

First Strong 2211

Chapter 2211 - Re-receive faith

Shen Lang is really not uncomfortable...

Because it is not a long-term plan for Shen Lang, it is good to let them go through the guidance of public opinion, that is, to do something for the cultural relics lost in China.

He did not want to use the return of cultural relics to speculate on a hot spot.

If you really want to operate deliberately, then he should be the last time at the door of the United Nations, in the case of the world's attention, to issue a threat warning.

This time, the effect is really good. He does not have much expectation. The religious leaders are influential, but after all, they cannot directly manipulate other countries.

So after a few more arrangements, he didn't stare at it.

However, his current influence can almost be said to be "a lame, the earth must shake three shaking" characters.

The two sects are not directed at the conscience, not toward the civilization, but at the pressure of his pressure;

The relevant countries are not appealing to religious leaders. They are also afraid that the waves will come to the fore, and they will have to appease them;

In addition to the real ordinary people who eat melons, all major forces and major media have pondered his will.

Both the Light and the Denominations regard the true denomination as a lesson. After the unexpected gains in their reputation, they worried that Shen Lang would feel that they had been robbed of the limelight and could not help but communicate privately.

Although everyone is not a brother, but after all, facing the same situation, so even if they do not say too clearly, there is a general exchange of views.

Are afraid!

I don't want to repeat the mistakes of the true sects.

So, they issued a statement again!

This time, I would like to thank all parties for their willingness to solve this problem. Then I explained that this is not a whim, but several generations of Popes have had such ideas many years ago.

It's just because of various reasons, it hasn't been put on the agenda. This time it's because of the contact with the great powerful strong wave of the East. It was when the earth encountered a giant monster attack in the previous period, bravely stood up and saved the earth by itself. Great people!

The unselfishness of Shen Lang's grandeur makes them feel embarrassed and embarrassed by the previous aggression of the Western countries.

But the great Shen Lang, do not need any thanks, so they feel that it is time to call back to the countries and people of Shenlang.

This is the respect for the hero of the earth!

Both of them are similar speeches, and this is the public voice of three times in a day. This is unprecedented, and the whole world is trying to figure out their intentions.

But in fact, I don't need to figure out how to figure it out. This statement is already very explicit. It is completely touted by Shen Lang!

Anyone with a discerning eye can see that they may be under pressure from the waves.

For ordinary people who don't understand the situation, these are all true words, and they bring everyone's memory back to the battle of the behemoths with reduced heat.

This is really a hero of the earth!

At that time, the whole world was in chaos. All major powers could only defend themselves. Small countries could only ask for more.

Because it is suspected to come from the Pacific Ocean, residents of all coastlines are at risk.

It's not a long time before, but the heat is gone, but a large number of cities on the West Coast are still in the process of disaster relief, and even the steps of reconstruction after the disaster have not yet arrived.

Therefore, their words have also caused great repercussions for these disaster-related groups!

Originally, after the media was overheated, everyone was no longer concerned about the post-disaster situation in which the entire city was destroyed by the behemoths. It was very dissatisfied. It was just that there was no heat at all, and the media always pursued new hot spots.

Now taking advantage of this wave of hotspots, taking advantage of the hero of Shen Lang, they are also rushing to heat up and upload a lot of the latest disaster relief situation.

All of this, the more miserable, the more people in other places have a lingering fear, the more grateful!

If there is not a timely guardian of the waves, then the whole world may become like this ruin.

In this way, a considerable number of people have evoked the worship of Shen Lang.

Although I don't know where the pyramids were obtained from the pyramid artifacts, people directly donated them to local museums. The cultural objects plundered by Western countries should not be returned?

Some people also took the opportunity to expand, not only in China, but also in other countries.

Of course, this kind of thing is still a fist in the end. The Chinese country is strong. Shen Lang's personal fist is harder, and he has this right to speak. The demands of some small countries are of course pretending to be dumb.

Feng Wuji is always concerned about lyricism. Originally, there was no sorrow in Shen Lang. After she considered it, she was not proactive.

Later, both teachings made a sound, saying that it was because of the waves and made an initiative, and she also took advantage of the trend.

The operation of the wind has not affected the world. It has not affected the rest of the world. It is mainly on the domestic network. It tells the domestic people who eat melons in the way of "disclosure" and "exposure". This wave can be so smooth, but it is not discovered by the Western conscience. It is not so friendly to the two religions, because Shen Lang is under pressure behind the scenes!

Most people are always more willing to believe in "exposure", such as many cases, police investigation results, they do not believe, but can not verify the network chat screenshots, users exposed, and so on, they are easy to believe, shouting reversal class.

Successful marketing numbers are all profound in this way, and a wonderful piece is compiled. No one looks at it. Switched to chat screenshots, fan anonymous submissions, everyone will be eager to see, deep in thought, and keen to forward.

There is a lot of experience in this area, and there is also a dedicated marketing team, so the hotspot is easy to bring.

The key is that other people have to say that this is his credit, it is purely rumored will be deleted, screened. It is a fact that the exposed waves are exposed. The relevant departments understand that the public also knows that he is a hero.

Then this is safe!

Anyway, as long as it is not officially said by the official media, it is a gossip. Even if it is passed to those countries, it will not be open to embarrassment, and it will not affect the follow-up process of the return of cultural relics.

The number of people in our country is huge. Even if we do not include other countries, it will affect a part of people. It is also a huge base.

In addition, a large part of the world is actually affected, but there is no part of national pride.

The result is an intensive belief that allows Shen Lang to harvest again after a while!

This result actually made him a little helpless.

The power of faith is a very good thing, it is a good thing that “God” remembers, but the problem is that he has reached the peak of the earth, and he is afraid that he will get more and more energy. If he has no idea, it will lead to the sky. Robbery!

But so far, everything is still good.

Because I didn't understand it before, once I have the strength and the preparation is sufficient, I hope that I will get away early.

Now it is intentionally avoided. Just like the various energies he has now, they are compressed and stored, and the liquid beliefs that are obtained are of no use. They are reserved first.

The state that is maintained now is the same as the one that he suppressed before breaking through the realm of the gods. I am afraid that I will not suppress it under the unconsciousness that day.

Chapter 2212 - Foreboding crisis

Shen Lang did not pay attention to all aspects of the situation, but also because he did not go to the Alliance headquarters, or else passive will know.

He returned directly to the Tianshan Jianzong.

The Huaxia Comprehension Alliance was originally set up in a hurry. The purpose is to deal with the two schools of the Light and the Gods. The three parties may cooperate and invade, and they must face the group.

With the arrival of Shen Lang, the problem has been solved. The core of the two religions and the three factions have been destroyed. Others have not been beaten, or they have been scared. For a long time, they are not looking down on the storm.

According to the normal process, the alliance can be disbanded.

However, it will be explained, but it is a bit intriguing!

At the national level, of course, I always want to control the realm of comprehension. Under the circumstances that cannot be controlled, the relevant departments, or the self-cultivators who have entered the relevant departments, represent official communication and maintain constraints on the cultivation of the real world.

To listen to a little bit, it is called well water that does not make river water. In essence, you don't make trouble, don't make big, and don't be dissatisfied with the official at any time, then the official allows low-key existence.

In this way, the realm of comprehension is under the table, that is, there are many company industries in the world, and it is also operating behind the scenes. There are still spokesmen on the table.

However, the last time the disclosure of Shen Lang was to open the veil of the default rules of all countries in the world.

Although Shen Lang does not have any things that are sorry for the country, it should be glad that this is the comprehension of our country, and all of them are foreigners.

But the power to a certain degree is both jealous and suspicion!

This time, the conspiracy alliance is obviously led by the official, and there are also official management organizations. They are gathered together by foreign enemies. Director Liu Shengwei Liu is the person who leads the line and ultimately wants to be the person in charge.

Because of the timely return of Shen Lang, Liu Shengwei was directly abolished and disrupted the plan, but it also allowed higher-level, more emotional intelligence and intelligent people to intervene in management.

To put it simply, Shen Lang is already powerful enough to manage and not manage. The people like this will be treated friendly.

But in other comprehension circles, the government hopes to have more effective “contact” management than before. Of course, it won’t be dissolved. I don’t know when I have this opportunity next time.

Of course, even if it is really dissolved, it will not be a slap in the face, and it will take a little time to transition. However, some people began to withdraw and went back.

Shen Lang returned to the Tianshan Jianzong, thinking of bringing the cold autumn back, and then throwing it in the Tianshan Jianzong and Gao Licheng.

Although this is the homeland of Gao Hanqiu, he has been away for hundreds of years. This time, he is also a guest brought back by Shen Lang. It is not good to ignore it for many days.

In order to better understand the golden chariot, Shen Lang did not use the super high speed of the Serie A to return, nor did it use the door of the Three Realms to transmit to the Tianshan Mountains. It was all the way back using the golden chariot.

This time, the distance of flying is farther. Without the Kremsou water monster, Shen Lang can also experience more unscrupulous experience and unlock more conditions. This flying magic weapon greatly exceeds his expectations.

This also makes Shen Lang have higher expectations for other golden magic weapons.

When he returned to the Tianshan Jianzong, he learned that Gao Hanqiu was not there. He was accompanied by Gao Li and never returned.

I don’t know how much they know, I don’t know what it is.

Before the sacred priests went to the alliance. When Shen Lang went, it was just not in the league. He also respected the slouch as the master. He immediately rushed back to the Tianshan Mountains and waited until now to see Shen Lang.

For the high and low cold autumn, it is certainly not easy.

However, Shen Lang has a general understanding. Gao Hanqiu returned to his native province, on the one hand, the Tianshan Jianzong, and on the other hand, Gaojia.

After a few hundred years, in fact, anything may not be there. It was because he saw Shen Lang that he knew that the teacher's door was just down, but he was still alive, and he also knew that the direct descendants were high.

When I came back, I first sacrificed my ancestors in Jianzong.

The high age is also a lot, and Shen Lang only knows that he is a descendant of Gao Hanqiu, and has not asked the specific situation of Gaojia.

So where did they go back to the bottom, Shen Lang did not know.

But he is not worried at all, that is, the high separation also has the power of the gods, let alone the high gods and the realm of the gods, no one on the whole earth can hurt him.

Shen Lang also has the identity of the elders of the Tianshan Jianzong, and also hangs the identity of the master who is away from the sacred sacred. He is still somewhat responsible for the Tianshan Jianzong.

He predicted that he would stay in the Tianshan Mountains in the future, and even the time of the Earth may be less and less. He is still taking advantage of this opportunity to give them more guidance and care.

Of course, this guidance is limited to the elders, and other disciples, he can't take care of that much. The elders have the most harvests of sacred sacredness. As for the high separation, the cold autumn will definitely give him a lot of benefits.

Later, Tianshan Jianzong, still rely on their two elders to support.

In addition to pointing to them and helping them improve their strength, Shen Lang did not leave too much for Tianshan Jianzong.

There are some resources, not at that level, they are not used, but they are guilty of their crimes.

After completing this process, Shen Lang felt that there was something wrong with it!

He also said that he was not sure what the situation was, but he attached great importance to it.

With his current realm for many things predictive, the accuracy rate is already quite high. In the past, some were unconsciously guided back to make decisions, but now, one can predict more concretely.

Like the current unrest, there is often a crisis, but because the crisis is not accurate enough, I don't know the specifics.

Under normal conditions, Shen Lang will calm down and see if he can predict in advance what is the specific situation.

But now it's not needed, because he doesn't need to rely solely on his own "Yin and Yang Bozhengzheng" to bring the predictive ability, and the angel of the wheel of heaven!

When he used the forecast of the Heavenly Wheel, he had a clearer direction than the vague mood.

High cold autumn!

The feeling that made him feel restless is actually because of the cold autumn, it is dangerous in the cold autumn!

High cold autumn on the earth, there will be no damage to his earth, then this danger can only be a possibility – heaven!

Shen Lang quickly continued to immerse in the predictions that continued, and then got further information. Time has already begun, and the distance is not too far, it is already near the Tianshan Jianzong!

Shen Lang even had no time to say hello, and immediately left the Tianshan Jianzong.

It is also because of the absolute reassurance of the strength of the cold autumn, plus also informed the information of careful day robbery, so let him wait until now there is a problem, only to feel. Otherwise, you should feel it earlier!

Chapter 2213 - The devil is coming again?

Although the prediction of the wheel of the celestial plane can be very accurate, it is a pre-aware picture. It is a place that has not been visited, not a memory. Therefore, Shen Lang cannot use the door of the Three Realms to directly transmit the past.

What he can do is to come out quickly, and then judge the general direction and rush to the fastest speed.

To be honest, the reason why Shen Lang is cautious is because there is a certain psychological shadow on the robbery!

In the previous life, he was busy with the catastrophe, and eventually died in Pingxi Licao County.

This world has been cultivated for a very short time in a few years, but it is still full of awe.

Even if he can control the Thunder now, he always carries a source of lightning, but the power of the space law still makes him afraid to take a nap.

The situation of Gao Hanqiu is different from him.

Gao Hanqiu had not experienced the catastrophe in the same year. It was the door of the space that passed through the sea without jail, and finally arrived at the mainland of Nakajima, and then cultivated into the realm of the Great God, including the super strength of the now great peak.

This may make him lack of understanding of the robbery. Even if Shen Lang emphasizes it, his feelings will still be different.

This will not be as careful as Shen Lang himself, but it is a few embarrassing with them before, but also to the space of heaven.

Another problem is that Gao Hanqiu should have reached the peak of the Great God, the first person who is not as good as all the great ancestors of the Yaochi event.

That is to say, his realm is higher and his strength is stronger. He can be dragged with caution when he is careful. He must constantly push down a lot, and accidentally touch the rules of space.

But it doesn't make sense to say anything. The most important thing now is to hurry up and help!

Shen Lang does not need to think about countermeasures now, because this is the most important big problem, so he has already thought about it.

In the past, it was an active wait and a greet of the robbery. It is much easier to avoid the robbery. For example, if he hides in the space of the heavenly book, it will disappear and the robbery will disappear.

Or use the door of the Three Realms to go directly to the higher space of the mainland of China, and there will be no problem of robbing, and it will disappear here.

Of course, with the strength of the cold autumn, if you resist hard, you can certainly resist the past.

The problem is that this kind of thing, even if the current Shen Lang is ignorant, can only be understood as a space law. It is only by personal experience that the upper limit of the personal ability of the Earth space is probably about the realm of the Great God.

But what exactly is the situation, this is a common phenomenon, or a case of his previous life, and no one else can discuss it. For example, the elders of Tula can be regarded as the realm of the great gods, and they are still hidden in the earth.

Therefore, before you understand the specific laws, try to be as careful as possible. What if the situation is stronger? That cold autumn is not dangerous?

Even if it is not, it will be a hard battle, and it will be a state of heavy damage to the cold autumn. The best situation to open the crack in the space is to send him back to the mainland of Nakajima.

What if you are leading to another world?

Then no matter what the result, it is impossible to make the cold autumn adventure a hard wave.

Although this is in the Tianshan range, the thousands of miles of the Tianshan Mountains are far from being able to be observed.

However, it can be predicted by the wheel of the telescope to presumably the seat. According to the truth, it will not be thousands of miles away.

After waiting for it, Shen Lang immediately followed the general direction and flew past the super high speed of the Serie A.

In less than half a minute, it has already sensed the shock of the rolling thunder!

This gave him a more accurate position. After less than half a minute, the Holy Grail had already taken the waves to the place where the line was hundreds of miles away.

Shen Lang also confirmed a problem. The wheel of the telescope was predicted in advance, or even if he could not sense hundreds of miles, the sound of the thunder could still pass the sound.

At such a critical moment, I will think about this problem. It is because after Shen Lang arrived, it did not fall directly into the past. Instead, in the process of slowing down and landing in the armor, I concentrated on using the wheel of the universe to predict again.

The previous predictions, like his own predictions, are the sensitivity of a big event. Then through the wheel of the sky, it is a targeted forecast.

Now that it is here, it is equivalent to narrowing down the distance and scope of further targeted predictions.

Just like the specific hiding place and number of people who found the elk ancestors along the grassy side, it was because they were near the scene.

It's the same now, and I'm predicting it again. The wheel of the heavenly machine is not expected, and I immediately perceive more information.

But this situation makes Shen Lang a bit unexpected!

In the area where the thunder is rolling, in addition to the high cold autumn, there is still a huge figure.

This figure is very familiar. The trolls that have appeared on the earth and the extraterrestrial demon that have appeared on the riverside city are similar.

What is the status of this?

At this moment, it has already arrived, and it has slowed down. The detection of the holy armor and the induction of the gods have also enabled Shen Lang to have a better understanding of the scene.

Within the area of the robbery that he witnessed, there was only one in the cold and autumn, and it was against the rolling thunder, and there was no extraterrestrial demon.

Is it that he has survived the catastrophe, opened the crack in the space, the world that docked, is there a territorial alien?

And the extraterrestrial demon over there also found this situation, taking advantage of the opportunity, directly along the space crack will come over?

For the harm of the extraterrestrial demon itself, Shen Lang did not care too much. After all, his strength is far less than the present, but also the successful trolls have disappeared.

It came in from the crack in the space of Li Cao. It was also the sequela of his catastrophe hundreds of years ago. It was also weaker. It was such a black spirit coming over and swallowing up here.

Those encountered in the watershed city state are considered to be a certain degree of extraterrestrial demon.

According to their historical history, the extraterrestrial demon is an extremely ferocious race in the universe, which will swallow a planet and the life of a world, and do everything to evolve and ascend.

And they will continue to explore the new world. When they are almost the same, they will go to another world, so they will continue to multiply in the universe.

The world on the other side of the river basin is a policy that must be extinct for the demon outside this domain, and it will give them any chance.

At that time, Shen Lang, in addition to himself, also had Bihaihuan and countless black technology light armor fighting together, and there were various super-civilized weapons to block them.

Now, if the speculation of the space law on the earth is correct, then it is considered that there is an extraterrestrial demon coming over, and the strength cannot reach the realm of the gods, or else it should be subject to the same punishment.

Like the behemoths that came over last time, most of them are beast-level, super-beasts like the gods and behemoths, and if they stay more, they should also encounter catastrophe.

Now, what is the situation?

Chapter 2214 - Play with the sky

Shen Lang's mind was spinning fast, and all the thoughts did not affect the time. He did not land on the ground.

Gao Li is also here, he should have been ordered by Gao Hanqiu, and there are still a few miles away from the minefield to avoid being mistaken by the thunder.

When he saw Shen Lang coming over, he was very excited and immediately wanted to yell and rush.

But he lived a lot of age, and the wisdom and experience of this was still there, and he immediately curbed his own instinctive reaction.

In this case, he can't help, even if he provides a little information, there is no value.

But the Shen Lang is different. Shen Lang should be able to help, and his past words, not to mention whether it will be dragged down, just telling something, will delay the time of the waves.

Therefore, the best plan, he continued to stay in the distance and watch.

Shen Lang is also ignorant of the high separation, he is the observation environment to slow down and land, and then directly into the area of the robbery!

A large area of the robbery is a rolling thunder.

The altitude here is much lower than that of the Tianshan Jianzong. It is not covered by snow and ice, so it is unclear whether there is an avalanche in the distance, at least it is not affected.

However, a large area around Gaochunqiu was blocked by Tianlei.

How familiar is this scene!

Shen Lang seems to be the experience of yesterday. In the middle of hundreds of years, he is skipped. In terms of feeling, it is only a few years ago.

It is his rational decision to devote himself to it.

But at the moment I entered, there was still a little tension and pressure!

This is an emotion, a shadow of failure!

Shen Lang is in a chaotic space, encountering a minefield, and is also quenching it several times, absorbing and mastering a lot of lightning energy.

Later, in the world of Xiaoxian Island in the watershed city state, he contacted and “turned away” a “thing” that he named Leiyuan and Raytheon.

At that time, the feeling was different. He could face lightning in a better state of mind and regarded them as a kind of power, a crisis, and an exercise.

Now it is different. Before he came over, he knew it. It was amazement!

The idea of light has brought him back to the pressure of the shadow of failure in previous lives.

Although he has now reached the realm of great deities, there are also various means to exert extraordinary power. But many of them are coming from various opportunities, and they are not as pure as before.

In other words, he has only surpassed his previous life in terms of knowledge and experience. After all, he has accumulated more. However, in terms of absolute strength, it has not surpassed the peak state of the past.

Naturally, he is not sure that he can fight against the robbery, and there will still be shadows and pressure.

But for Shen Lang, it was just a moment of emotion, which did not affect his decision, and even the speed of plunging into it did not affect.

After he entered, as long as he continued to suppress, he would not inspire double annihilation, but he could help the cold and fall together.

At least he can also communicate with the cold and autumn, and tell the experience he knows about Gao Hanqiu, so that Gao Hanqiu has a better response.

In addition, there is an uncertain variable!

This variable, after entering the Tianlei area, Shen Lang was confirmed.

When he was bombarded by lightning in the minefield, he thought of the robbery of the thunder and the experience of the robbery. He gave him a lot of inspiration and help, but instead used it.

Now once again enter the area of the robbery, it can be directly compared and felt, this is really the same!

I don't know how this space law works, but it is a kind of minefield, and it is a minefield with chaotic space and Xiaoyuan Island.

This is not the thunder of the earth's natural world, but a special kind of lightning energy!

In the past, analysis was a category, and now it is also confirmed to be a class, and Shen Lang is relieved.

Because he now has a lot of lightning energy in the body itself!

That kind of lightning, there will be no harm to him, it can be peacefully dealt with, even processed, and they can be absorbed.

Further, if he is in charge of Leiyuan, he can still help.

Just when I sensed the thunder, I can feel the thunder of the palm of my hand, but the movement is not big. After arriving near, there is no movement, let alone a request to Shen Lang.

This makes Shen Lang analyze, I feel that after seeing the same kind of chaotic space, the lightning for this day is not very obvious!

Shen Lang himself does not dare to be so proud, still maintains absolute vigilance.

Sure enough!

When he entered the minefield, a lot of thunder that fell out of thin air seemed to have avoided him deliberately!

Although it is still a large-scale robbery blockade, the inner ring is targeted by the bombardment of the cold autumn, but for the Shenlang, it is natural to slide to the vicinity.

“Small, how is your situation? I will send you back!”

No language is needed, and the prophecy is too late. Shen Lang is directly giving a thought to Gao Hanqiu.

Gao Hanqiu is also the idea to respond to him.

“Lang brother, you can rest assured! This is a thunder, I can still afford it. I can’t think of it for a few hundred years. After all, I can’t escape the catastrophe.”

Shen Lang is a bit speechless, because the old guy is not worried, but rather excited, seems to be infinitely happy with the sky.

In the normal situation, since the cold autumn is still in a state of play, it is not necessary for him to rush to send people away should not be seriously injured.

As for the temporary space cracks that appear after the completion of the smashing, the cold autumn can also choose not to go!

In the past, everyone would be eager for it, because it was because after the catastrophe, the broken door of the void was the door to the heavens. This is the place to go to the fairyland and the gods. This is the greatest pursuit of life, naturally without hesitation. Plunge into it.

Now that I have experience, Shen Lang has seen more of the world. I know that it is such a situation that I can’t be fascinated.

But!

Just the prediction of the wheel of the telescope, this is the emergence of extraterrestrial demon!

Shen Lang is a bit tangled.

Do you want to let the cold autumn play?

With such a powerful and powerful strength, if the robbery can easily hold it, then it will not suffer multiple injuries. As for the extraterrestrial demon, how about one?

Gao Hanqiu can easily kill, he can easily kill!

Come kill one, come and kill two!

Yeah, since there are no uncontrollable scenes, what are you worried about?

So slightly tangled, Shen Lang changed his mind, then the two brothers will accompany the day to play!

Gao Hanqiu has not robbed, so I want to experience the feeling of robbing in the first half of my life.

Shen Lang is a good experience, and by the way, the psychological shadow of the failure of the robbery is eliminated.

Chapter 2215 - People are more popular than people

Although I put down my worries and did not ask for the cold autumn to be sent away, I decided to play with the sky robbery, but Shen Lang still kept a cautious!

Because there will be restlessness before, the wheel of the sky is also predicted to be dangerous. Therefore, even if the cold autumn is very easy now, what will happen if it is not good.

When Shen Lang is too late to talk too much, he is ready to cooperate on the side.

“Lang brother, you have a rest, I feel the taste of this day, what is the danger, I call you again!”

Gao Hanqiu certainly understands that Shen Lang hastily rushed in, and it is sure to discover the movement of the robbery, worried that he can not afford it.

This is a very normal reaction. Shen Lang thinks he is in danger and will come over to help. He finds that Shen Lang is in danger and will help him in the past.

At the beginning of the week, the super giant robot of the killing warrior, like Shen Lang and a group of big immortals chasing the chicken, Gao Hanqiu rushed past at the fastest speed, and the sword smashed the “fire giant” of two kilometers.

He didn’t feel that he couldn’t hold it, but he was grateful for the good intentions of Shen Lang, so he added the following sentence.

“Well, you play slowly. I also play. I failed last time, still a little psychological shadow.”

After Shen Lang sent this idea to him, he immediately moved away from the central area and reached the edge of the minefield.

Since this is a catastrophe caused by others, and he wants to play, he can't take the lead. The surrounding area was originally blocked, and he would not affect the cold autumn.

Just after the words of Shen Lang, it was a surprise to Gao Hanqiu. I didn't expect Shen Lang to be able to admit that there was a psychological shadow of the failure of the robbery!

Of course, this does not affect the brilliance of Shen Lang in his heart.

Because of the failure of the smashing of the waves, he was known to him hundreds of years ago, and he has been deeply saddened. If you can see the reincarnation of the reincarnation, you have already proved that the Shen Lang is strong, even if the robbery fails, you can lay a rebirth.

Now that Shen Lang can rehabilitate this realm, it is also very bad.

He just didn't think that when it was perfect, it would have a psychological shadow.

At the moment when I arrived at the edge of the minefield, there was no defensive confrontation, but when the thunder came down, it was natural to avoid him...

Gao Hanqiu's thoughts were all on the robbery. Shen Lang came and could enter the area of the robbery. He is also grateful. There is no surprise that Shen Lang can do this.

It is only now that he noticed that he is going to resist the thunder, but it seems that Tianlei actively avoids the waves.

Just near him, the center of the area was densely populated. When it fell, it was turned to the side of Shen Lang. Even if he is aware of it, he thinks that he is inspired by the thunder, so it is the “protagonist” and will be positioned to hit.

But now to the edge, the thunder is still the same as the eyes to avoid the deep waves, this is not to turn to him!

Lang brother is a wave brother!

He couldn't help but sigh and didn't think about how it was actually created. Anyway, as an "old fan", even if he is now higher than Shen Lang's realm, he feels that everything that happened on Shen Lang is incredible. of.

Shen Lang does not know whether it is to be happy or to be depressed...

These thunders avoid him, presumably because he has the same type of thunder and lightning, making them feel "self".

Isn't it that he will encounter the catastrophe again, is it also dry? It is not dangerous in itself.

However, he wants to experience it now, and wants to absorb a little lightning power.

When he first caught the snake ***** Kemrisu, he used lightning. This energy is still very effective.

As a result, Shen Lang's body moved quickly, and he just circumvented his thunder and was greeted by him.

However, the speed of lightning is also extremely fast, and it is not attacking him. Even if he predicts it, he will take the first step in the direction he avoids, and it naturally slides in the other direction.

Shen Lang flashed his body quickly, but it was the sloshing of the lightning that was originally blocked.

Gao Hanqiu looked at all this and couldn't help but admire again.

People are more popular than people!

He is hard to rely on strength, Lang brother is lightning and hiding from him, turned into a wave brother chasing the thunder and ran!

At this time, there was a little space fluctuation in the minefield!

During the cold autumn and the deep waves between the time, it was clear that the void seemed to be broken, and there was a crack in the portal hole!

Gao Hanqiu could not help but feel the spirit.

The lifelong ideal pursued in the early years is to survive the catastrophe, and the broken blank space will soar.

The reason why there is a picture of the “broken void” and “white flying up” is that when the predecessors were robbing, there were disciples, friends, etc., and they watched it from a distance.

Therefore, there is basically a general impression that it seems to fly directly and disappear, or the air is broken, and it disappears directly into it.

Everyone has evolved the results, and they feel that it is the road to heaven, the door to the immortal, and the final destination for everyone to cultivate.

He has lived and cultivated in the mainland of China for hundreds of years. He has been stuck for a long time in this realm. He wants to go further and he does not know whether there is any chance or what he is pursuing.

Therefore, he is also keen on the ruins, the Yungong Holy Land and other secrets, hoping to find a way.

Now, re-experience the robbery that I have not encountered before, and see the crack in the void, can you not be excited?

Although Shen Lang has already told all kinds of conjectures before , but also did not personally experience it, still still curious!

Besides, that is just a speculation of Shen Lang. After all, Shen Lang himself has not experienced it.

Looking at the door of space at the moment, he still has great desire in the past!

Before his body naturally came to the crack in the space, the gods also explored the past and wanted to see what the world was on the other side. If it is really mainland China, then he will go back directly.

But God is naturally unable to explore other worlds through space. If you want to know what is there, you still have to go.

When people see a mountain, they always want to know what is on the mountain side. In fact, there may not be anything on the other side, and the scenery is not even as good as this.

But before you even said it, even if someone else said it, you still want to look at it in the past.

The age and realm of Gao Hanqiu can see through everything, but there will still be higher pursuits. In an environment that is difficult to change, it is inevitable to hope for an environment that has not been experienced.

The dog **** was able to be fooled by the waves, and there was a similar mentality.

Shen Lang did not pass, and he was also amazed at the edge of the minefield.

People are more popular than people!

How did people complete the robbery so easily? How miserable he was!

Shouldn't it be stronger and stronger? Why is this battle even worse than he was in the past?

Is it that the robbery is also bullying?

Chapter 2216 - The devil

At the time of the cold autumn and the Shen Lang, the space cracks showed some slight fluctuations.

Then the cold autumn quickly pushed a little, he felt that something seemed to come over!

Shen Lang also rushed over and he knew what it was.

There is nothing wrong with the wheel of the heavenly machine, it really is the extraterrestrial demon!

The size of the demon from the space outside the head is similar to that of an ordinary person, but after it appears, it has become huge when it is down to earth.

If you haven't stepped back in the cold autumn, it's going straight to the top.

Now the demon outside this domain is equal to the emergence of a giant out of thin air, blocking the crack in the space behind.

This picture is the picture that Shen Lang used to predict using the wheel of the sky.

Thunder is still going on, but it seems to be decreasing.

Both Shen Lang and Gao Hanqiu were the first to see the situation after the robbery. It is not clear how long the space crack will last.

According to the legend that "one person gets the chicken to ascend to heaven", the space crack should not be small, and the time of maintenance will be there for a while, so that the Jade Emperor will carry his companion and the beast.

But maybe it's just that he is strong, or he is well prepared, and more is just leaving alone.

Except that the average person does not have the blessing of the great god, and can not withstand the space impact, the estimated time will not last too long.

The thunder is diminishing, and when the thunderbolt is completely gone, it is estimated that the space crack will heal. As for whether it will become even weaker, but also manpower to open up, it is another situation.

After Shen Lang came over, it was in another direction. The cold autumn is on the front and he is on the side.

This cold weather is very easy, probably because his strength is too strong, so the sky robbery will directly release the water, let him quickly leave!

But now, the Thunder has not disappeared yet, and he is still hitting him. He needs to defend against the thunder, and he is also observing the extraterrestrial demon.

At this moment, his fascination has faded, and he does not need to witness himself. The opposite “person” has come over, indicating that it is definitely not the world he is familiar with, but may be a demon world!

It's just... Although it's not so fascinating, it still has expectations, and there may be many uncommon gains in the devil world!

Shen Lang is looking at another situation!

This extraterrestrial demon is to narrow the body and pass through the door of space. Then I should have discovered the cold autumn, so I immediately became bigger and moved forward in the middle of the cold autumn and the door of space.

Its purpose is to fight for time!

Now that the sun is coming, I saw a lot of extraterrestrial demon, and I was holding hands and wearing them from the space crack!

This situation illustrates a lot of situations.

The first one is the catastrophe here. It seems that there is movement in the other side, otherwise it may not be so clever. This is obviously ready, and I want to invade the team.

The second is that they are tactical. The former one is likely to be prepared for sacrifice. The purpose is to delay time.

And their second wave is combined to traverse, so that the space impact can be shared together, and the damage after coming can be reduced more than the individual.

The former one becomes bigger and stops, that is, to block the line of sight, but also to prevent the cold autumn will block them.

It is a pity that in addition to the high cold autumn, there is now another Shen Lang!

Come kill one, come and kill two pairs...

Although Shen Lang has had such a decision, but now come over one, and now come over five groups!

In order to avoid night long dreams, he did not wait and see, and he shot directly!

Because the lightning is decreasing, it is still attacking the cold autumn, and the other is the extraterrestrial demon, because the body is large, blocking a lot of thunder.

It is also using the body to squat, but in this way, the thunder did not attack the crack in the back space.

The five that came out of this group did not encounter direct blocking.

However, Shen Lang will not let them “live”, and they are ready to “press” them back. If they don’t go back, they will kill them!

When I said that it was too late, when he just came over, he had analyzed everything and had already taken the shot directly.

In one hand, the thunder and lightning attacked the past, and the other hand smashed out with the sword of the king!

Needless to say, the speed of lightning can be attacked one step earlier than Shen Lang. The sword of the king is in the fast, but can also extend forward, but also can kill the target faster.

But the extraterrestrial demon who came first, but it is really the role of the death squad!

It is facing the cold autumn, but the Shen Lang comes over, it is also a good defense. Although the speed of Shen Lang is incomparable, it is too late to defend and attack.

But it has the advantage of size!

Originally it appeared to be blocked by the body, protecting the demon behind it.

So at this moment, I moved a little, and I used half of my body to block the attack of Shen Lang.

Shen Lang is because he just came over after the prediction of the extraterrestrial demon through the wheel of the telescope. He did not further predict that there is a second wave of extraterrestrial demon.

So now he is equal to the time-attacking attack, only to wait until the second wave appears.

This is not because he is not fast enough, but he is not prejudging.

But the power of his attack is still reflected!

This huge extraterrestrial demon has a great physical advantage. I don't know how many thunders are blocked. have not fallen.

The thunder and lightning of Shen Lang, half of the attack, may have a miraculous effect, but after being blocked by it, it is equivalent to a few more lightning.

But the sword of the king is invincible!

Even if it stunned the thunder, but the super sharp edge of the sword of the king is the body that blocks it, completely cut, and touched to the back to cut!

It is a pity that it has been blocked by this, and the last five traversed have already entered the world.

Gao Hanqiu has already reacted. He waved his hand, and when it was a sword, he cut off the brain of a large body of Tianlang.

In the process of the collapse of the Tianmo body outside this domain, the five extraterrestrial demons that just came over, the body quickly expanded and became bigger.

The first one came alone and withstood a greater impact. After the five of them came together and shared the impact, they were much weaker, so the reaction was faster.

And in this moment, another thing that made people stunned!

These five bodies are in the rapidly growing domain of the demon, the first thing is not to attack the cold autumn or the sinking waves, actually opened the mouth that has become bigger and bigger.

And the collapsed extraterrestrial demon, the body and the head, all flew to their mouths, and they were swallowed up by the process of expansion!

This is the nature of their race.

Even if it is the same kind, once it is dead, there is no value, it will be swallowed up and become a supplement for everyone!

Chapter 2217 - Violent day robbery

Both Shen Lang and Gao Hanqiu are well-informed, and all kinds of strange creatures are not rare, but at this moment, they are still surprised.

If it is an animal such as a shark, it will be driven by primitiveness and bloodthirsty. It is not surprising. But the demon outside the field is obviously a race with high intelligence.

In particular, they can migrate in different worlds, and no high wisdom can't do it.

Just like in the world of giant beasts, because of the wisdom of human education, the Emperor's behemoth can dominate the world and command all the beast races.

It also develops a certain civilizational scale in the world of giant beasts. Everyone has a territory and will not kill them without cause.

These can wander in the universe, can grow up in different worlds, and finally the extraterrestrial demon races that are coated with charcoal, will inevitably have higher intelligence and more unity.

Just like the one that came out first, the demon outside the domain, dedicating himself to the firepower of the people, and gaining time for the partners, it is very team-conscious and sacrificed.

As a result, it was decapitated by the cold autumn, and its partners directly ate it!

However, the two of them are also really big, and they are surprised because they didn't expect it, and they even thought of more information.

These extraterrestrial demons, perhaps ethnically, are the first vocations, and everything is for this purpose. When a world can still proliferate, they will not be eager to invade everywhere. Only when they have to go, will they be anxious.

This time I don't know because there is a situation in another world, let them find it here, but there is a space crack so quickly, maybe there is also a hard work...

This may be a bit of a play, but it may be similar in nature. They rushed over and sacrificed one to cover the five teams, which proved their urgency.

And this is responsible for the development, in addition to the first one, perhaps the second batch of five, are prepared for sacrifice!

So after the first beheaded, they are fed directly, regardless of whether they have a chance to save, and try to grow them as much as possible before the energy is dissipated.

This will enable them to better execute their plans!

In the back world of the crack in space, there may be a large number of extraterrestrial demons waiting to come to this new world!

No matter what the eyes see, or the analysis and thinking in the mind, they actually have no influence on Shen Lang and Gao Hanqiu. With their strong mental power, there is no problem in both one-minded and three-use.

At this time, there is no need for Shen Lang to tell, and Gao Hanqiu knows that these strange creatures cannot be mixed into the human world. Even my companions have eaten so sweetly, come to the earth world, billions of people, have not all become their food?

The cold autumn is not the top of the great gods, while continuing to smash the bombardment of the thunder, quickly killing the first demon, and then picking up the three devils!

The remaining two, not that he is prepared to leave the Shenlang, but because the body of the demon out of the body quickly became larger, and now it is swallowing and growing rapidly.

When Gao Hanqiu had originally shot, he wanted five of them to be rounded up, but after the shot, the three blocked it, and the other two had already reached the front of Shen Lang.

At this time, the five extraterrestrial demons have already completed the “transformation”, and they have become trolls that are tens of meters tall. And they are not heavy and clumsy at all, the speed is fast, the attack is fierce, and all five burst into a violent atmosphere!

If the first one comes out, it is a one-hundred state, then five of them, at least have a two-percent state!

On the one hand, when the first one came out, it was subjected to space impact alone and was in a state of injury. The next five together joined together, and under the split, they were weak and not enough to hurt them.

On the other hand, eating the first extraterrestrial demon seems to have also added them.

The rest may be stronger than the first one, the real backbone after the cannon fodder death squad.

The decisive battle just happened in the moment when they took their heads. They also saw the situation here. Shen Langjian cut the body of the first troll, and Gao Hanqiu directly cut off its head.

.

Therefore, they also judged that the cold autumn is a more threatening enemy, three to deal with the cold autumn, and the two to deal with the Shen Lang, it is also their natural tactics.

Just at the beginning of the three-way seven-game melee, the thunder that had been gradually reduced suddenly swelled up!

This is not a return to the previous state, but a bit of a feeling of a few times!

This situation surprised Shen Lang and Gao Hanqiu, and they immediately judged what it was.

The first out of the extraterrestrial demon, also suffered a lot of thunder, but it is because it is large, in this minefield, naturally thunder.

And now these five, because of the combination of various factors, let their strength – at least the power of the outbreak of the fighting state should have reached the realm of the gods!

Shen Lang is intentional suppression, and there is reservation in the cold autumn. They have no such consciousness at all.

For the space law of the Earth World, it is suddenly monitored that there are five individuals above the upper limit!

It was a cold autumn, and it attracted a day of robbery. Now that five people appear together, it is equal to five common robberies.

The so-called heaven and the law of space is only a conjecture given by Shen Lang, in fact, in the end what power is in the dark, it is impossible to know.

However, since the whole world can be invisibly monitored, it has been verified from the high cold autumn that there is really no major omission, which means that the “system” is very strict.

It is detected that there are five individuals who exceed the upper energy limit at the same time, and naturally they will realize whether it will be a cheating or a collective advent of higher space creatures.

Ever since, there will be times more than the super strong Thunder now!

And they can also feel it. Now it is not only a few times stronger in the area of the robbery, but also the area is getting bigger. All the power-ups that are upgraded are also centered here and there is no difference.

The catastrophe caused by the cold autumn has not been completely eliminated, and of course it has been upgraded together.

The Shen Lang, which was well controlled by the scene, was bypassed by Tian Lei before. Now there is no more, faster and stronger Tianlei, even he is also awkward.

However, there was a subtle change that was unexpectedly unexpected!

Although the violent catastrophe is an indiscriminate bombardment, it is carried out in the manner of a thunder. Five of them are trolls of several tens of meters high, high and large, natural lightning, and the original target. object.

The result is the strongest thunder in the central area, most of which greet them five, compared to the much colder autumn and the narrow waves in the head, it is only partially overlooked.

Chapter 2218 - First play gold flying sword

The races of the demon outside the world are fierce, and as long as they are given the opportunity, they will swallow their targets.

But they are not chaotic, there will be wisdom and tactical arrangements.

Just like the group of demons outside the Great Rift Valley on the other side of the river basin, they will not blindly kill them for the blockade of artillery.

Just as they swallowed their partners, they have already made arrangements, so it is necessary to attack and kill both of them.

As a result, the claws and claws attacked, and Tian Lei gave them a head-on blow!

The area of the robbery is covered by the thunder, and the edge is the function of the blockade. The core of the target is the top priority.

Before the high cold autumn, I was also forced to know how many thunders were bombarded at the same time. The bodies of these extraterrestrial demons are dozens of times larger, and the area they bear is mostly, and the targets are more conspicuous.

The result is that every one of them may encounter hundreds of thunders at the same time!

Therefore, even if they have a sturdy physical advantage, under such a dense thunder, it is also a state of external coke tenderness and general paralysis.

This also makes them have to give up the attack first, and instead turn to the defense of the thunder.

Originally in the attacking state of the waves and the cold autumn, I found that several times the catastrophe was shocked, fearing to cause bigger problems, so adjust the tactics, prepare for quick fix, and destroy them as soon as possible. To quell this storm.

At this moment, Tianlei has helped them, and it is also a bit of an accident, and of course it is more convenient.

The devils are also very clear about the opportunity to seize the moment, and the moment has been lost. If you don't deal with countless lightnings right away, they will be killed in the next moment!

Because the cold and cold autumn can survive the thunder, the Shen Lang is even more than the thunder, and when they broke out, the thunder quickly soared.

Therefore, they also gave them an illusion that these thunders were attacks by Shen Lang or Gao Hanqiu!

However, they are still very wise. After they have to save themselves, they immediately changed a scheme. One of the devils, the body became taller and bigger, and then spread out to the body. Block all the thunder!

This is of course a very stupid plan. It has a large scope. It has to withstand more than five incidents.

The result is only one – dead!

And this time will certainly not last long.

This once again confirms that their second wave is still attributed to the death squad, for the sake of more partners to remove obstacles.

So that one will consciously sacrifice himself and fulfill everyone.

The other four demons, when the thunder was blocked, immediately re-entered the state of attacking them both!

Just...

With the strength of the cold autumn and the deep waves, they will not be slower than them. Even if they reach the level of the realm of the gods after the outbreak, they will not be much stronger than the two of them.

Even if the five great ancestors attacked both of them, they would not be their opponents.

Of course, these extraterrestrial demons have great physical advantages, and they are very unscrupulous. The actual deterrence is stronger than the five great ancestors.

But just Tianlei is equal to helping a big busy, in the moment they have to deal with the thunder, let Shenlang and Gao Hanqiu more calm layout!

At this moment, they attacked again, although the arms were long and the speed was fast, but they were faster, and they were killed first!

Before the cold autumn, I killed the demon outside the field, and even did not have a sword, just by the sword, it was killed.

It is still the case now. When he comes to this realm, it is really the existence of the sword god. There is a sword in his heart, which is no less than the sword in his hand.

A sword, you can directly penetrate the depths of the enemy's spirit; a sword, you can break the huge body!

Shen Lang can also do it, but the cold and autumn is easier because his realm is stronger and he is crushing each other.

These have now reached the realm of the great gods, and the Shenlang can't be crushed. The swordsmanship that is attacked is not as powerful as the cold autumn.

He knows this very well, so he didn't try it at all.

At this moment, a demon stunned countless thunders, and there were countless thunders around them. Even they attacked themselves. Shen Lang did not continue to use the lightning attack. He used swords in both hands!

One hand is the sword of the king who has not been collected. The length and length can change with his mind. The sharpness of this artifact is even more unimaginable. It is simply the feeling of being able to break everything.

The other hand is driving the flying sword – the gold dagger!

After the gold dagger was obtained, Shen Lang refining it into a flying sword, and also had a drill, but the specific enemy is the first time.

However, the current goal is too big and too obvious. There is no need to be afraid of hitting it. The gold dagger is just a golden light, and it disappears – directly into the body of a troll!

Then, with the control of Shen Lang, quickly turn around, then penetrate the body, enter another part, and enter the body of another troll!

The process of this manipulation does not affect the Shen Lang and simultaneously intercepts their attack on him with the sword of the king.

Although they are physically strong and attacking, the attack speed is very fast, but the long and big king's sword is stopped. As long as it is up, it must be a large piece or a big mouth. They also have to evade.

Of course, because they are much stronger than the previous one, even if the body is wounded by a large number of wounds, it is not cut off the neck, it is the cold autumn, just suppress them, and it takes a little more time to kill.

After responding for a while, Shen Lang began to put his mind on the golden dagger, and even closed the sword of the king.

Because he found this little thing, it is still very interesting.

First of all, this thing is not big, compared to the troll's body, it is like a small nail for human beings, it is simply impossible to prevent.

Second, it is also very sharp! Even if the troll is so strong, such as wearing a scaled body, it is easily cut in, and then can quickly and freely spin inside.

Another point is that I don't know if it is a material problem. The place that was cut by this gold dagger is a faster speed ulcer, as if it is toxic.

For Shen Lang, this is like a fresh toy, he is more willing to develop it.

As for the attack of the two trolls on him, he was able to move quickly and easily.

They are faster, he is faster!

The flying sword attack of the gold dagger is not only against the two enemies of Shen Lang, including the two trolls attacking the cold autumn, but also suffered the same attack.

After they were disturbed, they were suppressed by the cold autumn, and they were constantly cut by the sword!

Chapter 2219 - All absorbed

Everyone's realm is high and the speed is very fast. Therefore, even if there are countless swords and swords, the sword is cut continuously, and the sword of the king cuts a lot of wounds, but the time is not long, maybe it is just one. Between seconds.

But the demon outside the field above, has begun to hold up, and issued the last sorrow!

There is no doubt that it is carrying all the pain, and it is hard to block the thunder. The number of thunder that attacked it at the same time was too much, and the amount of thunder power exceeded its limit.

If it weren't for their body's evolution to super-powerfulness, it would have been grayed out.

But what it can fight for is just a little bit of time. The sorrow that is being sent at this moment is only the final warning to the partners, let them understand that they need to be embarrassed.

At this moment, with the Shenlang, Gao Hanqiu fighting the extraterrestrial demon, suddenly retreating, and then crazy to bite and swallow the body of the 100-meter troll!

With the previous look and feel, Shen Lang and Gao Hanqiu have nothing to be shocked.

They are such a number of ways, the troll can't hold it, they just eat it, let it exert the last body.

The process of engulfing is very fast. The trolls have no resistance, and they don't know if they have been killed by the thunder. However, they are integrated and swallowed and quickly replenished.

The four trolls that have been scarred both inside and outside, after swallowing a similar kind, are morale high!

The problem is that the process of their swallowing, Shen Lang and Gao Hanqiu are not idle!

When their morale is high, the cold autumn is like a two-kilometer high-killing warrior fire giant in front of a sword, with a fierce power, directly throwing a troll from the top of the head!

The trolls have to escape from the time, but all the power has gathered to the top of the head, to withstand this fatal blow, but still can not stand!

This sword has been steadily moving down one step before it has torn its body, destroying its body in a segment.

Shen Lang is already on the head of one of the trolls, and his feet are on his head.

On the one hand, he controls the golden dagger, chasing inside his head, chasing the black spirit embodied by their intelligent soul, and directly suppressing its body.

This troll is also being almost collapsed.

And Shen Lang has another preparation, Haotian Tower!

The artifact of the tower of the tower, after receiving the Pope and others not long ago, their attack and resistance in it also made it grow stronger.

The troll that was suppressed at the moment was too late to resist, and the body was directly taken into the tower of the tower.

Another troll was originally crazy to attack the Shen Lang, the arm has been with the power of destruction, attacked the place where the head is shaking, suddenly found this change, can not take the attack on the waves, and quickly pull the partner.

This time, it did not take the opportunity to quickly eat a partner, because if you eat again, time is too late, there is no help, or you must leave a few more partners.

However, the strength of the absorption of the tower is not that it can be pulled. If you insist on continuing to pull it, the result can only be imported into it!

This made it have to let go, and turned around Wei Zhao Zhao's general attack on the waves, with the strength of the lock to lock the waves, and then open the mouth directly swallow the waves to the mouth!

Its big mouth has swallowed the waves without chewing, and at the speed of their just eating partners, it is extremely fast, and then quickly absorbed.

But the mouth is still a little close, so I can't take it anymore...

Because Shen Lang quickly and sacrificed the sword of the king, when he went forward, he quickly became bigger and longer, and in the moment he wanted to withdraw, he had already penetrated its mouth!

There is another problem in this moment.

That is, after the troll with the body blocking the thunder was eaten, the other thunder continued to cover intensively, and the four trolls were the first to bear the brunt, and they had to bear hundreds of lightning hits at the same time!

Even if their bodies are able to withstand these lightning strikes for the time being, they will inevitably affect their performance.

Therefore, when Shen Lang puts its mouth in the mouth, and the golden flying sword has passed through its body, plus the thunder, under the triple attack, this ***** is nowhere to escape!

Ever since, after the Tiantian Tower ingested a demon, it took in the second one, and then took it in both the cold and the autumn city.

Shen Lang solved two problems so quickly, and the cold winter is not too much. The sword is united and directly penetrated into the last Tianmo body, and then countless swords are bursting around!

Just like a powerful bomb, it explodes in its body, which makes it impossible to defend against it, and the whole body has to be disintegrated!

Shen Lang completed the absorption of the body of the first three days of the demon, directly to the fourth burst of the devil's demon also received inside the tower.

When all the demons were taken over by the tower, the thunder suddenly shrank. Although there were still some squats, they had lost their goals, and it seems that they have not continued to be in the cold.

From that world, there were six extraterrestrial demons, and they swallowed two each other. The last four were all collected by Shen Lang into the tower of the tower to refine.

This crisis is temporarily lifted.

There are two of them here, and it is impossible for other demons to come in and not find out.

But Shen Lang is still a little worried.

Because there was a place in Licao County before, it was probably because of the weakness of the space barrier caused by his previous life, so that the devil came over there.

Now this time, the strength is too strong, what kind of situation will there be?

The door of the space has not disappeared, and Shen Lang quickly passed the consciousness and exchanged opinions with Gao Hanqiu.

“This space crack, I don’t know how long it will disappear. I don’t know if it can be opened there. I don’t know what’s going on there. If it happens again, the consequences will be unimaginable!”

“Well, we can’t stay here all the time. If it happens in a few decades or hundreds of years, it is also a big hidden danger.”

“Kill the past?”

“Kill the past!”

The two people quickly reached a consensus.

Of course, they understand each other's meanings. This killing is not to say that they have to prevent problems before they happen. They will destroy the other world.

Instead, I have to go over the past to understand the situation. If there are really trolls waiting to come, then it must be solved, and then how to eliminate the problem of this space crack.

Everything is speculation. Only when I have passed away can I know what kind of situation is there.

Chapter 2220 - Strange situation

The area where the robbery was just expanded has not been stupid, and it has also gone to the farther hills.

At this point, the minefield was narrowed and he came back a little more.

Shen Lang just gave him a message, let him stay here, don't approach, and don't let people close.

In fact, this is in Tianshan, and no ordinary people will come in. However, it is still necessary to take a look at it. In the unlikely event that a self-cultivator passes by, it will certainly be attracted by this movement.

Then the two of them, taking advantage of the space cracks have not disappeared, and quickly walked through.

At the moment of entering, Gao Hanqiu thought of another question: If this crack is opened for him, will it disappear after the lightning stops?

And when others enter it, will it be like the trolls disappeared, the lightning will stop immediately, and then the crack in the space will disappear?

This is related to how they come back.

However, with Shen Lang, he is not worried. Shen Lang has the artifact of the Three Realms. He can cross the space. He has experienced it.

In an instant they have reached another world, and Shen Lang immediately observes everything around him.

Seeing it in the eye, it turned out to be a beautiful show!

This is really unexpected.

In the crack in Licao County, he once went to the other side. He saw the ridiculousness of Huangsha Wanli, and the world was abolished.

According to the description of the “out-of-domain demon” race on the other side of the river basin, he felt that the place where they came should be the feeling of being charred and scorching.

Just here there are six days of magic, which is enough to prove that this is the world where the extraterrestrial demons are.

According to their aggressive style, it should be ruined.

But soon it was relieved. The world I saw last time may be only a part. It may not be the same as the whole world.

Just like in the Sahara, it is the desert in which direction to go; in the Pacific, the direction is the sea. But if you think that it is the whole picture of the world, you have made a mistake of “blind people touching the image.”

Besides, the old story about the extraterrestrial demon is not very detailed. Perhaps they are only animals that devour charcoal, they don't have to eat grass!

Without animals, even without humans, the whole world can still be beautiful and lush.

It is not surprising that such a thought, even in this world, is the same world that the cracks in Licao County lead to, and it is also uncertain.

Although the world that went there was not aura, and here the aura is still very full.

Then the two exchanged their eyes.

Analysis is possible!

Originally looking at the picture just now, they all thought that it was the first to send the death squad. The first one was cannon fodder, and the last five were the main force. But behind this will be their big forces.

In particular, their self-sacrifice is not for the sake of these, but for the sacrifice of the entire race.

But now I have come here, and I have not seen a large number of extraterrestrial demon waiting, even no living things are sensed.

Since this situation is different from the imagination, look at another situation.

How is the movement over there presented here?

Is this a fixed space connection or a random connection? Or is there a similar movement here, causing the opening there?

They will appear at such a right time, and it is certainly impossible to be a coincidence.

The result is regrettable.

There are not only traces of robbing, but even the cracks in the space they just came, they disappeared directly!

Space cracks will disappear, and there are not too many accidents. Like the analysis of Gao Hanqiu, it is also conjectured.

It is estimated that the thunder has disappeared at this time, and the space crack has disappeared.

Shen Lang has the door of the Three Realms and can still go back. But the purpose of their coming here is completely unfulfilled.

What about the heavens?

The cold autumn immediately calmed down, and the gods continued to spread out. There is no clue to see if the scope is wider.

Shen Lang is a move in his heart, he thought of a point.

The devils outside the world are from the past, and the time is just a little while before, there will be many traces left here!

There will also be traces that are invisible and directly imperceptible.

In order to be more clear, and quickly, Shen Lang did not make his own efforts, took the Qingqiu stone directly, and used the effect of Qingqiushi to “see” everything that happened here not long ago.

The result made him an incredible situation!

Nothing!

How could it be nothing?

Shen Lang has come back again, but it is still not affected by any influence!

Is it that Qingqiu Stone can't be used in this world?

This does not dare to be absolute, because Qingqiu is an object produced in Qingqiu. After leaving other worlds, it may not be used. He has not used it on earth.

Then come by yourself!

Shen Lang immediately collected the Qingqiu stone, and then began to use his own mental power to capture the small traces left here, and restore all the pictures in consciousness.

This is absolutely impossible. With his great realm, it is not a difficult thing, and it can be restored more clearly. It's just that there is no such thing as a green hillstone, and the recovery time is long.

The result... still nothing!

It seems that this film is very quiet, there has not been any change like seeing the waves a bit puzzled, the cold autumn shakes his head: "I tried to search, a lot of nearby, There are no clues, no such monsters."

Shen Lang also said his findings.

Gao Hanqiu was also surprised. At the speed of their battle, these trolls should not be in a minute. How could there be no trace?

Although he is absolutely convinced and revered for Shen Lang, this time is no longer a disrespectful question, or can't help but verify it.

Of course, Shen Lang will not feel any discomfort. He also doubts whether his personal strength is not enough to be sensed in this world.

Under his concern, Gao Hanqiu completed his induction.

The result is still the same, he can't feel any movements before here!

"It should not be wrong."

Shen Lang pointed to the surroundings.

Gao Hanqiu nodded silently.

Even because of the environment, they can't feel it. There are no other trolls here, but with the troll's body, casually stepping on and touching, it will leave obvious traces of the vegetation here.

But the scenery here is beautiful, the vegetation is lush, and there are no traces of being touched.

Isn't the troll not coming from here? That is clearly the same space crack, but also where?
