

First Strong 2321

Chapter 2321 - Flying sword

When I saw Zi Zi's ancestors self-rescue, they did not give up and rescued them. Everyone was also refreshed and strengthened their self-help.

After all, they are the ancestors of the great gods. The power that broke out is very strong. The ancestors directly let a few vines break.

Lu You's ancestors are purple, but at the same time they are broken, the vines are completely covered, and they are directly infiltrated into the inside, and they must be decomposed by anti-corrosion!

But these vines also have a tenacious vitality. They are only relatively thin when they break down, and then they continue to extend and become thicker and tighter!

All this made them have to hope that the flying sword of the ancestors of the sable, can directly cut off the connection from behind.

This flying sword first came to the side of the ancestors of the happy family. When he was lucky enough to cooperate, the golden light flashed, and the flying sword actually penetrated directly from his sole!

Before he reacted, Feijian had already worn out from his calf!

If time is up, he will be arrogant, and the vines will be smashed, how to drill into his feet!

However, at this time, he did not even have the heart of the purple heart. On the one hand, he must stop bleeding, and on the other hand, strengthen self-help.

He is a ancestor of a great realm, and he is trapped by a giant beast with vines. It is too shameful to say it, and anyone will be unbelievable.

After Feijian pierced his calf, he had already quickly flew to Lu You's ancestors.

Lu You's ancestors used the magical power of Zifu Wonderland. In the process of fighting poisonous grasses, it is much better than the ancestors and the ancestors of the purple scorpion. At least the tentacles on the vines cannot enter his body.

And in addition to breaking some, his purple infuriating counterattack, although not completely let the vines wither, but also effectively curbed its continued attack.

But he also divided the mind to pay attention to the overall situation. The purple ancestor manipulated the flying sword to continue to slash the vines behind him. The other flying sword, but did not control well, but accidentally injured the happy ancestors.

This made him speechless and saw another flying sword coming over him. He immediately maintained an extra layer of alert. If he accidentally stabbed his foot, he must avoid it in time.

But to make him completely speechless, the purple ancestors seem to be unable to control two flying swords at the same time, only his own flying sword, it is OK, this slightly golden flying sword suddenly Strangely penetrated into his body!

Lu You's ancestors accepted the lessons of Xiaoyao, so they are extraordinarily prepared for the legs and feet. Because the vines are bound from the legs and feet, it is necessary to cut off from behind.

Therefore, the encounter that has just been taken away, in his opinion, is still accidentally injured, and now his defense is also to prevent accidental injury to the legs.

As a result, the flying sword, when coming over, was directly inserted into the gap between the vines and accurately inserted into his body!

Originally his body was already purple, and under their defense of their own sacred spirits, they had already protected the tentacles and prevented the vines.

The result was plunged into the waves and broke through a big blood!

The vine tentacles, which had been forcibly blocked, quickly penetrated into the blood, and the venom contained in the blood immediately entered the blood!

On the other side, the ancestors of the other side need not even say that the vine has already branched out from the bottom of his foot and calf wounds. He has drilled into his body and injected super speed to make it faster. The speed spread to him.

The toxicity of this mysterious poisonous grass is such that the dog **** is so huge that it is difficult to resist, let alone they are human bodies.

Originally, those tentacles had to be plunged into the body, just to bind, and to inject toxins. Now, directly from the wound blood, the consequences are self-evident.

After a moment, the two of them broke free from the vines and became the full-fledged poison.

The flying sword with a hint of golden light is naturally the golden dagger that Shen Lang released. Because the ancestors of the sabres put the flying swords first, they suddenly mixed up the flying swords, letting them think that they were added by the sable ancestors.

In the ancestral ancestors here, he thought that they were inspired by both of them, and there were also flying swords. In addition to self-satisfaction, he found that he had one more, and there was no warning.

Before his flying sword, he slashed it once and did not cut the vine. This time it was a continuous impact, so it was necessary to cut the vine.

The result was a situation he did not expect!

In the whole process, the dog **** is fully manipulating the poisonous grass. Since they are boldly tightened, they are also quick to search and pull their bodies.

At the moment, the body of the dog **** is much closer, and the vines that have just sneaked on them are done under the cover of the flower-leaf-controlled leaves.

And then the three of them have been bundled, and the dog gods no longer need to cover.

The two ancestors and the ancestors of the ancestors have been controlled to The dog gods just part of the mind to control them to deal with them.

The sable ancestors are still thinking about destroying the vines and want to escape. Therefore, the dog **** continued to strengthen and strengthen, on the other side, added a vine in the past, turning the purple ancestors tied more solid!

Originally, there was a poisonous grass that had made it difficult for him to cut off and added one more. It would undoubtedly be more difficult to double. This made him realize that today is hard to escape!

But he just can't understand why, what is this? Plant system exercises? Still a special magic weapon?

If it appears on Shen Lang, he is understandable, but it appears on the body of the giant beast, it is weird.

His flying sword could not be completely cut off, which shows how strong this vine is, and the purple ancestors took the initiative and replaced the tactics!

The first layer can be freed from the shackles of the vines; if you can't get rid of it, you can temporarily short it before you have no root cause, and you can get out of it better. This is the second layer.

But now it has been proven that this is not done, then he immediately upgraded to the third floor!

Feijian immediately turned a corner and directly slammed into the eyes of the dog god!

Wai Wei save Zhao!

The powerful behemoth, the eyes will be stronger, and it will definitely be one of the weaknesses in the whole body!

If you can penetrate the eyes of the beast and fly out of the other eye, you don't need to be able to kill the beast, and you will be able to completely collapse it. Then you have no control over the poisonous grass to attack them.

The most unfortunate words, flying sword attack the past, at least can also attract the attention of the giant beast god, to defend against flying swords, he can still have a little more chance to escape.

At this time, without waiting for the dog ***** to respond, the golden dagger that passed through Lu You's ancestors had already stepped forward in the past and intercepted the Kunlun flying sword in the air!

Chapter 2322 - Shocking secret

The dog ***** has always been a big fist, and it is invincible in the world of giant beasts. When it was with Shen Lang, the front was also rampant.

There are more and more situations encountered in the back, and I have learned a lot from Shen Lang here. The Shen Lang, whose strength is not enough, is ***** the strong enemy. It depends on wisdom!

Therefore, it is now very open-minded to learn from Shen Lang, intentionally or unintentionally, will imitate Shen Lang.

For example, the battle just now, although everyone quickly rushed to the past, but it still kept fighting, did not immediately enter the killing.

Just because it is still thinking, if it is a deep wave, how will it deal with the three of them? Desperately killing, is there any more labor-saving method?

As a result, it was seen that Shen Lang quickly settled both Kuntu and the vultures. Although the time was short, there were many places worth learning.

Among them, it intentionally brought a lot of flower branches and leaves as a cover, so that the poisonous grass can successfully attack, and it is more effective and labor-saving than its simple and violent attack.

But at the time of the specific implementation, it still realized that the skills that the poisonous grass extended were of course very powerful, but its control was not good enough.

It just gave up other attacks, but it was attacked by poisonous grass, and there was still a lot of room. Just the one flying sword, it also feels, it is the assistance of Shen Lang.

If you only need three enemies, you still need to help the waves, then it really has no face. Just flying sword has been assisted, it does not need to wait for the waves to shoot again.

When the gold dagger intercepted the Kunlun flying sword, it was enough that God had already fully launched!

The poisonous grass in the three directions is running at the same time, with the claws and tongue, and the three of them are directly sent to the mouth!

Although the time is very short, after the toxin enters from the blood, it has already entered the core of Lu You's body. It has already infected the whole body, and the whole state is greatly discounted. At this time, it feels dangerous and it is too late to have a better response.

Although the flying scorpion was blocked, but he was not attacked by toxins, he was still awake, and quickly sent ideas to Shen Lang!

Because he was trapped by poisonous grass, he wanted to escape from the hard, hopeful flying sword, and was intercepted by Shen Lang. At this moment, he could only watch himself being swallowed by the giant beast.

But he still sees it clearly, and the right to speak is in Shenlang. Want to live, still have to ask for the waves!

When they saw the vultures and they were off the court, the three of them thought about whether they would surrender to the waves and beg for mercy, but they all felt that Shen Lang would not let them go.

But the most important thing is that at that time, there was a chance to escape, and there was no way to beg for mercy.

Now it is about to become a giant beast food. This is the only way. No matter whether Shen Lang is forgiving or not, you must try it.

“Please let me go! I am willing to exchange all the resources of the Kunlun School. As long as you want, you can do anything! The entire Kunlun School is yours!”

At this time, the first life, the scorio ancestors can not care for the ancestors of the division, even if the door is sold, we must first live and say.

The last comparison with the elk's encounter made him feel that there is hope in living, and everything in life!

I once made the right choice. This time he made the wrong choice. This is the last moment. He will make this choice whether he is right or wrong.

At this point, as long as Shen Lang gave a request, even if he was asked to offer the old chrysanthemum, he estimated that there would be no rejection, and he agreed to say it.

It is a pity that his thoughts were sent out, but there was no response from Shen Lang. Shen Lang was still watching the bustle in the air!

And as soon as they waited, all three of them have entered the mouth of the dog god.

Not only poisonous grasses have eroded them more intensely, but they are also crushed directly by sharp pressure!

The sable ancestors have not been eroded by toxicity. Even if they can't escape the bundle of mysterious poisonous grass, they can still struggle desperately. As they roll around in the mouth, they avoid the crushing of huge fangs.

"I have a secret! There is a big secret to tell you! Really, this is a secret that you absolutely don't know, but certainly very interested, I promise!"

Just the entire Kunlun faction was offered, and others did not care, let him change his direction.

Shen Lang now has a lot of things, and perhaps he can't see it in Kunlun. So he must let Shen Lang give him a chance in an alarmist way.

As long as you can listen to him, you will be able to play more and strive to bring your life back.

In this giant beast, he can feel the invasion of venom, and the two old ancestors and Lu You ancestor have been crushed and crushed, and blood seems to be sprayed to him.

This made him have to fear.

Unfortunately, Shen Lang still did not respond to him!

At this time, the secret of the big secret that he shouted out couldn't be just a boast of wanting to live. Shenlang has been buried in Longgu, and what is the secret of Tianda?

“I know the secret to overseas! The world of endless overseas!”

I can't see it. The purple ancestors sneaked away and had to reveal more of the secrets he knew, hoping to move the waves.

The secret of Tianda, it may also be boasted, and there is really no value in reality.

But now this sentence reveals the secret of what is specific.

Above this continent, the ancestors have had historical legends. Except for one direction, no matter which direction, the end is the sea.

The sea is impossible to spend!

Once in history, there are powerful people who want to see what the end of the sea is, use magic weapons, bring materials, and fly for a long time. It is always possible to cross the sea.

It turned out that it was not the boundless sea, but after a long flight, I finally saw the coastline. After logging in, I proved that I was on the same coastline and did not fly out.

The final answer is the same in different directions, different ages, and different powers.

So they sketched out the world view – the entire continent, is a huge island in the middle of an endless sea!

Except for one direction, it is not the direction of the mountain. If you don't cross the mountain, you can't go over it. The people who climbed the adventure didn't know that they were all dead. They still didn't want to come back. In short, they didn't come back.

Later, the conclusion is that the whole world is a huge island, and Zhoushan is a towering mountain in the middle, which is the center of the world.

There is nothing on the other side of Zhoushan. It is legendary. It is said that it is the same as this one. It is also said that it is primitive and wild. It is also said that it is not isolated, but it does not end in Zhoushan. It extends to the end of the island on that side.

Chapter 2323 - Secret of the sea

Shen Lang will think that the mainland of the island is the central fairy island on the other side of the river basin, because the legends on both sides are the same.

According to his speculation, it is not that the sea is endless and boundless, but that there is an astronomical array of methods, or a space law that envelopes the entire island.

The result is that the island can't get out, and even if the technology is super-civilized, it can't explore landing.

His conjecture is that from the perspective of outsiders, guessing from different world dimensions, there is no way to prove what is here to people, and there is no way to verify in the river basin.

So everything is just his personal guess, but later, it was confirmed by the ruins!

The ruins of the 80,000-year-old ancient ruins, which were once opened in the millennium, are actually the future world of the river-states!

Time and space are in a mess at that moment!

It is two worlds that have entered from different places, but it seems to be the world of the same space. It seems that the space is right and the time is wrong. Or time and space are not right...

But no matter why it is so chaotic, it is proved that the mainland of the island is the central fairy island of the world in the basin.

Shen Lang later stopped entangled with these problems. Anyway, for the time and space he can enter, the world's cold autumn is still the present; the sea and sea in the riverside city is still in parallel, not now. "Ancient future."

This time, he has no guilty conscience for the sable ancestors. Since he wants to kill him, it is normal to be killed by him.

Kuntu, vultures, plus Xiaoyao and Luyou, did not wrinkle his brows.

At the last moment, Zi Zi's ancestors began to ask for mercy, and Shen Lang was also used to it.

He would not believe this at all, nor would he care about the resources of the Kunlun School.

Because he really wants to ***** the resources of the Kunlun School, he can do it at any time!

He has already been to the interior of the Kunlun School and has entered their core treasure house. They can use the gates of the Three Realms to send them directly to their treasure chests and rob them.

You can also go directly to the interior of the Kunlun School and kill them without the resistance of the Great God.

Therefore, the Zizu ancestors offered the Kunlun School, and they felt that they were betraying the millennial division. It was a great dedication, but it was not worth a trip here.

Behind the secrets of Tianda, he also did not move his eyelids at all.

However, when he sent out the message of "Endless Overseas", Shen Lang was moved.

He does not necessarily have to understand this channel. It is purely curious. After all, this is a secret that no one knows in the ages. He is even an indigenous person here and wants to know about it.

What's more, he has been outside, more related to time and space, and even more want to figure out why.

Shen Lang immediately gave a message to the dog god, let it be merciful.

The next moment, Shen Lang has reached the mouth of the dog god, the dog **** is also obedient to send the purple ancestors.

Being tied up, plus psychological pressure, let the scorio ancestors not say collapse, but also a little wilting.

Shen Lang easily completed the suppression of his control.

Later, Shen Lang read all his memories!

The sable ancestors were very depressed at this time. He was temporarily not eaten, but Shen Lang did not promise to spare his life. Now he is reading his memory directly, and he does not need him to cooperate.

Shen Lang actually does not care about his life at all. If he spares him or kills him, it can be changed only after a thought.

But for the secret of the sable ancestor, he must be sure to be reliable!

Yes, reliable, not correct.

Because the scorio ancestors can know, or the Kunlun faction can know, it must be some sort of gossip, it has not been verified, and it cannot be verified.

After all, the whole world is a mystery of the ages, they can not be mastered and verified, so there is no question of whether it is correct.

The so-called reliability is to see whether this information is real, or is it temporarily made by the scorio ancestors!

And if it is told, the scorpio ancestors may also have reservations.

From another point of view, Shen Lang's own search for memory is faster than interrogating him.

The scorpion ancestor is now imprisoned in the air, and the dog ***** is still watching, so that he can only listen to his fate, waiting for the sinking of the waves.

After Shen Lang read his memory, he immediately made a search, just searching for information related to endless overseas.

According to the information on the other side of the river basin, different city-states have the existence of psionics, and are hailed as masters of psionic power.

The source of the psionic masters points to the central fairy island.

Only the psionic masters on the other side can only be regarded as relatively primitive self-cultivators. Even when Shen Lang first passed, they can crush them.

Even in the age of the dead forest, he can also make Bi Haihuan and Changtu amazed.

Therefore, he is not in the watershed city state, but did not go to the bottom of the psionic masters, because it is very likely that it is just a climbing!

The Central Fairy Island is so mysterious that even if it develops into a super-technical civilization, it cannot be explored. Each city-state has targeted research and wants to log in earlier.

This has the innate mystery factor. People who have a little power say that they are talented and hard-working. Of course, it is better to say that they are from the immortal fairyland. In Shenlang's view, that The scientific and technological civilization developed at the same time is completely lost for the cultivation of the truth, and there is no trace of soil and civilization.

But after all, there is a more basic population base than the earth, with a large base, there will always be some people with congenital talents.

They have certain abilities in themselves, and a little cultivation is better than ordinary people. After a long time, a system will be developed.

However, they are generally low-minded, and they can only show the superiority in ordinary people. It is the ordinary army, and there are still ways to check and balance them.

But what if someone really went out from here?

In the memory of Zi Yan's ancestors, there is not much information related to endless overseas, which is a secret of the Kunlun School.

The Kunlun School is a martial art for thousands of years. Now the scorpions' ancestors seem to be more general, but they used to be very cattle. They were once the big brothers of the world.

So accumulated, they also have a lot of secrets that outsiders don't know. For example, about the Baihua Fairy, such as the rumor about this endless overseas.

Of course, every famous group may have its own core secrets, but it has no value for Shen Lang.

Once a person reaches a certain peak, there will be a kind of loneliness, and he will want to ask for defeat. This kind of failure is not necessarily that you really want to lose, but you want to have people who reach your level, friends, opponents or enemies.

Different periods, different environments, and different realms will have similarities and are essentially the same.

For example, you can fight everywhere, and finally go to the meditation area; for example, many try to cross the mountains and explore the sea.

For example, the cultivation of the earth to the peak, the desire to break the void, and the robbery and ascension are similar.

The Kunlun faction also had such ancestors who had lost their peaks.

Chapter 2324 - Speed barrier

The Kunlun School's former ancestor was also trying to create an unprecedented future. Overstepping the mountains, or exploring the endless sea, is undoubtedly two world-class problems.

At that time, he chose to explore overseas, and his strength was also very well prepared. He wants to go further on the basis of his predecessors. Even if he can't directly cross the endless sea, he must also explore the law.

Why go overseas and finally return to the coastline?

Although there is no electronic equipment, no satellite navigation, etc., but to achieve such a realm, the direction can still be very accurate.

Besides, even if there is some error, it will not be so big.

On the earth, I walked forward and finally returned to the origin because the earth was round and came back from the other side.

However, if it has been sailing for a long time, it is a positive return to the original point. It must be a problem. It is a hundred and eighty degrees in the middle.

The ancestor of Kunlun School wanted to find out why it would turn 180 degrees. The legend is a vague legend. Without knowing it, no one knows what the situation is.

And everyone will feel that they are unique, perhaps they can find out what their predecessors did not find, do not try to know how to know?

The ancestors crossed the distance, came to the beach, and then proceeded in one direction.

It is very contradictory to follow the Kunlun faction who went there. On the one hand, I don't want the ancestors to cross the endless sea. Then I really left. Without such a pillar of the sky, the Kunlun faction will undoubtedly lose momentum.

On the other hand, I hope that the ancestors can spend the time, that is, an unprecedented feat, the Kunlun faction will become the jewel in the history of civilization.

That is the great thing of Enze Wanshi!

The days they waited for were initially full of entanglements. It can become a prayer later!

Pray that the founder is safe and sound.

It is the most important thing that people have nothing to do. They can come back safely. Even if they are not groundbreaking, they can at least save the money.

And if you cross the endless sea and go to the other side, as long as people are fine, there is still a chance to come back.

The result is that they will wait until the ancestor is back!

The founder saw the familiar coastline and was very disappointed. Then he stayed in the place for a long time and realized the harvest of his trip.

Finally he left a conclusion – not fast enough!

He could not explain why he would return to the original place, because after flying far away, it has been an endless sea, an endless horizon, no trace in any direction, only to keep flying forward.

He also finally realized that the ancestors of the predecessors had no problem, and there was no turning point in the feelings. In the end, it was still a hundred and eighty-degree turn.

However, he carefully recalled the deduction, and felt that there was an abnormality in one of them. It seemed to be an inconspicuous sneak peek, as if staring at the unchanging scenery, and looking tired after a little tired.

The ancestors felt that the problem might be there. If the speed is fast enough, you can directly cross the section and you should be able to cross the endless sea!

The place where he went to sea was his own choice. It was not a fixed place with the explorers of the past, but everyone encountered the same situation.

This can also be deduced, it should be the entire giant island, have been surrounded by such an isolation, no matter where you go out, encounter the area, will turn back.

After this inference, he made another attempt.

It was groping before, and the speed was not too fast, it was experienced in all aspects. But this time, the second time, it is to maintain the limit speed.

The result is a faster return to the shoreline!

The result is still regrettable, and the founder did not continue, and gave up the exploration. But he insisted on his own argument. He felt that if the speed was fast enough, he could break through the past, but he felt that his speed could not be reached.

Later, he felt that he should increase his speed. If the speed can reach the limit, he can try again.

However, according to the records of the Kunlun School, there was no such thing as a third time, and I did not know what happened behind it. It may be that the founder saw it or had other pursuits.

Because of the lack of success, the Kunlun school was recorded as a person who had explored the endless sea. But after all, there is no success. His achievements are just personal guesses. There is not much value, and no one pays attention.

Later generations, this matter may not be remembered by many people, but for the Kunlun School, this was once the glory of his own sect, and it was recorded and well known to the disciples.

However, it is generally known that there is such a super-born ancestor, and there is such a merit.

Knowing the “exploration results” is only known to the head, and it is secretly passed down.

According to the original meaning, the founder was hopeful and younger, able to follow his discovery and eventually succeed.

However, the Kunlun School in the past millennium has been more declining than before. Although it is still a seat of the famous school, it is no longer in the position of the world.

The disciples of the younger generations do not have this strength, and there are other people who have also challenged them. There is no result, and no one will do nothing.

This so-called secret of the day is just that it is a big thing, and its secret is already worthless.

Just the ancestors of Zi Zi, in order to save their lives, in the case that Shen Lang is not interested in their resources, I thought of this.

This is also a no-brainer, the big things are over!

If it is earlier, he can make a ruin, the Yungong Holy Land, and these aspects of the Kunlun faction also have their own information accumulation.

But these Shenlang have participated in it, the harvest is bigger than them, and they know more than they do.

speed? Speed beyond the limit?

The inferences left by the Kunlun Patriarchs seem to have not paid much attention to the Kunlun faction, and they feel that there is no practical significance.

Because everyone can't reach the speed of the founder, it's even more difficult. Aside from the emotional emotions of the division, it is even conjectured that there is no gain in the founder. In order not to be embarrassed, I found such a reason!

Anyway, he is already in a very high realm. Others can't even surpass his speed. Naturally, he can't prove that he is wrong and his theory is in fact unprovable.

Because he doesn't have a formula that is strictly forbidden, and he doesn't calculate the approximate speed. He just said that the speed is fast enough to surpass the past. How is it fast enough?

Someone is ten times faster than him. If there is no success, it can be said that it is not fast enough.

This is very vague.

However, Shen Lang knows this information, but has different views. Earth civilization has made great progress in science and technology, not to mention the world of the city.

Shen Lang personally does not know much about the professional aspect, but some have already tried it.

For example... The ultimate speed that the founder refers to, is it the speed of light?

Chapter 2325 - Extinguish

People here are not clear enough because of the different world views and cosmology.

But Shen Lang thought of the speed of light, and the speed of light is almost a limit. If the ancestors felt the speed limit, then it really could not be done.

The question is, what is the rule, will it be suppressed like this?

How do you make people turn around and not conscious?

How fast is it, and how is it going through the past?

He further thought of another question. If it is really able to break the speed barrier and leave from the sea here, what kind of situation will it be to the other side of the sea?

Is there the time and space of the city that he is familiar with?

If you follow the ruins, it corresponds to the time and space outside, after 80,000 years, it is really hard to imagine what it will be like now.

Cities like rivers and cities, all of which are above the ancient ruins, appear in the mountains of tens of thousands of meters in the mountains, which means that there have been very incredible events!

This idea makes Shen Lang a bit tangled and hesitant.

Originally, he was still curious and looking forward to this aspect, but now there is a dim sum.

In any case, on the other side of the river city, Bihaihuan is still the one he remembers. Now he can still pass through the earth and enter the past.

In this case, you can't get rid of the mystery from here!

This "central fairy island" has been protected by inexplicable rules. This may be tens of thousands of years, and naturally there are reasons.

If the rules are broken because of curiosity, who knows what will happen?

There may be wilderness, and there is a sect on the side that can go to capture a wider territory;

There may have evolved into a black technology super civilization like the river city, that is, there will be countless warships and aircrafts, and the attack of scientific and technological force will be carried out here...

Simply put, it is like getting through the earth and the world of behemoths, or the earth is getting through here. The difference in the development of civilization and the asymmetry of strength will have serious consequences.

But the most worrying thing is another situation!

That is the status quo that is suspected of "time and space disorder."

If everything is normal, from here you can not use the gates of the Three Realms directly to the city of the basin, the city can not go to the island, it is the antiquity here, it can only be regarded as parallel time and space!

The earth is a key point in connecting this parallel time and space.

Sinking through the earth, you can come here, you can go there, everything is a normal time lapse. But if the barriers here are broken, the established space rules are re-disordered – or restored.

It is very likely that it will not be parallel, and it may not be able to return to the city.

It is quite good now. He is the only one who has mastered this parallel time and space of 80,000 years. He still does not want to break this stability.

“Your secret is secret...no value.”

When Shen Lang said this sentence, the purple ancestors almost scared the urine!

Just after Shen Lang read his memory, this is what he knows and is also nervous to wait for Shen Lang's judgment.

It is not long before Shen Lang digests and searches for memories. The latter's indifference is completely analyzing the consequences, gains and losses of this matter.

For the sable ancestors, a second is as long as a century.

But in his heart, in fact, I hope that Shen Lang can consider it for a long time, because the longer it is considered, the more valuable it is. If you respond to him immediately, it means that there is not much interest.

It's hard to wait until Shen Lang's opening has a result, which is actually the result of his most worry!

“Shen... Shen...”

Zi Yan ancestors want to say that he has other things to contribute, but now all the memories have been known by Shen Lang, then what else does he have, isn't it all true? Others have no need for him to surrender anything at all!

This moment, he completely died.

Shen Lang is not soft, control the field, directly throwing the imprisoned Zixiao ancestor to the dog god.

The dog ***** decisively opened his mouth and bite him!

It is said that before Shen Lang and the ancestors of Ziyan, I have experienced in the past, it is better to speak, a bit of love can be said.

But in fact, he can let go of his life to the ancestors of the snow-capped faction. For the ancestors of the purple scorpion, there is no net opening.

This is because the sentiment is two-way!

Not only the ancestors of the sable, the ancestors, the ancestors and the vultures, have had some grievances.

That time can not be regarded as a smashing wave to bypass them, it is really not this strength.

But the key is that after the event, the waves became stronger, and the cold autumn was merged, and they were not revenged!

Going to the Yungong Holy Land together, he did not have a vengeance. The rescue is still a rescue.

Except for one situation – Tong Xian Weng and Zhi Zhi!

At that time, I just went in. No one knows that Shenlang is related to everyone being able to go out safely, so I want to kill him first. For the sake of profit, it is also out of face.

Shen Lang is not welcome.

The same is true today!

Just in front of Baihua Valley, the rumor expulsion of Baihua Fairy is equivalent to giving them a chance to re-select.

If it is true that the purple ancestors said on the surface, then they give up and leave, the flowers and flowers will not find them trouble, and Shen Lang will not find them trouble.

However, they are determined to leave him in this sea of flowers in advance because of factors such as resources, face, and fear of going out.

That Shen Lang will not be polite, all have to pay the price!

If he loses, the other party will certainly not have any soft heart.

After killing him and the dog god, the next step will continue to go to Baihua Valley and continue to deal with the flowers and fairy.

So for this kind of person, Shen Lang has already seen through, there is nothing to say, kill it!

Of course, the dog ***** is also very simple, and they chewed them all directly.

It can do this, in addition to the assistance of Shen Lang, in addition to the integration with the poisonous grass, it is also because of the strategy!

This strategy has both the “tactics” and the shackles of Shen Lang before, letting it converge on its own strength, letting those who have seen it before, think it is still the original strength.

In fact, after many and long periods of retreat, the massive resources given by Shen Lang, and the mysterious poisonous grass seeds, etc., have made it far better than the general god.

Recently, this is still a great ***** who has swallowed up several waves, giving it more time, waiting for the complete digestion and absorption of and can evolve and improve!

It all comes from Shen Lang, including today, the five strong, Shen Lang is leaving three to eat it, which makes it very grateful.

It is now just crushed and swallowed, and there is no time to stop and rest. Then I just looked at Shen Lang and wanted to see what arrangements he had.

Shen Lang came here to help the flower fairy. In fact, people don't need help, but in the end they kill the enemies who want to murder her.

It's better to come early, it's very clever and timely, and it saves a lot of time.

Normally, this should be going back to Qiulin, and it will not delay anything.

But the memory of Zi Zi's ancestors, there is no substantial gain, and it's not possible to make it a bit uncomfortable. Then the vultures are taken out from the tower of the tower!

Chapter 2326 - Unjust wealth

The vulture was cut into two pieces, and then entered the tower of the tower, it is already very desperate, no longer have a chance to live.

The strong repression that followed felt also made him realize that it would not be long before it would be crushed into a pool of water.

As with all those who are absorbed into it, as long as there is still a trace of ability, you will want to see if you can break this place.

After all, it's just a magic weapon. If the power is big enough, there is still a chance to break open.

But now the tower is getting stronger and stronger. Not long ago, the self-destruction of a great ***** strongman was absorbed in the first moment. All the self-explosive powers were destroyed in one fell swoop. The power of proliferation also made the sky The tower absorbs and grows.

So now refining the vultures and Kuntu, the effect is even faster.

Because Kuntu was corroded by the dead water whip, he was opened to the brain by Shen Lang. Basically, there was no resistance, and there was half a vulture.

After he struggled for a while, he gave up and there was no possibility of any breakthrough. The more he struggled, the more he felt the power of this artifact.

But he is not willing to wait to die like this, not to mention it will become more and more uncomfortable – he was already very uncomfortable when he was cut off his waist!

At this time, he unexpectedly came out!

The owner of this artifact, Shen Lang, actually put him out!

This scene is too surprising, making the vultures feel unbelievable.

But the heavy blow of the whole body reminds him to be sober, and feels that this is not the same environment as the tower in the tower, which is back to the top of the flower sea!

Even if he is like a dream, he is still very excited and must grasp this opportunity.

Just as he was preparing to offer mercy to Shen Lang, he felt the strong invasion of Shen Lang's consciousness and immediately read his memory.

Then, I quickly learned his spirit!

The vulture immediately had a nightmare!

Originally thought that Shen Lang felt that he still had value in use, so he was released.

It's better to live a good life, and to live there, before you can appreciate the value of freedom. Can not say freedom, but the preciousness of life, waiting for the despair of death!

I didn't expect Shen Lang to release him. It wasn't like that at all. I just wanted to squeeze out his residual value first.

"You... you are more evil than me!"

The vultures have generated such an idea and let Shen Lang perceive it.

"No, you are wrong. You can use a knife to cut vegetables. You can also use it to kill people. The knife itself is just a knife. When the tool is good, when it is a weapon, it is a human choice, human manipulation. ""

Shen Lang now has time to respond to him.

“Your body is repaired, your rules of conduct are the same, and they are neutral and objective, positive or evil, completely looking at your own operations!”

The vulture is just a thought from the heart, it is not a disgusting wave.

Because he spent his whole life, doing things is also a no-brainer, thinking about how he died, but never thought it would be the way today.

He cut off his waist and put him into the magic weapon to refine. This is not satisfied, but he has to release it, read the memory, extract the mental power, squeeze it and put it into refining!

Is this done by the right people?

Is this not the means of our evil factions?

But Shen Lang’s response also made him speechless.

The means may be ferocious, but they are still neutral, depending on what is used.

If it is for the sake of profit, active search, and active attack on others, this should be a conventional qualitative evil. And for self-protection, to protect others, that is the right way.

However, after he was dumb, he felt that something was still wrong.

He has no power to fight back!

It is said that Shen Lang should respect him, he can be captured, or in any other form, but he can not be abused when he does not have the ability to resist.

But at this time, is there a reasoning space?

He is more aware that Shen Lang is not a traditional righteous person. He will not be restricted by rules and regulations, or even irritated, and may be unscrupulous!

This moment, he regretted it, why should he provoke the waves?

Maybe don't move the waves today, wait for them to leave, and then go back to Baihua Valley together, maybe it will be easier?

But it is useless, Shen Lang re-invested him into the tower of the tower!

Just put him out, mainly to read his memory!

The memory of the sable ancestors has no effect, but it is tangled.

For the Kunlun faction, he is not really good at going to the pot. If it is not convenient to rob the Kunlun faction, it is really like a sect!

However, the thoughts of Shen Lang have been hooked up, but there is no way to harvest them. Of course, it is very uncomfortable.

Then put your idea on the head of the vulture!

The vultures are sinister sects, and they should have more understanding of the evil sects of all roads than the famous sects.

All of them can really be described as "unjust wealth." And they are all bad guys. Killing them is tantamount to killing the people and avoiding more monks being sneaked and looted by them.

The reason is already ready I am ready to take them directly!

With more active vultures, Kuntu does not matter. So he just read the memory of the vulture, and Kuntu did not pull it out, no matter whether he died or not.

Taking advantage of the spiritual power of the vultures is really just a matter of hand.

Now that everything is in place, the waste is used up, of course, I will continue to let him return to the tower of the tower, which is the home of the vulture.

Of course, Shen Lang is just a whim, and will not rush to rob all the evil masters now.

Now I still go back to the Qiulin swordsmanship. When I have leisure time, I will not be eager to harvest those evil factions.

Just as he was preparing to bring the dog ***** back to the Qiulin sword, there was a sense of foresight in the wheel of the heavenly machine!

This is almost the same feeling as when I passed by here last time.

At that time, it was vaguely felt that I could wait for someone, not a friend, or an enemy. What is not clear about it.

But now it can be more clear!

The flower fairy has come over.

It seems that the flower fairy has a special perception for the flower sea. It is thousands of miles away. It is also known that the battle here has damaged her baby flowers.

With this in mind, there was a bit of doubt about the cause and effect for the last meeting.

It was because when they passed by, they predicted that the flower fairy would come over, so they stopped to wait. Or because I stopped to wait, let the flowers in the distance find the situation, so I came over?

But that doesn't matter. It is now that the Flower Fairy is coming soon. I must think of a reasonable excuse, lest she anger the two of them.

Shen Lang's self-question is still OK, although not familiar, but at least there is no feeling of evil, and there is still help.

But the flower fairy can see a hundred flowers like children, but there is a legend that directly smashes a big ***** into fertilizer!

Chapter 2327 - Ask for special features

Waiting for a while, the same time last time, the flower fairy appeared.

Her side did not follow the day, it should be left in the Baihua Valley.

“Fairy, just a group of them, who have been ruining flowers and plants here, have been arrested by me, and they are not humbly accepting criticism and education. In order to let them know that the flowers of Baihuamen are not to be ruined, I have killed them all!”

Shen Lang greeted him directly and made a brief statement about the situation here.

After all, it was the strong man who played the great realm of the gods. Even if there is no heartbreak, it will have a great impact.

Just like a tornado, a typhoon, and so on, I don't want to do anything to destroy. After a while, it will be a raging.

Just after Shen Lang himself was in control, and the dog ***** was careful, but there are still many flowers destroyed.

The use of powerful energy of exotic flowers and plants, unlike ordinary trees, the longer the average tree survives, the longer it will grow into a towering tree, and the vitality will be longer.

The hot flowers and grasses, the essence of the heavens and the earth, are similar to the anti-sky behavior. In the life cycle such as the flowering result, it is more long-lasting, but it may not be too strong, but also needs careful care.

So the huge body like the dog ***** has already affected and destroyed a field of flowers hundreds of meters.

Although this is compared with thousands of miles of flowers, it is a slap in the face, but I don't know what the attitude of Baihua Fairy is.

Therefore, Shen Lang directly counted the responsibility of these flower destructions to their heads, and it was already dead.

Moreover, it is not a planting. If they do not come to chase, they will not need to fight, and naturally there will be no damage.

From the roots, the scorpio ancestors are the culprit.

After the flower fairy arrived, it was natural to notice the damage of the flower field below, but she did not blame, but stared at Shen Lang and asked.

“I saw you for the second time.”

“It was the third time that it was counted once.”

Shen Lang smiled and analyzed what she meant.

The flower fairy looks at the face of Shen Lang carefully.

The dog’s eyes couldn’t find the trouble of destroying flowers and plants, and Shen Lang also helped it to get rid of it. He had already narrowed his figure and left to the side, a pair of people who didn’t listen to them.

“Why do I feel a special feeling every time I see you.”

This sentence, I have not said it before, but I said it when I met for the first time. Because of this, I specially sent him a sachet.

“Maybe because I am handsome? Let people see it... as it is?”

Shen Lang made a joke and then thought about it.

With such a realm of Baihua Fairy, I will say such a thing. Naturally, there is a reason for her. It is definitely not because of what it is, but it will not be close to it.

What is special? He had thought about it before, but there was no result.

The Baihua Fairy is the Baihuamen here. It will not be the ones from the Gaochunqiu, and it is impossible to see his past life.

In other words, he did not have any relevant dealings, especially when he came last time, there were no places like Yungong Holy Land and Funerary Valley, and his body was not so “special”.

Now that I can't think of anything special, give it to the flower fairy to see if she can figure it out.

“Do you have any special items on your body... I am one with you, so I feel special!”

The Baihua Fairy ignored his jokes, but said a result of her analysis.

After seeing that she had just met, she was thinking about this issue. Will follow up here, not because of the purple ancestors they are a few, but because of the waves!

Originally, Shen Lang was very calm, just waiting to see what analysis she had. He heard this sentence, but it made him secretly shocked!

What special items are merged into one!

Shen Lang suddenly thought of the Golden Bible!

This is the most special place in him, and it can be regarded as the biggest secret.

When the strength is not enough, rebirth is his biggest secret. Now he is not afraid of others knowing that he is born again. But this mysterious golden book, the world of heavenly books that is integrated with him, is his greatest secret.

Originally, I thought it was an ancient magic weapon on the earth, but later I analyzed a bigger possibility. It is very likely that Bihaihuan became the **** of the world, combined with the cultivation of the super-technical civilization and brought to the world of the earth.

This is another paradox. Bihaihuan will have such a creation in the future, and it is because of his past inspiration.

Not to mention these origins, the effect that the meditation can enter the space of the heavenly book is very mysterious and very easy to use. Not to mention that there is still a hundred times longer.

This secret, even the high cold autumn, has only recently been known.

The white pheasant does not know, and the flower fairy is naturally not to this extent.

“Is it this one?”

Although Shen Lang was secretly surprised, but on the surface it was very calm. He opened his hand and appeared in the palm of the temple.

Then, when I opened the temple, I put the temple out and instantly became bigger in the air, but in order not to press the flowers and plants, I just changed it and took it back.

“You are a bit interesting, but not.” Baihua fairy shook his head.

Release the palm temple, which is a scorpion of Shen Lang. If he has no special place, it is suspicion, so let go of a part to better cover up what you want to cover up.

“In addition to this, there is actually. I still have a Raytheon, but I am not one with me, but a guest.”

In terms of Lei Yuan, Shen Lang can't just play it out like a temple. It is capable of having a temper.

The flower fairy also shook his head.

Although she did not know the specific “Raytheon”, but listening to this, I know that it has nothing to do with her.

Shen Lang thought about releasing two parts, which was enough to be convincing.

At this time, he thought of one more. If you say three words, then you should be able to completely dispel doubts?

“Right, I used to get the same ancient artifacts, the wheel of the heavens at the Yaochi event. I don’t know how, it seems to merge with it.”

Shen Lang made what he had just thought of. It seems that he has already searched for the stomach and there is nothing else.

Tianshu space, this is what he must keep secret.

After all, the strength of the flower fairy in front of you is unfathomable. What if you want to grab it?

When the wheel of the heavenly plane said it, Shen Lang did not care.

Because it was really obtained from the Yaochi event, it is useless remnant, because it is worthless, so the chicken ribs will be taken out for trading, but after being merged, it will become a waste.

“The wheel of the sky? Yes...”

If you have a flower fairy, you can’t help but sneak.

Chapter 2328 - Fudge

Does it make her feel that she has a special feeling?

Because of the difference in concern, Shen Lang first thought of the space of Tianshu, which cannot be revealed. In comparison, other things can be said.

The wheel of the heavenly machine is just a legendary ancient artifact. Once it is abolished, there is no value. No one thinks it is still an artifact.

Including the gates of the Three Realms, they will want to **** the door of the Three Realms, which is after seeing him transfer away.

The wheel of the heavenly plane does not directly show that he can accurately predict.

But looking at the reaction of Baihua Fairy, Shen Lang couldn't help but think!

This time I will not say it. When I recalled the last time, he was because the wheel of the heavenly plane had obvious foresight, and it was accurate to the specific position. It was accurate to wait for someone, not a friend or an enemy.

This is not the case in other respects.

For example, when Shen Lang was passing through the Tianhe River, the wheel of the Tianji did not actively predict that the giant scorpion had no boundaries; when it first arrived at Qingqiu, Bailu did not trigger its prediction.

There are no clear predictions about the situation of the laks and slaves, including the Yungong Holy Land and the Funeral Valley, and the former Lin Biao.

Unless it is really heavy, or it is very dangerous, there may be warnings. Otherwise, he needs his active and targeted prediction, otherwise the wheel of the universe is passive.

There is no danger, big problems, and the initiative to the detailed prediction is the flower fairy.

This was the case last time, and it is the same today.

When I came here today, it was the initiative to manipulate the forecast, and even the direction and approximate distance of the Baihua Valley were sensed!

Just a few moments ago, he also felt that someone was coming, and the flower fairy was coming over.

That is foreseen, not for the sense of God.

Is it really a special connection between her and the wheel of the heavenly machine?

The mistakes in Shen Lang's current eyes are not the acting skills, but the real puzzles.

The flower fairy is also watching him.

"The wheel of the sky... can you show me?"

Shen Lang slightly smiled.

"Maybe not. Because when I got it, it was a scrap and there was no value. I tried to refine it into one."

"that....."

"You don't want to control me, just separate it?" Shen Lang directly said the consequences.

The flower fairy is silent.

She really thinks like this, but Shen Lang said so, she is not good to say it directly, only in the default posture.

Shen Lang is a bit helpless. If the Baihua Fairy must be done, what can it do?

Turn your face?

He and the dog god, can kill five people, such as the purple vulture, but have the ability to kill the flower fairy?

According to the legend of "nearly near God", the two of them may not really be opponents!

Because that made him think of the **** of light...

Bright God is to make him and the dog ***** have a psychological shadow, if the flower fairy is close to God, it means that now, plus the dog god, may not be enough.

He has encountered many enemies all the way, and he has continued to kill many enemies. He relies on various means, including experience, magic weapon, tactics, psychology and so on.

But these also depend on the gap. If the gap is not too big, it can be done. For example, he is at the peak of Daxian, and even can use the magic weapon, sneak attack, etc. to complete the hunting of the ancestors of the great gods.

But what if it is only a big fairy and a half fairy? When the gap is bigger, it is completely impossible to kill the strongest in the realm of the gods.

Just like when the night was not in the mountains, the killing warrior robot, two or three kilometers of the flame giant, the clouds of the monks of these great immortals, simply can not resist, can only be desperate to escape.

And the cold autumn came, but a sword would defeat it.

When the gap reaches an insurmountable gap, all the tactics and methods of experience, including the magic weapon, including the number of people, are virtual and meaningless.

Pupils can also knock down older middle school students by number, skill, etc., but in front of a boxing champion, it is really a chicken and a dog is generally vulnerable.

Turn your face, not sure.

Cooperate, not reconciled!

“Do you have a special relationship with the wheel of the universe?”

Shen Lang opened the mood.

First look at what she said, if there is a reason to convince him, or if there is a good step, he can also consider decommissioning.

After all, if you really want someone else to do it, it will expose him more secrets, in case he plunders his memory? So it is better to give up.

“I do not know.”

“...”

Shen Lang is a bit speechless.

I thought she was certain, and she was really sure about the momentum of the telescope. I didn't expect her to be the answer.

It seems that she is not very clear, then there are articles that can be done.

Shen Lang immediately seized the opportunity.

“Since you feel that you have a special feeling with me, I was able to pass through here and meet you, maybe it is also a kind of guidance in the dark, then we should be considered a very good one.”

“Today I heard that someone is going to be against you It's also a long way to come, and they will kill them all.”

He first said that the fate of everyone could not be clarified, and then emphasized that he came to help today, regardless of whether the other party needs his help, he has already contributed.

Originally, he came to the Baihua Fairy, but now it is intentionally adding a favor to the Baihua Fairy.

In this case, Baihua Fairy has the heart to plunder him, and I am embarrassed to take it.

“This way we can get along better. When we are more familiar with it, we may have figured out why. Maybe when my strength is stronger, I can sense more things from the wheel of the incomplete genius. Maybe you figured out your mystery.”

This is a slow-down plan to delay the time. Combined with what he said before, this is already a very sincere and practical advice.

As for the future, Shen Lang does not want to provoke her, at least before she can confidently beat her, she will avoid it. Just like this time, but here, there is no need to face this.

First, let the flowers and fairys flicker and say, anyway, his human feelings have already been returned.

The Hundred Flowers Fairy is obviously a bit hesitant. She will catch up here. It should be after setting up the White House. I want to figure out the specific situation. Of course, I can't let Shen Lang be killed by a few of them.

But now when facing the Shen Lang, I did not think about how to deal with him.

In terms of reason, Shen Lang said that it makes sense. Even if it can be done, it can not be able to solve the problem by re-separating the wheel of the heavenly machine.

The key point is that she has just been in a few cases from Shen Lang. She feels that the possibility of the wheel of the heavens is greater, but it may not be true.

This can only be the case first.

Hundred Flowers Fairy nodded: "I could have helped you to improve your strength, but I don't need my help to see you and the last change."

Chapter 2329 - Counting harvest

Shen Lang opened his mouth.

With the foundation of Baihuamen, with the strength of Baihua Fairy, if she wants to help improve her strength, whether it is giving resources or directly helping, it will be no small gain.

There are great benefits. Anyone who instinctively wants to agree, and so is he.

But at the moment of opening his mouth, reason has recovered and he has made his own opening.

If you accept the help of Baihua Fairy, it is equivalent to owing a person. If you owe the human condition, you need to pay it back. Even if you don't pay it back, it will not be so natural if you have to do it because of the wheel of the sky or something else.

This time the harvest has been great, and I can't accept her gift again.

So when I got to the lips, I changed my mouth.

"Thank you for the kindness of the fairy. I am a young man. I still need a lot of trials and tempering. I dare not have the help of a fairy."

The Baihua Fairy is also seen. Shen Lang just wanted to help her, and then changed her mouth.

With a slight temper, she understood the way.

This young man is not ordinary! Last time he sent him a sachet, he immediately returned a unique portrait.

Now this time brought the daylight, and solved the trouble for her. She helped her, but refused to restrain it.

"Good, I will."

She said something profoundly and did not say anything more.

She looked at the waves like this and didn't leave first.

Shen Lang also took a set of words, and then took the dog god, and immediately went to the distance.

The Baihua fairy was seen in the back, which made him feel a bit like the feeling of being on the back.

“Are you afraid of her? Is she not a friend?”

The dog **** just started to see them as a man and a woman, and left a little to facilitate their speech, and did not listen to what they said.

However, with his familiarity with Shen Lang, he can still feel his emotional changes.

It is the exchange of consciousness and Shen Lang, and it is not afraid that Baihua Fairy will know.

Shen Lang also responded to it.

“Not to the extent of fear, just beware of her, or try not to provoke her. Legend has it that the flowers and fairy are almost the same as the existence of God. If you want to provoke, even if we add up, the price will be great.”

The dog **** was immediately silenced, and it also remembered the **** of light.

I thought it was angry at the beginning, and I went to Guangmingshan with Shenlang.

In the end, it still proves that people can call it the **** of light. It is indeed very extraordinary. Even now, even if it is strong, it is very promising, but there is no confidence to challenge.

“I am a friend with her, not an enemy, but the degree of my friends is limited. I am not sure what particularity she has felt in me. She may not be very clear about herself. I can’t take risks.”

When Shen Lang said this, the dog **** fully understood.

Tianshu space, this should belong to top secret!

It has consciously had no secrets, but now it is integrated with the mysterious poisonous grass seed, even if it can be directly used, and does not want to be sneaked into the deep reasons.

“strength.....”

The dog **** also made a sigh.

Insufficient strength requires such caution.

I wanted to come to this world for the first time. It followed Shen Lang and almost ran sideways! The enemies encountered, the strongest is not the big fairy, it can smash the other side directly.

A martial art like Tangcheng, with a sigh of relief and a sigh of relief, can destroy the entire martial art to a degree of seven or eight.

It's not that it's not working now. It's been a huge improvement, but the level of enemies is different.

A bright **** has already given it tremendous pressure and is the driving force for its progress.

Now the flower fairy has stimulated it again. If it is strong enough, Shen Lang will not need this attitude.

It's a while to leave the scope of the sea of flowers, or in the sea of grass.

After calculating it, I should probably leave the sensing range of Baihua Fairy, or guess that she should have gone back to Baihua Valley. Shenlang used the gate of the Three Realms and sent it directly back to Qiulin.

From the Qiulin sword to the Caohai is extremely far away, the range of herbs is also extremely broad, but because the transmission of the door of the Three Realms, directly to the flower sea, saving time for the road.

Because of the prediction of the wheel of the celestial plane, they quickly found the Baihua Valley, and they did not wait too long. The sable ancestors arrived, so the overall time spent before and after was not much.

Back to the Qiulin sword, naturally nothing happened.

Seeing that Shen Lang came back so quickly, Yi Buyong and Count Dracula were relieved. They also discovered that the white pheasant did not come back together, did not know what happened, but did not ask what to ask.

After the dog god, he immediately entered the state of cultivation and got some advice from Shen Lang. It is also a conscious independent cultivation. It is faster than the pure instinct absorption, and the utilization rate is higher.

It is also stimulated by strength.

Shen Lang himself is very calm, after all, the Baihua fairy is “almost close to God”, avoiding its edge is not shameful. His speed of progress is already the strongest speed in history.

Already back, there is no need to worry about whether Qiu Lin Jianzong will have any changes. Shen Lang can calmly organize all kinds of trips.

Purely in terms of interests, he used the tower of the tower to collect two vultures and Kuntu, and the vultures absorbed a lot of spiritual power.

The other three are for the dog ***** to eat, and more benefits are in the dog god. But now the dog ***** and his relationship are irreversible, which means that where to fight, it is not bad with Shen Langqiang.

Besides, Shen Lang himself does not need so much energy now, or else it will not be absorbed by the tower.

In addition to this apparent interest, he has two other interests.

The memory of the sable ancestors and vultures.

As the most senior ancestor of the Kunlun School, Ziyang once worked as a head. For the Kunlun School, and even the secrets of the world, there are many.

Before Shen Lang searched for information about their founder and the endless sea, now it is better to sort out other information and have a better understanding of the past history and current situation of the whole world.

And the vultures are different, compared with the purple ancestors, as if they are bright and dark.

The purple ancestors know and pay attention to, of course, the right way, and they are the big names of the righteous, like the middle martial art, he does not bother to understand so much. For evil factions who are active in the dark, understanding is very limited.

The vultures, as a sinister sect, are very familiar with this aspect.

Whether it is dark or underground, it is just a form. It is not that they really live under the “darkness of the earth”, but that the low-key is hidden from the light.

The evils of the evil faction also include two aspects. On the one hand, the practice of cultivation, or the process, the evil of comparison, on the other hand, the evil of acting means, so it is not acceptable for the right path.

But in terms of evil factions, there is actually a world in which they live, a more cruel world!

Chapter 2330 - Evil world

Reading the memories of both of them is outside the plan, and the original Shen Lang is not interested.

The ancestors of the sable, in order to understand his words, to see if he has bragging about lying, is a matter of concern to him.

However, the vultures were later read intentionally and intentionally, and the goal was clear, in order to understand the so-called “evil factions.”

This understanding is a kind of interest consideration.

Knives can be tools or weapons.

Powerful, you can barely bully, you can also provoke punishment.

From the contact with Shen Lang, the relegation of slaves and vultures is such a famous evil character. The dragon revives their gantry, which is a behind-the-scenes evil.

Normally, the evil faction should be inconsistent with the faction.

But in fact, it may not be the case.

The decent Cui, who can trade with the evils behind the scenes for the sake of profit, can hire the reedless slaves to attack the righteous. He himself is also the right person who lays out a large area to kill the famous people.

Tong Xian Weng, Zhi Zhi and others, including today's Zi Yan ancestors, are highly respected and decent high-ranking people, but for the sake of profit, they will go to set up a bureau to conceal the Shen Lang and attack the Baihua Fairy.

There are few sects in contact with the evil spirits. Among them, there is no righteousness, but there are many sects in the decent, but they have seen it again and again.

In the final analysis, as long as the interests are large enough, decent can also use whatever means.

Therefore, he will not simply divide the camp, or even from the exercises and means, he can also be classified as a evil.

Even, it cannot be simply divided by conscious attitude.

Even in some aspects of the more civilized world of the Earth, there is controversy about good and evil. There is a teleology, a result theory, and so on.

For example, the common villain set in science fiction movies is some crazy science circles. They use technology, nature, etc. to destroy the world, but their purpose is because human beings are rapidly deteriorating the environment and destroying the world for the sake of rebirth.

To eliminate the tyrannical life of half of the universe, it is also supported by many people.

From the teleology, they are not selfish, and they are the greatest good for the whole earth and the whole universe.

But for the countless lives that are to be destroyed by them, that is the greatest evil.

Supporters think that it is all others who are annihilated, and that they will be the winners of the survivors. If you and all the people you care about, will be the half that is destroyed, will you feel that it is a tyrant?

The Japanese did not feel that they were a bad aggression at the time. They felt that they were going to build a circle.

For example, the two atomic bombs that were thrown at the same time in the past promoted the end of World War II and saved countless people in the wars of many countries.

From the result theory, that is naturally a great good. However, the complete destruction of innocent civilians on a large scale is not inconsistent with the Holocaust, and it is extremely evil.

Even countless philosophers are also discussing the issue of controversy, and Shen Lang will not care so much.

So he judged according to his own standards.

If he does not provoke him, he will not take the initiative to engulf people and earn money into the tower. And to kill his enemies, he will not have any tangles, killing and squeezing in one fell swoop, is not polite.

This is his simple principle.

For the savior, the cui or the gantry, or the ancestors of the purple scorpion, Shen Lang did not have any soft hands, and never angered the true innocent people.

Now that he understands the world of evil factions, he is taking the initiative!

Before the evil school was not the key, but the enemy who wanted his life, all will be solved.

Now is the route that wants to go to demon slayers and slay evils. This is the way in ancient times, all Xian Xia and Yi Shi are such routes. Not only for the sake of the people, but also for their own resources, they can also make a name for themselves.

Of course, there are also some so-called demon slayers, in fact, hunting and killing beasts everywhere.

But not everyone is like this. Some of them will investigate and distinguish clearly. If they really want to infringe on the monsters of ordinary people, they will surrender and suppress.

If you don't do evil, you just warn.

It is precisely because of this, there will be a general "righteousness and evil" for the demon ghosts and aliens. For example, there are some ferocious, carnivorous animals, called beasts. Herbivore, which does not generally eat humans and animals, will be called a beast.

As an outsider who has a very limited understanding of the world, Shen Lang is not qualified to evaluate others, and is even less qualified to judge and decide the lives of others.

Of course, with the power of strength, it can also be decided at will, but if it comes from personal strength and preferences, it is hegemony, or sectarian practice.

Therefore, he really has the idea of taking resources from evil elements. First, you need to understand the situation and investigate everything.

In this regard, even the ancestors of the Yaochi event level may not understand clearly, and may follow the inherent impression.

The vulture is the real cut.

Because he himself is a sinister singer, so he has done all kinds of things, his friends and brothers have done all the things are more clear.

Last time I killed two this time vultures and Kuntu, two more. Counting up and killing four evil factions, but after combing the memory of the vultures, Shen Lang found that this is still not enough.

The evil sects will be dark and underground, and they will not be able to compete with the decent and powerful forces. Otherwise, they will come out and stand up against the court.

However, their power is also very large. The ancestors of the four great realms cannot say the tip of the iceberg, but they are only a part of it, and there are quite a few people who exist in evil.

The reason why these evil factions can live very well is precisely because they are powerful enough!

If it's just a vulture, they're a few of them, and the right way may be to annihilate them. A single sect must not work, but when it comes to the Yaochi event, as long as such an issue is added, it is enough for some people to jointly take the shot.

Just because they have a large number, their strength is not weak, and if they are annihilated, they have to pay a lot of money. Therefore, there was no shot, but an unwritten tacit understanding was formed.

That is to say, as long as these evil factions are full of interest and do not come out to threaten the world's famous big factions, everyone can close one eye and acquiesce that they have a range of activities, as long as they are not too explicit and too come over. .

For example, the emergence of the robbery alliance, the taboos of the major factions, threaten their power, interests, even if the Qiu Lin Jianzong is uncertain, it will certainly form a temporary alliance to suppress.

The evil factions also directly expressed their views: If there is no evil faction, how can you highlight your right path? If you don't do evil, how do you look good?

In their circles, there is such a tacit understanding, don't go too far. Otherwise, it will bring trouble to the right path. It's really going to be too outrageous, and they will even work in a way that doesn't help.

This is the rivers and lakes. There are rivers and lakes in some places, and black and white in rivers and lakes.
