

First Strong 2011

Chapter 2011 - Life-saving

“There is no regret to see the Yungong Holy Land.”

Gao Hanqiu changed his mouth to see the Yungong Holy Land in his lifetime. This has not been successful for thousands of years. It is indeed a matter of no regrets in his lifetime. Snow and snow have nothing to think about.

“Now I also know the Longzhentian in the history of dying, and the secrets of Longmen, and I have already been buried in the area along the edge of the Dragon Valley. I never thought about it.”

“So, if you ask me what I mean, I also want to make a living, not a big death. At this age, I am already dying.”

If other people say it, it is just a light cloud. After all, the older you are, the more you cherish life. The higher the realm, the longer you can extend Shouyuan.

But Gao Hanqiu said this, Xue Feixue believes.

Because she also can't figure out how old the cold winter is, when she is still young, Gao Hanqiu is already the ancestor of the realm of the gods!

It is his close disciple, Mo Feiliu, who is actually older than many ancestors.

Shen Lang is of course more convinced. They are from the same place. They explored the sealess prison for hundreds of years ago. In fact, they have already risked their lives.

He has survived here, to stand firm and stand up to the Kaizong School, and now he is among the ancestors of the giants. For hundreds of years, he has not known how many times he has experienced the test of life and death.

Being able to go to another world, for many people, there are already things that have no regrets in their lifetime.

Far away, it's just that recently, the cold autumn has experienced the millennial ruins of the millennium, and it has encountered the unsuccessful exploration of the Yungong Holy Land, and this ancient battlefield is buried in the Dragon Valley. It's okay to die inside.

"I have no problem. Don't look at my young age. I have experienced a lot of things. Even if there is danger in my life, I am not afraid."

Shen Lang laughed.

Hearing that he said, Gao Hanqiu and Xuefeixue are considered to be relieved.

Don't look at his young age, but after the Yaochi event, he was able to kill many of his ancestors and has won everyone's respect and fear. ,

This time, the exploration of the Yungong Holy Land, even the snow and snow is also convinced that the invisible has taken him as the core.

Even if several of them decided to explore, but if Shen Lang insisted on opposing opinions, she felt that she would eventually follow the advice of Shen Lang.

Because the behemoth will definitely listen to the dark waves, Gao Hanqiu does not know why, but it seems that he will completely listen to the waves.

With her alone, she can only obey the majority.

Now that everyone is the same idea, then you can work together more.

Shen Lang is actually afraid of death, but he still has a lot of means that others don't know, so he finally uses "not afraid" instead of "death without regrets."

These are temporarily inconvenient to elaborate, if he is not in danger of life, he is not willing to display it.

But there are some, you still have to slap them with them, so as not to miss them.

“Before we came over, we all had already discussed it. This road is the entrance edge. There is no danger at all. But if we go forward, it may be really dangerous. We need to be vigilant!”

“Understand.” Snow and snow and the cold autumn nodded.

It should have been their predecessors, but now they don't feel at all.

“Finally, when you are in danger of life and death, everyone is close to me, I may be able to flee with everyone!”

When Shen Lang said this sentence, there was no joke, very serious.

Snow is not snow and the cold autumn is also a serious promise.

If it was before, maybe they didn't understand it, but when they came out from that day and sent it directly to the Gobi Desert, Shen Lang was taking everyone together.

Although there is no detailed explanation, it is basically guessing that Shenlang has the door of the Three Realms.

In fact, if the snow is not snow, she used to know from the Fan Xueyu that Shen Lang has such a magic weapon for long distance transmission.

This is really a means to escape at a critical time, and they will not care about what they are.

Shen Lang did not elaborate, he really relied on escape, but the space of heaven!

The three gates that Shen Lang now has, the damage should be very serious. The average person can't start it, so it will be regarded as waste. Otherwise, it will not be auctioned out again and again, so that he can pick it up.

He is able to repair, is the artifact of the same nature on the earth Kunlun mirror, let the two merge.

The new Kunming mirror of the Three Realms can achieve similar results. But after all, the two artifacts are severely damaged, and now they can finally have a certain level. So far, the waves are uncertain.

But one thing is certain, that is the time to start.

Although overall, it is still relatively fast, but for the moment when the great gods will feel the danger of life and death, that little time is too late.

The space of the Bible is different. It is already integrated with him. As long as you have a mind, you can enter it immediately.

Of course, there are pros and cons to each other. The gate of the Three Realms can send people away to the distance, just like the day before the Temple of Guangmingshan, they fled to the edge of Yaochi, tens of thousands of miles away.

If necessary, it can even be transferred to another world. For example, when you go to the earth, you are now facing the most powerful enemy, the **** of light there is no way to chase it.

The advantage of Tianshu space is fast, and the shortcoming is still in place. He does not leave, and he is still in the same place.

Of course, Shen Lang is also acting in the air to see what is dangerous.

If you are in an emergency and temporarily avoid it, then the space can be faster. If the whole environment is dangerous and needs to escape, then the door of the Three Realms.

No matter which one is used, the premise is that a few of them are in the vicinity of him. If they are too far apart, the time to come close is too late.

After agreeing on this point, Shen Lang took two more spirits.

“It’s already here, the crisis of the Longmen pit has been lifted, and we are not in a hurry. The two will fix the injury completely!”

Before they came over, the two of them had already divided the black robes, which made the injury much better, but it took time to repair it completely.

Shen Lang now, one is to suggest that everyone take a break, get the best to go to the state, and also give them a little more supply, in addition to faster recovery, it is best to be able to state more, can play the best level.

“The Emperor has already swallowed two gantry, and I will not be polite with you.”

This is not to discuss with them, but to arrange the tone directly.

The dog ***** is also nodding. It does not feel that it is ill-treated. Before that, it has swallowed two human powers in the realm of the great gods. This is a “resource” that it cannot find in the world of giant beasts.

Gao Hanqiu and XuefeiQi looked at each other and still hesitated.

Before the cultivation of the black robe, it was a moral burden, and now Shen Lang gave them spiritual power, that is, the human burden.

Chapter 2012 - Fill the short board

When I was in the holy place of Yungong, Shen Lang took out a box of water exquisite to give you a healing treatment. At that time, they would not feel polite.

Although the year is very difficult to get, but there are also jade peaches like Yaochi. If snow is not carried, it is also willing to give it to everyone. In the future, it can also give back to Shenlang.

But the spirit is not the same, this is more rare than the Lingmai, that is, they are not a lot of reserves.

Lingmai has been able to make the strong people of Daxian realm rush, and the spirit has the same effect on the ancestors of the great realm.

Now Shen Lang is directly giving out two points to them!

Xue Feixue still doesn't understand the identity of Shen Lang. He feels that there is a mysterious ancient sect behind him – it may be an ancient sect that Longmen is not known to the outside world.

The things he brought with him are naturally given by the forces behind him. The purpose is to let him save his life and let him not fall into the holy land of Yungong.

And the big forces, it is impossible to use the pulse as a cabbage, but not a lot of spirits, so guessing that Shen Lang has come out, there will be no more.

This is a great human feeling!

Gao Hanqiu is the opposite. He knows the origin of Shen Lang.

Shen Lang does not have a strong backstage, and no one gives it to him. Everything he has now is a little bit of work in this world!

When Shen Lang came over here for the first time, what it looked like, Gao Hanqiu was clear.

As a brother-in-law, he was required to take care of Shen Lang. He did. It was originally planned to help Shen Lang re-climb the peak in decades.

However, Shen Lang is triumphant all the way, and does not need much help from him. And now the resources that you have, the strength you have, is no less than him.

But behind that, it must have been given a great danger to get it.

As a person who has been here for hundreds of years, he is embarrassed to accept the gift of Shen Lang; as a true brother, he is even more reluctant to accept the resources that Shen Lang has worked hard.

“Wooden barrels are hooped with pieces of wood. How much water can be loaded depends on these boards, but not the most common boards, but on the shortest boards. This is also called short board.”

“We are a team, a whole, like a wooden barrel formed by different wooden boards. How much water can be loaded depends on the short board.”

“The two are high-ranking people, but you are welcome to say that if you are injured, you may become our short board. Even if I am the longest piece, it is useless.”

“On the contrary, if you make up, there is no short board, or if I become a short board, then our overall strength will be stronger!”

The words of Shen Lang are said to make snow and snow fall.

They are all prominent moments, and now they are in the face of Shen Lang, but they have become a shortcoming!

However, they also have to admit that Shen Lang said that if they are defective, they will drag the waves.

Conversely, if they return to their peak, they can help to the other side!

Face, not by others, is to earn by yourself!

To earn a face, you must first put the following and accept the good intentions of Shen Lang.

As for feeling embarrassed, you can wait until you go back and give back to Shen Lang.

If there is any good harvest in the funeral valley, you can give it back to Shen Lang.

After thinking about it, the two people are not polite.

Then they will directly pay for healing in the same place.

The spiritual strength that was absorbed from the black robes before, gave them great supplies, but it only took time.

Now that there is enough time, plus the help of the spirit, the healing effect is naturally very obvious.

The dog ***** is waiting around, anyway, it is not injured, no need for healing, all that is needed is digestion and absorption.

Shen Lang does not need to heal, but he needs to refine the dragon as soon as possible!

In addition to the bright gods who have not seen the face, the dragon revival may be the strongest enemy. After all, even if it is injured, the cold autumn and snow are not inferior to the general god.

In other words, even if the Dragon Renaissance has not yet reached the peak of the Great God, it should be almost the same. It is estimated that it can resist the state of the cold autumn peak.

Such a strong ***** is entering with a strong resentment, in case the towering tower can not hold him...

The most important thing is of course the beginning of the period. Generally, the Shen Lang does not need to take it into consideration. However, the Dragon Renaissance still feels that he still has to look at it. If he wants to get out, he can stop it in time.

When I was walking, I absorbed the volcanic fire of the two volcanoes. It was also recovered. According to human standards, it was also injured by the Dragon Renaissance, and the shots also consumed a lot, even if they absorbed two The volcano, to make up enough flames, also takes time to absorb.

Therefore, Shen Lang estimated the time of their healing, letting the dog ***** act as a guardian role, and he entered the space of heaven.

The dragon renaissance in the tower of the tower is certainly not honest.

The reason why he didn't make the big move in the first place was because when he absorbed it, he was the ***** of the gods, which was equal to being absorbed separately from God.

So after I went in he was not only confused, but the Yuanshen was also badly suppressed. He was rushing in this repressed environment and regained his demise.

Take time to stabilize the Yuanshen, and then the body is seriously injured by the burning of the earth...

Then he began to struggle.

Now in this tower, it is also a stir.

Fortunately, before Shen Lang broke through to the Great Gods in the Yungong Holy Land, he had already eaten the refining medicinal herbs. Otherwise, the cheap dragons will be revived.

If he swallowed the medicinal medicine, he might be able to heal, and he might be able to skyrocket. If he couldn't do it, he would really be unable to suppress him.

But now, his various attacks and struggles are just adding energy to the tower.

Shen Lang kept on for a while and decided that there would be no big problems before he was relieved.

As time goes by, the more he will be suppressed, the less resistance will be.

For the burial dragon valley, Shen Lang did not have more information. Now there is a lot of time. He first checked the previous harvest, and the keel did not know what it was.

He even thought about throwing it into the tower, and used it as a medicinal herb...

But then I thought about it. After all, this is the real keel. Maybe it still has any important effect. It is a pity that it is refining medicine.

He has a lot of keels, but he is not from the same body, and can't piece together anything.

It is a pity to think about it. If you can read the memory of the Red Dolphin King outside the Great Wilderness Dragon Valley, you may know the depths of the Dragon Valley.

But this is just thinking about it. The king of the Red Dolphin may not have personally gone in. If it is not a good job, it is not a batch of people who bury the Dragon Valley in depth and trade in the valley outside.

Chapter 2013 - Feeling of death

Snow is not snow and cold autumn, before absorbing the black robe, it is to grasp the speed and try to recover.

However, after Shen Lang said the short board of the barrel, they also changed their minds. They did not patronize quickly. Instead, they should completely recover their injuries and try to improve their status as much as possible.

So this time is not very fast, with their realm, with the previous absorption, plus the best spiritual assistance, but also a full three-day retreat!

Three days is nothing to the dog god, it is patiently guarding it.

Shen Lang has not been in the space of Tianshu, after all, the appearance of light, but also can not calculate the specific healing time.

It can only be viewed once in a while, but as long as you are still rehabilitating, you will go back to the space.

Basically he is equal to three hundred days in it!

Three hundred days of time is enough to make the heart fire very well absorbed and restored, and it is enough to refine the strongest dragon rejuvenation.

Shen Lang himself is not idle.

He broke through to the Great Gods in the Yungong Holy Land and completed a transformation. After that, he did not have time to cultivate.

It is also a good practice now.

This is equivalent to using a small year's time, the energy that has not been fully absorbed before, whether it is the medicinal herbs refining the scorpion, the inner dan of the giant python, the spiritual replenishment, etc., completely absorbed and absorbed.

Prior to this, even after the breakthrough, he was very high-level, experienced, and still a new god. Now there is a very solid state of realm, and all aspects have been improved.

But these are not the most important.

The most important thing is that he has a clearer understanding and understanding of the mysterious energy absorbed in the mysterious space of the Yungong Holy Land!

Judging from the historical situation, those ancestors who came out are not directly getting the treasures of heaven and earth, but the mysterious energy, which has made a huge change in their bodies.

Simply put, it is to make them stronger!

Only if you are stronger, you can open up other people and have enough capital to open a school.

But it took them several years to decades to complete the process, not a sudden change.

This time in that space, Shen Lang absorbed seven days, the longest one.

Snow is not snow and cold autumn absorbs five days, other ancestors are shorter, and some are one day.

Except for the problem of the amount of time, that is, the problem of time change.

Shen Lang absorbed the most, and because after he came out, he did not suppress the realm and directly broke through the realm of the Great God. This change is also a huge opportunity for the absorption of the mysterious energy!

Snow is not snow and cold autumn, because of the relationship of injury, it is a little affecting the absorption of energy.

Shen Lang is due to rapid advancement, and changes faster and more quickly.

This also caused one of the reasons why the change was very obvious after coming out of the Yungong Holy Land.

Now these three days, for the two of them, is the healing process, and that the mysterious energy naturally changes their process. It is really that they are better after the injury.

But Shen Lang is three hundred days, and that energy has changed him even more!

That is a feeling, specifically what changes, Shen Lang can not say for the time being, but he has a vague feeling that it is the same attack, the same attack that can cause the great ***** to hurt, may not be too big for his body The role!

This is of course an excellent discovery.

The body has become more powerful, which means that the murderous land of the murderous land is also safe. And the two of them also have the same yellow factor, even if the effect is not as good as him, it also has a certain effect.

Then there is only a dog god.

As a behemoth, the dog ***** is very powerful in terms of defense, attack power and vitality.

In short, these three days are extremely rewarding, and everyone's shortcomings have been improved.

“We can.”

Snow is not snow and the cold autumn is very calm.

The spirits have already been used, and they have not said that they will give back to the waves, but will use other means to compensate them later.

Shen Lang had already reminded them of the change of mysterious energy. These days, the system was healed and they felt it. This change also greatly helped the speed of their healing.

It's just that time is short, and their feelings and understanding of this aspect are still far worse than Shen Lang.

Everyone can do it, everyone will do the defense work, and then come to the endless void.

The cold autumn hand shook, immediately dig a large piece of dirt on the ground, and then threw it out in front.

The earth disappeared in the front, the sky disappeared, everything became nothing, and it was really a situation that people couldn't understand. The most basic "going to the stone" can still be used.

Needless to say, the large piece of soil disappeared directly after crossing the limit.

I didn't see any damage, and I didn't feel any change, including space fluctuations, and it disappeared.

The three exchanged their eyes.

Naturally, everyone thought of the moment when they entered the Yungong Holy Land.

At that time, it disappeared directly like this.

A little different is that when they are close to the boundary, they can see the phantom of the palace in the foothills just like a very realistic mirage.

Then go to other places to associate, for example, they are on the next door of the wilderness, followed by the re-creation of the day, when looking for cracks in this space, they can't see the flames on the side of the dragon valley, or the phenomenon as usual.

But after they joined in, they looked like white and scorpion, and they should have disappeared directly.

It was because the whole earth disappeared like a sudden flush, and even the sky was gone, and then they were cautious.

Now, after asking for a stone, I feel that this may be similar to the boundary of transmission. Everyone has a lot of peace of mind.

“go!”

Under the order of Shen Lang, everyone has done enough defense together and jumped out in parallel!

The previous time in the Yungong Holy Land, they have already let them not need to explain the waves, but although they are not directly pulled, they still enter in parallel.

If this will also have a space impact, then this group of people will have much less impact than going to the Yungong Holy Land. The impact that everyone needs to bear will be much greater.

At the moment, the cold autumn and snow are also a bit awkward.

When Shen Lang gave them spiritual power, including letting them absorb the power of the black robe, they were entangled.

However, if it is like the Yungong Holy Land, or a stronger impact, it will only be more seriously injured in the case of the unhealed injury. At that time, it will really delay the sinking of the waves.

In addition to full defense, everyone is highly concentrated, and strives to make any changes and changes.

At the moment of crossing the limit, everyone experienced a strange feeling.

A feeling of death!

Chapter 2014 - 1 residual bone

The mental strength of Shen Lang may not be higher than the cold autumn, snow is not snow, but his experience of crossing the space is likely to be more than them.

Even if they have a lot of experience in crossing, it is basically the world, and Shenlang is crossing more worlds.

Especially from the earth to here, it has been many times, including from the connected chaotic space, including the direct three-gate door transmission.

These experiences have made him very sensitive.

Just like when entering the Yungong Holy Land, he can feel that although the impact is huge, it is different from the natural space shock waves of the two worlds, more like the power of a protective array.

When he came to the funeral dragon valley, he immediately felt it, and this did not transfer to another world.

Now, Shen Lang can also clearly understand that this is not to another world.

This dividing line can also be regarded as a layer of protection, but unlike the defensive aliens of the Yungong Holy Land, it is more like a kind of external protection.

Combined with the legend of the burial dragon valley, Shen Lang immediately had a general guess.

Perhaps here is the enchantment of the great powers of the ancient tribes to seal the dragon valley!

It is not known what kind of situation is behind the valley outside the valley where the porpoise is located. However, from the reaction of Bailu and the Great Five Dragons, it should be that some people have tried very dangerous places.

Perhaps it was the first blockade, and it was the flame world that came to this thousands of miles.

And the disappearance of the boundary here is the real place to enter the murderous land!

All thoughts, all thoughts are only a moment, in fact, it is too late to think carefully.

When Shen Lang analyzed the association, he had already reached another state and entered the enchantment.

Perhaps this enchantment is mainly to defend the relationship between the inside of the Dragon Valley and protect the outside world. Perhaps it is not known how many years of time relationship, let them enter it, without any hindrance.

After just feeling something, Shen Lang has a feeling of death!

What is the feeling of death?

It must be described and it is difficult to describe.

But whether it is a deep wave or a cold autumn, snow is not snow, it is deeply experienced. Even the behemoths who have been dominating in the world of giant beasts, under the suppression of the gods of light, felt the death when they were imprisoned by Tong Xian Weng Zhi.

Now everyone has such a feeling, and then a kind of courage from the heart!

“We are coming in!”

The sound of the cold autumn appears in everyone’s ears.

He is an emphasis, but also gives everyone a little comfort, confirming that everyone has nothing, really crossed the dividing line.

This seems to be the same as their guess before entering. It is not that the real world has disappeared, but just can’t see it.

“Keep a high degree of defense!”

Shen Lang did not forget to remind everyone, he was quickly looking at everything around him.

Everyone feels that death is naturally a high degree of alert. I didn't get the impact just now, so they were a little relieved, but they all gathered together.

Not to another world, but the feeling is really two worlds.

In the two or three thousand miles that come, it is really a flame-like world. The mountains and rivers are all separated by flames, some are one, and some are big ones.

Even if there is less and less flame in the back, it is still a red hot and bright experience.

But now, any trace of flame is gone, and there is no high temperature drying, feeling the cool bleak!

With their realm strength, normal is high temperature, cold can resist, and what is cool is not what it feels.

But now there is such a feeling, a chilly ridge that shines on the back.

This is the feeling that the vision is much more direct!

gray!

Everything you see is gray.

As if there is no color here, everything in the world is gray.

After careful observation for a while, Shen Lang had a clearer understanding.

Can't say that everything in the heavens and the earth is gray, but the heavens and the earth are gray, everything... there is nothing!

There are no birds and animals, flowers and trees above the earth, and several of them have not turned gray.

Shen Lang combined with the record of the sacred armor, the simulation contrasted, here and outside two or three thousand miles, in fact, is similar, there is no creature, but there is a lot of flames and eruptions, but there is nothing here.

The two light, a sharp contrast, plus the more gray here, has a feeling of a gray world.

The environment of light is nothing. What really surprised them is that they can't find out at all, and the feeling of death comes from!

That boundary still exists, and the red land is not seen here, and the direction of the coming is the same as nothingness.

But because it is a gray world, it doesn't feel strong on the other side.

“Speed up!”

The more you say that the problem is, the more people feel uneasy.

Shen Lang's suggestion, let them a few agree, and then four in the form of the field, moving quickly and forward.

Such forward marching method can naturally achieve mutual protection, giving the two directions to the teammates, they only need to defend the two directions with full strength, the safety factor is higher.

The more people hurry, the more cold and the sense of death that makes people feel cold, the more intense they are. It seems that this is a Huangquan Road, and there is no way back.

If you are experiencing a person, it is very likely that you will be dismissed by this feeling when you are on the road.

But now they have four, each strength is not bad, the team that is united is even stronger, and asks that there are certain dangers that can be dealt with.

Therefore, even if it is a feeling of death, at least the danger has not yet appeared directly, and everyone continues to move forward.

“There is a mountain over there!”

Walking out for dozens of miles, everyone saw a mountain on the side. This is a place that looks a little different after coming over, and I want to see what is different in the past.

The four of them kept their guards in the past, and the closer they were, the more clearly they could sense and see the whole picture of the mountain.

Shen Lang feels a bit strange.

The mountain is curved and curved, but it does not depend on anything. It is hollowed out and is generally smooth.

From a distance, I thought it was a mountain peak. If I approached, I didn't think it was a mountain peak. It was more like a huge arch bridge with half left! Visually at least kilometers!

“Go and check it out!”

When Shen Lang spoke, he also cut a piece of palm and let the armor analyze it.

Everyone flew together to the curved mountain of this huge arch bridge.

When you reach the top of the mountain and look into the distance, everyone has a new discovery.

“This is...” Snow is not a snowy look.

“A bone.”

“...!”

Chapter 2015 - The shock of the cold autumn

A bone!

This huge existence, at least as high as a curved mountain peak of more than a kilometer, turned out to be a huge bone!

Shen Lang's words surprised everyone.

Snow and snow have just been suspicious, and it is also because of this high degree of distance, it feels a bit weird.

When I was on the road, everyone was a tacit person who guarded both directions. When four people joined together, they defended them in all directions.

In this way, the scope of exploration and defense is smaller, and it can be more precise. Once there are enemies, it can concentrate more on attack.

But because of this, it lacks an overall observation.

Of course, even if they look at the overall situation, they will not have a bird's-eye view of the height above the kilometer. This will result in a limited range of overall observations.

Just snow is not snow, that is, I saw some "mountain peaks" in different directions in the distance. I feel that they are similar to them now, but they are not like normal mountains, so they have doubts.

Shen Lang is in the process of flying on the body, has cut a piece of "mountain stone" cut below, through the sacred armor analysis of the composition.

It is concluded that this is not like the composition of stone. The high probability is like the composition of a certain bone, and it has not yet reached the level of fossils.

"You said... this mountain is a skeleton?" Gao Hanqiu could not help but confirm the question.

Shen Lang shook his head: "No, not a skeleton..."

Gao Hanqiu was a little relieved.

If there is a residual bone on the mountain, it is okay to say that the whole mountain is said to be a skeleton, which is too exaggerated.

However, the words of Shen Lang did not finish, a little pause, and then went on.

“It’s just a bone, or a few bones side by side, still broken.”

“...!”

The cold autumn is speechless, this is what Shen Lang said, not a skeleton, but a bone...

He looked at the snow and snow, not that he didn’t believe in the waves, but it was too exaggerated!

With a stubborn bone, it has reached the peak of the kilometer, then how big is this body!

Even if he is not a person in this world, but for hundreds of years, the common sense of the legend of the ancient dragons is also understood. How can there be such a big dragon?

Snow and snow pointed to a direction in the distance, and then pointed to several other directions.

“There, there... and there, there are mountains like this, and the arcs are inward, and some are erect. It looks smooth, without any vegetation...”

“You mean... those are bones? There is no vegetation here, it is normal, there is no grass on the ground.”

Gao Hanqiu couldn’t help but spit a little.

“There is really such a body. The residual cheekbones can be as great as a mountain. The body is at least tens of miles. Although it is so huge, it is incredible, but it is not impossible.”

Shen Lang thought of it, Xue Feixue thought of it, even the dog ***** thought of it.

And Gao Hanqiu finally came to mind after Xue Feixue said it here!

Hey!

According to legend, Yaochi has a guardian beast and a giant python, which is extremely incomparably high. It is as high as a mountain, wide and wide, and free to swim.

This rumor, Gao Hanqiu, of course, has also heard of it.

But like everyone else, for the giant python, it feels like a legend, a legend that is seriously exaggerated.

In the waters of Yaochi, there may be a guardian beast, or a giant beast, but it is not as great as a hundred miles. It can be a hundred meters, it is already a behemoth.

For this legend, Gao Hanqiu is understandable.

Yaochi is an ancient martial art with a long history. It must have a profound foundation. The environment is also very good, which will inevitably attract you.

And Yaochi is all women, in terms of cultivation progress, heart and hands, to a certain extent, it is inferior to male repair.

Besides, the name “Yao Chi Xian Zi”, this identity, was originally a scarce resource that attracted the world’s male monks. Even if you are not a greedy person, you will enjoy it if you have the opportunity to possess it.

Therefore, they must exaggerate the role of the guardian of the beast, so that the behemoths and the Yaochi waters, you can let the disciples think twice. And spread this story from generation to generation, let everyone not forget.

However, considering the rationality, Gao Hanqiu always felt that Yaochi could be preserved until now. It is not the legendary patron saint, but the subjective and objective aspects.

Subjectively, they do not cause trouble and remain neutral. The disciples rarely leave Yaochi and wear a mask on the outing, which is low-key enough. And by taking advantage of the host status of the “Yao Chi Festival”, the relationship with the parties has remained good while not enemies.

In this way, everyone needs such a neutral person to host the event. Even if someone has ambition, they will check and balance each other, but let Yaochi be better.

On the objective side, the Yaochi waters are large enough, and their ancestors have hidden the Yaochi holy land very well. Even when it is a Yaochi event, it is necessary to pick up and drop off to transfer people.

This makes it difficult to attack the Yaochi alone. I don't know how much it is, unless all the major factions have reached a consensus, and they have occupied the Yaochi at the Yaochi event. But in the end, they are all decent, the principle is still Yes, face is still necessary, let alone a lot of checks and balances, even if you really have this idea, you can't act publicly.

Therefore, Gao Hanqiu has never believed that there is a huge infinite beast, and that it is a watery beast that has raised one or more beasts.

What he can imagine is the level of the giants. In his opinion, it is just such a level.

“Not bad...”

Snow is not snow, he thought of it, nodded and confirmed: “Although such a huge existence is incredible. But our guardian sacred giants in Yaochi are also so huge. Perhaps in ancient times, there was such a race.”

Shen Lang nodded: “Or another python.”

Originally, he thought it was common sense. When he saw the reaction of the cold autumn, he realized that others did not believe in the existence of the giant python, and then understood that they just happened to meet, and others did not.

Like Gao Hanqiu, in addition to the Yaochi event, it will not go to Yaochi for decades. The Yaochi event is prepared and received, and naturally it will not be provoked.

“I have seen giants with the Emperor, really... very big.”

The dog **** is also silently hanging down.

As the strongest in the world of giant beasts, it has never been afraid of anyone, especially more than a head. Tong Xian Weng, Zhi Zhi, although they abused it, but it was caught under severe injuries.

What really makes it shock and fear is one person and one beast.

There is no light **** directly in Bright Mountain.

On the edge of Yaochi is just the tip of the tip of the iceberg.

Compared with the hugeness of others, it feels that he is simply embarrassed to call the behemoth, not to be called the Emperor.

Chapter 2016 - Meet the black porpoise

At this point, even if it is unbelievable, Gao Hanqiu has to believe it.

Here are a few of them, snow is not snow, there is no need to pretend to exaggerate; not to mention the Shen Lang, since he said that he has seen it with his own eyes, it must have been seen really; the king of the behemoth is huge and fierce, even if they have no temper and are naturally crushed.

“If it’s really so huge... oh, it’s all over here, this place is really a big place.”

Listening to the shackles of the cold autumn, Shen Lang added a sentence.

“It is even more tragic to see the battles of the ancient tribes to drive the dragons.”

Everyone is silent. The cockroaches that are huge to dozens of miles and possibly several kilometers high are all dead in this burial dragon valley. How powerful is the dragon that can kill it?

At the beginning, the various ethnic groups joined forces to slay and kill the dragon. Whether it is a giant python or other such behemoth, it must be a member of the various ethnic camps. It is naturally a demon dragon.

Here is the position that has just entered the depths of the Funer Valley. Is it because it is not good enough to be killed first?

Or is it that when I finally left, it insisted on going to the farthest and was about to go out?

But no matter what kind of situation, it means that going further, it will only be a more fierce battlefield relic!

“What should we do now?”

Shen Lang broke the silence.

Everyone has a face to face.

They came in to bury the Dragon Valley and said that exploration is of course a good one. To put it bluntly, of course, I want to see if I can gain anything.

This harvest is nothing more than two aspects. On the one hand, it is the weapon left by the ancient people of the ancient people. Perhaps some of them have become broken iron and iron, but there may be some magic weapons to appear, still the artifact level.

On the other hand, it is the wreckage of other ethnic groups and even the Dragon Dragon family. For example, the Qingqiu nine-tailed fox has always wanted to welcome the ancestors of their ancestors, of course, there are certain factors of inheritance.

Other irrelevant people can use the basics, which is basically the skeleton.

The value of the shin bone is certainly not as good as the inner dan. However, thousands of years of age, not to mention the flesh and blood, the internal organs, have already dissipated, only the tibia can last.

The value is smaller, but that is relative. When they are fresh and complete, of course, the skeleton can only be better than nothing.

But compared to other beasts, a keel is naturally far from the bones of other beasts, and may even be worth more than a whole beast!

Before the Shenlang and Bailu, the giant cicada, outside the funeral dragon valley, trading with the red porpoise family, but also paying a lot of spirits, in order to trade a keel, or the skeleton of other races.

The same is true of the Great Wild Five.

So when they came in, they all had a general consensus. They felt that they could get a little bone back, and when they got a little weapon back, it would be worthwhile.

Now that the bones are there, but the broken bones are so huge as the peaks of the kilometers, there is no way to carry them back together!

“Go ahead!” Gao Hanqiu sighed.

This thing is so huge, the value is certainly there, but it can’t be taken away, and it can only be abandoned.

Snow and snow and Shen Lang also nodded.

So huge, even if you take a while, it doesn’t make much sense.

“Would you like to eat some first?”

When preparing for it, Shen Lang waved a large piece of bone out of the sword and sent it to the dog god.

The dog is exposed to the face.

It doesn't like to eat bones...

But it can't refuse, because this monster is so huge, it has a natural attraction to it.

If you can eat bones, absorb a little gene, you can change it, and let it evolve even more. Let's not say that the bones dug up by the waves, even if you have finished the bones of this mountain, it has this. perseverance!

So, just a little hesitation, it was still open, and then began to chew.

The dog **** swallows other living things, all swallowed in, slowly digested, and the same refining and refining of the tower, can minimize the loss.

But now I am eating bones, and the bones left by the ancients, swallowed directly, even if not indigestion, the process of digestion will be very long.

Naturally, it needs to be chewed and speeded up.

Looked at this is a large piece cut from the "mountain peak", plus the sound of "嘎吱", "嘎吱", so that snow and snow and cold autumn feel strange.

Just looking at the top, not only the direction of the look, but also the direction of the front.

So go ahead and they will have a clearer sense of direction.

And with the experience just now, let them continue to move forward, from time to time, in the perspective of the aerial view, inductive investigation.

Going forward, everyone's speed has slowed down a bit, although there is no danger, but after all, this is a place where even such a huge situation can kill, fearing that it will be too fast to react.

The chewing of the dog **** becomes a background sound.

It didn't take long before we moved on, and everyone noticed a change in the front!

The four immediately stopped, each maintaining a full defense, and then waiting for the situation ahead.

Shen Lang as the last one of everyone's bottom is even secretly prepared, and the time to get to the door of the Three Realms, too late to the world of books.

Soon, Shen Lang sensed the situation ahead, and then could not help but surprise!

In front of it is a red porpoise, is flying back quickly!

"It's a red porpoise! They can bury the living things in the Dragon Valley and grab it and let it run!"

They stopped, but the other side flew over at high speed, so after Shen Lang finished, everyone immediately dispersed, forming a fan-shaped encirclement, waiting directly for the red porpoise that came over, and then wrapped it!

The red porpoise is flying fast with its wings. It never thought that there would be people here, because only they can always come in.

Therefore, there is no defense. When someone finds someone in front, it is too late. Even if it is slowing down and stopping, it is already surrounded by circles. After all, they can't slow down!

The instantaneous approach, the joint blockade of the four sides of the field, directly forced the black porpoise, and everyone also surrounded a small area.

"Human? How can you come in here? You...what are you guys?"

The red porpoise exclaimed.

No one, no other race can come in, and only the porcupines in the Dragon Valley can come in. This is the common sense that they have passed down from generation to generation, but now they have been subverted.

“This friend of the red porpoise, we need to borrow some of your information, you honestly cooperate, we will not take your life, or else you know!”

The direct opening of Shen Lang, with his fingers pointing his head, signaled its memory.

“You... are you the swell?”

“you know me?”

Shen Lang was a little surprised.

Chapter 2017 - That's too late

However, it is not surprising to think about it. On the same day, they killed or ate the porpoise, and finally forced the king of the black porpoise to come out personally, which left a deep impression on them.

It has been a while, and the news has naturally spread in the family of the Azhao porpoise. It is also normal to know him in the periphery and to understand the treasures.

“Of course I know you! How long has it been? You don't know me?”

Shen Lang faint smile: “Don't climb friendship! Let us read your memory, we will not kill you.”

“Wait! How can you enter the funeral valley? How did you get in? Why didn't you die?” The red porpoise was quite excited.

Because this subverts its cognition, not only the understanding of their ancestors, but also the example of people who want to take risks from generation to generation.

So why can Shen Lang come in, why they are not aware of it at all, why there is no death or injury, which makes it too surprising.

If there is any big change in the funeral valley, it will have a great impact on them!

The reason why they can live alive and well, because of this unique ability, can take risks and take things out to trade, and once they are in danger, they can also withdraw to the funeral valley.

All the outsiders, because of this, dare not kill them, otherwise no one can bring things out of the funeral valley.

Or else, for a long time, humans or other races, can they be so reassured that they can do their own business?

Although the families can't come in to bury the Dragon Valley, they can't leave the outer valley as far as they can. They must be massively invaded and they can be killed to the Dragon Valley.

"How do you say it? If you die, we will not die!"

Shen Lang said with no anger, "It seems that you are not willing to cooperate with it? Then I don't mind letting the Emperor and the Great Beast tear you up!"

"Don't, don't!" The red porpoise quickly cried: "I am the king of the Red Dolphins. We have had friendly transactions, friendly cooperation, and we are willing to help you deal with the Great Five Dragons! Don't tear me apart." !"

It called this, Shen Lang could not help but carefully look up, and then through the Holy Ghost to compare the detailed picture of the day.

To be honest, he did not recognize it before.

On the one hand, I feel that it is very dangerous to have a special dolphin who is responsible for getting in and getting things done. It is unlikely that the Red Dolphin King will come in personally.

On the other hand, of course, they feel that they are almost the same. It can be distinguished there because it is contrasted and compared with other red porpoises, it is clearly recognized.

It is difficult to distinguish between a red porpoise and a porpoise.

At this moment, through the sacred armor to compare its shape, tone, etc., it is really the king of the Red Dolphin!

It's no wonder that its reaction is so fast.

The king of the black porpoise had seen the dog gods with their own eyes. It was not so fearful about the tidal wave at that time. It was the instinctive fear for the beast that was even bigger and bigger than them.

Later, Shen Lang could not only seize the treasure between the Great Five Dragons and it, but also killed a red porpoise with a sword. It also smashed it, and finally got a lot of items to exchange the seized things. come back.

Needless to say now, and not to mention Shen Lang and this behemoth, there are two obviously very powerful human powerhouses.

And it is one of the commanders of the light pole. It is not enough to fight, and it is the most secure.

Other red porpoises may also recognize death. As the king of the Red Dolphins, they must be a bit more intelligent and know how to advance and retreat.

“It turned out to be the King of the Red Dolphins. How can you be here? Don't say it, let us read your memory, we are not embarrassing you!”

Shen Lang continued to emphasize one sentence, what about the Red Dolphin King? Just put the “map” information out, maybe it knows more information.

“It's too late! The situation is very dangerous now. Let's go out and talk about it!”

The Red Dolphin King is also an emergency. It seems that he wants to look back, but he is blocked and can't move.

Shen Lang ignored it and nodded to the cold autumn.

Then he directly suppressed the king of the black porpoise!

Everyone is here, can you go out and talk about it? This guy is very embarrassed. When he can't beat it, he looks like a friendly attitude. When he meets the Great Wild Five, he can't help but destroy the waves!

After suppressing the blockade of the Red Dolphin, everyone approached the past.

Gao Hanqiu first started, invaded the consciousness of the Red Dolphin King, to read its memory.

Then there is snow and snow, the dog **** does not need it anyway, it is all followed by the sinking waves, and will not do so much thinking.

Shen Lang is the last one.

When he read the memory of the king of the black porpoise, he hesitated a bit. Do you want to take all the resources of the king of the black porpoise?

The items of the king of the Red Dolphin seem to be hidden in the big mouth, and they do not know whether it is the throat or the abdomen.

But with a little thought, he gave up.

I just said that if I cooperate, I can let go of the Red Dolphin King. Although the Red Dolphin King did not cooperate, he could use this excuse to seize and even kill it.

But it is not guilty, this is the real understanding of the landlord here. Even if they get the memory, the effect is still very different, in case there is still a place to use it.

“The situation is not good!”

Shen Lang immediately heard a warning from Gao Hanqiu.

“What's wrong?” Shen Lang's knowledge immediately spread out.

Just a little while, he was distracted. Is there any situation?

At the time of his investigation, he heard the words that Gao Hanqiu continued to say.

“This red porpoise is really in danger. It is a full escape. If we don’t leave, we will come right away!”

Gao Hanqiu was the first to read the memory. When Xue Xuexue and Shenlang read the memory, he had already integrated and understood.

Snow and snow are merging, and when Shen Lang listens to this, he can’t take care of it, and quickly integrates the memory of the Red Dolphin King.

What is the danger in the end, what is the situation, listening to the retelling is not clear enough, since it has the memory, of course, it is directly to understand the best.

His speed is very fast and he is already experienced in this area.

The king of the black porpoise is also a life span of at least a thousand years, even if it is relatively monotonous and boring, but there is also a large amount of memory. What is needed at this moment is to ignore most of the recent, part of the memory of targeted fusion.

Immediately he switched to the perspective of the King of the Black Dolphin, and saw all the things he saw before!

This time, the black porpoise king naturally went deep into the treasure, because it had been smashed by Shen Langkeng for dozens of pieces, and the stock was already in a hurry.

This makes it impossible to arrange other red porpoises, and there is no long-term plan, that is, personally. It is also much stronger than the average red porpoise. It is directly successful in avoiding the people of the Dragon Gate. Therefore, in the memory of the black robes, there is no memory of the Red porpoise king coming forward.

Chapter 2018 - Virulence

The king of the black porpoise has been in for a while, and its memory is also to let them sway, and understand the true look of the burial dragon valley.

Just a few hundred miles ahead, the situation is completely different from here. There are huge gullies, hills, rift valleys and cliffs.

It is also full of various bones, some of which have already been destroyed, may have been destroyed at the time of the battle, or may be destroyed when the later generations of the black porpoise came in.

Inside these cheekbones, the human skeleton is not too common. This does not necessarily mean that the human race was relatively small in ancient times. From the outflow of various weapons, it can be said that there are many strong people.

But the human body is much smaller than other families, it is easier to be destroyed, it is easier to be buried, and it is easier to be crushed.

Coupled with other races, there are secret secrets of their secrets, or totem worship of the ancient ancestors, so that they are willing to buy large enough to buy back.

Profitably, the red porpoises will naturally be more careful and better looking for collection.

And from the ancient times to the present, there are still direct descendants. Other Terran, will not welcome the ancient skeleton, but more concerned with the weapon magic weapon.

Therefore, the red porpoises are not so much attached to the human skeleton, and many are crushed and buried.

The most important thing is undoubtedly the skeleton of the ancient dragon.

These keels are the best and most popular trading items.

But they also have a problem. On the one hand, the dragons were all killed by the various ethnic groups in the same year, so they will lead to their fragmentation.

On the other hand, they have some huge keels, and the black porpoise can't move away. They can only pick out smaller ones at a time.

Like the tall bones of the mountain, the red porpoise is also known, but it is also impossible to move out. There will be no one to move out.

In the memory, it is also confirmed that there is another special group of red porpoises responsible for salvaging items. But every time you come in and out, there will be no small loss, you need to take a break.

If the state is not restored, rushing in, it is likely to hang in it can not go out. They have already done a batch before, and they are still in the rest period for the time being.

And if you enter in batches, you have to pay tribute to Longmen.

Therefore, this time, the King of the Black Dolphins personally went out. It used to come in, but only a limited number of times, not so familiar.

This time, we first avoided the people of the Longmen and rushed around the road. After entering, we gradually explored it.

It took a few days, and it also got a lot of bones and weapons. In the end, the body of a dragon was inquired, which was not developed before.

Before the black porpoise was not developed, it is not necessarily dangerous, but it is difficult to develop, so let's leave it as a whole and wait for it to be developed later.

This time, the Red Dolphin King can't take care of it. He rarely comes in once. After he goes out, he needs a good rest, so I hope to bring as many items as possible.

The result was that after it took a few small keels, it touched something, causing the skeleton of the dragon to move. Although it was not collapsed, it did not know what was affected, resulting in a large amount of poisonous gas spreading!

Gas is one of the factors that caused this murderous dragon valley to be the name of the murderer.

In fact, from the canyon to the funeral valley area, it is already within the scope of poison gas.

The poison gas is still relatively light in the area thousands of miles ahead, and it will be mixed with fire poison.

The reason why they didn't feel it was because they were invisible and invisible, even if it was fire poison, it was just a hot and dry feeling.

On the other hand, it is because they have reached the realm of great deity, and that little bit of toxicity is insignificant to them, and there is no feeling in a short time.

The Longmen people are because they live for a long time, and they have practiced the corresponding exercises. They have already taken some medicines, plus habits and adaptations, so they will not have anything to do.

If you don't come to the realm of the great gods, you will feel it when you come in.

However, after entering the depth zone of the Funeral Valley after the rate line, the fire poison has disappeared, but the invisible poison is the concentration increase, I don't know how many times!

It is the realm of the Great Dragon God. After coming in, it will not be able to bear it very quickly, so they are not allowed to explore.

The Chiropractae, the first to survive in this burial dragon valley, is the only living thing, so they can withstand this poisonous gas.

But there is also a problem. At the earliest time, their ancestors may have some poisonous grasses that are buried in the funeral grazing, such as the funeral grass, the fog vine, and so on, so there is a poison attack effect, coupled with long-term resistance.

Now they have moved – they have been driven to the outer canyons to live, taking the spirits and spirits that are traded outside, although the ontology genes are still resistant, but they are also much different.

Therefore, now the family of the red porpoise is coming to bury the depths of the Dragon Valley. There are also time factors. If they stay longer, they will also be invaded. They need to be nursed back to repair.

This has something to do with strength, and it has something to do with the time of stay.

Within their families, it is also a fixed group of red porpoises to do this, because they are more familiar with the route, more adaptable to the environment, and the relative safety factor is higher but it is a cyclical work.

The king of the black porpoise was originally here, feeling that it could not bear it, it would be the induction to retreat. But this time it didn't know what was triggered, and it was a faint smoke that could be clearly seen!

It is sensitive to toxicity, and immediately realized that it is much more than the invisible gas of the invisible phase. Even if they are red porpoise, they will not last long.

So it didn't take care of it, continued to dig the skeleton of the dragon, and quickly retreated a distance.

But after staying in the observation, I saw that the poisonous smoke spread directly!

At that time, it did not make it clear whether it was spreading around, or the direction of its pursuit of it.

It was found that the spread of toxic smoke was not slow, and it quickly spread to the front, so that it did not dare to stay more observations, and only continued to retreat.

In the process of retreating, it was found that the area where the toxic smoke spread was getting bigger and bigger, and it did not stop. This made it dare not wait any longer. It only accelerated the departure and was ready to return.

It was also because of being "catch-up" by poisonous cigarettes, and I did not think that there would be human races in front of them, so I immediately hit them and they realized that they were wrong.

Because it left quickly behind, so the poisonous smoke has not spread yet.

After Shen Lang learned about these situations, looking at them two, Xue Feixue also understood, and everyone exchanged their eyes.

“Do you want to withdraw? From its condition, this is not like a fake, it is a poisonous smoke that even the red porpoise is unclear and fearful.” Snow is not hesitant.

It is definitely not reconciled to go so far.

However, the red porpoise king who can go deep into the days and calmly flies in the face of this poisonous smoke, the degree of poisoning can be seen!

Chapter 2019 - Discover the truth

The same is true for Shen Lang.

I have come here, especially from the memory of the Red Dolphin King. I have already learned about the previous situation and I want to see it at a closer distance.

But what kind of effect this poisonous smoke will have, he does not dare to assert.

“Why are we not having problems?” Shen Lang suddenly asked a question.

“what?”

Both of them have stunned, and this is a matter of whether or not to leave, what is the problem?

“Just like the King of the Black Dolphins, we will be as surprised as we saw them. According to its thinking, our Terran can’t bear the poison of this burial Dragon Valley. In combination with the situation of the Dragon Gate, this should be true, even if it is a real world, it is very much here. dangerous.”

Then Shen Lang spread his hand.

Obviously, although they are not very deep, but there are hundreds of miles away, and time is a little bit, but did not feel any discomfort.

According to their information, they should feel the danger when they come in. If they stay for a while, they will be in danger.

Therefore, Longmen had to keep the red porpoise, use each other, and then strictly demand that they can not enter.

The gas is invisible and invisible. It is understandable. The reaction to their thinking is poisonous, but in the understanding of Shenlang, it may be the environment of this burial dragon valley. If there are certain radioactive substances, there is really no need to wait for the smell. Only poisoned.

But they can't smell, feel, and have a very clear understanding of their bodies.

After poisoning, whether it is poisonous or radioactive substances, it can be violent to make people desperate, so how can it not let a super-powerful person in the realm of the gods from nothing to suddenly, suddenly died.

If you re-drug, there will be a process.

And in their realm, once there is damage, they will immediately be aware of it. This is also the beginning of the "dangerous immediate withdrawal."

"Environment... has changed?" Gao Hanqiu also felt that this reason could not stand.

Thousands of years have been able to make everything change, but to the extent that the Great Gods are poisoned, this is not so easy to change, at most it is weakened a little, and it will not completely disappear.

Moreover, from the reaction of the King of the Black Dolphin, it was planned to leave before the poisonous smoke was taken out, because it was also poisoned by the accumulation of poison gas in a few days.

That means that the poison gas has not actually weakened.

This has been the case for thousands of years, and it will not be because of the arrival of several people in Shenlang. It is also impossible for them to change their physical fitness suddenly, and they can withstand poison gas like the red porpoise.

Changed the physical quality?

Thinking of this, Shen Lang suddenly thought of a point.

This time, four of them came here, except for the dog gods, three of them, but they have really changed their physical fitness recently!

The Cloud Palace Holy Land is also the mystery of the ages, and thousands of years ago, a group of ancestors changed their bodies.

The mysterious space in the mysterious space has changed the body of the mysterious material, and changed the body. What is the specific effect? It is the deep wave that has already felt “one year”, and it is still unclear.

Maybe it really can withstand this toxicity?

“The change of the space in the Cloud Palace Holy Land!”

Shen Lang reminded me.

The cold autumn and the snow are not related to snow.

Only in this way, all three of them have this commonality, which can be distinguished from the Longmen Longhui and others. As for the Emperor’s behemoth, from its great point of view, it should be able to withstand the toxicity.

“Yes! At that time, Longzhen Tianneng came here and could live innocently; later, this rule was set for the Dragon Gate because he could bear it, and others could not bear it!”

“Yes! He also came out of the Yungong Holy Land. His body has also been modified. So he can withstand the general toxicity of the front, and can enter this depth and feel more intense toxicity. Even he has explored the burial. Dragon Valley!”

“But he was seriously injured in the past and he could not fight against other ancestors. Therefore, even if he can bear it, there are certain limits. Therefore, after a certain period of time, he will feel the consequences of poisoning! Under the ban!”

Everyone, you say a word, fill this piece.

Although there is no way to prove with Longzhentian, it is the Longevity that can not be verified. However, from the perspective of logical reasoning, I still feel that such a possibility is very large and can be explained.

“We can withstand the daily poison of this burial dragon valley, but what about the current wave?” Snow is still a little worried.

She is a female monk and she is a very beautiful woman.

She can accept the death including the dagger, but if she wants poisoning, she may bleed and rot. It is a bit cold.

If you die directly, you still don't feel it. If you can't die, your skin will be festering and getting old and ugly. It's even more uncomfortable.

Shen Lang thought about it and made a suggestion.

“I will go one step ahead. I have to carry a defensive magic weapon. If I feel that I can't stand it, I will immediately return to the front entrance. If the toxic smoke is approaching, you will first retreat to the mountain. If I have not returned yet, then Exit and go outside!”

“In short, I should be able to come back Shen Lang's decision, listening to them in their ears, is also immediately measured and measured.

Because they did not conceal them, Shen Lang stayed in the mysterious space for seven days. This is what they all know, and after Shen Lang came out, he immediately became promoted to the realm of the gods, and the body came to a reborn.

If the inference is correct, it should mean that Shen Lang's ability to withstand should be stronger than the two of them.

In addition, he said that he has a magic weapon, and he also has a magic weapon to transmit. It is indeed faster in terms of escape and can be sent directly to a safe place.

In this case, at least one of them can go in and explore.

Safety is the first, and we can't say that they don't care about the benefits. There is one person who can get the benefits, and no one gets better than anyone else.

Besides, if Shen Lang feels that the poisonous smoke has no effect on him, he should come back to inform them.

“Be careful!”

Everyone did not argue, did not discuss anything, and directly regarded Shen Lang's suggestion as an arrangement.

Shen Lang immediately accelerated and rushed over.

They didn't dare to go too fast because they didn't understand the environment at all, fearing that there was no danger.

Now that I have the memory of the King of the Black Dolphins, I don't know that it knows very well, at least let them know more, and now they can go straight in the direction of it.

It didn't take long for Shen Lang to go forward. At most, it was only a hundred miles, and I saw the poisonous smoke that spread from the front!

According to the memory of the Red Dolphin King, it has spread a long distance. If it is chased alone, if it is a full-scale spread, it can achieve this effect. The poisonous smoke has not diluted and faded. It is really Very much!

Chapter 2020 - Explore new roads

The reliance on Shen Lang is two-fold.

If the inference is correct, then it is not only two days of absorption compared to the cold autumn and snow, but it is upgraded immediately after coming out, plus the previous one is more than a year of absorption and Transformation.

So in this respect, his resistance must be much stronger than the two of them.

On the other hand, he can completely wrap himself in the defense of the holy armor, and even multi-layered protection, so the isolation of poison gas will be more thorough.

Although the black porpoise king has an antibody gene, after all, it is only the original ecological defense, it is completely exposed to poison gas, so it will not be able to withstand the poisonous smoke.

In addition to these, as he just said, when necessary, he can also quickly send away and escape without problems.

Now that the poisonous smoke is already in front, Shen Lang immediately starts the holy armor.

In the twinkling of an eye, the extension of the layer of the sacred armor spreads out, completely wrapping the swells, and it looks like wearing a spacesuit.

You don't have to wait for the waves to move forward, the poisonous smoke in front has spread.

The sacred armor immediately gave a rare danger warning. Under the test, it was considered to be a very toxic substance.

At this moment, the Holy Ghost not only strengthened the defensive level in all directions, but also repeatedly reminded Shen Lang of the danger.

Shen Lang is just doing a good thing, and there is no tension.

After all, the squad's defense estimate is for the residents of the river basin, even if this is Bihaihuan's tailor-made transformation for him, to the standard of the psionic masters, but compared to the original, the current Shenlang, already I don't know how many times stronger.

Just like the invisible and innocent poisonous substances that can't be detected by the holy armor, they can make the other gods of the gantry fear, but they are no problem.

Therefore, Shen Lang ignored the warning and went forward along the poisonous smoke.

The toxic smoke is actually faint, but after the spread, it is still obvious. This also led to a significant shortening of the visual range immediately after entering the area of the toxic smoke.

This has little effect on Shen Lang. Anyway, he followed the memory of the Red Dolphin King. He already has a reference route. He does not need more observations, and a closer reference can be used.

And in the memory of the Red Dolphin King, the danger of burying the murderous land of the Dragon Valley is also concentrated on the one hand – the environment.

Specifically, it is a poisonous substance, and the most obvious one is the poisonous smoke that the Red Dolphin King also fears.

Therefore, Shen Lang does not need to worry about other situations, but can be more calm.

Such continuous deepening, even if the toxic smoke blocks the eyes, can feel the change of the environment, the ground is more and more rugged and dangerous, but for his current realm, these are all flat.

After another round of travel, Shen Lang met the first wave of the skeleton.

The memory of these Red Dolphins is ignoring the past, and the Shen Lang is stopped and carefully examined.

This is the skeleton of the Terran.

The skeleton of the Terran has no value for the Red Dolphins, so they will not pay attention to it and will only want to marry the weapon.

The process of finding weapons and magic weapons, because of their huge size, has been crushed and destroyed many bones.

Shen Lang's inspection, of course, has nothing to gain.

None of these are complete, and most of them are already shattered.

Weapons are not there, and they should all let the red porpoises dawn in the years before.

Shen Lang was not disappointed, and he was psychologically prepared. Just like this time, the king of the Red Dolphin wants to lick the keel, and must also go to a place that has not been explored before.

His comprehensive observation, but did not see the traces of the keel nearby!

Didn't the strong people who died here have left a dragon? These are the earliest dead cannon fodder?

However, even if it is cannon fodder, it can fight the magic dragon together with the various races in the ancient times. It is also a very powerful monk who can expel the dragon to the cannon fodder of this final battlefield.

Looked around, Shen Lang took out the small shovel, immediately dug a pit, completely buried these pieces of broken bones.

I don't know how many years have passed, and what I'm going to do is not used at all.

Since the Shenlang was encountered, it was still buried, so that it might continue to be crushed by the red porpoise in the future.

Although these are already names, there is no inheritance of history, but these are real heroes!

If it weren't for them, the world is still the world dominated by the dragon.

Now is the world's dominant human race, and should be grateful to these ancient ancestors for their life.

Shen Lang is not a person in this world, but the truth is the same.

Of course, if there is a good news buried, you can dig out some magic weapons that fall into the ground, which is naturally better.

However, this is obviously impossible. It is the first wave in the recent area. It is in the past history, and it must be the first place that the Ajiite family first came into contact with, and they will be explored in detail.

After the burial, Shen Lang continued to move forward.

The dangerous warning of the holy armor, although he ignored it, ordered the monitoring.

He must master the specific degree, for example, the length of stay is long, and the layered defense of the holy armor will be corroded by this poisonous smoke.

Fortunately, from now on, the toxic fumes are blocked and will not corrode. The danger is that they cannot be inhaled and cannot be directly contacted.

After continuing, Shen Lang also began to see the tibia of different species, including large keels.

Those small ones have already been taken away by the red porpoises, and the rest are huge and inconvenient to carry. It seems that there are some big ones, and they have been taken away by means of a break.

Shen Lang began to hesitate. If you continue to follow this direction, it is the route of the Red Dolphin King. Although there will be no other unknown risks, there will be no gains!

Because that is the road they have explored, they have taken a lot of things. There is also the ability to take away, the king of the black porpoise is searched, and the rest is either a huge chicken rib, or there is no meaning and value.

Eventually it rushed to the place where it was completely explored.

According to memory, that is where the poisonous smoke appears. In the past, the poisonous smoke will only be more dense.

Compared with the keel, Shen Lang pays more attention to the magic weapon of the Terran.

After considering it, he chose the direction that the Red Dolphin King ignored and explored the past to see if there would be new gains!

I have learned that the danger here is mainly environmental danger, and he can now cope with it, naturally there is nothing to worry about.

After rushing for a hundred miles in different directions, Shen Langton felt that his eyes were suddenly open!

The poisonous smoke did not spread!

In terms of combination, although there is no obvious strong wind, the poisonous smoke still has a fixed flow direction, that is, the diffusion to the exit side is faster, and now the direction of this side spreads to this hundred miles or so, and it has not continued.
