

First Strong 205

Chapter 205 - Chasing

For this trick of Chu Yunfei, Shen Lang is a bit broken.

Under the observation of the gods, the smoke can not be isolated from the observation of his environment. He flew directly and jumped, kicked a stone next to him and went straight to the back of Chu Yunfei!

When I jumped up, I grabbed the bullet that had been blocked by the sword before, and sucked it into the hand. At the same time as the stone kicked out, the bullet flew out, and shot a little faster than the stone. !

He can't catch up with two at the same time, but can come one by one, neither of them will let go!

Chu Yunfei was running wildly, feeling the sound of the wind breaking behind him, looking back and seeing a big stone flying over, suddenly relieved.

Since Shen Lang attacked him with flying stones, he said that the choice was to pursue Xie Tongwen. He may not run to win the waves, but it is not difficult to win the stone. Because the stone is very large, it is impossible to throw too far, and the resistance is also large, and the slower the flight.

Therefore, he did not dodge and modify the route, fearing that he would stop the chasing after the stop, and a mind quickly swept out in front.

But just a moment of work, he felt that it was wrong, and there was a smaller but sharper sound of breaking through to the back!

There is no time to look back. Chu Yunfei immediately began to strain and let himself jump to the side, although it will delay a little bit of time, but as long as Shen Lang chased the same text, this is nothing.

But he immediately felt a pain in his back, and something was embedded directly on his back!

This pain made him suffocate, and with the impact, he almost fell down. At this time, the big stone also fell to his side!

Chu Yunfei was shocked. Although the time was not long, at least it had already flew hundreds of meters away. Shen Lang could actually take such a big stone so far!

And this stone is just a cover for the cover, what really hurts him, what is the hidden weapon in the back!

He can't care about the extent of the injury. Since Shen Lang chose to hurt him, it means that even if he first pursues Xie Tongwen, he will immediately fall back and chase him.

As soon as he gritted his teeth, Chu Yunfei took out a ball that looked like a stack of papers, and immediately paid attention to the vitality. The paper ball quickly became bigger, formed a spherical shape by the cyclone, wrapped his whole person, and then quickly Flying directly to the front, the speed is much faster than when he flies himself!

Shen Lang is still confident in his own shot. A big stone kicks out. It is to attract Chu Yunfei's attention. He thinks that he can only fly a big stone and can't reach him. It is a real attack.

Then he did not wait to see the effect, and did not catch up, but quickly chased the past in the opposite direction of Xie Tongwen!

In the case of Xie's betrayal or conspiracy, he wants to kill Xie Tongwen and rush to Xie Tongwen's thoughts about falling into the rain, and must also kill!

Although they all ran out for a few seconds, but exhibited "Phantom Meteor Steps", Shen Lang was very confident that he could kill both people back and forth.

While chasing Xie Tongwen, his knowledge also continued to pay attention to the situation behind Chu Yunfei. The big stone fell, and the bullet hit Chu Yunfei's back, which was in his calculations.

It's too far apart, it's good, it's impossible to estimate the key, and it's not as close as it is at a close distance, so Chu Yunfei can continue to escape, and the waves are not strange. As long as you are injured, you will not be far away and will leave traces.

But when the paper group came out, it surprised him.

This is a musical instrument!

The cyclone package can give people inside a strong defense protection, and then can fly away with the target at high speed.

But this is a pseudo-apparatus, or a one-time implement.

This is because some people use the paper group as a medium to make a temporary implement. When it is stimulated, it can exert the effect of defense and escape. But it relies on mana support, not forged, and will dissipate after use.

The small paper group became a cyclone group and wrapped up at Chu Yunfei's high-speed flight. It soon surpassed the scope of Shen Lang's knowledge detection. It was impossible to determine where to go and how far it was.

This change made Shen Lang speed up. Chu family has the secret to give such a life-saving, Xie family is likely to have, can not let Xie Tongwen run!

Xie Tongwen is not a fool, just because Xie Yunlin's legs are broken and temporarily lost. Just waiting for him to flee, he has already regained his enthusiasm and let go of everything that immediately awake to realize Chu Yunfei's intention.

That became his match with Chu Yunfei, who escaped faster and farther, who has the opportunity to live and revenge!

So he didn't dare to look back, just rushing forward. However, unlike Chu Yunfei's choice of the shortest route, he is following the changing route of the terrain, so that he should try not to let his body go straight, so as not to be attacked by the back.

So almost sprinting at the limit speed, about a few minutes later, he felt that there was no pursuer behind him, and he could not help but be fortunate.

Before they ran together for an hour, he walked in front, and Shen Lang was behind him, so he was already familiar with the footsteps of Shen Lang. Just rushing, did not hear the footsteps behind, it shows that Shen Lang is likely to chase Chu Yunfei!

But even so, he must continue to run wild, because the sooner Shen Lang catches up with Chu Yunfei, the more likely he is to return to chase him.

But in order to reassure himself, he didn't pause, just slowed down a little, then turned his head and looked back.

Behind a forest, I couldn't see the place where the boulder was. If someone catches up, it should be far from visible.

Xie Tongwen, this is often a sigh of relief, just speeded up a few meters and stopped directly. Then he looked at the front, in the dead forest, there is no road, it means The "road" in which direction is the same. Just now he had a twist, but the overall direction is still forward.

That is to say, if Shen Lang went to the other side to chase after Chu Yunfei, then chasing him in this direction, but the speed can not catch up with the problem, or just the problem of time.

Thinking of this, I am going to change direction, but after adjusting the angle, I just ran out for more than ten meters and stopped.

"No... the most dangerous place is the safest place..." Xie Tongwen murmured softly: "I should let him think that I am desperate to escape to the distance, let him chase away from the distance..."

Then he decisively turned his head and began to take a big circle from the side, and then went to the place where the boulder was.

If Shen Lang killed Chu Yunfei and left for the best, or else he would pass him by, and he could leave with ease.

He didn't know, it was all under the gaze of Shen Lang!
