

First Strong 2041

Chapter 2041 - Orphan? Large scale?

“When we just came over, it is already here.”

Gao Hanqiu immediately answered the words of Shen Lang, and then added more detailed information.

“Although it is not calculated, it should be an hour.”

Just now everyone was squatting, guarding the whole god, and did not care about calculating time. From the feeling, it has been a long time. However, Gao Hanqiu still judged an approximate time.

Shen Lang could not help but frown, using the good armor to calculate quickly.

According to the memory of the King of the Black Dolphins, he has drawn a rough map. After he personally went to the track, the track record can enrich the map.

Corresponding to it, you can basically confirm that you just walked, and now it is really not a direction. But in the direct direction of the two directions, the King of the Black Dolphin has not passed, and other red porpoises may not have passed.

In other words, coming over from there, in theory, should be ok. If you can keep the line in the distance, it should be a lot shorter.

In terms of time, the dragons recorded by Shen Lang on the other side left for about half an hour. But in the cold autumn, they will at least have an extra hour of travel time.

If the dragon is able to arrive here after half an hour after leaving, it is theoretically possible to see it in the cold autumn when they arrive.

The analysis of all this is based on judging the head of the dragon, whether it is the one that comes out of the big hole.

If it is the same head, then it will not be slow, and it will not happen to come here. It should be something that attracts it here.

If it is not the same, then the problem is even more complicated.

Explain that the resurrection of the dragon is not an isolated case. The burial dragon valley is so huge, there are two or two, and there may be three or four.

This has to be described, it is more complicated, and Shen Lang has come over all the way. It is already prepared. It is to reorganize the picture he saw.

At this moment, this small paragraph was taken separately, and the memory belonging to him was transmitted to them.

The cold autumn and snow are not thinking about snow, suddenly felt the memory of this input, immediately read the fusion.

Almost instantaneously, they also have the memory of this paragraph.

“Is this the same?”

“Is there another one?”

Both people were surprised.

The memory given by Shen Lang is the picture he saw from the detector. In his own case, you can also zoom in on the close-up, but after you have formed the memory, send it to them, it is just a rough picture.

The cold autumn and the snow are not snow. I just saw a strange dragon that was exactly the same as I saw in front of me. I climbed out of the big pit and went away alone.

They also looked at the waves with incredible eyes.

Shen Lang responded to their gaze and made them slightly wrong.

He is also not sure if it is the same head!

They are all experienced ancestors. If there are two heads, what is the meaning of this, you can immediately associate it, it will be very serious!

“Is it all... All the dragons have signs of resurrection?” When Xue Feixue asked this sentence, it was a little trembling.

According to the legend of the ancient Dragon War, the ancient martial art of Yaochi has more legends. She also listened to it from an early age. The feeling of nature is much more shocking than the cold autumn and the deep waves that formed the three views on the earth.

Before the case of the Red Dolphins stealing the keel to go out for trading, Xue Feixue is still a bit sloppy, taking the Dragon gene out, what should happen if there is a change?

Now it is very lucky!

If the dragons in the burial dragon valley can be resurrected, the porpoises have been taking keels for thousands of years, but it is an unintentional destruction that makes those bones no longer resurrected.

“impossible!”

Shen Lang said firmly.

He came here and explored all aspects of the burial of the Dragon Valley more than they did. It was not purely following the route of the Red Dolphin.

So he can confirm that it is impossible to resurrect all!

The dragon and the ancient human being that he had met before, the skeleton of the dragon, remained intact. But it also has no signs of resurrection, but the gods are lingering in the Excalibur.

If this is the big environment, so that the complete skeleton can be resurrected, then the dragon that keeps the gods does not need to wait until now.

Just inside the Taikeng, I dug up the essence of the heavens and the earth, which is also proof of this. It should be related to the essence of heaven and earth, not just resurrected.

From another point of view, if you want to resurrect, in addition to the flesh, you need the existence of the soul god.

Just like the magic dragon and the strong people of the human race, as long as they are given to the flesh, they can be reborn by way of winning. Shen Lang reborn by reincarnation, and he no longer has the **** of the gods, only the memory awakens.

Many of these dragons have already died directly in the battle at that time. It is a chance to regenerate in the flesh. Without the gods, it is impossible to resurrect.

Therefore, Shen Lang is more inclined to the previous inference: because of the relationship between the essence of heaven and earth, the magic dragon that was buried there was nourished when the Yuanshen had not dissipated and the body had not decayed.

To achieve such conditions, I disagree.

Even if the dragon valley is huge, even if there are a lot of dragons in the past, the essence of heaven and earth will not be everywhere, and it may not just fall on the essence of heaven and earth.

Combine these, Shen Lang has a new inference, this is not the same head, the two are still a case!

The Red Dolphin King is not here to know how to trigger the poisonous smoke, indicating that the environment here is not ordinary, even better than the place before.

There is also the essence of heaven and earth, and it also makes it possible to nourish the resurrection of a dragon.

He quickly put his own speculation and told them about it.

High cold autumn and snow are not snow. For this situation, there is no more information. Shen Lang has already dealt with it first. With certain experience, it is certainly more convincing.

“Do it! If my inference is correct, then there should be a heaven and earth essence to support it, perhaps it does not leave, it is to guard the essence of heaven and earth.”

Shen Lang directly gave his suggestion. Originally for the demon dragon that has already left, he has nothing to say, not necessarily to catch up with the kill.

But now that this is another one, it is different.

Not to mention the world of the world, the future of the human race, the essence of heaven and earth that may exist here alone is an absolute reason.

If you come to the funeral dragon valley and don't figure out the benefits, is it coming in to travel?

Just as they were conspiring with their two voices, Shen Lang had completed his comprehensive observation of the dragon in addition to his distraction.

He didn't see it before, but the information of the detector, the holy armor can analyze the specific data, and now the observation can have more direct data.

The appearance of the naked eye looks similar, but by comparison of the size of the head and other data, it has been determined that this is not the same dragon.

Chapter 2042 - Dragon's 1 hit

Although the three of them are secret plots, the outsiders can't hear anything, but whether it is the dragon or the black king, you can know what is being discussed without guessing!

Even if you don't know the specific details and don't know how much they know, they can know that they are plotting against the dragon.

That dragon, the eyes have always been concerned about the cold autumn and snow is not snow. The arrival of Shen Lang also attracted its attention.

The strength of Shenlang has already made it pay attention to it. The attitude of Gao Hanqiu and Xuefeixue to Shenlang has made it more vigilant.

So when it's said that I'm going to do it, the murderous murder has been perceived by it!

Whether the demon dragon is resurrected or survived from the ancient times, it has been involved in the battle of the ancient dragons, not only experience, but the scale and the tragic situation are all impressive.

At the moment, there are three races, and one who doesn't know any race. If you want to deal with it together, it is taboo, so keep the confrontation. Now the other party has to start, it is decisive, and it is strong first!

When the front was squatting, the dragon was kept restrained and not aggressive.

Because the cold and autumn people are not reckless, there is no swaying, and it is because of the identity of the dragon, it gives them great pressure, no direct shot.

Now it has to be strong first, and it will break out directly!

The squatting dragon, suddenly stood up, and in the process of getting up, made a long scream!

Immediately, a slap in the face of the power!

The cold autumn and the snow are not two. It was a bit tangled. The responsibility made them have to stand up, but they still have scruples about the dragon.

Therefore, when Shen Lang appeared, they secretly decided to hand over this task to Shen Lang and listen to Shen Lang.

When Shen Lang shared memories, inferences, and decisions with them, they did not have any doubts and entanglements, and directly cooperated with his suggestions!

At this time, everyone was alert, and immediately felt that the dragon has taken the lead!

In an instant, the incomparable pressure of the momentum, as if the actual hurricane, directly blow them out of the unstable flight.

The Avalokite King, who was farther away, was directly scraped out, and immediately could not see the trace. Even a screaming exclamation was too late!

Shen Lang three are super strong, but also have a wealth of combat experience.

Even if the dragons are the first to get started, they can defend in the first place. Because they are always on guard and remain defensive even when they are conspiring to discuss.

The three people were only shocked for a few tens of meters, they have stabilized their figure and then faced the dragon that has stood up.

This demon dragon is a little bigger than what was seen in the detector before Shen Lang, and it is a few tens of meters tall.

However, the gap on a single head does not allow Shen Lang to have the slightest fear.

Over the past few years, he has encountered swallows in the hills, encountering giant pythons, dragon elephants, not to mention the giant beasts of the behemoth world.

The dog **** who is familiar with him alone is a huge emperor, and he can transform himself into a huge one.

Besides, there are still oh!

I have seen the giant beast, the body of the dog god, not worth mentioning.

However, just not afraid of the head, does not mean that Shen Lang does not pay attention to the dragon.

After all, this is the ancient dragon family. It is the hegemon who once dominated the whole world for a long time. Their traversing is not relying on the body of the flesh, but all aspects are very powerful!

Just stabilizing the figure, Shen Lang felt a dazzling!

This is not the color that appeared in front, but with the sound of the dragon, not only the actual strength is like the pressure shock, but also the sound, it is also a very powerful sound wave attack.

The long tarragon, there is a feeling of reverberation around the beam for three days, not only very harsh, but also very long, directly causing dazzling glare.

When Changchun just stopped, the dragon that got up and stepped over and chased it had already spurted a large flame!

The flame has not yet spit, and with the huge body, it has already reached the side of Shen Lang, and the three mouths of the fire will be swallowed in the mouth!

Because it has no epidermis, no dragon scales, it looks very strange, as if the flesh and blood of the body will kneel down at any time.

But when it moves, it doesn't feel like it's slow and slow, but it's very flexible and very fast!

The magic dragon that has experienced the ancient Dragon Wars is no stranger to the tens of thousands of years.

Its attacks are continuous, one after another.

The first scream is that it has the upper hand in the momentum, and the pressure has been like a substantial shock wave, coupled with the attack of sound waves, all-round intrusion into the opponent, making people unable to guard against it.

The flame that followed the eruption was even more blazing. I don't know if there is a dragon's gene, and it is also able to spurt fire, but compared with the flame of the dragon, it is simply a child's play.

After the first two attacks, it did not wait for the flame to be sprayed, the body has arrived, and the mouth has been opened to engulf the target!

The multiple attacks that followed were unstoppable, and more importantly, the dragons were the ancient hegemony, and no one has ever dealt with them.

This means that no one has the experience and can't determine the power of the dragon's attack.

For example, the flame can only be perceived far ahead of the general, but to what extent, for example, the strong man in the realm of the gods will not be burned and burned, but it is not known.

Just like the dragon's sound waves can dazzle the glare, that is, it affects the spiritual consciousness is stronger than the general sound wave attack, and it is not known before the experience.

The magic dragon has no active bones for tens of thousands of years, and the physical state is no longer one or two of the same year. Without the protection of the epidermis and the dragon scale, the resistance to endurance cannot be compared with that of the year.

This is exactly where it was scrupulous. Now, as soon as it strikes, it immediately targets its opponents.

Throughout the process, it is still very dissatisfied, because the physical state, seriously can not keep up with its thinking and experience!

This is not a relationship that has not been active for tens of thousands of years, but because the physical state is too bad.

But its experience still allows it to successfully bake three targets and swallow it into the mouth, which is a place that can be a little comfortable.

The long years of lingering, let it be depressed and frustrated, and now swallowed the three provocative Terrans. Let it recover a few fighting spirits, think of the glory of the past, remember the hatred of the past, and begin to restore more arrogance and glory.

There is also a bloodthirsty hunger!

Chapter 2043 - Field of god

The Dragon Dragon mouth once again gave a long sigh, and the sound shook four wild!

At this moment, the cold autumn and the snow are not snow, but it is very surprised!

After being shocked, Shen Lang immediately took out the pen and quickly sketched out an illusory real influence.

Only he himself can see through the scene, Gao Hanqiu and Xuefeixue are not far from him, and as he is surprised to see, not far from there, there are three of them!

Then, Shen Lang took them back together.

Then they watched the dragon fire with the three people they saw, and then swallowed the mouth with the flame.

If they don't see it, they are almost unbelievable.

It is clear that Shen Lang is on the side, but they can see themselves in front and see the waves.

But they are not ordinary people, and they immediately guessed it.

The front should be the phantom created by Shen Lang. This not only deceives their eyes, but also deceives the dragon.

So at the moment they are not the focus of the attack, but also can be on the side of the close.

This is a very important opportunity, because since ancient times, everything about the dragon has been a distant legend. The records of all the factions are actually fantasies of future generations.

The magic dragon will be how to fight in the end, no one can say clearly, now is a good opportunity to understand.

And to understand each other's strength, can we ensure that this match can win.

The time that Shen Lang can win will only be for a while, and the dragon will not be able to attack a lot, so there is not much time for them.

Neither of them questioned, except for the alert, they were concentrating on the details of each.

After the dragons swallowed their shadows quickly, and then issued a long squat, they already had a little understanding, and more shocked!

How did Shen Lang do it?

If light is a illusion of blindness, it is not difficult to deceive the eye. It is difficult to deceive the induction, and it has even swallowed it, and it has not been discovered yet!

That is really not easy.

At this time, they heard the slight sound of Shen Lang in their ears.

“Hands!”

Just after Shen Lang had already said that they had to start, they were also ready to shoot, but did not expect the Magic Dragon to take the lead.

After a series of attacks from the other side, the illusion of Shen Lang made them more shocked, so they did not start attacking.

Now that I heard this, both of them are a little embarrassed.

People have been fighting for such a good opportunity. When the demon dragon attacked “the three of them”, they did not attack, but they missed it once.

At the moment, two people are also immediately offering personal magic!

The observations have just made them rise in confidence. Even if the dragon is still very strong, it is definitely far from normal, and it is a good opportunity for them.

When the sword of the cold autumn and the snow-free snow are appearing, the dragon is immediately alert!

It has just been unaware of it, on the one hand because the magical environment created by the pen is too real, and on the other hand, because it is completely ignorant of the current human race.

They need to observe and understand the high cold autumn, and the same is true for the dragon.

The three people were directly shaken by it, and the latter would be burned by fire, and then swallowed in the entrance, it would be a matter of course.

As for the feeling, the three people have come to its big mouth, but it is not a big deal, let alone the flame that it spurts, the frontal burning, can also be burned quickly.

But they are two different hands, it is not the same!

The volatility of the vitality, the murder that appears, and the movement of the magic weapon, reminds the magic dragon, this is the real enemy!

Even if it has not been fought for tens of thousands of years, it will immediately understand that it must be a road. It may be an illusion that it has just been killed.

In the end, it participated in the War of the Ancients, and it was very dangerous. When I first felt the situation here, I didn't see what was going on. I turned to the flame and sprayed it!

At the same time, the space around them has been completely blocked.

This kind of blockade is similar to the field of the comprehension, but the effect is completely different.

The snow is not snow and the cold autumn is shocking.

Legend has it that the Dragons have a skill, called the "Field of God", and the "field" of the Terran is probably derived from the realm of this god!

In the realm of the gods, the manipulator is like a god, and everything inside can't resist!

The field of the Terran is a yearning for such a realm, which can play a role of blocking the imprisonment, can also change the environment inside, has great benefits for itself, and greatly limits the enemy.

But sometimes, it seems to have a little bit of chicken.

Because the strength of the enemy is stronger than itself, the field can be reversed and counter-controlled, and that is counterproductive.

And the strength is quite, even if it is even worse, it can still be completely struggling, using magic weapons and so on.

Therefore, this is often the result of a lower-powered shot, or the first to achieve a sneak attack, and to cooperate with others to contain the enemy.

However, the "land of God" of the Dragons is truly a god. Once it is displayed, everything in its scope has no resistance!

As for the stronger dragon, or the stronger than the dragon, What effect will it be, the legend does not say...

But basically they all understand that once they get into the "God's Field" of the Dragon, they are probably not able to escape!

At this moment, they can't care for other people, and they can only blast out at the fastest speed!

This can not be said that they are selfish, because all three are top-ranking strong, the response speed is first-class, and there should be such a tacit understanding.

When you are racing against time, if you still want to pull others, it will not only help others, but it will probably drag others' dodge.

In that case, both of them suffered.

Therefore, under the tacit understanding, snow and snow and cold autumn, because of their respective orientations, left as far as possible in different directions.

They believe that Shen Lang can do it.

Judging from the reaction of the Yungong Holy Land, the performance of Shen Lang will only be above them. They should not give back to Shen Lang.

In an instant, both of them flew ten miles away!

I feel that I am not deeply trapped in the realm of God, so that they are secretly lucky. And did not dare to stop, but the gods watched the situation behind.

This look, I could not help but be amazed!

Shen Lang did not have time to escape, but was trapped in the field of the **** of the dragon!

It seems that the dragon did not continue to pursue them, not because it was too late, but because it had already netted a prey.

Snow and snow immediately thought of a problem. Shen Lang is so young, will he not know about the situation of the ancient dragons?

Besides, this is an extraordinary young man, perhaps not convinced of the legend, ignoring the skills of the dragon!

Chapter 2044 - Strongest attack

Snow is not snow, thinking that Shen Lang is a newborn calf not afraid of tigers, ignoring the dragon's "domain of the gods" skills.

Gao Hanqiu thinks of another point – Shen Lang is from the earth, the legend of the dragon is the dragon **** on the earth!

Even if you understand a little now, it is limited. For more ancient legends, there is no systematic understanding. It is very likely that you do not know the skills of the dragon.

Perhaps this time in the eyes of Shen Lang, the blockade of everyone is just the field of the general comprehension.

The field is also an advanced skill, and it is determined. The higher the level, the higher the level. Half of the fairy and the big fairy, the big fairy and the great god, that is a huge difference.

With this kind of cognition, he will feel that it can be challenged.

However, the “land of God” of the Dragons is much more advanced than the average field. Everyone has no experience. If you want to be hard, the result will be bad.

They all talked about loyalty. After discovering this, they immediately stopped the speed of continuing to flee, then turned around again and came back to help.

However, they are also rational people, saving people, but first of all to ensure their own safety!

The situation of Shen Lang at this moment is like a sinker who has fallen into a swamp and quicksand. People on the shore, if blindly rushing to pull him, the result will only be everyone falling into it.

To truly achieve the goal of saving people, we must first ensure that we are safe, and secondly we must have a viable solution.

The next moment, the cold autumn and the snow are not snow!

They just took out the magic weapon just now. If they haven't had time to show it, they have already been noticed by the dragon. It's too late to escape, let alone attack.

On the one hand, Shen Lang is holding down the dragon, and on the other hand, to save the waves, no matter what the outcome, you must force the attack!

The distance of ten miles, for their great realm, will be able to arrive in an instant.

At this moment, two people, one left and one right, one sword and one slam, with a fierce power, directly to the magic dragon swept over!

Gao Hanqiu is the most concerned about Shen Lang. At this time, he does not need to think about it. Naturally, he uses the military method of “Wei Wei to save Zhao”. With the skill of life, he has hit the strongest sword in the way of avenue to Jane!

When I was thinking about it, I was in the mountains, and the big waves such as Shen Lang and Liu Yun Xianzi were chased by huge incomparable killing fighters.

Gao Hanqiu came quickly from a hundred miles away, and did not need to send a sword. When he played the commanding sleeves, he shot the smart steel giants two or three kilometers high and took away his core energy.

The strength of its strength can be seen. It is not comparable to the elk ancestors such as elk and sable.

Now, the strongest sword that represents the ultimate strength of the cold and autumn, directly from ten miles away, such as lightning, the body of the dragon!

If the dragon does not defend, or the defense of the dragon is not legendary, Gao Hanqiu has the confidence to have two swords!

The other side of the snow is not the snow, but also played the strongest level!

As a long-standing ancient force, Yaochi is the permanent host of the high-profile large-scale Yaochi event for decades. All of them have been practicing the neutrality of being kind and low-key.

This also allows them to encounter enemies and the opportunity to fight with life, and even less, compared to other sects. Going out, others are respecting a “Yao Chi Fairy.”

This has resulted in practical experience including snow and snow, and relatively few.

Don't say that the way to fight and kill like He Lanchun and Hongdian's four sons is to compare with the same secluded sects like Kunlun and have less experience.

But that refers to the actual combat experience with the enemy on the bright side!

Rivers and lakes are sinister, can the Yaochi disciples really be as good as a fairy?

It is said that Shen Lang encountered, the mysterious women went to Zhoushan, but not a person, the same door with her, have encountered unexpected events, she is alone.

Who is the enemy?

It may be a complicated and different environment that is not Zhoushan. It may be a monster like a snowman or a mountain, or it may be attacked by other martial art.

These unidentified enemies are also unavoidable.

And to maintain peace and neutrality, to maintain the identity of the host of the Yaochi event, all need strength support. If there is no strong strength, Yaochi has long been annihilated in the dust of history.

Even if you don't change the historical signboard of the "Yao Chi Sheng Hui", others can replace it.

Therefore, Yaochi disciples, the actual combat experience is insufficient, but there are also many, and there is always a sense of crisis inside, there is a simulation of each other.

Snow and snow did not leave the door, just because they could not let go, including herself, and they were always practicing. Shen Lang has passed the past few times, she is in the state of cultivation.

Although she does not know who else has seen her shot, or how many years she has not seen her, but the head of any martial art, the ancestors, dare not despise this beautiful woman.

This time, in order to save the waves, Xue Feixue took her bodyguards into the sky and played it to the extreme. It was like a cloud of clouds. It swept directly from the horizon, but it was not as strong as it was. Magic dragon.

If the dragon is standing still, it will be caught in the sky and then can't escape.

Legend has it that this magic weapon has a sinister side. After all the objects are wrapped up, it will be quickly drained and all the blood will be absorbed for your own use.

This is why the mixed sky is red.

This may be a bit exaggerated, but many high-level magic weapons, especially artifacts, have growth and are normal.

Shenlang's Batian Tower to the Tiantian Tower is not a growth, but a gradual recovery. But like the sword of the king, if you absorb more energy and breed the sword spirit, it will undoubtedly greatly enhance the power.

A sword.

In normal times, it is almost always a powerful presence that can single out a martial art. It is the power to destroy a mountain. This moment, together with the magic dragon!

When the field of God appeared, the real fantasy created by Shen Lang's pen was immediately destroyed!

The magic pen is an ancient magic weapon, but this magic dragon is also the ancient dragon. If it is not so weak now, perhaps it is only the Shenlang display, it will not affect it.

In the sphere of God's field, everything is dominated by the dragon. The illusion has no soil at all. It is clear to see the waves, and it is also to see them fleeing around.

The dragon didn't chase them both. It has already figured out that the illusion has deceived it. This is the human being, so it now wants to make it more.

In the realm of God, it does not have to worry about the sloshing of the waves. It is exactly the same as the cat of the mouse. It is necessary to play around. Of course, it is not a boring play, but a memory of Shen Lang!

With this human memory, we can understand the state of the world today. Even if it is not clear, it knows that it has been stuck here for too long...

Chapter 2045 - Rebound

The cold autumn and the snow and snow are very high-speed, and instantly from ten miles to the vicinity of the dragon!

But the magic dragon is showing the momentum!

It has no defense at all, and there is no moving to escape!

Seeing this scene, the cold autumn and the snow are not screaming.

The dragons don't have no brains, and they can't feel the power of their attacks. There are only two possibilities for ignoring their attacks.

One is that it seems to be nothing at all, it can't move it at all!

The other is that it already has a defense, and even has a trap.

If it is the former one, it is really scary to have such a strong defense force in the state that it has no skin and no dragon scales.

If it is the latter, it is very likely that they will be two, and they will be self-investing!

These analyses are flashed in their highly developed consciousness. There is no need to stop and think about analysis, and no need to think about countermeasures. Everything is the best decision of instinct.

just.....

If it is a normal battle, then they will quickly retreat and be safe first. Since you are not sure, you should first be steady.

But they just wanted to save the sinking waves. This is the ultimate blow that contains the supreme power. This is to kill the dragon, at least to force the dragon to retreat and let go of the waves.

So basically there is no turning back, but also because there is a tacit understanding, knowing that another one will come back to attack together, so it is still confident.

But now in this situation, the dragon did not put their two attacks at all!

It's too late to get back at the moment.

In an instant, the sword and the temperament of the scorpion have already arrived, but in the place that is several tens of meters away from the dragon, it has encountered a block!

The strongest blow was blocked out of thin air, as if hitting an invisible hood. And this hood not only did not break, but rebounded their supreme impact!

Originally, according to normal expectations, the sword of the cold autumn will arrive before the sword, and then the dragon will be cut off in the form of swordsman.

From Jianqi to Jianmang to the blade, this is a triple attack that is stronger than a single one, but at this speed, in fact, the triple distance will be short and the time will be shorter.

As a result, the sword is now blocked and then rebounded, followed by the swordsman.

The speed of the cold autumn is fast, the blade has not yet reached the invisible hood, and the two swords that have bounced back have already hit his own body, so that he can no longer move on, and then retreat a few hundred meters. distance.

The other side of the snow is not the same as the snow, the temperament of the sky is like a mountain, but then it is the rebound of the mountains, even if it is her own magic weapon, she is in good control, and also encountered the strongest counterattack.

This time, the two of them used 100% of the power to attack, and at least 90% of the rebound!

This is tantamount to a person who is almost as strong as their strength and attacked with all strength.

More importantly, they just did their best to attack, and they could not do their full defense. They could only be simple defenses.

Those who are as strong as them are all striking, 90%, even if they are only 80%, the power is enough to make them hurt, or even hit hard!

After being hit by a strong rebound for a few hundred meters, the cold autumn and snow and snow are all white, almost spurting out.

Compared to their own attacking power, there is a feeling of suffocation forced to come over!

They have already understood that, even if they attach great importance to the field of God, they still underestimate their power!

The dragon can disdain their attacks, not a simple defensive hood, but spread the field of God to tens of meters around it.

The attack of the two of them, if it hits the defensive hood, there is still a fight, even if it can not be broken, it will tremble against the dragon and will not rebound.

But that is the realm of God!

It is a situation that they cannot understand clearly.

It seems that even if it is not within the realm of this god, the light is an outer wall, which can make it impossible to attack.

And now I feel the existence of suffocation, and the oppressive feeling that the ear can hardly hear the sound, all come from the counterattack of the dragon!

At that moment, the cold autumn and the snow are not snow, they can't take care of the other, can only endure the pain, and quickly continue to retreat, let yourself retreat a few miles away, in order to be a little safer.

As for the rescue of the sinking waves, it can only be another plan.

The sturdiness of the field of God has made them a little desperate.

Even with their strongest blow, they can't break the outer wall. What else can they do?

After breaking open, in the realm of the gods, isn't the magic dragon manipulating everything?

At this moment, they only have one hope, and hope that the dragon will despise Shen Lang, so that Shen Lang has the opportunity to use the transmission magic!

The gates of the Three Realms can not be transmitted from the field of the gods of the dragon, they are not known, and there is no such record.

As for Shen Lang's transmission and departure, what should they do? Can they escape the chasing of the dragon, and it is not considered for the time being.

Just in the beginning, in fact, the time is very short. From the magic dragon to the realm of the gods, the real fantasy of the dark waves is broken, and the two of them escape, and then attack in turn, then rebound and hurt, and then escape to the distance.

The whole process is only a few seconds.

The deep waves in the realm of the gods have always maintained a cold-eyed attitude.

Since he did not try to attack the dragon, did not care about the two of them, the thing to do is one – observe!

As soon as the field of God appeared, Shen Lang had a feeling of suddenness and openness. This is a new possibility!

To put it simply, in the advanced world on the earth, you can realize the field, but it is still relatively low-level. With the half-cent, the big fairy, and the great god, it is getting higher and stronger.

But the feeling of giving the waves is always not enough. There is still a feeling of chicken ribs, so he would rather use iron bars, use the dead water whip, the sword of the king, not only to enjoy the simple and rude destruction, but also because of more power.

The field of the gods of the dragons is not the same as that of snow and snow and cold autumn!

He did not despise the slightest, not even without understanding.

On the contrary, he attaches great importance and knows more than them!

He is a fusion of the dragon ***** consciousness that absorbed the dragon!

Because of the relationship between time and time, he naturally does not have complete digestion and fusion, that is, the memory of the souls of the two gods is also a bit sloppy.

But for the dragon's realm of the gods, it is no longer necessary to remember, it is a natural skill, just like ordinary people do not need to remember how to walk.

Just felt that this field is different, Shen Lang immediately searched for the traces of memory in this area, and he has mastered the theoretical knowledge in an instant.

It can even be said that it has already had methods and experience, but it has not been tried in person and is not yet proficient.

So behind his observation, is to observe the field of this god!

How to operate, it is not observed, he does not need, because he understands, what he needs is to feel the feeling, understand the field of the god, so that he can use it skillfully.

Chapter 2046 - Arrangement of Shen Lang

When it comes to the realm of Shen Lang, many things are realized by observing the experience, and no one needs to teach and tell.

And the field of the gods like the dragons now is more like a kind of review. He already has this position and is watching how it works.

So he doesn't need much time, a few seconds is enough for him to understand.

The field of God does not come from God, but in this field, the caster is like a god.

Simply put, it is more powerful and more powerful than the field.

Once you are trapped in it and want to get out of trouble, it is extremely difficult.

But in essence, it is still necessary to look at the strength of the enemy and me.

If the strength of the two is equal, it is impossible to challenge the situation. If the difference is very different, it will naturally be able to break.

After Shen Lang's understanding, it will take more time without further continuation.

A little more time, he can have more gains, but know that this dragon will hit the cold autumn and snow non-snow?

It is himself, who controls within the realm of others, wants to live, and needs more time.

"There are no disabled animals in the area, but also dare to call themselves the dragons? At this level, hurry down!"

The dragons bounced off the cold autumn and snow, and expelled them away, so that they could not come close because they were afraid.

Originally, I was prepared to take the memory of Shen Lang now, and then chase those two.

At this time I heard the words of Shen Lang, and the eyes immediately came over.

For human beings, it is completely invisible. This escape has no chance to escape. Naturally, it is also the weakest of the three. Even if it is in its current state, it is easy to kill it.

In this way, a small human being has slammed it as a disabled animal.

The dragon was furious and opened his mouth.

In the field of its god, there is no need to manipulate it. The smashing wave that was blocked is quickly flew to its mouth.

It is completely arbitrary, as long as a meditation, objects in the field, there is no possibility of resistance!

At this time, that is, the cold autumn and the snow are not a few miles away, and I am preparing to attack again.

Suddenly seeing this scene, they are all angry!

This is to eat the Shen Lang live!

However, Shen Lang is only a few tens of meters away from the mouth of the dragon. It is sucking, even the probe is not needed, and Shen Lang has already reached its mouth.

In a few miles away, even if the speed is fast, they can't save the sinking waves that have already reached the mouth of the dragon!

For the realm of God, even if they are not easy to be specific, they understand that Shen Lang will definitely not resist at this moment, and the strength of the individual can no longer be exerted.

Once you have swallowed your belly and want to save it again, you have to break the dragon!

If you want to attack now, you can't get it. Just two of them, can you open it up?

Besides, once you get in, it will be strongly corroded immediately, and maybe it will be digested for a while.

If you want to save, you must save it before you even swallow it!

“The obstacle! Look at the sword!”

The cold and cold autumn screams, directly sending the sound faster, passed to the ear of the dragon, while the sword in hand, is also followed, straight to the eyes of the dragon!

He will not lose his sword now, and if he is close to the past, he may be bounced back. Even if it can't penetrate its eyes, it can make it shift its attention, and it can be a little time and opportunity for Shen Lang.

But the result still can't stop!

When the sound and the sword arrived, the Shen Lang was gone, and it seemed to have been sucked into the mouth and swallowed in the belly!

Snow is not too hot, but there is no better way.

Although they are very strong, but the dragon is also very strong, and the dragon skills, is something lost in ancient times, they have no experience.

But at this moment, the magic dragon is weird.

Let it react, neither the cold autumn nor the sword that stabs the eyes, but the one who will be swallowed up!

At this moment, it can't feel that person!

In the field of its gods, no matter whether the opponent uses illusion, blindness, or stealth, it has no effect, and it can be easily locked.

But at the moment I just saw it, he suddenly felt that the Shenlang disappeared!

It is the kind that has disappeared completely, disappearing from the field of its gods!

how can that be?

Even if it is a strong man, it falls into the realm of God, and there is no way to get it so easily. What's more, such a young human race, this must have problems!

Just when it was horrified, I felt the waves again.

The whole process is very fast. If it is seen by the naked eye, it may even feel like a blind eye, and there is a residual image.

But because it is in the realm of God, all the details, in the magic dragon, have been magnified, and its feeling is also extraordinary and clear.

Therefore, it does not feel that it is wrong, and that it must be what happened.

Just the moment, can this human being block its feeling?

Of course, no matter how doubtful, it has not thought about whether this human being has disappeared.

Because this is its field, in the realm of God, let alone the little human beings, it is also a dragon, trapped, and there is no way to break free!

But Shen Lang just got rid of it!

This field is indeed very powerful. Shen Lang has to force himself to break free. There is no way. He just entered the space of heaven.

Tianshu space is one with him, just a thought, just go anywhere at any time.

Because this does not need to fight against the surrounding environment, nor does it allow your body to move away from it, so even if the field of God is stronger, there is no way to stop the waves.

After Shen Lang entered, he immediately did a little thing.

That is to wake up the fire of the earth!

After the heart fire emptied two volcanoes, he was taken back into the space of the heavenly book to sleep.

It was inside for a few hours. That is equivalent to hundreds of hours, ten days.

Earth fire is a different kind of thing, unlike ordinary living things. These times are enough for it to make up the flames consumed by the previous burning dragons and let it recover.

Although Shen Lang wakes it up now, it is a bit dissatisfied.

But every time, Shen Lang has brought benefits to it, so it is only a little emotional, or obedient to accept the arrangement of Shen Lang.

Because there is a hundred times of time, Shen Lang is arranged in it, and then with the heart of the fire, the magic dragon feels a brake.

In the distant cold autumn and snow is not snow, under the sense of God, I thought that he was directly swallowed and could not see.

Shen Lang reappears, still at the mouth of the dragon!

The mysterious suspicion of the magic dragon just interrupted its thoughts and did not continue to absorb the instructions of Shen Lang.

At this point it needs to re-inhale the sinking waves. Before moving this thought, Shen Lang can't leave in the realm of God, but stays at its mouth.

Earth fire!

Chapter 2047 - Powerless

Shen Lang brought out the fire of the earth, let it deal with this dragon!

The dragon itself can also be fire-breathing, and it is not the same as the general flame. This is one of the reasons for confusing the heart fire, let it see if it can absorb the fire source of the dragon.

The earth fire is spiritual. When I come out, I feel it. Now the enemy I have to deal with is even more powerful than the previous one.

Therefore, it does not dare to be willful, and a large number of direct flames will be released!

The dragon is trying to ***** the sink into the mouth. It just stopped because he couldn't sense him. Then he felt the sinking wave. When he was slightly surprised, he didn't have time to swallow him again. He felt that something was wrong. .

It is fire-breathable, and it is more sensitive to the flame than the average person!

But even if it is sensitive again, the reaction is fast, it is too late, because the heart fire is coming out of it, and then there is a large amount of arson directly in the inside, the speed is that it is too late to shut up.

The magic dragon is the magic dragon!

A powerful ethnic group in the ancient hegemony, it still has extraordinary confidence.

Just now, the field of God was displayed, and it was immediately effective. One of them was banned, and the other two all attacked and bounced out. This also strengthened its confidence.

The little human being on the lips, can't even escape if you escape, can you still fail? Even if you can release the flame, can the human zone fire spell compare with the dragon?

So it didn't even think about shutting up, but continued to take a sip!

What about the flame? It is directly absorbed for your own use!

By the way, the person who has just paused will be swallowed up.

The fire of the earth is not big, but it appears in front of the sinking waves. The dragon does not regard it as an independent existence, thinking that it and the extended flame are caused by the Shenlang spell.

That flame, in terms of its mouth, is a small one, and it is directly swallowed up. Even people, they don't care so much.

But immediately it feels, this flame is not ordinary!

On the one hand, the scope, from the original one, quickly turned into a large piece, the mouth of its mouth was completely stuffed, and the barbecue was directly grilled around the cavity.

On the other hand, it is the temperature of the flame, even the one that can spray the high temperature flame, I feel a little can not bear!

Moreover, because it took a sip of the relationship, the large flame, not only stayed in the mouth, but quickly went deep into the throat.

The only gratification is that the human being was swallowed up by it. In this case, even if it is uncomfortable, as long as you endure it, you will not be able to release the flame.

Just eat a bad thing!

The sinking waves at this time are the feeling of powerlessness in front of the heart!

Originally, it thought that it would burn this enemy. This is the case with the last enemy. If it is not good, it can absorb this flame.

But now that I am attacking, I realize that this thing can swallow its flame!

Its flame is capable of erupting a lot, and it has a very strong power. But the enemy's body can survive and can be swallowed up, it makes no sense.

The heart fire itself grows by consuming the flames. Of course, I am reluctant to spit out all my flames. In case I let the other party absorb it?

Then make a wedding dress for others, let others become more powerful, and it has nothing.

Although this is only reluctant and intelligent, there is no complete soul of the gods, but there is already an instinctive selfish thought.

With the powerless emotions it sent, Shen Lang felt that it had begun to work and did not continue to release so many flames.

Shen Lang is a bit helpless.

It is understandable that he can immediately understand the cause of the fire. If you can eliminate it, you can do it at any cost, but it seems that it is really like taking your own resources to feed each other.

If the heart of the fire exhausts the flames of the two flame mountains, all infused, and the dragon can still accept it, then it will be very powerful if it is fired again.

I was originally expected to rely on the fire of the earth, coupled with burning from the throat in the mouth, it should be able to make the dragon seriously injured, I did not expect the effect is not obvious.

At this time, the dragon is hard, or there is nothing at all, and Shen Lang can't know it, so I can only change the plan quickly.

Of course he will not have only one solution!

The use of geocentric fire is to hope that this effect is good and can make better use of the dragon.

If he can smash it directly with a sword, he will of course use the sword of the king. It's just the power of the sword just in the cold autumn, and the consequences, it's all seen.

Now I changed my second plan.

Shen Lang's own body was wrapped in the flame of the earth's heart, and was swallowed together.

This time I have already entered the throat and fell into the stomach.

Because there are a lot of flames released by the heart fire, and he is not affected in the middle, so whether it is stomach juice or anything else, he has not touched him.

After receiving the fire, the large amount of flame that it released was quickly eliminated, and everything else was swept away.

However, Shen Lang did not care about this. When he took the fire of the earth, he used the holy armor and released a large-scale killing bomb!

At the same time, I immediately entered the space of the book. The dragon is just a bit hard, even if it can absorb the flame, it can even be swallowed for its use. But this is directly burning into the throat, and the taste is very uncomfortable.

Therefore, it is also propping up, thinking that as long as the person is swallowed in, and immediately eroded and digested by the gastric juice, naturally it is impossible to release the flame.

The whole process was also very fast. When it felt the flames stop and felt that people had swallowed in, they could not help but breathe a sigh of relief.

The rest is handed over to the body, and it doesn't need to worry about anything, this human being will become its tonic!

Successfully swallowed one, its goal is two other humans.

In the distant cold autumn and snow is not snow, I just saw that Shen Lang was swallowed by the mouth without any resistance, and then disappeared. It has already made them very sad and angry, thinking that Shen Lang was swallowed.

While they were preparing to attack the rescue again, they sensed that the waves had disappeared and re-emerged, and began to set fire to the mouth of the dragon!

This situation has given them two spirits.

Shen Lang is Shen Lang!

Shen Lang really does not disappoint!

Before Shen Lang was dealing with the Dragon revival, although they didn't know all about it, they also knew about it.

This time before and after the change, you can immediately guess that Shen Lang should be intentional!

Shen Lang must have guessed that the field of God is difficult to crack, so it is dangerous to let yourself fall into the realm of God, waiting for the moment that the dragon swallows him, so that he can have a chance to release the flame from its throat!

Their external attacks, with a full blow, can't break the outer wall of the realm of God, so the fragile place against the throat is the key to a fatal blow.

Chapter 2048 - Devil is desperate

Because of the trust in Shen Lang, the Shen Lang was really swallowed up, and they did not worry before, but felt that Shen Lang should be ready.

Sure enough, there was a strong shock burst in an instant!

Then they saw an unforgettable scene!

The dragon with no scales and epidermis is like a ray of light. Then there is a lot of flesh and blood flying out. It is only the outer layer, and more is directly destroyed.

And the huge explosion, the shock wave did not instantly burst into them, not because of the safe distance beyond a few miles, that distance is nothing.

It is because of the field of the **** of the dragon!

The powerful blockade, let this huge explosion, is also locked in the body of the dragon, let the moment in microseconds, delayed delay, so that the two seem to see a little slow motion as clear.

But the total is less than half a second...

When the dragon feels the explosion, it is also the full defense. It gathers all the energy into the explosion place, tries to suppress the shock wave, strengthens all the organs, strengthens every inch of the body, and avoids the body from the inside out. Smash.

In that way, the realm of God has lost its support, and its energy, of course, cannot suppress the impact of the bomb from the stomach.

The powerful vitality of the dragons is also reflected in this moment.

Even the impact of the destruction of steel, under the enhanced defense of the dragon, did not destroy its main organs!

However, it is only part of its full defense. There are some places that cannot be taken care of, such as many bone and blood muscles, which are destroyed and blown out.

After a while, the cold autumn and snow are not snow, seeing that there is no explosion after the explosion spread out, without the blockade of the realm of God, directly to their side.

They are also full of defense, to avoid being shocked.

After the demon's explosion in the body passed, there was a big change.

Before the body was very strange, there was blood and flesh on the skeleton, but there was no outer skin and scales.

Now, most of its flesh and blood are gone, and many bones are gone. There is a broken skeleton left, and the main big bones are supported.

The large internal organs inside, although still remaining, have been seriously injured and can not be directly looked at, more importantly, the connected vascular nerves, etc., many are gone.

Shen Lang will not let his body verify the power of the bomb.

Whether it is a bomb, a missile or a nuclear bomb, it is good to kill the enemy anyway. He does not need to know so much. If you really want to know, the Holy Gaga also has detailed data.

In the space of Tianshu, I placed the fire of the earth and watched the situation of the dog god. During the time when he came over here, the dog **** did not deteriorate after taking the drop of the essence of heaven and earth. It seems that It is getting better.

After calculating and converting the time, he spread the bomb shock wave and reappeared on time.

In the distant cold autumn, snow, snow, and even the feeling of the dragon, the moment of the explosion, there is nothing to feel, only the glaring light and strong shock wave.

It can be sensed again, that is, the Shenlang people are in the stomach, as if he has been there, and has not left.

At this time, no one can prove it. Of course, I don't believe that Shen Lang can be so powerful, and can be more embarrassed than the dragon. It must be a magic weapon.

The bombs of Shen Langfang are in the stomach, so this is the most serious damage to all the organs of the dragon. Even if it is a hundred times stronger than the iron stomach, it is already riddled with holes.

After the emergence of Shen Lang, holding the sword of the king to swiftly wave, directly smashing its entire broken stomach, all shredded!

After Shen Lang came out, God's knowledge has already brought the situation of the dragon to the heart.

At this moment, the dragon has become a rough skeleton. With the appearance of a nuclear heart, it may die at any time, but it can survive the explosion and see how powerful it is.

Therefore, he did not dare to neglect, the body has swiftly swung, the sword of the king quickly extended and lengthened, coupled with the sword and swordsmanship, directly began the final mess.

However, after the riddled stomach has just been smashed, Shen Lang has not attacked more defective organs, and he feels a sharp pain in the brain!

“dead—!”

A burst of thought poured into his consciousness.

Needless to say, this is the magical attack of the dragon. It is difficult to exert a powerful attack power in the current state of the body, and even the injury will aggravate the injury.

But its spiritual strength is still strong!

It has clearly felt that this human being is the chief culprit in making this situation. Now, even wanting to kill it, it is already an unprecedented anger.

Shen Lang, while letting himself fight against the spirit of the dragon, and then let the tower of the tower come out.

He is now a single-minded!

While fighting against the magical power of the dragon, while manipulating the sword of the king, cut off the connection of the organs; while using the tower, the large organs were absorbed.

This is the internal organs of the dragon!

These are given to people and to the beasts. They are all good things. Can not be wasted, inhaled into the tower of the tower, you can refine together increase the efficacy.

And he did not cut and absorb an organ, and he felt that the attack of the dragon was even stronger.

It is already very angry.

If you go on like this, it will die, your body will die, and your consciousness will not exist out of thin air!

At that moment, the dragon had another thought.

The body has been disabled to this extent, and there are three enemies. It may not be an opponent. Even if you can deal with one now, you may still die here.

It has been alive for so long, but you don't want to die.

If the body is already difficult to live, then live in another way!

Although it dislikes the human body, it can only pay attention to it compared to the current state of the body.

Therefore, its mental power attack suddenly became very strong. It was not only to attack the sinking waves, but to wipe out the consciousness of Shen Lang and completely encroach on his body.

At this point, it must be completed before the other two humans come over, so the attack power is raised to the maximum in an instant!

At this time, Shen Lang certainly immediately guessed its intentions.

He wants to continue to attack and absorb the dragon's organs. Naturally, he can kill it. But before he kills the dragon, will he be killed by the dragon?

Shen Lang advanced to the realm of great deities, and the mental power is already very powerful. Not long ago, after the one-day soul of the Dragon and the Terran Powers, they not only improved, but also had more experience.

But he also has a problem now. The two powerful gods are swallowed up by him, but they are still preserved, and there is no time to refine and absorb.

This time, I will fight this dragon, and I will inspire it again, but it will be a big problem!

Chapter 2049 - Experienced and desperate

The mental attack of this dragon is much stronger than the previous dragon.

Because it is the soul of the gods attached to the Excalibur, and it is a constant struggle with an old opponent, it is not bad to destroy each other.

This demon dragon still has its own body. Even if the body recovers slowly and recovers incompletely, it has its own roots. The Yuanshen can continue to cultivate.

In other words, tens of thousands of years, it may even be a little bit of cultivation to restore the peak time, and the two can only be a small part of the remaining.

Therefore, at this moment, the impact of Shen Lang, this one dragon is stronger than the previous two.

Before he was almost killed, it benefited from the intervention of Leiyuan.

Later, after the counterattack, the predecessor of the Terran made a choice to help him kill the Dragon God.

Now it is different. It is this dragon that has seized his body before he died.

Of course, Shen Lang still has a way, even if he can't beat it, he can't escape. As long as he hid in the space of heaven, the dragon also took him.

But there are two problems with this.

One is, now this is the best chance to kill the dragon!

I don't want to say that the dragons and the human races dominate the big problems in the world. They are also a powerful enemy and cannot let it live.

The other is that the cold autumn and the snow are not snow, and will come to help soon. When he flees, he will inevitably invade one of them.

And he himself has already made it clear that the two of them are still unclear. If they are not good, they will be successfully attacked.

In fact, when feeling the aftermath of the shock wave, the cold and autumn snow is not snow, the first is self-defense, and then the state of Shenlang is sensed.

Seeing him there is nothing, then the sword cuts the internal organs and absorbs them with the tower.

This made them hesitate, did not come directly to help!

Spiritual attacks, they are invisible and inaudible. The distance between the distances and the explosive power of the explosion is too great, and the appearance of the dragon is also very miserable.

Everything makes them feel that the dragon is already in a state of sudden death.

Even think that those internal organs still remain, it may be that Shen Lang has controlled the power of the explosion!

Perhaps he has a magic weapon, and then the use of the treasure bomb attack, confirmed that it is almost finished, to avoid waste.

If this is the case, then these are the ones left by Shen Lang. This is the same harvesting trophy that cleans the battlefield.

Then when they came over, they were not helping, but they were taking advantage of it.

Whether it is the relationship between everyone, or their dignity, they have not helped a lot, and two people are too embarrassed to pick up the fruit.

So they did not come over immediately, thinking about waiting for Shen Lang to pack up the dragon, and then come back again.

Shen Lang didn't understand this. I think they will come to help soon, so even if he leaves, he will leave two live targets to attack the dragon.

Even if he opened the police, it was too late.

So he can't leave, he must fight hard to the end!

In addition to these, Shen Lang himself also has a obsession.

Bright God.

When the ***** of the sun is just an idea, it will crush him, that is the hurdle that he wants to go.

In addition to becoming more powerful, more experience is needed to compete with the strong.

This includes the experience of confrontation in mental power.

Therefore, Shen Lang is still a three-pronged approach, while keeping himself recalcitrant, on the one hand continue to attack, through physical destruction, to weaken each other's mental and willpower.

This is actually effective.

The former Demon Dragon and the Terran God Spirit, because they have long since departed from the flesh, Shen Lang is completely destroying their cheekbones, and will not have any influence on them.

Instead, destroy the Excalibur to affect them.

Now this dragon is alive, it is still in its own body, the body is damaged, it will affect the spiritual will.

The more he attacks, the more he is eager to get angry, and the more he attacks, the stronger it will be.

But in turn, it will not last longer!

However, it is said that the actual implementation process is one second, which is very difficult to adhere to.

Like a motion sick person, or a person who wants to diarrhea, let him hold on for a while, he will feel like a second...

There is still a way to sink the waves, that is, a bombardment on the head of the dragon!

This will inevitably affect the spirit of the dragon, and as long as a little delay, he will be able to harvest other organs, and then the inner Dan, the brain!

But when he thought of the ***** of light, he regarded this as an excellent experience.

Such an enemy is very difficult to encounter, so the opportunity of pure mental attack is more difficult to encounter, so we must cherish the opportunity.

Escaping or attacking in other ways is a waste of this opportunity.

In this way, Shen Lang is deliberately slowing down the speed of harvesting, and the focus of one-mindedness is on mental strength.

This must also be engrossed, and it will become an idiot with a little carelessness and be occupied by people.

Similarly, he is thinking about how to have a better way to fight!

Before the confrontation with the bright **** he is hard, the final result, that is, the last step was almost suppressed, and finally suffered a heavy blow.

Now the confrontation of the front is hard and hard, and it may not be the opponent of this dragon. He is experienced, and people are desperate!

It is inconvenient to use other methods. Is there any clever and intelligent solution in terms of mental resistance?

Shen Lang thought of the same thing he had studied and analyzed – Shenguang!

The light of God comes from the **** of light, and its formation is the more pure spiritual power – the power of faith.

That is to store and materialize the power of faith. This can be used to help people practice, can be used for treatment, can display miracles in the lower bounds, or can be used as weapons.

In the light god, even the ultra-long distance that can travel through the world space!

Such an extraordinary existence, naturally, will not come out when you think about it, but it will be studied from generation to generation.

Shen Lang is a genius of the two worlds, but many of the geniuses of this world rely on the experience of the previous world, as well as various adventures and harvests.

In the last world, he was a genius of talents, but in the end of the apocalyptic era of the earth, the creation of “Yin and Yang Bozhengzheng” did not rely on his own head, but absorbed the strengths of the family.

Now he has more than just the experience of two worlds, as well as the experience of a technological world like the city. In terms of concepts, etc., it is far better than others.

Therefore, he studies the light of God, there is no need to start from a little bit, the principle is analyzed, there are also physical research, but it has been contacted many times, and it is already possible to step on the shoulders of giants to explore.

Now, Shen Lang wants to challenge and turn the magic power of the dragon into a light.

Chapter 2050 - Shenguang Dacheng

Shen Lang will challenge at this time. On the one hand, it is a rare opportunity. If you miss it, you don't know when it will be. On the other hand, it is related to the field of God that he has just learned!

I just felt the realm of the demon dragon's god, and inspired the magic dragon's memory and instinct consciousness, so that he already had a general understanding. And this mastery, let him give the opposite.

The field of God is used to control the environment. What about spiritual power?

With this association, he decided to try it now.

The mental attack that made him a headache is actually very dangerous. If he can't resist it, he will probably explode his consciousness.

He has always been using resistance.

Now it is another way to guide!

For the spiritual power of that, give up the confrontation, change them to guide them to a point, and then refer to the manipulation of the realm of God, and use them as an energy to manipulate.

This process requires extreme care so that the waves stop the attack and stop the absorption of the tower.

He is now working with one heart and one mind. One is to try to guide the control. The other is to maintain defensive alert. If you can't control it, you still have to go back to the strong confrontation.

Before the storm, the first generation was lack of experience in this respect. He is also the right way, relying on personal cultivation.

In this world, as soon as I first came to this world, I explored the Imperial Gate, and the big men on the earth were imprisoned, and they were forced to create spiritual bubbles.

That is actually a lower-level use, which collects the spiritual power and adds spiritual cultivation to the people of Yuxianmen.

After that, I will be exposed to the holy paintings of the gods of light, the gods, and so on, and then to the back of the gods. All of this is similar, only a hierarchical difference.

For example, the method of Yuxianmen is aimed at the individual and actively contributes to the mental power. Even if it is forced, I am actively making it.

The sacred paintings of the Light Gods are passively accepting the spiritual power of countless believers.

Later, Shen Lang himself can absorb the power of faith, and it can be received across the world space.

In this regard, he can also say that there is a certain accomplishment.

What he needs to grasp now is to turn passive into active!

Transform the passively attacked and direct it into active storage.

These are complicated to say, and in fact the implementation is more complicated. Shen Lang is not fully prepared for the theory. Now it is time to adjust.

But the whole process is very short-lived, because now is the combat phase, it is impossible to give him a lot of time, and it is impossible to slowly make faults and adjustments.

So no matter what changes, it is actually calculated in microseconds.

The dragon was supposed to crash and collapse, but it also felt that Shen Lang stopped the attack on its residual organs.

This is undoubtedly good news for him, but it will not stop, and the body is ready to give up.

It is that Shen Lang has been unable to resist, and has already attacked it innocently, that is, bitterness is all out.

At the same time, it also found that the two people did not catch up, which made it a little more time.

Therefore, it did not blindly strengthen, but chose a stable way to maintain a strong and steady attack, I believe that Shen Lang can not last long.

This gave Shen Lang a chance to make his guidance work and did not fall.

And even a large amount of absorption and storage process.

He himself has absorbed the power of faith, and there is also the light that is absorbed from the apostles of the Light God. This is the ready-made “mold” that can be used.

Sure enough, after the light was turned out, it was originally guided to gather a little, and the massive spiritual power that was almost to explode immediately became an export!

Those gods, like sponges, attract these spiritual powers and immediately cooperate with his guiding transformation to turn the severe excess mental power into a part of the gods.

Shengguang is a sinking of people, and it has not been used many times. Because it will be used less, there is no way to make up for it.

But now it's different. These spirits are like ready-made raw materials, and they have begun to add a lot to the past.

The speed at the beginning is still a bit slow. After all, there is still a big difference. The manipulation of Shen Lang is still very rude, but to the realm of him, what is needed is only one point.

When this point appeared, the channels were cleared, and the others were all in one fell swoop.

Shen Lang almost instantly understood a lot of unconnected theories, and even did not need so much theoretical guidance, and naturally it worked.

Soon, a lot of mental power has turned into a lot of light!

Once the channel is passed, the process is getting smoother and smoother.

Shen Lang is still maintaining a high degree of attention. If he does not continue to attack it, he will hang in the air and fight against his mental strength.

The dragon quickly realized that something was wrong.

It was supposed to continue to suppress, and it could be felt that the Shen Lang could not support it. I thought that if I persisted for a long time, I could crush this little human.

However, changes began to appear later, and its mental power seemed to be leaking out, and it was extracted from something.

This made it horrified, and quickly increased the attack, can no longer smash must strongly suppress this human!

But after the increase, I feel that the speed of loss has become faster, as if the other party can swallow its mental power...

This is unbelievable, but it is not impossible to think about it. It can also swallow the flames of others. It may be able to devour its spiritual power.

It became difficult to ride a tiger.

If you continue, you may not be able to get rid of each other, and you will not be able to take advantage of this body. Instead, you will lose your mental energy.

If you don't continue, you will not be reconciled. There is no better way to attack it now. If you have been prolonged, there is no chance of winning.

The dragons are the dragons in the end, and their physical advantages are too strong.

At this moment, it continued to maintain the output of the mental attack of Shen Lang, and then another mental power, like an entity cone, nailed into the waves!

Shen Lang just absorbed its spiritual strength and absorbed it very joyfully.

The spiritual power of these dragons has all become a god, and they are stored in the form of divine light.

This is not only the joy of success now, but also because of the success of this attempt, he has found a new way, and in the future when there is a strong mental attack, there can be a better solution.

Now only need to continue to persist, you can use the magical power of the dragon, and it will be as easy as it is to ***** it up.

But what I didn't expect was that it made him attack hard before he could hardly stand the mental power. In the magic dragon, he was only part of it, but he could still be divided into another attack!

This sudden spiritual cone, the feeling of nailing from the head, makes Shen Lang feel like the head is really opened, almost lost consciousness!
