

## First Strong 2061

Chapter 2061 - Devil infested

Everyone knows that there is at least one dragon, and now I will feel the smell of the dragon, no doubt it is coming over!

A few of their gods immediately looked in the direction of the magic dragon's breath, and Shen Lang compared it in the brain.

From the trajectory of the route he walked through, the maps that are outlined can only be a few lines. The specific area between the routes is still unknown.

But the big direction can still be confirmed.

The place where the dragon is now appearing, the direction behind him is the one he came over before.

Of course, this does not mean that it is the same dragon. Or change to another direction, or it may be the same head.

After the emergence of this magic dragon, it was directly running here, but the speed of movement is not too fast.

The three people of Shen Lang quickly exchanged their eyes.

Whether it's the same dragon or not, it can come here, it won't be random, it's too coincidental.

Only one possibility!

That is the dragon that has been nourished by the essence of heaven and earth. You can feel the existence of the essence of heaven and earth.

Think again, it is half an hour away from Shen Lang. The road that is more than ten miles is not counted. The back of the waves come here, there is still time for fighting, and it has disappeared for two or three hours.

Even if it is slower, it is not particularly fast before Shen Lang. If it is true to come here, it will not be said that it has already arrived, it should have been a while.

But before the two of them were here, they were unaware of it. After the swells came out, they were not aware of it.

Will sense the smell of the dragon, is to dig out the essence of the world, and give it two observations in the air!

This analysis brings out another problem, and that is the range of the magic dragon's induction, which definitely exceeds them!

Originally it was observed in the distance!

Perhaps it was the performance of Shen Lang and the dog \*\*\*\* before, so that it has some scruples, so it will retreat. And here is the essence of heaven and earth, it should also be able to sense it, so it rushed over.

But its speed is slower, or the route it takes is not good, it has to be slowly sensed, etc., so when it comes over, it should be after the wave of the dragon.

Otherwise, it will definitely leave with some scruples.

When it arrived, it was found that the two cold autumns and snow and non-snow were here, so I was a little concerned. I didn't dare to come, but I was not willing to leave, so I waited in the distance.

When Shen Lang appears, if it can identify the same person, it will start to evacuate.

However, Shen Lang quickly dug out the essence of the heavens and the earth.

This thing is difficult to sense. When buried under the ground, perhaps the dragon is only knowing a general, not clear what is specific, or it will block the induction.

And Shen Lang dug it out and publicly displayed it, and the attraction is different.

At this point it was coming over here, closer, so they could find out.

“I am going to find it, just come over!”

The words of Shen Lang are decided for everyone.

If it is the same dragon, I would like to find it. If it is other, it is even more clear.

I have already killed a dragon before, which undoubtedly made their confidence so great.

Even if the whole process is mainly completed by Shen Lang, but participated in it, Gao Hanqiu and Xuefeixue also have certain experience. Including the process of onlookers, it also accumulated experience.

They all believe that once again, they must be able to play better.

Of course, they also feel that the pressure is huge, because the previous Shen Lang was almost completely destroyed, and there can be no such behavior. And he can't easily use his mental power now, or else he will be out of the situation.

So this time, they want to play more and they must play the main role.

“Shen Lang, you should put this up first!” Snow non-snow whispered.

Their gods sense that the dragon is getting closer and closer, and the speed is not fast. It is only relative. In fact, it will not be too slow. It is just a little while.

Shen Lang shook his head: “First wait. This one should be the one I encountered before. This guy is still a bit awkward, knowing to avoid it.”

“It should have been clear about our movements in the distance, and the essence of this world is released to attract it.”

It's also reasonable to think about snow and snow.

If it is not here at this time, if you want to run away, then you have to chase it up. It is better to wait for it now.

So the two of them did not have more nonsense, but took out their weapons.

They used to go to the Yungong Holy Land. It was probably very dangerous. Nothing was carried too much, so as not to lose the martial art.

So now the weapons are not upgraded, or the swords and the scorpions before.

The weapons have not changed, only two or three hours apart, their strength is not likely to improve, but with experience have a summary, tactics and specific implementation, can be changed.

The two people were separated from each other, and after they were deployed in the field of the Dragon God, they became passive. This time they have already discussed it and decided to cooperate with each other and get started!

“Come on! You can do it! You continue to attract it with the essence of heaven and earth. I will cooperate with Xuezhangmen!”

Gao Hanqiu was not polite with Shen Lang at this time, and made arrangements directly.

In his view, Shen Lang's spirit has been extremely injurious. It has only been more than two hours since he left. Even if he has obtained any medicine, it can only be temporarily suppressed and adjusted, and it is impossible to recover immediately.

If you accept him as the main force, it will hurt him!

Snow non-snow immediately said: “Yes! You must control the Shenlang, don’t let it take away the essence of this world, or else you can directly restore it completely!”

Shen Lang is secretly funny, and their minds, he knows and appreciates. But this reason is too superficial, right? Give him a task to protect the essence of the world, can you open him?

But he immediately groaned again.

He has no clear proof of the specific effect of Tiandi Essence, but he has already given the dog a \*\*\*\* drop. He also took a drop of himself. From this “ten days”, the effect on cultivation is still great.

Only he not only took a drop of the essence of the world, Gao Hanqiu also gave him the brain, he also absorbed the dragon ball, the specific effect does not know who played the role, and the short absorption of time is limited.

But he is not poisoned, the dog \*\*\*\*\* is also getting better, indicating that at least this is not toxic, it can be taken directly.

Then why are these two dragons not eating and taking?

Chapter 2062 - Sword combination 1

According to the previous analysis, the dragons are killed and killed in the vicinity of the essence of heaven and earth. Since they have not yet died, the gods have also been protected, and then the body is rotting, and some are nourished.

In the end of the long process, it has formed such a situation. That is, those wounded flesh and blood, etc., are all corrupted, and new ones grow out from the inside out.

Go on, after a long time, now there will be skin outside the flesh and blood, and there will be scales growing out.

However, according to this analysis, even if it is a sudden death and a bit of a deadly state, it is impossible to move. But after a long time, like the body of their body, it should have been a long time, and it is still a part of the battle.

That can completely swallow the essence of the world, which is undoubtedly much better than the passive absorption in the vicinity.

If they swallow the essence of the heavens and earth, of course, it will not work in ten days, but in ten, one hundred, one thousand years, it should be huge, perhaps it has already grown up, and it has already recovered to the peak. .

They have already reached this level, and there is nothing that can't be lost. The one that survived is also brought back. It can be put together.

Normally, I discovered the essence of heaven and earth, and they certainly will not let go.

For thousands of years, tens of thousands of years have not been moved, there is only one possibility – that is, they themselves do not know the specific changes caused by what!

But the final battlefield of the burial dragon valley is chosen by the dragons. They are clear about this murderous land. There are some special places that are understandable.

In other words, they are likely to attribute this miracle to the special circumstances of their environment.

Just like the dog \*\*\*\*\* can be attracted to the past, but can not say the specific, they also know that this is special, but do not know why it is special, carefully and do not feel any specific baby, so can only stay there for a long time.

It is the same as Shen Lang, even if it has been dug directly, it has not been found.

Now that this dragon will come over, it may not be the impression that the essence of this world is extraordinary, but it has been there for a while, and it has sensed the process of mining the waves!

It can determine the approximate position, but the environment is good, it is to wait for the people to leave, and they used to live there.

However, Shen Lang brought people to dig out special things, which inevitably made it guess the specific reasons.

It only understands now!

This is the biggest possibility, which can also explain its inconsistent attitude.

Before it was shot in the poisonous grass, he did not dare to show up, but left later. I did not take away the essence of the world, because I did not know, the environment is not to take away.

Now I see the existence of the essence of heaven and earth. After I get it, I don't want to swallow it. At least it can be carried with a portable one. It doesn't need to be fixed in one place. It can be anywhere.

That is undoubtedly a huge attraction.

After trying to understand this, Shen Lang will have a clearer understanding of the goal of the dragon, that is, to come and \*\*\*\* the essence of heaven and earth in his hand.

Therefore, he did not compete with the cold autumn, snow and snow, but they acted as the main force.

Anyway, the essence of heaven and earth is in his hands, naturally it will attract the dragon to attack him!

The consequences of the First World War were very serious, and the aftereffects have not been resolved. What if he becomes the target of the magic dragon attack again?

The previous experience, Shen Lang is also very helpless, the two of them are very hard, but the understanding of the dragon is limited, and can not play their own strength.

Explode it again?

The reason for success before, the big reason is that the demon dragon is the light enemy. Now this dragon, even if they have not seen their battle with the dragon, they have seen him and the dog \*\*\*\* to deal with the poisonous grass, but also have experience, will give Does he have a chance to explode?

The weapons inside the holy armor are no problem, and the stronger bombs are there, but there must be opportunities.

The success before, because of the magic dragon's intention, swallowed the waves into the belly, only have the opportunity to explode from the stomach.

If you are outside, don't say anything else, light is a realm of God, you can pop the bomb out, you can't reach it; if you blow it in the field, it will be from speed to direction, angle, etc. Dragon controlled.

The result is that it is very likely to bomb the bomb!

How long has this dragon come, how much do you know? See you again, will you not be underestimated?

If you dragged into the spiritual war...

When Shen Lang is thinking about this, the dragon has appeared in the line of sight!

The two people, Gao Hanqiu and Xuefeixue, quickly rushed out and greeted them in advance.

The sword in the hands of Gao Hanqiu directly swayed dozens of swords, like a substantial sword. He quickly slammed the past into the dragon and penetrated directly into his body.

And he personally continues to move forward, with his temperament, with the spirit of the sword, the sword and the sword, the sword and the sword!

In such an instant, he seems to be a sword light together with the sword!

This hit is even stronger than the previous one!

The sword that failed the previous attack on the dragon was the strongest blow, but it was a blow to the sword. Now is the strongest blow to the sword!

This is to gamble the whole person, not only the power of display, but also the power of the whole person.

If it fails, that person will also be greatly affected.

To a certain extent, it can be said that this is a cold and fall style!

Snow is not as fast as snow.

The cold autumn has turned into a light in the air, and snow and snow have formed a red glow below.

This time they cooperated with each other, and the cold and cold autumn was the main attack, while the snow and snow were the cover and protection.

Her attack is to attract the enemy's firepower. It will not be the focus of the attack. Once it is in danger, the cold autumn is the end of the battle, and she immediately defends two people.

They are blocking fast, much faster than the Dragon!

The speed at which the dragons originally came is not too slow. Under the effect of the two phases, they immediately encountered them together.

The dragons are not only sensing farther than they are, but the details of the induction are also stronger than them. The offense of their cooperation, which one is the real storm, which one is left with spare power, it is clear at a glance.

The dozens of swords that have arrived first have also fallen on it.

At that moment, when there were still tens of meters away, the sword gas all rebounded into the air!

The ensuing cold autumn could not help but secretly complain.

As he fears, this magic dragon directly displays the realm of God. It does not need to wait for its active attack, or intercept them. In this field, he may not be able to break open!

Chapter 2063 - 3 people combined

However, there is no way for Gao Hanqiu, because he has already joined the sword, his body is a weapon, and now there is no turning back.

No matter what the outcome is, Gao Hanqiu is going all out to kill the past, he will arrive soon, there is no time to retreat!

Snow and snow also saw this situation, so that she also understands that the consequences will be very serious.

As a result, her pressure is even greater.

Because the cold and cold poles may fail, and if they fail, they may lose their lives!

Then she needs her rescue. If she can successfully protect people and save people, I will complete the task.

However, everyone already has experience, and it is expected that there will be this situation, so there is no panic, but go all out!

With their strength, they have been fighting for the two defeats. It is already the biggest effort. If we want to go further, it will only be self-destructive.

So what the result is, they have not considered it, and it is enough for two people to do their own tasks.

When the attack of the high-altitude autumn swords is only a few tens of meters away from the body of the dragon, it has reached the edge of the field of the dragon god, and it has reached a critical moment.

Gao Hanqiu has already made the worst plan, and only hopes that he can try his best to tear a hole in the field of God.

He understands that even if they attack the main force, Shen Lang will not wait.

When he can't hit each other, as long as he creates an opportunity, Shen Lang will surely catch it!

He has more than a hundred years of sword repair time than Shen Lang. He asked himself that the martial art is not low, but the talent of Shen Lang has always been admired by him.

Therefore, I believe that Shen Lang, even if he is still young, should be able to play a strong sword, not to mention that he still has a sword.

As long as he tears the field of God away, Shen Lang is followed by a sword, and he should be able to hurt the dragon!

Snow and Snow found that the dragon was just a collision, and did not pay attention to the attack of the cold autumn, and did not pay attention to her dispersing firepower.

It can only be the power of the attack, and the full defense, waiting for the rescue of the cold autumn.

At this time, the dragon that rushed over, at the moment when one of the feet landed, the ground actually exploded with a thunder, and the lightning penetrated directly into its legs and feet, and then it shocked it all!

The dragon is kept running, crushing like a giant tank.

Therefore, the realm of the gods at this moment is relatively simple, more like an upgrade of the surrounding defensive hood, or a defense arranged around the way of the gods.

Just under its foot, it seems to have guessed a thunder, the powerful impact of lightning, not from the air, but from the ground, like ambush on the ground, at the moment he stepped on.

There is no dodge and defense, and it has to bear it.

This aspect is unexpectedly unpredictable. On the other hand, it is a very powerful thunderbolt that acts directly on its body, giving it a numbness in the whole body!

This is of course a dry wave.

He quickly thought about combing all the situations before, and then analyzed how the plan was to the other dragon.

It is difficult for a bomb to have a chance to play. Not to mention other attacks, there is no manipulation in the realm of the gods.

Looking at the trajectory of the dragon's advance, and then the attack of Gao Hanqiu, Shen Lang immediately thought of a way to cooperate.

The attack of a normal high-altitude autumn man sword, even if it can be effective, will be the result of both losses. The cooperation of snow and snow is to prevent him from being killed, or to rescue him.

Shen Lang must avoid this situation!

So he directly issued a lightning attack.

The power of lightning he possesses is also huge, but he still can't compare with Leiyuan. At this time, Leiyuan can't be shot, so it doesn't have a good match.

Therefore, his own shot is to bring this mine to a precise mine.

His thunder and lightning, that is, at the critical moment, passed through the ground to the place where the dragon was settled.

With the body of the dragon, this is not afraid of deviation, and a few meters of error can hit the target.

The key is to hit the cold autumn!

Because of this attack, it can only be regarded as an interference effect. It is impossible to kill and kill the dragon.

When it appeared early, it scared the snake and let the other party strengthen the defense counterattack; when it appeared late, the cold autumn was injured, and the attack was also abolished.

Therefore, this time, Shen Lang is only an interference attack, but it is very critical and the difficulty is very large. He also has to manipulate the essence of the heavens and the earth, and he must remain attractive and cannot be captured by the dragon.

When the magic dragon encountered the thunder of lightning, the paralysis of the body, let the defense of its field of God suddenly disappeared!

The attack of Gao Hanqiu is coming to the front!

Waiting for it to regain the defense of the realm of God, the high and cold autumn of the sword and the sword, like a high-speed light, instantly passed through a distance of several tens of meters.

When the snow is not shocked, it is a spirit!

She has recovered the attack and is preparing to cope with the cold autumn. I did not expect it to attack the past!

This thunder and lightning will certainly not appear out of thin air, even if she does not know how Shen Lang did it, but she also knows that it must be dry.

At this moment, she had no time to think about it, and she had to defensively cope with it, and immediately rolled forward again!

In a timely manner, she adjusted her strategy according to the status quo and changed her defense into an attack!

What is needed in the cold autumn is an opportunity. As long as it is not blocked by the realm of God, he can directly attack the body of the dragon.

Under the unity of the sword, there has been a strong sword in front of it, before the human and the sword, directly hit the body of the dragon.

If the dragon has a hard scale and is protected, there is really no way. Even if it breaks through the field of God and attacks it, it will be blocked.

Now there are no scales and no thick skin. The huge pieces of meat, although not afraid of everyday touches, are buried in the mud and sand, there is no problem.

However, under the sword of Gao Hanqiu, this power is still incomparable.

People are the source of power push the sword, the sword then forced out the sword mans, and instantly opened the body of the dragon, a big hole!

The paralysis of the dragon is only a flash, and it can immediately restore the defense of the realm of God.

But because it is running, now after the paralysis of lightning strikes, although there is no fall of the horse's forefoot, it also affects the rhythm, making its reaction slower.

At the moment of re-recovery, Gao Hanqiu has already drilled its body!

A large hole was drilled over the flesh, and even if it was very powerful, it could not be unresponsive.

What's more, the snow and snow attack is coming!

Because she is following the rhythm of the cold autumn, although it is now a defense to attack, a little behind, but the sky is also followed.

The broken flesh and blood that was drilled into the body was rolled over. It seems that the scorpion will be stuffed into the hole and the hole will be pulled open!

Chapter 2064 - Enchanted dragon

The combination of the cold and autumn and the snow and snow is a key point that needs to be the first!

Just after the help of Shen Lang's help, they created a first opportunity for them. Gao Hanqiu has already entered successfully, and he has taken the lead.

The power of the swordsmanship of others is not only to open a large hole in the surrounding area, but also to penetrate the other side after entering the body.

He immediately turned into the wall of the dragon and immediately turned.

Because the sword is one, he is the sword, the sword is him, it is completely arbitrary, so as a light in the belly of the dragon quickly and irregular rotation.

This dragon has no protection from the epidermis and scales, so it must not be close to attack.

In case it is really close, the outermost thick muscles, like walls, are a better layer of defense.

However, the muscles have also been penetrated, and the internal organs and the like, even if it has the power to infuse the energy defense, it can not be done like a copper wall.

Therefore, under the paralysis of lightning strikes, it can only recover in a flash.

However, the cold autumn that seized the opportunity, in the belly of it, had to stop.

It must have the defense of power at this time, toughen all the internal organs, and try not to be chopped up.

But it is worse than the previous one.

Before that, the swallow was swallowed in. First of all, it was in the stomach. The strong corrosive power has a great influence on people. As long as it persists for a while, it will digest people if it is not good.

At that time, Shen Lang was the first to burn the fire around the earth, and then the bomb was released.

Now in the cold autumn, it penetrates into the belly from the side, and there is no such thing as gastric juice to attack it. The magic dragon is so powerful, and does not know how to attack the enemy in his body.

The high cold autumn is a fast turn. Every time you turn it, with the sword of the sword, you can quickly cut everything you touch with his body.

Including swords!

At this time, the sword is swayed, and for all internal organs, it is also different degrees of damage, even worse than sword cutting.

The dragon's stop is to avoid the attack of the other three people. At this time, in addition to the defense as much as possible, it is to attack the snow and snow!

It also fits the tactics of Wei Wei Zhao. If snow and snow are in danger, Gao Hanqiu may quit to save her, then it will have a chance.

It is a pity that Xuefei Snow had already made a decision, and it was changed to an attack in the first time, and the scorpion also went to the wound of the cold autumn.

So when the dragon attacked her, she was caught in the hole under the hustle and bustle, and went to the belly of the dragon like a cave.

The dragon could not help but scream!

The two enemies, who have now penetrated into its abdomen, attacked themselves in the first place, regardless of how they attacked.

So the long beep at this time is the targeted sonic attack and the powerful pressure!

In this regard, it is still very good control, so that the sound waves penetrate from the wound into the abdomen, but directly attack the two invaders, without hurting the direct creation of organs.

This can still be controlled for it, but the problem is that the cold autumn and the snow are not snow, not stationary!

The cold autumn has always been a fast, irregular rotation, and wherever it goes, it is a huge destruction.

After the snow is not in the snow, the scorpion does not need to attack so much, and it can absorb the blood that broke out of the broken blood vessels.

These will make the mixed power more powerful, and will also make her gain, but for the dragon, it is a kind of damage!

The place where the cockroaches are rolled up is to absorb blood and the like, but the same is to wrap the blood vessels, intestines, and organs, and she is not fixed, that is, vigorously pulled.

The dragon is desperate!

It's very bad to go into a person, and now I'm in.

Moreover, these two people seem to have plans for a long time, and they are not rushing to break through the belly, that is, destroying it in its abdominal cavity.

As long as they insist on a little more time, when its abdominal cavity is destroyed, even if it can maintain its life, it will be a big injury, and it will not be their opponent.

At this time, Shen Lang collected the essence of heaven and earth and flew to the front of the dragon.

Looking at this human being, before it was a scruples, so I dare not show up, so that I do not reveal the slightest characteristics of life, the way is a corpse.

After waiting for the other party to leave for a while, I dared to come out, and then dared not stop and left the hiding place.

Now I still meet this person, and the other two people around him, the same can not be underestimated.

“Let me go... I am on your body, I feel a familiar atmosphere, you should have a relationship with our dragons... Please let me go...”

Shen Lang rushed over here, is ready, and when necessary, they can't let the dragon escape and hurt both of them.

If the two of them are inside, they can kill the dragon from the inside out, and he will not intervene, so that they can raise their eyes.

I did not expect this magic dragon to give him a sense of consciousness.

I felt the meaning of it, and Shen Lang immediately returned to a sense of the past.

“Let's let go of the struggle, let me take over your consciousness, I should be able to have a way to let you continue.”

After the consciousness passed, the dragon did not respond.

It is not stupid. Although it has not dealt with the outside world for tens of thousands of years, it has just been a little sick and rushed to go to the doctor, but think carefully, with the words of Shen Lang, you can guess a general.

This human body has the atmosphere of the dragons, not the close relatives of the dragons, but may have just killed the dragons soon, so there is a strong dragon atmosphere!

If you really give up the confrontation and let the other take over the body, then its life will be gone. This kind of continuation is a cultivation of energy and continues on the other side.

“Trust me! I want to go out as a human race!”

When Shen Lang was just talking to it, he had already taken out the pen.

At this point, the pen has drawn a real fantasy.

The magic dragon was shocked to see because it directly saw the little people in front of it, turned into a dragon similar to it!

The same is that there is bone blood, there is no skin scale, but it is definitely not its own shadow, and it is a little different, even if it does not recognize who it is, but it can be determined that it is another dragon.

After Shen Lang was near, he had scanned and compared the picture of the reconnaissance, confirming that this was the one that had run away before.

And his own illusion, of course, is the one that was killed here.

The head of this head is bigger, and it appears here. There is still its residual atmosphere. The dragon ball and spiritual power possessed by Shen Lang are also itss.

When he was just conscious of communication, he added a hint of the spirit of the dragon.

So this illusion, let this dragon also not distinguish between true and false.

Chapter 2065 - I am a dragon

This dragon is very intelligent. Before I could escape, I could observe it in the distance. It all shows that it is very cautious.

For a human being, it certainly won't believe it.

But the scene presented in front of it now makes it confused.

Because this is really a dragon brother like it, but it is sure not to copy it. More importantly, there is also the atmosphere of the dragons in the vicinity, and it has just felt the spirit of the dragons.

Even if the Terran can make a fake, these can't be faked.

“Believe me, I will definitely leave here, I will leave in the appearance of the Terran!”

Shen Lang continued to send a message of thought. “You will not be good now, why not fulfill me?”

The previous sentence of reaffirming is still to let the magic dragon doubt himself: in the end, is the dragon become a human being, or is it a person who becomes a dragon?

Even if you can go out and go out as a dragon, you will surely encounter joint attacks by all ethnic groups.

But the appearance of an adult, maybe you can lie.

But in the latter sentence, the dragon is not happy at the moment.

What makes my result bad? Completed you? Why are you not fulfilling me?

It is hard to survive, and then it is the torment of countless years. If it dies directly, then it feels nothing.

But it is not the same, it is not dead, I don't know when it means to wake up, and then I can feel that because the injury is too heavy, there is no treatment, and there are toxins around, so I feel the decay of the blood of the scales.

The dragon's ethnic talent is very good, let alone the scales, it is the flesh, it is a long process to rot. In addition to the long natural time, there is also the erosion of toxins.

The result may be rotten flesh and blood for hundreds of years, thousands of years, corrosive tendons, eternal time to kill scales...

Such a process, its consciousness is sober, can be felt, but it is powerless and can't change anything.

At that time, it would rather hope that the dragon's body is not so strong, it can rot quickly, or the toxin is a thousand times more intense, and it will soon die, no feeling.

I don't know how many millenniums and years of decay have reached the core, and then it's an extremely long process, and the body re-grows the flesh and blood...

Wounds from bleeding to hemostasis, to ulceration and suppuration, to anti-inflammatory muscles... Ordinary people encounter such problems, how to have a week or two, the process is extremely uncomfortable.

Not to mention it is not a week or two, it is tens of thousands of years!

Although I still can't see the head now, it takes thousands of years and tens of thousands of years to grow the scales. However, the most difficult time has passed, and now it is possible to act without worry, not so painful, and adapt to the environment can be cultivated.

When I say that I want to let it abandon myself and become a good person, how can I be happy!

Who are you? The face is big enough!

"Are you not adult? Are you not going to kill them, why don't you help me? You can also fulfill me!"

The magic dragon passed over a thought that was not good.

Shen Lang smiled secretly.

Of course, he did not expect to be tempted, he could just give this magic dragon a fool and give him everything. All he wanted was to delay the time.

As long as the dragon is willing to communicate with him, this time will be delayed. For a second, for the cold autumn, snow and snow in the belly, you can do a lot of things and do a lot of damage.

"I want to be close to them and go out with them. If they attack them at this time, they may not beat them. Instead, they will destroy this only hope. You also know that we have waited for countless years before we have this time. Opportunity!"

“I can fulfill you, but you can, but you are hurt. They are also wary of you, only to make you stronger, but it does not help, you can not take advantage of this opportunity to leave!”

Shen Lang’s serious two thoughts made the dragon a silence.

It has to admit that this is true.

Their time here is already too long, and it is so long that they don’t remember and don’t know how long they have passed.

This is really the only chance. The next time who knows how many millenniums and tens of thousands of years will probably meet, there is no such opportunity.

From an individual point of view, of course, I don’t want to be self-denying; but from the perspective of ethnicity, I should do it!

They are survivors who have experienced the great war of the year, knowing how terrible they are, and knowing how sad the genocide is for the dragons.

Perhaps in some ways, the torment of the rotted muscles of this countless years is also supported by the idea of the “long survivors.”

As long as you are alive, the dragons are not dead!

As long as you live and prove that survivors are there, there is one more hope – and there may be other survivors.

Now I have met other survivors, and the other party has already begun to leave.

For the survival of the race, it really should abandon its own body and become a compatriot!

“who are you?”

“Who am I?” Shen Lang responded immediately.

“I am the surviving dragon. What you see now is me. You can touch me. Before I saw the appearance of my human race, I met this human race, killed him, captured his memory, and transformed it.” Be like him.”

“I want to go out in his capacity. Now I can’t show my body for too long. I just want to win the trust of you and can’t let them discover it.”

After transmitting this idea, the picture seen by the dragon has changed. Without the sibling dragon, it is still the human appearance seen before.

This seems to make sense...

If this compatriot wants to go out as a human race, he must cooperate with the Terran to attack it!

Just when the two Terrans attacked it, he only did not start behind, which would explain the problem, and this may have caused the two Terrans to doubt.

This compatriot can’t really be in the shape for too long, so as not to be discovered by the two people.

Everything makes sense, and now it is at such a disadvantage. Once it is destroyed by the two races, it is better to use it to fulfill its own compatriots.

“I asked who you are? Who are you?”

Shen Lang understands this This is the identity of the dragon!

“Oh, I don’t know about you, but I have experienced a very long and painful suffering! Tens of thousands of years? More than ten thousand? Who knows? I have already forgotten who I was!”

“A long time ago, I had only one thought – I am the only hope of the dragon, I want to go out, I want to take revenge!”

Shen Lang possesses all the spiritual power of the dragon, and the memory can be extracted, but the time is too late.

The memory of the soul of the god, but also the fragmentation, many did not have time to sort out.

So at this moment he directly responded with impassioned words.

This really aroused the empathy of the other party, can feel the emotional changes of the dragon, the pain and anger are soaring!

Chapter 2066 - Will count

Because they are conscious communication, in terms of speed and efficiency, they are far better than words, so they say a lot, but time is just a moment.

“You are coming close to my forehead, I am fulfilling you!”

Shen Lang felt the idea of the sigh of the dragon, and promised: “Good! I will remember you!”

After transmitting this idea, Shen Lang has quickly flew to the forehead of the dragon.

For this dragon, the natural scorpion is a treasure, such as exposed meat, which has been re-growth under the nourishment of the essence of heaven and earth, and it has antibodies to toxic substances.

But to say that the greatest value is naturally two, one is all its spiritual power, and the other is the inner dragon ball.

This together is tantamount to the lifelong repairs of its countless years.

Let Shen Lang approach the forehead of the past, it should be to send spiritual power to him.

Before that, the dragon was fighting with Shen Lang, and finally it was a spirit of self-destruction. The consequences were naturally very fierce.

If it is actively instilled in him, although it involves the problem of endurance, it will not have too serious consequences, because the perfusion person itself can be condensed to a point, stored in his brain, let him slowly digest.

Fast, safe and easy.

As for the Dragon Ball, before Shen Lang has also experienced it, he can directly absorb it into the body from the chest.

In the dragon itself, it should be easy to manipulate for the Dragon Ball, including letting it swim to the forehead.

When the figure of Shen Lang quickly reached the forehead of the dragon, the magic dragon that was closing his eyes, suddenly slammed a mouth and swallowed the waves directly!

At the moment of swallowing into the mouth, a large amount of flame has been ejected, and the flame does not go out to the outside, and it is rotated around the mouth.

Compared to the previous dragon, it is obviously more savvy.

In this case, even if swallowed into the mouth, it will be a large number of flames burning, and not burning once, is a continuous burning!

With the power of the flames of the dragons, the burning of the moment, it is possible to burn everything into ash, let alone such continuous burning.

This is its plan, it will count on the plan, deceive Shen Lang, and then burn it before it is swallowed.

“District people, I want to count on me!”

After the dragon swallowed the sinking waves, it closed and let the flames burn. There was no direct roaring at the moment, but it spread out with spiritual thoughts.

Shen Lang is already in its mouth and immediately becomes a powder. This idea is known to the cold autumn and snow in the abdomen.

At the same time, the cold autumn in the abdominal cavity, the snow is not snow, suddenly found the surrounding space, like a high-strength gel, so that they can not move.

“Just you, want to kill me too?”

The cold autumn and snow are not immediately understood, this is in the dilemma of the field of God!

Shen Lang created an opportunity for them to successfully penetrate into the body of the dragon and destroy it, but this is also a moment of time, and then the dragon has already arranged the field of God.

The scope of the field can be large or small, the smaller the easier it is to operate, now they are in the other's body, it does not even need to manipulate a few hundred meters tens of meters, as long as the body is within range.

In such a small range, they succeeded in trapping them, and that almost one thought would be able to destroy them!

This shows one thing. The dragon's reaction is very fast, and it is very powerful. When the enemy enters the abdomen, it simply kills the abdomen and traps people in it!

Their two current situations are a bit bad.

When I came over, it was a good match, and the cold and cold autumn attacked, and the snow was not covered by snow.

But after he entered the body of the dragon, Xue Feixue also followed the attack.

Already in the other's body, they don't have to worry about the other's attack, because they want to attack them, they will inevitably attack itself.

So the two people are just simple defenses. Most of the power is placed on the offensive. It is to fight as fast as possible and destroy as much as possible!

If you break a blood vessel and crush an organ, you can weaken the strength of the dragon.

The tactics are correct, but the other party is not vegetarian.

Because it is the exchange of consciousness, the delay of the waves, the time of delay is limited.

At this moment, they are all desperate.

The gods pay attention to the situation outside, but did not see the waves!

They are all sinking in their hearts.

If it is before, you can still count on the waves. After all, Shen Lang is good at making miracles.

However, Shenlang people have already spelled a dragon, which is a simple adjustment after two hours, and did not explode all the spirits.

At this moment, it is obviously impossible to fight a dragon again. If you don't know what it means to be a dragon, you have already packed up the waves!

Gao Hanqiu directly thought of a plan – self-destruction!

With his strength, he really wants to blow himself up, and the ultimate impact will inevitably be inferior to the explosion that had been made before.

But he must cooperate with snow and snow, can not drag her together, but sacrifice him, so that snow and snow can be safe.

Just when the cold autumn conveyed ideas and snow and snow communication, the field of God suddenly appeared to fluctuate!

Since the purpose of Shen Lang is to delay the time, how can it be given to the “deeds” by the dragon?

He used to present the shape of the dragon, which is the real fantasy of the magical pen. The dark waves that appear behind the “Longhua” are still the real fantasy!

He wants to delay the time, and the speed of consciousness communication is fast, not enough. So the dragon let him go to the forehead and said that he would fulfill him. He is also happy to go.

But in the past, it was just the real shadow that the dragon saw. It swallowed in and burned, it was the same effect.

This was in the previous dragon, Shen Lang has been used once.

This time if you do it directly is also very difficult to succeed, but because of the two of them entering the abdominal strangle, the dragon is not able to cope with him, and he really releases the spirit of the dragon This is more confusing.

The dragon still doesn't believe that he is a demon dragon. He wants to take care of him and eat it. Plus two of them, he will complete it.

Shen Lang is also going to count the counts in turn, and everyone is intrigued.

When creating a real fantasy, Shen Lang is a large area of simulation, including blank spaces, and he himself is out of the game.

Therefore, the dragon couldn't see him. Gao Hanqiu, Xue Feixue did not sense him, and thought he had something wrong.

Just as the Dragon Dragon swallowed the “Shen Lang”, when the madness swirled and burned, the Shenlang people reached the top of its head. The sword of the king appeared in the hand and slammed against the leader!

When the sword of the king was stabbed, it has been rapidly widened and lengthened. The piercing position is still only half a foot wide. When the piercing faucet is coming out from the lower jaw, it is already a few meters wide!

Chapter 2067 - Instant life and death

Everything is happening in an instant.

Because of the speed, many of them did not have time to try to figure out in more detail.

If you give the dragon a little more time, it will immediately find that it is empty, even if its mouth is bigger, even if the flame burns faster, there is no possibility of no trace.

Eyes and gods can be deceived, but the sense of touch can't be deceived. Even if it appears to be realistic and true, it is a phantom after all, and there is no touch.

It is precisely because it just swallowed the sinking waves, and at the same time control the two people in the field of God, so it has not been possible to sort out this.

And the reason why its domain of God controls the range of the abdomen is, of course, because the smaller the better the control.

But it is not to control the two of them. Just like the previous dragon, the body is dozens of meters away. It can also be used as a god-like operation to directly bounce them out.

This head range is tens of meters and hundreds of meters. It has confidence and will shrink to such a small size to control accuracy!

Because this is in the stomach of it, and there are already many injuries, and if you are a little careless, let the other party have a chance to fight, then it may be the same as it is.

So it narrows down to better control both of them, including controlling all injured internal organs.  
– It is directly prepared to use the control of the realm of God to complete the initial repair of the injury!

This was a very daring treatment, and because it had tens of thousands of years of experience in healing, so confidence can be better.

In this way, it will get the three people together!

Think about a Shen Lang and the Emperor's behemoth before, let it be afraid to appear, how cautious it is. This time I can pack up three people, it is already very satisfied, and it feels very good planning.

The result was almost at the same time, it had not had time to feel the burning of an empty, and had not had time to clean up the two people inside, they felt the danger of the top of the head!

The turmoil in the realm of God is because it hastened to defend the top of the head.

If it is in its heyday, if there is a scale with scales, it will not be worn; if Shenlang uses a general weapon, even if it has the strength of the Great God level, it will be defended by it.

After all, it is the domain of God that has been withdrawn!

Before that, they were able to directly bounce off the high-cold autumn and fly out a few miles away.

Unfortunately, its current level of defense is not enough, but the use of Shen Lang is the sword of the king of the artifact level!

So it was only because of the danger of finding the top of the head. It was enough to guess that the target was not swallowed, but it was hidden in the way to the top of the head, and it was possible to defend it... The whole head was pierced!

Gao Hanqiu just got a sword and put his body in a big hole.

Shen Lang is now just a sword, the power of display is not as good as the attack of the cold autumn, so it did not open a big hole.

But because the sword of the king he used is extremely powerful, it is much more advanced than the sword of the cold autumn, so it is like cutting tofu, completely piercing into the end.

And because the sword can get bigger, so the moment of stabbing down, it is still normal size, to the flesh, it has been half a foot, and pierced into the faucet, penetrated below, it widened to a few meters!

At the same time, it is also getting longer, and this has not penetrated the faucet without waiting for the power of Shen Lang to infuse it!

Although it has been defensive and controlled to the top of the field of God, it has already caused Shen Lang to be restrained, but Shen Lang has penetrated into it, and does not need to move, the power of perfusion, the sword of the king of control, has already Its head penetrated.

When Shen Lang and the Dragon Dragon battle, the head seems to be nailed into the awl again and again, but that is the feeling of the spiritual world.

Now the brain of this dragon is really nailed into the sword of the king!

The wound is half a foot to a few meters, so that the whole head is traversed, and the degree of injury can be seen...

But the dragon is not dead!

Even its realm of the gods was only affected and became turbulent, but not completely disappeared.

What kind of people are cold autumn and snow?

There is no way to take this magic dragon, they are the top of the Terran strong!

Therefore, the impact of Shen Lang's manufacturing is only a turbulent change, and they have also grasped it.

The cold autumn that was prepared to blew the sacrifice, immediately desperate, the long sword pierced the heart!

Snow is not the same as snow, and the sky is wrapped up from the other side!

Before they came in, they were completely free of random killings. How much can be cut, that is, it is fast, and anyway, it has an effect.

Now realize the importance, so both people aim at the heart!

With the power of this dragon, without exploding the heart, it is estimated that it is difficult to let it fall.

They seized a trace of turmoil in the realm of God and did not have the opportunity to be banned, but the focus of the dragon was to Shen Lang here, and he was firmly blocked so that it could not move.

Then, it broke out in the wrath of the sky, crushing the waves in all directions, and directly breaking him!

In the realm of its god, it is God, it is an idea, it is a powerful and powerful punishment!

It was true that even if it was seriously injured, as long as the realm of God is still there, it will still make its power extremely magnified, and it will block the blockade of the people it needs to control.

But this time, Shen Lang is prepared.

He used to observe and understand the realm of God. In this case, whether it is a positive battle or a spiritual battle, he will suffer greatly.

Assuming that the power is calculated five times, then he is suppressed to only 20%, and the dragon can be magnified five times, then the level of one to one will become twenty-five to one!

How can I fight this?

Even if it is three times, it will become a nine-fold gap; twice will be four times the gap!

Therefore, he did not reluctantly, and his own consciousness could be normal, and the thoughts entered the space of heaven!

In this way, the demon dragon with a sigh of anger, to hit the smashing of the waves, but suddenly lost the goal!

This directly makes it nowhere to release almost let himself be strongly countered.

What makes it even more shocking is that in the realm of the gods it successfully controlled, the human race can escape!

And at this moment, its heart is violently stinging...

Its heart is not only bigger than people, but also very powerful, it is the focus of its defense, even if the sword is so cold in the past, there is no piercing.

But the problem is, this is the heart!

You don't need to explode, you don't need to pierce it, even if it's just a needle stick, it will not affect it.

At the moment, not only is there another sword stabbing, but also a mixture of scorpions, suddenly letting its heartbeat disorder, stimulate the contraction, and let its entire body collapse.

Originally, the body was punctured, a large number of blood vessels were cut off, and the internal organs were punctured. It has already been affected. With the head pierced, the heart is almost unable to stand it. Come again...

Chapter 2068 - Recapture the god

After Shen Lang entered the space of Tianshu, he immediately made himself ample defense, and then he increased his body several times. The sword of the king in his hand was re-adjusted and became bigger.

Then I came out of the space of Tianshu and once again appeared above the head of the dragon!

Before he was in the air above, now it is directly appearing, he stepped on his head, and the sword of the king is calculated for the angular distance. Once it appears, it is stabbed on the top of the dragon, and then squats and grows longer!

This is not just the wound, but the wider sword of the king, on the faucet, once again pierced once!

I just finished this hole, and waited for the dragon to attack, and the waves disappeared.

Then appeared again, disappeared again...

Because Tianshu space has a defect, it can only be in the same place, so he wants to penetrate into the dragon back, dragon neck and other places, it is impossible to do it.

But people appear in the same place. By adjusting the size of their body changes first, they can also change the distance and angle of a little.

The sword of the king is held in his hand. What angle is he holding, and what angle is coming out.

Therefore, by adjusting his own height, and the size and angle of the sword, let him disappear after each disappearance, and then without any movement, you can directly penetrate another place in the faucet!

It's basically in one piece, but it's better than being in the same wound every time, and the angle is different. The direction of the hole after piercing is different.

Shen Lang suddenly disappeared suddenly, and he paused for a second, and it was the gap of zero and one second!

Ever since, the effect that this presents is equal to the rapid change of the angle and the height of the height, in the head of the constant demon dragon...

Poor the dragon, the control of the field of the gods, but can not trap the sinking waves, appearing and disappearing too fast, so that it can only be locked in the imprisonment, and then disappeared.

And Shen Lang didn't have a sword, just a big wound on his head, this is the wound that pierces the whole head!

In such a second, there are at least dozens of wounds on his head!

The gap between these wounds piercing on the other side is very big, but in the place where the piercing is, the difference is not too big in the same piece, so the dense squatting down, the piece has become muddy...

At the beginning, the dragon could control the Shenlang in the field of God. As a result, the speed of the other party was too fast. I didn't know how to do it, and disappeared and appeared, so that it could not attack.

Soon after, when his head was smashed, it was no longer possible to display the realm of God.

The cold autumn and the snow in the abdomen are also the same as the Shenlang.

After the cold autumn found that a sword is difficult to pierce, it quickly slashes the sword, and the scorpion is a wound that is pierced and drawn along the sword, directly absorbing the dragon blood that collapsed from the inside!

The cooperation between the two also makes the heart more and more exhausted.

In fact, the whole time has only passed a second. The heart has not even had a chance to jump, and it has already been tossed so fast.

At this level, Shen Lang is sure.

The last sword, he did not pull out, did not go to the space of the heavenly book, but when the demon dragon was weak and still not dead, immediately suppress its consciousness!

Then start to absorb all the power of it!

This pair of Shen Lang is of course a very risky act. Because of the mental power he has now, he has become a big problem.

But the problem is that this thing does not hurry up, and when it is completely dead, it will disappear and waste.

In case it can have other ways, such as what is attached to the poisonous grass, or invading the cold, autumn, snow, and snow, it is not just a waste!

Therefore, in the case that it is impossible to increase the ability to smother its soul fly, Shen Lang still feels that it is more secure when he gathers it to himself.

Of course, the dragon's powerful spirit, this is impossible to meet, this is that he may not be able to meet another one in a hundred years, how can not allow himself to miss the waste.

However, unlike the previous dragon, the Shen Lang is now suppressing it. Its spiritual consciousness is still complete and can be extracted as a whole.

Just like the former Dragon God and the Terran God, it can be retained as a whole, and there will be opportunities to slowly refine. As long as you are not greedy and greedy, the chances of making big problems are much smaller.

The real big trouble, or the spiritual power of the spirit of self-destruction...

When Shen Lang was extracting its god, the defense of the dragon was also greatly reduced. This allowed the cold autumn and snow to directly break through its heart. A large amount of blood was absorbed by the red mixed scorpion.

The heart burst open, and the dragon was even more powerless against the sinking waves, and he was directly exhausted by him.

In the previous battle process, the time was not long, but there was a strong feeling. Now that the dragon is dead, there is a feeling of silence immediately.

Shen Lang disappeared again, and went straight into the space of Tianshu. It took two hours to calm himself down and firmly suppress the \*\*\*\* of the dragon.

This is a very dangerous situation. If this \*\*\*\* is to stir up the spirit of self-destruction, then it will be finished.

Thoroughly suppressing and isolating the spirit of the three dragons, Shen Lang is relieved.

This process is actually not so long. It takes two hours to ensure that it is also to let it continue to stabilize and can appear in a better state.

He appeared again, and the outside world only passed more than a minute.

However, the cold autumn and the snow are not ordinary people. Before the fight against the dragon, it seems that the dragon is too powerful.

When the dragons have collapsed, they are quick and easy to handle.

When Shen Lang appeared, they had collected the inner dragon ball, the brain, and some internal organs that were not broken.

“Shen Lang... This time it is up to you!”

Looking at the sinking waves, there was no injury. Snow and snow were relieved at the same time, and they were sincerely praised.

Shen Lang smiled.

“This is the result of everyone working together. Without you, I can’t do it.”

Then he looked at the body of the dragon.

“The two are not welcome such a lively dragon, it is likely that there will be no more. Compared to those bones, this is an excellent resource!”

“Even if you feel a little embarrassed, think about Yao Chi and Qiu Lin Jianzong’s Wannian foundation. Can you still bury Long Valley in the future? Don’t you want to say this secret?”

The cold autumn and the snow are not serious.

The matter of burying the Longgu situation, when they were waiting for the Shenlang, they also exchanged opinions and felt that it was inconvenient to disclose them.

After all, everyone has selfishness and knows that there are ways to enter the funeral valley. It will only turn this murderous place into an open forbidden place. Everyone will come to treasure hunt.

Then there will be great variables!

Now Shen Lang said, they brought back resources, even if they keep secrets to the disciples in the door, but they can really make their martial art, the foundation of the eternal life!

Chapter 2069 - Distribution harvest

Who can be selfish?

Even the ancestors of the famous family will have the same.

Just like the previous wave, in the occasion of the Yaochi event, whoever has selfishness will be put away and will appear to be very tall on the surface.

Once you leave, you will use whatever means, and each will take the initiative. It is a private act. As long as it is not made public, it will not be shameful.

The same is true in the Yungong Holy Land. Tongxian Weng and Zhisheng can join hands with other people to start with Shenbo. It is because of the special environment that no one knows if the sluice is extinguished.

Like the ancestors of thousands of years ago, they chose to close their mouths together, and they completely wiped out the affairs of Longzhentian in the long river of history.

Compared to these, what they are here today is nothing at all.

I came to the funeral dragon valley and did not expect it. I went to visit this murderous place and did not think about disturbing the dragon.

On the contrary, because of their arrival, they found that there is still the resurrection of the dragon, but it is a harvest.

From the perspective of the guardian's righteousness, even if the dragon does not actively attack them, it must also be shot.

And killing the dragon, everyone is also fighting for life!

Shen Lang was almost devastated by the spirit of the Devil's two defeats. They were also injured by their own full blow. They were almost killed by this dragon.

All in all, let them divide the body of the dragon, it is justified.

I just took the most important part. One is that it took more than a minute, and the other one is still a little bit reserved.

Now that Shen Lang has said this, there is nothing to say, and it will start directly.

The two great gods worked hard, of course, the speed was very fast, and all the valuable ones were collected by the melons, and the main big bones that broke the bone marrow were left.

They went to the Yungong Holy Land and did not carry much supplies to avoid any loss of the martial art.

But they all bring a magic weapon!

There is no doubt that this is to go to Baoshan, and everyone wants to come out with as many resources as possible.

Only once in a few thousand years, not to mention anything else, even if it is a fruit and fruit, after the last pick, there have been thousands of years, the value is undoubtedly very high.

Take a little more to go out and raise some reserve resources for the sect.

It's just that no one thought that the Yungong Holy Land is completely different from what everyone imagined. However, they did not think that there is no use of the magic weapon in the Yungong Holy Land, but it is used here.

“We have all collected it. Shenlang Brothers, you are the one with the most output, let’s divide it!”

For the cold autumn, Xue Feixue nodded and added another sentence.

“Before the \*\*\*\* of the behemoth, it must be counted.”

This time, the Emperor’s beast and the two dragons played against each other and did not appear. According to Shen Lang, it was previously poisoned by a poisonous grass and poisoned.

But whether it is against Cui or the fight with the Longmen black robe, everyone is doing their best. Although it is the face of Shen Lang, it can not help but benefit.

Shen Lang shook his head: “If the Emperor is a monster, I will give it a lot of benefits, and bring it to the world. It is willing to help me. These should be put together!”

He took out the dried bones he had first obtained.

“This is what I got when I was advanced. I think there is nothing to gain. I can’t go out empty. The bone marrow in those bones has already dried up and it has not been cured. I don’t know if it has any effect. Anyway, I also charge it.”

Shen Lang took his individual harvest, and all of them were divided equally, so that both of them are self-sighing!

Originally, when they forced the two kings to come in together, there was nothing to gain from them. The solid bones obtained by breaking the keel from the spurs would be an excellent harvest.

But now there are two dragons... or a fresh marrow brain with a half dragon, etc., which is nothing.

So Shen Lang took it out, they just praised it, and they were too embarrassed to set it up, lest it would be good enough to dislike him.

“There are these!”

Shen Lang also released the essence of the heavens that he had just collected.

High cold autumn and snow are not watching him, more admiration.

With better things, you can release those solidified bone marrows. This is not a big deal. It is even more remarkable to be able to take out these heavenly essences!

Although they don't know what these effects are, they can resurrect the two dead dragons that have not died. This shows that it must be a very good thing.

This thing they searched for, did not find it, was found by Shen Lang, he can completely find another excuse to come back and collect it!

When he was fighting the dragon, he kept it, and he didn't take it out. They both would pretend to forget this.

But Shen Lang did not!

It can be seen that they are regarded as true friends, and everything is willing to share with them.

"Shenlang, this is what you got. We didn't find it. We didn't have a face." Xue Feixue said seriously: "You will take it, and the other points will be fine."

Gao Hanqiu nodded, Shen Lang is enough, they certainly can't be greedy!

Shen Lang shook his head again: "No, I was there before, I have found one, so this one is divided into two of you!"

"How is that going? You are there over the poisonous grass attack, looking for the essence of the heavens and the earth, it is just you and the emperor's behemoth, but we did not participate in anything, then it should be you..."

If the snow is not snow, the words have not been finished, and Shen Lang interrupted her.

“Snow Palm Gate, since we are a partner together, it is a team, it can’t be so fine. I can’t say that I met it. I just got it out.”

I really want to count this way. The two dragons are all killed by his main force. It is the key one. He is fully qualified to take half of it!

Shen Lang’s generous smile: “Don’t forget, the gods of these two dragons are equivalent to being won by me. This is invaluable in value and cannot be divided equally for you, so I will not suffer of.”

Calm autumn smile: “Value can not be estimated danger can not be estimated, you are completely to protect us ...”

The spirit of a dragon has blew himself up, and it has made Shen Lang very dangerous. The \*\*\*\* of this dragon is inhaled again. No matter what the shape is, it will definitely be even more dangerous!

They even guessed that more than a minute after Shen Lang had just disappeared, he sent himself to a place where no one was, and released it.

Anyway, this is proof that Shen Lang has done his best!

And this, in the mouth of Shen Lang, is still the advantage of his cheap, so that they are very embarrassing.

“Then let me divide it!”

Originally, because Shen Lang paid the most, Gao Hanqiu and Xue Feixue were embarrassed to divide, let Shen Lang points, and also let him first take what he wanted.

Now that Shen Lang is more angry than them, if he is allowed to divide him, he will only take care of them more.

So Xue Feixue took the initiative to ask.

Chapter 2070 - Shen Lang is a legend

Snow and snow are active to distribute, and both Shen Lang and Gao Hanqiu agree.

Although the value of this item is huge, if one is not allocated well, it may make people lose a lot and make a lot of money. But fortunately, the three of them, the biggest conquering wave, are taking care of them in moderation.

Besides, Yaochi can stand for thousands of years and has a reputation. As the head of Yaochi, Xue Feixue presided over the Yaochi event, and naturally there would be no problem.

All come together and let the snow be distributed.

She was quickly planned.

Whether it is harvested fresh marrow, keel, dragon viscera, etc., or those solidified bone marrow, as well as the essence of the world, are divided into three, roughly average.

“This is average, it seems very fair. But the Emperor’s behemoth does not divide, it is your other benefits, plus you are the main force, so this dragon ball is also for you.”

Snow is not snow to do this arrangement, Gao Hanqiu is also nodded and approved.

Shen Lang has to be half-hearted because of his merits and the relationship between the Emperor and the Great Beast. But I really have to count it. As he said, he got the spirit of the two gods, which is impossible to get out.

There is another world of heaven and earth essence, and Shen Lang is not coming out again. Plus he has already absorbed a dragon ball and gave him another dragon ball.

In this way, the number is basically average, but from the specific value, Shen Lang is definitely far more than half.

It can even be said that most of the best ones have been given to Shen Lang.

Snow is not so snowy, and there is no objection in the cold autumn. They are self-sufficient and principled, but Shen Lang also knows the value.

“Okay, then listen to the snow palm.”

Shen Lang is rude, and took Dragon Ball and his one directly.

Seeing that he accepted, Xue Feixue and Gao Hanqiu were relieved. I am really embarrassed to be afraid of the waves and take care of them.

The result was just started. Shen Lang took him to the third of the world's essence, and split it into two, and then sent it to the two of them.

“It was just that we were equally divided. Now this is my reward for Qiu Lin Jianzong and Yao Chi.”

“Old high, you know, you and Qiu Lin Jianzong have helped me a lot. Xuezhangmen and Yaochi have also helped me a lot. I usually want to thank you individually, and it seems to be sensational, so this time, anyway, it is I have to come here, even if I borrow flowers to offer Buddha!”

Shen Lang said this, let the cold autumn that originally wanted to quit the voice silently nodded.

He understands the meaning of Shen Lang. Shen Lang does not have the big backstage that everyone thinks. It comes from the earth. Before he was to take care of Qiu Lin Jianzong, like the Yaochi event, he also personally started to lift the sedan chair for Shen Lang.

Although he is willing to do so, even feel that he is repaying the care of the brother of the year, but Lang brother is the wave brother!

What kind of characters are Langge? Even if I accept the care of the younger brother, it will be a bit unnatural, and the compensation for Qiu Lin Jianzong will make his heart feel better.

For the cold autumn, Shen Lang has made rapid progress in a short period of time, re-climbing the peak, and being able to take care of him. He will not be embarrassed at all, but he is very happy.

Besides, these are inconvenient for Snow and Snow to know. If he does not take the lead, Snow and Snow will definitely deny.

“Snow Palm Gate, you should not be polite. Whether it is when Shen Lang thank you and Yao Chi, or as a care for the Vatican girl, you can accept it with peace of mind. Shen brother Fu Da, wherever there will be a lot of gains That’s not bad!”

Gao Hanqiu not only accepted, but also helped to persuade snow and snow.

Snow is not snow, but it is also to be rejected. The value of this thing can be guessed.

But see Gao Hanqiu accepted, and also persuaded her, slightly thought about it, and nodded and accepted.

In her view, on the one hand, Shen Lang is a well-off family. For the sake of interests, there is no such greed for the cultivation of real resources. On the other hand, I would rather give up the benefits than owe a little humanity.

“Then I will thank you for the snow.”

In the case of Gao Hanqiu, she would like to help her even step on the steps. Of course, she took the opportunity to talk about it and tighten the relationship between Shen Lang and Fan Xueyu.

This kid is a blessing!

It’s a super lucky star!

Just because of the curiosity of the Kuafu giants who are all in the sky, they have explored the vast wilderness in the past, and they have the opportunity to go to the periphery of the burial dragon valley and trade with the black dolphins.

And it was the bones of the ancestors of the Qingqiu fox family, and the fox family gave the white servant as a maid.

Going to the Yungong Holy Land, not only did you get the most out of it, but also saved a large number of people back.

When I came out, I saw Cui's tricks and prevented everyone from being hit by a net.

Further discovering the Longmen family who have been lurking for thousands of years, and follow the black robes to the world.

I found out that I was in the world of burial Dragon Valley, and I was able to bury the worms that had been burial for tens of thousands of years.

All of this, as long as it can do one, is a legendary experience that can be talked about.

He is every step, every time, has a legendary experience.

In other words, Shen Lang was originally a legend!

It is really lucky to let Fan Xueyi follow him.

However, Xue Feixue immediately sighed and felt less optimistic.

The main reason is that Shen Lang is amazing, and the growth rate is too fast. At that time, Fan Xueyu went back and begged to stay in the waves and the behemoth was resting on the edge of Yaochi. She investigated it.

According to the story of the flow cloud, in the ruins of the past, Shen Lang is a little stronger than the mysterious woman, not as strong as the great fairyland.

However, Liu Yun also felt that Shen Lang might play pigs and eat tigers, because Shen Lang later killed several of the big celests in Zhou Yucun who had been chasing him!

Originally, Liu Yun still felt that Xuan Nv and Shen Lang together is also Shenlang is not worthy of her disciple.

However, according to Fan Xueyu, they talked about the process of playing the Guangming Mountain, and Shen Lang suddenly surpassed the clouds. Don't say that after the return of the mysterious woman, she retired and practiced, that is, she did not, and could not keep up with the rhythm of Shen Lang.

Above the Yaochi event, Shen Langeng and Gao Hanqiu talked about laughter and squatting, and Liuyun realized this.

Shen Lang went to the Great Wilderness, so that Xue Feixue felt that he was somewhat avoiding the taste of the limelight. He did not expect to return again, and Shen Lang seemed to have entered again.

This time in the Yungong Holy Land, she and Gao Hanqiu witnessed it with their own eyes. Shen Lang directly broke through the realm of the Great God, and according to the truth, the new god, the strength should be much worse than the two of them.

But now I have a battle with the Dragon, but it is obviously more important than them.

Now Snow is not snow, even if it is the genius of the Wizards of the Fans, it is also unable to keep up with the progress of the waves!
