

## First Strong 2031

Chapter 2031 - Mad seedling

If Shen Lang just wants to take the dog away, of course, there are ways, such as bringing it into the space of heaven, and then he can leave.

Or take the dog \*\*\*\* directly, use the door of the Three Realms to transfer to the top of the giant bones, and then come back to find them, and will not delay any time.

But he also has a question, what is it that attracts the dog god?

Whether it is attraction or temptation, the current goal is the dog god, and it has no effect on him!

This place, and the origin of the dog god, is impossible to have any connection. That can make it so, there is only one possibility – the attraction of evolution!

For this level of super beast, only let it become more powerful, in order to make it unable to extricate itself.

And now this thing, let the dog \*\*\*\* not aware of it, the way is very high!

“Retreat over there!”

The sudden opening of Shen Lang.

The dog \*\*\*\* was a little surprised, but he still obeyed the arrangement of Shen Lang, and left the 100 meters away in the direction he pointed, that is, the direction he came.

It’s just that, it can still be done. If you really want to turn around, it will make it difficult.

When the dog \*\*\*\* walked away, there was a small shovel in the hands of Shen Lang, and then swiftly swung, and in a moment, he dug a big pit!

“Do you feel stronger? I doubt there is something that will make your evolutionary object attract you!”

Shen Lang directly communicates with consciousness and dog god.

“Yes, it’s stronger.”

The dog \*\*\*\*\* also has such a rough guess, and there are not many things that can attract it.

“Get close to feeling!”

The waves continued to wave, and the big pit had already become 100 meters in diameter and tens of meters deep.

This thing is very useful for digging holes.

This big pit is almost in front of the dog god. It moves forward to the edge of the pit, and then looks at the deep pit, but it is confused.

“There is no stronger underneath. The feeling seems to come from all directions and in all directions.”

There is no more obvious feeling near the close, so that the dog \*\*\*\*\* is a little confused, just really feel more intense?

Shen Lang is a bit speechless.

Originally thought that it could not be found, it may be buried under the ground.

He dug the ground, deep into tens of meters, and the range reached more than 100 meters. If it is really in this area, there should be no more obvious effect.

At this time, Shen Lang monitored the knowledge of the surrounding situation and found a problem!

In the soil behind the dog god, a plant grows out of the ground!

This plant is not big, just a little sprout that just took the head. If the Shenlang is not in full alert, it will be ignored.

The funeral dragon valley is not a bird. No, there are no birds. It is a place where grass is not born. Even if there are occasional plants in a few environments, it is a poisonous grass like fungus grass and fog vine.

What kind of ghost is this seedling?

He immediately put more attention on the poisonous grass, and then asked again.

“Would we still go?”

“.....it is good.”

The dog \*\*\*\* hesitated a bit, but he agreed to it and was ready to leave.

At this time, the little seedling suddenly became crazy and violent, and quickly entangled the legs of the dog god!

The body of the dog \*\*\*\* is getting bigger, and the seedling is too small, and its mind is attracted, and there is no mind to notice its existence.

It has already been attacked at the moment, it only realized that it is wrong, but just discovered that the dogleg has been tied!

At this time, watching the deep waves of it, it has already come out quickly, and his sword arrived one step earlier than his people, directly to the plant that wraps around the dog legs!

With the strength of the dog god, let alone a plant, even if it is a well-known tree demon inside the ruins, it can not withstand one of its lameness.

This does not require Shen Lang to shoot.

But this time is different. The environment of the burial dragon valley is very unusual. The name of the murderous land is not called by ordinary people.

Besides, it is very unusual to just influence the dog god's mind and see this unknown existence.

Now I dig a hundred feet and I have not found any abnormality. The only thing is this seedling.

Shen Lang is monitoring it, deliberately talking to the dog god, expressing his desire to go, and preparing to see if it will react.

If it is purely because of the excavation of a small shovel, it is entirely possible to break the soil with a poisonous grass that is already coming out.

But it can quickly grow, and the crazy roll to the foot of the dog \*\*\*\*\* is not normal, this is a dangerous existence!

Therefore, Shen Lang not only rushed in quickly, but also used the sword of the king to kill the past!

Seedlings... No, it can't be called a seedling. It has become a large plant of vines that can wrap around the dog's legs.

It also seems to be very psychic, feeling the power of the sword of the king, moving quickly!

But what Shen Lang and the dog \*\*\*\*\* did not think is that it is the root!

Just like the tree demon that I encountered before Shen Lang, it is the branches and leaves that can move. The roots cannot move. It just can't be moved, unless it's time to escape.

A sword like this has come over, and the normal reaction should be these root vines, shrinking to the roots to avoid being cut off.

But just now it is from the place where the seedlings are heading, pull up directly and quickly, and go under the dogleg!

The speed is very fast and will avoid the sword of the king.

But now the sword of the king and the sinking waves that followed, not only did not separate it from the dog god, but it went below the dog god.

Originally wrapped around the hind legs of the dog god, now is a large number of root vines, like a spider web, spread quickly, the dog's front legs, abdomen, all covered!

The dog \*\*\*\*\* seems to be affected more mentally, and has been dull.

But Shen Lang saw it really, and the roots that were tied to the dog's legs were not only deeply trapped like steel wires, but there was already a blackout around them!

Look at its other reactions, Shen Lang has understood how this is going on!

This is a fine poisonous grass!

This poisonous grass does not know what it is, nor how many years she has experienced, but it is definitely very unusual.

It is already intelligent, and it is not willing to be a poisonous grass, but wants to have another form of life!

The appearance of the dog god, let it find the target, perhaps through the form of poisoning, affecting its mind, attracting it, the purpose is to find opportunities, to give the dog God!

Its purpose is to enter the body of the dog god!

If it is really for this purpose, why did the previous porpoises have not been encountered for thousands of years?

Is it because there are so many poisonous cigarettes today?

Those poisonous cigarettes were somewhere on the ground. It was the source of its energy. It was unintentionally touched by the Red Dolphin King. It was released in a large area, so did it choose other ways?

Chapter 2032 - Poisonous grass

Shen Lang didn't care much about the analysis at this time. Looking at the dog god, it has been slow to take a shot, and now the poisonous grass has reached below it, drilling into it.

Once you have completely entered the body of the dog god, it is very difficult to expel it, and it is very likely to hurt the life of the dog.

At this moment, the sword of the king is not used, and even if it is sharp, it can't go to the belly of the dog god.

When dealing with thieves, the plant spells, under the burning of the heart fire, are very amazing effects.

But this time, I don't know if I can get it out of my heart. Even if I have time, I can't let it go under the dog god. With its power, I can't directly grill the dog god...

These thoughts of Shen Lang don't need to be carefully considered, and they have already made the choice according to the best plan!

He just landed, already behind the dog god, and at this moment the palm is stuck on the dog's lap.

Thunder and lightning come out directly from his palm!

This is not to summon Lei Yuan to shoot, it is his own power of lightning.

This is not an ordinary thunder, it is absorbed in the chaotic space minefield, the power is not as good as Leiyuan, but for others, it is no small feat.

Such a lightning strike will naturally hurt the dog god, but not much.

Under the precise control of Shenlang, the thunder and lightning are in the place where the poisonous grass roots vines touch the body of the dog god, and they are critted in the past!

The strong lightning strike directly caused many root vines to fly out, but the poisonous grass did not completely fall off, and some of them were still stubbornly adsorbed, which was also absorbed more deeply, and caught the flesh inside. So it didn't fall off.

However, Shen Lang's move is not only a heavy blow to poisonous grass, but also a wake-up process for dog gods!

The dog \*\*\*\*\* was affected by the poisonous grass, and the mind was slowed down a lot. When it was just adsorbed and invaded, it was too late to resist.

But now that the electric shock of the Thunder of Shen Lang, the acidity makes it wake up.

In fact, the state just now, it is also clear, but all aspects are dull a little bit, just a little bit, it falls into the wind.

Now, after the thunder and lightning, although it is still stinging and paralyzed, but after the consciousness is clear, immediately strengthen the defense to the highest level!

The emperor's beast has evolved to the present, and the thickness of the epidermis is the defensive and extremely fierce beast of the armored red dragon. It is also incomparable.

Under its deliberate full defense, from the epidermis to the inside, each layer is far better than steel!

This defense is to make the poisonous grass more difficult to invade its body, but still passive.

The dog \*\*\*\*\* has also realized that this does not know what the ghost thing is, and wants to invade its body. Therefore, while defending, it is also a quick stomping vibration, and it should be taken off.

At first glance, this is a simple lame, done by the shaking of the body.

But this poisonous grass can quickly erode and penetrate its flesh, and naturally it can be driven away by shaking.

So this lame is actually a whole body resonance!

As the dominant behemoth of the behemoth world, the dog \*\*\*\*\* certainly does not only rely on the head and brute force, it also has many unique means.

It is only a few thousand years of cultivation, plus the advantages of the body, let it deal with the Daxian level, only need a slap to get it, for the same big realm, most of the time can be directly torn.

Another one, as its behemoth instinct, is also a simple and rude way.

But it does not mean that it has no other skills, just like this, this surface of the shock, it has actually let its body inside and outside the high-frequency resonance, directly emitting a layer of shock waves!

The hair on the surface of the body, at that moment, became like a sharp arrow of steel!

Under the strong resonance, it is like a bullet rain, and it is cleaned up once on the body surface!

After the thunderstorm attack, the poisonous grass bounced off a large part, but still attached tightly, and immediately began the second wave of invasion.

This time, it did not emit a lot of root vines, but all the tentacles that were shocked and wounded, all collected, just continue to go deep into the roots that are still attached!

It has just begun to appear. It is a form of a small seedling. The more roots appear, the faster the invasion is, the stronger the control is, but the smaller the reduction, the more flexible and more concealed.

It is also very fast and adaptable.

If it is re-adhered to the roots, it will be blocked by the dog's defense and tremors, and it will be brushed by a large number of steel thorns, but those who have already penetrated into the flesh are difficult!

These are even the lightning waves of Shen Lang have not been shot down, can be seen deep and hooked, and now it is further in-depth, at most the speed is slightly delayed, it is not easy to force out.

When I said that it was too late, I just finished the thunderstorm attack and found that I hadn't got the poisonous grass yet. I immediately sent a message to the dog \*\*\*\*\* to make it bigger!

The dog \*\*\*\*\* has no doubt about the arrangement of Shenlang, and at this time it has no time to think about it, just do it directly.

At the moment, the dog \*\*\*\*\* at the same time of resonance, the body is also getting bigger quickly!

Poisonous grass is like a net open to the dog's legs and abdomen. When the body of the dog \*\*\*\*\* grows rapidly, it forms a problem, and the wounds that have penetrated are also getting bigger.

The wound becomes bigger, which is good for poisonous grass and can be better invaded.

But suddenly it became bigger, but it was the root vine that was originally tightly adsorbed, and it became hollow. When it failed to grow up in the same proportion, it immediately fell off!

Since Shen Lang made arrangements, of course, he is ready to respond.

When the dog \*\*\*\*\* quickly became bigger and the poisonous grass temporarily fell off, he had already released the celestial net from Cui or there.

The poisonous grass is very fast, and it is going to follow a larger wound and quickly invade. As a result, it is a solid network.

It is very different from ordinary people and beasts. It has a large number of root vines sticking out. Even if the small is tied, there are still many leaks. It is still going to the dog god. Drilled in the past.

Since the network is a network, it is naturally a loophole!

However, this magic weapon has an intelligence, that is, the more the goal of helping is to resist, the more it will strengthen the imprisonment.

This kind of imprisonment is twofold. One weight is to tighten the external shape, and the other one is to prohibit the use of vitality.

Although the poisonous grass is different in all aspects, the essence is similar, and it is also banned.

Even if the tentacles are still struggling, it will greatly limit the scope and speed of its activities.

Chapter 2033 - Dog \*\*\*\*\* poisoning

The dog god's previous reaction was slow, because it was fascinated by the toxicity of this poisonous grass. After the lightning strike, it was already awake.

Later, it is also full of resistance and defense. It needs to help the waves. It can only be said that its experience and reaction are not rich enough.

But once it has an advantage, it can still be grasped immediately.

Shen Lang makes it bigger. It does not say anything, and it directly becomes obedient, without first considering why it should be done.

However, in the process of getting bigger, it is also the understanding and feeling of the requirements of Shen Lang.

The result was that when the poisonous grass was felt to fall, the dog \*\*\*\*\* immediately leaped and quickly narrowed the body.

So, it went to the other side of the big pit.

The poisonous grass that was \*\*\*\*\* by the celestial net, and then struggling again, the speed is much slower, and it is already difficult to invade the body of the dog god.

Shen Lang immediately controlled a large area around him and blocked it with the field, so that the poisonous grass would not escape.

The Tianluo network and the double blockade of the field made it difficult for the poisonous grass to struggle.

Shen Lang is thinking about it, how to deal with this stuff?

What is this thing in the end, is it a poisonous grass, or is it called a demon?

In addition to being sure to be removed, and not to mention whether it will hurt the later generations, will you find a chance to win other monks who come in, just before it has a little bit of the dog god, at least let the dog gods die It is impossible to let it go.

But after all, this is the only living thing I saw in the burial dragon valley!

Even before Shen Lang encountered the dragon and the ancient people, but it is the soul of the gods who are attached to the sword, their entities have been dead for tens of thousands of years.

They also have the opportunity to be a living creature, but they cannot be considered a living thing until they succeed.

And this poisonous grass is itself a living thing. What it wants is just an upgrade, from the “plant” body to the “animal” body.

The dog \*\*\*\* will not be its ultimate goal. If there is a chance, it will become a person, or other race.

This unique uniqueness makes Shen Lang want to pass through it and learn about the situation of the funeral valley.

But the toxicity of this thing makes Shen Lang not dare to be contaminated, and the plant properties may not be able to read its memory.

Strictly speaking, it may still be awkward, and there may not be any memory.

Even if you can't get some information from it, it's a reward to be able to make it into a drug.

just.....

This is a big poisonous grass, the medicine that is refining, it must be a super poison!

The poisonous grasses such as the funeral grasses and the fog-and-vines that the red porpoises brought out here are basically \*\*\*\*\* and sold out. Generally, no one wants them.

Needless to say, this poisonous grass, if it is sucked into the tower of the tower, it should be refining, and even the effect will not be bad.

But not only the effect of its refining, but also the absorption of such as Cui or they, together. Finally, the refining of the medicinal herbs, Shen Lang may not be able to hold back.

This can be used to pit people, but who can eat without warning?

So at this moment, Shen Lang feels very tasteless, and it is a pity to eat without meat.

“What is this ghost thing...”

Hearing the shiver of the dog god, Shen Lang looked at it.

“How are you.....”

After the words have not been finished, Shen Lang stared at the dog \*\*\*\*\* with surprise.

The dog god's current body has shrunk, just like the size of a horse in the face of a deep wave mount, which makes Shen Lang a good observation.

It was already dark in the legs that were entangled in the poisonous grass, especially the hind legs that were first wrapped around!

The abdomen should be the same, those pierced into the flesh, even if the back is forced out, but the toxicity has been contaminated into its body.

“It’s a bit wrong, you should be able to live.”

The dog \*\*\*\*\* is naturally in the silent movement of the poison, for its body, this injury is nothing at all, just like the needle.

The key is poison!

However, in its realm, this toxicity is expected to be a trivial matter.

Shen Lang is a dark frown.

If it is really not very toxic, it should not be obvious that the black dog will not be able to use it, and it should be “should”.

It can be seen that it is now barely supporting, when can it be solved, and it has not yet been determined.

Now I have a quick analysis in my mind.

For such a situation, of course, the best is to have an antidote, and you can quickly retreat after taking it.

But in fact, even on the earth, “antidote” is nothing more than an imaginary item.

The danger of poison is its destruction of the body.

The so-called “detoxification” is to expel and decompose the poisonous oath in various ways. On the premise of not continuing to destroy, the treatment of recovery will be carried out for the damage suffered.

Some medicines are highly toxic, and then another kind of antidote, and rapid recovery, it only exists in film and television.

Of course, it is also possible to call another drug that has the effect of repelling toxins as an antidote.

But here, nature is impossible.

In this burial dragon valley, only poison is produced. This poisonous grass has become refined.

As an object that makes toxins, it does not detoxify itself. It is still so primitive, and it is impossible to study the “antidote” against itself.

Just like the fire of the earth, you can set fire, you can absorb the flame, but you will not make water to extinguish the fire.

and many more!

When I thought of it, Shen Lang’s eyes lit up.

Earth fire does not make water to extinguish fire, but it can be extinguished by absorbing the fire.

This poisonous grass does not make an antidote, but can it absorb the toxins?

As long as it can absorb the toxins, it will achieve the effect of understanding the poison, and the remaining injuries will be restored. This dog \*\*\*\*\* is nothing.

This idea is still feasible, but after pondering, Shen Lang hesitated.

The same is true for the fire of the earth It must be controllable!

He set fire, or he wants to save the fire, can be done through the heart of the fire. But what if it is an enemy? Putting the fire of the earth out is not to absorb the flame, but to add a fire. Isn't the damage worse?

Now this poisonous grass is not controllable. If it is allowed to absorb the antidote of the dog god, and does not say whether it can take the opportunity to invade the body of the dog god, they are not as good as it is in the use of poison.

If it absorbs toxins, the result is a dark release of more toxins?

It should be easy to control what concentration of toxins, time of onset, etc. The result seems to have alleviated the situation on the surface, but actually it has lurked more intense toxins...

In that case, it is not to help the dog god, but it may harm it!

And this creature, even if you hold its life, can't say that it can control it.

After thinking for a moment, Shen Lang has already made a decision.

Chapter 2034 - Crush

Shen Lang's idea is to put the dog \*\*\*\*\* into the space of the heavenly book and give it more time to slowly heal the poison.

With its current realm, even if the toxicity is severe, it is really necessary to directly poison it. Shenlang is not convinced.

The biggest harm is that the damage is very big, the injury is very heavy, it takes a long time to get rid of the toxins, and then the recovery needs more supplies and more time.

In this case, then everything is not a problem, Tianshu space can solve the problem of time, Shenlang has the resources to make up for its loss.

Slower, a little bit more painful, but reliable.

This poisonous grass can't be controlled, can't believe it.

But he also has a problem now, that is how to deal with the problem of this poisonous grass.

Now it is tied to it with the Tianluo network, and with the ban on the field of Shenlang, basically it is impossible to escape, and it can continue to suppress.

But if he enters the space of the Bible, even if it is only a moment to come back, it will be isolated from the network. His field will also disappear.

With the shackles and speeds that the poisonous grass showed before, it only takes a moment to get it to escape quickly.

If you get deeper into the ground, Shen Lang will be very passive. Can't he turn over the funeral valley?

However, Shen Lang still has a decision immediately.

Since the poison of the dog \*\*\*\*\* is not too late, then don't be a chicken rib. Let's kill it first!

The sword of the king appeared in his hand, and then the sword swayed, and immediately surrounded by a ball, the poisonous grass wrapped in the sky.

The tentacles vines struggling outside the snare are completely cut off!

With this preparation, this was collected.

Without the double imprisonment of the field and the celestial net, the poisonous grass immediately began to flee!

The confrontation just now, let it know that the enemy encountered is not simple, so this time did not launch an attack, but quickly shrink, become a small seedling, and then smashed away!

But it immediately found out that something was wrong.

The reason why Shen Lang uses a large encirclement is because it has more vines, and the scope of the sway is relatively large, and it must be comprehensively defended.

But now that it has become a seedling, its goal is even smaller and it can escape better. Can be on the attack side, but also the target is small, the sword hood can quickly close.

The same sword air, the larger the range of support, the thinner the nature, the smaller the scope of the cover, the greater the power.

No one has said this poisonous grass, and it has no experience in this area, but its level is already very high, and some things can be felt very quickly, and they are inferior.

After discovering this, it quickly retreated, without hitting the sword hood in front, and was directly strangled.

At the same time, it broke out countless roots again!

This is to get back the passive space that has just been lost. The bigger the space, the more possibilities, the smaller the easier it is to be smashed.

With so many roots, you can explore the attack from all angles in all directions. As long as one goes out, it can leave the whole body along that one.

Unfortunately, the enemy it faces is Shen Lang!

Any situation in Shenlang will take into account the situation after a few steps, and there are corresponding countermeasures for any changes.

This change of poisonous grass makes Shen Lang not only Jianqi, but people have already held the sword of the king to the vicinity.

The roots of those frantic surgings were cut off in a piece by piece. Shen Lang used the sword of the king and did not give it a chance.

Seeing that the roots are constantly decreasing, it is also very depressing for the poisonous grass.

According to instinct, it should also be retracted to the roots.

But now it is under the encirclement of others. If you retract, the encirclement will shrink faster, and at that time it will have no space to escape.

“Let me!”

“What are you doing?”

At this time, Shen Lang felt two thoughts.

Undoubtedly, this is from this poisonous grass. When it is found that it is no longer able to escape, it tries to communicate with the powerful enemy of Shen Lang.

Why have you gone early?

Shen Lang is trying to destroy it and not communicate with it.

Because the dog \*\*\*\*\* has been poisoned very deeply, this is different from being attacked and attempting to win. This is already true.

However, Shen Lang is still one of the swords!

He has just formed an encirclement with a sword, and once he touches the encirclement, he will be cut off.

Now this little change is to make a completely spherical encirclement, and there is a little flaw.

Although this flaw, but a little bit of a crack in the angle, just did not keep up, the next moment will naturally make up.

But the poisonous grass has already waited for this opportunity!

Its active communication, in addition to showing weakness, is also looking for opportunities.

Now the other side has a flaw, that is, it has to seize the fleeting opportunity!

At that moment, the nearest root of the poisonous grass was cracked and the nearest root was immediately explored and not cut off!

Then, its body suddenly shrank, and the other roots were collected, and the whole roots were then flown out.

Although the poisonous grass does not understand the specific expressions and claims, its consciousness is very clear.

This is to race against time, as long as you ran, you may be able to escape away.

In fact, it has already run out of a wave before.

The sword that Shen Lang took over, if it was too late, the tentacles that entangled the dog \*\*\*\*\* were directly cut off. If it is taken back, it will also be isolated.

The result is that it allows the body to reach the roots, not only to escape the speed, but also to isolate.

Now this time, it can be regarded as the same, if you can go out along the nearest root, you will win!

But this time, Shen Lang is already prepared, and can you make it succeed again?

It's not just preparation, just the flaw of the meal, the crack in the sword hood, that is, he intentionally, it is trapped waiting for it!

Therefore, this time, the Shenlang is the fastest, and it is the best for all the points.

After the roots have to go out, he did not pay attention, regardless of whether the roots are to fall to the ground or something.

He is waiting for the main body of poisonous grass!

When its body walks through the crack, it is no longer a sword, and the sword of the king is directly in time!

In the twinkling of an eye, that poisonous grass was smashed with a strong one!

The domineering degree of the sword of the king is really unbreakable. The power is not limited to the point touched by the blade, but one piece is shrouded.

It is under this sword, no matter how much the poisonous grass is now reduced, it is all smashed!

The main body has been smashed, and those remaining roots have also landed in an instant.

The whole process is for this sword. It seems to be simple. In fact, it is very difficult. Shen Lang is also full of attention, and there is no deviation of microseconds.

Chapter 2035 - 1 seed

A small poisonous grass is more difficult than humans and beasts. Shenlang is also working together in all aspects to solve it.

After the fall of a sword, he still dare not care, the sword of the king is ready to make up a sword.

Just a sword, not just a cut, is the complete destruction of the whole poisonous grass, almost all the broken after landing.

However, Shen Lang still saw that there is one thing.

This landed on the ground, but it was quietly drilling into the mud!

a seed.

This poisonous grass has just been completely destroyed, but it has also fallen into a kernel seed.

It can grow to this extent, far better than the general poisonous grass, it should be the difference of this seed.

The destruction of a sword just now is to abolish it. But as long as this seed is still there, there is still a chance to absorb the ability slowly, slowly re-gerrowing and rooting, and grow back with thousands of years and tens of thousands of years!

As soon as Shen Lang's hand was lifted, the seed had been sucked up.

He did not directly touch it. When he stared in front of him, he also maintained a high degree of vigilance, and blocked it from being surrounded.

The speed of this poisonous grass was too fast. If you rushed directly to his face, it would not be so good.

After some observation, I feel that it has no spirituality, just like a seed.

However, before landing, it will instinctively drill into the land, naturally not so simple.

The dog \*\*\*\* also followed.

“This is what the thing left behind. A sword still keeps on it, it seems that it has been wiped out.”

Seeing the look of the dog god, Shen Lang is more and more wanting to wipe it out.

“Wait a minute... this thing...”

The dog \*\*\*\* hesitated.

“I will eat it, will there be detoxification effect?”

Shen Lang looked at it with suspicion.

“Your brain is broken? It just wants to enter your body, it is to occupy your body. Now that you are poisoned, you have to eat this kind of child, can’t you just wait for it?”

The dog \*\*\*\*\* couldn’t help but smash it up. It is very bad now. Just if it wasn’t for the help of Shen Lang, it really went.

Can’t beat the bright god, that is the strength of others is high, there is no need to say.

But now it is occupied by a poisonous weed plant. It is really a loss of face. Shen Lang is now really able to criticize it.

But it still persists.

“I think that what attracted me before is probably this seed!”

Shen Lang frowned.

Obviously, it was the poisonous grass that attracted the dog god. It released the toxins ten miles away and should not be a problem.

When it was forced to show its shape, it was obvious that the toxin affected the play of the dog god, and it gave it a chance.

Now it still feels like this kind of child has attracted it!

The dog \*\*\*\*\* also understands the meaning of Shen Lang, waiting for him to say, continue to add.

“When I came over, I felt that something attracted me strongly. But when it broke out, it was not so strong. After you broke it, I felt it strongly. It is this kind of child.”

Shen Lang could not help but sigh, it is the Emperor of the Emperor, is the master of the world of giant beasts.

At the beginning, he flicked out others, and now even if he has the strength to fight against the Emperor, but there is still some respect.

“Do you have any confidence in it? Now your toxicity is still invaded from the flesh, and there is a chance to clear it. If you swallow it, it will be absorbed directly into the stomach, into the organs, through the blood, and spread to the whole body.”

Shen Lang changed to the tone of persuasion, and emphasized the extent of this hazard with it again.

The dog \*\*\*\*\* also understands that the benefits of Shen Lang will not forget it, and never give it to it. This thing is naturally afraid that it can't stand it.

“I want to try it. If I don't try it, I won't be reconciled. If I can't stand it, I will spit it out. It will only be injured at most. I won't be hard.”

Shen Lang nodded.

The dog \*\*\*\*\* has already said this, and he is not good at fighting its confidence.

With the toxicity of this poisonous grass, this should be the seed of the highly toxic core. It is really necessary to swallow and absorb it, but it can be solved without spitting.

Seeing that Shen Lang is like this, the dog \*\*\*\*\* takes a mouth and \*\*\*\*\* the seeds in front of him and directly swallows it into the belly.

This is something that attracts it ten miles away. It is something that makes it subconsciously difficult to leave. This is finally the wish.

“I sent you there, you have a good job. By yourself!”

After Shen Lang finished, he took the dog \*\*\*\*\* into the space of Tianshu.

Then I left it with some fruit, medicinal herbs, but these will not have much effect. Still leaving the spirit and some spirituality.

How the specific dog \*\*\*\*\* refines that kind of child, how to poison, can only see its own.

Shen Lang is now giving it two of the biggest help – plenty of time, plenty of resources.

After doing this, Shen Lang did not leave immediately, but kept it for a few days!

When he was in the holy place of Yungong, he went in and was injured. The dog \*\*\*\*\* was indigested by all the vitality and let him recover as quickly as possible.

Now the same is true for Shen Lang. He doesn't understand how the behemoth works. He doesn't dare to break hands, but he is quietly guarding.

In case it can not withstand the highly toxic phenomenon, he can also help.

A few days later, Shen Lang felt that the breath of the dog \*\*\*\*\* had stabilized. Although he did not communicate with him, he could feel that his consciousness was busy, but he also felt that he was changing in a good direction.

This makes Shen Lang feel relieved.

A few days have passed, if that kind of really is the poison that will make it through the intestines, there will be symptoms.

The current situation seems to be a harmonious development, perhaps just a spiritual thing that can make the dog \*\*\*\*\* evolve.

Since this is the case, Shen Lang will not worry, as long as it gives it enough time to completely refine and absorb this thing, the poison of the body will slowly be expelled.

This is in the funeral dragon valley, and they have not found them in the cold autumn, the left-behind dog \*\*\*\*\* has disappeared, and the Shenlang can not disappear for too long.

Going back to time is only an hour or so.

Everything outside is as usual, the big pit he dug out is still there, and there are traces of a brief battle with poisonous grass.

If they return from another direction in the cold autumn, and then pass through here, they should also find something wrong with this fresh trace. If you stay here, you should leave clues.

But that is only speculation, Shen Lang still depends on “evidence.”

Before entering the space, the Holy Grail released a miniature detector, now take it back, and look at the records received to see what happened in the past hour.

In the cold autumn, they came here, thinking that the dog \*\*\*\*\* and him had an attack, and then chased it out, and it was possible to leave clues.

Fast forward to look at the record of this hour, the result is about half an hour or so, I saw a scene that shocked Shen Lang!

Chapter 2036 - resurrection!

According to the inference of Shen Lang, combined with the situation on the spot, in the past hour, they have not come over in the cold autumn.

He looked at all the records, just wanted to confirm, but also fast forward, just a form.

However, there are really situations, and there is no such thing as I can imagine!

It's not the cold autumn, they have no other red porpoises, it's a dragon!

The dragon family, in the ancient war, has been completely eliminated. This is not a legendary problem, but a fact.

If they are still alive, they will certainly not be willing to bury the Dragon Valley!

Even if the seal was very strong, in the last few thousand years, there will be a hot porpoise, and the gantry is here.

Powerful like a dragon, can you be as good as a red porpoise? Or will it not work on the Dragon Gate? Manipulating them?

So all this has proved that the Dragon Valley is a place of death.

The memory of the Red Dolphin King also proves this.

The \*\*\*\* of the dragon and the strong man of the human power that was encountered before Shen Lang also proved this point.

Because of this, he just guessed that it was only in the cold autumn that they would have already looked for the past, and at most there would be other poisonous grasses.

I didn't think of it, there would be a dragon coming out!

What is even more incredible is that this one is actually crawling out of the big pit he just dug up!

This is not a big pit. It was Shen Lang who dug in order to find something to attract the dog god. Then the poisonous grass sneaked in the way of seedlings.

But now, I have a dragon from here!

It is already an incredible situation to have a living dragon in the Dragon Valley. It's even more impossible to dig a hole and dig it up. It's too unscientific, it's too coincidental.

Since it is not so coincidental, there are inevitable factors!

Why is there no place to breed such a ferocious and powerful poisonous grass? Explain that the environment of this film is still very unusual.

That dragon, whether it is resurrection or embers, should be related to the environment!

When Shen Lang saw this scene, there were a lot of emotions and analysis in his mind.

But he did not stop to think about it, but let the holy armor cut this section back to normal speed and read it completely.

This dragon is not too big, about twenty or thirty meters, smaller than the bones seen along the way.

It drilled out of the pit and climbed up to the ground, then left in the forward direction until it exceeded the detector's record range.

Until he came back, the picture did not appear again.

Shen Lang immediately adjusted the angle, and made a close-up of all aspects of the dragon.

At this moment, his incredible emotions have been put down and calm, and he can carefully observe the body of the dragon.

This dragon is not the same as seen in this burial dragon valley.

Whether it is the broken along the way, or Shen Lang experienced the complete magic dragon bone, are the remaining bones.

The demon dragon that just came out from here has a different body!

Although it is not in a good state, it is more dirty, and the layers of nerves and blood.

Compared with other skeletons, this is more like a muscle model for teaching.

In addition to the muscles wrapped inside the viscera, there is no outer epidermis, and there are no more nerves, blood vessels, fats, etc. between flesh and blood.

It's just like this situation, it looks even more horrible than other bones!

Repeatedly read it several times, including zooming in and out at different angles, so that Shen Lang has a general understanding of this thing.

Unlike other dragons and skeletons, this thing is really \*\*\*\*\* and fleshy. From the point of view, it should be a demon dragon, just syngenetic.

Compared with the remaining embers, Shen Lang is more inclined to resurrect!

Because there are at least tens of thousands of years, if there are survivors, there should be movements in the early days, and they will develop from generation to generation.

And if there is only a single residue that cannot be paired and multiplied, then it should have died long ago.

So this is not a big possibility.

As for the resurrection, of course, it is not the resurrection of the bones, but because of the particularity of certain environments and conditions, it has led to some preservation and change, and finally reached the resurrection when there is an opportunity.

Just like the situation he had encountered before, the soul \*\*\*\*\* of the one person and one dragon is attached to the Excalibur and is also trapped in it.

After tens of thousands of years, his touch today is the opportunity of the other side.

If it is not strong enough, and with the help of Leiyuan, it will be won by them. No matter who succeeds, it is a kind of “resurrection”!

They are the body that has long been corrupted, and it is the soul that is preserved.

But this demon dragon may have been buried here, but it may also be due to certain conditions and environmental factors, causing the soul to adhere to what, and there is no silence.

Its body may also be corrupted to a much slower extent than other similar species.

After a long period of time, its memory may have recovered, and began to use the advantages of the environment consciously, so that the remaining body that has not been completely corrupted is cultivated and repaired.

It has gone through countless long years, making it gradually become like this.

Maybe it is like this now, it is already alive. It is also possible that it will continue, and it will be able to repair the flesh and slowly become the original look.

All these speculations are based on this piece of environment, with great specialities.

Whether it is to instill life and wisdom, or to resurrect the corrupted muscles and blood, this is extremely unacceptable.

Of course, they can achieve this, and it has been a long time after tens of thousands of years.

Now that this step has been inferred, even if it is wrong, Shen Lang will try it.

Would rather be wrong, can't miss it!

The shovel appeared again in his hand, and then began to dig deeper with the big pit that had just been dug up!

This special excavation magic weapon, combined with the strength of the Shenlang Great God realm, the whole process is very powerful.

It didn't take long for this relatively flat area had already dug a big deep pit, and the excavated mud piled up on both sides, as if the mountain valley was made out of thin air.

After a while, Shen Lang stopped.

It's already so deep, there are no special situations, and it's not a way to continue.

Since the dog \*\*\*\*\* can only sense that there is an abnormality here and has a deep instinct to attract it, can he try to sense it?

The existence of such a big role, it is not possible to be the entire environment, but something special in the nearby small environment.

Shen Lang once again took out the green hillstone.

I have tried to sense the traces that others have experienced before. It is difficult to sense in the depths of this burial dragon valley. Now he is going to take advantage of the green hillstones to see if he can see what the baby is.

Chapter 2037 - Huge surprise

The green hillstone is still very mysterious and complicated, and the Shenlang is not smashed. I only knew that I could see the illusion before, and from the use of Bai Yu, I realized that the effect of restoring the residual image is also very good for the past.

Now he is using the green pebbles to see if he can see the surrounding environment.

This is also a no-brainer, because Shen Lang himself has actually been inductive, but can not feel any special existence. At this moment, I can't pull the dog \*\*\*\*\* out again and try it out. I can only try it.

When the Qingqiu stone was in the hand, Shen Lang also immersed himself in it, and the world around him seemed to change rapidly.

Shen Lang clarifies his mind, letting himself not be biased, not thinking about irrelevant things, but focusing on putting everything on the surrounding environment.

This sense of enlightenment, the surrounding situation, once again changed.

He began to have a feeling of penetrating everything, as if the surrounding earth and dust, including the earth, seemed to be clear and transparent.

According to Shen Lang's thoughts, it is a kind of temptation to first understand the surrounding situation. If you can, then search down one layer at a time.

Just now he excavated a deep valley, but it was only about a kilometer.

If there are any good things, it is possible to go underground in the tens of thousands of meters.

However, at this moment in the “perspective” general state, he actually found some abnormalities in the mountains nearby!

This anomaly is also unclear. It can only be said that when everything is transparently seen, there is a large piece of something that cannot be seen through.

Shen Lang could not help but smash.

This mountain peak is not the original mountain. It is actually the mountain peak that he had just carved out of the deep pit!

If there is something in it, isn't that... something has already been dug up?

This is no wonder that he is careless, because he himself is not sensed, and the small shovel is a very powerful magic weapon, a digging is a large piece, and can not be carefully searched one by one.

In combination with the previous “poisonous grass” and the resurrection dragon, it seems that they are not deep. Perhaps the dog \*\*\*\*\* feels that this is not necessarily the case.

Shen Lang immediately determined where it was, and then dig a shovel.

This time it was targeted, the goal was very clear, and a small piece of mud was quickly dug out.

Others are above the mountain, and with the shaking, different soils are falling, revealing something that was previously ignored in the large soil.

It seems to be a liquid liquid in a pool of water. It falls on the ground and will penetrate into the soil, but it will not merge with the soil.

It may have been stuck in a place for a long time. The small shovel picks up a lot of dirt around it, so it does not affect its flow.

Now look at it to penetrate below, the sinking waves immediately with the soil, all together in the air, and then cleaned up the soil, watching the magical liquid flowing in the air.

After observing for a while, he vaguely had a rough guess!

This is most likely the “Essence of Heaven and Earth” that appeared after the break of the Cloud Palace Holy Land. It is a kind of substance!

This kind of substance is the true essence of heaven and earth!

Can the poisonous grass breed the ingenuity, can make the carrion regenerate and resurrect the bones, isn't it the purest and most powerful essence of the heavens and the earth?

Of course, that's just a name. It's not necessarily the same class. To change a scientific point is a mysterious magical energy in the universe.

With this conjecture, Shen Lang is much more excited.

Originally, he had already gained something and went deep in, just to find them in the cold autumn. Will be diverted over here, is the feeling of the dog god.

The result is that the dog \*\*\*\*\* is injured, but fortunately there is no commandment.

But when he came back, he did not expect any gains.

At this moment, you can get the essence of the world of such a big beach, it is really a huge harvest.

After all, before in the Yungong Holy Land, then a little bit of the essence of the heavens and the earth is a monster that has to finish a whole floor of a huge building. It will only be there before the passage.

It is also very flexible and fleeting. When the tornado or suffocating gas appears, the entrance is transmitted to the holy place of the Cloud Palace in the mountain, waiting to disappear, the essence of heaven and earth will appear.

Usually not captured, will also leave immediately.

Although Shen Lang has not officially used the gadget, it is definitely a good thing to be sure.

Now this number is more than a hundred times!

just.....

Why are these heavenly essences so honest?

The preliminary analysis of Shen Lang, the essence of heaven and earth in the Yungong Holy Land, is manipulated by some rules of the Yungong Holy Land, similar to the artificial stocking there, and it is clear that he will become the target of hunting, with its spirituality. So I will escape.

However, the essence of heaven and earth here may be the special environment of this burial dragon valley. It has been nurtured for millions of years and thousands of years. It has not flowed by itself and has not been interfered by others.

Benefiting from it, it may be just a poisonous grass next to it, above it, a dragon that is buried here.

So it may not be aware of danger at all, right?

In any case, Shen Lang has attached great importance to it and first collected it.

This is to put it into the same storage space as the world essence.

This is also intentional, and Shen Lang immediately observed it carefully.

In the storage space, the essence of the world that I got before, I felt the new big beach.

This seems to immediately form a strong attraction for them!

But those essences of the heavens and the earth are very fearful and want to resist the escape.

Only the storage space has a limited environment. In the end, they are like large magnets, and they are absorbed by the past.

For the essence of the heavens and the earth of this beach, it seems that there is no active consciousness to annex the other party, which is completely natural attraction.

The result is like a few drops of water, blended into a pool of water, completely integrated, no longer independent.

Observed these, Shen Lang is completely relieved.

Whether they are honest or awkward, they are the same substance, and they are definitely good things!

After confirming Shen Lang told myself not to be greedy, but still could not help but continue to use the green hillstone, for the depths of the neighborhood, carefully explore again.

I have gotten so many world essences, of course, there can be more. If there are still countless numbers below, you may not have to wait until now. There are more poisonous grass touches and the dragons are resurrected.

This is already a huge windfall, no more, and Shen Lang is not disappointed.

Then he immediately entered the space of Tianshu again, and from the essence of the heaven and earth, he dropped a drop.

“The Emperor, I have given you some good things, please take this look!”

As for giving a drop, it is not stingy, but this thing is not verified, not to mention whether it will have toxic side effects, and the dose alone will not be accurate.

The dose is right, the poison can be used as a medicine; once you drink too much, the water can be harmful...

Chapter 2038 - Chasing or not chasing

The dog \*\*\*\*\* is now absolutely trusting for Shen Lang.

It doesn't matter what it is, is it a good thing, since Shen Lang let it take it, it hears it and then takes it.

Shen Lang then licked it and let it feel it. He couldn't help more, and then he quit.

Looking back, he feels a little weird.

The dog \*\*\*\*\* first ate a seed, and then he was... was it pouring a little water?

Don't leave that seed sprouting in its belly.

The specific situation, Shen Lang did not pay attention to, let the dog \*\*\*\*\* to play.

Now he has two things to do, one of course, they still meet with Gao Hanqiu, the other one is the skeleton of the dragon that has meat and no skin before.

After harvesting the essence of the beach, Shen Lang can also launch a rough estimate of the previous situation.

In the end, the dog \*\*\*\*\* relies on the behemoths of nature, and the induction of these heavenly treasures is even stronger. It is not the poisonous grass that attracts it, but it is probably the essence of this world.

It was directly and accurately above the essence of the day, but because it was buried in the soil, it was deeply attracted, but it was not accurate.

Shen Lang rushed over to its side, let it go away and dig directly there.

This is no coincidence, but the dog \*\*\*\*\* first understands the locked position.

The poisonous grass should be on the top, so this excavation first makes it feel dangerous!

It thought it was coming to it, so it quickly fled. Perhaps it is just an instinctive escape, perhaps after seeing the dog god, there is the invasion and the idea of invading.

The demon dragon, which is lower and closer to the essence of heaven and earth, is also aware of danger.

When the flesh is resurrected and resurrected, and the soul consciousness is preserved, it is definitely more clear than the poisonous grass that is more instinctive.

The above powerful human race, a powerful behemoth, in its eyes, is still the situation of the siege alliance of the various ethnic groups.

When they were defeated, they were all dead. They just didn't die completely. Later they became familiar with the resurrection. It certainly didn't know how long it was. Maybe it was still in the era of the war.

Therefore, it did not dare to take the lead, and after waiting for them to leave, they could not attend to others, and they quickly climbed out and left.

As for why I didn't take the essence of the day, Shen Lang suspected that they were probably two of them. I don't know how they have the present. I don't know if there is such extraordinary thing below.

Of course, this conjecture is also because Shen Lang himself is not aware of it at all. If they are ignorant and ignorant, they can make him more balanced.

If this inference is true, then the dragon climbs out and continues to run away.

It's been half an hour now, at the speed it just left, probably because the regeneration is limited and the speed is not too fast.

To catch up, you should still be able to catch up.

However, this burial of the Dragon Valley is strange, and any situation may occur. It may be difficult to say if it has been separated for a long time.

From this point of view, Shen Lang should first catch up with the dragon as soon as possible, can not let it continue to grow, let alone have the opportunity to leave the funeral valley!

Although there is no essence of heaven and earth, the ability to regenerate to this extent is basically equal to resurrection. Behind it is healing and continue to grow more flesh.

The reason why this is the essence of this world, can produce this unique miracle, because the funeral dragon valley has invisible and innocuous poisonous substances!

This is not conducive to their healing and cultivation.

But in turn, this will also promote their desperate search for the exit!

Now no more than the ancient times, there are many strong people of all ethnic groups in the ancient times who are trapped together here, will go with them, and will give up their lives.

And there is also a strong seal enchantment outside.

Now that at least tens of thousands of years have passed, everything has changed. Once the dragon is gone, it may be possible to find a crack in the space in the place where the flame is heavy. If it is not good, it can follow the route of the red porpoise and leave in the valley outside the great wilderness.

If you let it escape to the great wilderness, then the sea will fly high and the birds will fly, and it will be difficult to find traces of it.

There are no poisonous substances outside, no danger of the murderous land, it can slowly repair the body with the lush aura.

Even if it only has one dragon to go out, it will not pick so many to continue the race, and it can be mated with other different races.

In that case, even if you don't breed a purebred dragon, there will be many mixed dragons with the dragon's gene.

There is one left, unable to fight against the human beings who dominate the world, and naturally will not take revenge. After the restoration, put your energy on the reproduction and regard it as the only goal.

Give it hundreds of years, a thousand years, can really breed a mixed race, the child has children, the child has grandchildren, sons and grandchildren, endless...

But... this is just an exaggerated algorithm.

And this is an antiquity thing, and Shen Lang himself does not have any direct feelings about the dragon family. In terms of reason, it is just that "the emperor takes turns to do it." Whoever dominates the world must inevitably oppress other races.

No one is noble, and no one is regarded as an enemy. Shen Lang can face it more calmly.

This is not the same as the one who discovered the black robes. It is an enemy that is completely unclear. I don't know how many people, but they have already harmed the heroes of the world and must deal with them.

Now after considering the comprehensive consideration of Shen Lang, they chose to meet with Gao Hanqiu and listen to their opinions.

Where the magic dragon went, he could not track it now, but before leaving, he could also place a detector on the local high ground and record everything after he left.

After the completion, Shen Lang immediately went back and returned to the fork at ten miles away.

Although they did not directly see the route they took, Shen Lang also had the memory of the Red Dolphin King, and still knew a general.

They are in the way of the road, the cold autumn they followed the direction of the Red Dolphin King, this is the route that the Red Dolphin King finally took!

Gao Hanqiu is to understand Shenlang He will definitely feel that since Shen Lang comes in and can still live, he will definitely want to understand why there is a lot of poisonous smoke.

There is no poisonous smoke in the back, and Shen Lang will come to the place where the black porpoise king came before.

So after arriving here, they will go in that direction, but they are worried about deviations, and the dog \*\*\*\* will stay and watch.

Now Shen Lang is directly chasing the past along the direction. Although this is not his own memory, it is still not so natural, but it is very clear.

There is a red porpoise king who has walked once and leads the road. It should not go slow every day. Shen Lang is coming now, at least for more than an hour.

So how quickly he rushed over, it may not be able to catch up. They can't find it, they will definitely return, so Shen Lang will maintain the general speed and observe the surrounding situation.

In case... What good things are missing? Isn't it awkward?

Chapter 2039 - Reproduce the living dragon

Although Shen Lang maintains a normal speed, it is not slow.

He also saw a lot of things in the case of the funeral dragon valley. The one that I walked first, some of them looked at it, and there was a route that the King of the Black Dolphin had not traveled.

This second time came in, there was no poisonous smoke, and it was more clear all the way.

Naturally, it is impossible to get the possibility of the essence of heaven and earth.

This route is not known how many times the Azhao dolphins have passed. It can be seen on the bright side. Basically, all generations of the porpoises do not know how to find them.

The essence of the day was also well concealed. It is estimated that the family of the red porpoise could not be sensed, and it can be retained to this day.

Therefore, on the way behind, Shen Lang observed a lot, and also gave up the heart of the leak.

However, he is a bit strange, why have you been walking, have not met them back?

The cold autumn and the snow are not following the route of the Red Dolphin King. Basically, there is no easy to carry and leave. The purpose of them is to look for the waves.

If you go to the deepest place where the king of the black porpoise has been, and you don't see the shadow of the swell, you should return, and you can't let the sacred beast continue to wait there.

But now Shen Lang has been more and more in-depth, and has not yet sensed the movement of their return!

Shen Lang thought about it again. When the King of the Black Dolphin came in, he encountered a big variable and triggered a large range of poisonous smoke. When he was alone, he was almost taken away.

When the dog \*\*\*\* was one, it was almost invaded by poisonous grass.

In this way, the burial dragon valley is worthy of the name of the murderer. In addition to the innocent and toxic substances, there are various variables and various irregular dangers.

The three places where they went deep have already reached the head of the Red Dolphin King.

The Red Dolphin King is also the route before the trip, and no gains will be made before it enters a new field. Is there any danger that it does not know?

They can confirm that this trip is not dangerous, and it is entirely based on the memory of the King of the Black Dolphin.

But where they finally arrived, but the Red Dolphin King himself is not sure, do not know what will happen!

Taking this into consideration, Shen Lang speeded up the speed and did not pay any attention to the various kinds along the way. He went straight to the depth of the poisonous smoke and quickly rushed over.

Not waiting for Shen Lang to rush to the vicinity, the knowledge of God has already investigated the specific situation, which made him not to be surprised!

A few of them were in the place where the former Red Dolphins were newly explored.

In fact, it is the latest, but in fact it is not how far away.

After a period of barbaric development, the Chiropractae realized that they would eventually sit down and eat. Therefore, it is a little advancement, and within a region, try to develop.

From the weapons and skeletons of all ethnic groups to the skeletons of the dragons, they will not be taken away at one time and pressed. The same is true for sale, try to slap some poisonous grass.

That is, the wave of Shen Lang has done most of them.

Because of this principle, let them almost complete the carpet search, there is no residual value, and then will be further developed, the scope will not be too big, is a period of advancement.

So this time, the king of the Red Dolphin was hollowed out. If you want to get a little more and bring it back, it is a new area, but it has not expanded far from the range that was explored before.

In theory, this is not far from being explored again and again, and it will not be any danger if it goes further.

However, before it wanted to take the keel from the complete keel that had not been touched, but did not know how, accidentally triggered the poisonous smoke.

And this makes the poisonous smoke that it retreats, since it has been chased in a very wide range at a very fast speed, it has almost caught up with the edge!

The results came in again, and the poisonous smoke that spread quickly and spread widely disappeared without a trace.

Come in again, except for the cold autumn they want to find the Shen Lang, the Red Dolphin King himself wants to come here again.

Since there will be anomalies, this environment should be unusual, and the poisonous smoke is gone. Is there any treasure that can be presented?

So even if the cold autumn snow is not the snow to go in the direction of the dog god, the Red Dolphin King will persuade them to go here.

But after arriving here, the Red Dolphin King did not expect that there was a living dragon!

This dragon is not the one that it wants to lick the bones before, nor does it know that it has appeared there.

The magic dragon is obviously dirty, and there is a variety of flesh and blood, but the lack of the skin outside, it is the same as the head, so it looks very strange and horrible.

All along, the king of the black porpoise has seen a variety of bones, like the human bones that have no value for sale, they do not know how much they crush.

Among them, the keel is one of their most popular sales items. All brought back must be summarized here. As the king of the present, everything is unified and dispatched.

In short, it is not the most introductory, but it has been the most keel.

It is commonplace for a broken, complete burial dragon's tibia. But now, there is a \*\*\*\* fleshy bone!

To really have a demon dragon that is not injured, it would be fine. What is this now?

Half dead?

Still dead and resurrected?

Seeing that this magical dragon with meat and no skin appeared on the scene, the king of the black porcupine was almost scared.

The cold autumn and snow are not snow, but also deeply shocked by this scene.

A little different is that they have not come in before, and the situation inside is also derived from the memory of the Red Dolphin King.

So when I saw the dragon, it was not the fear that was scared, but there was deep concern!

There is also a living dragon, even if it is not dead, can survive from the ancient times to the present, it is also very powerful, very terrible.

Is this an isolated case?

Will there be a large number of dragons still alive?

Or... Is there a lot of resurrection of the dragon?

They are different from Shen Lang's mentality.

For thousands of years, Yaochi has been a famous faction in the right path of the world. It has a sense of mission to shoulder the world.

Gao Hanqiu has already entered this circle of this level. He also has a sectarian disciple in this world. Even before coming, Tianshan Jianzong was also a famous school in China.

They have a greater sense of responsibility so they can't avoid this problem.

On the other hand, the king of the black porpoise is instinctive and wants to escape. But in addition to their sense of responsibility, they have another question.

What about Shen Lang?

According to the analysis, the biggest possibility of Shen Lang is to come here.

If Shen Lang is not on the other side, but is really here, but now there is no trace, then there is only one possibility!

I have already encountered the poisonous hand of this dragon!

Even, this dragon has no epidermis now, and it is a broken wave.

The idea of light makes the chill of the cold autumn sorrow.

Chapter 2040 - break the ice

The king of the Red Dolphin is an instinctive fear. He wants to leave, but it was banned by the cold autumn. There is no permission for the cold autumn. It can't leave without leaving.

The two cold autumns and the snow and non-snow did not want to leave, but wanted to deal with the dragon's things, and to figure out the whereabouts of Shen Lang.

But what appeared in front of it was the ancient dragon, which used to be the master of the world and the hegemon of defeated by the various ethnic groups in ancient times.

The identity of it can bring tremendous pressure to others.

The most obvious is the king of the Red Dolphins. Its strength is not inferior to the realm of the Great God. It is also the king of the Red Dolphins. It is also a high-spirited one, just like facing the Great Five Dragons.

But when I saw this ancient dragon, it was directly imaginary, and I was so scared that I didn't even have the courage to face it.

The cold autumn and snow are not as good as snow, but the pressure is not small. This is because of the responsibility and the relationship between the waves and the waves, so that they have not retreated.

Otherwise, maybe it will also consider whether to leave and say.

This formed a stalemate.

No one has acted rashly, and the two of them have taken care of each other, allowing the king of the Red Dolphin to leave a little further, but not letting it leave.

After that, they are looking at the surrounding environment in an all-round way, observing the strange dragons with flesh and blood.

This is a place where others have the advantage of environmental advantages. In view of the poisonous smoke in the memory of the king of Azolla, it is the release of this dragon.

Therefore, in the absence of knowing oneself and knowing each other, they chose not to move.

The dragons were squatting when they came over, but they stayed still, but there were no flesh-and-blood eyes, and they stared at them with sorrow.

It seems that this guy is also jealous, and has not been able to directly grasp their grasp, or else, will not wait.

What is the situation, the cold autumn and the snow are not understood, but because they do not understand, they will not dare to act rashly.

Who knows if this dragon is scrupulous, or is it waiting for them?

After all, before this, the Red Dolphin King had already come here, and because of the hands-on, triggered a large-scale poisonous smoke like never before.

The scope of the spread is more than a thousand miles! The speed of the spread is also confusing the king of the Red Dolphin!

The more you wait, the colder the snow and the snow is the bottom of your heart!

Looking at the look of the dragon, it seems to have swallowed the waves, and is taking a break to digest.

If this is the case, the longer the delay, the more difficult it is to save people.

Gao Hanqiu has already been rumored with snow and snow, but snow is not enough to calm him down.

Because they came to the scene, and did not feel the breath of a little wave, in case he did not come over here?

Then they slammed their hands and did not do well.

Under such circumstances, everyone will continue to be deadlocked.

This process is long and not too long, but for the cold autumn and snow is not snow, because the heart is anxious, but it feels very long.

Not to mention the Red Dolphin King!

Not to mention that it was inherently fearful, because they were born in this burial dragon valley, and it is a natural fear for the ancient dragon.

It is because it was first banned by the waves. When it came in again, it was banned by the cold autumn. It was not possible to leave without letting go, let alone fight.

If they really want to fight, it becomes the first dead cannon fodder.

So this stalemate process, it is the most anxious and nervous one.

What makes it a little fortunate is that the dragon has not seen it in the eye, the focus is on the human men and women, or else it is even more scared to death.

When Shen Lang arrived, they had stagnated to a critical point of impending collapse.

Even if he didn't break this deadlock, Gao Hanqiu and Xue Fei couldn't stand it, and he would do it directly.

They are hundreds of years of cultivation, only to be stable and not reckless.

When Shen Lang's knowledge sensed this situation, it accelerated the past.

The emergence of Shen Lang immediately caused a big change in the atmosphere of the scene!

Originally, both sides were so eager to get to the point that they couldn't stand it anymore. Suddenly someone came over and it was extremely easy to get rid of the fire.

A little farther away from the Red Dolphin King, it is clear that the waves are coming over and almost burst into tears!

"Shen Lang! Finally found you!"

Then it screamed again: "Find the waves! The waves are fine! We can go back!"

Before the cold autumn and snow and snow were coming in, one of the most important reasons was to find the deep waves that the poisonous smoke had advanced.

The Red Dolphin King can also guess that the two of them are also full of scruples about the Dragon, or else they will start directly. Still stuck here, it is because there is no search for the waves.

Now that Shen Lang has appeared, it is good to say that everyone has a step down and can leave and go back together.

Snow is not snow and high cold autumn, of course, the first time I feel the waves.

It was discovered that Shen Lang was not swallowed by the dragon, and it was still alive and alive. It was obviously not poisoned by poisonous smoke. This made them hang for a long time and finally let it go completely.

Originally, they had another tangled point – whether or not to start with this dragon, now has a good breakthrough.

That is to hear what Shen Lang said.

Since the entrance to the Yungong Holy Land, Shen Lang has been invisible for their core, and many decisions are also wise.

Seeing Cui or the conspiracy, and further identifying the black hand behind the door, that is the big thing that affects the world.

Now that I see the living ancient dragon, he should have a better countermeasure.

When the previous stalemate, neither snow nor snow and cold autumn did not move.

Now that Shen Lang has come, they have all returned a little and joined him.

The red porpoise king, who is screaming, can't help but worryBecause the three of them are coming together, if they really want to leave, then it can't keep up.

It has the heart to want to gather together, but it is afraid that they will declare war with the dragon directly after the three confluences. It is a tragedy, and it really needs to be cannon fodder.

So it is very entangled, want to be close to the past peace of mind, and afraid of being hurt.

“Are you okay?” After the approach, Gao Hanqiu quickly asked directly.

Even if he saw that the waves were fine, he still did not hesitate to ask.

Shen Lang nodded, no more chills, but straight into the subject.

“When did this dragon come over?”

When I heard this, Gao Hanqiu and Xuefei couldn’t help but look at each other.

Shen Lang’s sentence has already expressed a lot of information: he is the magic dragon he has seen; this dragon is not here, but from other places!
