

## First Strong 1861

Chapter 1861 - Clean up harvest

Before the Red Dolphin King learned about it, the Great Five Dragons blocked the three waves. After the two waves were sent away, Shen Lang re-killed and fought against the thieves.

The moment the heart fires, the Red Dolphin King can feel it, it will not be pretending, and the confrontation between the two sides can be seen behind.

If this is not the case, it must be suspected that Shen Lang has united the Great Five Dragons!

Even if I have seen it, there is still some doubt. If the Great Five Dragons and Shen Lang are acting?

After they left here, it is entirely possible to split up with the waves. Only those who have suffered a great loss will have a family of red porpoise.

However, their response to the holy shrine is not like a fake, which makes the Red Dolphin king not easy to attack.

“You have to make a promise. If you catch up with that swell, you must hand over the items you just traded to us!”

The Red Dolphin King still raised this request.

This sounds very unreasonable in the Great Wild Five.

“The king of the black porpoise! We are chasing the deep waves with the ability, and what should be recovered, why should I hand it over to you?”

“It makes sense. If we don’t catch the deep waves in the wilderness; if the Shenlang is hiding in this canyon and then caught by you, will you give back all the treasures of the Dragon Valley?”

This counter-question, the Red Dolphin King could not answer.

If a few of them left, it found that the waves were nearby and caught by them, and they would certainly swallow all the benefits.

“okay!”

Liu Zheng once again interrupted their quarrel: “We are ignorant of where Shen Lang has escaped. It is meaningless to argue for this hypothesis!”

Everyone thinks that it makes sense. People don’t know where they are. It doesn’t make sense to argue about them. It only wastes time or affects relationships.

“The king of the Red Dolphin, I can promise you, if we really search outside the Great Wilderness and can’t catch the sinking wave, we will definitely come back and fulfill the previous transaction!”

Liu Zheng said this sentence, so that a few of the Shengyi feel a little unwilling, but still recognized his words.

But people are always smart and embarrassed.

Performing the previous transactions, but ambiguous, did not say that you must give all the resources to them!

To fulfill the transaction, it is to provide resources to trade with them to bury the baby of Long Valley. They want to complete the transaction. Do not provide the same amount of funeral Dragon Valley Baby?

If they can’t get it out, then naturally they can’t complete the transaction, it’s not their problem.

Besides, when will they come back, but they have the final say.

Ten years later, a hundred years later, I will come back... It's just that time hasn't arrived, and I'm not missing.

Compared with humans, the Red Dolphin King is still much worse. Hearing this, and it is the weight of Liu Zheng said, and immediately resolutely stated.

"If you find that the deep waves are hidden in the canyon, we will surely complete the deal with you after we catch him!"

In this regard, whether or not you believe in the other party's position, there is a superficial commitment, and the next step is to hurry.

Assume that the place where Shen Lang transmits is only a hundred miles away, and now it is still catching up. But when they are delayed for a while, they will become hundreds of miles and thousands of miles.

Liu Zheng did not have more guests, and he waved his hand to ride the dragon \*\*\*\*\* beast and went outside the canyon.

Three of them are holy, and they are also keeping up.

Although Liu Zheng has not given them an accurate direction, it is normal. If there is already a specific conjecture, of course, you can't let the Red Dolphin King know, but let them go.

Watching them leave, the king of the black porpoise is a bit stunned.

I thought that I had a good move, and I won a lot of resources. For a long time, the red dolphins do not need to worry about trading, enough for the population to multiply.

Even if there is a bit of concern in the back that the channel will be replaced by the Great Wilderness, it will still take care of this big deal.

I didn't expect the excitement to be over, and it turned out to be the result.

A lot of treasures in the air, including a large number of burial dragons in their own collection, were robbed. When I think of it, I feel very depressed. I think that others are robbing them in front of them, and they feel that they are wrong.

But no matter what kind of depressed and wronged, the Great Wild Five has already chased it out. Even if the Black Dolphin King did not believe that Shen Lang was hiding in the canyon, he could not help but hold the “just in case” mind and searched around.

As a result, it is naturally impossible to have any results. It can only leave with sorrow and pin its hopes on Liu Zheng. They can find and keep their promises.

As for the disappearing Shenlang, of course, it is hidden in the space of Tianshu.

For this result, Shen Lang is already prepared.

If he had time, he secretly used the gates of the Three Realms, just like sending them to the vicinity of Qingqiu. If you don't have time, you can hide directly into the space of heaven.

This is also the basis for knowing that the other two parties want to engage him, but still adventurously come in.

The first wave he has succeeded, crossed them, and successfully collected all the treasures.

The second wave, of course, was too late to escape. Under the attack of the five great gods, he did not have the chance to escape.

After all, his current realm is still suppressed at the peak of Daxian, even if the real strength can compare with the realm of the Great God, it can only fight one at most.

Therefore, under the ban of five-fold field, he did not think about leaving at all, and directly entered the space of Tianshu when they were banned.

Entering the space of Tianshu, Shenlang is basically safe. Don't say that they don't understand the rules of Tianshu space. Even if you guess it, you can't know when he appears.

What kind of situation will be outside, he can guess a rough.

So don't worry about going out right away.

Not even anxious to harvest.

Because the dog \*\*\*\* is still in the space of heaven!

Although it is now trusting the dog god, even the situation of the space can let it know. But Shen Lang still will not test others!

The human heart can't stand the test, let alone other.

If it can stand the test, it may be that the temptation is not big enough.

The dog \*\*\*\* saw that he caught a person and did not ask anything. It is very calm now, Shen Lang needs what it does, it is executed directly, and there is no need to understand so much.

Looking at the thief grass that was banned, Shen Lang is also thinking about how to use him.

Anyway, a lot of time, then first search for the memory of the thief, and then compare his items to see how the harvest.

What he cares most is of course the thing that buries the Dragon Valley. Other spirits and spirits, no matter where they are in the wild, or other races, are the harvest.

It is only possible to have the possibility of miraculously burying the ancient objects of the Dragon Valley.

Chapter 1862 - Sword and stick

Shen Lang searched for the memory of the thief, and then found an embarrassing problem.

On the body of the thief, there is no treasure that buryes the Dragon Valley!

They have been successfully robbed several times in this way for a long time.

But the number is far below the expectations of Shen Lang!

In this wilderness, I know that I have been buried in the information of the Dragon Valley, and I know that I can trade with the Red Dolphins. For example, the giant python has lived for so long, and does not know.

So on the base, it is decided that their goals will not be too much.

In addition, the ethnic group that can come up with a lot of things to trade must also be rich. It can't be used like a giant python. If it has many descendants, younger brothers and the like, it is impossible to trade it.

Not everyone is willing to trade the ancient baby, after all, after a long period of time, it will become a broken iron.

In this way, the cardinality is even smaller. When others come, it is impossible to discuss with the Great Five Dragons. Even if they are laid out in advance, they will be discovered from time to time.

However, it is very difficult to get in time and fly quickly. If one is not accurate, others will have finished leaving.

Some have been swallowed by the Chiropractors...

So after many years, they have had few successes, and there are not many things to harvest, not enough for five people to split!

This is why when they saw more than 20 ancient magic weapons, Liu Zheng would be so excited.

It is precisely because the burial dragon valley has very few treasures, so they have become more obsessive, want to get more, and dream of getting something that will make them leap.

As for what they got before, there were only four.

Of course, it does not include poisonous grasses such as burial grass, and those things are not of much value to them.

Among the four pieces, three of them are keels, and one is an ancient weapon.

So many years, there is not much gain. This time, the successful blocking of the Shen Lang, they are also excited.

There are not enough people in the past, and no one is willing to do the “wait for later” one because there is no exact time, maybe several years, maybe decades.

Therefore, the result of the balance is to collect the four pieces of the burial dragon valley baby, put them in one place, and study together.

This place is a cave house opened after they united. It is not too far from here, and its purpose is to monitor it here.

There was no fixed name there, they were named Wulongfeng, and Dongfu was in Wulongfeng.

In addition to the four pieces of the burial dragon valley, it is also the place where they practice daily.

Just year after year, for those keels, they have not studied any great value.

That weapon, I don't know if I haven't found a way to use it, or because it's been too long, it's been broken. After studying for a long time, it is now being offered.

The keel is valuable, for example, the most basic to take the refining, or directly to the powder to eat, will have extraordinary effects.

In the end, it is the keel, and the energy contained in it is still amazing.

But they also have three keels, of course, reluctant to use it, but also think of greater value.

The result is that after so many years, in fact, for the few pieces of baby that are obtained, they have not really come in handy. And what they expect is the next one, expecting to get more, and can coordinate more effects together.

Knowing this, Shen Lang is a little helpless.

Originally thought that they claimed to be the Great Five Dragons, but also used this way to block the road robbery, it should have accumulated a lot of fun Longgu baby.

However, there is no regret, because this time the transaction has already allowed the Red Dolphin King to take out more than 20 pieces of burial Dragon Valley Baby, which is a huge gain.

In this way, it is also comfortable, no need to hit their ideas, do not have to go to Wulongfeng to end their nest.

That would be easy, he just waited outside for them to leave, and then left again.

Liu Zheng will definitely chase them out, but with their four numbers, they want to search in the wilderness carpet, which is simply impossible, and the scope of chasing out is limited.

The two batches of resources that I just snatched, Shen Lang's heart has a rough spectrum, and he is not in a hurry.

He now has time to study the remnant sword that was traded before.

According to Liu Zheng's statement, the legendary sword of the king of the artifact is nothing more than a refinement of this ancient sword.

And the iron bar, but with this remnant sword, has a breath of resonance.

This makes Shen Lang have a bold conjecture. Is it the iron sword, the sword of the king?

For the sake of what was the iron bar that was acquired two thousand years ago, has it changed the shape of the king's sword? Still looking for someone to re-melt the sword of the king into an iron rod?

The latter possibility should be relatively small. The sword of the king is an artifact, and it is impossible to re-form it into an iron rod.

It's just a long time, thousands of years down, after a lot of changes, maybe the sword of the king has also been damaged, and later re-refined into a stick-like magic weapon, it is also possible.

Now in this book space, Shen Lang took out the iron bars and the residual swords and put them together in front of them.

When the remnant sword appeared, the smashing iron rod and Shen Lang had strong feelings, and now they are put together, not to mention.

The two directly sucked together!

The iron rod can be changed according to the heart, which is also a special place that is far superior to the general magic weapon.

Now Shen Lang is changing it into a rolling pin size.

But no matter how it changes, its weight is still there is very heavy.

On the top of the remnant sword, Shen Lang did not feel the huge weight, just a light handle and a few inches of weight.

But now, it is this obviously light and remnant sword, which has absorbed the heavy iron bars!

This phenomenon has also confirmed the conjecture of Shen Lang.

Even if the sword is only a broken piece, it is the mother!

Another cut of the break became the sword of the king, and then the sword of the king refines the iron bar, which has changed many times, perhaps adding many other elements.

And this true ancient sword is the root of all magic, even if the residue is the most pure.

Looking at the iron bars and the residual swords that were sucked together, Shen Lang directly reached out and held the hilt. There was a strong thought in my heart, I hope they can be merged together!

According to the conjecture, the sword of the predecessor of the iron rod is integrated with the remnant sword. If it can be merged, can it be repaired?

After repairing the sword, even if it is no longer the power of the ancient Excalibur, may it be comparable to the sword of the king of its remnants?

Or regardless of the level of the sword of the king and the ancient sword, the integration of pure raw materials, at least, can increase the strength of the iron rod!

Chapter 1863 - New sword

Shen Lang only has such a thought, but there is no specific implementation plan!

Because of normal, whether it is this ancient sword, the sword of the king, or the magic weapon of the iron bar, it must be an extraordinary refining process. It is necessary for the refiner to use the best furnace, the best fire, The best materials, plus various processes.

For these, Shen Lang's understanding is very limited, only limited to some of the experience of previous life, it is only the experience of the Earth, it is not used here.

So he is also very entangled with this idea, is there any way to get them together?

Is it the same way as the front door of the Three Realms and Kunlun mirror?

When I was thinking about it, I found that the iron bars that were absorbed by the broken sword really began to change!

Shen Lang's heart moved.

Although such an idea is a bit absurd and even unbelievable, it was a success before. Perhaps this artifact is so effective?

Under his strong intentions, the residual sword and the iron rod began to change more clearly.

Shen Lang can't perceive the specific principles and internal changes. From the surface alone, it seems to be a kind of fusion.

He is not in a hurry, so he pays attention and instills strong ideas.

He does not have a clear understanding of himself. He is not sure of his ideas. Will it have any effect on them, but the iron bars and his ideas are connected and cannot be cut off!

Strong ideas are linked, and perhaps the new fusion of swords can be linked, and cannot be erased.

For his changes here, the dog \*\*\*\*\* is also discovered.

However, in the eyes of the dog god, any magical thing happened to Shen Lang, it is normal, it will not be surprised at all.

But even if Shen Lang did not tell anything, the dog \*\*\*\*\* still has a mind, and if necessary, it can help immediately.

The thoughts of Shen Lang are strongly infused, and they are guided like the doors of the Three Realms and Kunlun mirrors, so that they can be merged as much as possible.

Time passed by, and Shen Lang began to see obvious changes!

It was not that the raw materials of the remnant sword were replenished to the iron rods, but the iron rods became the supplies of the remnant swords. They were connected to the breaks and began to repair a little bit.

The iron bar was originally dark, but after being merged by the sword, it began to become the same color as the sword, slowly melting it, as if it had undergone a transformation.

This is also on the palm of the sinking waves, the iron bar is still very heavy, but after being integrated in one inch and one inch, it has begun to become lighter and lighter.

When all the iron bars were merged into the remnant sword, the remnant sword re-emerged and became a normal long sword.

At this moment, the support of Shen Lang has only become the weight of a sword. There is no huge weight of the iron rod. But giving him the feeling, as if this sword can be turned into, bigger, or has a huge weight.

Shen Lang looked at the sword and couldn't see the broken traces of the previous break. It was like a new sword, full of a mysterious luster.

Now it's the few inches that have remained before, as if they have changed, it's not what it was.

If it is not the hilt and still keeps the traces of simplicity, it is like taking another sword out.

Shen Lang can actually do this empty-handed sword, but also makes the dog \*\*\*\*\* feel surprised and admire.

The long sword is in the hand, and the Shen Lang can feel it. His tacit connection with the iron rod has already been greatly weakened on this new sword.

But overall, he still has control over the Excalibur, or recognize his consciousness.

“I will call you the sword of the king! Perhaps this is the name you have had, and now is the time to let you shine again.”

“I don’t care if you are conscious, you must belong to me, because I saved you and repaired you!”

“Your existence may be a very long time, but in my life, you must obey the command completely!”

These words of Shen Lang are not said, but communicate directly with the sword of the new king.

This is his sincerity and respect, and it is also a direct way.

Before the iron bar was not with him, it was a complete fusion with Achilles, because he absorbed the undead souls, so he was able to summon the use of this magic weapon. After being passed down from the skull, it is more integrated into one.

It is now obvious that this remnant sword dominates, and Shen Lang believes that this is a remnant sword, not a fusion he dominates.

Therefore, regardless of whether the ancient sword has a sword spirit or the like, or if it has a long time to let it have its own will, he must output his will.

This is both a negotiation and a threat!

I can let you blend and let you separate.

I can fix it for you, and it will ruin you!

This is just an expression of attitude. Shen Lang may not be able to do it, but let the other party believe that he can do it.

Therefore, when expressing this meaning, he is negotiating, but it is also an imposing manner.

And his last sentence is also a kind of persuasion: as long as it is not destroyed, the life of the sword is naturally far better than the life of the person. So it is not too long to listen to his life.

I don't know if this attitude expression is useful, or the will of the remnant sword is very weak, and the iron bar has the upper hand. In general, Shen Lang still has a familiar feeling.

The level of tacit understanding is not as good as before, but there is still the feeling of completely controlling the sword of this new king.

“Go out with me to play?”

Shen Lang received the sword of the king and said something to the dog god.

“it is good.”

The dog \*\*\*\*\* has no opinion.

It had swallowed three red porpoises before, which took a long time to digest and absorb.

It also realized that if it weren't followed by Shen Lang, it would have no such opportunity. Now this wave is down, I dare not say that I can fight against the bright \*\*\*\*\* who has reinvented them but it is far better than the original.

Going back to the world of behemoths, it will become even stronger and better guard the world for a longer period of time.

Shen Lang immediately appeared in the canyon with the dog god.

This is the site of the Chitose family. Once there is a change, it will be immediately noticeable.

If Shen Lang has the heart to go, he can use the door of the Three Realms to quickly transfer away when he comes out. Even if it is your own speed to go out to the outside of the canyon, it is too late.

But now he has the heart to try the new sword of the king, and he is not in a hurry to leave, but is waiting for him with the dog god.

The black porpoise king naturally discovered them.

But this time, it made the Red Dolphin King very entangled!

When Shen Lang disappeared here, he himself was alone, and now he is summoning the horror behemoth, and he is prepared to be prepared.

Think about the three-headed porpoise that had been shredded and swallowed before. The Red Dolphin King suspected that even if they could take them down, they would pay a huge price.

But when I thought of the treasure that I had stolen before Shen Lang, I could not restrain it!

If you can win it, it will not only be robbed of the Dragon Valley, but you will be able to get the great harvest of the four people in vain. And everything in Shenlang itself is taken down!

Chapter 1864 - Trading temptation

Before the Red Dolphin King, he could give up the hatred of Shen Lang and continue to trade passionately because he thought that the battle could not be made.

Now it is still the same as Shen Lang, and there are also horrible behemoths, but the interests are big enough, and the benefits have exceeded the losses, that is, they are worthy.

So it was just a moment of hesitation, and immediately rushed to the red porpoise and rushed over.

As the leader of an ethnic group, the King of the Black Dolphin must consider the safety of the community. So in order to avoid conflict with the Great Five Dragons, it can take risks alone.

But now it is different. Now it is necessary to take Shen Lang down. It is not that it can be done. It must be prepared to sacrifice a batch of red porpoise!

If you can get all the resources of Shen Lang, it is to sacrifice the top eight of the red porpoise, it feels worthwhile, the ethnic group can maintain the millennium, or you can not risk desperately in the funeral valley.

Shen Lang and the dog god, but after a while, they rushed straight.

“It turns out that you really are hiding in the canyon and have not left!”

When the Red Dolphin King asked this sentence, his eyes were hard to say.

Before the agreement with the Great Five Dragons, in fact, it also understands that it is simply not binding.

If the other party is looking for a deep wave outside, may they come back to perform the transaction?

almost impossible! That can only be a hope, a kind of self-comfort.

Because, in turn, they found the sinking waves here, and it is equally impossible to give the Great Five Dragons.

So now it is found that Shen Lang is here, and of course it is a great surprise.

Looking at a group of red porpoises that cover the sky, Shen Lang stood on the top of the Emperor's behemoth and looked down on them.

“The king of the Red Dolphin, I know that you have the treasure of the Dragon Valley here, we can trade.”

The words of Shen Lang were spoken, and the Avalokite King was stunned.

Trading? Who is going to trade with you?

“You think about it, our two transactions are very friendly, and we have no words at all. As for your trading, although I am destroyed, I do not refuse to trade with you!”

Upon hearing this, the Red Dolphin King was secretly happy.

Its current purpose is to leave the Shen Lang, and leave all the treasures of the two sides and the resources of Shen Lang.

But that must be a huge price.

Now listening to the meaning of Shen Lang, it seems to replace the Great Five Dragons trade, and return some of the resources before them to them!

Its original purpose is this, there is no difference between the great five dragons, or the Shen Lang.

If you can get back half of the income without paying any price, it is of course very willing, that is, they have no loss, and Shen Lang is only ridding the five dragons.

“Good! You helped introduce them into the transaction. If you are willing to bring their things back, I will not let you \*\*\*\*\* their things, nor will you disclose your information.”

Although I think about the big profits made by Shen Lang, it is quite heart-warming, but compared with the huge risks, I still prefer to get one that belongs to them.

That is a win-win situation.

“This is not a problem. I am in my hands. Of course it is my thing. If you want, you can change the baby of Long Valley to change it.”

Shen Lang smiled and opened the conditions.

Upon hearing this, the red porcupine face sank.

“You fool me!”

If you let it go to the baby trading in the funeral dragon valley, even if you can get that part back, it will pay twice the price!

Shen Lang was able to guess its mind and smiled and helped him analyze it.

“You think about it, who else can get so many things out? Even if it is the Great Five Dragons, this is the harvest they have robbed for hundreds of years, when will they come out?”

“I will give you these transactions. Although you have paid a little more, it is better than nothing.”

“Of course, you can also choose to \*\*\*\*\* all of my things, but the price is likely to be a big injury to the Chi Gu dolphins, or even the destruction! After we fight for you to die, the Great Wild Five will come over, won’t you kill you?”

The words of Shen Lang’s talks made the Red Dolphin King sullen.

It seems that this is really the truth!

Either everyone will fight and grab all the things from Shen Lang, which will inevitably come at a price.

Now the transaction he proposed is like paying twice the price. Compared with the hard battle, what is the price?

“What do you want? I have already taken it out. I bury the baby in the Dragon Valley, only the funeral grass and the like. If you want, I can trade with you!”

The Red Dolphin King is not a fool. Before taking out more than 20 pieces, it is already a great deal. Even after reacting, I regret it a bit.

Now that Shen Lang has made it clear that he wants to rob it, it certainly cannot.

“Before the request of the Great Five Dragons, it is a minimum of six transactions. I am a man who speaks well and cuts half the price for you, as long as three pieces are enough!”

Shen Lang did not force it too much. I have to take more than 20 pieces. It is estimated that even if there is, it is reluctant.

But when it becomes twelve, it should be more attractive.

“You are not half cut, you are halfway!”

The Red Dolphin King did not say good.

“Would you like it?” Shen Lang did not bargain with it.

“...”

The Red Dolphin King is in trouble.

Just a reminder of Shen Lang, double the price, the cost of the death and injury of the tribe has already made it secretly weighed.

Now that you have cut in half, it is just half the price of the original one, which is much better than double the price.

To put it simply, double the deal to make it a slight trade-off; but adding half is already acceptable.

But even if it is acceptable, it is extremely unwilling!

“We humans have a saying that they are not afraid of burning wood. If the mountains are still there, there will be more trees, and they will not be afraid of burning without firewood.”

“Your red dolphins, as long as they remain strong, can occupy this place all the time, and they can continue to enter the funeral valley mining, and there will be more gains.”

Having said that, the Red Dolphin King certainly understands the subtexts behind it.

If they fight with Shen Lang and cause great damage, they may be attacked by the Great Wild Five or other races.

Although other races can't enter the funeral valley, occupying it and killing them, it is the act of killing chickens and taking eggs. But who will care about the distant future?

Of course, all of them are taken care of before.

After a big injury, there will be more intrusions, and a vicious circle will occur.

Conversely, if you get such a large amount of resources, and you save your strength, you can become stronger, you can get in and get more things, and hold it firmly, you can have a better virtuous circle.

Just as the Red Dolphin King hesitated, the Sword of the King of Shen Lang suddenly shot!

Chapter 1865 - 1 sword of Wei

Shen Lang is confusing the transaction, and the conditions for opening it are also space for consideration. At this time, the Red Dolphin King did not expect him to suddenly shoot.

And the sword of the king's sword is sharp and unmatched!

The king of the Red Dolphins was discovered, and it was too late to stop it.

The Shenlang people are at the top of the Emperor's behemoth, directly overlooking the red porpoise who came over.

So when I first spoke, including the king of the Red Dolphins, they all flew up in the air, at least in parallel with the dog's head, and could not be weak in momentum.

Now, Shen Lang has swayed the sword of the king, and it is directly to the one of the red porpoise!

Whether it is the Red Dolphin King or other red porpoises, they see a white light flashing between them, as if the sword in their hands has directly become a hundred feet long, and the entity is chopped on the black porpoise!

And that a porpoise, it was too late to dodge, nor was it hit by the sword, but was directly split into two halves!

After a blow, the sword was taken back, and in the hands of Shen Lang was a simple sword.

It seems that it was just an illusion, or a sword of white light.

But the red porpoise that was split in half reminded them that it was not fake!

The dog \*\*\*\*\* is very acquainted with it. After Shen Lang's shot, it immediately probed out.

The cockroach was cut in half, and the other porpoises were seen, and then they were sucked in by the dog's mouth!

Then the big red porpoise, under the big mouth of the Emperor's behemoth, is directly dried up.

Some of these red porpoises who have come here now have seen three yin porpoises being eaten before. There was a shadow. Looking at this scene, I couldn't help but retreat.

Although they did not rush to escape, they still involuntarily fanned their wings and began to retreat back, trying to pull a safe distance.

“Stop! You are not talking about trading?”

The Red Dolphin King is furious!

Originally, it was considered to be traded, and Shen Lang actually shot and provocatively. This is to play with them!

“Calm, calm.” Shen Lang is calm and calm: “The Red Dolphin King, I just shot, just want to remind you of the transaction. Really want to shoot, how many odds do you have?”

The furious red porcupine king could not help but see.

It was just an instinctive emotional reaction, just like the retreat of the few red porpoises with a lingering heart.

But now that this sentence is asked, I will ask it.

The horrible behemoth has been verified. At least one can do three red porpoises. I thought about spending more. If I can hold it down, I can take Shenlang.

As long as the Shen Lang is taken down, it will be easier.

But now it seems that Shen Lang is even more dangerous!

Just the sword, although there is a sneak attack, but the power is huge, that is, the Red Dolphin King can not be rescued, ordinary red porpoise can not dodge.

In this way, he can kill them with one sword!

Even if you can't be a sword, you can inevitably hurt a lot, and let their morale annihilate.

By then, there will be more food for the horror behemoth...

The Red Dolphin King is very depressed and helpless.

Shen Lang has proved his strength, which means that if the hard battle, the price paid is greater than the estimate!

On the one hand, it is more costly; on the other hand, the other party is actively reduced by half.

The Red Dolphin King is entangled and knows what to choose.

But the purely rational considerations, emotionally, are still very uncomfortable, very unwilling.

However, the Red Dolphin King is the king after all, and is the rational leader who will consider for the sake of comprehensive interests.

Before the hatred of the three-headed red porpoise, it can be understated. Now that a red porpoise is hit, it can still stand it.

“transaction!”

The Red Dolphin King slowly said this sentence.

It has to hurry to express its position. Otherwise, Shen Lang may personally or let the behemoth show their stronger fighting power, so that there will be more unnecessary damage.

If you just promised a deal, you don't have to lose a red porpoise.

So it promised first, and then waited for the idea of Shen Lang to stabilize the details.

“You just saw it and took it away. I have paid more than 20 burial dragon valley babies. That is the majority of what we have gained. There is not much.”

When the Red Dolphin King spoke, he spit out three things.

A keel, two broken, do not know what the bones of the race.

Shen Lang did not talk nonsense, and directly divided the resources of the four of them out of it, and then sent them to the front of the Red Dolphin.

The Red Dolphin King originally wanted to grind it with Shen Lang and see if three pieces can be completed. If three pieces are not completed, add up to six pieces.

But now Shen Lang is trading directly. If you give three pieces, he will only give one copy of the resources.

Looking at a lot of spirits and spirits in the air, the king of the Red Dolphin was very helpless, and quickly collected it to avoid any change.

Shen Lang is also polite to collect the three of it.

“If you have one, we will trade; if you don’t have one, we will leave, and there will be people willing to trade outside.”

He did not bargain at all, and made the Red Dolphin King secretly depressed.

“We don’t have more weapons...”

The Red Dolphin King continued to spit out a thing This thing can be considered two different things.

Because this is a skull, the human skull. And above the skull, an arrow is inserted.

It seems that when the ancient tribes were besieging the dragon, this human power was shot dead by an arrow.

As for whether the enemy has been murdered, accidentally wounded, or killed by the dragon who won the arrow, there is no way to study it. After countless years, it is impossible to see anything on the spot.

“This is two things! It’s very rare. It’s got in the very dangerous area of the burial dragon valley. It’s definitely an extraordinary generation. And the arrow that can kill this human race is definitely extraordinary. I have to exchange one!”

The Red Dolphin King said resolutely this time.

There are fewer and fewer things in his hand, and he has to be cheeky and bargain.

Shen Lang was originally robbed, so he can cut off half of it generously. Now I have to exchange one or two, he is also willing.

The key is that there is no value in both!

“This is a human bone, not a keel. As for the arrow, you have no bow for me, this is not equal to zero? There is not enough value!”

The Red Dolphin King is shaking his head: “On these two, you have to give you a funeral grass, fog and vines, and so on.”

Seeing that it is really ironic, Shen Lang still wants to look at the other, and there is no freezing with it.

“OK! Switch to you!”

Shen Lang gave another resource.

The king of the black dolphins looked at the fruit and the spirits, and the mood was a little better. I took these up and it was half taken back.

The human skull with the arrow was also sent to the front of Shen Lang.

Shen Lang did not look at it and directly collected it.

“Continue! Take the initiative. Also, don’t play slick, or else I can leave at any time!”

Chapter 1866 - bargain

For the Red Dolphin King, this time spent five items, and exchanged for the previous twelve items, which should have been a very cost-effective bargain.

But when I think that this is more, it is still a pain, which adds up to 30 pieces!

Other resources behind it, it has to continue, otherwise it would be equivalent to spending nearly 30 items before changing to half of things.

That’s not a five-fold price, but a price of two and a half times!

Therefore, it can only continue the transaction and change the other half back so that the cost can be diluted.

It has reached this level, and it has no retreat.

However, it still thinks that it can save the province.

Just two pieces have been successful, can you use the next two points and use two pieces of trade each?

“Shen Langgui! We have traded, the weapon that was given to you before, you are not satisfied, I will remove the other, directly give you the best.”

Shen Lang nodded and waited for it to continue.

“But they are a few wildernesses and five dragons. Without your knowledge, I have exchanged those more ordinary things for them.”

“I mean... three of them before, the value is not as good as these items for you.”

The Red Dolphins tried to make themselves look very sincere, and in fact it is very helpless now.

“The ones that have just been given to you are the best. We have had a happy transaction. You have a strong vision. I dare not hide you. But high-end things are limited.”

Shen Lang has already heard the meaning of it, but he does not speak.

“I can only trade two items in two pieces! I don’t have any more good things, I still hope to understand. You don’t want me to use ordinary goods to fill in...”

“Red Dolphin, do you think I am bullied? I took the initiative to reduce six pieces into three pieces. Do you still tell me two?”

During the speech, the sword of the king in the hands of Shen Lang waved!

With the wave, the blade immediately swelled to a few dozen feet, and it flashed through the air, and then retracted to its original appearance.

Just a sword just licked a red porpoise, which made the other red porpoises scared to hurry back.

The Red Dolphin King was also taken aback!

Of course, it can’t be recognized. I don’t know if this is the remnant sword that it traded to Shen Lang before, but this power is strong enough to let it see and let it fear.

Moreover, there was no sword before Shen Lang, and now I use this sword to stand up and let it suspect that there is a warning!

This seems to say: You used to sell a broken sword as a baby, I know the sword very well, don’t want to deceive me!

“Three! All three!”

The Red Dolphin King has no choice but to promise, so that this guy will not cut it again.

“Don’t say that I am not close to humanity! The remaining half, you will give five more.”

After a slap in the palm of a sugar, Shen Lang just threatened, and then actively reduced one.

The purpose of the newly black porpoise king is to reduce six pieces to four pieces. However, after accepting six pieces, Shen Lang has actively changed it into five pieces, which undoubtedly makes it feel a lot more comfortable. Half of the purpose.

I thought that I had to pay another 24 pieces, and I reduced it to 12 pieces. Now it has become ten pieces. The Red Dolphin King has already felt very good. Shen Lang has made great concessions.

Thirty-four have already paid twenty-nine, only half.

Plus those items are in front of them, but also full of appeal, of course, decisively submitted the last five pieces, take the rest back and say.

These five treasures of the Dragon Valley have no human weapons, and probably have really taken things out.

These five pieces are the ones they have the most – bones.

Four of them should be keels, and one is a basic skeleton. At first glance, I don’t know any race, but before with Bailu, it came for the ancestors of the Qingqiu Jiuwei Fox.

Looking at it now, this pair is almost the same as that one.

“I really don’t have any human race. This pair is the sacrum of the nine-tailed fox. It is the same as the one that was previously exchanged by the nobles. They are all together. These keels are not the biggest, but they are not the biggest, but We are treasured.”

Afraid of the waves and picky troubles, the Red Dolphin King quickly explained it.

What it means is that Terran-related things can only be traded to the Terran, and related to the Dragon, can be traded to any race.

So if there is still, I will definitely give it to him first. Now there is no way. The skeleton of the dragon is also subdivided, and some are more powerful, and can not simply use the size to discuss the value.

Although they can’t confirm who is stronger from the bones, they can be distinguished from the areas they get.

For example, in more dangerous areas, the opponents of the various groups killed around are also more powerful, and it must be stronger than the dragons on the edge.

Before Shen Lang, I only changed to a residual sword. This time I got more than 30 items, and there is nothing so picky.

And it can be seen that the king of the Red Dolphin should have been almost smashed, even if there is something that has not been taken out, it is also the bottom of some pressure boxes.

The bottom of the pressure box is definitely a good thing, but after reading so much, the most precious thing for the king of the Red Dolphin is not necessarily the most useful for Shen Lang, and it is not too curious.

The two sides took things together and the Red Dolphin King was relieved.

Although I paid half of the cost, but these things have been recovered compared to the empty five dragons, they are still worthy.

However, at this time, Shen Lang opened again.

“You also know that the Great Five Dragons are five, the four trades with you, the other one was killed by me. But his things are still here, basically the same as the four of them, do you have it? interest?”

When Shen Lang spoke, he released the items of the thief grass.

Some of these things are after their union, and some of them were personally collected before. In general, the five people who can be named together are also roughly the same.

So this is released, which is equal to the fifth resource, but also a large number of Lingguo Lingcao, as well as the spirit.

“transaction!”

The king of the black porpoise gnawed his teeth and made a decision immediately.

So many of them have already appeared in the front, are there more than three?

The previous four resources talk about the price that everyone is satisfied with. It is six pieces of funeral dragon baby. Now adding ten more is equal to increasing the cost to 8.5.

If you add three more pieces and buy the fifth one, you can spread the cost of each piece to 7.4.

It will still count.

This is the last one, and the Red Dolphin King believes that it can't be worn twice, so three items are taken out directly.

There is no doubt that it is also a keel.

At this time, Shen Lang shook his head.

“Three pieces, because I robbed them, I also robbed you, a little embarrassed to let Lee. This one has nothing to do with you. If you want to trade, I don’t say much, at least keep the first six. The standard?”

The king of the black porpoise was stunned.

If it is human, it will definitely be described in one word – profiteers!

Chapter 1867 - Got it?

The suffocating king of the Red Dolphins felt uncomfortable and quickly calculated the instinct.

If it is six, it will add up to forty. It can still lower the average cost from eight to five to eight.

The direct cost, six pieces is undoubtedly much cheaper than the previous 8.5.

This is the price that it has been accepting before. The reason why it is hesitant now is that it has just re-traded the price, it has been reduced to two to three, and the total cost has exceeded the expected amount, and the pressure is already great.

It is always easy for people to ignore small costs and tangled the total cost.

But there is still a sunk cost, which will also affect people’s judgment.

Although the situation of the Red Dolphin King is a bit different, it has a similar effect.

Three pieces alone, it doesn’t matter; if you add ten pieces alone, it can still be accepted, but if you count the total cost to forty, then the pressure is great.

The twenty-four pieces lost in the front are the sunk costs. If they don’t add the latter, they will lose. And now has given thirty-four...

After considering it, it still reluctantly yielded.

Six pieces are six pieces. Anyway, this time the transaction is made. It can also be traded for thousands of years. It can take a long time to recuperate.

Before the Red Dolphin King, according to the exchanges between Shen Lang and the Great Five Dragons, they also faintly understood that Shen Lang is not a person in the wilderness.

In that case, even if a large number of keels are in his hands, they will take away with them, and will not affect their business here.

Besides, isn't this the same as the Great Five Dragons?

Compared with the nothing of the Great Wild Five, they even paid a lot of fun, and they also got all the treasures of the Great Five Dragons!

Shen Lang is the biggest winner, they are not losing, the only loss is the Great Five Dragons.

After this comparison, the Red Dolphin King gave three more things directly.

Still keel.

Shen Lang looked very helpless and even wanted to stop trading.

The keel is a little rare when it has the first light. Now, there may be thirty pieces of keel here, so it doesn't make much sense.

These keels are not exactly from the same dragon, because some bones are not available, and some are damaged. They should not be picked up there, what is wrong.

Therefore, Shen Lang will not be able to imagine a skeleton that can be spelled out.

There are already so many, it is better to stay a little more spiritual and spiritual.

“Let’s do it, that’s it.”

Look at Shen Lang’s disliked look and make the Red Dolphin King very speechless.

This is their family of red dolphins, who are trying their best to risk their lives and get it out in the murderous land of the murderous land. This is the keel!

This human kid is too much, and he is only interested in human items.

It is also very regrettable, if there are more human things, you can save a lot of keel.

However, the transaction has now been completed, and the collections of the Great Wild Five have been collected for more than a hundred years. These are plundered from various ethnic groups and are also a huge gain for the Chiropractae.

“Shen Lang VIP, since it is completed, leave it as soon as possible, you know, the Great Wild Five is still looking for you!”

At this time, the attitude of the Red Dolphin King is also very good, but it does not want to stay here to avoid extra-budgets.

Even if Shen Lang will not have any dissent, the Great Wild Five may return at any time.

What should I do then?

Let the Great Five Dragons and the Shen Lang fight, and it is best to beat you to death, to lose both.

But what if Shen Lang is running again?

Then the Great Wild Five asked them to ask for the fun of the Dragon Valley Baby.

The king of the black porpoise can be filled without the baby, and it is impossible to fill it.

But for the Great Wild Five, which has been hollowed out, maybe it will be desperate, and it will be a fight at that time.

It is not willing to lose both to Shen Lang, and is not willing to suffer both losses and losses.

So I went straight to the order and let Shen Lang leave quickly.

Shen Lang is also full of enthusiasm, and these gains have far exceeded his previous tone.

At this time, the face of the Red Dolphin King changed.

“Are you going?”

A voice came from far away.

This is someone who sent the sound faster than the sound originally spread.

But even if I am still far away, in the process of this sound, it is still in the fast distance.

After the last word has been transmitted, the Red Dolphin King can clearly feel that the four dragons and four dragons have been riding the dragon and appearing outside the canyon.

The Red Dolphin King looked at the waves and was very helpless in his eyes. He was also a little angry.

If the Shenlang transaction is over, leave immediately. Just like the one just now, whether it is leaving or hiding, it will not leave clues, it can be denied.

But what now?

It doesn't want to get involved.

“It’s none of us! Shen Lang is here, our red porpoises have no ability to catch it!”

After that, the king of the black porpoise immediately took the other red dolphins and retreated a distance to the distance, ready to sit on the mountain.

If they are like other races, they will run straight.

But they can’t run, this canyon is already the biggest range, the real retreat, that is, retreat to the funeral valley.

But not at the last minute, they will not choose this dangerous road.

If you can’t run, you can’t hide, but you must watch it on the spot, keep abreast of the movement, and intervene when necessary.

Now, if you don’t stand in the team and look at the wall, you can better judge the situation. It is best for them to die together, they are cheaper and when they retreat, a strip of dragons quickly came over, after coming in, quickly swam in the air, giving the waves Surrounded.

“Red Dolphin King! How do we agree? You actually trade with Shenlang and sell us!”

This sentence is Liu Zheng’s drink. Just now, other people have to do it. He suggested not to be guilty. Now the Red Dolphin is helping the waves.

The holy shrine is not so good-tempered, and he immediately sipped up: “You are a group of pigs! There is no head, no dignity, no one has been robbed, and you have to give something to others. You are really a group of pigs. !”

“I really should have given you this flying pig king just now!” The aerial stone did not say good.

If you say Liu Zheng, let the Red Dolphin King be a little embarrassed, then the two of them will make the Red Dolphin King angry.

Liu Zheng is also a dark frown.

Because the situation on the spot is a bit different from the previous one, it is obvious that the three parties are guarding each other.

Now Shen Lang has already had a deal with the Red Dolphin King. The Great Five Dragons are in charge of the reason. They should use this to help the Red Dolphin King, at least not helping each other.

However, if they drink like this, they will push the Chiropractae to the side of Shenlang, and it will make it difficult for themselves.

Chapter 1868 - Interests

“okay!”

Liu Zheng immediately ordered them and then said to the king of the Red Dolphin.

“The Red Dolphin King! They don’t say anything about their mouths, but we don’t want to be surprised. We are partners we have worked together. We have agreed to join hands to deal with Shen Lang! If we find him first, we will take back all his things. Handed over to you!”

How is it possible for the Red Dolphin King to sneer?

It is it, and it will not do it.

Now it is just trying to win their support.

Liu Zheng’s attitude made the Red Dolphin King even more determined and understood their value.

Now the three sides are confrontational, it can be easily pulled out, it is the great wild five dragons must make waves.

Then they are the most selective parties, both sides need to draw them together!

The Red Dolphin King, who had been depressed for a long time by Shen Lang, got refreshed.

It did not speak, crossed the encirclement of them directly, and looked at the deep waves inside.

Its meaning is obvious: Shen Lang, you don't need me to help you, can't you watch me help them?

If you don't want to play against both sides, then let's take advantage of it!

If you want me to work with you, then give you more benefits!

As for Liu Zheng, a few of them, the Red Dolphin King has not paid much attention to it, it is a chance to extort a wave, not to think how much inventory they can have.

No need for words, just a look, the great wild five dragons and the deep waves, all understand the idea of the Red Dolphin King.

This makes the Great Wild Five Dragons a few dark belly, these pigs are born, even so!

But there is no way. Since people are beasts, there will definitely be no human ethics and humiliation. Besides, their great five dragons are looting and looting. What qualifications are required to ask others to be blameless and humiliating to them?

So the question now is the most direct benefit!

If you want to help them, or at least not help the waves, then they must first benefit.

And this benefit depends on how much benefit Shen Lang gives!

If the benefits of Shen Lang are greater, the Chi Gu yan will definitely help the waves!

Liu Zheng is more rational than the other three, so there is no anger at all, but seriously thinking about countermeasures.

The current Shen Lang, even if they are still surrounded by them, is standing on the top of a super behemoth!

This has not happened before, and at first glance, it is quite unfathomable.

I think further, they can't wait to catch the sinking waves, swallow all the things, can't the red porpoises have such greed?

If you don't have one, you won't come to the next batch of red porpoise!

The choice of the Red Dolphin King is to continue trading with Shen Lang, which means that even if they have not moved, they know that the strength of these super behemoths has to compromise with Shen Lang, preferring to spend a little more cost and demand a safety.

Such an analysis made him have to face the waves more cautiously and face the super behemoth.

If there is no help from the family of the Red Dolphins, is it four of them, will it be the opponent of Shen Lang and this super behemoth?

Liu Zheng began to have no snacks!

Because before the thief grass, one person plus a dragon \*\*\*\*\* beast, it was turned over by the waves. Whether or not there is no enemy, it proves the power of Shen Lang.

It means that he alone can probably deal with both of them.

Then, if the super-beasts of the Chiropractic family are scrupulous, if they can deal with two, then they will have no chance of winning.

If the last two loses, then the cheaper one is the Chiropractae.

“Red Dolphin King! We have a thief in the wild five dragons. In addition to our collection, he also has a collection. As long as you assist us in catching the waves, you can provide it to you for free!”

When I said this, I found that the expression of the red porpoise was a little weird.

Shen Lang smiled and said: “Liu Zheng Dalong, you just came too anxious, just found me, found that we are trading, but do not know that I just traded with the Red Dolphin, it is the collection of thieves. ”

“...”

Liu Zheng is listening to a few people, and it is not a taste.

Although they are not a life of friendship, but in the end is also a partner, now the thief does not know where to go, but things have been sold by Shen Lang, it is estimated that there are more fierce.

Originally, the collection of thieves and grasses can be taken out to be human, at least you can first flicker the family of the red porpoise.

But now it has no effect!

Of course they have other collectibles, but that is unwilling to come out and trade, it is a real good thing. I was not willing to take out the keel and I was not willing to take it out now.

Unless someone else is willing to take it out.

Then what do you use to buy the Chiropractae?

Shen Lang said: “Liu Zheng Dalong, aren’t you still robbing the Dragon Valley Baby? You can give it to the Red Dolphin King, maybe they will cooperate with you for this benefit.”

interest!

They used to get four pieces of funeral dragon valleys before, and they were not evenly distributed. Of course they were reluctant to take them out. But now the thief is gone, four people can be divided into one person.

Liu Zheng is the key to grasping the “interests”.

“Red Dolphin King! We don’t talk about the deal, we don’t talk about friendship, we say interest. Shen Lang just traded with you Right? But on his body, there are things that we snatched from us! ”

“You have no choice but to trade with him. But if you and I join forces, you can catch him with all your strength! By the time he has everything, we can all share it!”

Since there are no more good things in one’s own place that can attract the red dolphins, he simply uses Shen Lang to attract!

They are gone, isn’t there still a lot of Shen Lang?

Even if they say that there are still good things, the black dolphins may not believe it, but Shen Lang does not need to say that he has a lot of people, everyone knows!

This sentence has worked.

The Red Dolphin King originally wanted to be a wall-viewer. If one party can give benefits, they will not help each other. If one party gives more benefits, you can choose to help.

But now Liu Zheng’s words make it start to be in the mood.

Indeed, Shen Lang has now removed 40 pieces of burial Dragon Valley Baby from it, almost emptied it!

But they have no way to win back, there is no way for the Great Wild Five.

But if they join hands, then it is very likely to win back. At that time, half of the party, the Great Wild Five won 20 pieces of burial Dragon Valley Baby, and can already be satisfied.

And they can get back 20 pieces of baby, which is equivalent to directly reducing the cost of an average of eight pieces to four!

Even in Shen Lang's body, there are remnants of the former trade, there are other things, as well as this horrible behemoth and so on.

These added-up benefits can make up for the losses, and can make a lot of resources in vain today!

In turn, in cooperation with Shen Lang to kill the Great Five Dragons, they get a lot of rewards for Shen Lang, and there is no big gain.

Chapter 1869 - Success flicker

Shen Lang certainly sees it clearly, but Liu Zheng is striving for the help of the Chiropractors, but he is calm.

“Red Dolphin King, this team, you have to choose. I just gave you good intentions, but if you want to join them, don't blame me.”

The one-eyed dragon immediately seized this point and used the radical method.

“Friends of the Chitzu people! This is threatening you! Is your strong red porpoise, afraid of him a small human?”

Shen Lang smiled and said: “You are not afraid, because you have nothing to lose, barefoot is not afraid to wear shoes. At most, I am going to your five dragon peaks, all the things in your house are looted. But they still have A lot of things, I don't want to be robbed, I don't want to be killed.”

He said so with a smile, but let the one-eyed dragon have a cold heart.

Needless to say, Shen Lang has passed the thief grass and knows their secrets!

Everyone is in the same breath, and many don't need to hide anything, especially the common secret. Now all let Shenlang know.

If Shen Lang really wants to go to Wulongfeng and grab the things in Dongfu, then they will lose even more!

The only thing that is fortunate is that the previous few burial dragon valley babies, because they have not realized anything, so it is the state of storage.

If they are studying, when they rushed over, it is very likely that they will not be able to seal up. If they know that the road has passed, they will probably steal it.

The words of Shen Lang are undoubtedly a kind of warning, so that the Red Dolphin King and the Red Dolphins are not comfortable listening.

But they have to admit that Shen Lang said it makes sense.

Nowadays, the Great Five Dragons are out of the empty hands of the desperate, and they are not afraid to wear shoes because they may not have more to lose.

But the family of the red porpoise is different. The things that have just been harvested can make them last for thousands of years. You don't need to take risks, you don't need to trade, you can recuperate and let the whole ethnic group take it to the next level!

Only by becoming more powerful can we have a better future and have more right to speak in front of human beings in order to explore more mysterious and dangerous areas in the burial dragon valley.

They can be turned from the parasites of the murderous land to the masters of the murderous land!

Drying together, at most, is the benefit of equalization, but the risks and costs to pay, they are much larger than the Great Five.

Then, in turn, doing the great five dragons with Shen Lang?

If you lose, the Great Wild Five will not let them go. Although like Shen Lang, they will not necessarily lose, and they are not afraid of anyone, but the risk is still greater.

Because this is where their nest is, and they have a lot of things, they have more weak people here.

Consider this, the best result, it is still not help!

Don't go for more benefits and avoid more risks.

just.....

Shen Lang still runs at any time, and they still have to face the Great Five Dragons.

Other red porpoises, this time only maintain a high degree of alert, the Red Dolphin King is very anxious and helpless. It has to analyze various situations and various influences, and analyze them one by one. It seems that only with Shen Lang, it is better to kill the Great Five Dragons.

Because Shen Lang has already proved, as long as you don't provoke him, he is still good to talk.

This is also the case with the Great Wild Five, which will not be offended by the Red Dolphins, which can be seen from the fact that they dare not easily enter the canyon.

But now that it is poor and white, if it is not good, it will take risks.

"I and Shen Lang VIP, have been trading partners. And the Great Five Dragons VIP, although not successful, but it is also a trading partner, so ... we will not participate in your grudges, we do not help! "

After making up his mind to say this decision, the Red Dolphin King ordered directly: "Withdraw!"

Suddenly, the red dolphins who had long wanted to escape, immediately flap their wings and quickly evacuated to the depths of the canyon.

Watching them retreat, the Great Five Dragons could not help but conceal these pigs.

Now that they have retired, they are left to fight with the waves, no matter what the outcome, they can make them cheap!

After successfully fleeing the family of the red porpoise, Shen Lang continued to flicker Liu Zheng.

“You also saw it. They didn’t dare to stand up and don’t dare to deal with you. I dare not deal with you. It shows that their strength is limited!”

“Now the two don’t help each other. This attitude proves that they are weak and guilty. I am afraid that after winning, I or you will turn around and do them.”

“So, the result of their dreams is that both of us will kill you and kill each other. When they are, they will come cheaper.”

“Do you know how to do it? You have no chance of winning against me, but you can deal with the weaker red porpoises and rob them, not only your losses, but also the treasures of the Dragon Valley. take!”

Listening to the words of Shen Lang, Sheng Sheng sneered.

“It’s so nice! If the Chiaros are really so weak, why don’t you start with them? Will you still be honest?”

“Say well! They want us to lose both of you and you. You bastard, don’t you want us and they lose both?”

“These pigs are born just be fooled, do you think we will be so easy to be fooled?”

Shen Lang shook his head: “Wrong! I don’t choose to do that because I am a decent person, and you may choose to do this because you are originally a scum of a family.”

“...”

This sentence won’t even know how to refute it.

Indeed, they are not a decent person, they are relying on unscrupulous means to develop to today.

“Let’s think about it, you only have this way, because you can’t catch up with me.”

When Shen Lang finished this sentence, the body of the Emperor’s behemoth suddenly shrank, and then the two disappeared.

Although they were riding around the dragons, they couldn’t stop it. They could only feel a little space fluctuation, and they watched them disappear!

Shen Lang has already verified the power of the sword of the king, and also called out the dog god. To deal with the remaining four of the Great Five Dragons, there will be no major problems in theory.

But the result is likely to be both loses!

Because the Great Wild Five is not a decent understanding, not a race lacking combat experience, they will win by any means, so it is very dangerous.

Coupled with the family of the red porpoise, it is impossible to have principles. It must be the wall of grass.

So from the beginning, Shen Lang did not want to fight with them in this canyon.

When they rushed in, he had already prepared the door to the Three Realms.

Having said that, it is just that you want to make the Great Wild Five and the Red Dolphins fight, so that he can get cheap.

Now that he has been successfully confused, Shen Lang will be sent away directly.

And his destination is the cave of Wulongfeng!

Chapter 1870 - Antiquity weapon

The transmission of the gates of the Three Realms requires the positioning of consciousness, that is, the place that needs to be visited, and cannot be transmitted to places that have not been visited.

Shen Lang certainly did not go to Wulongfeng, but he read the memory of the thief grass, which is like his own familiar memory.

The result is directly transmitted from the canyon to the cave house of Wulongfeng!

According to the memory of the thief, those things are sealed up. But the storage is not a treasure chest or the like, but in the cave house of Wulongfeng, there is a separate cave, and the array seal is arranged.

All five of them are amnesty, and each has a dragon, and of course it is impossible to squeeze together. Therefore, the scope of the cave house opened in Wulongfeng is very large. There is a public activity area in it, and each has a cave.

The place where the keel is sealed is a cave inside. It is not only the arrangement of the array at the entrance, but also the seal of the entire cave.

Whether it is from other caves in Dongfu or from the other side of the mountain, it is impossible to get through.

Originally, I thought about cracking the array. So before Shen Lang left, there was no pretense to say that I was going to copy their nest.

But after it was delivered, it was unexpectedly discovered that it was directly in the cave inside!

Because the cave house is familiar to the thieves, and the caves in the cave house are also familiar to them, so now the waves are not only in the cave, but also directly in the cave of the keel.

You don't need to crack the array method, the Shen Lang is much easier, and you are calmly looking up.

Although it is already in his memory, after all, it is the memory that comes from the thief grass, or the nature that I personally observe.

The dog \*\*\*\*\* is also coming along with it. It still asks nothing. After looking at the surrounding situation, it will consciously guard the hole, so that when someone comes over, you can find it in the first time, and you can also resist it.

Shen Lang looked at it, three keels, and they were baby, but now he has a lot of keels, don't care, take them all directly, and then send them to the dog god.

"These are keels, the bones of a very powerful ancient creature. If you look at the research, it will have any effect on you, and it may help you to improve evolution."

"it is good."

Although the dog \*\*\*\*\* is not too clear about the situation, but it also appeared once before, the giant python so many things, it also changed to a keel, and it is still happy and cheap.

Also this time, watching the battle between the three parties, knowing that this thing is definitely worth a lot.

However, when Shen Lang ingested more than 20 pieces, he did not see it with his own eyes. He knew that there were ten pieces in the re-trading, and there were several keels.

So now that Shen Lang is here, I will get three new keels and give it directly, so I am very grateful.

Repeated life and death cooperation, so that their friendship has no doubt, and even the dog \*\*\*\* can ignore the interests. Knowing that there are good things in Shen Lang, it will not be any distraction.

But this is its sincere loyalty.

Shen Lang will still be grateful for the benefits such as giving him the benefits regardless of cost and return.

Now that it is a huge benefit, it is also the most important partner, which makes it even more grateful.

The Emperor's behemoth, after all, is derived from pet dogs. For human loyalty, it is imprinted in the depths of their genes.

Therefore, its ancestor, after the evolution to the extent of the Emperor's behemoth, will also try to build a sacrifice to the Temple of Heaven, and will want to send it back, even if it has passed, I don't know how many millennia.

The current dog god, who was originally far ahead of Shen Lang, was smashed by Shen Lang. Get along with each other slowly, through a variety of knowledge, a variety of food, have a certain relationship.

And this time, I have experienced the test of life and death together in the God of Light, and Shen Lang has saved it from Tong Xian Weng. They have made the relationship more and more iron, and friends are partners.

All the way to the present, Shen Lang let it see his secrets, give it all kinds of benefits that he can't get, and let it grow stronger.

Up to now, invisible, has made the dog \*\*\*\* began to have a dependence on Shen Lang!

For example, what does Shenlang do for it, what it does, no need to ask.

Give it something good, it will not deny it, and it will not be a verbal thank you. I am grateful and willing to do anything for him.

Where to go, it has no direction or plan, all of which are followed by Shen Lang, so that it has become more and more visible and stronger.

These are all things that they can't do. Shen Lang is not as strong as it is now, but wisdom is to admire it.

In short, their relationship has become a bit like the owner and the pet, but the two sides have not realized that both sides are also very tacit.

Shen Lang said that this keel is a very powerful existence and may help its evolution. The dog \*\*\*\* is completely convinced and begins to study it earnestly.

And Shen Lang himself, is studying the sword of the ancient weapon The Great Wild Five Dragons can't think that he will come here, even if it is not killing you with the Azolla family, it may be searching around. Even if you really come, Shen Lang can easily leave.

So he was not in a hurry, he picked up the thing and studied it.

This thing is very impressive in the memory of the thief grass. Now the research of Shen Lang is to revisit and make these memories more natural. In fact, every detail is clear.

Liu Zheng can recognize the origin of the residual sword at a glance. For the understanding of the burial dragon valley, they are far more aware of these great wilderness than Shen Lang.

So when Shen Lang looked at it, there was no clue.

This thing looks very weird, looks like a rolling pin, the material is like ore, non-ore, like metal and non-metal, not a flat rod, but a bit tapered.

The feeling of holding it in my hand is also very strange. It is not as heavy as a smashing iron rod. It does not seem to have any particularity, but it has a very special feeling.

This feeling can't be clearly stated, can't be described and described, and even I can't grasp it well.

In the memory of the thief, it is because of this special feeling that they are allowed to confirm that this is an ancient weapon, rather than being fooled by the family of the red porpoise.

Just because the feeling is indescribable, so the memory of integration, Shen Lang only knows that there is such a feeling, but it is not clear.

Now I personally hold this thing, I feel that kind of indescribable mysterious feeling.

There is not much understanding of the ancient weapons in the burial dragon valley. They cannot understand more than the five of them. Is there any good way?

Shen Lang thought about how to find another way, and soon I moved!
