

First Strong 2161

Chapter 2161 - Guessing decision

The information spread through the Internet means that Shen Lang has killed more than a dozen people, including the Pope. The Guangming and the true gods can no longer contact them. Even if they don't want to believe it, they know that this should be The truth is that the other party is not willing to let it out.

But even if it is a fact, it may be a fact of packaging!

They can believe that they are really dead, but they don't believe that this is done by Shen Lang alone. I feel that this is the realm of the oriental comprehension. It is to count all the credits of everyone, to his own body, and to complete the creation of God.

But the picture that has just been presented is already a factual presentation. There are no other comprehensions in addition to a few girls on the scene.

It can also be seen from the picture that Shen Lang is a master war, and he is still passively greeted, and there is no active attack, and no one can secretly attack them.

What does this mean?

Explain that not only Shen Lang has killed more than ten strong men of the two sects, but also understates and has a good grasp! He didn't do his best at all!

If such a wave of waves is going to attack these few people, where is the chance to escape?

Suddenly, the tension that was originally stretched out because of the suspicion that Shen Lang was coming to occupy the city of light, all collapsed.

Needless to say, the strong energy fluctuations that appeared in the square before, must be caused by the arrival of Shen Lang.

And others have seen everyone here for a long time, and they know nothing about it. This is enough to see the gap between everyone.

Therefore, whether it is a little hesitant to confront you, or very eager, this time is sincere and fearful.

Can be awkward, not grievances, but whether you have this qualification!

Others can even ruin the city of light!

“I am going to designate the next Pope. Are you convinced? Do you agree?”

Shen Lang has already said that everyone has already acquiesced, but he still wants to emphasize it, or to formally ask it, and ask them to promise!

The red archbishops could not help but bow their heads.

Even if I felt humiliated, I could comfort myself and say that it was forced to be helpless and forced. But now the other side is to tear their only fig leaf!

Although the same is still forced to help, but now it is for them to personally agree.

Among them, there is still a striking one. If you can't change the situation, it's better to receive it earlier. Maybe you can still have a good feeling. Maybe you can't... Oh no, the Pope's seat falls on his head.

“We are convinced! Lord Shen Lang is the world's strongest person in the world. Whether it is the East or the West, everyone respects you very much.”

Someone took the lead, and immediately others rushed closer.

“The Pope's murder in the process of challenging the duel is a very helpless thing. You can be thankful for the fact that you can stand up and preside over the situation for us.” We are very grateful!”

This is a flattering! Also actively find the steps, killing the waves, and changing the accidental death of the city.

At first glance, others are so explicit, and others are catching up.

It's not that I'm not rude, I'm afraid that I will have a bone, and finally become a sacrifice!

They are all like this, can't blame me!

One by one, I found an excuse, and the attitude toward Shen Lang was even a bit sloppy.

"I have to ask for a request."

The words of Shen Lang made everyone's face stunned again, and the smiles that were barely piled up were solidified.

This is an inch!

Just ruthlessly humiliated everyone, but also to salt?

"I will not attack the city of light, do not kill you, nor interfere with any behavior of the new Pope. There is only one request!"

Hearing the foreshadowing in front of Shen Lang, the originally intense archbishops could not help but fall from the sky!

Is this not supportive?

Really will not interfere with any matter of the Holy See?

Alas, although it still has great benefits, it is also like a needle, it is to pay the price of dignity, historical nicknames.

I heard that it will not happen now, naturally let everyone be enthusiastic.

But it is a bit embarrassing. The conditions that Shen Lang can say should not be simple?

“You just don’t want him to die anymore! This time killing them a few leaders is to let you understand. Some people are not you can’t afford it! To destroy your light gods, true gods, you can’t do it, just I don’t want to kill so many people.”

The words of Shen Lang are a bit unsatisfactory.

The reason why he will easily control the Pope and other people is not the way to warn, but the full income of the tower, refining, because again and again!

When I was in New York, I had already warned the Pope, and later warned the world’s self-cultivators.

Since the good verbal warning doesn’t work, kill the chicken and the monkey!

If they still promised to come back, then don’t blame him for being unkind.

“Sure, certain! We will never dare to provoke you again, and dare not provoke the East again!”

“This time it’s all...the question of true God. They are tempted by the Pope, and we are very peace-loving.”

“Yes! All are the ambitions of the true gods, and we will not swear with them in the future!”

It was so simple to hear the demands of Shen Lang, and everyone was rushing to agree.

Just kidding!

With the strength of Shen Lang, coupled with their current strength, and then borrow a courage, do not dare to provoke.

They are not extraordinary geniuses. They have no hope of the Pope in their lifetime. Naturally, they will not want to break through history. Being able to be a Pope is already an unexpected joy. It is very good to be able to keep achievements.

Some people almost put the black pot on the head of the Pope, and when they came to the mouth, they thought of Shen Lang, saying that the Pope is a friend Hurry and change the mouth and throw the pot to the true god.

This really can't be considered a shabu-shabu, because the Pope was originally a taboo, because the Shenlang has not appeared for a long time, and I can't hear the news. Plus the true gods are quite equal, everyone can't really fight. That is a double loss.

Therefore, the proposal of the true gods to go to the east together is a win-win situation. The Pope is indeed a party that has been promised after careful consideration.

Shen Lang nodded: "As long as you don't come to play the idea of China, you have the ability to destroy the true god, and I don't care."

This is an explicit, willing to see them fight with the true gods.

However, the archbishops are very embarrassed. They also know that the true gods have also been hit hard, but the same is true of the light gods. Not to mention the East, in the short-term conflict with the true gods, the same will be the two loses, but can not destroy the other side.

"Then choose the Pope, let alone my inner support, this will affect your unity. I will witness and give you a fair and just chance!"

Shen Lang is serious.

Everyone suddenly became serious, and did not decide not to support it? What kind of fairness and justice can you still have?

"Directly guessing the boxing. The two of the two matchups, one will win or lose, and the winners will fight each other."

Shen Lang made a "scissor stone cloth" with them and told the rules of the game.

Chapter 2162 - Coronation

The red archbishops are all shocked!

This is the election of the Pope! Pope!

Every change is also a huge internal matter, and it is also a great event for the whole world.

Just now they decided that everything was simple, and it was an exception. It was also a negotiation that everyone was arguing.

Shen Lang came to designate the successor, not in accordance with the rules, but because of his strength, everyone will have to serve.

But now this “fair and fair” plan is guessing!

Guess the fist to decide the next pope!

This is fair, everything is random, but it’s also awkward?

This is like a country running for the presidency. The most crucial time is no more than a vote. Let the candidate directly guess and win. Anyone will feel too mad, too crazy!

Shen Lang said impatiently: “Why are you looking at me like this? I am very busy! Quickly guess the boxing. Or do you let me assign one by one?”

Everyone smiled bitterly.

Although it is very crazy, but no matter what, guessing the boxing and then playing, but also personally involved. Winning or losing is your own luck and your own judgment.

If Shen Lang directly specifies it, then there is nothing for them.

Today is the first time I met, and I can see that Shen Lang has not been particularly impressed by anyone. Under such circumstances, almost no one is sure to choose himself.

Therefore, they immediately put up a battle and began to guess and win.

Even if it is a guessing fist, after all, it is related to the position of the Pope, which is related to countless resources and glory of life.

Therefore, they are all enemies, as if they are masters of life and death.

People who have reached this level will not believe in luck or luck, guessing the fists in the end, but also psychological tactics, or logic analysis tactics.

Therefore, facing these familiar old friends, everyone wants to see from the other's eyes, can you tell what is going to happen, and how to dock.

A win or lose!

In other words, there is only one chance.

If you want the second round, you must win in the first round. Otherwise, you will be disqualified directly.

Therefore, everyone calmed down and prepared for each other for at least ten seconds.

“Don't guess?” Shen Lang knocked on the table lazily.

Everyone was shocked!

If you don't guess, you are not qualified.

Under the abruptness, there is no tactical or tactical, and the instinctive immediately punches.

A win or lose, immediately eliminated half!

The person who won, immediately flushed, although not cheering, but obviously very excited. This is a step closer to the Pope!

The lost person directly lost his life, and the most important opportunity in life disappeared into a guessing fist.

Those who won won't dare to be proud, because they won't win the last, and the ones won in the front are still equal to zero.

Immediately continue the next round of guessing...

Shen Lang has expressed impatience twice, so the Archbishops dare not brew the mood again, and soon they have guessed several rounds.

The archbishop who finally won, as if after a big fight, a few times to guess the fist, let him spend most of his energy. But at the same time it was very exciting because he became the Pope!

However, he still dare not forget to forget, because Shen Lang does not press the cards, do you know if he will directly cancel this joke?

Others are regretting and jealous.

“Okay, he is the Pope. Take the crown and the scepter out, let me crown him!”

The words of Shen Lang, let the winning Archbishop finally feel relieved.

But the mood of other people is very bad, and the face is even worse.

An outsider, an oriental young man, crowned their pope?

This is really a bit unreasonable!

But what about it?

Has there been a precedent in the history of guessing the Pope's succession?

But they immediately worried about it.

In the far-reaching way from the east to the city of light, because they are afraid of guilt, help them choose the pope? Just warn them not to make this one again?

What kind of spirit is this?

No one can believe that he is Bethune. There is not enough powerful interest, that is, they will not do this.

Shen Lang has just been waiting here, from the proposal of guessing fists to several times of urging, it seems that he wants to finish this transition as soon as possible.

And now they want to take the Crown Scepter and crown the new Pope...

They feel that they have guessed the truth of the facts!

The purpose of Shen Lang to come here is to head for the crown and the scepter!

It is not that the crown scepter is worth much, but that it is the representative of the pope and the invaluable treasure of the entire light god.

Then they all remembered, what did Shen Lang just say?

Will not destroy the city of light, will not kill them, will not manipulate the Pope.

But did not say that won't win the crown and the scepter!

I really have to do it, and I can't blame him for not saying anything.

The tension and embarrassment made everyone's mood very cloudy.

What if you look at it?

Can they still stop the waves?

Is there any strength to stop the waves?

“Shen Lang, thank you for your testimony. But the teachings I teach are strict. Although everything is simple now, it is really necessary to be crowned. It is also necessary to choose a day, and a grand coronation ceremony will be held. I hope you will be there. Can come to the scene!”

The new Pope, who just won, is also standing out at this moment.

He is retreating himself and launching the grand convention of the coronation ceremony. If you want to let the whole sect and the whole world know it, you must have such public coronation.

For the Light God, this is also a great opportunity to harvest a wave of faith.

He deliberately said this, that is, to postpone the time, and actively invite Shen Lang to avoid appearing that they are not willing.

It is impossible to wait for the coronation ceremony with Shen Lang's impatience with them.

Then there is an excuse for not having to greet the crown and the scepter for the time being. In addition, the crown and the scepter are collected in a top secret treasure, only the pope can know the way to open. Now...we can only think of another way to see if there is any information on how to open it. ”

This article is also reasonable.

Every generation of successors, whether it is the death of the death or the direct let-off, will definitely be arranged in advance. The latter election is a process, and the successor has already been fixed.

As a family member, these things that need to be confessed naturally cannot be vague.

This time the Pope died unexpectedly in advance, and it was too late to confess these. If it is Paul, maybe I can still know some, but now they don't know, it really makes sense.

Therefore, what they said, because of feelings and reason, seems to make sense. If Shen Lang insists on crowning him now, it seems to have ulterior motives.

For their minds, can you see through?

He wants to crown the new Pope. In fact, he is the same as the Pope, but he wants to play it, watching their leaders crown themselves.

The crown and the scepter are of course a magic weapon, but he really can't see it!

He came to the city of light, but it was not the crown and power they valued, but the accumulated power of faith!

Chapter 2163 - Treasure house

Shen Lang had no emotions for their royal scepter, but now they are so frustrated that they are a bit uncomfortable.

He did not say anything, he left without saying a word, and then disappeared directly in front of them all!

The red archbishops took a long breath and relaxed. They just worried that Shen Lang would kill them at any time.

Someone opened his mouth and wanted to talk, but he immediately woke up and did not have a casual opening.

After a pause, I sorted out the wording before I spoke.

“Congratulations to the Pope! Let's join us and we will do our best!”

Other people have also reacted. Has this person left or is it invisible?

If it is the same as before, is it invisible to observe everyone's reaction around?

Therefore, other people do not dare to comment on anything, the same is followed by Tao Xi, expressed.

Although it is very humiliating to manipulate the outsider by Shen Lang, the guessing decision is also very playful, but it must be said that it is relatively fair and just in the absence of a better solution.

In any case, I have just given myself the opportunity to guess the boxing, and I am willing to gamble and lose, which is to avoid everyone playing.

If Shen Lang is still around? If you express your dissatisfaction with the results, wouldn't it make him come out again?

Since it has already been destined for such a situation, then there is no other meaning. The early expression of the situation is good, and it can be more harmonious with the new Pope.

It's not just the Pope that has passed away, but there are also a few core seats that have been released. This is where they can take over.

At the thought of this, there is no need to show it to Shen Lang, and everyone naturally continues to be busy for their own interests.

The new Pope is also afraid of long night dreams. After all, this victory is incredible. If you really want to say it, the bishops of all parishes may not be convinced, or they will formally crown up as soon as possible.

When they were busy meeting and discussing, Shen Lang went to another secret room.

He has already arranged it, even if he really wants to be guilty, he will not take care of it. So the disappearance of the previous one was really left directly from the conference room.

He directly crossed into the current secret room.

This secret room, in simple terms, is the treasure house of the Holy See, the top priority of the Cathedral of the Light, the secret of the secret!

What they just said is not entirely a dodge. If you want to enter this place, only the Pope can do it.

The method of opening is also passed down from generation to generation.

Now that there is no inheritance of the Pope, they may not know.

The Shen Lang is different. He has the memory of the Pope. He does not need to pump himself to open the door of the Chamber of Secrets and directly transfer it to the inside.

This is a place that the Pope is very familiar with, but even if it is in memory, it is always the memory of others. When I see it, Shen Lang is still a little shocked.

It is divided into several parts, some of which are bookshelves, which are filled with various volumes and manuscripts from the millennium. Since the Middle Ages, there have been many documents that have been destroyed, and there are still collections here.

On the other side, there are various treasures on display.

Among these treasures, the crown and the scepter are at the core of the position. Others include some famous treasures in the history of Guangmingism, such as the Holy Grail, and many others. They are ancient treasures of other civilizations and different countries! What is the essence!

This is the foundation of a big force!

Like Tianshan Jianzong and Beihai Qiaojia, they are simply incomparable.

These are basically undisclosed, and they all disappeared into the long history. Some of them are recorded in historical documents, and many of them are even recorded in history.

Of course, many of the civilizations in these other places have disappeared. In history, they have already fallen.

Perhaps the same as the antiques of the cultural relics, they took advantage of the robbers, but because they are powerful robbers, they indirectly saved, avoiding the destruction of more war thieves.

Shen Lang has a feeling for the things in China, and he wants to recapture. He doesn't have any more ideas about these things that are not even named, and whose origins are unclear.

It's here for the sake of faith, but because of the crown scepter, I have a little thought about these treasures.

Going over and watching this blockbuster, these casual ones can be used to bring shocking treasures in the antique world, and can exchange hundreds of millions of dollars.

However, the current Shen Lang, the value of money, is invisible.

The value of these different civilizations in his eyes is the added value of themselves!

Shen Lang has instinctively touched it at the moment, and from these treasures, he has a strong aura!

Similar to the obelisk on the square, these items, regardless of their original role, can be regarded as magic weapons and spirits, and they contain aura.

After being searched here, a collection is at least a few hundred years. This is the core of the Guangming Divine Church. It is filled with a lot of aura and gathers the power of faith around the world.

The Pope, who used them as trophies and collectibles, did not need to really use them. Until now, in a civilized society, it is not convenient to show off the babies who have been plundered earlier, or else they may be forced to return to the modern people on the civilized land that has disappeared.

Therefore, it is equal to the accumulation of a large amount of energy on them. This is not a function of their original function. This is added value.

Shen Lang has already been a light car, and the energy is collected in an unwelcome manner. When he feels that the body is too fast to stand, he enters the space of Tianshu and compresses them one by one in a hundred times.

Then come out then absorb, then go in, then compress.

This process was repeated several times until the energy added to all the treasures in the collection was absorbed in sevens and eights.

Just these are just appetizers for Shen Lang.

It was because the archbishops had misunderstood him to win the crown before, and he absorbed all of them. It's already very benevolent without taking them all away.

As long as Shen Lang wants, you can take away all the treasures and all the documents here!

But he didn't do it, because it was not his goal, and now that he has completed this, he will start his real goal.

This is another area in this secret room.

This area is in the middle, a large pool with a large crystal ball suspended in the middle.

For the light gods, here is a pool of holy water, the crystal ball is used for prediction, perception and the like.

But only the Pope only, this is not a holy water with aura, but a collection of faith!

Because it is so rich that it appears to be a liquid like water.

This crystal ball plays a dual role. One is to gather the power of faith and absorb the faith of believers from all over the world.

Chapter 2164 - Harvesting the gift of God

The power of faith is to the light god, of course, only the light ***** can absorb, generally divided into three parts.

Part of it is across time and space, directly received by the Light God; part of the church that is most familiar to believers, the gods inside and even the entire church, all absorbed a part because of their familiar beliefs.

There is still a part that is absorbed by this crystal ball!

This crystal ball can do this, naturally because it contains the breath of the light ***** – this is the holy thing God has given!

The power of the faith of countless believers, the first part, is to say, go directly to God. In the second part, the Holy See will bring back a certain degree of spiritual power through the circulation of holy paintings.

The rest is integrated with the church and the idol, which is both beneficial to the clergy of the local parish and can make the church more sacred.

It is the holy paintings, holy waters, etc. brought back, and also used as internal resources to help the Holy See to cultivate.

The third part of the crystal ball absorbed, the absorption of the spill, mainly in non-church and other concentrated occasions, such as family, personal, the power of belief, less to go to the church, was gathered here .

Of course, there is also a part that is to absorb the churches everywhere.

This is like the ambassador of God and the avatar of God. It contains the willpower of a certain god, so that the effect of absorption can be achieved.

After being absorbed, it has gathered here, and finally it has become a liquid water of faith.

But absorption is only part of it, and the other part is release!

This kind of release is not the release to whom, but the power of the water that believes in the power of the gods outside the city, and then “sends” to the light gods of the “Heaven” through its concentration!

This is actually the power of the **** of light to maximize the absorption of faith. After so many waves, it is the power of most faith, and it has already reached the **** of light.

Even within the Bright God, this is highly confidential.

The Pope understands this and knows that this is a gift to God. It cannot be broken or greedy. But he thinks that he is the spokesperson of God in the world. He must be stronger for the light of God.

Therefore, the Pope will also use the water of faith here!

This is why, the Archbishop of Paul is already a first-class in the West, and only the level of the peak of the gods. The Pope had a half-sex level before the light **** poured.

The gap is widened after the Pope.

Qiao Yuxian, Nanliuchuan, Zhang Zhulang and others have failed to reach this level. It is the lack of such a layer of foundation, the lack of accumulation of countless believers!

Even if the other archbishops did not understand the inside story, they could feel it and made a leap after the Pope. They understood that there were still core resources that the Pope only had.

This is why there is ambition, and the desire is not only reputation, but also benefit!

The one that Shen Lang asked them to guess the fist won was originally the same level, but after he became the Pope, he mastered the treasure house. In a few years, he would widen the gap with other archbishops.

Now, the goal of Shen Lang this time is the gift of sacrifice to God – a pool of liquid beliefs!

These are readily available, and Shen Lang does not need to compress anything, and directly collects them all for future use.

The whole process was very fast. After the absorption was completed, the suspended crystal ball was obviously affected.

The process of conveying the Faith to the Light God is even and gentle. Now it is empty, which directly affects its supply, so that it can no longer maintain the original speed supply.

There are so many reserves here, naturally not one year and two years, at least one or two hundred years of accumulation!

The amount of faith collected is greater than the amount supplied to the God of Light, and the excess can stay. It has been condensed to a certain amount to be integrated into a liquid state.

There is a fixed basic disk for the generation and absorption of the power of faith, but not as much as every day. In the case of festivals, large-scale religious activities, etc., it can contribute a lot of waves, and there will be fewer everyday.

More believers have been developed, there will be more, and some believers will be converted to other religions, and there will be fewer.

Like the recent appearance of a large number of miracles, it will also give believers more faith.

But no matter what, the ability to maintain a uniform supply for a long time is based on the accumulation of a pool of liquid beliefs. Now suddenly disappeared completely, the power of faith absorbed from all over the world was too late to be stored, and it was immediately transmitted by the crystal ball to absorb the sacrifice.

It is like a pool, a reservoir, and there is enough water in it. When it is released, it can be fixed.

But if suddenly the water in the pool and water stock is dry, how much can be put depends on how much water is in the water. If the amount of water inflow is small and the amount of water is discharged, then it is obviously not enough.

Shen Lang just took all of this away, but did not destroy the crystal ball, and did not destroy the system here.

He is here to harvest a wave of leeks, there is no need to dig the roots.

Maybe when, there will be another wave!

Shen Lang can clearly feel the change of the crystal ball. I believe that the light **** in the paradise will know more clearly.

But what about me?

As for the place, the Pope should have discovered something, but now the Pope is gone. The newly elected Pope is not afraid of causing a break, but now I don't know.

After completing the biggest vote, Shen Lang thought for a moment, did not leave, and returned to the conference room again.

He used a lot of time to absorb the energy above those treasures, but mainly in compression, which was done in the space of heaven.

Overall, it didn't take long to leave.

Going back now, they are still in the conference room. The new Pope seems to have decided to a new leadership team. Everyone is basically satisfied. There is no doubt that everyone has received some compensation.

I was negotiating about things like coronation, and when I saw Shen Lang suddenly appeared, everyone was not surprised.

Instead, they all secretly sighed a bit Sure enough, this guy did not leave, it was invisible to see them. Fortunately, I didn't say anything disrespectful to him, or else I was in trouble.

"Shen Lang, Lord." The new Pope has quickly adapted to his identity and immediately said hello to Shen Lang.

"These new popes, I can help you, can you help me?" Shen Lang said with anger.

Hearing his attitude and using “helping”, the archbishops and the new pope, who were very afraid of him, were a little bit flattered and worried.

“You are polite! What is help, what is useful for us, open as soon as possible, we will do it!”

“Yes, yes, we are all your loyal friends, we will do whatever you want!”

The meeting just now has allowed the archbishop who did not receive the position of the Pope to receive a lot of resources to compensate before. This huge benefit is indeed brought about by Shen Lang.

It’s really a bit of a heartfelt connotation to say it later.

Chapter 2165 - Cultural relic requirements

“Everyone here, there are influential big men in the world...”

Shen Lang suddenly sent a high hat over, so that everyone is really upset, not as good as he is not angry.

“No, no, you are the big man, you are the world’s strongest!”

“Yes! You are not only the strongest in the East, but the strongest in the world. We all respect you.”

“You have what you need, don’t be polite with us, even though you are told!”

Shen Lang nodded. “Then I will say it. When I was more than 100 years ago, China was backward in all aspects and attacked by Western powers. There have been many unequal treaties and more plundering of ancient artifacts...”

“This, this really is not our business.” The new Pope’s face was a bitter smile.

“Yeah, we have never invaded your country.”

“We were not born at the time.”

Shen Lang can't smile, he doesn't mean to pursue their responsibility.

"I understand these. I mean, I was not born at the time. If I change to the present, I will naturally let them invade the price of life."

"Yes, yes! It's all despicable and shameless robbers."

"We love peace most and have always condemned these actions."

"Do you want us to publicly condemn them?"

"Oh! Over the past 100 years, what is the significance of condemnation now?" Shen Lang knocked on the table.

Since they are so good and let them help, they will misunderstand them, then just order it!

"I mean, after you took office, you will make an open initiative to let a few countries that have a lot of cultural relics in our country return the antiques and antiques back to China. Now China is very strong and capable of protecting these civilizations. Treasure."

As soon as this suggestion is made, let them be silent.

If they are condemned, they are really no problem. Anyway, it is an invasive act, it is uncivilized, and it is history, condemnation and commentary. There will be no big problems.

But this is to let them help Huaxia to discuss the cultural relics to be robbed. This is a big headache.

The Pope, who is now inside, will not be able to get all the parish support!

This coming to power will offend many countries and will lead to criticism.

"You can't do it, or don't you want to do it?" Shen Lang then asked.

The silent people, the heart immediately smiled.

This subtext is saying: You can't do it, don't want to do it, then I will change people and change some who are willing to do it and can do it!

What else can I do?

How dare you?

The new Pope has taken this position and has not yet left the Chamber of Secrets. It has not been released yet, but he does not want to be the Pope in the shortest term in history!

Therefore, he immediately patted his chest to guarantee.

“No problem! You can rest assured that we will not only advocate, but also put pressure on several countries to let them take the initiative to return as soon as possible!”

“Yes, yes, their ancestors, with such brutal behavior, plundering so many civilization treasures from the East, this is a shame, must be returned, must be condemned!”

“We are very happy to do this. To be honest, we have such an idea before, but people are too light.”

They immediately made a statement.

They may not directly affect the political level of a big country, but they can definitely exert influence on the side. Moreover, this pressure does not need to be directed at the Prime Minister, the President, etc., and can be said to the level of comprehension of those countries.

They are already under pressure, and then they say that this is the meaning of Shen Lang, not to mention, those behind the scenes naturally go back and let the rulers go to receive this.

As for the people, perhaps the nationals will have opinions, but this is originally robbed. China has also repeatedly asked for a return. It has always been a problem left over from history.

In general, the key point is that at the government level, the Pope's voice of the Holy See is able to drive public opinion. This is also a politically correct paradox.

“Look at your performance. If you don't push forward, then there will be a lot of things looted in your light temple, and you will return to the same position as the obelisk! If they have to wait for me, then it is not something. It's so simple to return to the original.”

After that, Shen Lang disappeared again.

“The Obelisk? What do you mean?”

Everyone is a little bit face to face, how can the obelisk return to its original position, is it not in the square outside?

But the meaning of Shen Lang, everyone has already understood a few points.

If they do not perform well, they may sacrifice some of the civilizations of the Holy See collection!

If those countries do not implement, Shen Lang will personally intervene!

If Shen Lang personally shot, then not only plunder the Chinese cultural relics, but all the treasures preserved in the museum will be evacuated!

This is a warning!

What else can they do? Execute! Anyway, it is not to let themselves cut the meat, package it, and morally can also harvest a wave, let the whole world know that they are a religion that keeps pace with the times and is very historically responsible.

Maybe you can take advantage of the opportunity to win the favor of countless people in China, let the believers there grow naturally!

But this thought just remembered, they feel bad, isn't this a credit for success?

Still have to be safe!

When they came out, they immediately got a shocking news. There were three obelisks erected in the outer square for hundreds of years, all missing!

It is a big guy of at least one or two hundred tons. It is a superpower. It is not necessarily a very high level, and it may not be able to win.

And how can such a big thing disappear from the air?

Even if the multi-person cooperation is gone, it should leave traces.

The archbishops had to go out and check in person.

The result was nothing, the obelisk disappeared, leaving no clues.

But they know who they are, and they just mentioned the obelisk!

According to Shen Lang, this should be to send the three obelisks back to where they were earlier. Where else might it exist? Or is it just a refurbished original site?

But it doesn't matter, it's just a demonstration to threaten them.

Shen Lang can remove hundreds of tons of obelisk, meaning that other small items are easier to be removed, which means that the temple can be removed.

What else can I do?

Work harder to complete his request!

In the new Pope, when thinking about how to release information as soon as possible, Shen Lang has already brought three obelisks and is flying to Northeast Africa.

These oldest obelisks are able to check the history, and then check to find out what city is today, where it is.

Thanks to the travel heat of the world in recent decades, many places have been researched and restored as scenic spots.

So the temples they used to live in, even if they were destroyed, there are archaeological finds to build ruins parks.

Chapter 2166 - Obelisk homing

Of course, Shen Lang will not fly a few obelisks, but bring them together into the space of Tianshu.

After entering the space of heaven, the consciousness of these obelisks immediately sensed that it was no longer the original place, and it was completely trusting for Shen Lang.

Shen Lang is also welcome, this is their promised reward.

In the space of Tianshu, he absorbed the accumulated amount of solar energy from the three obelisks and took a lot of them, and then compressed them one by one.

Of course, Shen Lang is not greedy, and does not absorb all of their energy. Anyway, it is also a help for him to raise his hand. It is also a warning to the Holy See that it can absorb a part of the energy. It is already a great harvest.

According to the information that can be found, the three oldest obelisks were all in front of the same temple, but that was at least four thousand years ago.

At that time, many Western powers were now barbaric.

However, thousands of years have passed, and now it is no longer the same, not to mention the ancient temple, the whole city is not famous.

This is still a tourist hotspot, but foreign tourists are all looking at the pyramids. There is no interest in the temples that have never heard of names. The locals have no interest.

After all... just a ruin, just some mounds above the ruins, there is no shadow of the temple at all.

Of course, this is also that they are not rich enough. If they are rich, they can build a new temple on the site.

For the people and tourists, it is not too much care, too much understanding of the real monuments and reconstruction. As long as there is such a building, they can go to visit the shrine.

Just like the country, there are no monuments, no high morals, it is a scenic area. As long as you build a gorgeous temple, there will naturally be a lot of incense.

When Shen Lang was looking for this, it was already night.

He can only find this site based on existing clues.

This site should be dug out according to the recorded archaeology. It is probably not wrong. But it is hard to say whether it is the real place of the temple.

Because at least four thousand years apart, civilization has long since been destroyed. Who knows if there are other temples rebuilt in the middle?

For example, the site that was dug up to a thousand years ago is also a site that can be used as a essay. However, there may be great changes in the middle of a thousand years and four thousand years.

Shen Lang could not be sure. After the three obelisks were released, they were certainly not certain.

Good people have done this in the end, and Shen Lang has sent an idea to the past.

The general idea is that I have sent you back to my homeland. This is also the approximate environment that can be found. But when you were specifically in that position, you couldn't know it. There was no temple, and there was no way to better set you up.

After the idea was transmitted, Shen Lang continued to caress the obelisk and paused for a while to see if they would react.

If they feel that they can return to this land, they are satisfied, then he can leave.

There is no “eye” in the obelisk. It should be that there is no change in reality. As for whether it can be sensed that this is their homeland, Shen Lang is also unknown.

After a while, Shen Lang felt their thoughts, but it was very embarrassing.

The communication with them is similar to induction, which conveys a sense of consciousness and feeling, which can be said to be unspeakable.

But now it is not possible to know what to expect, so that Shen Lang is a bit strange.

From sensing them in front of the Temple of Light, they are all friendly exchanges, and Shen Lang is not worried about ambitions.

So after a little thought, he chose to blend with their “Heaven and Man”.

If you use a computer to make an analogy, the communication of the previous meeting is equivalent to transmitting some 0101 binary information, and then decoding and understanding. The current integration is equal to online sharing.

This way, the waves don’t need to analyze what they mean, and his brain is shared with the obelisk.

The effect came out very quickly. When he first merged, the obelisk seemed to be a little unexpected.

Immediately he will be able to understand the meaning of the previous ambiguity.

They can sense back to their homeland and even feel the attraction of the temple. It is possible to confirm where they were in the past.

But they can’t move by themselves, they need to help.

And they can communicate with Shen Lang, it is very simple meaning, can not convey the complex concept of specific location information.

Shen Lang is relieved.

Only in this way, he has no difficulty.

He is now merging with them, their faint induction, and also his induction.

If you can't say the specific seat, you don't need to say it. He followed the induction directly and pushed them up three big obelisks one by one.

This is an unnamed city. The ruins and parks are also like ruins. There are no tourists and no management. If you lose money, otherwise, even if you are seen at night, you will be shocked by the strange event.

Shen Lang runs the field of God at the same time. Within the scope, even if it is a few hundred tons of obelisk, it can be easily pushed, and it is just as you like, just like the mouse moves the arrow, you can put it wherever you want. Move at any time, a little bit of adjustment.

He is now also a single-minded, merging with them, through their induction to determine the orientation, while controlling the movement of the obelisk.

Even if the obelisk is spiritual, it is still limited, and it is thousands of years apart, and the environment is also very different. So when Shen Lang pushed them to an approximate position, it didn't take much time.

But to accurately push them to the specific location of the year, it took a lot of time to fine-tune.

He is not impatient, and such a thing is hard to come by, and it is not too much trouble. Since the benefits of the people are collected, it is necessary to do a good job of after-sales service, and simply throw it away, it is not his style.

After a good adjustment, finally reached perfection, three obelisks, have been placed in the specific location of the year one time, their three linkages greatly increased!

In the square, they are placed in the direction of the pyramid, and for a long time, they are linked to each other. Now that I have returned to my homeland, it is even more different according to the original position.

After all, when they were built, how to place them, everything is designed and calculated, and this is the best effect.

It can make the ancient obelisk of 4,000 years ago, and Shen Lang is quite a bit of a sense of accomplishment.

The people here may have long forgotten, and they will not be able to ask for it, but Shen Lang's intervention will let them go home.

Shen Lang is ready to leave with them and then leave the land.

In addition to the Light God, he still has a place to "collect"!

At this time, the difference is steep!

Chapter 2167 - Lost temple

The field of Shen Lang Shen manipulates and promotes them, and he himself is of course more free to do whatever he wants.

In order to contact, he always caressed one of the obelisks, that is, moved along with them.

Now that the three obelisks have been returned to their homes, they have not waited for the waves to cut off the contact, and suddenly there is a general vibration of the blast!

When Shen Lang sensed the past, he found that three obelisks had fallen from their position!

The whole speed is not very fast, and the movement is not too big, just a shock at this site.

It is a breeze to let Shen Lang leave, but when he thinks a little, he does not move away, but with the obelisk around him falling into it.

When the obelisk fell, it squeezed out the surrounding soil, and waited until it was completely trapped. Because of the vibration, the mud on both sides was buried and covered.

The fallen soil, of course, will not interfere with the deep waves, and will stop around him, and he will fall into it.

After a while, the three obelisks, like the three piles that were nailed into the dirt, all disappeared on the ground. Except for the traces of turning the soil directly above, there was no obvious change above the entire site. .

And in the soil, it is still sag!

The sacred armor clearly recorded the height of the sag, and at the end of the pause, it fell to a hundred meters!

At this time, Shen Lang felt that the surrounding area quickly loosened.

Then there is the turbid airflow!

The situation is still clear, they seem to have been sinking into a palace. Because there is support, there is still a hole underneath, but because it is buried deep under the ground, it is not fresh air flowing, so the airflow is very turbid.

This will not only be deficient in oxygen, but also because the long-term relationship is closed, and the poisonous substances precipitate more intensely.

Of course, this will only hurt the ordinary tomb thief, and has no influence on Shen Lang.

Shen Lang is here, there is no problem without breathing.

As the surroundings loosened, Shen Lang felt that they were not moving, and continued to sense it.

What I experienced this time was gratitude and gratitude, then a burst of excitement.

Shen Lang immediately understood that this is not the underground palace, this is the temple that year!

This is a temple more than 4,000 years ago. It was not destroyed, but buried deep in the ground!

What happened to them and let them fall into the ground?

Or is someone trying to protect the temple and directly moved a hill to cover it?

Is this happening a thousand years ago? Two thousand years ago? Three thousand years ago?

It is possible, but this is a long history, no one knows.

The obelisk also does not know.

Shen Lang immediately left the obelisk, and along the loose, entered the temple hidden in the ground.

The sacred armor opens the light, and even in the depths of the earth, Shen Lang can clearly see everything.

Above the temple, there is a thing to protect the enchantment, holding the surrounding soil, or else, if the mudstone at least 100 meters thick is pressed down, it will definitely destroy the temple and fill it completely. .

But the obelisk is not the same, just able to penetrate and fall.

Probably this defensive enchantment can induce this to be “self”.

However, according to records, these obelisks were transported from the temple in the past, which means that the temple was buried in the ground, at least after the obelisk was removed.

Shen Lang has no interest in researching these, but since I came here and found it, let's go and see.

At this moment he went straight to the temple.

The large pillars that are supported are old and full of strength, so that there is no distortion in this temple. Although this is not their credit, it gives people a feeling of inspiration.

The gate of the temple is closed. After the Shen Lang approaches, directly push it away.

This may have closed the door for two thousand years, and at the moment of pushing it, it is a harsh sound.

The smell inside is more turbid, and it doesn't make sense to open the door and meet the airflow outside.

With the strength of Shen Lang, of course, there is no fear of such an environment.

However, he still kept his guard and vigilance, so as not to overturn the ship in the gutter. If it was injured by the ancient organs, it would be a shame.

As for the living people inside, of course, I don't believe it. Who can bury it in the ground for thousands of years?

It's just that this temple is still a bit weighty. Shen Lang wants to look at the gods and find that he can't do it within the scope of the temple.

It is not surprising that in the underwater world, in the temple of the sea, it was still impossible to suppress the spirit and strength.

After the formal stepping, Shen Lang, in addition to the naked eye, also through the Holy Grail, scan the inside all round.

At the same time, he also secretly uses the field of God to see if it can be done here.

The result is not an accident, in which you can't use the field!

In other cases, it was immediately confirmed. Here, there is also a strong suppression of mental strength and vitality. However, the strength of Shen Lang's current strength cannot be suppressed by him.

To put it simply, after entering the temple, his strength has already been discounted.

This is the more the curiosity of Shen Lang.

In general, the more magical and dangerous the place, the more treasures there may be!

Shen Langben did not want to come here to hunt for treasure. Although it has an ancient civilization but it has already been completely unrecognizable, it has broken the inheritance. If it is not because of the obelisk in Guangming Square, he will not even pay attention to it. Go here.

Therefore, it was discovered that the temple in the depths of the earth, the temple is still protected by enchantment, and there is a strong prohibition, which undoubtedly shows that it is still extraordinary.

That pair of Shen Lang is an unexpected surprise.

Just coming in the gate is the place where this temple resembles the main hall, but at the moment it is empty!

Whether it is the observation of the naked eye or the scan of the Holy Grail, this is confirmed.

In this hall, there should have been statues of the sun god, such as altars, but there is nothing left.

Imagine that hundreds of tons of obelisks have been carried away. Perhaps the things in the past were plundered, or destroyed as heresy.

This is a little regrettable.

Although Shen Lang did not have the consciousness of stealing the gods, if the original idol still exists, it is now four thousand years of history!

Even if you hide it under the ground for a long time, you may not absorb so much solar energy, and you will still accumulate a lot of energy.

The scanning of the holy armor detected a door in front.

Because it is impossible to find out what is behind the door through the gods, Shen Lang can only walk in person.

Chapter 2168 - Underground

When Shen Lang just came in, he checked the situation inside the hall and saw the door, but if he walked over, he would cross the entire hall.

Because there is nothing left here, he does not need to rush to the past, just a normal step by step.

As a result, when I walked to the middle of the main hall, there was a change!

This kind of change is invisible, and the hall is still an empty hall, but it seems that there is a demon, from all directions to him!

Shen Lang is very calm.

The feeling of change just now is not a psychological effect, but it really happened!

But he does not have any pressure.

This is an ancient temple. Although the gods enshrined in it have not been there for a long time, the whole is still well preserved. There may be some traces of consciousness in it!

This kind of consciousness is derived from the image of God.

Those gods are the gods revered by the people here in ancient times. Even if there is no sun god, but long-term worship, coupled with the guidance of the high priests, absorbs a lot of solar energy and the power of faith, it is also possible to have certain spirituality.

The gods are their carriers, and the temple is their support.

Like the obelisk, the obelisk is their carrier, but they are not in the temple, they are outside the aid, so after being removed, they are still intact.

If the obelisk is destroyed and destroyed, then the spirituality will vanish.

Whether the statues and the like here are destroyed or carried away, all the power of faith and the carrier of energy have changed. It may be part, maybe all, scattered in this temple.

Because the temple is the foundation of their foundation, without the temple, it will disappear. The temple is still there, the statue is moved away, destroyed, or it is taken a part, and some are left.

The obelisk is extremely limited in spirituality until now, but the statues here are different, and there is a manifestation of the will of the high priests!

Or it can be said that the people who presided over the temple as priests were actually human comprehensions. They probably borrowed the way of religion and **** to collect money!

Converging “financial”, including material wealth, also includes the power of the ruler. It also includes the contribution of spiritual power such as “the power of faith.”

Therefore, the gods and temples are related to them, and they will be passed down from generation to generation.

In this way, the spirituality contained in the last statue is naturally not comparable to the obelisk.

The idol was later removed, and the spiritual consciousness of that glimpse would be like a wandering way, staying in the temple.

Buried in the ground for thousands of years, it will make it immortal, and even more concentrated.

Shen Lang is an outsider. If he is not with the obelisk, he will not find the temple underneath.

But he is separated from the obelisk. After coming in, it is an intruder who breaks into someone else's territory. It is normal to be attacked.

Who is Shen Lang? Earlier in the tomb of the dynasty warfare, he encountered an attack from the undead, and annexed the undead.

Now in his realm, these are like ghosts and ghosts, and they will not affect him at all.

Shen Lang continued to walk step by step, and even the warning did not warn these "death souls". If they only interfered with the shock, if they really want to attack him, then don't blame him for being rude.

He didn't mind taking them all!

When Shen Lang walked in front of the door inside, in the middle of the hall behind him, as if the souls of the dead gathered together in all directions, forming a faint face!

This face is in the air, staring at the back of the waves.

In this case, the gods are not able to sense, and the eyes are just looking at the front.

But Shen Lang and the Holy Grail!

The holy armor is capable of all-encompassing observations, including light that is also emitted by the Holy Grail.

The latter "face", if it is invisible and invisible before the soul, the conventional observation of the holy armor is not photographed.

But now it presents a tangible face, which is completely photographed, and it is also in the brain of Shen Lang.

This is a sly face that looks at him. Shen Lang can imagine that if he turns back, then this face will definitely disappear.

It did not take the initiative to attack, Shen Lang did not pay attention to it, reached out and tried it, to push the front door.

The door of the main hall, although it sounded harsh for a long time, it is not difficult to push open.

And this door, it is Shen Lang in the temptation, and found that it is not easy to push open, far heavier than the outside, seems to be held up.

Of course, it is hard to beat the waves. Even if there is a certain suppression here, his power is still very strong. It only increases the strength and pushes the heavy door away.

After pushing it open, I found the problem. Originally this was a heavy iron gate, and there was a large boulder in the back!

This discovery has made Shen Lang more speculation.

When the temple was in trouble, the statue outside was destroyed or transported away. What about the man? Did you give up the temple and escape, or hide in it?

This door is topped with boulder from the inside. Does that mean that someone is hiding in and hiding inside?

If there is a push, the people inside will leave, then in normal terms, the boulder can no longer be strictly against the door.

If it has not been pushed open, it means that those who are hiding inside are dead in this secret room.

Shen Lang, through the sacred armor, opened a brighter light and illuminated all of it.

But what you see is just a channel!

In front of the corridor is the passage, one by one to see that there is a room. The doors of these rooms may also have locks, but after such a long time are decaying.

Without the door of the boulder, the swells opened easily one by one.

I have checked several rooms in a row, they are all the same, the inside is empty, and the time of one or two thousand years has erased all traces.

Shen Lang went to the inspection one by one, then came to the end along the corridor and saw a staircase going down.

Everything is very clear, this is the stairs leading to the underground secret room!

There was no gain in these rooms, and Shen Lang didn't waste time walking directly down the stairs, ready to see what was inside the underground secret room.

Of course, the biggest possibility is to see a bunch of bones. The person hiding in it is most likely to be in the underground secret room.

At the end of the corridor, the corridor down is a circle and a circle, and then there is a door opening in front of it. There is no door panel or the like, let alone a lock.

Shen Lang was slightly surprised. According to this basement, it is an important secret room. It is a underground warehouse that hides important items, and some evil factions are like dungeons.

But this is a doorway, not even the door.

Where is the secret? Those who have come in can find it directly.

Although it feels a little weird, but behind the empty doorway, it seems to have a mysterious attraction, attracting the waves to move forward...

Chapter 2169 - Full stare

Shen Lang looked at the empty entrance in front, feeling the attraction, and people wanted to go in as soon as possible.

At that moment, he seemed to feel the face in the hall before, and looked at him behind him!

Shen Lang looked back unconsciously.

The back is the stairway to the top, and there is no “face”. The reason why I turned back was because the Holy Grail did not monitor the presence of a “face”.

But Shen Lang still has such a feeling of being “stared”.

Perhaps the previous “face” is “looking” here in the hall, which is their territory.

In the experience of Shen Lang, there will be inexplicable attraction below, naturally it is problematic.

He is curious, but that is self-control and his active curiosity.

Now this one is the passive curiosity that is attracted.

However, it is this kind of front that attracts him, and then he seems to be staring at him, so that he also wants to go down and see what it is.

From now on, although the situation is a bit strange, he has not been attacked.

This is very obvious. Two thousand years of sleep here, even if they were regarded as gods at the beginning, are actually nothing but ghosts and souls, and they are not so strong.

Do not dare to attack, that is, they have self-knowledge, understand that it will not be the opponent of Shen Lang.

And let him walk here step by step, probably just want him to go down, in the basement, there is nothing to let them rely on it.

As analyzed by Shen Lang, there may be a pile of white bones underneath, and those who are finally trapped here may also have dead souls.

But what about it?

A group of undeads gather together into a powerful undead, but that is not the case. Can it be stronger than the undead?

Shen Lang calmly turned back, then went on, entered the entrance without the door, and officially came to the underground space.

There is a sudden and cheerful feeling in front, and the space that suddenly appears is very large. Whether it is the width of the space or the height of the upper and lower, it seems as big as the upper hall!

The Holy Ghost scanned the entire space, compared the height of the stairs and the side data, and immediately established a model.

The effect of the intuitive contrast is that the ceiling of this underground space is the floor of the hall, and the thickness will not exceed ten meters!

Shen Lang couldn't help but look up. If the movement here is bigger, can it be directly penetrated?

The thickness of ten meters is also three stories high. Generally speaking, it is difficult to dig out from above. But that is relative to the level it built four thousand years ago, or the level of intruders two or three thousand years ago.

In the contemporary era, it is not a big thing to dig ten meters. And it is mainly super strong, it is not difficult to penetrate it.

As for the Shen Lang, in the huge building of the Yungong Holy Land, he dug a "ceiling" of 500 meters thickness!

But a strange scene appeared. In this underground space, it seems to be a reflection and mirror of the upper hall, and it is also empty!

Normally, the door above is blocked by the boulder from the inside, and at least there should be people who can push the boulder trapped inside.

Either a very powerful person or a group of people can push.

Besides, with iron gates, boulders, walls, you can defend the enemy, which should be the ordinary army of the invaders.

If you come to the master of comprehension, pushing, destroying, and piercing... is not a problem at all.

What about people?

For two thousand years, naturally there can be no living people, it must be completely corrupted, but good bones should still be able to remain.

But now there is nothing in this underground hall.

There are no bones, no other buildings, no layout, and no ghosts of the dead!

After coming in, Shen Lang could not find the inexplicable attraction.

Unable to use God's knowledge to inquire, so that Shen Lang feels very inconvenient, but fortunately, with the help of the Holy A, you can do a full-scale macro scan through the reconnaissance of the Holy Grail, and then walk through the details one by one.

Before he was in the upper hall, it was directly traversed. Now the space at the bottom of the earth is following the circle.

When I circled a half circle, Shen Lang began to feel that something was wrong.

He has another feeling of being "stared"!

This time, it was not staring at the back, but staring in all directions, as if everyone was watching him in all directions!

No matter what the naked eye sees or the monitoring of the holy armor, there are no visible objects, which is the problem.

If this is a modern building, it is well understood that even if there are no people or objects in the empty space, there may be many pinhole cameras hidden on the wall, which is the discomfort of being “stared” by the camera.

If it is a river city, it is more likely that the entire wall is a monitor.

But this is a temple of four thousand years. Naturally, there will be no modern objects. Why do you feel this way?

Shen Lang is close to the wall, as if feeling the wall is watching him!

It's this kind of feeling of being stared...

He reached out directly and stroked it on the wall.

Above the wall, there will naturally be no monitors, and there will be an old feeling.

This is a wall, but in fact it is different from the wall of the upper hall. This is hollowed out under the ground. The wall should theoretically be with the whole earth.

However, Shen Lang is not trying to dig a wall out to make the sacred armor analysis component. He has not studied whether it has been hollowed out behind it but the palm of his hand directly released a strong power of lightning. !

The thunder and lightning of Shenlang is tempered in the chaotic space minefield. It is not available on the earth, and its power is not trivial. Usually, fighting is rarely used. It is because he has a thunder source on his body.

But at the moment, he is a temptation.

Regardless of the wall, what is behind the earth, as long as there is a living thing, as long as there is spirituality, it will encounter the bombardment of this special lightning!

Suddenly, the lightning spread quickly, and the walls around the entire space, and even the upper hall, seemed to be affected. It seemed to tremble.

“Come out!”

When Shen Lang spoke, he released a thunderbolt.

“There is nothing I want here, no more, I will leave.”

His recent temptation has verified a conjecture. Perhaps it was the spirit that had previously presented the “face” in the hall, directly infiltrated and attached to the entire wall, so it gave him a feeling of being stared in all directions.

He does not care whether this spirit can understand, anyway, this sentence has already expressed his meaning, and even if he did not understand, he followed the second thunder, it will also force this spirit out!

At this time, there was a change that surprised Shen Lang!

Chapter 2170 - The temple is alive

The change comes from the wall!

Originally this was the basement, not the general wall, but the underground was hollowed out. But at the moment I just saw it, Shen Lang felt like the surrounding walls were alive!

At that moment, he seemed to feel the wall around the basement, the ceiling that was ten meters thick, and the hall above, as if it were a whole, and lived!

It is not a monolithic thing. Because the basement is hollowed out below, there must be a strong foundation around it to support the temple above.

But the whole building is alive...

It's Shen Lang, and I think it's a little weird.

His analysis is that the undead spirit is attached to the wall, but no matter how the walls are alive.

But this change is only a moment, and then there is no change.

In order to verify that it was just an illusion, Shen Lang decided to return to the wall for the third time, this time to prepare a stronger power of lightning!

At this time, this underground space condenses a humanoid undead!

Under the shining light of the holy armor, it can be clearly seen that this is a phantom existence, as if the smoke is condensed.

“Since it is here, let’s stay, here will be your destination, the great ***** of Kemris will be with you!”

This voice is said by the shadow of this group of smoke, but it is more like the feeling of floating from all sides.

Shen Lang slightly frowned.

When he looked for obelisk information, he said that this was the product of the worship of the sun god, and that the temple should also be dedicated to the sun god.

What is this ghost of Kremsius?

And this illusion appears, it looks very strange, not like the worship of the sun god.

“Is it? The Great God of Mercury is there? Let it come out!”

When Shen Lang spoke, he took a step directly, and the man had already reached the virtual shadow.

His speed is very fast, and the illusion is also very fast, and it spreads and disappears!

“The Great God of Kemris, with you, everywhere!”

This time, without its image presentation, it seems to come from all directions.

Shen Lang nodded. “Well, then you are everywhere. Anyway, I am sending it back to the non-obelisk. I have nothing to do with your temple and with any of you.”

When he finished, he would leave.

But when he stepped into the entrance that entered, there was a change in front of him!

The entrance that does not have a door is the step up, and turns to the upper corridor. But now, at this moment, it is gone!

The entrance is completely gone, the holy armor monitors all the pictures, there is no organ to quickly close, and there is no movement change, which is the sudden disappearance!

And in all directions, there is no entrance, and the entire underground space has become a completely enclosed space.

“Kemrisu, I want you to stay...”

The voice still wandered in the underground space, and there was no more ghosting.

Shen Lang responded with a touch of faintness.

“Look at the face of the obelisk. You didn’t attack me. I didn’t attack you. Since the door disappeared, don’t blame me for opening another door!”

Between the words, Shen Lang’s sword has appeared in the hands of Shen Lang!

According to his analysis, this is either a phantom, and the entrance is subtly hidden. If you don’t see nature, there is no more. But since it can go down from above, it must be there.

Even if there is a change in direction, then he only needs to use the sword to bring all the surrounding underground space around, and naturally break the entrance!

After the sword of the king appeared in his hand, Shen Lang did not stop anything, and quickly broke into the front directly!

Whether it is a wall or a foundation, the product of thousands of years ago, of course, cannot be a copper wall.

Even the copper wall and iron wall, under the sword of the king, is like cutting tofu, the sword has been completely penetrated into it.

From the feeling of piercing, it can be known that the entrance just identified is already an entity.

That is, before the disappearance, there has been a change, and what has made him come is not really a place to enter.

Shen Lang did not pay attention to it, and the sword of the king in his hand rose and went straight to the side.

The sword of the king can grow bigger and smaller, grow longer and shorter as he grows up. He does not need to move at all, but the body rotates. Here, the sword has become longer, not pulled out, directly along the line. The wall cut all the way!

According to the height of the entrance, Shenlang quickly turns around and cuts the surrounding area of the underground space directly!

He turned his body and the sword followed, turning easily and casually, and soon cut a large part.

At this time, the feeling of “the temple is alive” has appeared again!

This time it was obvious that the entire wall was shaking!

But this is not the general shock of the earthquake, and under the concern of Shen Lang, I feel that this is bottom-up, up to the upper hall.

“You are a madman!”

“Don’t dare to marry the Great God!”

The previous voice made a sharp reprimand and seemed to get angry.

When the sound came out, the sword of Shen Lang did not stop. It was directly cut to the origin of the piercing, and the entire wall was cut.

But when it was strange, according to the feeling of feedback from the sword, there was not a hole in the hole. This circle was crossed in the wall foundation!

That entrance has really disappeared?

“Don’t pretend to be a ghost in front of me, you want to leave me here, don’t blame me for tearing you down!”

Shen Lang pulled out the sword of the king and held it diagonally upwards.

Instant The length of the sword of the king has touched the ceiling, and the higher the bigger!

This is a very obvious threat. If the undead here continues to pretend to be a ghost, then he will pierce the ceiling.

When the sun was coming down, it was going forward, and then walked down the passage to the basement step by step.

There is a way, he can go back along the way, and there is no need to destroy what is here. But if you want to imprison him here, don’t blame him for breaking it directly from above.

Ten meters thick, the sword of the king can easily penetrate.

At this time, the undead who just spoke seems to be irritated!

Suddenly, the shock is great!

Originally, this underground space was as big and as high as the upper hall. At this moment, it was quickly contracted, and it was compressed around here.

Compressed inward, the space will be smaller and smaller, naturally, a lot of mud and sand come in!

Especially when Shen Lang is standing on the edge of the wall, when the front is still surging, the compression of the back wall directly reaches behind him.

This temple is really alive!

I don't know how this undead is done, but it doesn't seem to be afraid of ruining this temple. It also means to trap Shen Lang here...
