

## First Strong 2171

Chapter 2171 - Raise the waves

From the visual situation, it seems that the whole earth has been squeezed. If it is for ordinary people, it will be desperate. It is a general comprehension, and there is nowhere to escape, because this temple is already deep in the ground.

But now it's a mess!

Can you trap him in this temple? What is so scary about this?

Shen Lang slightly sneered, the body directly expanded!

As his body became bigger, there was already a slap in the face that struck out.

Want to crush him?

Then see who is more powerful!

Numerous rushing sediments rushed to the side of his side, but when they were far from his body, they were already blocked. Even if they came over, they could not rush.

Just by adding the squeezing of the previous parties, the space is getting smaller and smaller.

Now that Shen Lang's body has swelled up, it has not only narrowed the space that has become smaller, but the muddy sand closest to him has begun to be pushed back!

This is the stalemate between the two sides. These sands and the like are just a carrier. From the time of squeezing, it has been rushed from the hard masonry walls and the ruined ruins.

The ruins have been crushed, and the impact of more power will not get worse.

Only under the pressure of the two sides of the force, it became a large amount of sediment rolling under the ground.

On the side of the temple, the space in the underground is getting smaller and smaller, and the body of Shenlang is continuing to expand, which is pushed back more.

The sword of the king in the hands of Shen Lang, has not yet been collected!

When he had warned before, the sword of the king had extended to the height of the ceiling, and the length of the stool was large. Now his body is expanding and the sword of the king in his hand is even bigger.

When the body of Shen Lang reached the height of the ceiling at the top of the ceiling, the sword of the king directly reached the top of the upper hall.

This process is how the mud came from the surging, and was pushed back by the power around the body of Shen Lang. The result was that it could not move forward.

At this moment, the underground space is completely gone, and there is still a space around the body of Shen Lang.

“Kemrisu, is it so capable?”

When Shen Lang spoke, the sword in his hand swung quickly!

Just the sword of the king is only as his body grows bigger and there is no intentional attack. Now it is the attack on this whole temple!

Can this undead make the whole temple as alive? Then take this temple apart and see how they live!

It's totally inexplicable. Shen Lang didn't want to do anything at all. The result was that they wanted to crush him to the ground, so don't blame him.

Even so, Shen Lang gave them a time to summon!

He has grown bigger and still has a passive defense and has not taken the initiative.

But the more and more powerful impact, can feel the other side does not mean to stop, but instead strengthens the squeeze on him, greater power, more sand impact.

Then don't blame him for destroying the entire temple!

If this time, the other party can beg for mercy, or just stop to stop, Shen Lang is still willing to stop.

In the end, it was an ancient civilization thousands of years ago. So there is only one such temple that can be hidden under the ground. No matter who built it, it was the brainchild of the ancestors' predecessors, and he could not ruin it.

At this moment, the temple once again lived, and lived more clearly!

The sediment that had been squeezed around the sinking waves quickly spread out and returned to its original level.

The ceiling above is also disappearing instantly.

In this way, the deep wave after the bigger, is equivalent to standing in a space twice the height, the wall of the temple that just swung the sword, is also empty.

However, the length of the sword of the king can directly stab the top of the main hall. It can also cut the wall at will. Even if the temple restores its original appearance and the ceiling disappears, it can still be easily attacked. .

Shen Lang is also a bit curious, how did the undead, how did it?

He just got out of the sword, plus the body can feel it personally, those are real, not a illusion.

Making illusions is well understood, but all are real, and how do you manipulate the temple?

However, the reinstatement of the other side, in the view of Shen Lang, is like a war-free card, surrender in disguise, he also took the sword back, did not continue to slash them.

But when Shen Lang waited for the other party to make a sound, it was a victory that was once again attacked!

The temple restored the space to its previous state, and the ten-meter ceiling disappeared. It was not to give Shen Lang a loose space, nor to have a truce, but for a better attack!

At the moment when Shen Lang just received the sword, the walls in all directions, immediately countless bricks, all smashed like a cannonball!

Before the muddy flooding was full, it was necessary to squeeze him under the ground. But now, every brick, stone, and even all the gravel has become a specific weapon, like cannonballs and bullets, all coming against the waves!

In the place where the sinking waves settled, the underground of the basement, at this moment, a large amount of sediment quickly wrapped up on his feet, and quickly went up, like a gel to wrap him in the package.

“Be stubborn!”

Shen Lang snorted. He has given the opportunity again and again, now regardless of what it is, regardless of the face of the obelisk, it is really ruined!

The field of God was immediately displayed, and all the masonry and sand that came from the scenes were all solidified in the air!

The masonry that has been continuously peeled off from the foundation of the wall has been solidified after being shot. It is so dense that no matter whether it is the nearest or the farthest, there is no possibility of touching the waves.

And the sword of the king, once again shines!

Shen Lang raised his hand and waved from bottom to top, breaking the opposite wall and breaking through a deep crack. Then he went directly to the top of the dome. As his hand turned, the sword of the king directly cut the entire hall. It's coming!

At this moment, there was a screaming sound in the air.

The grim face that had appeared in the middle of the hall was once again presented.

“What the \*\*\*\* are you? Do you dare to be so rude to the Kremsius?”

This “face” still appears in the middle of the main hall. Because of the height of Shen Lang at this moment, it is almost going to the floor of the original hall, so it is also falling twenty or thirty meters, appearing in front of Shen Lang.

The entire temple range is under the control of the Shenlang God, but this “face” does not seem to be an entity and is not controlled.

Chapter 2172 - Temple memory

“I am your uncle.”

Shen Lang smiled slightly.

When he spoke, his mental strength had already rushed out, and he directly imprisoned this “face”!

It is well understood that the field of God cannot be banned. It is a soul, a spirit, and it is only a phantom, and there is no entity.

Since it is only a spiritual body, then Shen Lang will use the mental power to imprison it.

The face was immediately distorted in the air, and it probably didn't think that this human could actually lock it.

Then it found that it was almost impossible to escape the control of the sinking waves, and it was dragged by a very strong mental power.

“What the \*\*\*\*\* are you!”

This time, it is not that it makes a sound, but that it directly communicates with the waves, because it is equal to the consciousness of Shen Lang that imprisons its consciousness.

The communication with the obelisk was similar, but the wisdom of the obelisk was too low, only slightly spiritual.

Therefore, every time Shen Lang wants to communicate with it, it is necessary to be more careful, every thought passed, to ensure that it can understand and contain enough information.

But this undead that can walk in the temple is not the same. It can present a face, a shadow, and can speak everywhere, and even control the architecture of the temple.

Shen Lang communicates with his consciousness and can directly engage in dialogue.

“Don’t talk nonsense! What are you? What is the \*\*\*\*\* of Mercury?”

After asking this sentence, I immediately felt the horror of this grimace.

“You sinner! You dare to marry the great \*\*\*\*\* of Kemris! You will be punished, you...”

Shen Lang is very impatient, not letting it continue to express, the direct high pressure of the mind, and the suppression of this spirit with spiritual power!

This “grimace undead” immediately felt another kind of fear.

Just one kind of fear is because of the awe of the great \*\*\*\*\* of Kemris, and the aggression of Shen Lang makes it feel scared.

Now, it is purely a fear of extinction!

No matter what it is, in fact, now is the existence of pure energy form. If even this dissipates, then the real soul is scattered and the gods are gone!

“Don’t you say that? Let’s die!”

After the cold words of Shen Lang passed, the ghost face collapsed!

From the previous work, to now it is controlled, no matter which aspect, it proves the power of Shen Lang, and if you really want to move it, it will not give it a chance.

So when I felt the moment of extinction, it immediately yielded.

“I am the guardian of the temple, this is the temple of the great \*\*\*\*\* of Kemris!”

“Still not honest!”

Shen Lang saw that it was not honest enough, and continued to suppress, quickly making this ghost face become very weak.

At this moment, Shen Lang immediately took control of its consciousness and merged it.

In essence, this is similar to reading the person’s memory, except that it has no body, and it is a way of energy, which cannot be directly stripped and read.

It is completely suppressed by avoiding the overturning of the ship in the gutter. At the same time, it still maintains a high degree of alert to the surrounding, so as to avoid other attacks.

Just the fusion is equal to directly integrating with it, that is to turn everything that it knows into all and share it into its own.

The speed of this process does not take long, and all the “data sharing” can be completed in an instant. If more time is needed, it is Shen Lang to carefully confirm all the “memory”.

After getting this information, Shen Lang immediately confirmed it, but immediately became surprised!

This face, a dead shadow, is actually not a dead soul!

It turned out to be this temple!

Yes, it is the temple, the wisdom of the temple, the temple is perfect...

This seems very unbelievable, but it is not a big deal. As long as you have a good environment, like in the valley where there are many ruins, there are some trees, and you have the chance to become a tree demon.

The three obelisks sent back by Shen Lang also have a certain spirituality. They still left their home courts, and they have been displaced for thousands of years and are in a repressive environment. Otherwise, the spirituality is definitely higher, and maybe it will become fine.

This temple was built more than 4,000 years ago.

As Shen Lang analyzed, the high priests of this ancient civilization at that time used the worship of the sun \*\*\*\* to use the ruling class to promote and absorb the power of the people.

At that time, the population base was far from being comparable to modernity, and it was only a country. Therefore, whether it is a temple, an obelisk, a pyramid, etc., even if it has the power of the ruler to order the whole people, it will often take decades and a hundred years to fix it.

The pattern and environment built by this temple, including the auxiliary of the obelisk, are all aimed at amplifying the power of the essence and the energy of the universe.

Together with the power of faith, everything is a precious resource for the high priests.

In order to better absorb and utilize them, they themselves try to integrate with this environment. Over time, some of their consciousness was absorbed by the temple!

It's because the gods are all fake, everything is in this temple, so that the temple has more and more energy, coupled with the power of faith and the consciousness of the high priests from generation to generation, and finally let After it has opened its mind, it is far better than the general.

When the temple has the ingenuity, it will learn and imitate the human high priest!

This is a way of imitating cultivation, absorbing energy, and so on. Although its learning and imitation is not very straightforward, it is not so obvious, and it is not a year or two, but a few decades and a hundred years.

So this process has not been found anything.

Later, this land has also experienced various ups and downs, and many high priests have fallen and decayed.

From the time it was built to the opening of the intellect, it may take thousands of years to wait until interesting learning and imitation, and begin to try a little bit of cultivation, which is a long time after thousands of years.

Later, after encountering a powerful attack from outsiders, the land was conquered and the temple was controlled.

Due to different beliefs, many local gods have been destroyed!

The same is true of this temple. Everything in the temple, destroyed and destroyed, is left with little value and is not worthy of aggression.

The temple did not resist anything at the time, because it was not a god, and there was nothing to destroy the image of the god. It is the whole temple. As long as the temple is not destroyed and burned, it will not lose much!

The priests of the temple, after being killed by the invaders, the scattered souls and souls are absorbed by the energy form!

But this is not over yet!

In the decades after the aggressors left, they encountered local residents who believed in the dynasty. Not to mention the ability and belief to restore the temple, or even dismantle the things inside the temple. The invaders such as seats and bricks disdain to take away. The things that can be moved home for the poor nearby.

In this way, the temple becomes what it is now.

Chapter 2173 - 0 year secret

In the same year, as the army invaded the land, there were naturally many self-cultivators. In those days, they were basically presented in the form of religion.

The temple did not rise up and resist, on the one hand because it did not have much influence on its own, and on the other hand, because it did not have enough power to confront!

After all, it is a spiritual temple, it can't be moved, and it can be done very limited.

Not to mention the cultivation of the real strong, is the army of ordinary people, directly in the surrounding firewood, it has no way to escape. It is to go up and dismantle it, and it can do very limited.

Therefore, it is a bystander, a witness, looking at the destruction, it is not hurt. Instead, the priests' ghosts of the dead provide a lot of nutrients and give it a wave of status.

Of course, in the decades after the destruction of ordinary people, the temple can handle it with ease.

Because they are all ordinary people, and they are not as large-scale as the military, it can directly deter those who are in the right hands in a haunted and conspicuous way.

When the things in the temple were evacuated, and some people wanted to demolish the temple, it was slightly moving, letting a person fall to death, bricks and so on.

The ancient people were always ignorant. After they were scared, they naturally stayed away from each other. Then they spread the gods and began to worship.

At that time, the comprehensions on this piece of land were annihilated. The ruler can recover, but the cultivation of the truth and the religion are broken down. If you want to develop again, it will not be completed in a few years.

In the time of the dynasty, there is no new priest to reinvigorate the temple. When the rulers revitalize, they must first go through the war years, then go to the poverty era, and then re-develop to the rich, and then have the energy and resources to repair the temple. .

Therefore, even if the people nearby are re-cultivating, there is still nothing left here.

But later, there was a superpower who didn't know where to come from and directly accepted the temple.

The man claimed to be the great \*\*\*\*\* of Kemrisu and accepted the temple. He did three things.

One thing is to sink the temple directly to the ground!

This process, however, has an invisible protective cover that completely protects the temple. Even if it sinks into the ground, it still remains intact and will not be filled with sediment, and will not be filled with groundwater.

In this way, for the people nearby, for the world, it is gone! Everyone is sincere and fearful, worried that it is a disaster, and will worship and pray near the site where the earth is filled again, but no one will find it.

The second thing is that there is a lot of transformation on this temple. This kind of transformation is not a change in the building of the room. It is to transform this building into a similar appliance.

After this, let the spirituality of the temple and the temple be more completely integrated. It is not only spiritual, but actually can better manipulate the whole temple.

There is a feeling that it feels that it is a complete life, it is the brain consciousness, all the wall buildings of the temple, etc., just like its muscles and blood. It felt like it for the first time, as if it were real with hands and feet.

The third thing is to give the temple a more powerful spiritual consciousness, so that its wisdom and ability are much stronger.

Strong suppression, coupled with a good sweetness, naturally let the temple completely conquered.

And this Kemrisu \*\*\*\*\* will not stay here, but will come here once in a while. There is no human time concept in the temple. At this time, it is impossible to determine how long it is.

The mission of the temple is to continue to absorb energy here!

It absorbs the energy of the universe, not the sun's rays, so it has nothing to do with the sunny and cloudy rain. It has little to do with the deep underground. It may affect a little strength, but it does not affect the general.

Compared to the original, it just lacks the power of faith.

But there is also a benefit. It is buried in the ground and gradually forgotten by others. It is already destroyed by the war and will not be disturbed.

Every time you return to the Great God of Kemrisu, of course, it is also a purpose, that is, to absorb the energy accumulated in the temple.

The temple was originally used for this purpose, and it was also the defendant who had smashed it. If it was not absorbed, it would leave it a little, so the temple was also contented and did not turn against the \*\*\*\*\* of Kemrisu.

For two thousand years, it has always maintained such a role.

As for the "Kemrisu God" who came back later, it is still not the same person. It is actually not clear.

The temple and the obelisk are also related!

The obelisk was originally part of the temple and was designed to help absorb energy. It was just because of the spectacular chic, not the direct idol, so it was not destroyed, but it was taken away as a showy spoil.

There was no way for the temple at the time, and it could not be stopped.

However, in the long years later, after being “upgraded” by the great \*\*\*\*\* of Kemrisu, and after absorbing more energy, and after practicing and upgrading, it found that it can sense the existence of three obelisks!

It’s just a long way apart. Although you can feel the existence, you don’t know the specific place. Of course, it can’t go, and it can’t make the Obelisk come back.

Later, it expressed the message of the obelisk back to the great \*\*\*\*\* Kemrisu.

As long as the great \*\*\*\*\* of Kemrisu is willing, it feels that it can be brought back.

But at that time, the great \*\*\*\*\* of Kemrisu just gave an ambiguous answer: time has not arrived! Time is up Obelisk will naturally return home!

Time has come to the present, and the temple has grown a lot in the past two thousand years. Plus, after a long period of time with the obelisk to maintain the sense, how much can still have a little connection.

They are one, so there are no communication barriers, and because they have been absorbing the energy of the universe for thousands of years, they can also establish a certain connection in this way.

When Shen Lang and the Obelisk touched each other, the temple was sensed at the time!

It is very exciting, and I realize that the time of the Great God of Kemris should finally arrive!

It doesn’t have pedantic, and it won’t feel that the obelisk will move back one day, and the Kremsho itself will come once long.

They can’t move, even if the opportunity comes, they still have to rely on others, but this opportunity must be grasped by themselves.

So at that moment, it immediately released a strong idea of the past, letting the obelisk feel, and conveyed to those who touched them the will to send them back.

Therefore, the obelisk will be so pleading for Shen Lang, and will quickly and actively contribute the energy of the reserve. After that, it was also very gentle, and I wanted to absorb it in the space of the sky.

There is only one goal – return!

This may have the will of the obelisk itself, but more is far from being a spiritual temple that is far from being influenced by a remote control!

Chapter 2174 - Remove it

Shen Lang brought the obelisk back here, and could not find the traces of the temple. In the end, the specific location of the lock was not an obelisk.

With their little spirituality, and with the departure of two thousand years, returning to this unrecognizable place, it is impossible to lock it so precisely.

All of this is remote control of the temple below, let them determine the location, in fact, it is not the specific location of the year, but the location that the temple can now affect!

Even if it is cultivated until now, it cannot be left under the ground, and it is impossible to carry the obelisk. But above this top, controlling the soil and controlling the obelisk to fall is the limit that it can do.

This is also a loss of the mindset of “good people to do the end”, with them carefully moved, or even if it is in front of the eyes, it is not so easy to command the obelisk above.

This temple is protected by the formation of the earth pressure, and because the obelisk is a part of it, it can be allowed to fall.

The obelisk is in place, and for the temple, it is a long-cherished wish for two thousand years. With them, they can help and absorb energy better.

When Ben came to this time, it would come to an end. Shen Lang sent the obelisk back. The obelisk also paid for energy.

But seeing the temple under the ground, Shen Lang came in and looked at it because of curiosity.

This makes the temple move other minds!

The obelisk is absorbed a lot of energy, it can be felt, it must be accumulated in two thousand years, it is a loss.

And the connection with the obelisk has disappeared for a while (the space of the Bible), which makes it not know the specific process.

At this moment, Shen Lang came in the temple, and it immediately decided!

If you go directly, that's it. If you come in now, don't you want to plunder me? How is it different from those of the aggressors of the year?

Not reconciled and resentful, let it begin to intentionally attract the sinking waves, let him continue to deepen.

And want to leave him here!

When those priests were killed, all the spiritual power of the soul became its tonic, and it got a good growth, which was second only to the upgrade of the Great God of Kemrisu.

Therefore, for the consciousness of human death, it is still a little missed, but there is no chance for two thousand years.

Now the opportunity is in sight!

This human being who can send the obelisk is very powerful. If he can stay here and absorb all his spiritual consciousness, it will inevitably make it extremely strong!

Even... can grow to a comparable level when the Kremsho is back!

For two thousand years, I will be willing to do an instrument here, and I can control the whole temple calmly, but after all, there will still be illusions. I will think that I can leave here one day and travel freely.

Originally, the appearance of Shen Lang, in the view of the temple, this is an opportunity for the prophecy of the Kemrisu god.

After Shen Lang really sent the obelisk back, it was not satisfied. I felt that if this human power is given to “eat”, would it be reborn? Is it possible to leave here?

If you can leave with a temple, or become an adult, then of course it is not willing to be the instrument of the Kremsho.

So everything behind it is arranged by it.

From the moment, it is suppressed against Shen Lang, which is the advantage of its home court.

The boulder blocks the door, but it is to attract the sinking waves. After the steps went down, the attractiveness of the entrance was made even more obvious. At that time, it was afraid that Shen Lang would turn back.

Inside the underground space, it is the place where it is attacked!

The whole temple is it, everything is it can be manipulated, the temple is alive, because it is a temple!

Everything behind, Shen Lang is fully aware.

This temple wants to “eat” him, but after all, it is the first time to kill, the experience in all aspects is much worse, the strength is limited, and it is easily crushed by the waves.

After understanding everything, Shen Lang was a bit speechless.

Originally touching the obelisk, it was only a temporary cynical curiosity. I didn't expect it to be fooled by a few honest stones!

If he is not strong enough, he will be stuck in this underground temple if he is not good.

This became a fine temple. Although the strength is not strong, it still has its own home court advantage. These transformed temples can be manipulated as weapons.

This temple is meant to be separated from the control of the Great God of Kemrisu. It is said that it is the pursuit of freedom, but it is a means of unscrupulous means that one day it will be a nearby human being.

However, these Shenlang actually don't care. It is a temple. It can't talk about human nature. It doesn't matter if it wants to get out of control.

For Shen Lang, it is actually a simple point.

If you engage in other people, I will not be in a hurry, you will engage me, then don't blame me for being unkind!

In this temple tonight, if he really wants to make trouble, he can already get started, and he has been merciless for several times.

Now that I have fully understood the original, there is no such thing as looking at the obelisk. The obelisk is the spiritual stone that is controlled.

This temple is to eat him!

With this subjective consciousness, it has already been done, then there is nothing to say, just remove it!

As for what is the king of Kemrisu Who is in the memory of the temple, it is very vague, very mysterious.

Shen Lang will not go to control, no matter what the inheritance of ancient civilization, or what mysterious sect, it does not matter.

It's not two thousand years ago. After such a long time, even if this pulse still exists, it will definitely fall.

Perhaps it is one of those who have no return to the sea.

But before you dismantle this temple, of course, don't waste it. The energy it accumulates is still quite a lot!

It has no concept of time. According to the analysis of Shen Lang's analysis, it is estimated that what is the great \*\*\*\*\* of Kemris, the descendants of each generation, will come here to absorb energy, certainly not the God who has survived for two thousand years.

This time may be decades or more than a hundred years.

Every time I came, I also absorbed a lot of energy accumulated in the temple, but it was not completely sucked out. There was still a part of the temple left behind.

These energies are also resources that the temple itself tried to cultivate, and it gradually grew to the present.

In other words, because the temple is often "cash out", the "cash flow" reserve is not as good as the obelisk that has never been moved.

However, the temple itself is a large type of "fixed assets". There is not so much "cash". Fixed assets can also be realized to a certain extent, and the value is also very expensive.

Chapter 2175 - Temple avatar

If you compare energy to money, Shen Lang can't reserve too much "cash". They all think of ways to turn them into "deposits."

For the obelisk, he did not \*\*\*\*\* them up, but it is different now.

This temple wants to "eat" him, that is to want his life!

This is the enemy. For the enemy, Shen Lang has never been soft.

The temple is regularly charged by the messenger of the Great God of Kemrisu, and it is used by itself to cultivate and improve, so the energy reserve does not necessarily have more obelisks.

Then you can only take down its “fixed assets”!

I really want to toss this temple, and Shen Lang is a little inexperienced.

He has seen various temples – or temple-like buildings, such as the ones in the dead forest, and the thousands of caves.

But even if the temple contains energy, it is a carrier, and it is the first time to cultivate a temple of self-awareness.

Thanks to its ancient history and special heritage, what is behind the Kemrisu \*\*\*\*\* is also a boost.

If it is just a carrier, it is easy to absorb its energy. It is not difficult to do it by dismantling it directly and destroying it.

But now this temple... What should I count?

monster? God?

Shen Lang thought about whether or not to throw it directly into the tower of the tower. According to the truth, it should be refining it.

But this is different from a person, a beast, a magic weapon, and the \*\*\*\*\* is limited. Its body is a building. It is a large amount of masonry and sediment. If it is really thrown in, it will be rejected by the tower.

Having said that, if you haven’t experienced it before, you will have a little fun, and you will have a little challenge. If you really have a good car, you don’t have much meaning.

After sharing the thinking of the temple and confirming that there are no other enemies here, Shen Lang can also be assured.

First of all, he combed it. The present existence of this temple is no longer a pure building. It should be considered a demon.

As I have seen before, the entrance can disappear suddenly without any traces. The ceiling with a thickness of ten meters can disappear instantly. The entire underground space can be squeezed quickly and can be restored immediately.

All of this proves that this is no longer an ordinary building. This is the spiritual consciousness of the “Temple of the Temple”, which is like a special “body” that can be controlled by controlling the limbs of the hands and feet.

If you want to dismantle it, you can't follow the inherent thinking.

Originally as a building, its value is in the building itself, the house has market value, and after being a place of historical interest, it is of extraordinary value.

But if you simply take them all apart, simply selling the materials, then it will only be a little brick, and even a lot of the value of the broken bricks will be greatly reduced, that is, it is not a fraction.

This temple, which is now very special, has refining energy into the body. The whole temple is like a magic weapon, like a demon body. This is its special value.

If you unload it, extract all the energy, and finally it will be destroyed, and the energy obtained may be just a fractional value.

Shen Lang wants to “demolition” because its value of “fixed assets” is not for “selling scrap iron.” Otherwise, it is better to ruin it directly and to refresh it.

Since it is one, then control it, can you control the temple?

Shen Lang had already controlled it, but it was the control of imprisonment. Now it is also a shared way to understand its thinking consciousness, but the temple does not belong to him.

This idea can be tried, but Shen Lang is a bit hesitant.

Even if it can be controlled, what effect?

Is it possible to release a temple when fighting people?

It's not the Erlang God and Sun Wukong's fighting...

but.....

Why is it a combat tool?

He does not lack the weapon magic weapon, but it is a bit special.

For example, before the Gang Rinpo Qifeng, everyone was going to be outdoors in the cold, not to mention the ruins.

Although the body can survive, it is not so comfortable after all.

If you are in a tent, you can "change" out of a house... Isn't it very windy?

Especially when there are many people, such as when the earth is taking risks, and when many ancestors are in the holy place of Yungong, there is such an object, which is still very practical.

Thinking of this, Shen Lang began to operate!

He has already completely suppressed the spirit of this temple. He has already understood everything about it. What he has to do now is to directly integrate with it!

But Shen Lang does not make it a part of himself, because I don't know how this will affect him. If the whole body is integrated into him, it is cumbersome.

So the final way is similar to the avatar, divided into a sense of consciousness, fusion and complete control of the temple, become a new master, another form of becoming a part of him.

Although Shen Lang does not have this experience, it is not too difficult to operate.

The root is that he is far better than this temple!

Whether it is strong mental power or experience in all aspects, this temple is far from good. Soon, it was like being smashed by the smashing gods of Shenlang. The fusion disappeared and became the dark wave to control everything.

After completing this critical step, Shen Lang tried to communicate with the temple of this avatar.

This is actually not his avatar, but the control of the consciousness of the gods, and this is like the linkage of the avatar.

This creates a situation in which Shen Lang wants to know everything about the temple and wants to control the temple. He can read it at any time, and the temple cannot affect his subject.

I feel that the whole temple is like my own body, and the experience is still very wonderful. He never thought that he would be a house, but now it is the feeling of a house...

“Switching” to the state of the temple, he is as strange as seeing himself standing in his body.

Then he began to try to control this temple.

Because the consciousness of the temple is mixed Although it is not very accustomed, in fact, everything is still free of charge. For example, if he wants to let the room behind disappear, it disappears directly; want to make the entrance to the underground space, It has appeared.

After trying this for a while, Shen Lang has been able to control the entire temple as he pleases.

His own body did not need to go any further, and the temple was moved directly to the ground, and his body was sent to the ground and sent to the outside of the temple.

This should not be said to fight with the master, it is still very practical for daily use, and it can also have the effect of pulling the wind.

But Shen Lang did not stop here, he looked at another goal – three obelisks!

Can you control them as you like?

Chapter 2176 - 3 monuments 1

Heaven and earth conscience!

When Shen Lang saw the obelisk in the Guangming Temple Square, he did not want to be taken for himself. He was simply moved by the idea of “going home”, and by the way, warned the gods of light.

But now I came here and found that they did not imagine the spirituality. They were the remote influence of the temple. The temple first got him back through the obelisk and wanted to kill him.

Now that the temple has been taken over, the obelisk still has to do it!

The obelisk was originally integrated with the temple, and now it is also getting under the ground.

If it is returned to its homeland from the city of light, the outside world can be called a miracle, it is a light god, and it is hard to say anything.

But it falls into the bottom of the 100 meters, and no one will know it in a short period of time. If it is said that the Holy See does not disclose this secret, it will feel that it has been stolen by Shen Lang!

Already on the back of the robbery, and is integrated with the temple, there is no reason to let it sleep in this underground.

Compared with the temple, the obelisk actually benefits more. For example, they also accumulate a lot of energy, for example, they all have hundreds of tons, which is really a weapon!

Imagine, when fighting with people, the obelisk of hundreds of thousands of pounds smashed down, not to mention the power, the momentum is very dazzling.

Since the obelisk was just sent back, the temple controlled it, that is, manipulating them to move above, and after the exact point, pulled them into the ground.

Can you do something a little further, that is, there is no memory in the temple. Because it was still impossible for two thousand years ago.

In the past two thousand years, it has refined the temple into a body, but the obelisk is not present.

Now Shen Lang uses the temple to connect with the obelisk. It is not the same as his own contact before. The communication of thinking is completely unobtrusive. Without words, you can understand each other directly.

Moreover, the obelisk is an aid to the temple. It was also affected by long distances. Now the temple is controlled, and it is still absolute. They are too low in intelligence and will not object to anything.

After a few attempts, Shen Lang confirmed that the temple can move them easily around, but it is impossible to lift and wave them as weapons.

To a large extent, it seems that the temple is manipulating the obelisk and relies on the support of the earth.

However, with such control, Shen Lang is already satisfied.

The temple consciousness can manipulate the temple building as it is now. It has been a long time after thousands of years, and it is also the refining of the two thousand years after the great \*\*\*\* of Kemrissu let its consciousness leap and evolve.

That is the progress of every point, it may be decades.

It is already a very high starting point to be able to manipulate the Obelisk so easily.

Later, Shen Lang used the temple to separate and began to inculcate the concept of the obelisk, let them understand that they are integrated with the temple, to fully obey and cooperate with the temple.

In the process, the temple was surrounded by the past and the obelisk was placed inside the temple.

After confirming that they fully cooperated with the temple, the temple began to try to shrink the temple!

The building of the temple, since it has been refined into a magic weapon, or evolved into a demon body, can manipulate the changes as desired, and it becomes a normal operation.

There is only one point that Shen Lang needs to be careful about – whether the obelisk will become smaller together!

If the obelisks don't get smaller, put them in the temple. If the temples are narrowed, it will be like letting them break the temple.

Even if this does not destroy the body that hurts the temple, it is impossible to carry away the three obelisks.

Therefore, in the course of this operation, the temple avatar must be instilled more strongly into the obelisk, so that they obey the will of the temple, let them be connected with the temple, like other bricks, become a temple Part of the body.

If it is a normal process, the temple will not be anxious after the obelisk returns. It may take hundreds of years to complete the process of unity.

If it is a long time, it will be a little bit of change one by one. It is a quiet, moist, frog.

Now Shen Lang, it is necessary to pull out the seedlings to encourage, to use a more intensive way, let them through this stage as soon as possible.

If you want to compress hundreds of years of change and complete it in a few years, it is already one percent of the time. If you want to compress to a few hours, or even tens of minutes to complete, it is simply one million!

It is also impossible to reinforce the gods and millions of times more than the temple. It is not enough time for the Tianshu space to be 100 times longer.

However, this time is not absolute and there are extreme variables.

The temple takes so long, because no one teaches it skills, including how long it has been cultivated, and it can be suppressed by the waves, because it actually has no human exercises, but only after the consciousness is awakened, by instinct.

The same goes for this process. If it has experience and methods, and it doesn't have to go with the flow, it doesn't take hundreds of years.

And Shen Lang, in these respects, is really stronger than it is not many times, because of the transformation of the mysterious energy of the Yungong Holy Land, he has a repressive effect on everything!

Just now, it was able to suppress the temple, making it easier to manipulate it. At the same time, it can also suppress the obelisk and make them more submissive.

And now the consciousness of the temple is not the original temple, it is the consciousness of Shen Lang!

The realm of Shenlang is far better than the temple. In the same way, the effect is not known how many times, and when the willpower is instilled, the mental influence is deliberately exerted.

The spirituality of the obelisk is simply that it cannot reach the level of resistance to the waves, and it is directly affected by indoctrination.

Therefore, this temple will be a long process, and it will be greatly shortened when it comes to Shenlang.

He is completely in control of the influence of the obelisk, and more time is spent on how to make them blend well.

Because even if the obelisk is fully coordinated, it does not know how to integrate itself. The temple does not know. This is the process that needs to be tried.

Shen Lang also needs to try, but it has greatly shortened the time.

His understanding and experience of “Heaven and Man” and other experiences have helped to reduce a lot of detours, and after repeated attempts, let the temple and the obelisk completely blend!

As a result, the Obelisk is not only an independent individual, but also a part of the temple.

When the temples are shrunk, they will be reduced in the same proportion in the temple!

Thoroughly conquered the obelisk, it is an important part of Shen Lang.

Then there are two other questions that need to be tried. One problem is not so important, and that is the scope of the temple.

Can it only change in the pattern that the temple building has? Can you change into a building of any shape at will with the consciousness of Shen Lang?

Chapter 2177 - Palm 0 tons

When Shen Lang directly merged and took over, it was already tried, but it was based on the existing temple pattern.

Now that the problem of the obelisk has been fixed, it is ready to leave.

If you take it on the mainland of Nakajima, it will be nothing more. When used on the earth, it is still a bit awkward!

After all, the style of this temple can not be recognized at any glance, but it can clearly recognize that it is not a Chinese civilization.

When others think about it, they may think that you are very bullish. This is to bring the temple of other people's ancient civilizations.

If you think badly, you will feel that you are not flattering? Otherwise, it is obvious that the building you have changed, how can it be the appearance of other ancient civilizations?

Besides, this thing is conquered, it is not for combat, in addition to the practicality of the wild ease, that is, for a lot of people to install a forced use.

Can't be completely free to change, can you still be happy?

Therefore, this issue is neither so important, but it is actually important.

I felt the original memory of the temple, but it really only changed in the temple structure!

However, in Shen Lang's view, its memory will not matter!

Because this cargo is an old guy more than 4,000 years ago, how many architectural styles can there be on this ancient civilization?

Besides, it has never left here, and has not seen other buildings. The knowledge has restricted its imagination.

There is no imagination, where is creativity?

The temple did not even think about changing to other looks! Being able to manipulate the entire temple is an unimaginable surprise for it.

Shen Lang is different. The building he has seen is the first in the world and it is not an exaggeration!

In addition to having visited the world in person, there are all kinds of materials on the earth in the holy armor, as well as various materials in the city of the river basin, which can present all kinds of buildings that he has not seen before!

Of course, not everything is needed, but in terms of imagination, it is impossible to compare the temple for another four thousand years.

With this idea, I will do it.

Shen Lang does not need to change the difficult architectural masterpiece now, let it change into an ordinary house.

His will can be directly fulfilled, and then he can find that as long as there is a manifestation in his consciousness, the temple does not change.

In any case, it is essentially a re-arrangement and combination. As long as there is a model to follow, the specific internal structure, external form, etc. can not be the same, but the appearance is still able to make an approximation.

Shen Lang also needs this level, and does not want to turn it into architectural art.

But the process of real fulfillment is still very difficult!

Although the consciousness of the temple has died, its body still has some instinct. This is an inertia. For a strange structure, even if there is a figurative, it is also very illegal.

It's like a person suddenly knows a foreign language, but if he wants to speak out smoothly, he will still stutter. Because of the organization's wording, it still depends on the inertia of the mother tongue.

The implementation of the changes in the temple is very rigid. It can even be said that some instincts have been encountered. After all, it is an area that the temple has never seen or experienced.

But now, Shen Lang dominates the temple!

If it is against, then it will be carried out forcibly; if it is rigid, then come several times!

Under the strong will of his willpower, the temple began to show other changes. For the first time, it took a little time, and it looked quite awkward, but it was good to complete the first step.

Then Shen Lang let the temple speed up the change of speed, time after time, one after another.

The role of training can break through inertia and greatly expand the limit.

When the building can be changed at will, the problem of Shen Lang is solved.

There is another more important issue!

What kind of form is it taking away?

Since this thing has been conquered, of course, it can no longer be placed here. It is meaningless to take it back to the Tianshan Jianzong or Pingxi. It is only portable.

It is practical and loaded to force these two effects, are uncertain, it is to look at the timing.

Carry it with you, that is inevitable.

What kind of form is tangled in the dark waves?

He considered two kinds, one is similar to Leiyuan, directly “integrated” into his palm or somewhere, integrated into the carrier.

Although it is not more powerful than Leiyuan, it can be done as his avatar.

The other is to regard it as a spiritual magic weapon. The temple’s avatar consciousness is equal to the magic weapon of the magic weapon, so that it can be collected in the storage space.

To be convenient, of course, the first one, it is completely integrated, and may even be nourished by him, so that the non-temple is better and more effective.

The downside is that I don’t know if there will be any damage to my body.

Lei Yuan, a heaven and earth spirit, there is no way. With the strength of Shen Lang at that time, people were tempted by him, and they did not bother to embezzle him or even fight for him.

But this temple... Although it is now controlled by itself, what if it is out of control?

As a magic weapon, it is much simpler. Usually throw it directly into the storage space, and take it out when necessary.

There is no need to worry that it will harm, and vice versa...

Now that other problems have been fixed, this problem remains.

After Shen Lang was tangled for a while, he already had an idea.

Choose the first one and raise it to your palms!

Lei Yuan does not bother to take the initiative to harm him, but for a long time, there is no passive injury to him, it can be seen that there is no problem.

As for the other worry, it is not confident enough for yourself.

Now this is no longer the wisdom of the former temple. This is the separation of his temple. That is his glimpse of consciousness. How can it endanger the rebellion?

After deciding, I started to try, minimized the temple as much as possible, and then earned it into the palm of my hand.

This of course also summarizes the experience of Leiyuan, let it try to put it together in a similar way .

However, Leiyuan is driven by it. Shen Lang really wants to do this. It is not a success. It is also tried again and again.

In the end, the temple that was miniature to the extreme was collected in the palm of the hand, and Shen Lang felt very wonderful.

Such a large temple, including a few obelisks, can be miniature to his palm without any singularity.

If you really want to fight, if you shoot the palm of your hand and release it in an instant, will it have a shocking effect of a thousand tons?

After all this, Shen Lang came out from the ground.

When I came out, I felt murderous!

Chapter 2178 - Kermisu water monster

When Shen Lang came out, it was already daylight. It took a lot of time to toss the steps of the temple underneath.

He can toss in peace below, because it is confirmed from the memory of the temple that there is no “companion” and the surrounding is safe.

The only thing that will visit it here is what is the great \*\*\*\* of Kemris, which is probably only a few decades, a few hundred years, and it is impossible to appear so skillfully.

Plus, this is a hundred meters underground, and it won't alarm ordinary people, so you can be assured.

The warning of Shen Lang is limited to the underground. If there is any strong nearby, I found that the movement here has come over. If you want to figure out, you must also enter the underground.

As soon as he entered the underground, he naturally knew it.

No one was disturbed by the whole process, but I didn't expect it to come out with murder!

Is this just someone coming over?

Or the other party has already arrived, but the heart is taboo, do not dare to rush to explore underground, just wait for the rabbit to wait until he sees him, only to produce murderous?

Of course, these are just flashing through Shen Lang's mind.

His more consciousness has quickly locked in the source of murder.

For a super-powerful person like him, this doesn't even need a strong murderousness. It's just that there is such a killing, you can feel it, and it will lock right away.

But a little bit of a surprise is that this murder is actually from the air!

Above the temple ruins park, there is a dark cloud, the dark clouds do not mean rain, and there is no wind blown away, so it exists above this.

After feeling locked by the sinking waves, the dark clouds immediately fell over!

After Shen Lang locked the source, it was completely clear.

Before entering the temple, it was suppressed, and now it is completely unobstructed. He has clearly perceived it.

This dark cloud is not a rain cloud, but a protective layer that is intentionally created, that is, it looks at the dark clouds, and the height is only a few hundred meters.

Inside the dark cloud, there is a dragon-shaped creature!

At this moment, the clouds are coming over, and it is this dragon-shaped creature that has been attacked by the waves.

In an instant, Shen Lang has felt a strong murder, and the power is huge. From the air to him, there are still hundreds of meters away, and the surrounding space is completely blocked!

At this moment, Shen Lang quickly figured out a lot of things!

This should be what the Krems!

Originally thought to be a sect or a generation of priests to use this code, in fact, the same Kemlisu god.

And this \*\*\*\*\* is just its self-proclaimed, in fact, it should be a monster in the Nile!

The reason why it can help the temple to grow spiritually is not that it gives the temple a soul, but that it has gone through the process of opening up the mind and cultivating the soul.

In the words of China, this is a long-lost big demon. It finds that after the temple has the spiritual knowledge, it helps the temple to cultivate into a demon, and also accepts it as a younger brother. The role is to help it absorb energy.

Because it understands this desire, it can control the temple; it also has experience, it can help the temple to become a demon better than the human strong.

As for Shen Lang, I can suddenly think of these, some are clues, and some are brain supplements.

The clue is actually a memory from the temple!

The ancient civilizations built here more than 4,000 years ago were originally built here because of the disorder of the Nile River monsters. The high priests initiated the construction of a temple to suppress the water monsters and calm the flood with the power of the sun god.

This is the source of the temple. It was intensified by generations of priests and also by the believers, so it is also integrated into its thinking.

But in the end, what is the role of the temple, whether it is to keep the water monster, and so on, the temple consciousness is naturally unknown.

Before Shen Lang did not use this as a clue, because in ancient times, many of them came like this. Many self-cultivators also borrow people's awe of nature and achieve private goals.

The wizards of the primitive society are the same.

In addition to exploitation, it may even be a disaster they created.

For example, there are some river floods in the river. After the villagers sacrificed three animals and five animals, they settled. Some monsters deliberately, including sacrifices.

Of course, this is also the demon outside the path of the righteous person.

Therefore, this information, in his view, was the priests at that time, through natural phenomena such as floods and droughts, encouraged the rulers to build temples here, intimidate them in the name of water monsters, and let more people worship and sacrifice them.

These clues were skipped before, and now I see that there are really monsters that are connected.

As for the monster, the Kremsuru in the mouth of the temple is the result of brain supplementation or connection analysis.

This information is also flashing in the brain of Shen Lang, and does not delay his attack on the Kemrissu monster!

A few hundred meters down from the air, this Kemli Suwei monster is also less than a second, even when it has reached the top of Shenlang's head.

It was waiting in advance at the top, and it was just grabbing an advanced attack and completely blocked the surrounding hills.

At this moment, I reached the top of Shenlang's head. In the dark clouds, I suddenly opened a big mouth, directly smashing a large space around Shenlang.

This Kemli Suwei monster can be messed up more than 4,000 years ago. Life should be a big demon.

Whether it is still in the Nile or hiding in other places, Shen Lang is temporarily unknown. But one thing is certain, that is, it has a remote monitoring of the temple!

So when the temple consciousness was swallowed up by the sinking waves, it should know that something was going on here.

For two thousand years, the energy accumulated here, it only needs to come over and extract it, which is equal to the speed at which cultivation is at least doubled.

Now that someone has been robbed, can you be willing?

The time of one night passed, and it was enough for it to come over the layout.

Perhaps the temple can be sensed before it is squeezed into the palm of the hand, so it is ambushing on it.

And this moment it is a lore!

The spiritual knowledge of the temple is far better than the obelisk, and this has created the great demon of the temple. Naturally, in terms of wisdom and experience, it is far better than the temple.

It is clear that human beings who can do this are by no means good. Even with its eternal skill, perhaps it is a chance!

Therefore, it has not been merciless at all. Under the cover of the dark clouds, the whole hills have been blocked and controlled. At this moment, the engulfing of Shenlang is not directly related to the body of Shenlang. Everything around it sucked, and the brick and stone were gone.

However, its strong suction has just arrived at the side of Shen Lang, a cold flash of light!

Shen Lang's body is still moving, and the sword of the king has reached its mouth one step at a time!

Chapter 2179 - Not qualified to talk about conditions

Just after the pre-emptive control of the surrounding Kemrisu water monster, Shen Lang was not surprised, and he did not reverse the control.

Just waiting for its attack, and then the sword is accurate!

Kemrisu water monster saw the sinking waves, I thought it was successful to control him, so I saw him quickly out of the sword, was taken aback, and the cold flashes, it has made it feel super strong The power.

It is a kind of old demon that can live to the present, and does not know how many generations of struggles have been completed with the human monks on this land. The experience is very rich.

For Shen Lang, it is not a light enemy at all, so I was shocked by the surprise, but I was not caught off guard.

Its body is still a cloud, but it is like a ghostly dexterity. When the sword of the king reaches its mouth, it has been removed.

Shen Lang is also a bit surprised.

Just after he didn't move, he was sure that he could complete the attack under the blockade of the other party.

The speed of the sword of the king is still very fast, but it is not his normal speed, or it is held a little bit, otherwise, even if you can not kill the Kemrissu monster, at least you can hit the injured. .

This is a temptation, and both sides have a deeper understanding of each other's strength.

"You are the so-called Kremsho?"

During the speech of Shen Lang, the sword of the king did not attack again, but was raised in front of him.

But just such a motionless pause sword style, let the ghostly general Kemrisu water monster, do not dare to act rashly.

It has a strong feeling that no matter which angle it has passed, it will be given to this sword before it is near the Shenlang!

And this sword is also obviously beyond the power of imagination.

Wannian old demon, can survive, in addition to strength, more important is self-knowledge!

After playing hard, you can't beat it, that is to ask for trouble.

When the ancient priests of this ancient civilization were strong, it should also be evasive. Waiting for Shouyuan to die the priests, when they were ravaged and the temple was broken, it came out to be a great god.

It is the same now. It attaches great importance to this human power, and also thinks that the raid has swallowed him, but it is almost more cautious when it is almost countered.

At this moment, seeing Shen Lang has a heart-to-heart dialogue, and he can't cross the sword in front of him, so that it can only stop.

"I am the great \*\*\*\* of Kemris!"

When I responded to the sentence of Shen Lang, it was very uncomfortable and unwilling.

Because humans can ask this sentence, it shows that the temple has been completely controlled!

It was originally conquered by the temple and cultivated the temple, but what can be done overnight?

Not only did it take a lot of time, but it also cost a lot of resources and energy. In the end, I could cultivate such a younger brother who is a general-purpose temple.

Now it has been taken directly by this human being!

This is not attack and destruction, it is possession!

If it is attacking the temple, even if it encounters a great destruction, it does not matter. Anyway, it has a lot of time, and the temple can be recovered after all.

But now the other party is taking possession of the temple, which means that the other party has understood that the temple has spiritual knowledge and knows that the temple can absorb energy.

This is equivalent to the fact that it has planted fruit trees for two thousand years and was suddenly picked up by others.

“Then you want to continue to be your great Kremsius, or do you want me to take your skin by the way?”

Shen Lang underestimated the sentence, even talking, even the sword of the king was collected.

For the Kemrisu monster, this is a great contempt!

Put it on your skin!

This sentence is an insult, that is to say it is not only to kill it, but also easy to peel!

But... It's a million years old, it's not just strength and arrogance, it's also calm and rational!

It knows that on the earth, the Terran has an innate racial dominance, often decades of cultivation, that is, they are hard to catch up with for thousands of years.

Therefore, this human being, dare to be so arrogant, must be arrogant.

Even the weapons are collected, there is this confidence!

“You are not the person here, leaving the temple, you can leave, and everyone will not interfere.”

The Kemrisu water monster made a concession attitude.

Originally, its goal was to engulf this human being.

Although from the harvest, it is still not as good as the water of the temple, but it can be a leap for it.

But now it is difficult to do it, and the other party's gesture is even higher, so it has to take a step back.

When I said this, the black clouds of the Kemrisu water monster shook.

In an instant, there was a sudden rainstorm around the entire hill!

The dense torrential rains do not know how big the specific range is, but the piece that they are facing is good.

Although it is just a rainstorm, it is actually a manifestation of its strength.

Suddenly, it can cause heavy rain, even if it is only a partial range, it also shows that it has strong control over water.

The core reaction is the power of power!

This is the basis and cost of the negotiations.

The conditions for its opening are to ask for the temple and not to pursue what is going on. This is no way.

Shen Lang is laughing.

“It seems that this Komrisu \*\*\*\*\* has not yet figured out the situation. I am not talking about conditions with you, but giving you a chance to live. If you are conscious, you can let go of your practice, I can let you go. “”

Then he shook his head: “You are very disappointed with your attitude now. Dare to talk to me about conditions. This is disrespect for me. Believe it or not, I really scared you?”

If it is a person, then the Kemli Suwei monster must be very ugly at this time!

It does not say that it has dominated this continent for thousands of years. At least in this basin, it has been a long period of life, and it has seen the rise and fall of mankind.

Now, after making the concession, the other party still opened his mouth and licked its skin. This is too arrogant and too unfaced!

“You are not a person here, probably thinking that the whole world is your home. Here, do you know how many humans have you ever eaten?”

There was a cold word from the murderous murder in the dark clouds.

With the sound of nearby rainstorm is changed into a cold rain hail!

Shen Lang naturally believes, and knows how many humans he eats. It is not an ordinary person. If it is eaten, it will not be remembered by it. This refers specifically to some priests and other self-cultivators.

To be precise, it is not a general comprehension, it is a strong person who dares to eradicate it!

“Kemrisu, you know more about the human world, then you should be clear that the world of mankind has long been different. I am not necessarily limited to my homeland. As for here...”

“Oh! It really has nothing to do with me. I didn’t want to worry about it. But since you took the initiative to admit that you have eaten a lot of human monks, the crime is sent to me, I don’t seem to care!”

Chapter 2180 - Water monster fight

Although Shen Lang is ridiculed to say it, it is indeed his attitude!

He will not claim to be the world police, but now he is indeed the world’s strongest, and there will still be a responsibility.

This responsibility is first of all to China. Therefore, the Western sects will invade, and he will stand up and refuse to let them go.

But like the invasion of other worlds such as extraterrestrial demons and behemoths, including the \*\*\*\* of light, he will stand up and defend the earth.

The demons and ghosts on the earth belong to the gray area.

Like this Kemlisu monster, it is doing evil here, whether it is evil or not, he will not manage it, the past will return to the past, here is here.

This did not affect Shen Lang, nor did he do anything in front of him, so he would not go to nostalgia.

After all, this year's big demon can live to the present, but also has its chance and life.

If Shen Lang is screaming at his own strength, he will kill the other party when he comes over, or feel the bullying, or change the life of the life.

Even if he doesn't care about the righteousness of the means at the moment, the first thing is that he needs to be provoked by the other party.

This is what he just said. If the monster is willing to go back and continue to do it, if he borrows the name of God and deceives the believer, he will not care.

But now Kemrisu water monster, in front of him, said that eating a lot of people, this is a bit different.

For example, a policeman from country A will not enforce the law in country B. Some people confess to the crime in person, and even if they cannot enforce the law, they cannot ignore it.

"You can't manage it!"

The attitude of the Kemrisu water monster began to be tough.

It feels that its posture has been lowered, and the other party is still unwilling, so it must be tougher.

"is it?"

Shen Lang's eyes narrowed slightly.

Like the temple, the opportunity he has given, but the other party does not accept the good intentions, then don't blame him for being unkind!

Originally, everyone is not a relative, but it is the opposition between man and demon. There is no such position to persuade so much.

He also understands very well that if he talks about his attitude well, this monster will probably think that he is guilty of bluffing.

Now that you have reached this level, you still have to do it!

“Leave the temple! Otherwise, leave your life!”

The black clouds of the Kemrisu water monster changed a bit. In an instant, the cold rain and the hail around the hills became just around them!

Before the larger area, now all gathered around the center of Shenlang as the center, more dense.

It is still like a rainstorm, but it is not the water droplets that land, but the hail, which falls into the ground and is directly driven into the soil!

All the hail, when it came to the surrounding of the waves, naturally circumvented. In this hailstorm, there seemed to be an invisible protective cover around the sinking waves, completely separating him.

Of course, the Kemrisu monster does not expect to use this hail to attack the waves. This is just a way to express its momentum.

From the surrounding outer circle, to the present directly to the sinking waves, from the heavy rain to the hail, are showing their strength, are a warning to Shen Lang!

“You shouldn't provoke me...”

Shen Lang shook his head, then raised his hand, all the large hail around him, all solidified in the air!

All the hailstones were originally left out of nowhere, and there was no high-altitude rain cloud. Now that all of them have solidified, there will be no change, and new ones will appear, and they will immediately solidify in the air.

This situation is very strange, it is a bit crazy and intensive phobia.

However, it was only a moment of solidification, and all the dense hail disappeared among the fingers of Shen Lang!

Just the Kemlisu water monster used the hail, and now the treatment of the hail by the Shen Lang, in fact, is not enough to attack the other side, just a show, a show of strength.

From the previous torrential rains, to the fact that all the hailstorms have been attacked around the waves, there is no threat to Shenlang.

Of course, he is very clear that being able to achieve this level is no longer a simple call for rain, but indeed represents the skill behind him.

However, he is now a man standing on the top of the earth. He is a great \*\*\*\*\* who is always ready to transcend this space. This is not enough for him.

But in the Kemrisu water monster, Shen Lang raised his hand and easily dissipated all the hail, directly shocked it!

Because it controls the surrounding environment from start to finish. It is not easy for Shen Lang to freeze all the hail in the air. It is equal to breaking the control of it and then controlling its attack.

Shen Lang's hands raised not only completed the double control and control, but also dissipated all the hail!

Hail is already on such a large scale, it is materialized, and it is weighty, unlike a burst of smoke.

Controlling them in the air, letting them converge into a large group, or falling on the ground, is a normal treatment. But Shen Lang is directly letting them disappear and invisible, which tests the skill.

It can create rainstorm hail out of thin air, which is its super control of water energy. But it is much harder to resist flooding than flood discharge. Fire fighting is much harder than setting fire.

The wave of Shen Lang directly reflects the stronger control than it!

As for the extent to which it is specific, the Kermsu water monster is invisible.

At this moment, its will began to loosen.

Originally, I wanted to be strong, let Shen Lang have some taboos. After all, how to say that this human being is also an outsider, this can be said to be its home.

Now people show it, it is even stronger!

If you continue to go down the bar, then you really have to live and die...

“The moment you want me to leave a life, there is no room for negotiation.”

When Shen Lang said this, his hands were open, so he reached the dark clouds in the air.

Although this is very gentle, there is no energy fluctuation, but the Kemrisu monster has a very horrifying feeling.

It doesn't know what this kind of horror comes from, but it is definitely this man who wants to enlarge it!

Just the control of the surrounding environment, the release of others without revealing the traces, shows that this is not the opponent of the people It has not continued to open the door, but changed the way.

Shen Lang's words have already expressed his attitude. There is no room for manoeuvre. If he waits for his shot, perhaps he will not even have the chance to fight back!

Therefore, at this moment, the Kemrisu water monster broke out the strongest force!

As it screamed, the dark clouds dissipated, and the body of the snake became huge, directly covering the entire hill.

At the same time, along with the sly, it is the mouth of the big one, and it is a big mouth, it is a large cave!

The open mouth, spurting out a lot of water mist, the strength of the arrow, the speed is fast, suddenly surrounded by a large piece of Shen Lang, completely shrouded.
