

First Strong 203

Chapter 203 - Sword

Xie's row of clouds is a spell attack that is separated by distance. From a large category, it is a spell of the wind system. As the name of the martial arts describes, when you are so powerful, you can wave your hand!

On top of this boulder, a few people from Chu's family came up and surrounded Shen Lang. Now two people are working on it. From different angles, they have two swords with sharp swords and quickly stab the sinking waves.

And Xie Tongwen Xie Yunlin two people, in the direction of Chu Yunfei, two people at the same time show the row of clouds, but the tacit understanding from the left and right attacks, a time of rumors, a strong hurricane like the essence of the general sweep of the past.

The spells that Shen Lang knows, of course, are a few of them. However, from the beginning of his cultivation to the present, he has only three months to learn, and he knows more than anyone.

Therefore, he focused on laying the foundation and focusing on the cultivation of the core "Yin and Yang Bozhengzheng". After the foundation is strong, everything is rising. However, in order to protect himself, he gradually practiced the "Da Shou Mi Long Xiang Shen Gong", "King Kong not bad body magic" and "Phantom Meteor Step", etc., to make up the power, defense and speed.

As a result, he has less time to practice other spells. Some spells that don't grow well don't want to practice, and high-level spells require a higher foundation.

This leads to Shen Lang's lack of aggressive offensive spells. And some small spells, the realm of the real world does not need so much practice, can be used, but there is no attack effect.

At the moment, facing five of them, Shen Lang did not have any hands, but chose to use weapons!

In fact, he is also confident that he will kill all five of them, but this forest is too big after all. If someone uses their own life to delay the time, there is still a chance to escape. Once you escape, you must marry him with others.

Compared with Shen Lang, this outsider, other people will certainly be more likely to believe that Xie Tongwen Chu Yunfei them. That would be an enemy of all the dozens, and when they go out, they will be attacked by Xie Xun and others.

So you have to do it, you have to destroy it, you must be fast!

The mind is moving, the sword has not been taken out from the storage ring, and his foot is forced to smash, and with the “phantom meteor step”, the body quickly spurs the sword with Chu Yun!

A sword flies, it contains a sword like a wind and thunder!

Shooting people first shot the horse thief first smashed the king, Chu Yunfei is the core of several people in the Chu family, killing it, the other two people are more likely. And his sudden flight, it is just to avoid the attack of the four of them.

However, the two people in the Chu family reacted very quickly. Seeing the goal to leave, they immediately changed. One of them was to quickly attack the attack, waving the sword to the head of Shen Lang, and the other was chasing after the attempt to break the legs of Shen Lang.

After the two hurricanes of the squadrons lost their goals, they were combined into one, and then together with a more powerful posture, chasing after the waves!

The man was shaking in the air, his hand trembled to the side, and the sword was not directly hit by the sword on the side of the sword.

With the sharpness of the sword, you can completely cut off that soft sword, but he chose to tap, which is a percussion that contains vitality and “Da Shou Mi Long Xiang Shen Gong”!

If the sword is directly cut off, the Chu family, that is, throwing an empty, can continue to attack, or retreat. But now it is different. The great power from the blade is transmitted directly to his arm through the wrist.

Although the indirect conduction will dissipate part of it, the huge force will oscillate through layers, like a wave of attacks, letting his defense fall first, and then smashing his body!

With a whining, the man's body fell out from above the boulder and spit in the air. The soft sword is still soft under the blessing of the spirit, but the sequelae of being hit by the sword is also appearing, broken in the air!

This did not take up a lot of time, just waved the sword, and then continued to stab in front of Chu Yunfei. For the hurricane behind the sword and the row of clouds, he did not care at all, because his speed can be faster than them!

The four of them are attacking, Shen Lang does not know where to take out a sword to counterattack, and Chu Yunfei has no action, which makes Xie Tongwen very unhappy, and even wonder if they want to make their brothers too hard. Fighting the waves, it is good to take a profit.

Chu Yunfei's calm and calm, but also let Shen Lang more sure that he should be killed first!

Just as Shen Lang's sword flew a Chu family and returned to the sword to Chu Yunfei, he found that Chu Yunfei still stood still, but in fact it was manually, and now in his hand, appeared. A large caliber pistol desert eagle!

And it has already opened the insurance button and pulled the trigger!

Shen Lang immediately understood that Chu Yunfei's calm and calm, in fact, is to lure the enemy deeper, has already set up this bureau, and carried a hot weapon, waiting for Shen Lang to close when he killed him unexpectedly.

The bullet is fast enough and the lethality is strong enough, but the bullet needs someone to shoot, and once it goes out, the trajectory is fixed and it won't change and turn. With the strength of all of them, whose speed is not slow. Under a certain distance, it is not too difficult to dodge bullets.

Therefore, Chu Yunfei is only on the side of the line, must be found in the cracks when they are attacked by Shen Lang. The attack by Shen Lang on him is also within the plan.

The closer you are, the more accurate you are, the less time you can do to avoid bullets, and the hit rate will increase!

He used his body to lure the enemy, and the other two children of the Chu family also tried to cover him and create opportunities for him.

When the gunshots were transmitted through the air to everyone's ears, the bullets had already gone out and went straight to the heart of the sinking waves!

The large-caliber bullet of the sand eagle's powerful firepower close-up can penetrate the human body, and even drill a blood hole in the middle of the gun because of high-speed rotation.

Is Shen Lang the peak of the Yuan Dynasty? Still virtual?

Other parts are not bad, once the heart or head shot in close range, it is a dead end!

When it was said that it was too late, Chu Yunfei was shot from Shen Lang, but the bullet was in front of him. It might be a fraction of a second. There was not much time to consider it. All the strains were instinctive.

Shen Lang's body was forcibly reversed, and the sword was not correctly blocked before the bullet!

"Hey—" the bullet hit the unskilled sword, making a harsh metal sound, and trembled.

".....boom!"

Almost at the same time, the second shot that followed was also introduced into everyone's ears. Chu Yunfei was so cautious, of course, not only one shot! There is only one chance, he is a continuous shot...
