

First Strong 190

Chapter 190 - Threatening letter

Shen Lang's past life was a true god, he could fly, and he could also use Yu Jian and other magic weapons. At that time, there was no such thing as an airplane. Of course, I did not sit there.

In this world, family conditions are not good. Apart from studying, there is no experience of traveling. It is even more difficult for a family to travel by air. So for the first time, he came to the airport of the city for the first time and was also the first flight.

However, the information is now developed. When I searched on the phone in the car, I already know the general process.

Chatting with the driver for the first time, the driver is also enthusiastic to introduce him. If you don't have big baggage checked, you can find the airline self-check-in machine by yourself. You can print your ID card and you can choose the seat to print the boarding pass. Then there is a security check and find the boarding gate.

Just before the arrival, I received the information on the airlines and shifts from Xie Youfa, and included which door to enter.

The result did not wait for Shen Lang to find a self-service check-in, just entered, immediately a beautiful woman wearing an airline uniform greeted.

“Are you Mr. Shen?”

When Shen Lang came in, he had already discovered the spread of the gods and looked at the people who had Chu family nearby. This beauty wearing a certain airline uniform is just an ordinary person, he did not pay attention.

“You are...?” He nodded and immediately understood it. This should be arranged by Xie You!

“You are our VIP, I am here to wait for you, this is your boarding pass, please come with me.”

The beautiful woman kept a professional smile, sent a boarding pass that had already been handled, and took the VIP channel with Shen Lang, and led directly to the VIP lounge.

Xie You didn't know if he had investigated whether he had not been on a plane or saved money for him, so he bought a first class ticket and arranged for him to pick him up.

Shen Lang is in the VIP lounge, in addition to paying attention to whether there are monks nearby, that is, the silent practice of closing your eyes.

First class guests boarded the plane first. After closing the seat, he closed his eyes and raised his spirits. But every passenger who boarded the plane paid attention to see if there were any self-cultivators. After completing the boarding to take-off, I also used the gods to inspect the entire cabin for several rounds to determine that there were no suspicious guests.

The reason why I am so cautious is not that I will not be able to escape if I am wrecked at a height of 10,000 meters. His current realm is that he can't jump and fly away at the height of 10,000 meters, but such a large passenger plane, whether it is to kill the captain or internal explosion, will have a falling process. Before the crash, he still had time to escape.

Even if it is an external attack, it is a missile that can directly destroy the aircraft in the air.

But this is his personal grievance. I don't want to let hundreds of people on the plane be dragged down because of his relationship. So if there is any problem, he must solve it in advance.

After discovering no accidents, Shen Lang continued to cultivate, and also felt the difference between the high-speed flight and the ground training.

After the takeoff climb, the flight attendant began the cabin service. Of course, first class is preferred, and everything is different from economy class.

Shen Lang was the first time to fly, but there was no comparison experience, but one unexpected thing happened!

A flight attendant bent down and whispered to ask if he was Mr. Shen Lang. After he was confirmed, he sent him an envelope saying that it was received before boarding the plane and handed it to him.

Shen Lang took over and directly opened the envelope.

Inside is a folded A4 paper with content on it, printed text.

“Seeing here, you don’t know where I am, but I know where you are. Do you think you are coming to Xie’s house? We are prepared to see this letter when you get on the plane, of course there are other Arrange, you are ready!”

The letter is so few words without a word, but without a signature, it can be seen that it is the Chu family’s tone.

The content inside can see the threat, but there is no substantive content. Even if it is taken apart, it can’t be true, and it doesn’t understand the specific things.

But the understanding of the situation, but it is very clear, Chu family is alluding to not let him rush to Xie Jia! He temporarily bought a ticket, which was also a matter of two or three hours. The other party could know, and the letter that made such a content was printed and sent to the plane and handed to him. It was really arranged.

The last sentence of the threat does not indicate that there will be any threat, but it is very likely to be on the plane!

After seeing the letter, Shen Lang put the crease into the envelope. He did not ask the letter from the flight attendant, and asked if he couldn’t ask. The Chu family could arrange it and certainly would not leave obvious traces.

Now I don’t know what the Chu family is to deal with him!

The Shenlang **** quickly swept the entire cabin, silently observed all the passengers, and confirmed that there were no self-cultivators and no suspicious people.

Are they arranged for the crew and flight attendants? Or do you really want to use missiles to bomb?

But soon Shen Lang denied these two conjectures. In today's domestic environment, even if the Chu family can use missiles, it is impossible to bombard passenger airliners.

It is easy to influence people in airlines, but it is unlikely that they will have suicide attacks.

Under the circumstance, in the capacity of Chu Mofeng, it should not be such an act, and other Chu family members should be concerned about the impact. The most likely, but a terrible mischief, the purpose is to make him suspicious, self-confident!

Think of it here Shen Lang is not moving. But even if it is intimidating, it still maintains a higher vigilance. Suicide attacks are less common, but if it affects the ground staff, the chances of putting time bombs in the luggage compartment are even greater.

Under such a state, Shen Lang can't be cultivated with peace of mind. He remains vigilant all the way, and is also calm as usual until the plane is safely grounded.

After landing, you can't relax your vigilance. Because the letter is not stated above, it may be on the plane, or it may be at any time, such as at the airport or at the airport.

After all, he is a temporary booking. He wants to arrange everything before he gets on the plane. It will be an hour or two. It is easy to promise a letter. It is not convenient to arrange other people, even if it is prepared, let alone The airport also has strict security checks.

But if you want to start after he arrives, it will take at least two more hours, and there are more arrangements.

First class guests are also the first to get off the plane, the process of coming out is smooth, and there are still no suspicious people. However, in the place where the exit is reached, Shen Lang has raised a little vigilance. There are many pick-ups outside. This is not in the scope of security inspection. If someone is mixing in it and using hot weapons such as guns, it may bring danger to him!
