

First Strong 1991

Chapter 1991 - Dangerous

When Shen Lang observed and analyzed and sighed, the fire of the earth was getting faster and faster. In the end, the fire sea of these dozens of miles was completely swallowed up by a fine light!

Fortunately, this source is constantly spurting the ground of the flame. I don't know what it is because it has not continued. If it is absorbed, it will be gone.

There is no flame now, and it is a piece of scorched earth, not a cracked crater.

One of Shenlang is glad that this is not a crater. The other one is glad that there is no connectivity below. It is not like that in the huge building, it will flow down the soil.

Otherwise, the heart fire will swallow an endless!

The dog **** outside the sea of fire, was originally very worried about the safety of the sun wave, it is basically the same as the annual.

But to the back, it began to see the eyes of the sea seem to be getting smaller!

The speed is getting faster and faster, and in the end, the entire large piece of fire is completely gone!

The Emperor's behemoth could not help but cast a land on Shen Lang.

This guy is so amazing!

Then a huge piece of fire, burning all the way to the sky, as a result, he not only went in, but also extinguished all the flames.

Humans are terrible!

No, it cannot be said that human beings are terrible, and the waves are terrible!

There are no flames in these dozens of miles. On the land where there are little flames everywhere, it is very special and very strange.

The dog **** also rushed quickly and greeted the past.

When it was running, it was a place to avoid the fire on the ground. And these dozens of miles do not know how long the flame has been sprayed, even if it is now extinguished, the temperature is still very high, almost like stepping on the flame.

However, this is actually nothing to the dog god. It is thick and thick. It is only a natural resistance to the flames, otherwise it will be no problem if it rushes into the sea of fire.

“Can you?”

Shen Lang sent a thought to the heart fire.

The heart fire immediately flew back to his side, although the wisdom is still not enough, can not be clearly expressed. But obviously there has been some growth before.

And Shen Lang can feel it, and the heart fire has more closeness to him.

Fortunately, okay, run without eating...

As for where to look for flames to feed it later, let's talk about it later.

“Then go back to rest?”

The heart fire immediately responded with a willingness to agree to arrange.

If it was said that it was a full meal, then this time, it was directly open to the belly and it was about to burst. It is necessary to have a good rest.

Shen Lang thought for a moment, did not put it into the storage space, but took it into the space of the heavenly book, let it float in the space of heaven.

This is not to fear that the storage space will kill the spirit, its intelligence and artifacts are similar, not ordinary living things.

The consideration of Shen Lang is the environment in which it is now. Fire is everywhere. If there is any flame crisis in front of it, it is necessary to release the fire from the ground.

If you burst it, you can't ***** it anymore!

Originally, when I released it this time, it was obviously a little unpleasant. I just found that the flames here were very high and I was excited.

Under the condition of being more supportive, if there is no better flame, if it is not good, it will not be willing to work.

So let's put it in the space of heaven, and take a hundred times of time to at least let it digest it.

After the completion, Shen Lang saw that the dog ***** had come over.

"It's okay, I have a sacred fire and I'm done here."

Shen Lang simply said something to the dog god, and then he was ready to go in which direction.

Before they were in the cold and autumn, snow and snow, but when they came to this piece of fire, they did not go straight, but slanted around.

And this piece has reached a huge width of tens of miles, slightly changed the angle, the direction of departure is very different.

Of course, there is nothing wrong with this pair of waves.

There are traces of the record of the holy armor, there is no need to worry about deviations.

At this time, he felt the movement of the jade!

Shen Lang was busy taking the jade to see.

What Yuxi can do is text and voice messages, but it is not possible to talk directly to the conversation. So before Shen Lang has no response, there can only be a message.

“We seem to find something here.”

“Not good! Danger!”

When Shen Lang heard it, it was two voice messages, and then there was no more!

He immediately connected the scene of the reconnaissance through the Holy Grail.

With the former miniature reconnaissance, the side of the holy armor is even their trajectory of action, and it is also possible to record the map. And it is also possible to record images near them.

When everyone is on the road, they all see the same. The whole continent is a little bit of flame, so there is nothing to look at.

Now Shen Lang immediately checked the situation.

The result was found to be abnormal, and it was impossible to see the real-time picture!

In this case, the conclusion given by the holy armor is two. One is that the signal is completely obscured, and the other is destroyed.

The signal of destruction has not been recorded, so the bigger one is probably the former.

Signal obscuration is understandable. After all, this is not a world in the city of the river basin. The function of the holy armor is not complete, and there is no assistance from the ground network or space satellite.

It's already very powerful to be able to receive the signal from the reconnaissance.

If the distance is too far away, the Holy Grail will not receive the signal.

If there is interference around the reconnaissance, such as radiation signals, or deep underground, the signal will be blocked.

“There are dangers on their side, go!”

Shen Lang is not polite with the dog god, went directly to it, pointed it in a direction, let it start on the road.

Dog God does not say anything, run back directly at a faster speed!

Now this piece is still a place without flames, it can run fast.

And before the exploration, the speed can not be too fast, now is to rescue teammates, everyone is the opposite direction, then double the distance, to rush, must be as fast as possible.

When the dog gods rushed, Shen Lang also passed the sacred armor to see the data sent back before the scout signal was broken.

Snow and snow and the cold autumn are just like them, they are rushing between the raging flames and then searching for the surrounding conditions.

Shen Lang and the dog god, is responsible for the road, a responsible search.

The two of them are one person responsible for the general area, each looking to the left and right.

This range is smaller consumes less time, so it can also keep two people moving faster.

After rushing through the plains of hundreds of miles, they met a flaming mountain.

The mountain is not the same as the sea of fire encountered by Shen Lang. Not all of them are flames, but like the ground, there is a flame sprayed out of the mountains.

I have seen such an environment, of course they will not detour, but go directly to this flaming mountain.

Not long ago, they rushed to the Flame Mountain, and Gao Hanqiu posted a message saying that there might be something to discover here.

But apart from the mountains, he did not find it for the time being, so he did not elaborate, but continued to go up the mountain.

Then, after rushing to the mountain for a while, the picture that came back was swaying and messy, and then the second voice of danger was passed in the cold autumn.

Chapter 1992 - Flame Mountain

When the second voice is sent, they should have experienced a change, and then they are in a combat state, so the picture taken cannot be seen clearly, and then the signal is interrupted.

There is no time for the voice to leave a message.

Now Shen Lang can't contact the reconnaissance here, and Yu Yu has no message.

If there is fighting over there, he will send a message to the past, but it will be a disturbance to the cold autumn.

As for the reconnaissance, it is managed by the Holy A, and he does not need to worry about it. He does not care about it. Once the signal is received, the Holy A will naturally analyze the data of the reconnaissance.

“Zoom out!”

Shen Lang just let the dog ***** first hurry, is trying to figure out the situation. Now that he has understood a general, it seems that it should be a comparative danger, or else it will not let Gao Hanqiu say “dangerous”.

So let the dog ***** run, he is a bit too slow.

The speed of the dog ***** is actually very fast, but because it is now the same size as the horse, the body is there, like a motorcycle, the speed of the sports car is already dangerous, and the speed of the plane can not be controlled.

If it is presented on its own, a jump can be very far, and the overall speed will be much faster.

But with its size, you can't avoid the flames. You can step on the flames with your feet and spray them on the body.

So Shen Lang now directly makes the dog ***** shrink the body!

Then, under the dog god, he grabbed the dog ***** directly, and then let the sac super high speed, fly over there!

At such a speed, the dog ***** was shocked, and the whole body was quickly defended, so as not to be sprayed by the flame below.

The super-sonic speed of the holy armor, for the lack of protection, would have had a great impact. Shen Lang himself was under the protection of the holy armor, and the dog ***** did not.

However, the realm of the dog ***** is very high, and Shen Lang's current realm is also very high. The impact of the supersonic speed is nothing to them.

The dog ***** needs protection now, that is, it is sprayed directly by the flame.

The dog ***** runs, in addition to speed, it also instinctively dodge the flame, and Shen Lang refers to only a general direction, and then cheaper and then correct.

The holy armor flies in the air, ignoring the interference of the flame. Can also follow the final positioning, constantly adjust the route, go straight to the shortest straight line.

Because in the distance, it is more than a few hundred miles shorter than the running of the dog god.

Faster speeds and shorter distances naturally shorten the time spent in the past.

They each went out hundreds of miles, less than a thousand miles, and now the distance in this straight line is even shorter. The Shenlang is under the super high speed of the sacred armor, and it takes a minute or two to reach the Flame Mountain.

The holy armor did not stop, but went straight to the mountain and landed where the scout signal finally disappeared.

After landing, the dog **** is a little embarrassed, it feels terrible!

This speed... It ran wildly, it was achievable, even faster, but there was no such an understatement.

And he doesn't seem to need to identify the direction, very accurate and directly to the destination!

Shen Lang, who is in the mood to pay attention to its sigh, is directly on the scene.

Because there is a flame eruption everywhere, the environment is very bright.

In the vicinity, the holy armor has been more clearly sensed. The result of the analysis is that the miniature reconnaissance device should fly out during the battle movement, because there are flames everywhere, no coincidence, great probability Into the flame.

The result of this analysis makes Shen Lang secretly frown.

Because here, he did not see the cold autumn and snow is not snow!

The speed of coming over is so fast, and the analysis of the signal he received was not delayed in time and was only delayed a little.

The total time added should be three or four minutes.

Although the cold autumn and the snow are not injured, their strength is very strong. It is impossible for someone to kill and arrest them without any trace within a few minutes!

After all, according to Cui He's memory, the strength of the black robes is at most the realm of the great gods, even more than Cui or weaker.

Even if it is intentionally presented to Cui or watching, the prosperity should not be stronger than the cold autumn.

If the reconnaissance is still there, then where they are, with the proximity, the signal interference is not big, it is a good positioning, you can directly search for them.

Now that the reconnaissance is likely to fall into the fire, you can only find another way.

However, this is only a matter of minutes, and Shen Lang is still able to reinvent the situation.

The method of the previous day, let him take out the green hillstone, with the help of the green hillstone, can reproduce the picture faster and better.

After the sigh of emotion, the dog **** immediately entered the state.

At this moment, it is immediately alert to the waves, so as to avoid this dangerous place, someone will come out to attack.

With the help of Qingqiu Stone, Shen Lang immediately presented the picture.

After the snow was not snow and the cold autumn, after the two people went to the Flame Mountain, it seemed to have sensed something and accelerated the speed to come over here.

He reproduces the situation based on the weak traces left here. It is naturally impossible to know what the cold and autumn snow and snow are.

However, from the picture point of view, they should have arrived quickly here, and then saw something, Gao Hanqiu immediately used the jade to leave a second article.

Then the two people accelerate together and go in the direction of the front!

That is, at that time, because of the acceleration of the cold and autumn, the reconnaissance plane flew out, and it really fell into the flame.

These conditions make Shen Lang secretly breathe a sigh of relief!

No wonder there are no obvious traces here. It is not that there are super powerful people who quickly subdued them, but it has not yet reached the final scene!

This is also very regrettable. If there is a reconnaissance device, you can clearly locate and follow up as soon as possible.

Now, you can only follow the induction of the green hills, and then slowly look for the past.

The narrowed dog **** changed back to the size of the horse, indicating that the waves were on it.

Such a deep wave can continue to be sensed by the green hills, and it is not necessary to influence his thinking.

Two people continue to move forward.

Because their strength is too high, if they don't fight, there will be no traces of footprints on the ground. Shenlang will follow the traces of them, and they can only use the green hills.

Fortunately, because time is shortly after everything is clear. Even if they are on the road quickly, Shen Lang can still capture the traces.

So going to this flame mountain is getting higher and higher.

When I came to the top of the mountain, I looked back at the time. The huge plain below, like the stars of the hustle and bustle, was like a large firefly with a lot of fire, and the flames of the stars were very beautiful.

Shen Lang did not care to see the scenery, the picture he sensed, the cold autumn and snow and snow have arrived at the top of the mountain, and then read through to the other side!

“Go up! Be vigilant.”

Shen Lang directly conveyed such an idea to the dog god, and stunned it, lest it patronize the road. He is also on his own.

When the dog **** jumped to the top of the mountain, and then went forward, their vision became wider and saw the other side of the Flame Mountain.

But this picture makes them all surprised!

Chapter 1993 - Underwater cave

In fact, Shen Lang's knowledge of God can also be sensed, but the speed is very fast, and the mind is placed on the traces of the cold autumn, so I saw it directly here.

Behind this flaming mountain, there are mountains in several directions, forming a valley.

The other mountains are the same as the flame mountain of flame eruption, but this valley, but it is magical to have a piece of water sugar!

Because there are a lot of flames on the slopes, it can be seen on the top of the mountain.

Shen Lang's knowledge immediately examined the past and found that there was a protective cover around the valley pond to isolate it.

This is easy to understand, it is surrounded by high temperature flames, the air is very dry, even if the flame will not burn in the past, it will evaporate it after a long time.

However, there is one more surprise.

The flames around the mountains are all sprayed from under the ground, which means there are countless flames in the ground.

Under such circumstances, how can there be a pool?

Looking at this environment, it is almost impossible for heavy rain to fall. If there is rain, it will be evaporated by countless flames. It is impossible to fall into the valley.

That water source should come from the underground.

There are long flames in the ground. How can there be so much groundwater seeping out?

But now is not the time to analyze this, the traces that Shen Lang just sensed by Qingqiu Shi, is someone who came out and attacked both of them, and then they chased them all the way.

After arriving here, they chased into the protective ring of the pond.

In other words, they plunged into the pond. It may be because of the relationship between the environment, or the relationship of the protective cover, which is not visible after the mountaintop, and the knowledge of the inside is not detected.

“They went here. Go check it out!”

Shen Lang collected the Qingqiu stone, directly with the dog ***** from the top of the mountain, bypassing a large number of spurting flames, and directly plunged into the pond from above.

This layer of protection is mainly aimed at the outside flame and drying, and does not affect their entry.

After entering the world, it has been under such high temperature and dryness. Although they can withstand the spurs, the temperature is lowered and the humidity is raised, which is very comfortable.

After entering the protection circle, look up on both sides, the eruption of the surrounding Flame Mountain, as if in the middle of a large circle of fireworks display, is particularly beautiful.

But at this moment, Shen Lang took the dog ***** and did not directly enter the water.

This pond appears too strange, maybe this water is not ordinary water!

If you can corrode everything like the stagnant water of the meditation domain, then you will be injured if you pledge it.

He took another shot, picked up a little water, and then quickly analyzed it.

The result is immediately presented. This is really water. Although there are slight differences in composition, it is at least not corrosive and toxic.

Then he put down the dog **** and joined them into the water.

The realm of dog gods, of course, is not invading by water and fire. Compared with the ancient genetic fear of flames, it is much better for water.

Shen Lang entered the water because of the relationship between the giant scorpion and the water-avoiding beads. It does not affect at all, and naturally drains the surrounding water.

In this water, because there are always other media, it may be more difficult to sense the traces of the cold autumn.

However, directly here, it has been reduced to a narrower, artificial carpet search.

Shen Lang stretched his finger and gestured to the dog to check the side. He searched the other side.

The area of sensory sensing has an upper limit, essentially radiating to the surroundings with a radius.

In other words, a circle with a radius of ten meters around it will not become a radius of 20 meters because of the search for a semicircle.

But as long as half of the investigations will undoubtedly save both people a lot of mental strength, this one can be used to guard against and prevent other accidents.

Now, from the visual area of the pond, let alone the two separate, it is a person who can absolutely do carpet inspection.

However, soon, Shen Lang discovered another abnormality.

Seen from above, the size of this pond is clear to the heart. Now, according to his own knowledge, he can cover the entire pool.

It is surrounded by volcanoes and can have ponds. It is already very magical, and it is impossible to have a depth of several hundred meters.

But now I feel it carefully, but I can't get to the side, and I can't get to the bottom!

The environment here is still a bit strange.

Generally speaking, the pond is in the shape of a pot and a bowl. The mouth is the widest and will become smaller at the bottom. This is formed at the bottom of the valley. In the shape of a mountain, it is even more so, even a funnel.

But now it looks like this. It seems that the pond seen from above is just an entrance. When it enters, it becomes very wide. The bottom of the water enters the surrounding mountains.

This is the answer without a solution. Shen Lang can only continue with the dog god.

The dog **** also discovered this anomaly, but Shen Lang did not say anything, it also followed the sinking.

According to the visual inspection, it should have been in the end, but it has sunk by about 100 meters, but it has not been finished yet, but finally there is a new situation.

Shen Lang finally sensed the mountain wall on one side, and there was a crack in the crack. It seems that it would be an entrance.

He immediately signaled the dog **** to follow him and speeded up.

This gap is very large when it is close. Now it is the upper part of the crack, which extends downwards. It has a tens of meters of the original width and a width of ten meters.

Shen Lang instinctively felt that it should be going to the inside, and immediately kept alert and entered the crack.

Just entering the crack in the mountain wall, he immediately felt a strange.

The feeling of the dog ***** is even more direct – no water!

Looking back, the large amount of water in the pond came to the crack, and then seemed to be blocked by invisible things, and did not overflow over there.

Everything in this world is very different Seeing this, Shen Lang didn't think there was anything incredible.

In fact, just in the water, I can also feel that the temperature of the water is not low. It is not too hot water.

But after coming out of the water, the dry high temperature is still more uncomfortable.

Compared with the dry high temperature outside, it is even more sultry.

The sinking wave immediately followed the crack and soon there was a cave in front.

This pond is already at the bottom of the valley, and then sinks 100 meters. After this turning, it is also inside the mountain of one of the flaming mountains.

There is no direct flame here, but many stones are hot red and not dark in the ground.

Going down the cave, Shen Lang has already sensed the cold autumn and the snow is not snow!

Chapter 1994 - Black robes

Inside this mountain, the crazy flame is pouring in from the ground, and continues to spray on it!

It seems that this mountain is as hollow as it is. Perhaps it was a large number of flames that came out, which made the mountain unbearable, and eventually rushed out to the outside, causing what it is now.

This cave is very spacious, but it leads to the flaming flame in the middle of the mountain. There is only one hole. There are also a lot of flames coming in, and the high temperature and sultry is from this.

Look carefully, this should not be the case.

The huge and spacious inside of this cave should have been formed at the time of the initial burst, but after the artificial modification, the tall boulders were moved, blocking the flame in the middle, so that the flame only bursts upwards.

The holes left should be just the need to leave some flames in, or the result of blasting the boulders.

Since this is artificial, it is naturally clear that someone lives here.

There is a fire in front that can be used, and it is avoided by the flames. It extends from the cave to the crack, and it can be used again. It can also be used for this simple residence.

At this moment, the cold autumn and the snow are not snow, just facing a black robes!

Black robes!

This should naturally be the black robes that Bai Hao saw!

There is no induction before Shen Lang. Through the description of Bai Yu, it is still not so intuitive, but now it is also corresponding.

They chased the black robes and came to this flame world, turned over the flaming mountain, and plunged into the pond to come to the bottom of the earth.

High cold autumn, snow is not just a few minutes faster than Shen Lang.

However, it seems that there should be some negotiation after watching their current confrontation status.

“Shen Lang!”

Snow is not very happy with the arrival of the waves.

It seems that the two of them after the injury, on this other’s site, actually seem to have a tie with the black robes.

But when Shen Lang and the dog ***** come, it is different.

Both of them were not injured and their strength was very strong.

The black robes also saw it.

“To be honest, you are not our opponent.”

Gao Hanqiu said a faint sentence.

Shen Lang and the dog ***** are close, and immediately feel the atmosphere is not the same.

The confrontation between the two parties is actually a confrontation of a field, not just a balance of mutual jealousy.

In other words, the black robes actually live against them two?

Although it was only a few minutes, although they were both injured, it is not easy.

“Do you have more people?”

The black robes sneered a little and then screamed.

In this spacious space, the mountain walls on both sides suddenly moved away, revealing two holes, and then some people rushed out.

Both of them came out on both sides, and like him, they were among the black robes.

“enough?”

The black robes have fallen into the cold autumn.

Gao Hanqiu could not help but frown.

When they came over, they naturally had to investigate the surrounding, but did not sense someone nearby.

In this way, there are two possibilities, or they are quirky in these stone walls, which can isolate the investigation of the gods.

Either they had just arrived, there were no people on either side, but now they have just arrived.

No matter what kind of possibility, it doesn't matter. What matters is how to solve the current situation.

One opponent can fight against both of them, plus Shen Lang and the behemoth, they have the upper hand, but the other party has four more...

These four may not be as strong as this black robe, but they don't need to deal with two, they are two opponents, and they are not optimistic.

“I am late, what is the situation?”

Shen Lang did not have any tension and took a sentence.

“Who are you in the end? Going to our world, encouraging Cui or to pluck the ancestors of the world, is this the world that wants to embezzle us?”

When Shen Lang spoke, I heard the sound of Gao Hanqiu.

“We finally came here all the way, more like he intended to bring us here. But there is no exchange of anything useful, nothing to know about their situation. But he knows that I am snow and snow!”

This is already useful information for Shen Lang.

The other party can find Cui or, naturally, understand the situation of all walks of life.

High cold autumn and snow and snow are one of the representative gods, and it will be normal to enter his vision.

“Your world? Your world?”

The black robe smirked and seemed to hear the irony.

“Not ours, is it still yours?”

Shen Lang itself does not have such a big sense of belonging to the mainland of China. However, people here are also greatly benefited here, and the feelings are still there.

Just like the trace of Qi Ming and others found in Tiandu, he will intervene.

Now, the things of these black robes, he will intervene when he meets.

“This world, once was ours; now it is yours, after all, it is ours!” Another person coldly added a sentence.

Shen Lang secretly chewed the meaning of this sentence.

“It used to be ours, it is yours now, and it is still ours.”

The last two sentences are well understood, but the previous sentence, the world used to be theirs?

Who is it that they have invaded and dominated for a while?

Shen Lang quickly searched for the historical memories of elk, thieves, etc., while looking at the snow and snow.

At this time, the cold and cold autumn is useless. The time of the cold autumn is only a few hundred years. Yaochi will be an ancient sect that inherits and understands many historical secrets.

This is a dog **** reaction, but snow and snow and cold autumn, obviously have tasted this.

When Shen Lang looked at the past, Xue Feixue was also a sly look, and there was no clue.

Whether it is the elk of the orthodox sect, or the thief of the land of the great wilderness, there is no time in the memory of the past history, and there is no time when the black robes are rampant.

But... If the black robes say “their world does not mean completely rule the world, but their martial art family has been prominent for a while, then it is entirely possible!

In the long history of history, there have been many prominent giants, and finally annihilated in the dust of history.

If they come to the world, survive here, and rely on the unique environment here, they will get new developments and will want to kill them again. It makes sense.

“Just by you?” Shen Lang looked at them in a provocative tone.

“No matter what you used to be, there are a few remaining turtles that live under the ground like worms. Do you dare to speak out?”

This is said, snow and snow and cold autumn are secretly laughing.

Although there are only five opponents, but the strength of the first black robes to show them, so that they are both taboo, plus four, Shen Lang will undoubtedly intensify the contradiction.

Chapter 1995 - a few years ago the story

insect! Coward!

These two adjectives, stimulated to the black robe, immediately murdered!

The dog ***** is not willing to show weakness, and the body suddenly expands.

It is getting bigger, but it doesn't show the body completely. Because if you recover completely, you have to squeeze in it.

However, it has become bigger and it takes up a large part.

This also makes the black robes frown.

Because this is the place where they live, if it really fights, everyone will have the power of the ***** level, it will directly ruin it!

This is a hollow mountain. The front side blocks the stone wall of the flame in the mountain. It is a huge stone that is artificially made. Including the place where they just appeared, as well as the cave, the crack to the back, etc., are processed.

You may be sure that you have the upper hand, but if you want to kill the other side, you can't do it right away.

Once you fight hard, don't say that the flame mountain has been turned over. If you want to destroy this cave, it is not impossible.

Isolated flames, protected water sources are their two deadly points.

People can also have better reason and can check and balance, but this behemoth may not be. Barbaric, knocked over the boulder, even if it was burned by the flame itself, it could not change the situation.

Therefore, the change of the dog god, but they made them scruple, and did not intensify the atmosphere.

“You can find it here, indicating that you have returned from the Yungong Holy Land, and Cui is already dead?”

The former black robes asked what they said.

He obviously also guessed a rough.

“Since I went to the Yungong Holy Land, I should have some understanding of the situation inside.”

“Yes, we came out from the inside, and we learned about the passing of things, so we found it.” Seeing that Shen Lang did not speak, Gao Hanqiu answered.

“I will tell you a story.” The black robe suddenly sighed.

Shen Lang, of course, they are not interested in listening to the story, but what the black robes have to say is definitely their history. This is when collecting information, and of course they have no objections.

“As you all know the history, many of your famous big-name factions, the wealthy family, and the ancestors of the founding sects all came out from the Yungong Holy Land.”

“It is said that they are not talking about the information of the Yungong Holy Land. So for thousands of years, everyone has never searched.”

“But who knows, they don’t want to leave behind for future generations, but they don’t know the key information!”

Hearing this, Shen Lang and Xue Feiqi, Gao Hanqiu, are all fascinated.

With this introduction, they can already guess a guess, which is surprising.

“You must have never heard of a name, Longzhentian, is a town that is suppressed, not a shock!”

Longzhentian? Everyone searches for memories, and it seems that there is no such person.

“Nature is not. When a large number of people intentionally eliminated the traces, and after thousands of years, who else knows?”

The black robes sneered a little and expressed disdain. But did it affect his emotions, or continue to tell the story.

“I will tell you directly! The clue of the Yungong Holy Land was found by Longzhentian. He brought everyone in with him! Without him, others could not find traces.”

“What happened in it, you have been there, it is more clear than me. How can I come out and be clearer than me.”

“How did your grandfather come out...”

“Wait! I put in a sentence.” Xue Feixue interrupted the story of the black robe.

“You must know our situation very well. It should also be clear that our Yaochi has a long history, but it is not the grandfather who came back from the Yungong Holy Land.”

“This high ancestor, who founded Qiu Lin Jianzong three hundred years ago, is his ancestor.”

“This little brother is not a descendant of the sects of the Yungong Holy Land.”

“We are not afraid of you, but don’t worry about how our grandfather is.”

The black robe could not help but blink.

Shen Lang is a new rise, but he will arrange such a bureau, naturally will understand the situation of all parties, Xue Feixue and Gao Hanqiu are aware.

Only because of their current identity, in his eyes, they are classified into other ancestors, and all the ancestors were counted as the sects that came out of the Yungong Holy Land that year.

Now I heard the clarification and let him think about it. It seems that it is really true.

“Good! I have to be careful about your face. Since it is not relevant to you, then I can open it up!”

“The batch of ***** ancestors, all the ungrateful villains!”

He really just picked it up...

“What do you mean, you are the descendants of Longzhentian? Longzhentian did not come out, your ancestors were persecuted by everyone?” Shen Lang asked directly.

“Who said that Longzhentian did not come out?” The black robes said something that made them unexpected again.

“If the ancestors did not come out, there would be no us, and we would not know about these despicable villains!”

His emotions have already gotten excited, and then he immediately told me with impatience.

Thousands of years ago, it was said that all the clues were from Longzhentian. As for how Longzhentian got it, I did not elaborate.

Of course, Longzhentian also left a hand and took everyone to go, but did not let them know the route. Perhaps that year was also in the past, perhaps he has another way to know.

After some adventures inside (the black robe did not go in, not clear details, he did not know the details.) Finally, many people died inside, not dead, but also can not find an exit .

Or Longzhentian.

Just like this time, Longzhentian opened the exit for everyone, so that everyone has the opportunity to leave.

But when they opened the exit, they encountered an inexplicable attack!

The enemy is very powerful! Longzhentian had to lead everyone to deal with the enemy.

But what he didn't expect was that he took the lead and became the only one who dealt with the enemy alone. After everyone else dropped him, he quickly fled to the exit he opened!

Because the enemy is very strong, originally everyone, together, there is still a chance to win. There is a dragon town in the sky, it is difficult to support.

But Longzhentian, after all, is a super character who dares to call "Zhentian"!

In the end, in the end, he still smashed the enemy, and he survived stubbornly!

It is just unable to open the exit again.

It has been several decades since he regained the opportunity to leave.

When I went to the Yungong Holy Land, I was originally a powerful god, and it was even stronger after I returned. After a few decades, that group of people have already opened the school.

But that is all their creation, so that the cold weather of Longzhen is that, after decades of deliberate and unintentional exertion by these heroic ancestors, there is no trace of Longzhentian in the world!

Including his family descendants, including his personal reputation, after the old generation died, no one will remember that there is such a person...

Chapter 1996 - 0 years of revenge

In the past few decades, Longzhentian will also become very extreme, and there will be resentment for those who are fleeing and ungrateful.

When he comes to such a realm, his mood is of course very high. He will not survive by hatred, nor will he have to rely on his family and friends to persist.

But no matter how indifferent, I found that those people in order not to show them collectively pitted Longzhentian, even all the way to eliminate his influence!

He will not be too enthusiastic about his descendants, but he will also be short-sighted, and he will not be watched as being destroyed!

He can forgive those who ran away first. After all, everyone has a selfish side, but at least he should be given a fair, let the world know that he saved his life and saved everyone.

Not to mention the trip to the Yungong Holy Land, from the beginning of the information to the exit of the last exit, all rely on him.

If those people come out first, even for their own face, they will not disclose the great role of Longzhentian, but they will still follow the children of the descendants of Longzhentian, and he can still accept it.

But what everyone chooses is to hide, not to talk about it. They themselves became heroes of the ages, and they grew stronger and became a master.

It also exerts influence and wipes out all the traces of Longzhentian, and these ancestors will not leave weaknesses. In order to eliminate weaknesses, add more stains!

After several decades, Longzhen Tianlian couldn't find out his own information, and he couldn't grasp who killed his descendants.

So this account can only be counted on the heads of all of them!

At that time, they were no longer individual ones. Apart from their relationship with their own homes and teachers, they had already opened their own sects. They were all emerging big-name factions, and that was a great network.

Longzhentian naturally thought of revenge, but his injury was too heavy in the past, and it is a miracle to survive.

Others were also injured at the time, but they have already recovered from the past decades and have taken it to the next level. Longzhen Tianze did not recover from the strength of the year.

As a result, it can be imagined that even if there is revenge, there is no strength to challenge each ancestor.

And from the fact that his traces are wiped out, if he officially appears, he will challenge any of his ancestors, and at most once will be the opportunity to sue each other.

They will not give him a fair, but will destroy him as soon as possible!

All of them are moving forward and backward, so they will be closed and they will not need internal suffocation. But the party of Longzhentian is coming back, everyone will destroy his mouth!

Longzhentian was both angry and wronged, but still had to succumb to reality.

The reality is that he can't even show a high profile. Even because he inquired about Long Zhentian's information, there may already be exposure.

So I have to hurry and hide.

The world is huge, I really want to find a place to hide, like a mountain, it is still difficult to find.

But if you don't want to be so quiet and old, you want to recover more powerfully, and have a day of revenge. It is necessary to find a very good cultivation environment.

The good environment of all parties, not to mention being occupied almost, will not be too different.

For example, the Kunlun School is simply impossible to occupy the Kunlun Mountains. There are no problems in accommodating ten or one hundred sects. But even if you can find a good environment, it will not be better than the Kunlun faction.

The same is true elsewhere.

Longzhentian needs to counterattack, it must be far better than the environment of other factions.

That can only go to many areas that have never been developed!

For example, some places are forbidden, and some may not have been developed at the time.

To avoid the sights of the ancestors, and to have some adventures, Longchengtian, who used to come to the Yungong Holy Land, is certainly more powerful than others.

In the end, he came to this place.

And in the days that followed, a group of disciples and younger generations, who are now black robes, have been re-transmitted.

And the only mission they shoulder, is to one day, subvert the famous big factions, complete the vengeful wish of the ancestors!

Listening to his remarks, Shen Lang's mind is also quick to check some information.

The contents of this black robes may not be equal to 100% credibility, some may be concealed from some consideration, and some may be rumors of utterances from generation to generation.

For example, about the Yungong Holy Land, because they have not been to, knowing half of the solution, it is easy to cause mistakes in the inheritance.

But there is a lot of information, or a comprehensive reference.

How does Longzhentian know the information about the Yungong Holy Land? This is not clear. But going to the Yungong Holy Land, where there will be injuries, this is the Shenlang they have also experienced.

The same is true when the transfer outlet is opened. As for the attack by a strong enemy, it may have encountered enemies in other worlds such as the Lingxi Kingdom, the Weiner Star, and the Barbarian.

According to their experience, the biggest gain in it is likely to be the energy that the mysterious space does not know, the change to the body.

If this is the case, then Long Town was trapped for decades and could not be restored. After revenge, it would not be possible to go to the Yungong Holy Land.

Because such a transformation, it should only be one time, so even if he is inside for decades, it is impossible to continue to upgrade.

In addition to that, the cultivation environment inside is not strong enough.

For decades, I don't know if there are other people from other worlds. If there is, he still needs to avoid the enemy.

But it seems that he was so badly hurt that he would have the strength to reopen the exit after a few decades.

It doesn't make sense to go back. In the end, I will come to the world of the flaming mountain. It is definitely something that has attracted him!

It just sounds like Long Zhentian should end up with hate.

And the disciples he later received, because there is not much room for choice, may not be able to have many geniuses, from generation to generation, there is no chance to be able to re-kill.

“Wait... you are not waiting for this generation, not waiting for revenge until now For thousands of years, some sects have died and there is a role in your participation?”

Shen Lang directly asked this question.

If you have never succeeded, the wish of a grandfather is impossible to adhere to for thousands of years!

Only in the process of inheritance from generation to generation, people have been tasked, perhaps only a part, a little bit, but it is indeed a success, in order to have a sense of honor, in order to arrange and encourage the younger generation to continue.

The snowy eyes are also bright.

Yaochi is the fixed host of the Yaochi event. As the head of Yaochi, she knows all the history and records of previous events. Just like this time, after she has organized, she will also record the archives and leave them to future generations.

In the long run, there are naturally some sects that have disappeared and some strong rises.

But I always feel that it is normal, and it is a natural rise and fall.

Chapter 1997 - eradicate

Just like the Qiulin swordsmanship can rise, but also step on a lot of martial arts, can enter the Yaochi event, or rely on the strength and prestige of the last high cold autumn, not the qualifications won by the martial art.

As for how Qiu Lin Jianzong made a family, the number of earth monks who died at that time, how many stood firm, it was only the small scope of the time.

In fact, hundreds of years have passed, like the Tangcheng area, there will be no one to trace the origins of the Qiulin sword.

For the famous class of the Yaochi event, if there is no cold autumn, it is the current Qiulin sword, but it can't enter, let alone the year.

For those of them, the real big martial art is nothing but a land grab in the small village "village fighting" level, and will not pay attention to it.

Even these sects that have disappeared or even disappeared, as long as they are not destroyed overnight, long-term to decades, a hundred years, will feel very normal decline.

Therefore, even if it is the snow and snow that holds the list of each of the Yaochi events, it has never been thought of. The decline of some famous schools in history has such a shadow behind some people.

She also has a bit of awkwardness. This question should be thought of first. I didn't expect it to be discovered by the young Shen Lang.

The black robes smiled smugly.

“Do you think that? If you don't say anything else, the information of the Yungong Holy Land is a very good introduction. It has been pitted in batches. After many of the sects' genre pillars and talented rookies are pitted, we attack them. when!”

Everyone is sunk.

Before Shen Lang, I didn't know about the Yungong Holy Land. But when I made up the class last time, I also knew that in the past history, there have been many activities about the exploration of the Yungong Holy Land.

The historical rumors that have been left are that every time they prove to be false, they have not found the true Yungong Holy Land.

But every time there is a new one, there will still be a lot of people holding the mind that Ning is credible, in case?

Because of the large base, how many people died in each expedition, and who died, except for the descendants of the parties, will not be especially remembered by outsiders!

Everyone just vaguely remembers that there was a time before the adventure of the Cloud Palace Holy Land, which proved to be false, but would not pay attention to the details.

Just like this time, going to dozens of ancestral powerhouses of the Great God level can be described as a very luxurious lineup, perhaps not in the past hundreds or thousands of years.

But in the end it became history, that is, this time it was successful, and some people came back alive. But how many people died, who are the dead, there will be no future people will care.

These black robes use the heart of the public, and every time they do something, they do not think that there may be black hands behind them.

This time I can succeed, it is entirely because of the variable of Shen Lang!

Like Longzhentian, Shenlang helped a lot of people in it and brought them back together.

It was also Shen Lang who discovered and killed the larks and slaves. Thanks to the Holy Grail, he knew that Cui had not entered, and he was suspected of warning in advance.

Otherwise, even if they successfully entered the Yungong Holy Land this time, they will not return. Even if some people succeeded in coming back, they still couldn't escape Cui's hunting.

The final result is that this time the luxury lineup will also cause the worst loss in history!

After they came out to kill Cui or destroy the mouth, they will also regard this behavior as another failure to explore the Yungong Holy Land.

Even if you can't destroy all the enemy in one fell swoop, you can use it in the same way again.

Perhaps the experience of failure in history may be similar, except that the expedition is dead – dead in the cloud palace holy land, or came out and ambushed backhand.

That ending, isn't it made up by them casually?

Gao Hanqiu is very silent. It is hard to say anything, because he and some other people are monks from the earth. They also survived with many local monks after fighting and fighting, and they belonged to the aggressors.

Snow is not a bit chilling!

I did not expect such a group of people to hide in other corners, but for thousands of years, it has been quietly destroying and has affected and changed history.

Yaochi is not their enemy, but like this one, it will not be so well targeted, it will be all-round.

Maybe Yaochi has also been murdered by his predecessors, and there are more sects that I thought were natural declines. In fact, they were murdered.

If this time is not broken through the waves, not traced here decisively, the results will not change. Even if they fail, there will be another time, there will be other ways to destroy.

“You should be very clear that we are all righteous people, and your actions are very sinister practices. You tell us this, aren’t we afraid to eradicate all of you?”

Shen Lang sighed.

For the encounter of Longzhentian, he is of course sympathetic, and it has helped some white-eyed wolves.

But are they still worthy of discussion for their revenge for thousands of years?

The ancestors of the ancestors have a loss, and it does not mean that the generations of the generations are sinners.

And the descendants of other sects who are connected together should also seek revenge for them?

When is the report?

I thought so, but Shen Lang did not say it. Because of this sentence, no matter how correct it is, it is only rational and correct, and it cannot convince perceptual thinking.

In the past, he could only evaluate and could not judge. But to this day, the black robes have to smash all the famous factions, and that is really the evil deeds that should be killed.

The black robe smirked: “I know that you are righteous, and I have not denied that I am a evil. But... can you help me? Just a few of you, eradicate us? This is how we slowly concoct you! ”

They all sneered.

At this moment, Shen Lang and the three people also understood.

The story of the other party telling them about the ins and outs is not to want to be sympathetic, not to get their support, but not to let them preside over the fairness that has long been history.

They are purely venting!

They tell this story is a complaint!

Let you die to understand, let you know who died because of it, and a lot of resentment against the ancestors of the year before death...

This is what they want.

Judging from the current situation, they have already gained the upper hand on the absolute number.

And this black robes, one person can fight against the cold autumn and snow is not snow two, the other four, even if one is to deal with one, they will get ten stable.

but.....

They don't know the biggest variable of Shen Lang!

Their conspiracy this time was shattered by the waves, they can be traced here, but also because of the waves.

If Shen Lang says that he wants to eradicate, the goal is basically eliminated!

Chapter 1998 - Kill the chicken and use the slaughter

“In theory, emotionally, I sympathize with your grandfather, the dragon, but it is a history of thousands of years.”

“We can judge and judge historical figures, but we cannot retaliate against contemporary people because of what historical figures do.”

“You have been guilty of the heroes of the world. It is not just a disgusting thing, but a real evil. As a part of the world, I am qualified to evaluate and judge you.”

When Shen Lang said these words, the tone was calm.

But it still gives people a very naive feeling, especially with his age.

Perhaps because of such disdain, let them not interrupt, and finished by Shen Lang.

“We have smashed your heroes, and will continue to slay, how can you?” The black robe snarled.

“Come on the name! I am also a famous person, and you are the nameless rats who are shrinking, and there is no sense of accomplishment!”

Shen Lang smiled and said: “How do I tell people? I have to eliminate the descendants of a group of Longzhentian? Doesn’t it seem that I am targeting Longzhentian?”

This is a generation of rats, but also a pair of them to eat them, so that the black robes are angry.

“We are the Dragon Gate! My name is Dragon Revival! Who is this child?”

Dragon Gate...

This should be taken by Longzhen Tian, or a disciple to commemorate him. The dragon revival is unlikely to be a direct descendant, but may be a disciple of the younger generation, admire the ancestors, and the surname of the dragon, and take the name of the revival to express their ambitions.

“I don’t know you? I am the best and youngest genius in the world. I don’t know, isn’t this news from you?”

Shen Lang smiled and teased.

Longmen naturally has long-term concern to control the movements of all parties, but this long-term is a long-standing year. It does not mean that it will be updated at any time. After all, it will be able to enter their eyes. It will not be one in eight or eight years.

Shen Lang is also a Yaochi event, only to enter the eyes of these ancestors, this is because of the snow non-snow invitation, and the high-cold autumn heart lift.

So this time I can get so many ancestors and heads, it is already very successful, of course, I will not pay attention to such a rookie.

In fact, the dragon’s revival can be fair and dialogue with Shen Lang, which means that he attaches importance to him. This is also based on the strength he presents.

“Thinking of good genius, in my place, it is just an unknown mouse, a clown!”

The dragon revival immediately replied to Shen Lang, in order to despise his emotions.

“You dare not show people in the true face. Besides being too ugly, should you still be willing to be a mouse?”

“you.....”

“Well, this dragon revived the rat, have you heard of the Great Five Dragons?”

When I heard the Great Five Dragons, everyone’s eyes were looked at, including the cold autumn and the snow.

Although they are not very clear about the situation of the Great Wilderness, the Great Wild Five is not just rising. After several hundred years, the reputation will also be promoted.

“On that day, I was holding a dragon knives. They were riddled with five dragons, but they were trying to provoke me outside the burial dragon valley. Are you saying this is a taboo? Is this God’s will?”

Between the talks, Shen Lang’s hand has already had a sword, the sword of the king!

The people on the scene are all eye-catching. Although it is not clear what the sword is, the power is definitely huge.

“Do you call this a knife?”

“You are the Dragon Gate. You are called the Dragon Revival. They don’t care what they are. But what are you doing? Also with me using the Dragon Slayer? That is to deal with the ancient dragons in the Dragon Valley! You should have a sentence.” Words: Kill the chicken and use the slaughter knife!”

When this is said, they are not happy with the revival of the dragon.

Listening to this meaning, it seems that there is really a more advanced Dragon Sword?

Can you really resist the dragon?

Killing chickens and using slaughtering knives... This is to say that they are too weak to match him with better weapons?

“Kid! You are very arrogant, you will pay for your ignorance, the price of life!” Another black robes said coldly.

“Do we want to gamble? I can smack a few swords to kill you!”

Shen Lang smiled back.

“Wait!”

The black robe dragon revived suddenly stopped.

“This Yaochi head has just emphasized that some of your ancestors were not returned from the Yungong Holy Land that year. This counts, there is no grudge with us, we would not have trouble for you.”

“But you are self-righteous, we must eradicate us as evil elements, then everyone will have a battle!”

“Don’t say that we use the land to bully you, everyone goes out to play, giving you more room to play!”

When Long Fuxing said this, Xue Feixue and Gao Hanqiu had a little movement.

The two of them were used to being strong, but now that they are injured, it is actually two people who can work together to counter this dragon renaissance.

At the moment, they directly put the two of them together, and then the other four people deal with the two, and the pressure is great.

If you can go back to the ground, it is equivalent to reshuffling, that is, four to deal with five, perhaps a little more chance of winning.

But I don’t know why, except for the blind worship of Shen Lang in the cold autumn, Xue Fei couldn’t help but look at the dark waves and want to see what he meant.

“Don’t say so noble, I’m afraid to tear you down when you break the mouse hole! We are not unreasonable!”

Shen Lang said that he had received the sword.

Upon hearing this, the Dragon Revival is undoubtedly very embarrassing.

I want to deny it, but seeing that Shen Lang has already collected the sword, he will hold back.

The purpose has been reached, there is no need to intensify, lest the other party really want to fight here.

Since Shen Lang expressed sincerity, Long Fuxing felt that he also showed sincerity, so he directly indicated that several other black robes had stepped back to express that they would not attack.

Then I looked at Xue Feixue and Gao Hanqiu and began to take control of the field.

The three of them are deadlocked, and in the process of speaking, they have maintained a stalemate.

This is not straightforward to accept, or else the other party will drive straight into the air, if you do not want to kill him directly.

But just taking back part of it and expressing an intention, there is no problem, and it can control the situation.

High cold autumn and snow are not snow, but also the same part of the recovery of the same This will test out the sincerity of the other party, the tacit understanding of each part of the recovery, a little bit of the field back, and then keep High alert.

Of course, this process is relatively slow, and the absolute time is not used much.

Shen Lang is of course still waiting to see, if he and the dog **** are gone, the other party is a combination of cold autumn and snow is not snow?

Now that they have been withdrawn, the four have come together, and this is the peace of mind.

“Let’s go! They only want to destroy our mouths and not run. It’s just a matter of running the road and destroying them.”

Shen Lang directly said a few words to them, and then naturally went in the cracks ahead.

This is undoubtedly to be heard by Long Fu and others.

The pond outside, even if it is not the only source of water in the world, is also an extremely important resource for them.

Chapter 1999 - Don't know well

Shen Lang and others came out from the bottom of the water and flew directly to the top of the flame.

Five black robes, such as the Dragon Revival, are also coming out.

That's right, although they don't have a grudge with the Dragon Gate, they need to kill!

This time, they are still unclear. They can only guess that Cui has an accident. I don't know how many ancestors are coming back.

If you go back from Shen Lang and open all the information, then bring a large number of people to come and encircle them. Even if they can escape, they can't continue to hide in the dark.

The destruction of the reservoir is also very serious for them.

The master of the realm of the great gods can drink water for a long time, because it can absorb the moisture in the air during cultivation or daily.

And this is the time of flame everywhere, it is extremely dry and high temperature, there is almost no water molecule, and there is no problem for a long time, it will not work for a long time.

For them, this is the place to live for thousands of years.

If they can successfully occupy the world, they can naturally abandon this so-called homeland at any time, but they still can't do it. In the next few hundred years and thousands of years, they may continue to survive here.

Everyone appeared on the top of the flaming mountain, and there was a continuous spurt of flames around it. It felt like a special effect bonus, and the scene was very spectacular.

"Dragon revival, persuade you one sentence. It has been thousands of years, and you have revenged a lot, let history become history!"

“As long as you are willing to stop. We can help you keep secrets. You can move out from this bird, no, where the birds don’t have, and grow up outside the big gantry!”

“Compared to the hamster days you have had, the gantry is promoted into a sect that is not inferior to those who hate enemies. Should this be more satisfied with Longzhentian?”

These words of Shen Lang are from the heart.

Past history, whether it is the things that the ancestors did, or what Longmen has done for thousands of years, including this time.

Shen Lang can be written off.

Because until now, he has not lost anything.

Such a disaster is not the same as that of Qi Ming. It is the aggression of different countries in different territories. It cannot be changed because of the decisions of a few people.

The gantry is fleeing, and the times have long been different. They should also be willing to go to a better environment, without the hatred of Long Zhentian, and others can be accepted.

If it can be solved peacefully, it will be a matter of merit and remedy for this thousand years of grievances.

Most importantly, so far, the dragon has revived them and has not directly attacked his friends!

If the dragon revival brought them into the ground, the other few shot in time, when he arrived, had injured the cold autumn, snow is not snow, then his attitude will be different.

“Well, then, do you think it is more appropriate to give up which martial art to give us?” Long Fu taunted and asked.

“You can’t chat with this... How big is the world, wherever you live, it’s better than here. It doesn’t have to be driven away, so you can have more than one martial art.”

“What you said makes sense, but...”

The dragon revival looked at the snow and the cold autumn.

“If we have the ability to stay in Yaochi, why bother to find a place? There are so many women in Yaochi, and they are lonely and lonely for a long time. We used to balance the yang.”

This is what I said when I stared at Xue Feixue. Obviously there was a lot of comfort.

The other black robes also laughed.

They can't see the true face, but they can cultivate to this realm. Besides Shen Lang, they are definitely a lot older. For the female color, it must be bearish.

But that is the ordinary **** ancestor.

That's because I've experienced it in my youth, living in this flame world like them, living in the bottom of the mountain, the chances are much less.

Besides, they are full of resentment against the world's famous big factions. It is the hatred that has been instilled for generations.

Really have a chance to let them go to Yaochi, and they will definitely be happy to meet the revenge!

For a strong person like them, it is only a state of mind that is bearish, and there is no problem at all in terms of physical condition.

Shen Lang immediately frowned...

The premise of his good intentions before him was that they had not offended his friends.

Now that this is said, it directly reveals that they have the minds of many female disciples in Yule Yaochi. Even if they have not done this step, it is also a slap in the face of saying this to Xue Feixue.

“Dragon revival! My Yaochi has a much longer history than your grandfather, Youlong Town! We are women, who have been feared for thousands of years?”

Snow and snow have already coldened her face. There is a red dragonfly in her hand, no wind and no wind, surrounded by spirituality around her body.

Obviously, this is an extraordinary magic weapon.

I thought that when I was in the early days, I saw that the mysterious woman used a similar method. The snow is not the snow, but the master of the mysterious woman is too late. As the ancestor of Yao Chi, she has a magical level that is even higher.

Can let her out of the magic weapon, but also see the degree of attention.

In the hands of Gao Hanqiu, a sword appeared.

This should be the sword he got here later, and Shen Lang did not recognize it.

Shen Lang sighed and said: “I would have given you a clear road, but you have to choose a dead end! It is no wonder that I am!”

When he spoke, his hand was pointing to the bottom.

Shen Lang is undoubtedly one of the focus of the scene, even if it is the youngest, it is already the core of several of them.

Therefore, his movement was not only the five people in Longmen who immediately noticed it, but also the cold autumn, the snow and the snow and the dog god.

However, the direction of his finger is not Long Fuxing and so on, so they only maintain a high degree of alert, but they have not acted rashly, but want to see clearly.

Under their watch, it seems as if something is flying fast!

Even if everyone's realm is so high, it is difficult to see the specifics... More importantly, it is a bit puzzled. If it is a flying sword, it will be understood soon.

At almost the same time immediately rang a loud noise!

Then there is the landslide!

Shen Lang, just did not attack them, but sent a missile to the mountain below!

Where they used to be, the pond was buried 100 meters underground, and then went deep into the cave from the crack in the side wall.

The sacred armor can be accurately locked, and then the missile blasts directly!

The result of this gun, the powerful explosion shock wave, directly destroy that piece!

This is not the same as the cutting of the sharp magic weapon. It is the shock wave of the strong earthquake. The flaming mountain that has been hollowed out is centered on it, and all of it begins to smash!

In an instant, the whole mountain is destroyed!

The reservoirs of these are formed by the flaming mountains that are closed in the valley. Although they are protected by the law, they directly ruin one side, which is equivalent to destroying the support surface of the squad!

Chapter 2000 - Split attack

Everyone looked at the action of Shen Lang, but he did not think that he was going to ruin a mountain!

When it is found that something is wrong, it is too late to stop it.

The collapse of the entire Flame Mountain, in addition to a large amount of mud and dust, is a small flame that has been erupted in the mountains and fields, and has become a large piece!

Flame Mountain, there is no mountain to accommodate the land of the foot, turned into a gushing volcano!

Then, the water of the big reservoir was immediately poured into the volcano.

The reservoir looks bigger and deeper than the surface, so that it directly inverts the past and immediately extinguishes a large flame.

But after all, it is poured from one side, not directly from the top, and the flow rate is fast, and it is still limited.

The volcano is constantly spurting the flames, extinguishing a large piece, but only a moment, then the flames are emerging, and the water that has been poured is directly evaporated by the high temperature!

The effect is that because there is a lot of water pouring in, and the volcanic area close to it, the flame can't be sprayed high, but there is a lot of water coming up...

During this time, everyone remained silent.

In the scene just now, they all saw it clearly. How did Shen Lang do it? It doesn't matter, its important power!

The speed can make everyone too late to see clearly, the impact can destroy a mountain, and the waves also make them feel great pressure.

It can be seen that the attack power of Shen Lang's magic weapon is no small feat!

A few black robes in the Longmen could not help but secretly ask themselves. If the attack is directed at them, can they avoid it?

In terms of speed, they must be able to avoid it. The key is that the range of the blow has been extremely great. They have been greatly shocked in the air on the top of the mountain. If it is on the ground, there is no precaution, just dodging a few tens of meters, the fundamental effect is not big.

Just when everyone is silent, there is another loud noise!

This time, because everyone's eyes were on the ruined place, they didn't look at the waves, so they didn't even find him attacking.

This hit, directly destroyed a nearby flaming mountain to collapse!

At the same time, the reservoir that lost a support surface rushed in different directions.

Just like this one, there is also a lot of water used in the past, naturally playing a role in extinguishing the flame, but the flames are constantly flowing, but instead the whole water is burned and dried.

Following the mountain next to it, a lot of water began to rise.

“You are looking for death!”

The dragon revived and roared.

Before they had a new home, this was their home, and the result was destroyed by the waves!

There are still three caves in the Rex Rabbit. They will not have only one place to settle down, but they have just destroyed a mountain. The loss is huge but they can withstand it. As long as the reservoir is sealed in time, even if half of the water is lost, it can still persist. Going on.

Now it is ruined again, and the water level is falling rapidly.

And in this way, it is impossible to save the seal.

But he still didn't shoot immediately because of concerns!

Shen Lang is such a powerful magic weapon that can continue to attack!

If you can only attack once, it doesn't make sense, it takes a long time to recover, and it's very tasteless.

However, after Shen Lang's attack, the past time was as long as a dozen or so seconds, and there was a wave of results.

According to the speed of this recovery, the attack power is more terrible. Besides, they also don't know if they really need to recover.

Maybe there is no need for cooling recovery at all. He doesn't have continuous attacks. He just wants to see the effect of the first hit and then adjust the attack.

If you can continue to attack, the coverage will be wider!

"In this mountain, is there anyone without you?" Shen Lang said that they are now the Flame Mountain below.

The dragon revived coldly and looked at the dark waves, and did not answer, but at that moment, he instantly blocked the waves in all directions!

Several other black robes are also shot at the same time!

However, the cold autumn, snow and snow and the dog **** are also shot at the same time!

Because just before Shen Lang was talking, he had already told them separately, saying that he would drag this dragon, which is probably the strongest, and let them try to solve the other four black robes.

So at this moment, they all want to solve the four as much as possible, and then help Shen Lang together, all together, there should be no problem, you can solve the dragon revival.

On the other side, the Dragon Renaissance apparently also smashed the other four.

He was responsible for holding the biggest wave of the most variable, and the other four joint attacks on the cold and autumn.

So at the moment, they all looked for their goals and did not interfere with the Dragon Renaissance and Shenlang.

In the end, this is the territory of others. There may be a lot of advantages in geography. For example, after thousands of years, there will definitely be a method of research and development using flames.

So after the start, Gao Hanqiu deliberately pulled everyone away.

Although they have opened the distance, they will lack the care of themselves, but they are all experienced and mature people. There is no problem for individuals to fight alone, and they must not let the enemy join hands.

Then they each took out the housekeeping skills and tried to solve the opponent as soon as possible!

The red dragonfly in the hands of Xue Feixue, the name of the call to the sky, is not a treasure of the town of Yaochi.

After all, this trip to the Yungong Holy Land, there is still a chance to go back, can not carry too many resources. Standing in the head, snow and snow can not bring Yaochi's important magic weapon.

But this is not the same, this is not the inheritance of Yaochi, it is obtained by her own hands, so I can bring it.

The power of the sky is really extraordinary!

The sword in the hands of Gao Hanqiu is also a sword, which is obtained here.

I have experienced two worlds and the oldest one. Gao Hanqiu is very open.

Children and grandchildren have their own children!

If they have the ability naturally can make the family business big. If they don't have the skills, the more things they leave, the more they lose.

It is better to lose to the disciples and grandchildren.

When he was the ancestor of ZTE of the Tianshan Jianzong, when he went to the sea of innocence, he only left the Qiushui sword and took the willow sword.

The same is true now, this sword is his very important weapon. With his age and strength, no one has been able to let him out of the sword for a long time!

Today, the sword is also eager to move.

The dog **** is purely trying to play its own strength. It has evolved and it has been stunned for so long. Every time it is released, the battle is not enough. Even if Shen Lang is to treat Cui or leave it to it, it is still not enough.

Now for these black robes, Shen Lang has already made a killing order, it does not need to worry about anything.
