

First Strong 229

Chapter 229 - Lonely forest

Shen Lang cultivated to the morning, then slept for a few hours, and dawned on the road.

This time it is targeted, he basically keeps the fastest speed, and by the way, practicing the “Phantom Meteor Step” will reach its limit.

His speed this time has basically reached an average of forty or fifty miles per hour! But when you reach the temple, there is no straight road to go. The straight line is two hundred miles away, and the actual walk is much more.

But the last time I arrived in the evening, this time it was arrived at noon.

Once again, I came to this Stonehenge, and after a while, the day was still a little nostalgic, but now I am asking for help.

I hope that this transmission array can still be used, and it can be left from here, otherwise it will be troublesome.

It took a while to clean up the dust in the center of the transmission array and find the organs around.

Then Shen Lang put all the Lingshi in his body, but it didn't have any effect!

There is no problem with the formation, it should be that the starting energy is not enough!

He now has only one medium spirit stone, and the others are elementary spirit stones. And this array of methods can be placed in the Lingshi, almost ten. There are no effects in putting ten elementary Lingshi, and nine plus medium Lingshi have no effect!

This means that at least ten medium spirit stones are required to be opened once!

He didn't know how much it needed to open the transfer array in Death Valley, but from Xie You, he heard the cost. It is not cheap to think about it!

It is the same cost as here, ten medium Lingshi, that is equivalent to a thousand elementary stone!

Come once, go back once, twice is two thousand!

This is just the cost of consumption. Death Valley still has to pay for it. It is a unique business. It will not open for three years and will open for three years. Estimate at least a thousand Lingshi?

This is the need for three thousand elementary stones! Death Valley is estimated to only receive medium spirits...

So the cost is spread evenly to the seven parties, and it is also a spiritual stone of at least four hundred. The cost of each place is more than two hundred Lingshi, which is the sum of all the family sects in Pingxi!

No wonder they must get valuable resources, or else sorry for this "expensive ticket."

But now Shen Lang is also depressed, because he can't get so much cost!

And ten medium Lingshi, it is only his minimum requirement. If you have some, you can try it out to see if you need more cost, or if the array method is out of order.

Now he can't get it.

If he can't get it, he can only be trapped here.

Although he is here, not only safe, but also able to practice without thinking, but also to find the supply of elixir, in fact, is a very suitable place for retreat. If you can cultivate for a few years, the strength will inevitably increase.

But he still has no such time, and the battle with the Chu family is less than two weeks. Whether he is trapped here or not, he can't appear, it is a contract.

There are also parents, how will the Chu family know about them?

Zheng Yumeng's desolate overseas should be safe. Falling rain is the Tianshan Ice Palace, and there is no danger. Yuezhen South?

He retired in the Nanwang cemetery for half a year, and he was able to break through to the middle of the Yuan Dynasty. It was not enough for the Chu family to kill!

These things are not settled, and Shen Lang is not reconciled.

He is not a person who kills emotions. Otherwise, before the previous world was robbed, he would not send all the big collections to Zheng Man and others.

After a deflation for a while, Shen Lang revived, and there is another person!

Count Dracula!

This old vampire has lived for hundreds of years, and is an invisible giant in the world. In this dead forest, there are also a long time, even the bones of the golden giants are not visible, and certainly get a lot of other heavens and treasures.

Asking him to borrow a little Lingshi and return it to him later is a solution.

His purpose has been completed, he will always leave, follow him, and he can "snap" a transmission, even if it is transmitted to the western countries. It's also a way to fly back or sneak back.

With this thought, Shen Lang did not hesitate, and immediately rushed to the place where he met last time!

It was more than a hundred miles away. Shen Lang tried to rush in the past, but it was only in the evening to find the last time there.

But before he arrived, his heart began to sink!

There is no one in the wooden house, and Count Dracula seems to have left!

I flew there, and I looked through the wooden houses and caves carefully. There was no trace of Dracula.

And that was originally a strong and fast old monster, and even the traces of his departure were not found.

This makes Shen Lang deflated again, but it is normal. Dracula didn't know how long it was prepared for that moment. With his strength, one day and one night should be enough.

He can only gamble now and see if Dracula will return, so he settled down in the wooden house first.

This evening, cultivation can't concentrate on the spirit...

The next day, the third day...

Count Dracula has never returned!

Shen Lang did not despair, he quickly left the wooden house and set foot on the road to find the mine!

Since there is a spiritual mine in the dead forest, it will always look for it, find the mine, and maybe find a medium stone.

Ever since, he wandered day after day in the forest of death, looking for a spiritual mine during the day and practicing at night. When the meat of the golden python is finished, it will be the fruit of the fruit of the beast. When there is no time, the wild fruit beast will fill the hunger.

The layout of his footsteps is getting bigger and bigger. In order to be able to return to the Temple of Stonehenge, he also began to draw a simple map himself.

Although the phone is not commonly used, the battery and the backup power are all consumed. Later, he could not know the time, and did not know how many days passed.

One month, two months...

More and more elixir spirits are eaten and some powerful beasts have also fought, his strength is getting stronger and stronger, and the temperament of the whole person has completely changed.

But... the most tragic thing is that there are not a lot of spirits and spirits that have been specially sought out. I have tried to find the spiritual mines in the mountain peaks of various mountain valleys, but there is no trace!

On this day, Shen Lang leaped to the canopy of a towering tree and stared into the distance.

He is not pretending to be melancholy, but discovering a suspicious flying object!

After watching the place where the thing landed, he immediately flew up from the big tree. No matter what it is, as long as there is a little fresh change, he will not give up!

This forest has made him not tempered...

He began to realize that Dracula saw his mentality at the beginning, it was really lonely like snow! If you can meet a person, you are not willing to think of the enemy, but willing to exchange.

Of course, this is mainly because his world's mentality is at work, and it is nothing for the past life, but this world is still the first time so lonely to walk.
