

First Strong 1811

Chapter 1811 - Induction

“This is a win-win situation.”

Shen Lang told him about it with a simple example. It is a win-win situation, but it is actually to explain “transactions.”

“This is a one-on-one transaction, which is to create a win-win situation. It can also be a one-to-many transaction, resulting in a win-win situation.”

“One-to-many? More wins?”

The giant python has just understood the transaction between the two sides. It is a well-understood win-win situation to exchange the extra worthless fish in the water in exchange for other meat on the mountain.

One-to-many multi-win trading, it can't do the same.

“I still use fish to make an analogy. There are so many fish in Tongtianhe. You can't finish it. You can't trade with people who are in Chengdu. They can't change it. They can't eat that much. Their meat is also the same. You can't eat much.”

“I have appeared at this time – for example, it can be other people, referring to the emergence of third parties and fourth parties.”

“Understand.” The giants are not stupid, just don't understand commercial transactions.

“I use a thing that everyone agrees, such as Lingshi, Lingmai, to exchange excess fish with you. Suppose I use 10,000 Lingshi to exchange 10,000 fish with you. Of course I can't eat that much, but I can. Take it to other places where there is no fish, and sell this 10,000 fish to one hundred or one thousand people, then everyone can eat it.”

“The same is true for Chengdu. You can use one thing, exchange them for extra meat, or other things, and sell a hundred, one thousand, ten thousand people in places where there is no meat.”

“This way, not only you, me, but more people have benefited. This is a win-win situation.”

This example is actually very simple, but for the giant python, it is still a bit complicated, but still need to think hard.

“But... you buy a 10,000 fish for a human, sell this 10,000 fish to many people in need, they get the benefits, you don't get it.”

The giant cockroach stared at the sinking waves and seemed to say that you have no good benefits. How could you do such a thing?

If you don't win the core of this core, how can there be a win-win situation?

“Haha, this involves the issue of pricing. Suppose a fish is a spiritual stone, because the fish is worthless in you, you think it is very cost-effective, buy 10,000 to send me one or two thousand is no problem, right?”

“This can, you rely on the win to send?” Juyi does not believe.

“Because there are too many, it is worthless to you, you can send me some, you can give me a lower transaction price. This is one of the places I won!”

“one?”

“Yes! The place where I sell fish, because they lack fish, I am not a fish and a spiritual stone, maybe ten fish and ten spirits, so I earn a stone for every ten fish.”

“If there are some places, the fish there are very rare, and their Lingshi is very common. Then I might sell two fish and two Lingshi, so I will earn more.”

Python simply thought about it and calculated it. If this is the case, he will not lose money in this ring, and it is very likely to earn the most!

“Assuming I have a million Lingshi, after I sold it, I will take back 20,000 Lingshi. Then I can buy you 20,000 fish next time, and then sell the fish to more people in more places, the winner. More.”

Giant stunned: “You don’t need to catch a fish, you can turn 10,000 into 20,000, 20,000 to 40,000!”

“Oh, this is just a hypothesis. It’s actually not that simple. For example, I have to raise 10,000 Lingshi to buy fish. I want to transport the fish to different distances, look for different people, talk to them about different prices... ”

“This is also hard work.”

“It’s not only hard work, there are costs in transportation, time and cost, there are dead fish, and there are costs. In order not to let more fish die, I have to ship faster, I must sell it faster, so others It will lower the price. In the end, there may be 10,000 fish. I only recover thousands of stones.”

“Then you won’t win!”

“The transaction is a win-win situation and a win-win situation, but it depends on what aspect. Some pay for the spirit stone and get the fish. If he wants the fish very much and does not lack the Lingshi, he feels that he won. And I am an intermediate trader, There may be a loss, and it is possible to make a lot. This process is itself a kind of stimulation.”

“This kind of stimulation is like...”

Shen Lang thought for a moment, take it directly for example.

“Just like I came here with my god, there is also the risk that I drown in the water, or you took me, but I also became friends with you, everyone has a harvest, the uncertain process, It is very exciting in itself.”

The giant scorpion was silent and did not defend anything.

Originally, it was considered to eat Shen Lang, and it would be normal to suspect.

More importantly, the words of Shen Lang touched it!

Its life is immutable. It may take a few decades and hundreds of years to encounter something new. Even if it is in a hurry to pass through the Tianhe River, it is a pool of stagnant water.

The stimulus of change itself is a rare experience.

The bait has been thrown out, and Shen Lang is not in a hurry to close the line, but looses the rope.

“Hey God, I am talking about the trading of human society. Of course you don’t care about these things. I live very well here. It’s just that I can’t keep my youth. It’s really... very good.”

But the seed that has just been broadcasted has grown up in the heart of the giant python.

Now he will praise the words here, and he will not be able to satisfy the superiority.

It is now a bit of a desire to change, expecting a win-win situation, expecting more and more.

Unknown, bring people to look forward to.

The best is always the next one.

Shen Lang also kept polite, did not go to see what it was, even to avoid suspicion, is standing still.

But if both of them don’t talk, they are a bit cold.

After a moment of silence, the giant couldn't help but ask.

"If it's not a fish, it's something else, can you trade?"

"Of course, the fish is just an example for me. Ten thousand soulstones are 10,000 fish, obviously it is impossible!"

"Ok."

"But the truth is the same things are rare, the more unusual things, the greater the value of the transaction! And this strange, not the feeling of the seller, but the buyer's feeling."

"The feeling of the seller? The buyer's feeling?" Giant is now very interested in this aspect.

Shen Lang laughed: "I still use fish to make an analogy. You are the one who sells fish. Because you are in charge of the Tongtian River, the fish is almost worthless to you, so you don't think it has any strangeness. And I don't think it has any preciousness."

The giant python nodded.

"Chengdu is carrying the sky... Of course, it may not be unusual for Chengdu to carry the sky, but there are some places where the lack of fish to buy fish, they will feel strange, they will be willing to spend more value."

"The other things are the same."

Shen Lang is so tempting, that is, I want to let the giants understand that there are some things that it thinks are common, maybe it will be strange to humans, and it implies that they can come out and trade with him!

Chapter 1812 - This is water drops

This is a scenario that has already existed when Shen Lang followed.

After all, this giant is the hegemon of this, and it is not so easy to really want to kill it. Once in the water, even if they add the Emperor, they will have many restrictions.

Since the foresight of the wheel of the heavenly machine is likely to have opportunities, then look at your own grasp.

Opportunities can be multifaceted. It is really necessary to kill the giants. The harvest is certainly not small, but the cost is too great.

If you are dealing with it, you may get less benefit, but you don't have to pay a dangerous price.

Shen Lang is a life-saving.

After experiencing the suppression of the God of Light, it is even more regrettable.

If you have a life, you can develop better.

Security is also about accounting costs.

He is not proficient in psychology, but with the experience of his two worlds, it is not difficult to deal with this giant that has been living in this Tongtian River.

This kind of thing is like this. If he takes the initiative to propose a transaction and asks it to take out all the collected items for trading, it will inevitably be sceptical.

Therefore, he took the example of selling fish and made the truth clear. After waiting for his own heart, he offered it.

Shen Lang is not sure what is there and what can be harvested, so it is not urgent.

“If... I have something, I want to trade with you, what human things do you have, can you trade with me?”

After pondering, the giant cockroach asked directly.

Shen Lang looked surprised.

“Hey God, you don’t really want me to buy fish? Here is the place to come to me...”

The giant cockroach interrupted his words: “Of course not! I am in the Tongtian River for tens of thousands of years, of course there will be a lot of things to collect, there are some things, too much for me, or no effect. As you said, perhaps for humans It’s amazing.”

“Oh, this is the case. It should be possible. After all, it is a collection of blasphemy. It can only enter your eyes. It can only be too much, and it will not be bad.”

This makes the giants very satisfied.

“So, would you like to be the one who made this deal? You can create more wins.”

“This... of course I am willing, but...”

It seems that he is unwilling to see him vomiting, and the python is a bit uncomfortable.

“The transaction creates a win-win situation and a win-win situation. This is what you said! Could it be that you just lied to me?”

“Of course not, the transaction can indeed create a win-win situation and a win-win situation.”

“Then you don’t see anything about my Tongtian River? I think there is only fish here?”

“Of course not, I am worried...” Shen Lang is still talking about it.

“worry about what?”

“Then I will be welcome, just say it?”

“Say!”

“My first concern is to blaspheme your attitude. As I said, your collection is definitely good. There is absolutely no difference. But good is not necessarily suitable for human beings. If I want to trade, I am sure.” It can only be resold to humans.”

“Hey! Be careful with the little man! Do you think I will force you to buy it? Rest assured! I will let you choose the decision. If you feel that it is not suitable, then don't. If you feel right, buy it, win-win! Force it out. Can it be a win-win situation?”

Although it is the first time today to hear this concept, it still agrees.

“What you said makes sense. Since the gods say so, then I am relieved!”

“This is the first one. What are you worried about?” Giants carefully noticed.

“There is another one. I am worried about the human things I have. I can't enter your eyes. There is no way to trade.”

Shen Lang is of course deliberate. Let's talk about these problems first, and let the giants put their own words in order to avoid disputes.

“What am I? My things, let you pick, let you offer; your things, I also pick, I offer. Everyone wants to be satisfied with each other, it is a win-win!”

The giant scorpion looks like an atmosphere, and puts an attitude of “it is impossible to bully you on my site.”

“Slow! Oh, the **** is the atmosphere!”

Shen Lang praised it and saw that it was very useful. I think it is estimated that for decades, no one has communicated with it, and it can be praised.

“This is on the land of God, I am a small human race. I was worried that you would ask for the overlord and force me to submit. I didn’t expect that God is a god, fair and just!”

The giant singer listened and was more used.

This gives it a sense of superiority and a sense of satisfaction.

“Even if you and I are different races, the time and physique of living are different, but since you want to trade, you should be a win-win situation and a win-win situation. If I am bullying you on my site, who will dare to trade with me in the future? ”

It has not had a first transaction, considering the future business reputation...

This is just a new word that has been learned, and it’s fashionable to use it all the time.

After the guest’s words have been finished, they will enter the topic.

“Look, these should be rare items.”

The giant python pulled through the air and a large stone flew over the front of the swell, then the cover on it slipped open.

It was originally a large stone that was hollowed out and served as a cabinet.

The lid is also a slate that has been dug down. After sliding it, the contents inside are directly in front of the sinking waves.

This is not sealed, and there is nothing to hide. It does not seem to be precious.

However, Shen Lang did not look down, as he said just now, the fish here is very common, and it is precious to put it in the mountains.

“Oh, please forgive me, I have never seen the world, this... what is it?”

Shen Lang really can't see what this is!

Because in this stone cabinet, a pile of beads is piled up.

It is not the water-protecting pearl that the giant python gave him. It looks like a solid water droplet, not an ice cube, more like a gel-like liquid.

His simple temptation sensed it, and did not find any strong aura, volatility and the like.

The giant python is here, and it will enjoy the superiority of "deconciliation". Therefore, Shen Lang did not study much and asked directly.

Sure enough, the giant python heard that he claimed to have never seen the world, did not know what it was, and made it very satisfied.

"This is a drop of water!"

"Water drops?"

Shen Lang is a bit speechless This name is too casual, right?

You can't take the name of a waterdrop because the Tongtian River has a lot of water.

However, it does not matter, the giant 鳌 did not think about trading, did not think about selling, of course, do not know how to package.

After you understand its specific role, look at the value of the sale, and if so, he can take another name.

Packing this kind of thing, the earth with a big population explosion, because of the fierce competition, which aspect is much stronger than here.

The reaction of Shen Lang made the giant a little unhappy.

“Do you think it is ordinary water drops?”

Shen Lang is speechless, I am not waiting for you to explain what water drops are?

Chapter 1813 - Huge?

The giant python also saw it. If it does not show the extraordinary features of these water drops, Shen Lang really can't see it.

It came to the stone cabinet before it suddenly burst into a strong temper.

In an instant, all the water in this hollow cave was discharged!

This seems very simple, but it is very testable.

If it is on land, it is not easy to discharge the water from such a large cave.

Here is the bottom of the water below the kilometer!

There is already a huge amount of water pressure in itself, and it is exaggerated to squeeze the water out of the cave at the bottom of the water, which is equivalent to picking up the entire lake.

Shen Lang is also a bit curious. It is said that it was full of water. Now that all the water is discharged, is it considered a vacuum?

But he is too lazy to pay attention to this. This is another world, many of which are different from the Earth.

At this time, the giant claw claws a move, floated a “waterdrop”, and then it looked like it was pinched.

There is no special way, it seems to be a simple pinch.

In an instant, a lot of water burst!

That “waterdrop” is like a reservoir. It contains a lot of water. Soon, the entire hollow cave is filled again, and it seems to be constantly being distributed.

“It turns out that the water drops are such a thing. It is really amazing.”

Shen Lang praised it.

“The flow of Tongtian River is not constant. Sometimes the amount of water is huge, sometimes it is less. When the amount of water is too large, I have made such water drops and collected the excess water.”

The giant sighed and sighed a little: “There was no meaning later, but it was a very small part that could not affect the overall situation, that is, making play.”

Shen Lang deeply nodded.

Not to mention the downstream of this confluence, the place where he encountered giant pythons, the area thousands of miles upstream, the width has reached a dozen miles, and the depth is several hundred meters. This amount of water is an unimaginable amount. !

Affecting the amount of water in the Tongtian River, it is a huge mountain in the vast wilderness, and it is affected by rain and drought.

When it comes to this downstream, it relies on the water droplets made by the giant python, just like it could carry hundreds of thousands of cubic meters before, and it has no effect on the entire Tongtian River.

The water drops of such a cabinet, each containing a huge amount of water, all released, it is estimated that the water level of the lakes in these dozens of miles rises a few centimeters.

As far as its personal power is concerned, it is not necessary to adjust the flooding of the Tongtian River. The power of nature is such a super beast, and it is far from comparable.

“But for other places, this can solve the problem of local drought.”

Shen Lang said its role.

The population density here is far from being comparable to the earth. Many cities are just the level of the country. It is really a drought. This waterdrop cannot solve the scope of a province or city on the earth, but the scope of some townships is no problem.

“Do you think it is useful too?” Jubilee was a little excited.

“It is very useful. There will still be some areas where there is a shortage of water. Give this to them and be able to solve their urgent needs when they are in a hurry.”

Shen Lang affirmed the value of these “water beads”.

“How much can this trade be?” The first time the giant traded, it was still very exciting.

“It depends on what you want to trade?” Shen Lang asked.

The giant python has asked, it has not been traded at all, and this concept is just popularized by Shen Lang, let alone this process.

“How did you trade? I am not sure.”

In this case, let it have no sense of superiority, not very cool, but still have to say.

“We trade in two kinds, the barter, that is, this thing, exchange another thing. There is money, you are the goods, this is the broad currency.”

Shen Lang took out a Yuan Lingshi.

The giant eagle looked at Yuan Lingshi and was interested in it. This thing contains aura, but for its realm, the role is too limited.

“This doesn’t have to be for your own use. It can be used as a currency. For example, if you look at something else somewhere, and you don’t have the things that others need to trade, you can trade with such a spiritual stone.”

Shen Lang continued to popularize the concept of “money”. It has no money. There is no way to buy something in the future. If you want to buy something else, you must first exchange your money with your own things.

Lingshi is money, it must have such a hard currency reserve.

“Yes, you can change this for me.” Jue accepted the concept of Shen Lang and felt that he should have a little spiritual stone, even if it could not be used.

“but.....”

Shen Lang also truthfully confessed: “I must first make it clear that I can’t use this thing. The human world is extremely broad, there are few people, and the basic living places are good. Even if the environment is not good, it must have been moved from generation to generation. “”

The giant python knows: “So I can’t sell much? I can tell you that Chengdu needs the sky!”

“Oh? Chengdu is more water-poor than the sky?” Shen Lang remembered the story of Kuafu being thirsty.

“Yes, they all have water from the Tongtian River, or I won’t know them. These give them a role.”

Looking at the giant python is very certain, Shen Lang could not help but ask: “Why didn’t you give them before?”

“Why should I give them to him?” Python asked.

It makes sense! Why do you want to help them?

In the past, the giant python had no concept of trading, or else it might have traded with the Kuafu giants in Chengdu.

Carrying water drops in this way is naturally much easier than trying to get water back.

“Okay, then I made this deal. Even if Chengdu does not need so much, I sell it to other places.”

After Shen Lang finished, he directly offered a price to it.

“I use a hundred yuan Lingshi to buy the water drops in your box. How?”

The giant scorpion hesitated, apparently not satisfied with the number of one hundred.

Shen Lang regrets a bit. When I used to compare, I shouldn't say that 10,000 Lingshi 10,000 fish, let the old turtle think that Lingshi is worthless I have come to this Lingshi, there is no place to use it. . Not so, I will accompany you to Chengdu, and deal with them.
”

Shen Lang could not help but be speechless.

Also said that it does not know how to make a difference, this is a bit savvy!

Originally he was an acquisition. What is this? Become a... shopping guide?

If he is only acting as a middleman and letting the giants and Kuafu trade, then he has no interest, even if he gives him a commission benefit, what can he do? Not interested at all.

The giant python also saw his mind and immediately added one sentence.

“The transaction is still up to you, how much you can sell, and finally it will be equally divided with me. So I will make an item, you will trade, and finally win.”

I got it... I know that I'm divided!

Chapter 1814 - Collected stuff

The concept of division, Shen Lang has not been popular with it, I did not expect it to realize it!

Sure enough, it's a long time old pharaoh!

"Hey God, I am serving you."

"what?"

"Human trading, there is also the concept of this sales share. It is relatively new, many people still don't know, I didn't expect you to realize it."

"So the sales share is what you just told me. I will hand over the items to me for trading. After the final sale, everyone will follow the agreement instead of selling them to me at one time."

The giant python is a smattering solution. It does not have a concept of division. It will make this suggestion. It is to follow Shen Lang to see the transaction process and see what can be bought.

According to the previous practice, it will not necessarily meet a person for a long time, and it may not be able to have such a friendly trading atmosphere.

Maybe you can find the Kuafu Giants in Chengdu, but it has never been traded, and it will definitely suffer.

So I thought, go with Shen Lang and experience the human transaction.

If there is a wave, it doesn't have to worry about anything, and you don't have to worry about losing money. For this reason, it is willing to pay half of the transaction amount.

Now the praise of Shen Lang makes it a bit incomprehensible, and then complacent, and feels that its wisdom is still very good, and can quickly understand the experience that human beings have pondered from generation to generation.

“What do you think?”

“no problem.”

This is already the case, what about Shen Lang?

Besides, this point of view means that these drops of water also want to sell a price that is not low, and he does not want to be a big head.

The first transaction, half completed, made the giants very excited.

“This is a different item, it’s not worth it here, it’s worth it elsewhere. Is there anything else better?”

The meaning of this sentence, the giant python is also immediately realized.

It’s just water drops, it’s not precious, Shen Lang is a bit out of sight!

The giant python was just the first transaction, of course, reluctant to take good things out, just a test of water.

Now that I have realized this kind of process, imagine that these useless things can be exchanged for many other things, and it is exciting.

Of course, I can’t let Shen Lang not look at it at the moment, because I can’t see the items, it seems that it is barren here, and there seems to be nothing good.

The giant python did not speak, but began to pull up the air.

A few huge stones were moved in. Like the drops, they were boxes of stones.

I thought that these big stones were used for decoration, and now it seems to be the box that has been collecting items for thousands of years.

It is not open, and it is not convenient for Shen Lang to investigate what is inside.

Soon, a large stone flew over, which was hidden under a pile of stones, similar to the baby at the bottom of the pressure box.

As before, the lid of this stone box is also slipping open, revealing the inside.

Shen Lang looked at it and immediately was attracted.

The box that this large piece of stone has been hollowed out, although not as thin as a box, but because the stone is big enough, there are quite a few things that can be loaded inside.

Now that Shen Lang first saw it, there are many threads!

It is no wonder that the giant python does not see the Yuan Lingshi. It turns out that it has so many collections.

This is not surprising. Even if its life span has not been boasted for tens of thousands of years, thousands of tens of thousands are still possible. For such a long period of time, let it pass through the Tongtian River Basin.

This huge stream of Tongtianhe is very unusual, and the scope of the basin is also wide. If the time is long enough, there may be various possibilities.

However, Shen Lang is not easy to stare at these threads, can not covet, he must maintain a trader's attitude.

“These should not be ordinary?”

The forefoot of the giant clam was pulled, and the items that had been piled up inside began to float in the air—it should be said that the water floated up. Display together to let Shen Lang view.

Originally it is one, all the things here are it, so long years, at the beginning may be well organized storage, over time, plus more things, it is a mess.

But now that we have to present these values, we will give Shen Lang a good placement.

“Look, just look!”

The giant python has a sense of superiority at this time, as if Shen Lang has never seen the world, and it is like a local tyrant.

Shen Lang is really serious about watching.

This is one of his purposes. If you can get some baby here, then this is not a white one.

The pulse is of course a good thing, but he has no other good things to sneak into the giant python, just look at other items.

In addition to the spirit, these collections have obvious Tongtianhe characteristics, or water style.

Such as beads, stones and the like.

And these, Shen Lang is not recognized.

In fact, even if it is a medicinal material, Shen Lang can't recognize much.

After all, he is good at the earth, and it is still the ancient earth. Many items on the earth are extinct.

Shen Lang smiled: “Hey God, still have to trouble you to introduce, I have limited knowledge of these...”

Just now he didn’t know much about the water drops, but he also knew that it was not a good thing. Now, it is really a bit helpless.

This attitude has greatly embarrassed the giant python and has a sense of superiority in front of human beings so that it can be clearly displayed.

“In fact, it is not a villain. You have limited knowledge. It is my abundance of Tianhe.”

It is also a modest sham for the fake model, and actually the pride is beyond words.

“This is also a strong aura, much stronger than your Lingshi, you can’t compare.”

“Well, this I know, we humans call it the spiritual pulse, it is not comparable to the Lingshi.” Shen Lang nodded.

“This is the pulse!”

When I talked about the currency, Shen Lang mentioned the Lingshi Lingmai, and the giant python also had an impression. Hearing this can also be traded with things, and he could not help but feel refreshed.

“These beads, do you think they all feel the same? In fact, they are different!”

Then it began to smug one by one to introduce a blue pearl, it was hunted a million years old python. It is not a pearl made by Hehuang, but another mysterious thing.

According to the description of the giant python, Shen Lang thinks that it should be regarded as the inner scorpion.

It’s just that this giant

There is a basketball-sized water blue bead. This should be considered a sphere. This is a bead related to water. The giant python did not say how to get it, but said that the beads can absorb moisture.

This absorbs moisture, of course, it is not the absorption of the dehumidifier, but it can gather the water elements within a hundred miles and miles.

For the monks of the water system, both the time of cultivation and the time of casting, there is tremendous help.

The water droplets are local artificial rainfall, and this thing is able to carry clouds and rain thousands of miles away.

Chapter 1815 - Shui Linglong

Other items such as beads and stones are also obtained by the Tongtian River, and most of them are related to water.

After listening to it, Shen Lang was a little disappointed.

Originally, he thought that this is here, and there are some good things that can help him a lot.

However, these look down are all tasteless.

There is no obvious help to him, and the value should be no small, he personally has no interest in buying.

He wants to be the trader. The main purpose is to have the right of first refusal. Otherwise, if he earns a little price difference, his interest is not much.

Now he is divided into modes, or earning a commission, he is even less interested.

The giant python began to be Dessert, and the back was also aware that Shen Lang did not have any excitement, and it was only a polite guest.

This made it feel a bit boring.

“Do you think that these are worthless?” The giant aunt was a little depressed: “Then look at these again, are there any?”

It then slides the other boulder boxes all over the slate cover and lets Shen Lang see what’s inside.

Now it is interested in introducing these, it is not big.

Shen Lang is also not polite, although the best has been seen, for the medium, naturally there is no expectation, but politely still have to look carefully.

Of course, the things in these stone boxes, Shen Lang, can’t recognize much. The giants are not interested in introducing them. They can only guess.

Fortunately, most of them can be judged as a general, these are mainly some of the natural materials in the bottom of the water.

At this time, Shen Lang suddenly found that he was caught in a misunderstanding of inertia thinking!

That is, he feels that he is not a person in this world. He knows very little about the various creatures in this world. Perhaps only the species of the earth, such as the jade peach and the nine-timed purple lotus, can be recognized.

Otherwise, there are only a few medicinal materials with obvious effects, or Lingshi.

But this is a misunderstanding of inertia thinking!

In fact, from the earliest to the end, the memory of Jingrufeng was extracted, and the memory of the elk was extracted. From here, comparing the comprehensions of the grassroots to the memories of the ancestors of the great realm of the gods.

This allows him to have a complete cognitive system, there are some low-level things to know, the middle level is also known, high-level, rare, and also know.

Because of inertia thinking, he himself did not think about it and searched for these memories. Naturally, there was no feeling.

After discovering this, he looked at the scene again and immediately had another feeling.

The existence of “water drops”, which is made by the giants themselves, has never been seen. There are also some beads that are unique to the Tongtian River or some creatures that cannot be recognized.

But like some special stones, somewhere else, or some records, with the introduction of the giant python, I also know, but may be named differently.

Now that the giant python is not interested, these things that are too lazy to introduce are considered to be relatively medium-sized in the collection, not so rare.

Sure enough, it is also found in other places, not unique to Tongtianhe.

For example, there is a whole box of dark brown fruit, which is in memory.

This kind of thing is called “water exquisite” and is an aquatic medicine. The effect is the same as the jade peach, which is a good thing to enhance spiritual power.

Shui Ling Ling is negative, does not need sunshine, and there is no green leaf safflower or something. The fruit that grows directly is the fruit, and it is usually a bunch of small fruits. The growth environment is in deep water.

This particularity makes it often difficult to find and not easy to pick, so the year can last longer.

Of course, because of this, it has achieved its value. If the year is not enough, for example, only for a few decades, the fruit is small and the efficacy is not big.

But because of this particularity, few people deliberately searched for it.

For example, the forbidden land such as the Golden Valley, there may be such a thing in the deep pool. However, it is not easy to go deep into the water. It is more likely that there are still beasts living under the water. The danger is far greater than that on land.

In the end, wild waters are often rare. Some sects own, or have circulation to the market, basically “planting.”

Because it can’t be done quickly, this “planting” generally refers to the “cultivation” of care.

For example, Yaochi has such conditions. The martial art is very familiar with the environment. If you know that there is water and exuberance, you can grow it for centuries and millennia. When you need it, you can pick it as needed.

The Tongtian River is in the vast wilderness of the West, and few people come to explore and are destined to belong to the undeveloped area.

And its width has reached a dozen miles, the depth is also a few hundred meters, with a lot of watery environment. There is also a rushing cold layer protection, which is a relatively low-level waterborne beast, and will not be swallowed.

Of course, any good thing in the level of heaven and earth treasures is based on the absorption of natural essence, and the water is exquisite.

This large amount of growth is based on the vastness of the entire Tongtian River Basin. Specific to the details, it may be a few hundred miles.

However, because of the wide range of upper and lower, coupled with the accumulation of long years. So that the giant 鳌 still collected a lot of water exquisite.

Judging from the color and size of these fruits, Shen Lang is estimated to have at least thousands of years and has a very high value.

The benefit of this botanical elixir is that it absorbs much better than minerals!

The process of cultivating and evolutioning of giant pythons should not have less water and other medicinal materials, but the effect on its current level is not so obvious, so it will be collected, and it is not regarded as a treasure.

But here is a huge advantage in terms of quantity, whether it is used by Shen Lang or brought to trade, this is a good thing!

There are others, and similar things.

Therefore, this road looks over, the box that the giant cherishes, Shen Lang is disappointed, but these are medium, which surprises him.

His reaction was still captured by the giant clam.

But the giant python is a dark disdain!

Sure enough, the little people who have never seen the world! Such a common medicinal material on the bottom of the water makes him feel good, but it is the real good thing, he still does not know the goods!

It wasn't that the villain was humble, it's true that I have never seen the world!

It turned out that the perfunctory of Shen Lang was not disappointing, but it did not know the goods. This made the giants who had no interest in it, and they were full of superiority.

"How about these? You feel valuable, I can trade with you. Sell it to you, you can divide it."

Shen Lang is also seriously thinking about it.

"Since we have to go to Chengdu to carry the sky together, then most of it is still for me to sell you, and the results are divided. It is not half of me. When I look at it, I will give you some benefits. But..."

"But what?" asked the giant.

Chapter 1816 - Win-win transaction

Although the giant 不 does not mind splitting half of the proceeds to Shen Lang, it is completely ignorant of the transaction, not even understanding the dealings with humans, and bargaining.

Although it does not have these specific concepts, but the instinct is still a little vague idea, faintly feel that giving Shen Lang a little more benefit, he can help sell better prices,

However, Shen Lang said that it is not half as much, it is of course happy.

Now that the waves are turning, I will quickly ask questions.

“But in addition to going to Chengdu to go to other places, it may take a long time, you should not be too long to leave the Tongtian River. So, I want to have a part, I buy it directly. What do you think?”

When I heard the words of Shen Lang, the giants were relieved.

Originally, it didn't have a specific goal. It was a good thing to trade a part and exchange some fresh things.

It is really impossible to follow the long wave and run around for a long time. I am satisfied with this suggestion.

“Well, what do you want to buy?”

Its gaze has been seen, water and other items.

It can be judged faintly, and Shen Lang does not see “water drops”. After all, that does not have much effect on individuals, unless it is a transaction.

And those good things, Shen Lang does not know the goods, or can not afford to trade, can afford to see and can afford, it will only be medium.

“I am going to take one of my veins and trade this box with you.”

Shen Lang took out a thread and pointed directly to the stone box that pointed to the water.

“I think about the other, but not so much.”

The giant python has been watching the reaction of Shen Lang.

It does not understand the market value, but it is impossible to fully believe in the waves.

Therefore, it can only refer to the price of Shen Lang, and then by observing the reaction of Shen Lang, to judge how much credibility his offer price has.

Now the price of Shen Lang is making it a bit tangled.

On the one hand, it is of course willing and happy to be able to change the water that is more sloppy to him.

On the other hand, it is just a thread, and it feels too little.

If you change to a human being, then no matter whether you understand the market or not, you will have to pay for it at the price. If you say one, I will say five, and then everyone will slowly talk about it. In the end, it will be good to trade two or three threads. of.

The giant python does not have these experiences and concepts, so it analyzes the value through the reaction of Shen Lang.

It's a pity to look at Shen Lang. It looks like I want to buy other items, but I can't get the spirit.

This is also the place where it tangles.

If Shen Lang can only come up with a thread, then do you want it?

If you don't want it, you can't get it.

Or you can use other things to trade, but a lot of human things, it feels no value to it, and does not understand, or this thread is more practical.

Didn't the villain say it? Lingshi, Lingmai or something, not only can be used by itself, but also can be used as the currency of the transaction.

It feels that if humans come up with something that it is not familiar with, it does not recognize it. Similarly, it is taken out by the water, and many humans do not recognize it.

After quickly considering it, it nodded.

"Yes. Take it."

The giant nodded and agreed: "In fact, these are not bad."

"It's good, but I don't have more spirits."

Shen Lang's face still remained, and then he gave him the Lingmai, and directly collected the water in the stone box.

He really feels good, except that Shui Ling is a high-efficiency effect for thousands of years, and the others are also.

It is also worthwhile to change a thread.

But he can't take more threads out!

This is not the same as the Yaochi event. At that time, it showed strong financial resources, which can achieve the effect of bluffing. Others will guess that you have a lot to come and not dare to offend you.

Now it is different. If you show that you have a lot of spirits, you will definitely think about killing people!

So he must show a distressed look.

Looking at him and taking away all the water, the giants were a little surprised.

“This is a kind of storage magic for human beings. You can put a lot of things into one thing.”

When Shen Lang said, he gave the giant ring a storage ring and taught him how to use it.

He now has a lot of it, and it doesn't work at all. Things are sorted out in one or two commonly used ones.

Shen Lang is really not thinking much, just a lot of things, like Shen Yang, Zheng Zheng has been the other great gods, did not spend a dime.

Now give it to the giant python and do a good job.

After all, if you want to bring these things to Chengdu, the sky and the Kuafu giants trade, can't let this giant smash these big stones in the past?

So this is also to facilitate the road.

However, it has no value to him. For the giant python that has been living in Tongtianhe, it is very happy.

It hasn't gotten such a thing, but it used to be used by the human strong, making it very puzzled and very yearning.

Now Shen Lang suddenly gave it a magic weapon for storage, and tried it. I can really put everything in. It is so small, it can be contained in the mouth, it is too convenient!

Usually it must be here at like this time to attack the Shenlang, but a thousand miles, back and forth can not be used for a long time, it is nothing.

However, if you go to Chengdu to carry the sky, you have to worry about whether it will happen for a long time, and will not be lost.

Now that you can take your body with you, you can be a lot more casual.

“You send me something, I can’t ask you for it, you pick it up!”

The atmosphere of the giant scorpion once again displayed the things in the box that was most precious before it, letting Shen Lang pick one, but did not include the spirit.

Because the spirit has been valued, it has just seen value. If Shen Lang chooses one, it is equal to the water that sent a box of water.

Others are precious and valuable, but they feel that they only sent one, and they won’t feel bad.

Shen Lang looked at it and randomly selected the blue-colored beads.

This is probably in the eyes of the giant python. It is also relatively tasteless. It can not only lose the human feelings of Shen Lang, but also lose its beloved and make it very satisfied.

This is also a win-win transaction for the host and the host.

Then it is simple, anyway, all its items can be brought, and then ready to go to Chengdu to see the sky, to see if the giants need it.

If you can trade a part, it is already very good. If you go to other places, you will come back later.

The giant python does not need to carry all the boulder boxes, and there is no need to worry that the old nest is being taken over. It can be said that it is lightly loaded, and it is rushing with the deep waves, coming from the bottom of the lake.

Chengdu is carrying the sky, it just knows a general direction and scene, and has not really been to it. For this, it is also full of expectations.

Chapter 1817 - Giant

At the moment of leaving the water, the giant python is still quite awkward.

It is certainly not the first time to leave the water, but it is only in the vicinity. This time, it is the first time since its long time that it really left the Tongtian River.

Even if Chengdu is far from the Tiantian River, it is not far away, it is in the wilderness, but for it, it is still a very big change experience.

Before Shen Lang, there was only a concept of a great Western wilderness. It came from the Yaochi side. I didn't know if there was a detour along the way, or whether it was the right direction.

Now from the giant python, it is already known, and the Tongtian River is already the scope of the great wilderness.

Unconsciously, he is already in the wild.

The vast wilderness is extremely wide, and it is a very vast territory. There may be 100,000 mountains, rivers, deserts, and Gobi swamps.

Tongtian River is one of the famous river basins, and this is one of the signs of the Great Wilderness.

With the vastness of the Tongtian River Basin, it is still impossible to flow through the entire wilderness. But it can also affect a part of it, so after entering the Great Wilderness, you can see that you have already entered the Great Wilderness Area by seeing the Tongtian River.

However, if Chengdu is carrying the sky, it will still need to continue to the west.

Shen Lang was originally aiming at random random westward. Before that, he followed the giant scorpion and went down the river and left a thousand miles away.

Although the giant python did not personally go there, but for the situation here, I still know more.

Going forward together, the road is led by the giant python.

It is well-known in the Tongtian River, and it can also use the water to move quickly, but on land, it will be much slower. It is to adjust the direction while recognizing the direction.

All the way down, Shen Lang contrasted the trajectory of the record of the holy armor.

I found that although there are quite a few bends and the like, it is not straight walking, but it is still oriented in one direction, and it is oblique!

This means that the river crossing place that he immediately went to is really close, and it is generally straight to the west.

Explain that the giant python had pointed out the way there before and did not lie to him.

According to its statement at the time, it was after crossing the river and then going west, and saw a huge mountain, that is, Chengdu is carrying the sky.

Now it's going from the lower reaches, and it's going to be a long way away.

Plus one night rested at night, the next day at noon, only arrived in Chengdu.

At this time, for Shen Lang, it is not anxious at all. When he really saw Chengdu carrying the sky, he was shocked.

Chengdu is a huge mountain!

But unlike the huge mountains like Zhoushan and Kunlun Mountain, it is a mountain in the wild.

In other words, it is a huge mountain, not a collective name for a whole mountain range.

It can be seen far away, and it presents a mountain with a trapezoidal appearance. Neatly erected, comparing many of the surrounding peaks, but there is no peak snow peak into the cloud.

It looks very spectacular.

The closer you are, the more you can see clearly. This huge trapezoidal mountain range has many small peaks, not a complete one.

The reason why I feel as complete as a huge trapezoid is because it is red ochre, similar to the earth's Danxia landform, so it looks particularly conspicuous in the distance.

“This mountain is Chengdu, and the people living here are much bigger than you. They are also relatively short of water, so sometimes they will go to Tongtian River to take water.”

The giant python did not elaborate, but it should have had contact with the patriarchal father, and he had some understanding of Chengdu's carrying the sky.

However, it was also the first time to come here, after seeing it with your own eyes, it was still a bit shocking.

Shenlang came over this road. I don't know how many peaks and peaks I have seen. Before that, there were Kunlun Mountains and the Zhoushan Mountains. Compared with this, this huge Chengdu sky is not enough for him.

However, it can be found recently that the scope of this Chengdu-based sky is also great, but the area is estimated to be much larger than Guangmingshan.

Legend has it that Kuafu lives in the great wilderness of the West, and more accurately, it lives in the vast mountains of Chengdu.

“How can we get in touch with them? Will we be treated as enemies?”

From appreciating and talking, Shen Lang and the giant python did not stop.

The speed of the giant python was not fast enough because it was necessary to identify the direction. After confirming the direction, it was faster to fly over.

So now they are also fast in the sky to Chengdu.

“How do I know? Someone is going to patrol the mountain!”

For the first time, the giant python “going out of the door”, this question is really not what it can understand.

When they entered the Chengdu Tianshan Mountain area, they felt a burning sensation. The moisture in the surrounding air is suddenly reduced, full of dryness and heat.

Shen Lang is better. The giant python has been living in Tongtianhe. When it is here, it is obviously uncomfortable.

The two speeds quickly flew directly into the mountains of Chengdu, and stopped on a hill.

It’s a rough view. This huge trapezoid is almost the same on every side. So it’s not just that, from which direction, you will see such a huge mountain.

On the top, you will feel that this is a peak that rises above 10,000 meters, and then the above several kilometers have been cut off.

Of course, it is an illusion that it is almost impossible to imagine the power of such a huge mountain range.

They just looked around and immediately heard the sound of whistling!

Along the way, the thoughts of Shen Lang sensed the past, and immediately saw that someone was making a rapid leap in the hills and hills, and was galloping here.

The distance is very far away, and the naked eye is like a tiny person.

But they are very fast and very sensitive. The speed of the mountains is very fast.

The closer it is, the bigger it is This is actually a contrast. They climbed, not a tree, but a rock.

Kuafu, the giant family.

Seeing the legendary Kuafu, seeing the Giants, the excitement of Shen Lang is much bigger than seeing Chengdu.

As they approached further, Shen Lang can clearly recognize that these giants have reached a height of several tens of meters. The dress is very simple, that is, a large piece of animal skin, but people are well taken care of, no I feel like a wild man.

Such a giant, compared to him is even worse than a small doll, it is no wonder that the giant python will doubt whether he is a child in Chengdu.

Why are these human beings so huge? It seems that their genes are the same as humans, and they are not as distinct as the trolls and extraterrestrial demons.

“Hey-!”

I don't know whether it is a language problem or a way of expression. The Kuafu giants who came over directly screamed like wild animals and glared at them, but did not speak.

Chapter 1818 - Who do you think you are

“I am without a river!”

The giant screamed and gave a cry.

The appearance of these giants is not smaller than it. However, it looks so pleasing to the eye, Shen Lang is too small compared to it.

The other party has not asked what, the giant 鳌 self-reported the door, it is also famous in the Tongtian River Basin.

Chengdu Zao Tian and Tongtian River have a long distance, but this is relative. Looking at the whole world, both Caohai and Kunlun Mountain are neighbors. They are also neighbors.

Several giants looked at it with a little doubt, and then looked at Shen Lang.

It seems that they should also recognize the giant python, but just do not understand that the giant python will leave the Tongtian River to Chengdu to carry the sky, plus a small human, more doubtful.

“Without the gods! You are the overlord of the Tongtian River, come to Chengdu, the sky, what is your job?”

Several giants did not scream and glare, let one of them ask.

This attitude made the giant a little satisfied.

“I am here to deal with you! Find your chieftain to talk to me!”

“transaction?”

This word was spoken in the mouth of the giant, and several giants were surprised.

The giants of the Tongtian River actually went to Chengdu to carry the sky, and they had to trade with their chiefs!

It is hard to believe that this is going out.

Their first reaction is still related to this human being, and it must have been tempted!

“We are devout! We respect you, but we chiefs can’t see them at any time. It’s better to go back first, and after we report to the chiefs, the chiefs will visit you again!”

The giant still gave the face of the giant, and the order was also euphemistic, and there was no other suspicion.

But stop here at the giant python, this is already very unfaced.

It has never been in the country for many years. The first time it went out, the first time it traded with humans, it chose Chengdu to carry the sky. This is the importance attached to Chengdu.

I can’t see the chieftain now, just send it back if I have a few tricks. Isn’t that not to put it in the eye?

“Do you think I am not qualified to see your chieftain?”

The sound of the giant clam has cooled down, and it has already revealed its anger.

A few giants, but they are not afraid of it, they will give the giant face, sometimes it is necessary to use it.

It’s just how specific it is, and it’s not very clear. It’s the same.

Therefore, the attitude at this time is also a bit not salty.

“We don’t need to trade with others in Chengdu, and we don’t have to trade with Tongtianhe. If you really want to trade anything, you can stay and we will tell the chief.”

Although this is not directly acknowledged, but the meaning is already obvious, the identity of the giants without borders, they only match them, not qualified to see the chiefs!

“Let’s go! What are you!”

The giant anger was angry. Originally, if he felt that he could speak the transaction, he should make them look at each other. I did not expect it to be treated like this.

“Without the gods, please pay attention!”

Its swearing, not only with anger, but also with murder. This made several giants angry, and once again hostile to them as before.

“Self weight? You make me self-respecting? What are you?”

There is no more swearing words in the giant python. In order to express anger, one foot is on the ground, and the ground is cracked!

The giants changed their faces directly.

In Chengdu, the sky, the attack on the ground, is the provocation to them!

“Nothing! We will give you a face and call you a sigh, don’t give you face, you are an old man!”

“There are different places in Tongtian, Chengdu is not the place where your old turtles are wild!”

“You have brought people from unknown sources to come here, and they will inevitably plot against my family!”

“Give you a chance, you will immediately roll back to your Tongtian River! Otherwise, don’t blame us!”

Originally, I was a giant representative, but now everyone is squirting a word.

They are all giants, and their voices are loud and loud. This is also very noisy.

Shen Lang has been talking without being talking, just waiting to see the communication of the giant.

I thought that the name of the giant 鳌鳌,,,
, , ,

This is a bit difficult to do...

He came here, that is, to see the Kuafu giants, and there is no specific purpose, all development is to go with the flow.

But in general, there is no desire to fight against the father.

“You misunderstood, I am also a human being. I am here with God. I really want to do business with Chengdu. After all, humans in other places are too far away...”

“What are you counting? Are you talking about it here?” A giant immediately yelled.

Little humans, in their eyes, are nothing at all, even dare to speak with their loud voices, is he worthy?

The giant python is now angered by the anger!

It is not that it cares about the feelings of Shen Lang, but that it comes with the deep waves. It is also boasted that there is a face here, and the result is a few slaps, in front of the face of Shen Lang!

It’s already an anger to beat your face. In the presence of a viewer, it’s even more humiliating.

These a few cockroaches, also called the frontless gods in front, just a few words, it becomes the old man, the old turtle!

I felt the shame and shame, and the giant leaps and leaps!

Although this is on the land hills, it is also very dry and hot, which is not conducive to its play, but the strength of its super beast is still there!

However, it is the three ordinary Kuafu giants. No matter what aspects are not their opponents, they do not need to wait for it to approach, and they have been directly bombed out!

When the giant cymbals landed, it was already cracking the ground on which they stood before. And the bodies of the giants are as if they have been bombarded by invisible shells, and they have already fallen far!

After a while, some hit the rock wall, and some fell into the ravine, and flew to the distance.

“嗷-“

The landing of the giant 鳌 ~ issued a long shouting through the sky!

It is to show its strength to Chengdu, and to send information to the chief of the Kuafu Giants!

“Hey God is so powerful! These little Jurassic dare to despise you, let them teach them.”

Shen Lang immediately joined the sentence.

He didn't want to avenge his father's family, but he has reached this level, and he must let the singular and rational leaders come out. And now it's not his shot, it's a giant scorpion!

But then again, if you want a win-win deal, of course you can't fight it, you have to have a friendly atmosphere.

Just the movements here have not affected much scope, but the provocative shremy of the giant python is spread far away, and many Kuafu giants feel and hear it!

For a time, they are all a thought – there are strong enemies!

Chapter 1819 - Giant Daisen

Chengdu, the life of the Kua fathers, carries the mountains and mountains, far away from the great wilderness of the West, not to mention the enemy, that is, people rarely come here.

Naturally, there is no shortage of monsters and beasts in the wilderness, but as a giant race, their combat effectiveness has always been very strong.

Things that have been attacked by enemies like this are rarely encountered. For the battle, the reaction of the Kuafu is quick!

Just when the screaming of the giant scorpion just fell, in the different directions of Chengdu, the mountains in different distances, the huge screams of “啊!啊!” began to appear!

These voices are screaming, they are all moving, and when they slam, they are already driving a long distance.

These are far and near, all come here!

Shen Lang could not help but smile a bit: “Hey God, you are irritating people. If you come in more than one, we will be in trouble.”

There is no fear in the giants, but there is no expression of pride.

However, Shen Lang can guess that it should not want to single out the entire Kuafu Giants, just want to make the movement bigger and alarm their chiefs!

The giant python has its dignity. It feels that it is the hegemon of Tongtianhe. Even without a group and a group of cadres, the identity is different. It cannot be sent by these giants.

At this time, there was a special voice, and a wide range of spreads came out.

The giants who were coming over, they heard the voice, and they all seemed to get orders, and they stopped immediately.

But they did not go back immediately, but stayed where they were, waiting for further orders.

They have just come very fast, and they have been forced from all sides, and the distance has been separated by hundreds of meters.

Therefore, they can see their sights at this moment.

They are also less willing to stop like this, but the order is still to be followed.

At this time, Shen Lang noticed that there was a small point of rapid movement in the distance, and it was soon able to see clearly. It was a person, and each time it jumped over several hills!

However, between one or two breaths, the figure is already very clear, and the next jump, from a few hills, fell on their hills.

This giant is even taller than the previous ones, so it falls down, but it is light and floating!

Not only did the ground not step out of the big pit, it did not arouse large pieces of dust, and even the sound did not come out.

With his distance and fast speed, he can do this, which shows his strength.

In this way, he is actually just a habitual way, and does not need to borrow!

Shen Lang thinks that Kuafu is a giant race, and combat power cannot be compared with conventional human beings.

However, for their realm, there is still a reference judgment.

For example, the giant who came in front of him should be at the level of Daxian Peak. But the power of the giants will make his fighting power much stronger than the average big fairy!

Of course, there are still many variables in the specific battle. For example, some have the advantage of speed, some have superb spells, some have magic weapons, some are proficient in the formation, use the terrain and so on.

Shen Lang himself is a good example.

In general, for the Kuafu, he still maintains more attention and vigilance, and dare not underestimate the enemy.

“There is no god!”

“you are.....”

Giants seem to have seen this person, but the giants are similar in it, and there is no corresponding correspondence.

“I am digging. I used to see the gods in the Tongtian River.”

The person introduced himself, his eyes were watching the giant python, but the eyes still smashed the waves.

Because he is a giant of tens of meters, standing taller than the giant squatting, this inadvertent eye, in the eyes of Shen Lang, is very obvious.

Shen Lang did not care, kept a low profile, and continued to let the giants cope.

“Digging! I am coming to Chengdu today, I want to visit your chieftain and have the heart to trade some items with you. Your people say that I am an old turtle and I am not qualified to see the chieftain!”

The giant screamed with great dissatisfaction.

It should have just been this excavation that controlled the giants who rushed from various places.

He is here to solve this problem, of course, it will not be on fire, otherwise there is no need to stop it.

“Without the gods, I apologize to you on their behalf!”

Digging out of the room, and sincerely bowing and bowing, it is an apology to it.

“Because you don’t know about you and don’t know what you are saying, please forgive their ignorance and rudeness.”

Digging has already said this, the face has already been given to it, and the giant clam is not good enough to continue to bite.

“Whether they are, your chieftain did not come over and felt that I was not qualified to see him?”

Digging has continued to maintain a good attitude.

“Not so, but the chieftain is in retreat, and we can’t and can’t alarm him. I don’t know if the gods can see me, and the earth is willing to discuss the transaction with you.”

“...”

This makes the giant awkward a bit difficult.

It certainly looks down on it. It is to talk to the chieftain If you talk to the earth, isn’t it equal to self-destruction?

But the attitude of excavation is very good, and the attitudes of other giants have already been seen. Including a lot of pauses, it is not easy to get along.

It will not be afraid, but it will not be able to achieve the purpose of trading.

The excavation can command these giants to see that in the giants, he also has status.

“We can discuss it first. If you feel that I can’t do it, I can report it to other elders. How?”

The earthmoving posture is very low, but it is also a bit unscrupulous.

It just expresses respect for the giant python, not fear.

This time, the giant python can be regarded as being confused by Shen Lang, so he can’t help but look back at Shen Lang.

Shen Lang was also not polite. In the eyes of the earth-boring, he nodded to the giant, saying that he also approved the proposal.

Originally, the giants felt that the sudden visit of the giants was most likely because of this human relationship. Now it asks Shen Lang’s opinions, which is undoubtedly a proof.

However, the excavation did not seem to be seen, and did not reveal any dissatisfaction.

“Good! Then trade with you!”

During the talk, the giant sputum spit out a waterdrop.

It is to put the storage ring in the big mouth, which is taken out from the ring, looks like the most inside spit out.

Then, under the attention of the earth-boring and other giants in the distance, it flew the waterdrops into the air and it was about to erupt. In a moment, within a large area, there was a heavy rainstorm!

The giants watched this small bead lifted up, and even secretly guarded it. I didn't expect it to be something that could rain!

Chapter 1820 - Deep into the rift

Shen Lang came to Chengdu to carry the sky, and after seeing these Kuafu giants, there has been some analysis of the relationship between the environment and people.

The film of Chengdu Zaitian looks like Danxia landform, but the actual situation is different. This large mountain and river is different from other mountains in the distance. It is red and ochre, and the environment here is extraordinary.

It can be felt as soon as it is close, and it is obviously dry and hot, which is the most representative reaction.

To put it simply, the underground, the surface of the earth, or all the soil in the mountains contain elements of fire far superior to the general place.

This is similar to the place where the cold and cold autumn secretly retreats, and the environment of the abyss of the Qiuzong Jianzong Mountain is similar.

It was a pure large piece of thick spar, but because in the depths of the ground, there was no obvious perception outside the Qiulin sword.

Of course, it may also be that the cold and cold autumn uses a mask like the array.

There may be a large number of pyrites inside, or it may be that the entire environment contains similar elements, so the special interference is hot.

The Kuafu people will live here for generations. Obviously it is not because there is no better place to go, how big the wilderness is, and there is a place to live everywhere.

According to the direction of human development, it is more important to find a place with a rich aura in the place close to the Tongtian River.

They will always stay here, of course because of the environment here, they need it!

They are giant races, it must be a genetic relationship, but it can become very powerful, it should be related to the environment in Chengdu.

Perhaps it is to adapt to the environment here, or to use the environment to cultivate and evolve. Today, the Kuafu giants are different from the average person.

Other human beings, not ordinary people, who are self-cultivators, will never choose this place. This is uncomfortable, except for a very small number of practices in the practice of fire.

And they are as sweet as they are, which can be of great benefit.

But even so, water is a necessity.

Because the clouds and rain molecules close to the top are evaporating early, or the hot air is rising, affecting the climate, resulting in little rain, and the fire elements on the ground also evaporate quickly, making it difficult to accumulate groundwater.

Therefore, the entire Chengdu is carrying the sky, not as lush as other mountains in the distance, but like a desert of red ochre.

Kuafu people must have their way of life, and they can solve the problem of eating and drinking. They also don't welcome the rainy environment, but they have never seen it rain in Chengdu. They have all felt it in other places. Now, this scene is undoubtedly very exciting for them.

The giants who had ran out of it could not help but open their mouths, and there were still heavy rains falling into the mouth, swallowing big mouths.

Digging is actually a bit worried. If this is not ordinary people's water, but venom and the like, then everyone is very dangerous to shower, and swallowing is even worse.

However, he did not stop, but still believe in the giant.

After all, the giant python said that it is to trade.

This should only be the way it reveals the means, and it may not harm the father.

“Thank you, God, the water you bring, is very helpful for us in Chengdu. I have the right to trade with you, please come with me!”

Digging did not wait until the rain stopped, and immediately invited the giant to leave.

The giant python just put a drop of water out, which is not only the ability to reveal it, but also to make it comfortable by rain.

It leaves the Tongtian River without problems on land, but it is much more uncomfortable than the average land. It feels even worse when it lives in the Tongtian River all the year round.

“it is good!”

The giant python did not say that it was not for the sake of trading. This is just a small skill, but explained here, it will drop the price.

After it was finished, the excavation immediately led the way.

Digging is still a way forward, and every jump is so far away from several hills. But every time I land, it will be a little pause.

He is slower than the speed of the past, not afraid of the giants they can not keep up, but to express the courtesy of waiting for the guests.

The giant python is flying in the air, and the four feet occasionally pull in the air for a few times. It is also used to the action in the water.

Shen Lang is also following the giant python, keeping the same speed and following the earth.

The hills they landed before were only the outermost edges of Chengdu, and they could only be seen in the distance. They couldn't see the whole picture. Now they are flying forward, and they are gradually entering Chengdu's sky. You can see bigger. The scope.

Following the giants' excavation, they have been deep into Chengdu, and there are many fresh feelings in Shenlang.

Before that, I felt that this was a huge trapezoidal mountain, as if it were a huge part of it.

The feeling is clearer now, although there are also a large number of gullies, mountains, valleys, but on a large scale, the above feeling is very flat, the gap is not large.

The deeper the more, the more it feels that this is a special atmosphere. If you are practicing the fire system, you should have a more obvious feeling here.

For example, Zheng Yumeng, if you come here to practice, it will be a multiplier effect.

Such a huge range, of course, is not a range of water droplets that can be covered by but the giant python does not care, the giants get water drops, and they will not really use rainfall, but reserve food. Water and the like.

"This is here."

The earth was stopped.

This is probably the middle part of the top of the mountain in Chengdu. The front is a crack!

The crack is relative to the entire Chengdu mountain top, specifically to the front, is a large rift, the length is estimated to be more than a hundred miles, the width is also a few miles.

Looking down from the top, there is quite a bit of a bottomless look, but the actual depth should be at most a few kilometers, not going deep into the bottom.

The giant python did not have any shock to this. After all, the width of the lower reaches of the Tongtian River has reached a dozen miles. This rift is nothing.

Shen Lang has a weird idea, as if the whole Chengdu is carrying the sky, like a tree pier with a sawn tree, and this rift is the trace of the axe that is opened by the axe...

“please!”

Dig the earth and wait for them to come over and observe it before they start to jump down.

He didn't land directly, but from time to time he reached out and hooked the rock next to him, or occasionally stepped on the borrowing power.

Shen Lang can see that this is still a habitual way.

Probably when he was still unable to fly, it was like going up and down, so he developed such a habit.

The giant clams and the deep waves are slowly falling down from the sky above the rift.

This should be regarded as the center of the sky in Chengdu, which is the core of the tribe of the Kua father!

This makes Shen Lang also have a hint of excitement, but in order to avoid misunderstanding, and did not use God to detect what, so follow.
