

First Strong 2351

Chapter 2351 - Cold fire?

Shen Lang has not tried the power of this blue flame, just because it looks like a flame, and then it is particularly strange, so be prepared to give the heart a fire and see if this guy is picky eaters.

When Shen Lang put it out and let it go to the blue flame, the heart fire was a great disgust and retreated.

Before the fire of the earth, in the flame world outside the burial dragon valley, it absorbed a lot of flames and really had a meal. But behind the Shenlang is a retreat for a hundred years, it is also followed, already digested.

Now Shen Lang put it out, just want to make it a good meal.

It is also very difficult to feed this thing. Usually there are so many strange flames to feed it, but fortunately it is not rebellious.

Now there is a flame everywhere, and this is a blue flame, it is also a strange thing, it should be very appetizing.

But why is it going to be this reaction?

He can sense it, the heart fire is not afraid, but the feeling of disgust!

Are you not ignorant? It's good to have a fire for you, and even picky eaters?

It's just that this guy's mind is extremely low, and it's a little spiritual. It's only an approximate communication, and it's impossible to accurately express the specific meaning.

Seeing that it is really annoying, Shen Lang can only give up and take it away.

Then he was a bit strange, why is the heart fire disgusting?

According to its previous desire for fire, the stronger the flame, the more it fits, the stronger and more abundant the energy, the better it can help it evolve.

Now it reacts, does it mean that this is not a general flame, or even... not a fire?

Shen Lang will identify it as a flame, because the shape is like a flame, and the whole environment seen around it is like the flame world that Dragon Valley has seen.

But he did not actually test it. He just felt that the more and more strange flame should be more attractive to the heart.

It seems that it is necessary to test it now.

This test is very surprising to him!

After the monitoring of the Holy Grail, whether it came out from the ground or flashed in the air, these blue bonfires were extremely low temperatures!

Because the golden coffin was opened, there was a chilly breath forced out, and it became more obvious after this side, so Shen Lang did not think much. I felt that these blue and strange flames were low in temperature, which was caused by special circumstances.

Now this monitoring, only to find that these flames are far below the phenomenon, has been minus 270 degrees Celsius, almost approaching absolute zero!

The previous judgment is the opposite. It is not because the world is chilly, so that these flames become low-temperature flames. It is very likely that these ultra-low temperature flaming things lead to the low temperature of the whole environment!

Shen Lang is going around, and is not close, plus the realm of the current peak of the gods, the cold and heat have not invaded, and the judgment is wrong, there is no special attention to the temperature.

But the earth's heart is not the same, it will absorb the flame, naturally it is high temperature. Although it is not necessarily the higher the temperature, the better, but this is almost absolutely

zero-degree flaming stuff, obviously not its dish. It feels as soon as it comes out, so it will be disgusted.

Shen Lang continues to collect this information through the sacred sac, and gradually enriches the database of the world, but it is impossible to know what it is.

And with such a low-temperature flame-like body, he is also vigilant and does not casually touch common sense.

He thought for a while, and suddenly he had a candidate to consult!

Or... can't say "people".

"Raytheon, you are extraordinary, you know more, don't you know what it is?"

Shen Lang tried to communicate with the palm of the source.

Seeing what you know, of course, is to boast a high hat in the past. It should have never left Xiaoxian Island before, and it is followed by him to see the world.

But it is a congenital spirit, and perhaps it is not necessarily known about this blue bonfire.

Lei Yuan took a while to respond to Shen Lang.

"This is really not a common thing. Use your words to get used to it. It can be called a cold fire. You have to be careful, it is a bit dangerous."

"Thank you for Raytheon."

Shen Langdao thanked him, but to be honest, Leiyuan did not provide much information.

A little dangerous, this Shen Lang knows that as far as using his words, he is called "cold fire", but he doesn't mean anything. He can also call it ice!

However, it can be seen that Leiyuan has no understanding of this “cold fire”, but it can be made cautious, it is really a little dangerous.

Shen Lang is a little worried about the dog god...

The coldest autumn has the longest time and has a wealth of life experience, and naturally it will be very careful. And he is the strongest, and he can deal with it with any danger.

Dog gods take advantage of the body and ignore many dangers. If they fail, they will suffer.

But there is no way. Now he can't know where the cold autumn is sent. The dog **** has black technology locator tracking, and the holy armor can locate it, which is also far away.

I just tried the way to avoid these cold fires, and I can't achieve the quick effect, it is difficult to meet the dog god.

However, when it comes to peace, the dog **** is now very strong, and after being almost killed by poisonous grass, it should be very cautious.

At this point, Shen Lang did not think much more immediately began to go in the direction of the dog god.

His speed is not fast, but it is only relative. Compared with the limit speed he can reach now, it is not fast, but the actual speed is not slow.

The cold fire in the air flashes irregularly. The faster the speed, the greater the chance of hitting. It is even harder to avoid it.

But the basics of the ground are fixed. With his current ability, he can do whatever he wants with his eyes closed. What he really needs to pay attention to is the cold fire that volleys down.

This continues, so that the Holy Ghost will collect as much information as possible.

I have been on the road for nearly a thousand miles, and I have seen it all in the air!

Before being randomly transmitted to every place, I saw this cold fire. It can be seen that this world is full of strange fires.

Shen Lang is a little intolerant, what about the Mozu?

What about the Devils Army?

Doesn't it mean that you can summon the demon king, can you have the invasion of the Mozu army?

Just exile people to the magic domain, and then can't go back?

Shen Lang is staying on a mountain at this moment. He does not need to rest. He stops here because there is no cold fire nearby, and it has been observed for a while, and there is no airborne fire.

Then he took out the golden mask!

The world is not small, and there are many places randomly appearing. It is rare to see a person who has never seen a person in such a way.

He decided to use the golden mask here to see what effect it would be.

Chapter 2352 - Mask new discovery

The golden mask, Shen Lang has also been experimented many times, but it is only more familiar with it, and there is no breakthrough discovery.

In the gold coffin, wearing a golden mask will not be transmitted, this has been verified many times.

How do they interact with each other and don't care, after that?

After the golden mask is worn, the soul **** swims out. Will the dark world be real, or is it a fantasy of pure spiritual injury?

From the time record, it is very likely that the latter.

Now Shen Lang is ready to verify it here. Anyway, it has gone so far and there is nothing to gain.

I chose this place because of safety, but he did more security protection before wearing the golden mask.

There is a deep understanding of the funeral dragon valley. Most people and aliens can't enter. Even if the dragon is resurrected, it won't go to the area that has just entered, so it is not afraid to leave the gold coffin there before.

But here, these cold fires are irregular, even if they have just been observed for a while, there will be no flames coming here, and there will be random accidents.

Therefore, Shen Lang was on the top of the mountain at the moment. He waved a small shovel and dug a cave-like existence. After he entered, he put the temple out.

In this way, the mountain is the first layer of defense, the temple is the second layer of defense, plus his own third-level defense, but the cold fire close to absolute zero is randomly coming over, there will be no problem. .

When it was ready, the deep waves in the temple building were calmly put on the golden mask.

In an instant, everything around has changed!

Shen Lang is ready to continue the soul journey, anyway, "God tour" for a long time, but only a few seconds, will not delay any time, see if you can ponder and find something.

This time, it gave him a big change experience!

The whole mask, as if it was alive, was completely fit on his face, and there was a change, as if he had made adjustments to his face.

Such a 20-pound gold mask, completely fit on his face, just like applying a layer of film, although not used to it, but it will not fall.

It was only a part of the eye that was vividly sketched. Now it seems to be open, and it is possible to see everything in front.

More importantly, at this moment, he is not the soul ***** to swim out, but the eyes directly see the temple building, whether it is the five senses or the gods, can clearly sense the reality around!

Before he tested the golden mask again and again, what he wanted was this effect!

The current effect makes Shen Lang excited, but in fact, it makes no sense to calm down.

Now I can see and be able to sense the surroundings. This is what I should have. It is the most basic thing. I have not seen anything special.

However, before it was completely isolated, there was only a direct touch, and then the feeling of the soul of the gods, completely in the dark world, in contrast, now is like a new discovery.

There are other possibilities when there are changes.

Shen Lang immediately continued to sense the surrounding.

The effect is still the same as before, “the soul swims” out. But before it was completely in the dark, it seemed to have left very far, but there was no discovery.

Now it is different. The way the soul swims is more rapid and wider than the sensory sense of the gods. It seems that you have already collected all the hundreds of miles in an instant.

Shen Lang continues to extend out, either expanding to the surrounding area or going in one direction alone.

He estimates that he has reached at least a thousand miles away, and everything, no matter how small, seems to be completely clear to the heart, and that feeling is still very good.

This is a bit like a mobile phone or a map on a computer. It can be pulled far away in a moment, or you can continue to zoom in to see a specific point.

After trying it out, Shen Lang will aim at the direction of the former dog god, and then go out in this direction.

If he can see the dog god's every move in a very remote place, there is really a God perspective.

Going forward is very fast, because the environment is almost the same, he does not need to look carefully, just try to go far away.

When it was about a few thousand miles, Shen Lang felt the pressure!

Because it is the soul ***** to swim out, this is the world of consciousness, and he can't make the sacred armor distance measurement. It can only be a general feeling, or it can make this feeling let the sacred armor estimate.

Such errors are enormous, but in general, they should be more than three thousand miles.

The pressure that is felt is the pressure on mental strength.

Shen Lang did not stop, and continued to move forward quickly, and it became clearer immediately. The farther away, the harder it will be!

This is still a direction. If it is spread out to the surrounding area, although it will not be like the gap between a line and a circle, the larger the area, the more it will be, and it will not be able to reach that far.

Shen Lang's mental strength is very powerful. He is not afraid of stress. What he needs is to challenge the limits.

Finally, at least twice the distance to the distance, the pressure has become huge, and it is difficult to move forward.

If you continue, you should still be able to support a certain distance, but it is estimated that it will be a few hundred miles. The relationship is not big.

Shen Lang also has a rough analysis, he should be able to sense six thousand miles away! But this is almost the limit, and it is also an achievement for one direction.

And in the process of recycling, the degree of effort is also reduced, and within three thousand miles, there is no pressure.

Six thousand miles naturally can't reach the dog god, Shen Lang just did not expect it, just try it.

Three thousand miles and six thousand miles, this is only a rough estimate. In fact, the gap may reach several hundred miles or even thousands of miles.

If you want to further confirm a specific point of data, you should verify a known route.

This is a new world with little data, a magic field that has not been explored before, no known maps want to verify with a certain distance, naturally more trouble than the earth.

but.....

Didn't you just come over nearly a thousand miles?

Shen Lang immediately thought of a good plan. It is an unknown area in the past. Naturally, it is impossible to compare the specific distance.

But in the back, the route of the past is in the past, and that is the exact data!

This time, he changed his direction, and when he came and went, he extended his hand and distracted the trajectory map of the sacred armor. Through the image recorded by the sacred armor, he completed a coincidence of speed and distance.

Because they are filled with the chilly world of cold fire, it is difficult to distinguish it by memory. But when placed on a large distance of thousands of miles, there will always be some special places that can be used as reference objects.

For example, the hill that stopped the sinking wave now is a little different from the surrounding.

After a burst of contrast, the two data of one true and one “false” coincide.

Chapter 2353 - Huge castle

When the picture seen by the soul of the gods coincides with the picture recorded by the holy armor, the data is clear.

Shen Lang continued to extend to the back, this time when the beginning of a feeling of difficulty, the data of the sacred track is about 3,500 miles away from him.

There is no need to verify it later. If it continues, it should be about seven thousand miles or less, or less than seven thousand miles.

This is already an incredible distance.

When Shen Lang is in the realm of the Great God, the distance that God can sense can be in the tens of miles, and the limit may be around a hundred miles.

Now that I have reached the peak of the Great God, although I have not tried it, it is estimated that it can reach several hundred miles.

But that is also impossible to compare with the effect of this golden mask.

When he retracted his thoughts, he also thought about what it was all about.

The golden mask is an auxiliary sacred instrument. Is its ability to increase the number of gods by several times or even ten times?

It is not impossible to think about the functions of the Three Realms and the Kunlun mirror.

However, in the specific implementation method, it may be a little different from the sensory sensory.

“Soul God Tour” is the feeling of Shen Lang in the dark state, thinking of such a description.

In the darkness, although nothing can be seen, the reverse is more pure and will not be disturbed. So I didn't see anything, but I felt that the soul had left very far.

It is now clear to see everything, feeling that the soul has not left. But Shen Lang estimates that the way is the soul tour!

It is equal to saying that he has just come out of the soul, or that part of the soul is out of the way, to the distance. This can be far better than the sensing range of the gods, and the greater the pressure, the greater the pressure.

However, the specific method is not tight.

Whether it is a magic weapon, a sacrament or an artifact, it is essentially a human tool!

On the earth, scholars have defined that people can stand out from the animals and evolve into the hegemon of the earth as a high-level animal. One of the iconic changes is the use of tools.

Through tools, one can play a role far greater than the individual, from the earliest rolling wood, pulling cars, to rockets, satellites, etc., are human use of tools.

The same is true for magic weapons. You don't need to know how it is designed, how it works, behind-the-scenes principles, etc., which is understood by professionals who refine the magic weapon.

Those who use magic weapons only need to use it.

Children who don't understand circuit wiring at all, as long as they know how to press the switch, they can turn on the light.

Now this new discovery, at least, has made the golden mask no longer a chicken rib, but it is really useful.

But it is also certain, this stuff is to be useful here. Otherwise, it's still a chicken rib!

Sure enough, it is to be used in conjunction with the gold coffin.

What if the gold coffin is used here?

Shen Lang has a bold idea. When it is used in the funeral valley, it is directly transmitted to the world of this magic domain. If it is used in the magic domain, will it be sent directly back?

But soon he denied this conjecture.

Because this is the death sacred instrument that came from the earth. It was originally the Tutankhamun Pharaohs era thousands of years ago. It brought the mainland world of Nakajima and can be used in the burial dragon valley, indicating that this is a directional transfer magic weapon.

Although the specific place is random, no matter where it is used, the target is the world called the magic domain.

Going back is not the same. It is used here, is it sent back? Going back to Earth?

Therefore, Shen Lang does not have to verify the brain axis, so as to avoid unexpected accidents that are uncontrollable.

Now wearing a golden mask, you don't have to take it off, you can easily understand everything within a thousand or two miles.

There is a limit to the scope, and it is impossible to explore farther places. The soul has not been able to swim so far, because the flesh is still here.

But the human body can be moved, so that it can continue to move forward!

Shen Lang did not put up the mask, so he closed the temple, and then continued to go in the direction of the dog god.

Wearing a golden mask, he found that the road was easier.

It is not the speed increase, but the perception of the cold fire is even more clear. Moreover, the scope of the induction is extremely large, and there are dense areas in front, which can be circumvented in advance, and there is a cold fire that falls over the air, and can also be avoided.

Because the Shenlang did not follow the limit, and even did not reach the pressure zone of about 3,500, control the distance between one and two thousand and spread out to the surrounding.

In this case, you can search for a larger area, rather than a simple line, something is easier to find, and there will be no greater pressure.

In this way, he continued to hurry for about five thousand miles before reaching the limit that was sensed before!

Five thousand miles and five thousand miles.

Now this is a large area to explore the past. But the strange thing is that there is still no gain!

This magic field is not in line with his imagination.

Could it be that this is an abandoned world?

What is the demon king and the demon army? In fact, it has already been destroyed for various reasons.

If this is the case, then it is really a bit lonely!

But then again, on the earth, it is also an ancient civilization that has already been destroyed. The earth is now a modern technological civilization, or it is a bit different.

It has not been harvested for 20,000 miles, and the Shenlang people are relieved. It also means that the dog **** and the cold autumn will not be much dangerous.

Just to explore a new environment, it is better to search for both of them and bring them back together.

The result was a flattering mentality, but it was less than a thousand miles away and there was a new discovery!

Plus the distance between the golden mask and the gods, that is, about 23,000 miles from the place where they came in.

Finally, there are different discoveries. Shen Lang not only speeds up a little speed, but also the soul tour has fully focused on the past and completely observed the area.

It turned out to be a castle, a huge castle!

When I walked for 20,000 miles, I didn't see a place where people smoked. Suddenly I saw a castle. It really made Shen Lang excited.

The castle is very large, like a huge circle covered with a very high spire in the middle.

In terms of scale, this should be a town-like complex, but from the outside, it is a huge castle.

Now Shen Lang can only see its outline and can't sense the specific situation inside.

This is already very good, no matter what is inside, you can look at it.

Shen Lang immediately speeded up. Now that he has a goal, he does not need to continue to explore the fixed range. Instead, he concentrates on that piece and soon discovers that there is no cold fire in the huge castle area!

Dear, click inside, give a good comment, the higher the score, the faster the update, it is said that the new wife who found the perfect score has found a beautiful wife!

Chapter 2354 - Entry gate

After walking through such a vast space, I saw the cold fire flying everywhere. There is no cold fire around this huge castle. It is a rare environment.

But think about it is normal, a giant castle as big as a city, no matter who built it, it can not be born, it will also find ways to shield the cold fire, in order to make everyone safe.

When I arrived near the giant castle, Shen Lang came directly to the gate.

All the way over, it has been observed very clearly, and in the near eyes, it looks very shocking.

The building that is so big in a town, Shen Lang is still the first time to see it, the earth is not so huge.

However, it is not enough to shock him, because there are also huge buildings in the river basins, which may not be so big, but more magnificent and magnificent.

In the huge building of the Yungong Holy Land, each floor has a length of ten miles and a height of five hundred meters, which is also very spectacular.

This building is not like a castle on earth, because only such a building, Shen Lang called it a castle.

The base around it is square, and when it is above, it is gathered into a bowl of inverted buckles, and in the middle, there is a tall erected spire.

A bird's-eye view from afar, the middle spire is like a lightning rod, but because it is very large, the columnar spire is actually tall and large.

At the gate of the Shen Lang at the moment, the gate of the castle in front of it is also huge, and the closed state is like a mouth of a huge monster.

Before Shen Lang came over, I had already sensed everything here. But now it's a bit of a glimpse when you look closely at the naked eye.

Because on this gate, he saw some familiar sculptures.

Snakes, hawks, and the like, like the carvings on the golden mask, there are some patterns of words or symbols, similar to those carved outside the gold coffin.

This should be some kind of connection...

Is this the gathering place of the demon community?

Thousands of years ago, people from the Mozu had traveled to the earth, leaving behind, or pointing to forging gold coffins, golden masks, etc.?

Or thousands of years ago, the self-cultivators of ancient civilizations came to this world, got a lot of or learned, so they only spread?

These mysteries can only be known by entering this castle.

This huge building, similar to the building on the top of the Yungong Holy Land, is very isolated, and it is impossible to sense the situation inside.

This is a bit of a tangled place.

This is the territory of others. If you can get in, how to get in is ignorant.

If you really want to get in, it is best to consolidate the cold autumn and the Emperor's behemoth, that is enough security. Otherwise, it is a deep wave, and there is no absolute confidence.

Who knows if there are big bosses of the same level as Bright God?

In case he is trapped inside, the cold autumn and the dog **** are even more difficult.

Of course, Shen Lang thinks that he is still more likely to escape from performance.

The problem is that now for the two of them, one is in a very remote place, the other does not know where it is, and can not be contacted.

After finding them both, come back again?

This is a better way, anyway, there is the positioning of the holy armor, or you can find it back here.

On the one hand, Shen Lang has been searching for more than 20,000 miles. It is hard to see such a building. I really want to explore it right away.

On the other hand, who knows if there will be any changes? If there is any hidden way in this castle, it will appear here now, and it may not be here again after a while, so it is a pity.

After thinking about it for a while, Shen Lang decided to take a look!

If there is a god-level powerhouse, then it can only be a confession, and decisively flee into the space of heaven. In the presence of the true God, perhaps hiding into the space of the heavenly book, there is only one chance, and with the defense, it can be intercepted.

And the door of the Three Realms can be used, and it is not too big a problem to escape from here.

But how do you do it?

Going into the door?

The front gate of the castle is undoubtedly very strong. It should not only be the closure of the surface, but also a deeper defense.

But if you want to harden it, Shen Lang is also sure that the sword of the king can still cut its violence.

However, in an unclear situation, it is not always good to mess around on other people's sites.

Normally, he should have not been close, and he knows it. Now he paused here for a while and did not attack him. It seems that the other party is not too malicious, and maybe he is watching him at this time.

In response to this, Shen Lang immediately stood in the middle seat in front of the gate, then shouted at the opening.

“The Terran is sinking, passing by here, I don't know if I can open the door...”

As a result, the door has not yet finished, and the door has reacted and started to open slowly.

This also confirms that some people are observing him. Since the door is opened, it means that the other party has released goodwill. There is no need for much more.

Because the castle is too big, even if it is compared with the castle, the main entrance is just a small door, and it is far better than the common city gate.

So it didn't have a complete approximation. It opened a distance of about three or four meters and stopped.

This should be an invitation. Although there is no opening, but the door is already open, can't wait for people to greet it?

"Thank you!"

Others wait for the ceremony, even if it is possible to ritual after the ritual, Shen Lang must also polite first thank you.

When talking, Shen Lang walked into the past.

He can't show the rush into it, lest he be felt that he has ulterior motives. A normal big step will make you look more polite.

But he also maintains absolute vigilance and defense!

This is the tightness of the outer pine, the surface is very friendly, and there is no cohesive force defense, but it is ready to break into the space of the Bible at any time.

This is also the true God level of the anti-light god, or the sneak attack of the true fairy level, other general attacks, he still had time to react.

When Shen Lang walked step by step into the gate, the huge gate was slowly closed.

It just opened three or four meters, and it took a few seconds to slowly close.

After Shen Lang entered, also slowed down a little, and then did not secretly observe, just looking at the situation inside.

Because when you are outside, you can't sense the inside, so what you look like can only be guessed.

In terms of scale, this giant building has a distance that covers a city. He suspects that it is a city, but for the sake of defense – such as the cold fire, a large cover is added outside.

There are some castles on earth, or earthen houses, and so on. It is also a building outside, and everyone lives in it.

Even if the form of the Mozu is different from that of the people, it is like a cave in the valley, and it has been guessed.

However, after seeing it, Shen Lang was greatly surprised. This is a picture he never thought of!

Chapter 2355 - Ancient echo

Shen Lang did not think of it, inside the huge castle, it was a desert!

Covering such a huge building, there is a desert inside, the builder, is there sand in his mind?

He really can't figure out this brain circuit.

But when the entry comes in, the back door is closed, or explore it inside.

Perhaps this desert is just an illusion and an illusion. After all, it is so powerful to cover such a huge building, it is also isolated from the outside world, and it is to protect what.

Even if it is a desert, it should not be a simple desert.

Looking into the distance, the eyes are all deserts, and to the back, it is the huge city gate, and then look at the two sides, it should be the wall directly facing the dome.

But now there is a bit of an abnormal situation. Except for the door that has just been closed, the walls on both sides seem to be gone!

The dome that goes directly to the top is not there anymore!

Looking at the past on both sides, it is also a desert, and looking up, it is directly to see the sky.

Look at the back door again, like something like a large castle arch in the desert.

If you send it here randomly, Shen Lang will be a bit confused, but he just came in from the door, which will not be confused.

According to the outside situation, there must be a thick wall on both sides, and you should not see the outside, and see the desert outside.

He immediately thought of a possibility!

These walls are like mirrors. The desert that you see is not the outside, but the mirror of the desert inside.

Because the deserts are all the same, it is easy to be confused if you can't carefully check and check.

This method is also commonly used in human decoration. Through the mirror image of the mirror, the effect of widening the space is probably presumed.

This huge building, even if it is covered by a city, is limited, but through the mirror image, the visual effect is an endless desert.

As for the sky seen above, it is similar to the simulated effect, there will be no feeling of being trapped inside the building, but like being in the real desert outdoors.

To spend such a big price, we must create such an environment. We must say that this master has the ability to be willful.

As a result, Shen Lang also needs to change his mind.

I thought that there were no hundred thousand and eighty thousand, and there were hundreds of thousands of magic troops. I never thought of it as a desert. I still don't know if anyone, there is no living thing!

That would be a lot easier for him, and he didn't have to think about dealing with the army. If the original owner is already dead, it will be more secure. Here are some good treasures that can be searched and taken away.

This thought, Shen Lang has been a lot easier and excited.

But just now he was able to be put in with an opening, indicating that there should be people here, or to be vigilant!

When I was outside, I couldn't find out about it. Now that people have arrived, it is normal to isolate it. It should be easy to sense everything.

When I first came in, Shen Lang was stunned by the desert. It was only a naked eye, and now it's only beginning to look up.

As a result, it was found that the range that can be detected is very limited, probably a few hundred meters, which is far from being sensed!

The way of the soul tour including the golden mask has no effect. Don't say that the induction is thousands of miles away, just a few hundred meters away, there is no way.

In this way, in this desert, there is no large scope for the naked eye.

Shen Lang has had the experience of Yungong Holy Land, and there is no fuss. It should be a similar environment, or a similar way.

So he immediately began to move forward quickly. Just before he arrived, he had already calculated the approximate area through step by step observation and the assistance of the Holy A.

If there are many small buildings in this large building, it will increase the search work, but now it is a large desert, it is much easier, there is no problem in a carpet search.

In the desert, it is not easy to identify the direction and distance, but it is only for ordinary people.

There is a sacred auxiliary wave, let alone the direction and distance, and wherever it is, there is a fairly accurate estimate.

His goal is the middle of the place!

The building is simply divided into three parts, the lower four sides, and then into the middle, on the top of the dome-shaped dome, and in the middle of the dome is a columnar apex with a lightning rod.

This may be aesthetically pleasing, but more likely to be functional!

Moreover, if there is really a city hidden in it, there will be various internal buildings, and the most important places such as the palace may be constructed according to different needs.

But this is a large desert. If there is any baby or something special, it will definitely not be a casual corner, but more likely in the middle.

Needless to say, the pyramids of the sea in the world at the end of the sea, there is also a pyramid inside, is to connect the heaven and earth cosmic energy, and the tip is facing the upper entrance, and then the top is the center of no return to the sea.

According to this judgment, Shen Lang searched for the desert center inside the building.

The result was not close, he was once again stunned.

Is this a full set of acting?

The desert has it, and the middle of the desert turns out to be a pyramid!

When I saw the desert, Shen Lang didn't think much about it, but when I saw the pyramid again, I couldn't think of it.

This is a further confirmation. It is indeed a direct connection. It is that people who don't know the demon domain have gone to the earth, left the pyramid building, or the ancients of the earth came here, and then copied the environment here and went back to build it. pyramid.

From a historical perspective, the pyramid is to be more ancient. Tutankhamun is only a generation of pharaohs, gold coffins, golden masks, etc., which are far behind the pyramids.

No matter which kind of contact is in the more ancient times.

In a short while, Shen Lang came to the vicinity of this pyramid and looked up close, which is undoubtedly more beautiful than the surviving monuments on the earth.

But it also makes it empty and magnificent, but there is no vicissitudes of ancient taste, just like the modern technology has just been built out, the beauty is beautiful, there is no underlying feeling.

Of course, this is only the impact of the initial perception. Shen Lang can imagine that this will definitely not be less than a few thousand years of architecture, but it is well protected.

Looking down from here, the tip of the pyramid is directed toward the sky, but Shen Lang knows that there is a covered dome above it, and above the dome, the huge column-shaped spire of the lightning rod should be directly opposite the pyramid.

That should be the antenna function of the energy harvesting amplifier and collector.

Chapter 2356 - Sand man

Just as Shen Lang was watching around the pyramid, the surrounding desert suddenly changed!

During the time, the sand condensed and stood up at a rapid rate.

In the process, Shen Lang restrained the idea of crushing them and waited for them to change.

After a while, what appeared in front of him was like a sand man!

And then, these sand people are completely materialized and become living people.

And around the pyramid, there are such sand people, and everyone gathered in his direction.

In a short while, in front of Shen Lang, there have been nearly a hundred sand people.

The data scanned by the Holy A is the number of ninety-nine.

Whether it is the data of the monitoring of the holy armor, or the feeling of the sinking waves, these are not the sandless people who have no souls in the sand, but the living people who are really ***** and fleshy.

It can only be said that in the past, some kind of secret technique was used to change them into the form of sand and hide in the desert.

The ninety-nine sand people gathered quickly, and the goal was naturally Shen Lang, but they did not attack and did not show direct hostility.

Therefore, Shen Lang is also watching its changes.

“Welcome to the return of the king! King of the world!”

Suddenly, the ninety-nine sand people gathered together, screamed in unison, and then all half a bow.

Shen Lang glanced at them. What is going on?

Welcome to the return of the king, the king of the world?

He is greeted, but it is not him, but their king, who they call the king of the world.

With the age and length of Shen Lang, it is impossible to be mistaken, and it is impossible to have a person who looks exactly like him in the demon domain.

It is also unlikely that there will be some time and space paradox.

However, immediately after the Shenlang is dumb, I want to understand what is going on.

Golden mask!

From the pattern signs at the entrance of this huge castle, you can see that there is a close connection with the golden mask and the gold coffin.

And here there are deserts and pyramids, which proves even further.

Now he is wearing a golden mask, this may be a token!

In the absence of the true face, these unidentified sand people looked at the golden mask and regarded him as the returning king.

Where did the king go? Where did you return?

Did you go to Earth thousands of years ago?

Is this a mask left? The symbol of the king? Or is the Tutankhamun Pharaoh copied according to the “mask of God”?

No matter what, now he must first pretend to be the first thing possible to understand the situation here.

Since he does not know what style this “King of the World” is, he is not convenient to speak now, and it is not convenient to express anything.

And under his “indifferent” voice, all the sand people kept a half-hearted posture and did not dare to move.

If it is really a sand man, Shen Lang is not awkward, but if these sand people only hide their identity, there will be more room for operation.

Shen Lang immediately released a strong spiritual power, directly covering them with ninety-nine, and strongly suppressing them.

For a moment, he felt that they were full of fear and awe, but everyone remained motionless and did not dare to resist.

This Mawei came out to show his strength so that they could be more confident. At the same time, Shen Lang began to choose a previous goal, and he added his control to read his memory.

These ninety-nine sand people are hiding in the vicinity of this pyramid. From appearing to just lining up, they don't see the lead. It seems that everyone's identity is almost the same.

Therefore, Shen Lang just picked one of the nearest ones. According to what they know, they should all be the same.

Everyone has been suppressed by death, and this one that has been read and remembered has no more resistance. When the king's mental strength is over, he does not dare to have any resistance.

Shen Lang read his memory very easily, and then quickly combined consumption, to understand how they are in a situation.

Time will definitely not be too much. If it doesn't respond for too long, it will naturally make people doubt.

However, just after the crackdown, Shen Lang is also about to understand their strength, these sand people are only the strength of the big fairy realm.

With him now the peak of the gods, the two realms of the Great Xianfeng, the Great God, can be said to be very far away, very negligible.

Of course, if you don't compare with Shen Lang, the ninety-nine big fairy strong, that is a very powerful team.

Now their strength, Shen Lang can still be controlled, and he has just come to a Mawei, strong suppression of them, so that they have been pre-emptive, more confirmed that the return of the king, then you can delay a little more time.

In the realm of the current peak of Shen Lang, it is equal to the computer that has upgraded the CPU and memory, and the speed of processing data is much faster. Whether reading or digesting the memory of the sand people, the whole process is very fast.

Shen Lang quickly passed through all his memories, screened out trivial memories that were not important and irrelevant, and made a sort of key things.

In this way, finally have a general understanding of this environment.

According to the information about the gold suit of the snake ***** Kemrisu, Shen Lang called it a magical domain, and in this memory of the sand people, their world, of course, would not call their own world a magical domain.

They are called the ancient cold world for this world. The flame-like objects that can be seen everywhere can be called absolute fire. This is similar to the cold fire called Shen Lang and Lei Yuan.

The place where they are now is called the country of sand. To say that in a broad sense, the boundaries of the sand country, then tens of thousands of miles, or even wider, can be regarded as theirs, there is no other person anyway.

But the really active place is the desert area inside this huge castle.

These people of the Shah State, for their own kings, are called the king of the world, and the king of the sand kingdom is also the king of all the ancient cold world.

As for the ancient cold world, there are no other countries, other kings, this sand people do not know about the history of their country of sand, his memory is not very complete, Only know that the king is supreme, they must worship respect, and without special orders, they are not allowed to go out.

Because the outside of the cold, touched, it will also swallow them.

Staying in this desert, their daily work is to guard the pyramid of the center.

All the people of Shaguo are not just these ninety-nine, but others will fall asleep in a sand-like way, which is a way of similar to hibernation and practice.

Because they want to guard this place, they still have to wake up at any time when there is a situation.

The king of the ancient country of the Shahe Kingdom is living in this pyramid, and only the king can live inside!

Chapter 2357 - Exploring the pyramid

In these sand people – they are the people of the sand country, Shen Lang still manages them as sand people. In their impression, the king of the world is supreme, is a godly existence, they dare not monitor and try to figure out of.

Of course, the traces of the king are not what they can know. Even the true face of the king, they have not seen it.

The look of the king that I have seen is the same as the golden mask like this!

In fact, the masks may be similar, or similar, but because they have never seen the second, and no one dares to imitate and wear the mask of the king, so seeing the waves with the golden mask, no need for any Proof, it is considered that the king is back.

In fact, it was not the return of the king who left thousands of years ago, and even when he left, they did not know.

Sha people's time and life, lifestyle, etc. are not the same as humans, so they cannot be easily converted by human means.

For example, before Shen Lang came over, they were the form of "sandification" that was integrated into the desert. It was so dormant and cultivated. After one year, ten years, or one hundred years, there was no obvious change for them.

Therefore, even if Shen Lang has their memories, they can only have a general impression. Regarding time, they still cannot grasp clearly.

“You all retreat!”

After a preliminary understanding, Shen Lang immediately released a consciousness to all ninety-nine sand people.

This is to command them in awe-inspiring way, so that they do not dare to defy anything.

And he can also feel that the sand people who had just been suppressed by him, when they heard this, were a little relieved. They were very awesome to the king, and they were afraid of annoying the king.

After feeling the order of Shen Lang, they once again bowed to the ceremony, and then dared not to blame any other, in the direction of the direction, once again dispersed, including the recent batch, and then scattered into the desert like sand Among them.

Shen Lang sent them away, but they were still a bit embarrassed.

He is now disguised as the king of the sand country, but the memory of the sand people is not equal to the memory of the king!

Some of the information he knows about the sand country and the ancient cold world are also common knowledge. There are many secrets, and only Wang can understand.

The most important thing is that Wang lives in the pyramid. Others cannot enter or even get too close to the pyramid.

From the memory of the Nasha people, there is naturally no way to enter the pyramid.

Shen Lang can't enter the pyramid, and it doesn't say whether it will make the sand people suspicious. It is impossible to have more gains.

Unless he summons all the sand people, then use them as materials to absorb them into the tower...

However, Shen Lang does not care about this, because the sand people have been sent out, normal will not pay attention to his movements, he can have more time to study.

Now he has basically confirmed that he can enter the outside door, not that someone inside has heard his words open the door, but the golden mask has played a role!

The door, probably made the "face recognition" of the king, so when he stood in front of the gate with a golden mask, he "scanned" to the golden mask, and the "face recognition system" regarded him as the king of the sand country. Naturally let him in.

If this is the case, then is the opening of the pyramid, as long as the mask is on the face?

In the memory of the sand people, the king never disclosed the true features of the source, and all appeared in masks. The golden mask is a symbol of his identity. Will this pyramid be the same?

However, when facing the gate, there is only one direction, and he is not interesting. It has been scanned. It is not easy to find the area of "face recognition" from the huge pyramid.

He still likes the simple and rude way, such as using the sword of the king directly, cutting the pyramid into an entrance...

Of course, this is just a reflection. This pyramid is certainly not just a palace-style residence, but a large gathering place for energy. There should be many possibilities.

He immediately flew up, flew around the entire pyramid, and carefully observed all three sides. In addition to his own knowledge, the Holy Ghost was also photographed in HD.

The result is that there is no trace of any entrance!

Looking at it in a rough way, I just think that it is very beautiful and gorgeous, just like the high-tech new imitation. Now look carefully, and even found that it is as smooth as a mirror, even a trace of the connection is not!

The entire huge pyramid is like a huge stone, cut out at the same time. Even the stone has lines, as smooth as a craft, but magnified countless times.

Although the sand people have been sent, but Shen Lang still has some defense, just a circle, is to maintain the attitude and style, just like a king is visiting his palace.

But this can't be patrolled round and round. In this huge castle, it is safe and doesn't need to be checked.

But he doesn't need it. He has checked all the details again and again, and he can't see the traces of the entrance.

This is the same as seeing the Temple of Heaven in the ruins of the ruins. In fact, there are traces, but the seal is very good. If you cover up well, you don't know the organs. If you look for it, it will be a laborious process. Need to try it one by one.

The last time Shen Lang sent the obelisk, and did not go to see the pyramid at a close distance. The vicissitudes of the weather-filled vicissitudes did not attract much to him.

But the sea is in the pyramid of the underwater world. He has been above it and has gone to the bottom.

Therefore, judging from that, Shen Lang thinks that the organ of this pyramid may be at the top, and what is living inside should be at the bottom of the tower.

This kind of judgment is an analytical guess that combines the feelings of the heart.

These sand people are so revered for the king, and standing at the top of the pyramid can undoubtedly bear all aspects of worship.

It's just that in the memory of the sand man, I didn't see this scene, and I didn't even see the picture of the king coming out of the pyramid. It's a bit regrettable.

Around the pyramid, Shenlang is in the middle position, so that you can better see the top and bottom, and now fly directly to the top.

In the twinkling of an eye, Shen Lang has a completely different feeling!

The first is the feeling above the horizon, although through the way of the gods, he can take a bird's eye view of the audience. But with a bird's eye view of the real person, it is still a little different.

At the moment, it is really a bit majestic and sensational.

More importantly, it is a surge of energy!

As he guessed, the outer cylindrical tip is like an antenna for a receiver, and the huge building of the entire city is most likely a receiver, a building that gathers energy.

The ability to converge outside is poured into the inside through the tip, and the tip of the pyramid is the point of acceptance inside.

Chapter 2358 - Starry sky inside the tower

Simply put, this is similar to the function of the Haizu.

The king's control over the sand people does not allow them to get close to the pyramid. The ninety-nine people are guarded around them. I believe that it should be to avoid feeling and encroaching on energy.

And these energies are undoubtedly gathered in the pyramid.

This huge building is a receiver and a container that absorbs energy from the whole world. In this interior, the pyramid is a further receiver and container.

This is a progressive, condensed campaign, and within the pyramid, there may be a similar structure that will concentrate the energy to the extreme.

This discovery made Shen Lang excited.

If the king here, I really went to the earth thousands of years ago, and then never came back. How many energy has accumulated in these thousands of years!

Shen Lang already wants to see what is inside.

It's just that he is now at the top, but he can't enter the pyramid.

The whole building seems to be one, the energy can be absorbed in it, but people can't enter.

Shen Lang now has two plans in his heart. One is to use the "Heaven and Man" method to try to integrate with these energies and follow them together.

The other one is to start from below.

There should still be buildings under the base of the tower, use a small shovel to dig from the desert and enter from below.

It's just that he still has a point. The first plan is risky. In that case, he has entered an undefendable state. If there is any situation, it will be troublesome if it is not good.

The second option is that the movement is a bit big, and those sand people may get up.

Ninety-nine is equivalent to the level of Daxian, it is a great force.

The key point is that this pyramid is also isolated like the building outside. The gods cannot explore the situation inside and cannot make arrangements for it.

Just as the waves are hesitating, the vision is steep!

Above the spire of this pyramid, there was a surge of energy, but it was a regular state, but now it is suddenly the same.

Shen Lang instinctively defended himself, but did not hide in the space of heaven, but observed changes, first see what this is.

With his ability, even if this is the organ of defensive attacks, he has a way to cope with it.

But at this moment, his body was violently pulled by a strong suction. When he was about to fight, he felt that he had been sucked into the pyramid!

Whether it is a surround search or a reflection on it, it is all about entering the pyramid. It is now the result he wants to directly inhale him.

This also seems to confirm that the entrance is at the tip of this pyramid.

But it was not just “validating” his mask, or simply hitting the entrance by mistake, it is still unknown.

The situation inside the pyramid is completely ignorant and must be maintained in an absolute state of defense.

After entering the inside, Shen Lang was immediately attracted by the picture in front of him.

The pyramids on the earth, whether they are the earliest or spread to other areas, are similar in structure, overlapping, and the core of the core is the land of Pharaoh.

From a cultural point of view, this is of course a pharaoh king. After death, you should also enjoy the protection of the iron wall. Generally, people who know to enter the secret passage will be destroyed. The mausoleum of the emperor in China is the same.

Shen Lang did not go in, but these are already common sense things.

The Pyramid of the Haizu, he went to the bottom of the underground palace, for the above, it is estimated that it should be the same pattern.

Therefore, for this pyramid of the sand country, he also judged according to common sense, and felt that there should be overlapping buildings. However, unlike the firmness, each pattern structure may be related to energy convergence and suppression concentration.

The biggest possibility is that there is a passage directly under the pedestal of the tower. That is where the king is. It is the great energy to enjoy this layer and layer underneath.

But after coming in, I saw the environment of the Canro River!

This is exactly like going to another space, as if you were in the universe, the people are floating, and there is a starlight around them, as if there is no end, you can't see the "wall" of the pyramid.

Even if the pyramid is hollow, there must be a wall edge around it, and the three sides are essential.

But this should be like the desert outside, using a mirror-like projection on the border. Looking far away, it is the reflection of the same environment. It is like this, and it will be a state of heavy reflection.

If the ordinary environment, such as high-rises and alleys, high-altitude water, reflection, and where there is overlap, it can be clearly seen.

But the desert and the starry sky are a special situation. The overlap between the desert and the desert is not abrupt. The starry sky, whether it is a star or a black background, does not overlap.

This creates a boundless environment with a limited environment.

At this point Shenlang has to admire the builders here!

It is not easy to build such a large building in the ancient cold world where the cold fire is flowing. The inside is completely a desert world; the large pyramid in the middle of the desert world is a starry sky...

This is not only the difficulty of construction, but also very creative.

Shen Lang can't recognize what these stars are like, and use the holy arm to check it out. No matter whether it is the city map of the river basin or the star map data on the earth, it can't correspond.

It seems to be the star map of the world, or just a state similar to the starry sky.

When Shen Lang just came in, he still maintained absolute defense, but he did not encounter such attacks. He saw the starry sky and let him relax a lot.

Now that he has a rough observation, he is ready to learn more.

Directly close to a star nearby, carefully observed.

The cosmic starry sky is the overall feeling, just like a person looking at the stars, or the picture presented in a science fiction movie. But in fact, because Shen Lang is in it, so these star points are not much.

The “star” that he is observing now is actually the size of a basketball. It shines in the darkness. Some are bigger than this, some are smaller than this, and all the “stars” are shining. It formed a scene of embarrassment.

If you look closely, you will obviously feel it. This spherical star should actually be an energy body!

Chapter 2359 - Great harvest

In fact, I want to get it, this is definitely not a star, but the one that can exist in this way, the biggest is a possibility – energy!

At the tip of the pyramid above, Shen Lang can feel the powerful energy.

With the strength of his current great peak, he still feels very surging, showing the intensity of energy.

After being sucked into it, it did not feel the energy of the surroundings, which means that the energy was collected.

This pyramid is not only a place to live, but also an energy collector, which was guessed before coming in, but it is not clear about the specific way.

Once inside, it was attracted by the general environment of the starry sky, and did not see other architectural patterns.

Now look at this “planet” and you will see it at a glance.

All the energy, after being transmitted to it, forms a spherical energy group.

Specifically, how to operate, Shen Lang is not very clear, perhaps after entering, will form a small group, and then small collisions with each other, they will merge together to form a larger ball.

After a certain degree, there will be traction and rejection of each other, so the big ***** are not merged together, and the small ones will continue to be annexed.

As a result, the longer the time, the theoretically it is possible to absorb more and become bigger. But it is not necessarily the case, because there is randomness, some may take a long time, there is no small air mass around, and some encounter a lot, and it will be swallowed even bigger.

In general, these star-studded energy groups should have been collected on a regular basis and will be used in cultivation. It is now so much present, like a starry sky, indicating that no one has picked it for a long time!

This is in line with the analysis of Shen Lang before, the “king of the kings” that they worship, it is very likely that they went to the earth thousands of years ago, and then never returned.

Today, now that he is here, all the “stars” in this “starry sky” will be his harvest!

Under the excitement, Shen Lang can also feel a strong attraction, driving him to hold out his hand and hold the “star” in front of him.

This globular energy group was quickly absorbed by him after touching him!

Although this thing is consciously absorbed, but only a short touch, it is also felt by Shen Lang, this energy group is a kind of highly concentrated energy!

Energy is a broad term, and in terms of the aura energy required for comprehension, there are often three ways of being.

The first one is the aura that overflows in the whole environment. It is like the air. The large area is evenly distributed everywhere. The small areas are more concentrated and some are thinner.

The second type is contained in objects, such as the spiritual mine, from the worst spiritual stone, to the highest level of the spiritual stone, even to the spiritual and spiritual, all belong to this kind.

Some plants with natural treasures, which absorb a lot of aura, have become a carrier, such as jade peach, nine times purple gold lotus and the like. Even the spiritual beasts and beasts that are cultivated can be counted.

There is also a way to concentrate.

For example, the essence of heaven and earth is such a way.

For example, the Light God taught them to absorb the power of countless beliefs, and then concentrate them in a large amount, and finally become a liquid-like belief in God.

The lower level of expression is the spirit bubble, the holy painting, the holy water and the like.

Now here is the third form. The whole huge building is the absorption and convergence of the energy of the whole world, and then compressed and introduced into the pyramid. The pyramid absorbs and collects again, and then compresses it once and imports it into it.

There may be some form in it that is compressed into the form of such a mass.

I just absorbed it directly, but in fact it can only be regarded as income into the body of Shen Lang, becoming a carrier, not completely absorbed by him.

It also requires him to gradually refine it before he can use it for him. Otherwise, his body and the starry sky inside the pyramid are of the same nature, just for storage.

For this, Shen Lang is experienced, not at all nervous, because the essence of heaven and earth is a similar substance.

After absorbing such an energy group, he then looked at the entire “starry sky”. If all the “planets” were absorbed, wouldn’t it mean that the entire “starry sky” was like moving into his body?

When energy is needed, it is ok to refine an energy group. If you need more, you will refine several. When you want to help others, send an energy group directly.

It's very exciting to think about it, so come here so smoothly, so come in smoothly, thanks to this golden mask.

Thanks to Pharaoh Tutankhamun for leaving this thing, thanks to the contribution of the snake **** Kemsius, or maybe not necessarily.

Shen Lang did not waste time. When he was excited, he began to get busy.

Just absorbed one, the appetizers are not counted, there are so many here, in order to avoid night long dreams, or quickly get it, then let's take it away!

One.

Another one...

I have absorbed several pieces in succession. These are the ways to store the reserves. They have been absorbed, and they have not affected the Shenlang. They have not worried him to bear it.

Compared with the spirit of the original dragon, it was too cool!

“Silly?”

“Shuang!”

Hearing the voice of this question Shen Lang naturally responded.

But after responding, I immediately woke up, followed by a burst of creeps!

It seems that only he is alone, who is talking?

And this is not the speech that the ear hears, but the question that is directly felt in the mind...

Shen Lang also carries Leiyuan. If Leiyuan communicates with him, this is normal.

But the problem is that Leiyuan is quite familiar. It is naturally clear that it is, and for the heaven and earth, it does not care about energy.

Just the “sound” is definitely not a source of lightning, but a stranger.

This is a bit strange!

Shen Lang immediately stopped to absorb the energy group, but the **** quickly searched the entire interior of the pyramid.

Still caress!

After all, this is the base camp of others. Even if the king went to the earth thousands of years ago, there may be generations of kings behind!

Just came in here, first surprised, and then blinded by the interests, have not been carefully searched, it seems that some people are hidden in the dark.

“Do you want to find me?”

That voice once again rang in the mind of Shen Lang!

It was just abrupt, and this time, Shen Lang was prepared and immediately captured the traces!

Chapter 2360 - Apparent black hand

This does not seem to come from the outside world, but from the ... golden mask!

Before the strength of Shen Lang, there was a little bit of instant taste. Many of them were promoted by absorbing the resources such as panacea or adventures.

But now the realm of the great gods is not an adventure at all. It is a lot of resources plus a hundred years of retreat, and the foundation is very solid.

So when he was on high alert, he could detect the traces with all the slightest changes.

The sound directly thinks in his mind. In addition to Lei Yuan, the external person must pass this information through the way of injecting consciousness.

No matter how concealed, he can be aware of it.

Just after that moment, I felt it. This is not from any outside communication, it is very likely to be passed from the golden mask!

The other party's second opening is obviously also sure, and it is expected that he will be aware of it!

Therefore, when Shen Lang guessed it was a golden mask, he immediately discovered a problem. The golden mask did not know when it was already closely connected with his face. At this moment, he was embedded in his face. !

When I put on the golden mask, I felt that it seemed to have been adjusted.

However, Shen Lang did not care much, because according to historical records and the Kemrisu water monster, it seems to be designed according to the Tutankhamun Pharaoh, naturally not the same as the face of Shen Lang.

And if it is really a sacrament, it contains incredible power, it will be adjusted according to his face, and it is more suitable. This is completely normal.

He also felt that he was much more comfortable than when he first tried it. Even the weight of ten or twenty pounds did not seem to exist, as if he were wearing a thin layer.

Just because of the ultra-thin fit feeling like wearing it, let him temper again and again, and after arriving here, 20,000 miles, and continue to wear.

In particular, I found that wearing this golden mask can sense thousands of miles away through the way the soul swims, so that Shen Lang has no reason to pick it up.

Before coming to this sand country giant fort, the golden mask once again made meritorious deeds, which opened the door. Just in front of the pyramid, it also attracted the worship of ninety-nine sand people.

All of this makes Shen Lang feel that this mask is very easy to use and has a lot of help for him.

He also pretends to be the king of the world, and of course he will continue to wear this mask that symbolizes the king.

So even after arriving inside the pyramid, there was no sand man here, and he did not pick it up immediately.

But now, I feel that this golden mask has already been a little deeper, and now I have to go inside his face and head!

“What kind of ghost are you?”

Shen Lang’s direct thoughts screamed at the golden mask.

At the same time, he has reached out to pick the golden mask on his face.

The golden mask wants to get into his face, which is hard to do.

Although the other party is secretly attacking him first, but in addition to Shen Lang’s own defense, there is another point that the golden mask does not know, that is the holy armor!

Shen Lang is always equipped with the holy armor, and the bionic black technology can be traceless. When there is no need, it can be as if it does not exist.

But in fact, it still fits him, or he has an absolute protection for him. The first thing that the golden mask must break through is the defense of the holy armor!

It was precisely because it just kept the absolute fit, so that Shen Lang thought it was to make him fit comfortably, so I didn't think much.

If it wanted to be embedded in the face of Shen Lang before, it would have triggered the warning of the holy armor.

For the golden mask, when the earth is on, Shen Lang wears it, and then it is put away.

This time, no matter how many tests he had in the funeral valley, or the tens of thousands of miles, he did not fly. When starting a super-high-speed flight, it requires an additional layer of obvious protection and can feel its existence.

At other times, it is the operation of Shen Lang thought, the golden mask is not known.

Golden mask?

Shen Lang certainly does not believe that this mask is perfect!

It is normal for the magic weapon of the artifact and the holy level to have a certain spirituality. But if you have such awkward and mature control, it is extraordinary.

Shen Lang thinks that this is not an instrumental spirit, but that there should be a soul attached to this golden mask!

This soul, a great possibility, is the king of the ancient cold sand country here!

Now that this situation has arisen, it will make everything more reasonable.

Why is this mask a dark world after it is worn? After arriving in the world, there was no problem, but it became more helpful.

This is naturally the effect of that soul control!

Perhaps in that dark world, it is the opportunity to occupy the raging waves!

The first meeting of Shen Lang was quickly picked up and a little scared because the strength at that time was weaker than it is now, and it was also because of the first contact. And that thing might have to be done at the time!

This wave of tests has not been done, it should be related to the gold coffin, into the gold coffin, let it realize that there is no need to rush to bring back the waves and bring back the safety factor.

That many tests, for Shen Lang is familiar with this golden mask.

For the soul of the king in the golden mask is also a familiar opportunity to understand the waves!

The way that Shen Lang thought that “the soul of the gods swim” may be the addition of the golden mask in this world, or perhaps only the soul who projected it to Shen Lang knows it!

If it is the latter, it means that the route of Shen Lang has been changed by secret manipulation!

Thousands of miles away, this is not the point where Shen Lang’s knowledge can be reached. What is there and how to go is completely the environment it presents. Although the decision was made by Shen Lang himself, all the information that made him decide may be manipulated by others.

The purpose, of course, is to take him step by step to the sand country.

When he was impatient, he presented the information of this huge building, that is, to let the waves come.

Outside the castle gate, outside the pyramid, the situation reversed again.

I thought it was because of the golden mask. Now it seems that the soul is actually manipulating!

When there is no way at the top of the pyramid, it is inexplicably absorbed, it should be what it does!

Including research and absorption that has just been difficult to resist an air mass, and may also have its promotion.

It's all for the moment!

The energy “stars” that have just been absorbed have not affected the sinking waves, as if they were stored, but will they be absorbed by the golden mask – or the soul hidden in it?
