

First Strong 2021

Chapter 2021 - Complete dragon

Although all the way is safe, but wearing the appearance of a spacesuit, it is still a bit unnatural.

There is no toxic fumes here, and the sacred armor has also lifted the danger warning. Shen Lang has let it take back the layer of protection and return to the daily appearance.

When I arrived here, it was a scene that was not found in the memory of the Red Dolphin King. Shen Lang immediately speeded up a bit and saw if there was any fresh harvest.

Although he had an expectation, he did not raise his expectations too high.

Because he only got the memory of the Red Dolphin King, but the Red Dolphin King is not the main force in exploring the core area of the Fun Valley, and its experience is not that much.

In other words, the King of the Black Dolphin has not been here, not equal to other red porpoises, and there have been no black porpoises in the past.

If you have been there, you will naturally take all the resources away.

However, compared to the already known over there, Shen Lang is more willing to take this unknown road.

Besides, the exploration of the Chitose generation from generation to generation also knows that the reason for sitting on the mountain and the sky is not, and it does not empty all of them, but expands the scope a little.

As long as you continue to explore in the distance, it is still possible to reach the area where the black porpoise has not arrived.

Shen Lang goes further, and what I see is still a gray world, but here, the environment is very bad.

Gullies, deep pits, hills and the like on the ground seem to be natural, but there are no rules to follow, and many of the waves are estimated to be traces of the ancient war!

It's just tens of thousands of years of polishing, making them look natural now.

If it is the trace of the ancient battle, then there will be vestiges left.

Ten miles, a hundred miles without any gains, are very normal, to the level of the power to play, can directly hit the ground to leave tens of thousands of years of uneven traces, but also flee, it is hundreds of miles.

Shen Lang went all the way, feeling more and more remote.

Finally, he saw a relic of the ancient battle!

From what it looks like, it seems to be following the way, that is, someone is fighting, and finally the final matchup is completed here.

When Shen Lang was close to observing it, it was confirmed that it was not covered by the Chiropractae.

Because of this trace, it still maintains the ancient form!

The reason why I feel this way is because a picture that Shen Lang saw was not destroyed. There are skeletons of people, weapons, and keels.

This picture, now only see the cheekbones, it seems more abstract.

But from now on, it is not difficult to make up for the appearance of blood and flesh.

It should be a demon dragon, and a human race can fight all the way, finishing the final fight here.

Now the dragon still keeps catching the human appearance, not only holding the paws down, but also biting his mouth.

And the Terran monk, probably already a heavy blow, could not get out of the dragon's minions. Or it is simply a bureau where he has a heart, and the same thing that he has done!

At the moment of being pressed and bitten, he stabbed the sword directly into the brain of the dragon!

The end result is that both of them have gone to the same end. Specifically, who may have struggled for a long time, but no one can leave, or maintain this position.

Of course, after being killed and deflated, it is impossible to maintain the same posture. The Shenlang is made up according to the appearance of the scene.

At the scene, the Terran monk could not maintain the state of stabbing before the sword. The tibia is collapsed underground, and most of it is buried in the mud, as is the hand bone.

But the sword that killed the dragon, it really broke into its head, knowing that it is still nailed in the skull!

The dragon kept its gripping posture, but the body was completely squatted, completely smashed, and some of its bodies were caught in the mud, and most of them were still exposed.

This is the scene that Shen Langqi pursues!

The bones of a dragon like the present can basically be considered complete. If you can take it out completely, the value is undoubtedly very huge.

Like the Great Wild Five, you get all kinds of keels, and you want to piece together the dragon shape.

This directly out of the original shape of a dragon, I am afraid that no one can afford it.

It's just that it's too big. The mouth of the red porpoise is estimated to be unsuitable. The storage space of the swell can not be loaded.

But he still has a plan, such as bringing this thing into the world of heaven, and after returning, bring it out of the world of heaven.

However, Shen Lang does not really want to do this.

Because the burial dragon valley is different from other forbidden places, this is the seal of the ancient tribes. Whether you want to go to explore or trade goods with the red porpoise, it can only be a private act.

The publicity of the big fanfare will be a big taboo, even if it is an ancient event, but no one wants to cause world chaos!

For the now dominated Terran, even if you don't think there will be a resurrection of the Dragon, you don't want to see such a thing, because it will give other families an excuse for denunciation!

After the ancient times, the Terran rose and exiled other ethnic groups. But the roots of all ethnic groups are still there. When the long years passed, who knows if there are any people who plot?

Even if other races don't make a difference don't have the power to subvert, but all together, it can still make people lose a lot.

That is really the chaos of the whole world, not inferior to the calculation of the Dragon Gate.

Private communication with a little keel is not a problem. But with a complete skeleton of the dragon, go back and sell it, and give it a handle.

Unless it is brought back to private research, Shen Lang does not think much.

So he didn't have much thought, but put the goal on the sword!

This is the ancient gods, able to kill the sword of the dragon, the power is not the same. If you can still use it now, you can still have some power, it is worth to bring back.

This is not the same as the keel. No one can prove that it was taken out from the burial dragon valley. Other families will not know so much.

It is much more convenient to bring a sword.

It is not difficult to make a decision. This wave of focus is on this sword. By the way, you can bring a little keel and give it to the cold autumn and snow.

He was very careful in the past. Not afraid of the revival of the keel, but be careful not to crush the bones of the strong man.

He even decided to bury the man and the dragon's cheekbones together after taking the items.

Anyway, working with a small shovel magic weapon, it is also very easy to bury.

When Shen Lang reached the front of the sword, looking at the skull of the dragon, after tens of thousands of years, there is still a feeling of oppression!

This is just the remaining skeleton. If it is the real fight, what kind of power is it!

Think about the gullies and deep pits that have come at least hundreds of miles all the way, except for some of them that will be left by the Terran monks, and the others are the claw marks of the dragon.

Chapter 2022 - Ancient gods

Regardless of this dragon, or for this strong human being of Dragon Slayer, Shen Lang is respectful.

The status of everyone is different, but there is no right or wrong in itself.

When the dragon dominated the world, it must be suppressed against all ethnic groups. Just like the current human race, the allies of the ancients were also expelled.

It is inevitable that the oppressed races will have the strength and will want to resist. Now, if other ethnic groups have the strength to counter the Terran, they will also resist.

Different identities will have different views.

For example, in the eyes of the master, it is a very ruthless act, but in the eyes of the master, it will be a matter of righteousness.

The same is true of the earth. It is a matter of course for humans to eat chicken, duck and fish. For chickens, ducks and fish, it is a cruel thing.

Therefore, as a person from another world who has experienced more social environments, Shen Lang is more objective and rational.

He will not think that the dragon is **** because he is a human being.

The two skeletons that are really here are, for him, ancient powers, just different races.

Of course, this respect, Shen Lang is only kept in the heart, not to say that you have to worship and pray again.

After paying tribute to the magical instrument of the dragon, the hands of Shen Lang stretched out and took the hilt of the sword.

His movements were very light. Before he personally felt the sword, he was not sure what the sword was like.

If you pull it out directly, you will lose it if you don't do it well.

When he was holding it, he still did not pull it out directly, but tried to inject vitality and spiritual strength.

This ancient **** soldier, who can penetrate the dragon head and directly penetrate into the skull, must be a very extraordinary treasure.

But then the soldiers, but also can not stand the years to kill the pig knife.

This Dragon War, it was an ancient event.

Specifically, how many years ago, when the ancient wave was made clear, tens of thousands of years were also his guess.

The overall situation here is wide and sparse, and the frequency of communication in all aspects is not enough, not to mention the various historical records.

And although they are all human races, in fact, there are still very obvious barriers to the class divided by strength.

For example, like Yuxianmen, Tangcheng is a distant place that is longing for, and Yaochi and Kunlun are there. Perhaps it is the existence of legends and myths.

Yuxianmen, or most of Tiandu and Tangcheng's forces, can't understand the details of Yaochi's long-established martial art.

And when they come to these big sects, because each of them will live far more than the average human life, time and month, it will not be so much.

For hundreds of years, there may be more records. For thousands of years, perhaps only a big event can be recorded.

For tens of thousands of years, it is that these sects are not so long.

This has created a battle for the ancient dragons, everyone is just a vague concept. Even the last time in the Yungong Holy Land, only a few thousand years ago, when it was specific, it is difficult to say clearly.

Because the factions will exaggerate and beautify their own history, Gao Hanqiu is one of the founding fathers of Qiu Lin Jianzong, which is also known as the martial art level of the Yaochi event.

At the beginning of the publicity, they also attached to a non-existent ancestor, like in Tangcheng, hundreds of years, all aspects of propaganda, everyone has accepted and used.

The various factions of Tangcheng, for Qiu Lin Jianzong, only know that Mo Feiliu is the current sovereign, and that he may have already died. Earlier cold autumn, it is already a historical figure, and it will not know the things of the ancestors.

The combination of these has caused the whole world to be not very detailed about these ancient things, just a rough legend.

There is also a great possibility that there has been a generation!

After the annihilation of the dragon, it is the rise of the Terran. In the legend, it is a simple sentence. But in the real history, perhaps it was only thousands of years, tens of thousands of years to do it.

When the Terran is expelling other ethnic groups, it will be a fierce battle between the various ethnic groups. When it is re-established, it will dominate the world and rebuild the new world.

Will it be the current world pattern, it is hard to say, maybe there have been various ups and downs tens of thousands of years ago.

This will result in various generations of dynasties, which have been tens of thousands of years, and in the end, they have become simple legends.

Therefore, this ancient **** soldier may be here for 10,000 years, maybe tens of thousands of years, or possibly more than ten thousand years, and no one can say clearly.

The scabbard is used to protect the body of the sword. Everyday, for the sword, it will be more carefully protected.

This sword is directly exposed to the environment of this burial dragon valley until all the flesh of the dragon is corrupted.

It still retains this appearance, and it is not easy to rust and rot.

The fear of Shen Lang is that he pulls hard, this sword becomes a powder!

Archaeological stories on the earth, but it is very common to find that the funerary objects and bodies in the millennium tomb are still vivid, but the wind blows powder, or it quickly oxidizes when it encounters air. But before I got a remnant sword, the broken piece of the sword, I don't know what time I was taken out, I was refined into a weapon of the gods – the sword of the king.

I didn't know what went through, and the broken sword of the king was re-constructed into a magical "stick".

However, after the two were in contact, they were still very spiritual and able to re-integrate into a new sword of the king.

This also gave Shen Lang confidence and expectation.

He is now trying to inject vitality and spiritual strength, that is, he hopes to feel the existence of the sword and feel the sword spirit.

After this injection, the blade has no reaction.

Shen Lang secretly breathed a sigh of relief. Although he did not sense the sword spirit, he proved that the sword did not damage to the extent of destruction, or else he could not bear the strength of him.

He added more energy and increased his mental strength. No matter what level he still maintains, he needs to know more.

Under more injections, I was surprised to find that the sword seemed to have a response!

It seems to be a farmland that has been dry for a long time. The response to rain is general. It seems that his vitality and mental strength are absorbed to nourish and nourish this sword.

Under the surprise of Shen Lang, he immediately increased a step and continued to inject vitality and spiritual power into the blade.

It can absorb and nourish, indicating that this sword is really an artifact, and there is also the possibility of restoring the past. It would be a very good result if it is only a few months of recovery.

As a result, the sword is a bit more appetizing. How much he injects, how much he absorbs, and the speed is getting faster and faster, from the beginning of a little moisturizing feeling, to the back a bit of cows whales swallow up!

Chapter 2023 - Sword world

Shen Lang is of course more excited!

I am afraid that it has been decayed and disabled, and it can absorb energy, indicating that it still has the spirituality of artifacts, but tens of thousands of years have already exhausted its energy.

The more energy you can absorb now, the better it will be preserved, in other words, the greater the power!

Shen Lang immediately opened the battle, immediately took a spirit, and the other hand held, while absorbing the energy of the spirit, while a large amount of water to the sword.

In terms of mental strength, he does not have a better way to directly absorb the supply, but the vitality can be supplemented by the transformation of the spirit.

There is no “living” enemy here, so Shenlang does not need to keep anything, and continuously injects energy into the Excalibur.

He is now like a rich man – how much you want, how much I will give!

Excitement only lasted for a while, probably after more than ten minutes, Shen Lang began to feel a bit wrong.

This sword is a bit of a crazy devour!

If it is necessary to fill the energy, he is understandable. But only after a while, it has become more and more intense, and it seems that after a little recovery, it is more greedy.

That kind of crazy devouring, there is a feeling that if you don't continue to perfuse, you will take the initiative to drain him!

This made Shen Lang start to have a vigilance.

The gods are stronger and need to be able to control them.

If you can't control it, it's a dangerous existence!

It hurts people and hurts others.

What he needs to judge most now is whether this sword is consciously swallowed up.

Although he has this feeling, it has not been proved that if you want to prove that it really has this intention, you must interrupt the infusion of the Excalibur before it gets out of control.

It just made him a little hesitant.

If it is just an instinctive act?

After all, this is very likely to be hungry for tens of thousands of years. I have a chance to absorb energy. I don't know if it will be tens of thousands of years later. It will definitely absorb as much as possible.

Keeping this idea, let Shen Lang not interrupt, just control the speed, no longer unrestrained to let it absorb, but he has to control the rhythm.

At this time, the Excalibur suddenly made it difficult!

It seems that there is a very intelligent sword spirit inside, through the slight changes, he has already felt his thoughts, so after he controlled the speed, he immediately attacked him!

What surprised Shen Lang was that the attack of this Shenjian sword spirit had an unmatched effect.

The sword did not fly from the inside of the faucet bones, and the sword spirit could not rush into the brain consciousness that eroded the sinking waves.

But at that moment, it was faintly pulling his consciousness into the “sword”!

Shen Lang also said that there is such a feeling. He has never been to the sword. The two worlds have manipulated so many magic weapons, and the feeling is different.

This time there was a feeling of entering a special space.

Shen Lang will not be afraid of a sword spirit.

In general, a powerful magic weapon will debug a certain spirituality, but it can produce a spirit, it is very unusual, often a powerful artifact.

This is a sword that can kill dragons, and watching this battlefield, it is a human race monk who pursues alone and eventually goes with a demon dragon.

So this should be more powerful, and the man and the dragon are all gone, but the sword is not destroyed!

If this ancient artifact really has sword spirit, it will self-cultivate and absorb the external energy supply. After at least tens of thousands of years, if it is not good, it will become a new spiritual creature.

It's definitely not easy to show the strength of it.

But even so, Shen Lang is full of confidence. After all, there is no response. The other party is under his feeding and has the power of the present.

With such considerations, Shen Lang did not hurry to withdraw the connection between the sword and the sword, but let himself condense a strong belief, and quickly ordered the holy armor.

If his spiritual consciousness is trapped in it, he will become an idiot vegetative, and he will be defeated by this sword.

Therefore, you must leave your back hand. Once there is no reaction, let the holy armor wake up with an electric shock, and control his hand to leave!

With this arrangement, Shen Lang has no worries, and has firmly entered the “Sword of the World”!

There is still a feeling of “world” in this sword, which has not been experienced before.

But now Shen Lang has experienced a lot of things, many of which were previously unrecognizable on Earth, and there is nothing more to be surprised.

He keeps his consciousness strong, even with murderousness, and wants to see how this sword spirit is.

Then, there was a scene that made Shen Lang wrong!

This is not a concrete and tangible world, it is purely just induction. But still can feel it, and there is no one directly to face his sword spirit, but there is an emotion...

Perhaps the mood is not right, it may be a spiritual consciousness, perhaps it is the sword spirit, it will make him feel emotional, because it is a bit split!

The split is embodied in this spiritual consciousness, and in the attempt to attack him, it will still contradict each other, just like the emotional impermanence of personality division.

The entanglement and splitting is just a momentary feeling, and then the sword spirit begins to attack the waves in all directions!

Shen Lang is not only powerful in his own will, but also merges the belief light that is absorbed by Guangming Mountain.

This aspect can greatly help him, can supplement the mental power that has just been injected, and on the other hand, stimulate him!

Bright God.

This is the strongest enemy he has ever encountered. Even if he has advanced to the realm of the gods, he has no means to challenge the **** of light again.

But that didn't become the heart of Shen Lang, but a goal that inspired him.

At this moment, the fusion of light and light is the reminder of the moment – compared with the light god, this is nothing!

Even so, he immediately felt a great discomfort. It was a feeling of completely consuming his consciousness, a kind of uncomfortable to be bitten by people...

This feels too strong, so that Shen Lang can not help but worry about it.

He felt that it was still the entanglement and division of the sword spirit, so that he had not yet received the strongest attack!

By this time, he has basically analyzed a rough estimate.

The feeling of splitting is actually the embodiment of the good and evil of the sword spirit.

It is the spirit of the sword, the spiritual cohesion of the artifact, and there is no good or evil in itself. The good side, according to reason, should be the former master, the influence of the consciousness of the strong human race.

The evil side, perhaps not to say evil, is an embodiment of instinct. It needs to devour the spirit of Shen Lang, to make up for it with all the spiritual power, to maintain and enhance its intelligence.

This is a bit like a tiger or a circus-raised tiger. The hunger makes it eat, and the human management influence makes it impossible to eat.

The current entanglement is the confrontation between these two emotions, called reason and instinct.

Shen Lang is very skeptical about the impact of the remaining sense of reason, can not control the instinct...

Chapter 2024 - Shocking information

“I don’t care what you are! People and dragons are dead! And they have been dead for at least tens of thousands of years! Now, this sword is what I got, I am your new master!”

Shen Lang did not let himself retreat, but instead released the idea directly in a violent attitude.

This is not to be said, but everyone is in a state of consciousness. He believes that such communication, the other party should be able to understand this meaning.

Unsurprisingly, when this layer of meaning came out, the sword spirit seemed to be stunned, and the attack on him was suspended.

“The tens of thousands of years is the most conservative estimate, and it may be hundreds of thousands of years. The people and dragons here have been turned into white bones. What are you holding a sword?”

“You are just a sword! It is in my hands, I am your master!”

“Hugh is rude to the owner! Sincerely, I can fix you!”

It feels effective, and Shen Lang immediately follows the idea of one after another, which makes it understand the fact that it can not be changed, and expresses the heart of attracting.

Sword Spirit will also have obsessiveness, which should be the influence of the former master’s will.

Let it know that the owner has already died for tens of thousands of years before he can let go of his attachment to accept the new master instead of treating him as an enemy.

In the last sentence, it means that you can fix it, which is to give you benefits.

Compared to the forced attack, of course, it is safer to give benefits.

This is a psychological warfare that Shen Lang launched on the sword spirit.

But what he didn't think was that after the expression of this meaning, I didn't know whether it was angering the sword spirit, or whether it recovered from the mistakes, and it became furious!

In an instant, Shen Lang once again encountered a crazy attack.

This time, the attack was even stronger than it was just now. It seems that the instinct firmly occupied the upper hand and directly suppressed the rational side.

I just thought it worked, let Shen Lang also relax a little bit, under the circumstance, let him feel a blank in the moment!

Even at that moment, his heart stopped beating!

This is a very strong attack, even if this level of sinking waves can not bear it...

According to this result, in a few seconds, the consciousness of Shen Lang was taken away!

Even though he had issued orders to the Holy Grail, that time was far more than the current experience. When the holy armor began to execute, he was no longer him...

Moreover, Shen Lang is a conscious control of the Holy Grail. If his consciousness is removed, will there be any loss of control over the Holy Grail?

At the moment when Shen Lang's consciousness was blank, his whole person trembled!

A thunder bomb!

This is not really a thunderbolt, but in the consciousness of Shen Lang, it was a thunderstorm like a blue sky, and he woke him up.

Both mind and body are stimulated by the shackles.

This is Leiyuan.

The holy armor is loyal, and if it is in a general condition, it can also be a self-reliant guardian. But the problem under the state of consciousness is not what it can know.

But the source is different.

Sword Spirit is the spirit of artifacts, but it is the heaven and earth spirit!

Lei Yuan does not regard Shen Lang as the master, and even friends are not considered, but there is also a cooperative relationship. Shen Lang took it away, let it see another source of lightning, and also saw the world.

Like the dog god, it has not seen enough!

Just Jianling is to kill the Shenlang pit, so it is not happy, and directly blocked.

However, it is naturally far less friendly than the dog god, but only interfered when the life of the wave was dangerous. After awakening Shen Lang, it is not in control.

When Shen Lang is dead, it will not die. It does not need to go back to Xiaoxian Island before, and a place can also take root.

But Shen Lang is different.

Just a little confused and ruined by consciousness, it almost made him cold and sweaty.

I couldn't take it for granted, and immediately kept the biggest murder. With a strong sense, I went back to the sword spirit!

At the moment, Jianling was retreating. Just after Leiyuan, he was shocked. Before he figured out what was the situation, he did not act rashly.

At this moment, Shen Lang is not doing any psychological warfare, and no matter what is going to be smooth, it is necessary to wipe out this sword spirit directly!

Wiping out the sword spirit will undoubtedly greatly weaken the strength of this ancient god. The spiritual magic weapon can fight after the instruction, and to a certain extent, it is equal to one more avatar!

But if you can't control it, then the strength is equal to zero. It is a bomb that will plunge yourself at any time.

Shen Lang rather is just a sword without spirituality.

“Fast match me, kill it!”

Suddenly, Shen Lang got the consciousness, which made him a bit wrong.

But it also made him more vigilant. This sword spirit has been extremely embarrassing, and even knows to play with him!

Just when Shen Lang wants to leave everything, and wipe out this sword spirit, suddenly there is a lot of consciousness.

This is communication from Sword Spirit, because the communication of consciousness is too fast, and there is no need to say a word, a lot of content is here.

And Shen Lang himself is also fully aware of it quickly.

But this one is to make him once again shocked!

According to the awareness that came over this time and communicate with him, not the sword spirit, but the master before this sword!

That is, the ancient people who belonged to the Demon Dragon here, because after tens of thousands of years, Shen Lang would not know his information, so he claimed to be the master before the Excalibur.

According to him, they died here at the same time, but because of the spirituality of the Excalibur, the Dragon's consciousness chose to escape into the sword!

This is his sword. Of course, he immediately knew that it was the same way of playing, and he could not let the dragon escape.

Therefore, his consciousness has also entered the Excalibur.

Originally, this Excalibur has really had a sword spirit, and is resisting the invading dragon. Then he goes in and fights together to deal with the dragon.

The powerful part of the Dragon Dragon family has a large part, which is the absolute advantage of the body.

When entering the Excalibur, everyone is the existence of pure consciousness. Originally, it was able to chase it to the same strong people with the human race. With the help of Sword Spirit, the consciousness of the dragon was firmly suppressed.

But the dragon is very powerful, even if it is just consciousness. Under the second fight, it is only in the downside, they can't destroy it.

This confrontation is a very long process.

I don't know how many years have passed since the outside world, their bodies have already completely died, completely decayed, but in this world of swords, it is still maintaining a confrontational state.

To a certain extent, it is said that the human race and the sword spirit prevail, and may actually be a balanced state.

In such a long period of time, both sides want to destroy each other, but neither side can do it, and it has always existed in such a strange state.

Chapter 2025 - Wannian twins

Sword Spirit was able to fight against the dragon at first because it was its home and had an advantage. But the power of the dragon is not what the sword spirit can deal with.

After all, the strong people of the human race, plus the sword spirit to operate the Excalibur, together with the killing of the dragon, it will be the same level.

Now the consciousness of the dragon has been attached to the Excalibur, and the power of the Excalibur cannot be played. It is not enough for the sword spirit to rely solely on its own strength.

Immediately, the consciousness of the strong people of the human race, the two together with the magic dragon. Reluctantly suppressed the dragon, the whole is a draw.

After a long period of time, the spirit of the sword and the consciousness of the strong people of the human race are completely integrated. Or the owner of the sword, swallowed the consciousness of the sword spirit.

This will allow him to better fight against the dragon, but he can only maintain such a situation, and he will not be able to destroy the dragon.

One year, ten years, one hundred years, thousands of years, ten thousand years...

No one knows how long it has been. It only feels like a very long process. At the beginning, I tried to kill each other, and everyone wanted to destroy each other. In the end, they were too lazy to fight.

But because everyone is attached to a "body", so in the end no matter how to fight, let them gradually become one!

The struggle began to become an internal struggle for control of the hiding place.

It is similar to the existence of a body and two souls.

In this way, after thousands of years of fighting, everyone is exhausted and slacks, and a symbiotic state is formed.

The longer the symbiosis, the more strange the relationship between the two sides.

They are all intelligent, they all understand their situation, their bodies are dead, and there is no point in fighting for any dragon or human race. He is no longer a complete person, nor is it a complete dragon.

And the ownership of the world, and so on, have nothing to do with them.

But it is impossible for them to put down their stereotypes, because everyone still has a obsession!

The reason why the dragon is chosen to be attached to the sword before death is to think that one day, through the Excalibur, you can find a body and regenerate.

The master of the sword is to fight against the dragon, even if it is the same, it must be completely with the consciousness.

In the end, if he can, he certainly hopes to destroy the dragon, and then has the opportunity to be born again, the most unfortunate, he can also exist in the form of sword spirit.

Therefore, even if they maintain a state of twins, they will not fight any more, but they are still guarding each other and thinking about the opportunity to swallow each other.

Countless hours passed, and they forgot to look forward to it, thinking that they might be trapped in the sword forever, until the sword collapsed, or their consciousness died.

As a result, in the beginning, there was a living creature that came into contact with the Excalibur!

When Shen Lang touched it, they even thought it was an illusion for a long time, and did not feel that someone was really.

It was not until Shen Lang continued to inject vitality and mental strength that they realized that someone was really coming!

I also felt it, this is a human race.

Trapped in this sword for tens of thousands of years, they have no choice but to cultivate, there is no way to maintain a balance, too lazy to fight, another reason is that everyone can not afford to consume!

They have no body, and they can rely on this sword. Once the Excalibur can't supply it, and they are exhausted, then the real smoke disappears.

The Excalibur can only supply energy at the beginning, and even a certain degree can absorb the energy of the Dragon's remains.

But the long-term supply to both of them will eventually collapse.

Therefore, for a long time in the back, it has maintained a state of standby sleep.

The vitality and spiritual power injected by Shen Lang is equal to awakening them, and then more and more vitality and spiritual energy are injected to reactivate them.

The ability to get such a supply is of course absorbed in hunger and thirst.

Because both sides want to absorb more, while being able to lead the other side, this will form a state of mad devouring, which makes Shen Lang feel wrong.

When Shen Lang controlled the injection, they felt the crisis. It was such a passive waiting to absorb, and it could not be satisfied.

What if the other party gives up?

So they pulled the sinking waves together, and the result is self-evident, they want to take the Shenlang to take it!

This kind of information also made Shen Lang understand. The two emotions he felt before, good and evil, rationality and instinct, are actually the mutual struggle between the two dragons and the human race.

The Terran strongman also wants to occupy the Shenlang. He can't say that he is a good, tangled process, but the Dragon's first active attack, and the Terran strong can't make it succeed, so hold it down.

When Shen Lang thought that they were sword spirits, when they said the words, the two of them really stunned.

It has been at least tens of thousands of years!

They all know that it has been a long time, a long time, but there is no specific quantification. This figure is naturally very shocking.

At least tens of thousands of years, their bodies have left their bones, and the people they fought together must have become bones.

Even if they still have a chance to resurrect, everything is different.

This feeling is very bleak, just like Shen Lang was born again, all the past life has become a history of the past, if not he still has this life, it will be lost.

But for them, it is just a moment.

It's been a long time before I get such an opportunity, and I can't miss it. Otherwise, who knows tens of thousands of years?

Can they still wait? Impossible.

So the next moment is the most rapid attack!

However, Shen Lang thought that he had shaken the sword spirit, persuaded it to let go of the obsession, and persuaded them to let them succeed!

Although they are still fighting each other, it is even more important to take down the waves. At that moment, they were basically together.

As a result, consciousness has already been taken away by them. Leiyuan intervened...

The tremors of the blue sky directly shocked both of them.

It can be clearly felt that it is not the power they can fight against. It seems that if human beings are really angry, they can destroy them!

The dragon is still taking the initiative of the attack, and the strong people of the human race are still holding the role, but in this way, it also bears most of the lightning attack.

Shen Lang felt that their retreat was really shrinking.

And the strong people of the human race, but also quickly made a mental adjustment.

His original mission, or his wish, is to destroy the dragon. If it can't be eliminated, it will be the same.

After tens of thousands of years, it will not be eliminated. If it continues, it is unlikely that there will be a miracle.

Now, taking advantage of the strong people of a human race, working together to complete the elimination of the dragon, it is also the wish and responsibility of tens of thousands of years ago.

So withstand the power of Lei Yuan counterattack, he immediately took the opportunity to attack the dragon!

Chapter 2026 - Fisherman

But he himself is very clear, this is only by sneak attack to take the lead, the focus of the dragon is in Shen Lang (Leiyuan), gave him this opportunity.

As long as they give the Magic Dragon a little more time, they will still pull back the stalemate.

Even if you add a new helper like Shen Lang, it is not so easy to solve.

More importantly, the strength of Shen Lang (Lei Yuan) made him jealous, and now Shen Lang is full of killing, it will be wiped out with him!

Therefore, while continuing to exert pressure, he immediately turned to Shen Lang for help. After issuing the invitation idea, he also understood that Shen Lang would not believe him, and quickly voluntarily transmitted everything to Shen Lang.

Now he gave the choice to Shen Lang.

If Shen Lang believes in him and is willing to be with him, he can destroy the dragon. Even if he can't take it, he still has the opportunity to remain in the sword as a sword spirit.

This is a good ending compared to the same.

If Shen Lang insists that they should be eliminated together, then he has at least completed the long-cherished wish to destroy the dragon.

“It turns out! Then I will help you to destroy this magic dragon!”

“As early as in our ancient times, at least tens of thousands of years ago, all the dragons were destroyed. It is also known as the Funeral Valley! It has ruined all the dragons!”

“The world outside is already the world of the Terran!”

These thoughts of Shen Lang are released together so that they can all be perceived.

He is still a psychological war, but this time is a high degree of alert, not letting himself be attacked.

And even if he believed in the ancestors of this human race, he did not immediately participate in it. In case the other party deliberately fetched his trust, the result was that he wanted to let him and the magic dragon die together, and took the opportunity to occupy him?

So the best result is that they both die together!

The words of Shen Lang immediately played a very good effect.

For the strong people of the Terran, of course, it is a great spirit!

They all have lofty goals, that is, uniting the various ethnic groups together to overthrow the master of the dragon.

Now I know that the dragons are all buried here, indicating that their comrades have succeeded, and their historical mission is completed!

In addition to the common allies, he is also a human race. It is known that the Terran is laughing at the end. Now it is the world of the Terran, and of course it is more gratifying.

The dragon is just the opposite.

They were two battles here, and they died in the same scene. No one knows the situation of others.

Although in the big situation, the dragons were expelled to the great wilderness, it was a big defeat, but it still hopes to turn over.

Now I hear that all the dragons are buried here. It has become a funeral dragon valley, and it is still a small human race that dominates the world. This is really a blow to its belief.

It doesn't make sense to think that it's a long-lasting insistence.

Even if it can survive, it can only survive in other forms, its body has decayed into white bones, and other dragons have disappeared, equal to extinction!

Of course, if you give it a little more time, you can complete the psychological construction, and perhaps there will be such a revenge belief as Long Zhentian.

But now that the faith collapses, the strong man who was squandered by the fighting spirit seized the opportunity and was directly turned over!

Tens of thousands of years!

It has always been a solution to the peace, even if he himself beautifies it, it just barely prevails.

Now is the real overwhelming advantage, the first time to have the opportunity to destroy the dragon!

Long-term wish is to get what he wants right away, so that he can't be too excited to do it any more, and immediately try his best to suppress the past.

Although Shen Lang is observing, he can feel this kind of change.

This atmosphere has allowed him to join, but he is still attacking and still maintains a high degree of vigilance against this ancestral ancestor.

But they were originally the state of consciousness. The good news of Shen Lang and the belief of strengthening him are equivalent to making him a lot stronger. Now he has joined the help, but it is a great increase in confidence!

The dragon also immediately withdrew from the previous sorrow.

The current situation is already very passive. If the world is already like this, then it will be the last seed of the dragon!

And just now they both want to occupy this human race, but now it is the two Terran teamed up to kill it!

Under the circumstance of the situation, let it have a great desire for survival.

Both of them are desperate, and the consequences naturally reach a level of severity that they have not seen for a long time.

And the smashing of the waves, found that they really have a life and death, and immediately decided to intervene!

It's good to wait for them to lose both hands and lose, but they've already struggled, and he's already profitable.

If you wait until both sides are hurt, it is very likely that the sword will be destroyed.

Therefore, under the confrontation between them, Shen Lang took the light, and the change of the Yungong Holy Land directly suppressed the two!

For the dragon, this is the pressure of two parts, and it has already been beaten. This is no longer able to resist and become the last straw to crush the camel.

For the strong man, he can only sigh secretly, and can see that this descendant of the human race is not enough trust for him, it is necessary to kill him.

If he has resentment, he will join forces with the dragon to resist the waves.

But before the power of Leiyuan, he thought it was the real card of Shen Lang, so he gave up directly.

The dragons have been overthrown, destroyed, and the human race has dominated the world, and the ideals of life have been fulfilled, and it has exceeded expectations.

Then let yourself accomplish the task that has not been completed, and finally destroy the enemy of the fate that has survived for at least tens of thousands of years!

At that moment, he did not fight against the waves, but accelerated the attack on the dragon. This made the suppression of the two of them more smooth.

The reason why Shen Lang intervened in advance is that I don't want to miss it!

Therefore, they will not wait until they are both defeated and directly smashed their hands. When they have not lost both sides, they will skip their memories and wipe out their will!

The result is that he gets their memories and keeps their mental energy preserved.

When this step is completed, it becomes calm.

Shen Lang is very tired. Just after the war, although he is a fisherman, it is still a great price to suppress the two super powerful spirits.

However, this is not a big deal. Their memories are not taken care of. Now it is directly integrating the spiritual power they left into one, and then all absorbed!

Without the two powerful spirits of the intellect, after complete integration, it was used by Shen Lang. Not only did he quickly make up for his losses, but he was far from able to bear it.

So now I still seal most of it, waiting for it to absorb slowly in the future.

Finally, Shen Lang's consciousness was drawn from the sword!

Chapter 2027 - Collecting dragon

Looking at the long sword in front of him, Shen Lang's hand was still on it.

The whole process has been as long as it has been for a century, and it seems to be just a moment.

The holy armor has not yet awakened him, and the time is naturally very short in the past.

But just for Shen Lang, it is really a very thrilling process.

"Thank you, Raytheon!"

Shen Lang gave a thank-you idea to the palm of the hand, Lei Yuan is very proud, and simply ignored.

That is nothing but a trivial matter.

In addition to the thank you, Shen Lang is very very at the moment... stunned!

This kind of awkwardness is not because of the feeling after the crisis of life and death, but because of the influence of the dragon and the ancient people.

He wiped out their sense of autonomy, but before that, they left their memory reading, and then they absorbed them together.

Therefore, for the dragon and the human race, the spirit is already scattered, but they have been continued in another form.

Just like the previous shackles, Shen Lang absorbed his undead, and people were affected, and then gradually digested. Later, I got the skull and once again suffered the inheritance of the cockroach. Even if it is controlled, people will still be affected.

Now they are two, everything is inherited by Shen Lang and affects him.

The sorrowful emotion of this one is actually the sorrow of the two of them.

It was a long time, and I found that the white clouds and the dogs were all over the sea. Everything was different. Whether it is hard work, or resistance, guardianship, whether it succeeds or fails, it has nothing to do with yourself.

This is a sudden loss of my own history.

Shen Lang did not abandon this kind of emotion. Since it is their influence, it should be faced.

Their memories have not yet been read, and their mental strength has not yet been refining and absorbing. The abandonment at the moment is actually an escape.

These embarrassing sentiments must have a bursting process.

After a while, he sighed, and the awkward emotion began to fade and dissipate.

Shen Lang's hand is hard to pull out the sword.

At this moment, I basically confirmed that no matter what the Excalibur was before, there is no sword spirit in the blade.

But this is also good, transfer it to the cold autumn, or other people, you can directly control, and will not be countered by the sword spirit.

But just as he had just pulled hard, the whole sword began to shatter!

Looking at this scene, Shen Lang could not help but stay a bit.

He had been worried about this before, so he gently touched it, and then tried to instill vitality and mental strength a little, and he was afraid that it could not bear it.

But there was nothing in the past, but now it is so corrupt...

After a little bit of tempering, he will understand what is going on.

This is a sword, even if it is tens of thousands of years, it can still maintain its edge.

But when the two of them died together here, it was the soul of the gods who were attached to the sword, and then continued the battle inside, including the swallowing of the sword spirit.

In the long years ahead, two such powerful gods, still fighting the gods, can survive to this day, relying on the energy of the sword!

At the beginning, the Excalibur can also absorb the energy of the body of the dragon, and after the dragon becomes a white bone, it has no source of energy.

In the end, it is by itself.

When the energy of both of them was exhausted by the waves, the Excalibur was naturally empty. Of course, their battles, including the attack of Leiyuan, have also accelerated the smashing of it.

There is no value in crushing the ground.

Shen Lang is quite a bit regretful, so the ancient sword, even if it is not used in the cold autumn, give him can also become the treasure of the town of Qiulin.

The Excalibur smashed and was inserted over the bones of the dragon's head, revealing a hole.

It was originally inserted deep into the faucet, and perhaps it also exploded with great power. The nerves and flesh in the head were crushed and smashed to achieve the same effect.

But directly penetrated into the bones, it is only a few points, has not fallen, but also because the embedded is very strong.

It is natural because the gap is small and the sword is sharp and cuts directly into it. There is no big hole in the bones here.

This gap, now it seems, nature has no meaning.

But it gave Shen Lang inspired!

He can't bring the whole skeleton back, but he can bring back a little valuable.

Immediately, he took out the sword of the king, then waved it, broke the keel, and then collected the air-dried bone marrow.

In the process of collecting, Shen Lang is also very pity.

For a long time, the blood of the flesh and blood, the internal organs of the head, etc. have all been corrupted, and the bones are left.

Under the protection of the bones, the bone marrow inside is still solid, although it is not certain how effective, but it is the bone marrow of the dragon!

After learning about these history, Shen Lang also understood that the blood of the real dragon that was secretly auctioned in Tiandu was definitely a fake. It is impossible to have true dragon blood to keep, it should be the blood of some powerful flying beast god Now these bone marrows are real

real dragons, because the skeleton is huge, and this is kept intact. They are not like the Red Dolphins who brought them out of the broken keel, or the collection is comprehensive.

When I first arrived, Shen Lang's goal was just a sword, and I wanted to bury their skeletons.

But before they were almost killed by them, they were almost taken away. There is no psychological burden to break the bones now.

After a busy day, Shen Lang collected a large amount of bone marrow, and then collected some small bones that are easy to carry.

The entire skeleton of the dragon has been completely dismantled by him.

The skeleton of the ancient Terran strongman, Shen Lang did not move, so I finally helped to kill the dragon.

After waiting for everything, Shen Lang took out the small shovel, dug a big pit, and buried the two together, buried together.

After the treatment was finished, Shen Lang looked at the front and looked back.

Do you want to continue ahead?

Judging from the situation on this road, it seems that this is not the main battlefield, but the Terran strongman and the magic dragon have deviated from fighting.

This road is a trace of their battle. If you go forward, there may not be any relics.

But this has no effect after all, and it is very convenient to hurry. If you go back, it will be in the area of poisonous smoke, and many of them have been explored by the red porpoises.

Under the entanglement, Shen Lang's heart moved, why not first combine the memories of both of them?

Although the memory of the ancient times, there is no direct value now, but you can also refer to it, know the layout of the ancient battlefield, in which direction there will be more dragons, where is the core main battlefield and so on.

Chapter 2028 - Toxic smoke dissipates

The memories of the two of them are part of the intersection, and most of them are different.

The magic dragon has the memory of the dragon life, and the human strong is the memory of the time and the various ethnic groups in the world dominated by the dragon.

The part of their intersection is naturally to the battlefield of the Dragon Valley, and their angles are different.

Because time is too long, they are the existence of conscious spirits, coupled with continuous fighting, dormancy, and many memories, all of which are fragmented.

The world of that year was a huge difference from the present. It can even be said that there are no traces, and there is no reference value. Shen Lang is just passing by and has a little understanding.

The focus is on the memory of the burial dragon valley.

At that time, there was no name for the burial of the Dragon Valley. It was the battle all the way. The Dragons retreated all the way and eventually came to this murderous environment.

Among the historical legends of the Terran, it is the great powers of the ancient tribes who jointly expelled the demon dragons to the great wilderness, and finally completed the great battle in the funeral valley, and called the complete seal of the area as the funeral valley. .

But in the memory of the two ancient times, it is a bit different. Although the dragons are retreating, they have regained the initiative, but they have taken the initiative to bring the people to this murderous land!

That is to say, the burial dragon valley of later generations is not the final battlefield of choice of humans and other ethnic groups, but the choice of dragons. It is to combine the advantages of the environment and to exhaust all the ethnic groups!

The king is defeated.

If it is the battlefield of choice of the various races, driving them here, of course, is even more powerful.

But this is the battlefield of the Dragons' choice, bringing the various families here. In the end, the tribes won, and in turn, the dragons were buried here, only to show that the families are even more powerful!

But this is also to make Shen Lang a bit dark.

Because according to the true history of the latter, the ancient tribes are certainly more powerful, but certainly more fierce, paying a greater price to complete the final victory!

According to their memory, even if this is the bureau of the dragons, they are not likely to come all over to explore the scene in advance. After all, they are all fighting, and they are digging into the enemy.

Therefore, at this moment, Shen Lang can't understand the whole situation of the Dragon Valley from the memory of the Dragon.

To put it simply, that is the memory of both of them. It can help Shen Lang to see what dragons are left and what races when they see the bones, but they can't give more reference.

The only thing that can be proved is that this road that has come here now is really not the main road, and there are no more dragons coming over here, that is, they are all the way to fight all the way.

After finishing all this, Shen Lang shook his head.

Although there is no more gain, at least his analysis is proved, and it is not necessary to continue to explore.

From this point of view, if you want to gain something, you still have to return to the area of poisonous smoke.

Shen Lang thought about it again. Will it be considered to have left the Funeral Valley area now? So the poisonous smoke does not spread. Is there any kind of intoxicating substance that is invisible?

Think again, and think it is unlikely.

The burial dragon valley is not a valley so simple, but a small world on this side. It can only be a distinction between a core area and an edge area, and it will not go out casually.

In any case, collect the bone marrow of a whole dragon, and bring some keels, which can make the cold autumn and snow and snow have been harvested.

And he himself is already a huge harvest, and you don't have to continue to take risks.

Besides, he is different from other people. It is very dangerous for others to come in. It is not easy to find.

But he can not only clearly locate the place where he came in, but he can even transfer it directly.

If there is any need in the future, or if you are interested, you can send it alone and explore it carefully.

Now the cold autumn and the snow are waiting outside, and there is no contact here, so they can't be worried for too long.

I don't know if they are being forced to retreat after the spread of toxic cigarettes.

After making the decision, Shen Lang will return along the way.

When he came, he was going to observe it carefully, for fear of missing the details. Many of the tens of thousands of years of shoal, may be completely buried in the dust.

Going back now, especially knowing the situation, you don't need to spend time observing that much.

Shen Lang speeded up the speed, had the trajectory of the holy armor, and was not afraid of getting lost. He returned directly to the place where the poisonous smoke stopped spreading.

Then he was surprised to find a situation.

Did not see the poisonous smoke in front!

Compare the trajectory with the surrounding environment and confirm that this is where the toxic smoke has spread.

Originally there was an obvious dividing line, one side was filled with poisonous smoke, and the other side was an ordinary gray world.

The direction before me, and the direction he is coming back now, are all the same, there is no pervasive smoke.

Surprised to be surprised, this is a good thing.

After this came here, he had to protect the three layers of the three layers of the holy armor now there is no poisonous smoke, then it can be natural.

But for the sake of safety, Shen Lang still protects the whole body, but not before, and also monitors the poisonous substances through the holy armor.

So go back again, the holy armor has not continued to warn.

This can also prove that the poisonous smoke is indeed dissipated, and some are just the intangible and innocent poisonous substances that are not detected.

Shenlang all the way back, did not go to the area where the Red Dolphin King explored, but the place to go, speed up and rush back.

Already here, snow and snow and cold autumn can be regarded as the most important adventure of your life, and you can die without regrets.

It used to be the poisonous smoke that made the Red Dolphins fear. They had to stop them. Now there is no poisonous smoke. Of course, they can catch up with them and let them explore together.

There is no toxic smoke, but it is a return trip. The speed of the swell can be faster.

All the way back to the place where I met the king of the black porpoise, but did not see them three!

Shen Lang was not surprised by the urgency, because the distance of the spread of toxic smoke was not too far, and the speed was fast. It would be normal for them to retreat to the front.

I have already made an appointment. If he does not return, he will return to the peak of the giant bones. If the toxic smoke has not yet returned to it, then exit the core area and wait outside.

Normally, this poisonous smoke should not spread beyond that.

So Shen Lang glanced at him and immediately prepared to continue to chase outside.

Anyway, they are not very urgent here, even if they go out, they can come back again.

However, this sweep of a glance, but let him notice a little abnormal.

Above the ground, there is a row of big characters!

Chapter 2029 - miss

Shen Lang immediately turned over.

Take a closer look, this is the word left to him by Gao Hanqiu, and it is also considered that he may pass quickly, so the word is drawn very much, and an arrow is drawn in front to make it more conspicuous.

The content is that after Shen Lang left, they considered how to deal with the king of the Red Dolphins, and solved some of the imprisonment. Then, when communicating, the Red Dolphin King knew that Shen Lang had entered the poisonous smoke to explore.

It immediately said that it was very dangerous, but it could take them together to save the waves.

High cold autumn and snow are not snow, naturally do not believe, have read its memory, know that this is lying.

The Red Dolphin King later said that it was actually able to sense the toxic smoke, and found that the toxic smoke is likely to retreat quickly, so it wants to go back, and is sure to find the sinking waves.

In the end, it still convinced the two people to go forward. If you see the poisonous smoke, everyone will retreat. If there is no toxic smoke, continue to look for the swell.

On the one hand, the cold autumn and the snow are not to be explored. It is the poisonous smoke, and I want to see it at a close distance.

Then he controlled the king of the Red Dolphins, kept vigilance against it, and then walked forward together, still poisonous, then immediately turned around and left.

Before leaving, just leave a text here. If you and Shen Lang missed it on the road, come back here and see these words, you know that they are not giving up Shen Lang first.

In the end, it was also agreed that everyone would go back to the place where the giant bones peaked.

It is a very prominent mountain peak. As long as it is agreed, everyone will not be so easy to miss, and it can be seen on the top.

The dog gods are not allowed to stay alone, but only with them.

Shen Lang thought for a moment, if the Red Dolphin King said that he had no other ideas, he did not believe it. This guy is still very embarrassed.

But for the toxic smoke, there is no lie.

Just because it can sense the poisonous smoke, it can withdraw in time.

Gao Hanqiu and Xuefeixue can believe that it is because it is a function in its memory.

He did not take the route of the Red Dolphin before, but he developed it casually. Even when the poisonous smoke was dissipated so quickly and widely, he did not know that he would be staggered with them and it was very normal.

But he was meant to come back and bring them to re-explore instead of being in danger of fleeing.

Since they have already entered, there is a red porpoise king, and it should really be able to sense the poisonous smoke in advance.

No matter how awkward the king of the Red Dolphin is, at least it will not make fun of its own life. As long as it is controlled, even if it will be pitted, life should be worry-free.

However, Shen Lang still did not trust the Red Dolphin King, and immediately decided to catch up with the past!

But the scope here is so big, just a few people, it is easy to stagger.

So before I went looking for them, Shen Lang added a few words on the ground, saying that he had seen it back and returned to find them.

If you still miss it, then it is agreed to meet at the Giant Bone Peak.

After getting it, Shen Lang took out the Qingqiu stone and prepared to catch up with their traces while catching up.

This speed will be a little slower, but it can be very reliable.

They haven't been in this time for a long time, and it's relatively simple to be inspired.

But when holding the green hill stone induction, Shen Lang found that it was not felt at all!

He tried it before, although it may not be as familiar as Bailu, but it can still be done. This is not a technical problem, but a problem of this environment.

Fortunately, the guide they are going to is the king of the Red Dolphins, everyone has the memory of the Red Dolphin King!

In this case, Shen Lang can chase after the memory, and the Red Dolphin King wants to deceive them with strange directions and routes, and will be perceived.

The chance of catching up is much greater.

Before and after the Shenlang, once again, now, once again, there is no doubt that the car is well-versed.

He is also leveling his mind now. Is memory a memory, or is it better to see it once, even if there is nothing to gain, it is worth it.

In front of them two people and two beasts, the king of the black porpoise is still under control, the overall speed should not be too fast.

If Shen Lang is alone, he can catch up better. He has the confidence to catch up with them soon.

In this way, I chased the place where the toxic smoke spread before, encountered the place where he went out, and went on to the place where there was memory but he had not personally visited.

After they entered the high-cold autumn, they must have seen that the poisonous smoke really dissipated. Naturally, they would think that they could catch up with the deep waves, and they would not look back and leave no signs.

So now the chasing of Shen Lang, after the Qingqiu stone is useless, there is no trace at all, only by speeding up and trying to catch up with them.

But on the whole, Shen Lang is still calm.

Because they are taking a familiar route from the Chi Gu dolphins, there is not much gain, but there is no danger.

If it wasn't for the poisonous smoke that was triggered by the infamous king of the Red Dolphin this time, the biggest danger was the invisible and innocuous poison.

Therefore, Shen Lang is also maintaining a relaxed state of mind, all the way to understand the situation on the road. With the depth, but also to see more bones, but they have been ransacked by the Chiropactae, human. What is the weapon is basically gone.

The bones of other races, Shen Lang has no interest.

In addition to the Qingqiu nine-tailed fox, there are other races. Now that there is still no living, where is it active, he knows nothing about it!

Therefore, unless you see the bones of the nine-tailed fox again, he will help the white scorpion to bring it back, and the rest will not matter.

On the road, I saw some of the dragon's cheekbones, and Shen Lang was a little bit unbearable.

The keels taken by the Red Dolphins, small and small, are small compared to the entire skeleton. Those huge keels were not brought out because they were too big.

Being made by them is also a variety of disabilities, so there is no burden on Shen Lang. If you catch up with them, there will be no gains. It is better to help them to do something!

He has already collected a lot, but a little more, everyone can also score a little more!

So with the help of the sword of the king, many large keels were broken along the way, and the remaining solidified bone marrow was collected.

In this way, his speed is undoubtedly much slower.

When he collected the pot full, he finally felt the breath of the dog god!

This is the dog ***** stayed here, leaving a breath that has not yet spread.

This can be felt, the explanation is to stay here for a while, and to leave and soon, that means everyone is ahead.

The Shenlang gods examined the past and soon found the dog ***** outside ten miles.

But what surprised him was that there was only one dog, and that his body had become a lot bigger, and he was ready to fight as an enemy!

Chapter 2030 - Dog god

Shen Lang immediately rushed over.

“The Emperor, what is the situation! What about them?”

When he saw the dog god, he had already sent a thought to pass.

The dog ***** also felt the proximity of Shen Lang, and immediately turned back and looked at him.

“We are scattered, I feel very wrong here, it seems dangerous!”

When the idea of the dog ***** came over, Shen Lang had already arrived near it.

However, Shen Lang is a bit puzzled. When he found out that the dog ***** was on the verge of enemies, he kept knowing the way. He had already searched a lot for the surrounding.

But the strange thing is that they did not see their shadows in the cold autumn, nor did they see the shadow of any enemy.

This shows that they may have taken other routes separately in the cold autumn, and they have already walked a bit far. But what is the dog ***** afraid of?

Shen Lang is not afraid to find them in the cold autumn, the memory of the Red Dolphin King, he also has. Of course, there is not only one route. If you go deeper, the area it has explored is not small. It is normal to have a branch.

But why are dog gods separated from them?

The dog ***** is still like an enemy, and then continue to send ideas to Shen Lang, explaining the situation roughly.

Shen Lang immediately knew a general.

Sure enough, as the Red Dolphin King said, when they came in, they did not see the poisonous smoke, and they did not know how to dissipate, or where they had retreated, and there was no trace of poisonous smoke in the whole environment.

Along the way, it seems that even the Red Dolphin King feels weird.

It excuses that it can catch up with the waves faster, everyone can be safer, but there must be some disagreements.

On the way, it introduced them to the surrounding situation. They also introduced some bones and keels of various ethnic groups and invited them to explore.

However, the high cold autumn and the snow are not snow, are experienced and very rational people, and did not agree, the first is to find the sinking waves.

Finally, I went to a place where the Red Dolphin King explained it.

It is said that it is a branching point. It has been walking on both sides. It has not yet caught up with the deep waves, indicating that Shen Lang should be deeper.

They are looking for it together, it is willing, but once and for all, it may cause a mistake. If they go in one direction and Shen Lang just comes back from the other direction, they may go out first.

In the cold autumn, of course, they will not let the Red Dolphins themselves run in one direction, and they will stop discussing it.

Finally, the dog ***** took the initiative to ask, let the cold autumn and snow non-snow go with the Red Dolphin King, no matter which way to choose, it is waiting there.

In that case, whether they come back or if Shen Lang returns from the other side, they can come across it.

It is not too late, Gao Hanqiu and Xue Feixue also agreed to control the king of the black porpoise and chose a road. Leave the dog ***** there.

This place is in the front ten miles, because the pause has been a long time, so Shen Lang just felt the breath of the dog god.

In fact, this is buried in the depths of the Dragon Valley. Apart from the red porpoise, no one came in. There is no clear “road”.

The place just now, that is, the two directions that the Red Dolphin King himself has gone through, if Shen Lang does not carefully check its memory, it may be ignored, but it will be in the right direction.

Just after I arrived, I felt the breath of the dog god, so I didn’t pay much attention to the other direction.

After they left the other “road”, the dog ***** was alone there.

Alpine autumn and snow are not known to snow, here is mainly the danger of the environment, there is no need to be afraid of no toxic smoke. Shen Lang analyzes the intangible and innocent poisonous substance, and the dog ***** can also survive.

So they are relieved to let it stand alone, and as long as they don’t run around, waiting for them to come back will be fine.

The dog ***** was also holding this idea.

Afterwards, I felt the front, and there was a feeling of inexplicable summoning!

As if there is something, it is attracting and summoning it to go deeper.

It is a sacred behemoth, or it is wise and sensible. I think this is a bit wrong.

But there is still a sense of drive from the heart, so it wants to go in and explore.

It analyzed it and thought that Shen Lang may be one of these two directions. If they find the Shen Lang and come back without seeing it, they will definitely come forward.

If they don't find a deep wave, then it should be able to find a deep wave.

This analysis may also be said to be a reason for finding yourself. Finally, it is decided to explore a section of the road first, and whether or not there is anything, it will be returned.

Then it came to ten miles away.

After arriving here, the feeling of calling it is even stronger, but it is also more vigilant.

There is no living thing in this place, what would it be to summon it?

But this feeling plagued him, entangled it, and made it difficult to return.

The result was a while here, and I felt more and more wrong, but more and more I wanted to figure out the situation.

Then there was a scene that Shen Lang saw, it became bigger, and here kept the prepared posture of the enemy.

When these were transmitted to Shen Lang, its mood also relaxed a lot.

This young human friend is a person who is deeply convinced As long as there is a deep wave, it seems that there is no problem with all the problems.

The idea has transmitted all of this, so that Shen Lang can quickly understand and understand. There is no need to ask anything about it, and there will be no more internal combustion.

Why is the dog **** here, why is it separated from everyone, and where other people have gone.

These mysteries have already been solved for Shen Lang.

But this is a problem that plagues the dog god, and he has no clue.

Because when he came over, he had already investigated the surroundings and there were no enemies.

The same is true now.

“Since we are converging, it will be fine. Let’s go back and go in another direction and find them a few!”

Shen Lang slowly said that his attention was focused on the dog **** while watching everything around him.

“it is good.”

The dog **** is agreeing, and I want to leave here with Shen Lang.

Its mood has been relaxed a lot and I feel that I can do it.

But when I really want to leave my legs, I feel the deep sense of summoning!

It seems that it is around here, something is deeply attracted to it, summoning it, so that it can not leave.

Shen Lang looked in his eyes and could not help but wonder.

The dog **** is really troubled, and it is attracted to what, this is a strong attraction that has interfered with its consciousness decision.

But it is obvious that it is not clear exactly where it came from, but because of what.

However, Shen Lang has paid special attention to the surrounding area, and has not noticed where there is a strong sense of God.

Even when he passed the sacred reconnaissance, there was no special radioactive material or band signal nearby.
