

## First Strong 2391

### Chapter 2391 - Courage

The realm of the mermaid patriarch is very high, and this is in the site he is familiar with. So even if you just lost your chance because of anger, you will have a response now!

In the field of Shen Lang's god, there is no restriction on the dog god, so it can quickly rush to the past.

But the mermaid patriarch, but it disappeared in time!

Originally, he was dragged forward by the field of God because of the rapid advancement. It became a very slow flight. In fact, it was already good. It was generally directly imprisoned.

Now, even if he is locked in the realm of God, he still disappears as if he can't lock him at all.

The dog \*\*\*\*\* saw this strange, but Shen Lang is clearly aware of the specific situation!

The way the mermaid patriarch uses it is similar to his integration of nature and human beings. He integrates himself and the whole environment into one. In that case, the environment is not restricted.

Just in that state, he is equal to directly integrating with the realm of God!

It has to be said that courage is very extraordinary. Because that means that he is at that moment, completely handing over his safety!

He was originally in the realm of God, and he was actively united with the environment. It was equal to even the defense. Shen Lang could kill him with an idea.

But just because no one will do this, will not take the initiative to unite with the enemy's environment, Shen Lang did not think, missed such a good opportunity.

After he merged, the original restrictions will not become a limitation. He has to leave this scope, which is just an idea.

And he will do this, of course, it is also necessary to prepare and calculate all of them in an instant, when he has already reached the temple!

The scope of Shenlang's control is inside the temple. Later, he realized that the god's remnant thought may have merged with the temple. He expanded the scope and wrapped the whole temple.

It's just that I haven't had time to search the entire temple, and the patriarch has already arrived.

Now the patriarch is from the place where he is controlled, directly to the edge of the field of God, that is, to the top of the temple, and then immediately detached from this state.

Such a very short moment, no anticipation of the sinking waves, but also too late to react, has been removed from him, but this is happening in the realm of God, so he still knows this trend.

The dog \*\*\*\* rushed over and saw that the patriarch had disappeared and had not figured it out there.

The next moment, the whole temple began to shake up!

In an instant, there are a lot of debris, falling off the walls of the temple, and stinging against the waves and the dog god!

This is the patriarch who can control the temple and is some of the defense facilities that began to manipulate the temple.

These lasings appear to be fish scales of different sizes. They are slim and sharp, and the speed is fast. They are accurate against the target. Thousands of them come over and the distance is short...

If it is in a normal state, the enemy inside will be hit in a moment!

Although the enemy who can come here to pick things up is definitely not weak, it will be sieved, but because it is too abrupt and fast, the distance is short, it is very difficult to avoid it completely, often only Defense and hard battle.

But now, the situation is a little different...

Because the field of Shenlang's gods has never been received, so many scales that have emerged from this blast, even if the speed is fast, are immediately locked.

They are small, and the power to defend themselves is smaller. But in order to make it easier to kill and kill the enemy, it is very slim and sharp. The area of resistance and locked is far less than the body of the patriarch.

Therefore, this is similar to the attack on the gods by the dog \*\*\*\* and Shen Lang before, the big claws are blocked, but the sharp sword front is able to penetrate the past more easily.

Presented in the air, all these fish scales are inconsistent with the people around Shen Lang.

However, although they are not locked, let their courier be faster than the patriarch, but still as slow as the slow, different multiples.

“Roar!”

With the strong roar of the dog god, it burst out of a powerful momentum, and all the fish scales that flew in slow motion all of a sudden, flew and flew out.

Some of them shot in the back, but they have not been close, and they have been hit more chaotic by this flying.

Shen Lang's emphasis on the mermaid patriarch is even greater than that of the ancestor Yuanshen!

Just in the realm of the gods, I was able to get out of trouble in an instant, and the courage, reaction and speed were all praised by Shen Lang.

So at this moment, he did not let the old gods let the dog gods take it. The sword of the king, which had not been collected, swiftly swung up, directly from the side to the top, directly to the top of the temple, complete Smashed the past!

This temple is controlled by the array of law, and it is implicated in a lot. Therefore, the tearing of the dog \*\*\*\* is only a little effect.

But the sword of the king is not the same. It is an indestructible artifact. It is even more unnecessary to fight against forces such as the array. It is directly to cut the touch.

However, Shen Lang has never stopped controlling the field of God. Later, it is also shrouded in the temple. Although it has lost its first chance and is difficult to control completely, it can still achieve a difference.

Increase the power of this sword and suppress the temple.

The result was a gap that crossed the sword and cut the majority of the ancestral temple of the mermaid.

At this moment, the entire temple suddenly flew up into the air!

Although it was also trapped by the realm of God, its volume was too large, and it was on the edge. Under the control of the patriarch, it was time to get rid of control and rush into the air.

In the next moment, it quickly shrinks, and then quickly falls into the cold, disappeared!

For this change, Shen Lang is very calm.

The temple is “made fine”, he has not seen it before, he has one.

However, this situation should not be the essence of the temple, but the temple itself is a big magic weapon!

Perhaps in their setting, the key moment is that some of the tribes can hide in it, and then the strongest ones will flee.

Therefore, the temple itself does not take the initiative to respond, it needs someone to control.

This control may be the sacred \*\*\*\*\* of the first ancestor, or the patriarch who is now coming.

After reaching this effect, it is equal to protecting the temple first, and then returning it back later.

The patriarch of the mermaid is still in the air, facing the waves of the ground and the dog god.

The environment at the moment is a bit weird. Just the ground of the temple has disappeared. If they are not strong enough, then the temple will wrap them together, shrink, and fall into the cold!

The patriarchs will not agree with each other tomorrow, so when they were just manipulating, the ground circumvented them, leaving this space empty. At this moment, it is the flatness of the island's horns, nothing.

Chapter 2392 - Included

The identity of Shen Lang on this side is the king of the sand country. From the space of the heavenly book, it is wearing a golden mask.

Therefore, in the eyes of the Hanze mermaid patriarch, this is naturally the war against the sand country.

“The Lord of Sand! You are too much!”

At this moment, he suppressed his anger and kept himself in his identity without breaking his mouth.

“Excessive? What did you just say?”

Shen Lang ridiculed, and thought that they were trapped in the tiankeng, the other party is not this attitude.

Although I just came in, I still have no positive confrontation, but it is also a contact. Both sides have a new assessment of each other's strength.

Shen Lang has settled a lot in his heart and has more confidence.

This aspect comes from the contest with the ancestor of the ancestor, where the \*\*\*\*\* has been ruined and almost destroyed the god, enough to make him more confident.

On the other hand, the confrontation with the patriarch is now the fourth time.

In the middle of the cold, in the tiankeng and just in the shrine, once and for a short time, there is no big war, but from the other side's cautious attitude and other aspects, we can infer that the other side has no crushing confidence.

This also shows that the mermaid patriarch of Hanze is not as powerful as he imagined, and the other party is equally full of scruples for him. This scruples is either because of the identity of the king of the country or because of his strength.

In general, Shen Lang plus the words of the dog god, to walk in the cold, the problem is not big!

"I am innocent and innocent with you in the sand country, and I have tolerated it again and again. Since you are so obsessed with it, don't blame me for leaving you in the cold today!"

After the mermaid patriarch came over, he had already burst out of the scales, but at this moment it was suddenly a golden light!

In the memory of Fengqiu, I don't know the secrets of this level, so Shenlang is not sure whether the mermaid cultivation is in a high realm, can release the golden light, or say...

When the eyes of Shen Lang correspond to the eyes of the patriarch, it is immediately confirmed!

This is a very mysterious feeling. Although the ancestor Yuanshen was just a sacred sacred ideology, it was attached to the idol and there was no concrete appearance.

But now looking at his eyes, it makes Shen Lang feel familiar, this is not the patriarch who he has been to the fourth time!

Just as he had just seen the golden light, the current mermaid patriarch was already possessed by that soul!

“You see it.” The mermaid patriarch suddenly showed a strange smile.

He saw that Shen Lang saw it!

It is presented in the image of the soul on the image of the god, representing the ancestor of the mermaid. But attached to the body of the contemporary patriarch, that represents the patriarch. Even if he can destroy the enemy, it will not achieve that effect.

Ming people do not pretend to be forced!

Now I find that Shen Lang has already seen it coming, and the natural feeling is different. If it can win, it is its revenge success!

“Seeing it, you have been beaten by me to escape, this is directly to your future generations, hey, this is really stinking!”

Shen Langxiao smiled and satirized a sentence, but it was tight inside and outside, and he paid attention to it.

This is not the same situation!

The possessive soul of the \*\*\*\*\* is the sacred consciousness of the ancestor, and it is supported by the image of the \*\*\*\*\* to achieve the attack effect.

Once there is no such foundation, it is immediately a heavy effect.

But now, it is equivalent to re-owning a possessive host, and this host is not a dead object like a god, but a living mermaid!

And it is the strongest mermaid in the world, then it is not the effect after the heavy damage, but it can get a great bonus effect.

Because the gods accept the worship more, how to have spirituality, after all, is a god, not compared with the real body.

This mermaid patriarch is a descendant of his descendants, inheriting its genes and its blood. So if it is to be integrated, there will be no resistance, it will be taken over easily.

In this way, it is equal to the effect of adding!

Originally, the mermaid patriarch was already very strong. Originally, this shackle was also very powerful, ruining its roots, and it was not up to the wind, but now it is equal to giving it a more powerful foundation!

“Sha Guo? Hehe!”

The mermaid patriarch sneered. Obviously, now the ancestor Yuanshen is in charge of his body, and it is already aware of the memory of the patriarch, so he knows the identity of the lord of the country.

“Dare to offend my cold, you will kill! You must die! You sand country, I will also level it!”

When this sentence is said, it obviously has a different style and momentum.

Hanze mermaid patriarch, how much is still a bit scrupulous, just started to avoid the war, do not want to intensify the conflict with the sand country.

But this is not the same as the gods, this is the legacy of the ancestors, it should be the time when it is strongest, and perhaps the time of old stubbornness.

The people of your country, who came here, ruined the gods and temples of Laozi, may not retaliate?

“Don’t you have to discuss it?” Shen Lang said without a smile.

“Consultation?” The ancestor Yuanshen could not help but laugh.

Do you talk to me at this time? When you just destroyed my god, why don’t you talk about it?

“I was here to find my partner, although it was pitted by your patriarch. But I have found it, and it has not caused a big problem. I can not leave it, and take it with me.”

Shen Lang talks.

He said the truth, come here is that I meet the dog god, and did not want to dry Hanze.

Just in Tiankeng, he decided to retaliate. Now that the temple has been ruined by a seven-eight-eighth eight-eighth, even the temple is now “hidden”. It is a great shame for the mermaid.

This has already achieved the role of retaliation. If you can reveal this, then he is willing to leave now, no longer extravagant.

However, in the mermaid ancestor Yuanshen, I heard it, this is Shen Lang’s guilty conscience!

After discovering that it was integrated with the patriarch, he was afraid, so he would ask for a peace talk.

This kind of psychological game is like this. If you take a step back, I will go further.

It feels that Shen Lang is afraid, and the heart of revenge is even more blazing. It is really the other party who is very eager to fight, full of confidence and fighting spirit, but it will hesitate.

“You must die! It must die! You, the sand country, all must die!”

The ancestors of the mermaid were separated and proudly issued a drink order.

Now it is a slap in the face, it seems that you can always squeeze the waves and the dog god.

Shen Lang shook his head helplessly: “Who gave you confidence? Do you think you were still the same year? Wake up! You have been dead for thousands of years and tens of thousands of years, you are just a residual consciousness, that is A spiritual energy body!”

Chapter 2393 - 1 starter

Shen Lang’s eyes are full of contempt and sympathy.

“The world has long since had no place for you! You are nothing more than a statue of masonry, you are just an ancient totem commemorated in the hearts of future generations.”

Every time he said, the face of the mermaid patriarch who was dominated by the ancestor of the ancestor was ugly.

“You are living in their hearts, living in the image of God. What do you want to do now? Take his body and take the opportunity to rise again?”

“All the mermaid people, if you know your identity, will only fear and fear you! No one will pay homage to you, everyone will think you are a devil!”

“And these are the relationship between you and your descendants. For me, what are you? But just an old ghost who has been lingering, I will kill you casually! Also say we must die , you are also worthy?”

Listening to Shen Lang, the face of the mermaid patriarch became more ugly, but the ancestor Yuanshen did not interrupt, but completely listened to his words.

In the end, he suddenly smiled, and the ugly face recovered.

“You are afraid! You panic...so you will deliberately run, want to stimulate me, so I can’t calm down.”

Shen Lang could not help but sigh.

It seems that this old ghost is really enough to be a ghost!

He just said something, whether it is sympathy or contempt, whether it is words or expressions, it is part of the performance.

To put it bluntly, it is a psychological war, which psychologically degrades the other side, thus achieving the effect of suppressing the momentum and confidence of the other party.

However, it seems that the performance is too much. It should be appropriate to have one or two sentences. In the end, let the old ghost react.

“Don’t talk to him so much! Let’s do it together!”

The dog \*\*\*\* is listening to it. Although it does not understand so many specific channels, it can also be felt that Shen Lang should be intentional, but this intention has already been seen by the other party.

At this moment, there is no temple here. The dog \*\*\*\* can play better. If you want to get bigger and smaller, you can do it.

And now, it is a fierce open mouth, screaming at the ancestor of the Yuanshen.

This is the most common way to show the momentum of the beast. For the dog god, it is natural to spew out a powerful airflow.

But this time it was different, but from its innermost, it quickly flew a lot of vines and went straight to the mermaid patriarch!

They may be two in one now, perhaps not in one, but the ancestor of the ancestor Yuanshen, controlled and borrowed the body of the mermaid patriarch.

However, it still understands the memory of the patriarch. In fact, it has already become a temporary success. If it does not want to leave, perhaps the mermaid patriarch has no choice.

Originally its own memory, it was very angry for the dog god. This behemoth destroyed its temple, shredded its image, and finally dismantled the temple.

But in the memory of the mermaid patriarch, the Emperor's behemoth is a watch full of value.

The value is that it has successfully swallowed a bluebird fire, which has not been a successful precedent and is worthy of observation.

If you master the use of the Bluebird, it is a huge resource that can change the evolution of the entire race.

And because the patriarch was not aware of the specific origin of the dog god, he did not know that it had been "the combination of animals and plants."

So now I saw it inside the mouth, and even spewed a lot of vines, and then I was pleasantly surprised. I think this may be the variation after swallowing the Bluebird!

The leap of evolution is a process of variation.

If there is no variability, it will be thousands of years, and there will be no major changes, and the variability will be further advanced.

In the end, their Hanze mermaid, the mutated race, is a product of the fusion of humans and fish, after evolutionary variation.

This behemoth, after eating the bluebird fire, how long has it been! Not only is it not dead, it is not devastated by the cold, but it can change the plant vines. Isn't that a very good variation?

The discovery of this surprise made the patriarch's consciousness affect the ancestor of the ancestor, and also wanted to observe this giant beast and observe it well.

For the attacking vines, it is a simple wave of hand, immediately a layer of golden light blocked the past, directly blocking all the vine poisonous grass, and then quickly wrapped around the dog \*\*\*\*\* over the past!

The dog \*\*\*\* has already started, and the Shen Lang is not idle. The sword of the king swiftly waved and arranged a powerful sword!

Shen Lang's past life was originally a master of swords, and he had a great support for the cold autumn.

It's just that after the creation of "Yin and Yang Bo Ruozhen", it has already left the sword and is not tied to any exercises and methods.

In this world, he has seen the desolation of the female swordsman, and has seen more than a hundred years of cultivation, and the achievements in the sword have surpassed the high cold autumn of his previous life, and naturally have more insights.

The enemies that you usually encounter, even if you want to let him out of the sword, with the sword of the artifact king, often one or two strokes can be solved, and there is rarely a big sword.

Now this time, he does not dare to neglect, the sword of the king after the success, is also rare to play a powerful force, with an extraordinary sword style, began to form a sword net, heading toward the other side!

Because the speed is extremely fast, the sword net is illusory, and it is impossible to tell which ones are swords and swords, and which are light and shadow swords. The whole attack has been like a spiritual, and the mermaid patriarch is completely wrapped.

In this way, it is equal to the sword net has directly attacked with its golden light.

Although the ancestor Yuanshen had just despised them, but they really started to work, it still maintained a high degree of attention, except for one hand to oppress the dog \*\*\*\* the other hand also appeared the same weapon.

This is a transparent stick, each waving, but with a layer of wave light, as if a piece of water waves like a wave.

It is also strange to say that the sword of the king is invincible. The formation of the sword net covers a large range of attacks, but after touching the transparent cane of the water wave, it does not cut it off!

The rod in the hands of the mermaid patriarch is actually an artifact-level treasure that can withstand the sword of the king!

And the layer of water that is brought up by the general brilliance is also between the waves, and the sword net is scattered one after another, that is, it is waving in one hand, and the sword net formed by the sword is given. Resist it.

This situation has surprised both sides!

Shen Lang did not expect that the sword that he had not used for a long time, with the sword of the king of the artifact, could not hurt the enemy, but it was so simple to crack!

The ancestor Yuanshen, did not even think that this is the water rippled stick that it passed down that year, and it is impossible to crush this sword. It seems that this sand country is also a bit of a foundation!

Chapter 2394 - 3-way pinch

The ancestor Yuanshen thought that Shen Lang was the owner of the sand country. It was completely normal for the sand parliament to have one or two treasures.

Shen Lang is different. Originally, he had no idea about Han Ze, and he took the dog \*\*\*\*\* away.

But now it is not the same, ruined the temple, the gas has already come out, the hatred has been reported, and now others are not willing to give up.

Things can't be done well. Since you have to fight to the end, it's certainly best to have a little color, or you'll have to live together to survive.

What the mermaid family showed before was all related to fish scales, and that is naturally what they can use.

Seeing this water ripple rod at the moment is to make Shen Lang have greater interest.

Since this thing is even the sword of the king, it can still block the strong attack of the sword of the king, which is very powerful.

If the patriarch controlled by the ancestor of the ancestor was turned over, it would not be dry, or could get some of the benefits.

This water ripple stick should be a good magic weapon, at least hard enough!

When you find that the other party's weapon can withstand the sword of the king, and want to take it over.

Shen Lang decided to change the way, hard to cut down, it is a pity to hurt which one.

So he immediately took the sword of the king and changed it into a light attack.

The attack of Shenguang can be more flexible and more intangible. He has been very skilled in using it. He does not need to swing out like a sword of the king. He can shoot like a gun.

However, the ancestor Yuanshen was not covered. It had just dealt with the dog \*\*\*\* with golden light, and the other hand used the water rippled rod to resist the attack of Shen Lang.

At this moment, Shenguang attacked it, and it immediately launched a golden light, which was directly guarded in front of him.

The light of God is extraordinary, as if it can wear all the holes, but this time there is no.

Because its golden light and Shenlang white light are all the same material, the attack and defense become the same energy impact, and there are some general fluctuations around.

Although this did not penetrate the patriarch who was attacked by the ancestor Yuanshen, it also affected its suppression of the dog god.

The dog \*\*\*\* has changed in an instant, the body has become huge, and a paw has been smashed directly!

Its purpose is very simple, that is, with violent hardship, golden light can block once, then twice, three times...

Through repeated blows, it is inevitable that the other party will be helpless.

More importantly, through the previous cooperation with the idol attack, the dog \*\*\*\*\* understands a little, if it can not work, as long as it can play a role in interference, it can greatly help the deep wave.

It is now full of confidence in Shen Lang, even if it can't be solved, let Shen Lang solve it!

In fact, the dog \*\*\*\*\* is also very risky to do this. It has become even bigger, in order to make it easier to hit the target, but in turn, it is easier to hit by itself!

Especially for the golden light, it is too late to dodge.

However, the ancestor Yuanshen is a very great power. Now, although it cannot have the power of its deity, the energy of the patriarch's body is far better than the image of the god.

So for the attack of the dog god, it is very easy to resolve.

The way to resolve, but changed it!

That is to say, it used the water ripple rod to resist the sword of the king, and suppressed the dog \*\*\*\*\* with golden light; now it is the light that defends the waves with golden light, and the water ripple stick in the hand blocks the attack of the dog god.

Such a simple change is really easy for it.

Although it is still an enemy two, but for the ancestor Yuanshen, the feeling is not the same, before they were attacked by both of them, now it is easy to deal with two!

But before it smiles, there is another change!

Shen Lang suddenly strengthened the attack of Shenguang, and people stepped forward to the past!

The two gods are fighting together, and the energy fluctuations are getting bigger and bigger, but Jinguang is defending the Shenlang, and it is a stalemate.

At this time, Shen Lang step by step, in fact, there is no substantive effect. It is not like a real weapon, but it can strengthen the top.

But since it is a state of balance, then every step of his step is to give the other party psychological pressure!

What this shows is that there is still room for it, and it is necessary to continue to attack.

Normally, the defensive side will often let the defensive advance to the top, and will not lose in the momentum, so as not to make the opponent more close.

However, the ancestor of the ancestor Yuanshen is still very calm, it only strengthens the defense, and protects a large piece of the front with golden light to ensure that the Shen Lang attacks, can be defended.

On the other hand, it is a counterattack that gives more attention to the dog paws that have been repeatedly suppressed.

When the water rippled stick is swung out, it is not only blocking the dog's claws, but also a layer of water ripples, and it is forced directly to the top!

At this time, the slight golden light flashed, and it quickly shot directly behind the body of the patriarch!

The ancestor of the ancestor is now occupying the body of the mermaid patriarch. Once injured, it will make him unable to exert his power. Just like the statue that it was originally inhabited was destroyed.

Its reaction speed is also very fast. The water ripple stick that was still blocking the dog \*\*\*\* attack on it, quickly slammed back, and immediately shot the golden light that flew!

This slight golden light is not the same as the golden light it uses to defend and attack. This is a golden entity.

Gold dagger!

“Not at your own weight...”

The ancestor Yuanshen could not help but sneer up just a long and big sword, it can block, let alone such a small one.

After flying the gold dagger with a corrugated rod, it went back to the top and blocked the dog's another blow.

Because it is fast enough, this sneak attack did not help the dog god.

According to its feelings, the little sword, which was hit by the water ripple rod, will not be broken and collapsed, and will fly out and fall into the cold.

So it sneered directly, and it was not said that the words “beads of rice grains” came.

However, its “no self-reliance” has not been finished yet, and the gold dagger is once again flying back!

It was able to block it just because it blocked the dog \*\*\*\* after a blow, and quickly swung the gold dagger with a rod, and then continued to block the next blow of the dog god.

But now, the gold dagger is back at a faster speed. The water rippled stick is just touching the dog's claws. Even if it would rather bear the dog's blow, it would be too late to return to the block!

Chapter 2395 - Flying swords

Under the normal conditions, the ancestor Yuanshen can use the golden light to protect the whole body. In that case, the gold dagger will not be able to hit it.

Just like the effect before the gods.

But the problem is that before the \*\*\*\*\* statue defense golden light, it has been absorbed by a large part of Shen Lang, and finally it condenses into a golden light of powerful attack, and after Shen Lang destroyed the statue, it was collected.

Therefore, the belief energy of the ancestor Yuanshen who can attack and defend in the form of golden light has been greatly damaged!

Just because it just merged with the temple first, and then occupied the contemporary mermaid patriarch, these added energy can make it continue to maintain a stronger advantage.

But this is mainly based on the power of the mermaid patriarchs – such as the use of water rippers, while the golden light is still limited.

He wants to resist the waves with golden light, and because of the step-by-step tightening of Shen Lang, let it open a large piece in front of him, and then you can't worry about it.

Simply put, it is not enough golden light to defend. If you want to divide the front golden light into a part of the past defense, you can do it, but it is likely that the result is hit by the Shenguang!

Compared with the little sword that can be flying by it, it pays more attention to Shen Lang. Because the Shen Lang is not only the attack of the gods, but also the sword of the king.

You must know that Shen Lang just destroyed his image, that is, the combination of Shenguang and the sword of the king!

With the experience of serious consequences, let it naturally leave the key prevention to Shen Lang, and the little sword that did not know from the blast that came out from it should not be too serious in terms of the contact that has just been touched.

The consciousness of the ancestor Yuanshen is fast enough, and the ability of the patriarch's body to use is also very fast!

The patriarch was already covered in fish scales. At this moment, it was the place where the golden dagger stabbed, and then thickened the defense of the scales.

The patriarch's body originally had a defensive hood, but it was not to the extent of the golden light, plus the scales that were reinforced on the flesh. It believed that there was no problem in blocking the little sword.

All happened in an instant, and it was able to be dispatched to this extent. The ancestor of the ancestor was already very powerful. At this time, the water rippled stick was also against the claws of the dog god.

As a result, when the golden cockroaches first penetrated into the back of the patriarch's body, a strange twist came from the back, and it was swept from the back, and then entered from the waist!

The ancestor of the original ancestor Yuanshen has been well controlled, and the defensive hood has been strengthened on the back, which also strengthens the protection of the scales.

But it turned to attack the more fragile and unprepared waist!

It will strengthen the defense of the back before, naturally because it can calculate its goal from its trajectory. This is already the second time, and I am more confident.

I didn't expect it to be as if I had grown my eyes. I saw that the defense was strengthened, and I turned my own way and changed the place.

This is already a few inches in the past. This kind of turn-around direction, even if the ancestor Yuanshen had time to discover and judge, the patriarch's body is too late to change.

However, at that moment, the ancestor Yuanshen did not pay too much attention, because the acceleration of a certain distance can do more work, and when it is only a few inches, then turn around and re-piercing will have no effect.

Therefore, the manipulation of this hand is certainly awkward and invincible, but the power after a close turn can not be able to pierce the scales, let alone seriously injured it.

Its key defensive object is still placed on the top of the waves, followed by the dog god.

This little sword is so different that it feels that it should be a cover-up fake action, the purpose is to attract its key defense, and the main force of the real attack is Shen Lang!

Therefore, in the moment when the golden dagger pierced the waist of the patriarch, the ancestor Yuanshen strengthened the defense of Jinguang and made changes that were mobilized at any time.

At the same time, its water rippled sticks also burst into a powerful energy, which was to smash the dog's claws out.

Before it was a good enemy to the enemy, and the dog god, whether it was first suppressed with gold light, or with water ripples, is still a little teasing, this time it is a great effort, must master more The initiative.

But this time its judgment has been mistaken!

The golden flying sword is not only the weapon that Shen Lang launched, but also the refining and turning into a flying sword, which is manipulated according to the heart.

When it thinks that a few inches of the U-turn in the close range will greatly weaken the attack power, in fact, it is simply a good track designed by Shen Lang!

It was not a temporary U-turn, but it was prepared at the beginning, and under the control of his consciousness, the Golden Flying Sword was more flexible than his hand manipulation.

The body of the patriarch, even under the ribs of the waist, also has scales of defense. But it did not have sufficient defense like the back, and the power of the Golden Flying Sword is far beyond its judgment!

Just now it was able to fly the flying sword. In addition to its quick response, it was the intention of Shen Lang. It was to make it fly successfully!

The purpose of doing that is to give it a successful experience. This will affect its judgment. When the second flying sword returns, it will determine that the trajectory of the flying sword can be captured. The power is the same, even if it is hit once, it should be weaker.

With such paralysis, this time the trajectory changes, as well as the differences in power, are all unthinkable.

This is the magic weapon of the sand country. It has injected enough energy to restore the original power. In addition, the control of the Shenlang Feijian, even the squad's scales, is also a momentary tearing of the bamboo, direct penetration. Among them!

The ancestor Yuanshen, who had just focused on defending against the waves and powerfully flying the dog god, was also prepared to become passive and active, and the result was suddenly a slap, let it momentum!

In an instant The ancestor Yuanshen transferred the focus to the waist, and the powerful energy went to the wound.

It is too late to stop the attack, but it must clamp the little sword and then pull it out. Otherwise, if you continue to penetrate, directly pierce the waist and wear it from the other side of the waist, the injury will be much heavier than the piercing.

Normal weapons such as this, pierced into the body, will be stuck. But just the second attack has made it clear that this is not an ordinary weapon, it is a magic weapon, a magic weapon that is controlled by whatever you want.

So it is very likely that it will not get stuck in the body, but will continue to exert strength and directly penetrate it!

Its response is not unpleasant, and this time the judgment is completely correct.

But how can you react quickly and quickly?

Because of its heavy protection, Shen Lang only needs layout, and with several attacks, the Golden Flying Sword has a chance to break through.

It's hard to break through, and how can you not pursue it?

Chapter 2396 - Water ripple rod

Whether it is a sinking wave or a dog god, if you want to hit the body of the current patriarch, you need a breakthrough. If you don't have one, it is deadlocked.

The same is true for the other party who wants to attack them.

Therefore, Shen Lang has just broken the ancestor Yuanshen and must be fully coordinated. But at the moment when the scales were broken, everything would be easier.

Whether it is a human or other alien beasts, it is not difficult to cultivate to the copper and iron bones. But the internal organs of the organs, like steel, are very difficult.

Even if it is as strong as a dragon, from dragon scales to epidermis muscles, it is layer-by-layer protection, but if you can enter the inside of their body, it will be a multiplier effect.

When the gold dagger pierced the protection of the scales, the resistance level in the flesh was much worse. He simply did not bother to let the dagger dance quickly.

When the ancestor Yuanshen paid close attention to it, it was too late to clamp up the gold dagger.

Just as a stab, it can only be considered a wound, but it has not yet reached the level of heavy damage.

But now it is stirring quickly, and all the organs inside the waist and abdomen are smashed in an instant!

Shen Lang is also not sure whether this mermaid and human structure are the same, at least on the surface it looks like the difference between fish scales, the others look the same, and there is no fish head or tail.

Therefore, according to the structure of human beings, it is not enough to smash the intestines of the abdomen. It is necessary to destroy all the internal organs, especially the heart!

“Please stop your hand! Everything is good, I can give you the benefit! Conditions are free to talk to you!”

After the ancestor Yuanshi powerfully clamped down a step later, he immediately realized what it would be. The controlled little sword has been stirred in the belly. It is not a passive problem, but a problem that is going to collapse at any time.

It just collapsed again, and this time it is the patriarch of the descendants of the future generations. If it is messed up again, its ancestor can really live without a face!

Therefore, it took the initiative to immediately transfer to the idea of Shen Lang for mercy.

The idea is fast enough, and it contains the complete meaning. Otherwise, even if it is more than one second, I don't know how many more knives will be cut.

At this moment, it is not afraid to open the abdomen, afraid that the sword will not come out, has been strangled in the abdominal cavity, then it is finished.

Even if it has a lot of power, it can't be played out.

So at this time, all the interests, face and what are thrown away, living is the most important!

And not only is it going to be alive, the contemporary patriarch should be alive!

Its body has long since disappeared, and now living is only the soul of the residual thoughts, barely can be regarded as a bit of the \*\*\*\* of the body, in fact, the impact is not great.

But now the patriarch of the mermaid is the key figure in its descendants. Hanze Tianzhu, not necessarily will be attacked by the outside world, but if the patriarch is destroyed, and there is no normal succession, it will inevitably lead to a generation, and then it will go from bad to worse.

It is already like this, of course, the most hope is that the descendants of this generation can prosper. Just like an old man of seventy and eighty, for the benefit of the family and grandchildren, you can put it down again.

At the moment when the idea of seeking forgiveness was released, it immediately stopped the attack of the water rippled rod, and let the dog \*\*\*\* continue to descend from the top.

Of course, it did not directly remove the golden light defense, because it is a statement, the above attack, there is still a chance to block, but the front of the golden light and white light is always against, once removed, the patriarch's body will be strangled.

“Okay, you can talk.”

Shen Lang returned to it with an idea, and at that moment, he directly received the light.

That is a great consumable! If you can kill the enemy, then the stalemate, so deadly, is a serious waste.

When he stopped his hand, Shen Lang also sent his thoughts to the dog god, letting it stop.

The dog \*\*\*\* has quickly shrunk a lot. It just has the need for adventure, but if it is suspended, don't make such a big target to the enemy.

After it is reduced, it can also make itself more flexible. Now, without making any noise, let Shen Lang be responsible for talking, and it is also ready for various attacks.

Shen Lang has withdrawn two attacks. It is already very sincere, but the key golden flying sword will not be withdrawn!

However, the ancestor Yuanshen could still feel it, and the little sword in the abdomen paused and did not stir again.

The ancestor Yuanshen has nothing to say, it has just revealed its sincerity, and the other party's sincerity is even greater.

But for it, hiding a sword in the belly is always very dangerous. If the condition is promised, the other party will kill it again?

But now I can only talk about it first.

“I admit that I had a problem with my previous attitude and regarded you as the enemy of the crime. If you can, we are cold and sand country, willing to live in peace. What conditions do you need?”

Shen Lang did not directly ask for it. It had to open it first. After all, the sword was in the belly of the patriarch. The longer it stayed, the worse.

“Is peace together? Yes, give me your weapon, I can withdraw my sword!”

Shen Lang just took aim at this thing. For the other things in Hanze, the light wind autumn memory knows that there is nothing he can use.

It is only the weapon weapon that this patriarch is in charge of. It is worthwhile.

The ancestor Yuanshen immediately stunned.

This is naturally a very good thing, so it will only be used, and other things owned by later generations, it can not be seen!

But this is to take the water ripple stick out and trade it, it is reluctant.

“This water ripple stick is handed down to me. Each generation is also the patriarch to be in charge...”

Shen Lang’s heart is dark This is no nonsense! Just because you know this, you will want it. If it is a waste wood, what else to do.

In the memory of Fengqiu, I only know the water ripple stick. I have never seen it. It is obvious that this thing is not only the head of the patriarch, but also very mysterious. It will not be easy to show people.

Seeing that Shen Lang was a little impatient, the ancestor Yuanshen had no choice but to sigh, and suddenly everything understood!

The big sword that can be lengthened just now, and its water rippled stick, can be put together, but the other party used it and it was put away.

At that time, I thought that I was afraid of breaking. I was proud of the water rippled rod. Now it seems that I was staring at the water ripple rod at that time. I didn't want to have any damage to the two magic weapons... I cherish this as my own thing. !

But what is it? If you don't give it, the other party will smash the genus's internal organs and kill the body. It will still be able to win.

It's not as good as the end, but it's better to get some space.

Chapter 2397 - Great army

After a slight entanglement, the ancestor Yuanshen made a decisive decision and immediately made a decision.

Since you lose, you don't need to temper more. Try a little more time and let the sword in your belly come out earlier.

It is not without thinking about it and pushing it out now...

But the problem is that the sword is controlled. If it can't be forced out, the just-seeking forgiveness will be done!

The other party is sure to concentrate on it. If it has a little movement, it will manipulate the small sword to continue strangling.

So it chose to give in, and immediately threw the water corrugated rod to the side of the sinking wave.

After throwing the corrugated rod out, it tries to keep it sincere.

"I have done what you said, will not regret it and kill me?"

Normally, the conditions that have been raised have already been reached, and it should be "delivered in one hand" and the daggers are withdrawn.

“Of course, I am creditworthy. I will be careful not to accidentally hurt you.”

When Shen Lang spoke, he began to manipulate the golden dagger and slowly came out from the wound that had been pierced.

Because this is in the abdomen, the shackles of the big cockroaches have passed. Now, if you just move it, you will also touch the broken wounds, which will make the patriarch's body extremely uncomfortable.

Be careful, naturally, the speed is slower.

The ancestor Yuanshen has nothing to say, if he is not to be so cautious and quick to withdraw, wouldn't he take the opportunity to hurt it again?

When it just threw the water corrugated stick out, it also slowly flew over. The purpose of both sides is the same, and it is necessary to delay the time.

Now it has been given, and the request has been made. Shen Lang has promised and done it... I can't blame anything, I can only keep the warning as much as possible, so as to avoid any other changes.

When the water rippled stick came to the front, Shen Lang did not take it into his hand to enjoy it, but directly put it into the storage space!

Shen Lang has always been pushed by people, and he does not mind the most malicious speculation of the enemy.

He can control the gold dagger to use the flying sword. This water rippled stick is someone else's. Will others control it as well?

If the environment changes, if he is forced to surrender his weapon, he will hand over the gold dagger. Wouldn't he think about controlling the sneak attack?

This ancestor Yuanshen will cooperate so well, nothing more than just a serious situation, so that it has to bow.

And as long as there is an opportunity, you will definitely want to turn over!

Therefore, Shen Lang took the name of “caution” and let the gold dagger slowly come out. Now it is still on the edge of the scales. It is the key moment that the other party is still afraid to attack.

Taking advantage of this, first put the water ripple stick into the storage space.

When you enter the storage space, no matter what kind of contact, it is temporarily isolated. This isolation is not as thorough as the space of the Bible, but basically there is no problem.

At the moment when the water ripple stick disappeared, the eyes of the mermaid patriarch were obviously a bit complicated. At this moment, the ancestor Yuanshen realized that the owner of this sand country was very embarrassed and would not give it a chance!

“You have already received my super magic weapon. Can you take back your sword now?”

When this sentence is said, it is obviously with a hint of irony. It is ironic that Shen Lang’s slow collection of swords is intentional.

“Okay.”

Shen Lang immediately slammed the golden flying sword from the wound that had been pierced before.

This is not slow, but it is very simple, but it makes the fisherman’s back pain unspeakable...

When the gold dagger penetrated, it was with a strong attacking power, and then broke through the scales. Because it is sharp enough and fast enough, it is just a crack, and it has not broken a big hole.

Now the gold dagger comes out from the inside, can be handled with ease, and the acceleration will not be so fast. Going in is a random tie, it is necessary to point to the wound, or else it will hurt more flesh.

The plunging is a fresh wound, and the exit is aligned with the rubbing of the old wound!

The appearance of the scales, originally a layer of defense, is now a layer of negative, to quickly get out of the scales, not only to be aligned, but also need to vigorously extract.

However, the face of the mermaid patriarch has not changed, because the abdomen has been twisted a lot of intestines and the like, it has long been painful, and then pain is the same thing.

“Now, do you still get along with each other?”

For its irony, Shen Lang asked the question.

The ancestor Yuanshen did not speak.

The just “peaceful coexistence” is a helpless decision that has to be done. Now that the “big heart” has been removed, the rest is more intense hatred!

Whether it is a wound in the waist, or a cramp in the abdomen, or the empty space of the water rippled stick, it reminds him of anger!

Just when it didn’t talk, there was a change around!

The army is in abundance!

Here is the ancestral temple, which is equal to the holy land of the Hanze people. When there is a change here, the nature of the guard is to spread the message with the sound waves they understand.

That will be met by someone, and it will spread to everyone quickly.

They all rushed to the temple for protection in the first place, but on the one hand the general mermaid was not fast enough, some were farther away, and they were fighting very fast here, so it was only here.

The straight road to the island, there have been a lot of fish people, the speed is different because of the strength, while some are coming from the cold waters.

When they had just received the notice, they sensed the huge fluctuations here, and then they were not close, they saw that the temple was gone!

For those who are instilled in the temple to worship the temple and worship the ancestors, this is not a big problem, everyone is crazy and angry!

Before in the distance can also see the huge figure of the dog god, now close, see the two outsiders Shen Lang and dog god, naturally is the enemy.

There were some powerful ones, and it was discovered that the patriarchs were all injured. The news of the mermaid sounds quickly spread the news, so that all the fish people who have arrived and are coming are known.

Originally, the ancestor Yuanshen never thought about summoning all the descendants to fight together. It has its pride and disdain to do such a thing.

If it is not the statue that has collapsed, it may not be attached to the patriarch.

But now it is relying on the body of the patriarch, it is already injured, it is difficult to match these two strong enemies. This made it necessary to put down the following, ready to win with human tactics.

“Do you think that the temple of my family has been ruined, can you live in peace without paying a price?”

I felt that the patriarch was under the pressure of one enemy and two, like the welcoming guest of Fengqiu and other backbones of the mainstay. This time, not only arrived, but also quickly divided the work, bringing all the mermaid people together, not a sand.

Chapter 2398 - Runaway

“Slay the thief!”

There was a windy autumn head and a head tie shouted, and immediately other mermaid people shouted.

“Slay the thief!”

“Slay the thief!”

They were originally with a strong hatred, and when they rushed over here, they were already furious.

But because this is something that I have never encountered before, I don't know how to deal with it, so when someone takes the lead, I immediately find everyone's anger and find a breakthrough.

The power to worship the ultimate faith is an energy, and anger to the extreme is also an energy, perhaps called negative energy.

Resentment, anger, jealousy, indifference, etc., to a certain extent, can produce energy, but also affect people.

Now all the many fish people have gathered together, and all of them have reached the maximum of anger. Under the slogan of the slogan, they have also guided all the anger energy to Shenlang.

In a very low-level state, these energies are not felt; ordinary people can't reach the state of generating energy.

When the strength is weak, Shen Lang will only feel irritated, unhappy, and arouse emotions, but now it is clearly felt that this is a large piece of negative energy coming over!

The strength and strength of the strength, and the strength of the energy released, will determine what effect can be achieved, some have great influence, and some have no feeling.

But now Shen Lang is not the same, his strength has been superb, the great gods peak, so that he can be aloof.

These angry energies, though invisible, can be clearly felt, as if they have emerged in front of them.

This, like the power of faith, can be absorbed actively and passively.

Now Shen Lang is completely repelling them so that they can't affect him.

And he has an idea to manipulate the emotions of the other party!

“Stop the thief? Are you going to kill him? Well! He is indeed a thief, not only ruining your temple, but also occupying the body of your patriarch!”

If this is said, the other party will not let him finish, so Shen Lang directly has an idea, and has swept the past around. The time covers almost all the fish people, so that they all feel this idea.

The anger of everyone has already reached the extreme. Now suddenly I have heard such a statement, so that everyone's anger will burst directly!

This thief not only ruined the temple, but also slammed it and buckled the issue to the head of the patriarch. He also said that the patriarch was occupied!

In the eyes of all fish people, the temple and the patriarch are almost the most important and most sacred!

One is the incarnation of the ancestors, the sustenance of spiritual beliefs, and the other is the strongest asylum seeker.

Under the normal conditions, everyone is accustomed to respecting them very much. No one is afraid of disobedience.

Now this thief, give the most sacred of the two together, let them immediately rushed out of control!

Other core fishermen such as the Welcome Division, who originally wanted to manage and distribute assistance, can maximize their power.

But now that the mood has reached this state, it is not that they can control it, and their anger has also been detonated, so the scene is directly out of control!

The idea that Shen Lang just manipulated everyone's emotions is directly skipping the ancestor Yuanshen. Otherwise, whether it is the ancestor Yuanshen or the patriarch itself, he can guess from his sentence that he wants to control everyone's emotions.

At the moment when the scene was out of control, only one person could control it. The prestige of the patriarch, even if it could not ruin everyone's anger, but also allowed all fish people to pause and listen to the arrangement of the patriarch.

And even if it doesn't know this sentence, even if it is not the patriarch who is thinking, from the reaction of everyone, I can immediately understand what is probably a situation.

Shen Lang is just a time lag, letting it want to exert influence, and it will not help.

However, what surprised Shen Lang was that the ancestor Yuanshen clearly felt the upgrade of everyone's emotions, and also saw that everyone was moving, but did not stop!

Is it difficult for this old guy to want to use all the mermaid as cannon fodder to consume his power?

However, even if there is such an idea, it does not affect the operation of Shen Lang!

Just why you want to provoke them more emotions, not just for fun, but to let them do it.

And Shen Lang himself, has already secretly started!

The way of sinking waves is that they did not think of it, that is, the dog \*\*\*\*\* did not think of it.

Because he is holding the golden scarab, and splitting his mental strength, he immediately summoned a batch of scarabs out!

For the gold scarab, Shen Lang is also a bit puzzled.

When you are on earth, you can summon it. That understanding is the same as the golden dragonfly. It is the sacred sacred sect. It is the army of worms that can be summoned from the magical domain.

But now others are in this “magic world” world, but have not seen a large number of scarabs.

Is the sand country established a contact channel in a forbidden place, from where to release a large number of scarabs out?

Or is this sacrament of the sand country itself a different world of bugs? Whether in the earth or in this ancient cold world, is the world connected?

But it doesn't matter if you don't understand it. The key is to use it!

As long as it can be used normally, it is abnormal regardless of what it is.

Just sinking the waves into the spirit, a little bit of a spirit, you can manipulate it, open the invisible door, you will be able to see countless scarabs, it will be feasible.

When he is picking up the emotions of the fishermen, he is also constantly releasing the scarabs!

When I was in the treasure cave of the Kemrisu water monster he tried to use the gold scarab, control the invisible door, and quickly “opened” it and immediately “closed”.

So for a short moment, there are at least a few hundred scarabs out of thin air, all of which are as big as fists.

Because the environment was not big at the time, and they were only one snake, so the scene was a bit hairy.

It is different now. He did not immediately “close” the door, but continued to release the scarab behind him!

In the twinkling of an eye, there are thousands of scarabs appearing out of thin air, and they continue to grow rapidly. When the fish people find that this is not the right thing, it is already a tens of thousands of scarabs!

The last time there was a fist-sized black scarab, this time Shen Lang discovered it, the most basic ones, and some reached the size of the washbasin, the tires are so big!

The time of the sacred beetle in the air above the original site of the temple is so spectacular!

Chapter 2399 - Insect army

The last time Shen Lang had already experimented, all the scarabs were controllable, and they all depended on his mental power to control.

Hundreds of scarabs are easy for him, but they are already over 10,000, and there are obviously some higher-level scarabs. In order to ensure that the situation is controllable, Shenlang has closed the invisible door. .

The current Shen Lang, compared with the original, is a hundred years of retreat, the realm is higher, the strength is stronger, the mental power to control these tens of thousands of Scarab army, in fact, is also very lightly rushed.

The control he wants to ensure is because he has to give up the energy to deal with the patriarchs that the ancestor Yuanshen manipulated!

The army of the scarab can deal with a large number of fish people, but for the level of the wind and autumn, it is difficult to entangle them, let alone the level of the patriarch.

As with the last time, after the appearance of these scarab beetles, they immediately understood the situation around them and regarded all living things as food locks!

This is a bloodthirsty craving, a hungry food madness!

Shen Lang has already determined that he himself will become one of the goals, and because he controls all the scarabs, he seems to regard himself as food.

This time is not a calm experiment, but a battle scene. He does not want to have any influence on himself.

So when these scarabs were summoned, they were influenced by his consciousness and excluded himself from the goal.

These scarabs that continue to eat crazy once, face so many living creatures, all rushed to the past, desperate sprint!

This is their instinct, and they don't need to control them to attack.

However, Shen Lang had experimented last time. It was their instinctive drive, but if he consciously commanded and manipulated the scarab to attack other living creatures, they would immediately excite themselves, as if they were greatly encouraged and morale. It's like a big rise.

Later, Shen Lang also analyzed, perhaps after summoning them, his spiritual strength is both the maintenance of their control and the source of their energy!

His intentional manipulation, that is, to a certain extent, will give a little more spiritual power, so they are all embarrassed.

In addition to controlling their attacks, Shen Lang tried to make them line up last time!

His slight thoughts, the scarabs, like the well-trained soldiers, are executed quickly and accurately, and the effect is as if he personally operated.

Whether it is to let them all attack from the ground, split into a team and a team of offenses, or the upper, middle and lower three attacks, all-round encirclement, etc., they can all feel, and then perform according to his meaning.

This process is very fast, almost like the order of the computer, the consciousness of these scarabs themselves is completely controlled by him.

The kind of handy feeling made him feel very enjoyable. At that time, he felt that hundreds of them were too few. If it was tens of thousands, the power should be soaring.

At that time, I thought about the effect of commanding a saint beetle army attack.

Later, although the battle continued, they did not use them.

Because of how spectacular it is, it is also a matter of winning by a large number, and the individual combat ability is still limited. It is a bit sloppy to deal with the ancestors of the realm of the gods, or the devils outside the domain.

Now it is finally a chance to come in handy. So many fish people, if he fights one by one, even if they don't fear them, it is very troublesome.

Besides, he is now here as the head of the country of Sha, and the corresponding is the mermaid patriarch of Hanze. Others, even if they are welcoming the servant level, are also embarrassed and have lost their identity!

The angry mermaid tribe, in the process of rushing to the sinking waves, suddenly dropped a large number of large scarabs out of thin air, so that they also stunned.

Single or dozens of words, not to mention the size of the fist, even if it is the size of the washbasin, they will not be afraid, the strength is not weak, and they can calmly confront each other.

But now it is tens of thousands of scarabs, so big heads, plus the dark body, suddenly have a feeling of covering the sky.

Just like people on the earth, if you encounter a small insect, whether it is an ant, a caterpillar or a donkey, you can step on it without any politeness.

Snakes will be afraid that a single mouse will not be afraid.

But if there are thousands of people at the same time?

That doesn't require snakes, no mice, no cockroaches, caterpillars, or even ants, it will make people nervous and fearful!

Because the light sees such a large amount, the mind has been sensible to understand, they are weaker and you can't all trample on it. Under the hordes of death, they can still climb your body and bite!

Now these big scarab beetles are all like beasts, with obvious ferocity, even if they have not seen them, they can feel that they want to treat them as food!

Originally, everyone has gone out of control, and there is no rule. From a certain point of view, like these scarabs, they are not afraid of sacrifice. They are asking for tearing away the Shenlang. Even if they are killed in groups, they will still There are some close and successful.

Now it's been messed up by countless scarabs, and it's gone!

The mermaids are all guarded by scales, and then they are desperate to kill the scarabs that appear around them.

There are too many, and it can't be killed. And they are very excited, all fearless, and they have to bite over.

However, in the blink of an eye, a lot of scarabs have been killed, but some mermaid defenses are not enough, and they are bitten.

After they were verified as food and meat, they gave psychologically an uneasy factor.

And those big scarab beetles like the washbasin like a tire have got more spiritual support from Shen Lang, they are not only fierce, but also have some wisdom, knowing when they rush, Dodge, know that the joint action together!

At this moment, Shen Lang enjoys the pleasure of commanding tens of thousands of Scarab army, controlling their formation, controlling their more intelligent or aggregated, or dispersed targets.

Originally, a group of scattered fish people, who suffered a lot more than their scarabs, have already become chaotic. At this moment, the scarab has become more systematically attacked, even if it has already died thousands of times, it is also a great increase!

The ancestor Yuanshen, this time still does not move!

It originally wanted to use a lot of fishermen and people to put pressure on Shen Lang, to talk about the conditions, and to see that it was impossible to leave this behemoth. Now its goal has been continuously reduced, not seeking money, and asking for a return. Or ask for less loss...

It is acceptable to be able to bring the water riplers back and drive them away. The temple is not destroyed, but it can be recovered. It is just the statue inside, and it has to come back.

But now this situation makes it very unpleasant...

Chapter 2400 - more and more

The ancestor Yuanshen was very entangled at this time.

On the one hand, it is very uncomfortable, even if it is a concession, at least the water ripples will come back. It has already caused the patriarch to be broken, and he cannot lose this magic weapon, or else the tribes will not rely on it.

On the other hand, now the owner of the country of sand, with the secret technique summoned a large number of strange Zerg, look at this number, if you do not stop immediately, even if the mermaid can win, to kill them, it will not be small .

The magic weapon is a non-renewable resource. If it is lost, there will be no, or one less; the population can be regenerated, but the population is the foundation of prosperity!

If the population loses more than half, it will not be able to slow down for decades, and the number of people will be filled up. It will take longer to fill in the strength.

The longer the time, the more variables, and if you are not careful, it may be the disaster!

“How? How much more? I have a lot. If they kill, I can summon tens of thousands!”

Shen Lang is calm and chats with the ancestor Yuanshen.

This time he always holds the golden scarab. If you want to open the invisible door of the elephant, and release the scarab beetle with countless spots behind it, you only need to inject a little energy.

And he is also distracted to control all the scarabs, and by manipulating them, let them attack in an orderly manner like the army, and make them more crazy and excited!

Not afraid of death, not afraid of killing, the fisherman's fighting power is stronger, the defense is thicker, and he can't stand it!

The ancestor Yuanshen did not care about it, and returned a thought to Shen Lang.

“How do you want to collect them?”

Although it does not understand how to operate specifically, but believe that Shen Lang can summon them, it should be able to send back.

Shen Lang smiled and said: “Did we not talk about good conditions? You said that peace is getting along, I agree! You want me to spare him, I only need a staff. You have to repent, want to kneel. People are harder to come.”

“You want to fight, of course I will accompany you!”

The irony of Shen Lang makes this ancestor Yuan Shen have nothing to say.

This is a moment!

If you are not willing to say it, of course it will not be reconciled.

But just like the short sword in the abdomen, it was shackled. Even if you are not willing, you can only take it first.

It's just that it still has the conditions for remorse. This time, I'm afraid I won't regret it anymore.

They are all consciously communicating, not delaying the time. Now the worm army and the mermaid are fighting.

To say that it is a battle, in fact, it should be regarded as a one-sided slaughter, mainly because the mermaid is killing the scarab.

But the scarab has an absolute number of advantages, and is not afraid of death and not afraid of killing, those who are large and large, but also have wisdom, know tactics, dodge, etc., the lower level is desperately rushing to food.

So even if it is killed very quickly, some mermaids are injured, and there are still a large number of Scarabs as a whole.

Shen Lang saw that the ancestor Yuanshen was still entangled, and immediately injected a bit of vitality, and once again launched the gold scarab.

The figurative "gate" in his consciousness was instantly opened, and a large number of light spots were released again!

These spots are the scarab beetles.

Just the mermaid's desperate fight, but also killed a few thousand, and now Shen Lang suddenly added more than 20,000 new forces to come over!

Those fish people, because of the strong anger need to be released, it was originally to rush the waves, the worms came over first, and they ran into their anger.

Therefore, they are very fierce and very smooth, although they are also flustered, although they are not afraid of death, but overall, they are full of confidence.

But now, they have finally killed thousands, and suddenly there are tens of thousands more!

Once again, the pictures of the sun are hidden, so that their hearts are cold.

How is this going?

How many more kills?

Then someone else will invest tens of thousands more?

That is not the more the kill, the more it kills!

These newly-introduced Scarabs, under the drive of Shen Lang, filled the space of the worms that had just died, and became more densely packed with most of the remaining worms.

“Not enough?”

The voice of Shen Lang, in their hearts, is with a voice of ridicule, with a sneer.

Before they are angry with Shen Lang, there are at least thousands of scarabs in the air!

The mermaid people began to despair!

This is the devil of the Lord of the Kingdom of Sand. This is where the so many worms are summoned and killed.

This feeling is like a student who has just finished a few minutes of a paper. When he has the confidence to answer all the questions, he throws ten sheets and asks enough...

The defeated is not a roll, but a huge pressure to compare it!

According to their recent progress, these bugs are not as strong as them. Except for the big ones, the others can kill. As long as the defense is good, they will not necessarily be injured.

That is a little more, and in theory it can still be killed.

But in fact it will become more and more tired, and more importantly, this is more and more!

They directly defeated them psychologically.

Although Shen Lang is mocking all of them, his eyes are always looking at the body of the mermaid patriarch, and he is looking at the ancestor Yuanshen.

His little dew is a show for the ancestor Yuanshen.

Do you think they can kill it? Then double it for you, and you can continue to double!

Just this scene, not only for the ordinary fishermen, but also caused a psychological impact on the ancestor Yuanshen. It has to give in!

“Don’t get it out again, get them all back! Conditions you just open, I won’t have any more regrets!”

Its energy has not been consumed, and the patriarch’s body is still heavy, but it can still hold on. If it participates in the war, it is still not difficult to sweep away these abominable worms.

But just now the other party has already shown it. You can kill a thousand or 10,000, and he can summon 20,000 and 40,000!

Where is the limit?

Can it kill it?

More importantly, is this owner of the sand country not going to shoot himself? Will this powerful behemoth not shoot?

At that time it will be destroyed together with the patriarch, and destroy them, other people are even more worth mentioning!

Hanze, the settlement where this deity was founded.

The mermaid, these descendants of the descendants of its deity.

This time it will be destroyed here.

What else can I do?

Can only ask for mercy again!

“If I ask for something, you will definitely feel bad, then I don’t want anything.”

Shen Lang’s statement made the ancestor Yuanshen very unbelievable. It did not believe that the Lord of the Shah State would speak so well.

“I will not hurt you, you can continue to live on him, or replace him to live, and I only need a memory of this patriarch.”

“Impossible!” This condition, let the ancestor Yuanshen immediately object!
