, but also to give it a little face, anyway, the strength has been shown, so reminded.

Now the giant python has slowed down, but it has not stopped, or it is moving forward at a relatively fast speed.

So it seems that it was really rushing past from afar.

It is no wonder that Shen Lang stayed on the riverside to test, and slowly flew over the Tongtian Tower. After more than half of the time, he stayed in the air for a while before it arrived.

It wasn't that it was found to be slow, not just by the side, but that it rushed from a thousand miles away.

And as they followed the rapids under the rush, the giants stopped.

Shen Lang can feel that the rapids here have changed a little, not so urgent, but become a bit like a big whirlpool.

Chapter 1809 - Underwater world

The thoughts of Shen Lang spread out and brought a general understanding of the nearby environment.

This is still in the Tongtian River, but when it comes to it, it forms a confluence node.

However, after the tributaries are concentrated, they become larger rivers and continue to flow forward.

After the Tongtian River flowed here, it formed a lake with a diameter of several tens of miles, and then divided into several rivers, which continued to flow in different directions.

Check out the trajectory of the holy armor, where the distance from the random waves is more than a thousand miles away.

Now the giant python is carrying the sinking waves to the lake.

When the bottom of the water rushes here, it slows down, and then begins the gentle flow of the arc, forming a vortex that is dozens of miles long, but not fast.

These streams are divided into several tributaries that flow in different directions. From the top, this is a calm lake.

The stop of the giant python is relative to the speed of the rapid rush, but it is actually slowly moving.

Shen Lang did not say much, and followed it.

Soon after, I swam to the center of the lake, and the giants began to dive deeper.

Shen Lang followed and dive together.

After a faint, biting cold water layer, it descended a few hundred meters, probably at a depth of about a kilometer, and became a warm current.

And in front of me, it is beginning to suddenly open up!

This kind of sudden and cheerful, is reflected in the field of vision, the darker the bottom of the water, but now it has become brighter.

“Little man, can’t you imagine?”

The giant python is now on a hilltop. This is a mountain at the bottom of the water.

Of course, the scale is unlikely to be large, that is, a hill.

However, it is a very large space for the giant to live here.

Shen Lang also stood by next to it.

“I really didn’t think that in this underwater world, it’s so beautiful!”

The words of Shen Lang are a bit of exaggeration.

Because he has seen the underwater world of the sea.

That is the real spectacular, it is a small world!

However, under the lakes of these dozens of miles, at the bottom of the kilometer, what happened was what he did not expect.

Just when I came down, I felt the bright light that came from these mountains.

In addition to the hill where they are located, there are some small hills nearby. These mountains have some stones that can emit light, so the water bottom away from the light source becomes clear and bright.

In the mountains, there are also a variety of exotic flowers and trees, which are the exotic trees that can live in the water like corals.

However, in a large area, no fish was seen swimming.

Perhaps the average fish can't reach here. At such depths, the water pressure is what they can't bear, and because of the cold layer above, they are blocked.

Of course, it may also be because this is the site of the giant python. All the creatures that invade here will be killed as a threat. Over time, it will become a restricted area. No other creatures dare to come over.

"It's not as big as the sky in Chengdu, but I am also very good here."

The giant python is very proud, but it also recognizes that Chengdu is a more spectacular monument.

This is also understandable. This can only be regarded as one of its palace-style. It is said that the entire Tongtian River Basin can be regarded as its territory.

Therefore, it will not be inferior to the giants in Chengdu.

Shen Lang praised it: "The gods usually take such a blessing in the sky, and they enjoy the fairy."

For this compliment, the giant python is very enjoyable.

It has always lived in this Tongtian River. Although it has seen many human monks, there are many powerful ones, and many have been eaten by it. But for the case of the human martial art, it has not been visited.

I just came here with Shen Lang. There is a heart that will help him to find a chance to kill. It is also a show of heart. It is to find some superiority in Shen Lang.

To put it bluntly, there must be an audience in the installation!

In adulthood, it is a person, and the best environment will be tired from enjoyment.

Usually it is a habit.

But now that someone comes to visit, you can show a sense of satisfaction when you can show it.

In the north with heating in the north, the coastal city with good air quality, and the warm tropical region in the four seasons... When you live every day, you don't feel anything. When you use others to set off, you can use the other people to set off your sense of superiority. Pleasant.

Earth's human society, no need to let people personally experience, let alone the big environment like the city, even if it is a luxury home, a luxury car, etc., you can also go out through social networks such as circle of friends.

The process of drying, waiting for the praise of others, whether it is the true envy, or the simple emotion, or the polite praise, will satisfy people.

Here, I don't know if there have been humans here before, or whether there are other beasts and beasts who have come here. At least from its reaction, Shen Lang's visitor has brought great satisfaction to it. .

The words of Shen Lang are true or false. Whether or not there is a compliment to the ingredients is not important to it.

It's just the process of drying this sun. This process of having an audience has made it very enjoyable.

This is even what it did not think of.

Before it just realized a sense of superiority in front of human beings – it is self-righteous, but now it is the pleasure of “sun”.

It's not enough that the light is such an environment.

The temporary gimmicks immediately signaled that Shen Lang followed it.

Slowly swam from this mountaintop and quickly reached the foot of the mountain. Then it pulled it and removed a huge stone.

This boulder was at the foot of the mountain. It originally seemed to be integrated with the hillside, and after it was removed, there was a hole.

In this hole, the light is more obvious and brighter than the outside.

This cave is for the giant to swim in, so whether it is the hole or the inside, including the boulder, it is bigger than its body.

It goes inside Shen Lang is also following.

At the moment of entering, he felt a wave of volatility.

This underwater world is considered to be its “palace”, which is the core of the temple, or treasure house.

When he was at the top of the mountain, he did not feel the situation here, which shows that it was hidden.

The boulder is just the primary appearance of the cover, blocking the underwater creatures such as fish that have been mistaken. The volatility that has just entered is a layer of protection similar to the array method.

After coming in, there is a feeling of openness inside. It feels like this is to hollow out the whole mountain. It is like a dragon palace in mythology and legend, but myths and legends are projected according to human habits.

It is arranged in accordance with the living habits of the giants.

This is its place to sleep, it is also a place for daily cultivation, there is a large enough space for activities, there are many places to place items, and there are many pure decorations or souvenirs.

Chapter 1810 - Win-win

“It’s really amazing!”

“I didn’t expect to have such a place in this mountain!”

“It took about a long time to build it!”

“It’s incredible, it’s hard to believe!”

Shen Lang satisfies the psychology that he needs to praise, and constantly praises.

Just because he is inconvenient to touch and understand more things, so praise can only flow on the surface, it is very exaggerated and amazed.

But for the giant python, this is already a happy harvest.

It has never been brought here with humans, and it can make this little human “long-sighted”, it has a full sense of superiority.

“There is nothing, it is all created by myself.”

The giant scorpion was deliberately modest, but it did show that it was its personal handwriting, rather than occupying an environment that was originally there.

“Excuse me, oh God, you are very good here, but there is also a bad place.”

“Where?”

The attention of the giant python immediately attracted.

Shen Lang is very clear, if the praise is light, it will soon make people feel fake. In the praise, if you want to find a little bit of it, you will feel that you are sincere.

It's the best way to find 瑕疵 and prove that you can't hide it.

“You are one here, it is too cold!”

He sighed and pointed around.

“Perhaps because you have lived for thousands of years, you have already lost everything, and changed to my words. For such a good place, I will feel very comfortable at first. I will feel lonely for a long time and will want to see it. Other different places of scenery.”

The giant python was silent.

Shen Lang said the facts.

This is its world, and even the entire Tongtian River is its site, but for a long time, it is really lonely and boring.

Therefore, sometimes in the waters of the Tongtian River, there are some less powerful water beasts. It is too lazy to pay attention, and it does not have to be cleared.

Anyway, it does not threaten its rule over the Tongtian River, but only a range of existence.

That can be regarded as raising, after hundreds of years, thousands of years, once it can become a climate, it will be harvested in the past, which is similar to raising a family of elixir, anyway, do not need to worry about anything, let them grow wildly.

In comparison, passing human monks is a bigger variable.

Since it is passing by, it may be only once, or it may be returned once. This will not wait for the future, and we must take this opportunity to catch it.

This depends on the strength. If the strength is too low, it will not feel it. Even if it is felt nearby, it will be too lazy to pay attention.

Strength must be on the scale to attract it.

For example, today's Shen Lang, because of the strength is strong enough, let it rush to the past.

This state has created its long years, and it is boring.

Fortunately, this family is also spleen and can withstand loneliness, in order to live for thousands of years.

But like today, chatting with a human, bringing him to his own world is also a very fresh experience, so that it has a lot of unprecedented pleasure.

What Shen Lang said now is the key point.

Everything is good here, it is too cold and too lonely.

"Of course, the sacred **** is high, maybe it is another experience. I am still too young. So I will come here for a long time, and I will continue to hurry after crossing the river. I will go to Chengdu to see the giants. "

"Maybe I think more, oh God is not here. The entire river basin is like yours. It is your place. It is a place where you are free and active. It should not be lonely."

“I personally hope to go to different places and see different people and environments. Maybe I will be very inspired. I may also get some good things I have never seen before, which can help to improve my strength.”

Shen Lang’s such words as “the words of the lungs” can’t help but feel the waves.

Although Tongtianhe is its site, at its speed, such a long basin is still tired!

Because in addition to some water monsters, beasts, and the like, or human intervention for a long time, most of the time, most of the watershed, that is, ordinary water flow.

Speaking of a large site, it is actually boring.

Can’t it always patrol the river?

Just as the Kunlun School said that it has hundreds of thousands of miles of the Kunlun Mountains, it is actually active in the vicinity of the martial art. Most of the places except the mountains are mountains, and there is no special meaning.

If you look at the fresh environment, experience and long-sightedness, it is not very attractive for the long-lived species of giant clam.

However, Shen Lang said that different people and the environment may give a lot of inspiration; there are some good things that have not been seen in some places, which may help to enhance the strength.

This is attractive!

Human beings are so small and huge. That may be related to the environment in Chengdu, and there may be something special, which is not in other places, which makes them huge.

And this small personal class can also have such a fast speed, such a strong strength, certainly in their world, their environment, there are some good things that they do not know.

Perhaps in other rivers and waters, there are some good things that Tongtianhe does not have.

And the human land world, the scope is so huge, there must be more things that are not in the waters.

If it can be obtained, can you bring back something that is suitable for it and has not been there before. Is it faster to practice later?

“Even if there are some good things in other places, they will not necessarily be given to you. Will others not occupy it?” asked the giant.

When Shen Lang heard it, he understood that it was a heartbeat.

“That’s for sure. There are some good things that haven’t been discovered yet, and there are a lot of them that have been occupied for a long time.”

“Then you have to grab it? Are you sure you have won it? For example, the human race in Chengdu.”

Shen Lang smiled slightly: “In the human society, not only the ***** of simple weak meat, but also the result of a win-win situation!”

“Win-win?” Giant 鳌 naturally can not understand such a situation It can not help but wonder: you let me eat, that is, I win; I let you kill, that is, you win. There is no win or loss, that is, flattening... How can there be a win-win situation?

“Humans have developed a way, called trading. Through trading, you can achieve a win-win situation, even a win-win situation.”

“transaction?”

“For example, Tongtianhe does not lack fish. You can’t eat it, you can’t eat it too much. If you eat a little more meat, you will feel fresh and delicious, but it’s not so convenient.”

“And in Chengdu, or other mountains, there may be no shortage of other kinds of meat. They are tired of eating and it is difficult to eat fish.”

“Normally, everyone eats each other. But if you trade, you can give them the fish and they will exchange the meat for you. So you don’t have to eat your own leftovers and greasy, you can eat more without spending any cost. What a good taste.”
