

First Strong 198

Chapter 198 - Entering the dead forest

Shen Lang did not pay attention to them, so that a few people in the Chu family felt that it was a bad smell, but it was not good. This can be understood as the other party does not dare to marry them, but also can understand that the other party ignores them.

However, they have not continued, because it is now in Death Valley, it is impossible to really fight, and all parents are still there. But their hostile eyes are still very obvious, revealing a message – kid, you will die after you enter!

Other people who look at the excitement also have their own minds.

The news that Shen Lang killed the Chu River, they also heard of it, I believe that Shen Lang must have strength, but I believe that the Chu River must also be careless. Chu Yunfei is not worse than the Chu River, and this time the death forest will certainly be more fully prepared.

If the four of them have to deal with Shen Lang, the result is self-evident!

In the past, in the forest of death, everyone was fighting for resources, but also fighting for infighting. But when it comes in, when it comes out, it is still on the surface. If you can't do it in the inside, you can only win resources, but you must be merciful to the people.

Like the Chu family, it's the first time that you have made up your mind to kill someone.

This is not so simple to watch the fun, can not be afraid of the Chu family directly kill the Chu River people, regardless of the strength, is definitely a madman! There are no taboos in the dead forest, and there is no way to save your life.

In other words, the four people in Chu family have to kill the waves, and they will hurt several if they don't die. And Shen Lang is the name of the Xie family. The two of them fight more and more, the other ones can get cheaper!

All the processes are familiar, and the cost sharing is also discussed in advance. So after Xie Xun arrives, there is no need to negotiate, and he directly deals with the people in Death Valley and pays enough Lingshi.

All the people then began to arrange to enter the dead forest, the order of entry is based on the cost allocation. The first one to go in is Chu, and they are the most costly promoters.

Although Xie Jia, Xuan Ling Zong and Haitian Town are all three places, there are still differences in the cost of specific Lingshi. According to the cost of sharing, the second entry is Haitian Town, then Xie Jia, Xuan Lingzong.

Shen Lang and Xie Jia together are advanced than the Tianshan Ice Palace. When he passed, he and the eyes of the rain fell. He nodded slightly and did not say anything more. If you can see it in the dead forest. I will talk about it again.

In fact, he is now provoked by the Chu family, and he does not want to expose the relationship with her, so that the Chu family hates the house and the Ukrainian, and they are also eyeing them.

Death Valley needs the cost of Lingshi, which is used to open a transmission array!

This also confirms the experience of Shen Lang. The dead forest is not a forest in Death Valley, but another small world. Death Valley is only because there is a transmission array entrance.

Xie Xun can only send them here. He can't go in. The limit of the formation is 20 years old. If he exceeds it, he can't transfer it.

“Be careful! Food is also a resource! When you need it, you can eat everything first! Count the time and return in the same place three days later!”

Xie Xun finally sighed, there is no big goal, there is no cliché, it is the most practical food!

The reason is very simple. Everyone carries food and water for three days. This weight is not a big deal for them, but if someone does not bring food and water into it, directly rob you and steal it, then you will have to endure three days of hunger and thirst.

In their realm, even if they don't drink water for three days, they won't die of thirst, let alone at least at least with dew leaves. But lack of water and hunger will affect a little mental state. A hundred percent of people, affecting a little ninety-nine, can also be more than the average person, but a group of people are one hundred percent. When you become ninety-nine, you are widened.

Xie Xun has made calculations. The food they carry is one day's weight. It can be kept for three days and can be maintained. When necessary, you can also eat it all at once, and you will not be stolen if you store it in your abdomen.

After entering the transmission array, Shen Lang noticed that Xie Tongwen Xie Yunlin was a little nervous and very excited. They were the first time they encountered such a situation, and he was very calm.

After a familiar and long-lost feeling, Shen Lang and Xie Tongwen Xie Yunlin were transferred to the death forest.

The forest of death is not only the name of the forest, but also from the point of transmission. In the eyes, it is a towering tree. Whether it is air quality or the intensity of aura, it is very different from the outside.

"It's finally arrived! Only three days, we must speed up! They must have arrived in the advanced." Xie Tongwen said with excitement.

Xie Xun was led by the team, but he could not follow in, so the captain of the three of them was Xie Tongwen. Xie Yunlin's words are too few, not suitable for the captain, nor can he give Shen Lang the outsider.

The two of their cousins understood the situation. When Shen Lang was still observing the surroundings, he explained it to him in a low voice. "Come in and out again, there is no good thing left in the vicinity of the transmission array. If you want to have more gains, you can only go to places that the predecessors have not been to, that is, go as far as possible and go deeper and better. "

"But take time into consideration." Shen Lang nodded.

"Yes! Every time someone comes in, they will have this idea, so everyone will pay every minute and every second. Considering the time of return and search, two hundred miles is the limit."

Xie Tongwen said that he also observed it on the other side, and then pointed to some new traces: "This is someone who has passed, we are here!"

As he followed his direction and speeded up, he continued to spread the popularity of Shen Lang: “Fortunately, the death forest is big enough, and the people who come in are limited. The deeper the scope, the harder it is to do carpet search.”

Two hundred miles is one hundred kilometers. The average person on the ground is more than twenty hours, the cattle can be more than ten hours, and the difficulty of off-road is several times larger. However, they are not ordinary people. It is also possible to cross-country one hundred kilometers a day.

Taking the transmission array as the center and spreading out in all directions, it is not 100 square kilometers. It is a radius of 100 kilometers and the circular area can reach more than 30,000 square kilometers! The entire Emperor’s region is also more than 10,000 square kilometers.

So it is a limit, in fact, it can go deep into the hundred miles, and the square area is already very large.

But now that we have just come in, everyone is still near the point of transmission, the area that spreads to the surrounding area is still small, and the chance of hitting other people is still relatively large, so Xie Tongwen chose to hurry first, and it is estimated that other teams are the same way.

Shen Lang has a lot of experience, but he has not said much. Using the “Phantom Meteor Step”, he easily followed Xie Tongwen, behind him is Xie Yunlin.

And entering this place with the name of “death”, he did not care, the knowledge extended around, observing whether there are people, beasts close.

The results soon found that someone followed them in this direction!
