

First Strong 2411

Chapter 2411 - Combat

There are more than fifty barbarians, and even if there are more than half of the orders of the elders of Meng Hao, there are also a group of people rushing over.

With their body of more than ten meters high, it is just a piece of feeling.

When the elders of Meng Hao were in the opening of the wind, they actually saw it. That seemingly active maintenance is actually to force them to do it.

But he also has fire!

As the wind will say, he is the second person in Shibuya, the great elder of the barbarian. For the wind will not be in the eyes, but this time it was dismissed as “What are you?”

And at the moment when the wind will start, the barbarian can't hold it anymore.

If he immediately orders to die, he can still press them.

But when the march is to fight, what is necessary is the momentum. Just when the momentum of the party has reached the highest level, if it is hard pressed, everyone will be wronged and miss the best offensive time.

For Shen Lang, the “owner of the sand country”, he is still full of doubts. He feels that it will not be as simple as the wind will say, but he is not clear where the problem lies.

If he is only a middle-level, ordinary barbarian, it will be taboo to the king of the country, but he is the second person in Shibuya. It is inevitable to treat himself with the barbarian chief.

Now that you can't hold your breath, take advantage of it!

Anyway, they will also start to work with Hanze, and they still have a great grasp of the owner of this sand country.

What they want is the Pearl of Hanze. If you can win the three beads of the cold from the Lord of the Shah, you don't need to continue to succumb to Hanze.

Originally, they came here this time, that is, they have to fight. Compared with the battlefield and the large number of Hanze, it is of course easier for the owner of the dry sand country.

“kill him!”

The elders of Meng Hao gave a cry, and the momentum was mad, so that all the barbarians had a rhythm of assault.

The barbarians who had already rushed out first, heard the voice, got orders and encouragement, and were more interested.

In addition to inciting a large number of cold water attacks, the wind squad also led the mermaid family to leap into the air, ready to roll over to the sinking waves.

The elders of Meng Hao are also hands-on!

The situation has just made him satisfied.

His plan is to bring the barbarian and Hanze mermaid together and call the head of the sand country to say it. When the time comes, they will take it all away and leave here directly!

Now that I haven't laid down my opponent, it's natural to be united first. He believes that the wind will also be such an idea. I want to win with them first.

So at that time, they still have to compete for each other's interests, but the premise is that they can't let the owner of the sand country run away, or else no one will gain.

In this case, although there is no friendly relationship, but with the common interests, it is still able to complete very good cooperation.

Shen Lang and the dog ***** have not moved.

With the first battle in Hanze, the dog ***** is now full of confidence.

Of course, this state is actually very short-lived.

Because everyone's distance is not very far away, their physique is so big, the speed is so fast, it will take a long time to rush to them.

When they rushed to half, Shen Lang and the dog moved!

Shen Lang has already held the gold scarab, and the invisible door has already been manipulated in the consciousness. At this moment, the gate is suddenly opened, a large number of scarabs are released, and they are manipulated to fall. Among the barbarians!

The dog ***** rushed out to the front, and as it moved forward, the body suddenly became bigger and bigger!

Not waiting for a landing, the body of the dog ***** has recovered the huge body!

The two sides are rushing together, and the dog ***** is equal to the middle of them.

Originally, the size of the horse, the barbarian red giants of more than ten meters, can feel the tear.

But now it is its body suddenly bursting out of all of them!

All the fish people, originally leaped into the air, and then manipulated a lot of cold water to attack the waves and the dog god.

This scale is already normal, and we can see that they are really using their geographical advantage to attack the enemy.

However, at the moment when the scarab appeared, they quickly fell into the cold and disappeared immediately below the water!

At this moment, Meng Hao's elders reacted, and the active attack of the wind, using the attack of the cold water, is actually a blind man!

They didn't roll it over, not to use the cold water to attack, just to be able to hide into the cold!

The face of the elders of Meng Hao also became severely severe.

The Hanze mermaid was originally his strong support, and he needed to work together to be the head of the country. Otherwise, their pressure would be enormous.

And just after they had been attacking together, even if they were blind and sturdy, but after a large number of bugs that suddenly appeared in the air, they quickly fell into the cold and disappeared without a trace.

what does this mean?

With the identity and wisdom of his No. 2 character in Shibuya, he immediately guessed it!

The lord of the sand country, who possesses any evil method, can summon a large number of worms to attack. In the cold zee, it is probably relying on such a trick, forcing the patriarch of Hanze to yield and give him three beads of coldness. .

These mermaids, just so angry, can keep their hands, because they know this layer!

Now when I see this, I will escape. Obviously these bugs are even more powerful than expected!

Originally, the barbarians were tall and strong, and more than 50 people rushed out of the momentum of a thousand troops, but now, it has become a mess!

The beasts of the beasts suddenly became much better than their tallest ones. There were many people who were directly hit by flying. Then they went out with a paw, and some broke into the cold, and some broke into the cold. Ze waters.

And a lot of black bugs appearing out of thin air is more crazy to fly over to all of them.

The barbarian is a barbarian in the end, very savage!

Just the dog ***** rushed them, smashed them out, etc., because they did not think of sudden changes, but immediately they reacted, and then cooperated with a very tacit understanding.

Some directly saved a paw, some attacked the past of the dog god's abdomen, and when the dog ***** opened his mouth to bite one, the barbarian also directly supported his mouth with his hand, so that it could not bite.

Others are killing insects quickly.

Shen Lang controls all the bugs in the back, and observes the battle inside.

For all the worms, he is isolated from him and the dog god, and all other creatures are targets.

However, the mermaid family hides quickly and penetrates into the cold, thus isolating the breath of life, so now all the targets of the scarab are barbarians.

And the attack side of the barbarian is also presented!

Chapter 2412 - Dog ***** is poisonous

The barbarian face is fangs, but the skin of the body is reddish, like a red giant.

The current shots are similar to their shape. When they throw their hands out, they have a slight red color, like light, like an aerosol, and will soon disappear.

Under the observation of Shen Lang, it is clear that it is a very hot energy!

To put it simply, each of their attacks seems to be with flames. These already reddish and substantial energy, after touching the black scarab, directly burned them!

Not only did they do this, they were under the body of the body, and the red skin became more red, and the scarab that was bitten wildly was also directly burned!

When the fishermen and the scarabs were fighting, they were exhausted. They were indiscriminate, and as long as they were contaminated, even their scales would be torn and bitten.

Now, after the barbarians are defending, they are almost not afraid of their bites. Instead, they will burn them at high temperatures!

This almost became the barbarian singular killing of the scarab.

Among them, the elders of Meng Hao did not join in. He just defended himself. The scarab was burned after biting, and it was not close to it.

The elders of Meng Hao passed through the battle group step by step. The scarab could not reach his body, and the dog ***** did not attack him.

His goal is very clear – the thief first smashed the king!

Shen Lang.

The dog ***** was taken care of by Shen Lang and will not be attacked by the Scarab, but it also noticed the situation of the audience.

Looking at the Holy Beetle's ineffectiveness, I immediately realized that I should rely on it.

Originally, it relied on a stronger and larger physical advantage than the barbarian, and it was able to slam. However, under their siege, they were also held back.

When the paws are hugged, it is not easy to drop people out, and they can't catch other people.

Attacks on its abdomen and attacks on places such as its head are also risky.

Soon it was wrapped up by a dozen or twenty barbarians, even though it was much larger, so it was entangled and completely unplayable.

The barbarian may have experience in hunting giant beasts, so it is well-coordinated.

The first step is to control the target, and the next step should be to attack the vultures of the dog god's eyes!

But at this time, one of the barbarians made a roar and scream.

Everyone immediately discovered that the partner who supported the mouth of the giant beast had already reached the mouth and was swallowed after being chewed!

This made them all shocked.

Because the power of the partner just now, they are clear, it can be fully supported, and even tearing the mouth of the beast is easy, how can it be bitten?

Just before they had reacted, the dog **** had raised his claws before his mouth.

The barbarian is holding its claws and making it impossible to attack, but now, it is a tongue coming straight up and taking him into his mouth!

With their strength, when they clasped their claws, it would be very solid according to the truth, and they would not be smashed by a tongue!

Even if the beast's tongue is very strong, their strength is not bad.

“Be careful!”

Another barbarian holding on the front paws issued a warning.

But his words have not been finished, they have lost their voice. And everyone found that he also did the same, not to the mouth, the tongue broke into the mouth and chewed and swallowed!

how can that be!

The barbarian can't imagine it.

This suddenly became a behemoth, huge in size and powerful, which they all know. But there is no strong enough to swallow a few of them, or else they will not be wrapped up.

The dog ***** who liberated the front legs is more in line with the rampage and quickly grabs the other barbarians in front!

The other barbarians were originally killing insects and suddenly attacked by it. They also had to evade escape.

Just three consecutive pictures that have been eaten, everyone is concerned.

The dog ***** seems to be arguing against the barbarians who attacked it, and continues to attack other barbarians.

“not good!”

“What a ghost thing!”

“Be careful with poison!”

The barbarians who are on the dog gods have already found problems. The other party's defensive ability is extremely strong. They are not afraid of their biting attacks. Even the burning energy can not hurt him.

Now, it is between the hair, there are some vine-like things, wrap them in complete entanglement!

And these things are very strange, after they are entangled, they quickly drill into the body!

At this moment, they all understood that the three tribes who had just been swallowed up were not because of the relationship of strength. They could not resist being ***** by this poisonous vine!

Originally, the barbarian is not small. They are so many dogs and gods together that they feel that the joint force can be quickly killed. Such a beast, the skin of the flesh and blood, eating is also a big complement.

I didn't expect this to happen, it turned out that they have already been swallowed up by several people.

At the moment, the rest can't take care of the other, and the whole body burst into red, and the hot energy wants to burn all the surrounding vines!

Their release of reddish energy is still very powerful. Those meat-eating scarabs are instantly burned. Normally, it is easier to burn vines.

But they themselves understand that these vines can bind them, it is very simple, or they will break free.

Especially the partners of the few barbarians who have just been resisted, they are refused to swallow, naturally the power of this vine.

So they don't dare to neglect, they are playing to the extreme!

This vine-shaped plant is a poisonous grass that the former dog ***** could not break free from. At this moment, it was driven by the dog god. The hot energy did not burn the poisonous grass, but it provoked the toxic effect. Their skin is deeper into it!

When the dog ***** is fighting against the barbarians The elders of Meng Hao ignored their battles and went straight to Shen Lang.

Shen Lang looked indifferent. He manipulated all the scarabs while his eyes were looking at the elders Meng Meng who came close.

Meng Hao did not put the Emperor and the Great Beast in his eyes. He felt that even if the size was huge, the barbarians could be strangled together.

From the reaction of the Hanze people, he understood that these bugs are the most dangerous!

It is not too difficult to kill these worms. Why are mermaids rushing into the cold? Why do even their patriarchs have to give in?

The answer is coming out!

It is sure to continue to summon more bugs!

Can a barbarian kill a thousand or ten thousand bugs, tens of thousands? Hundreds of thousands?

So he chose to solve the Lord of Sand State directly, this is the cure!

Chapter 2413 - The most important battle in life

As the second strongest person in Shibuya, the elders of Meng Hao have always been compared with the barbarian patriarchs. At this time, he is the leader of the barbarian, and he represents the leader of the barbarian and the sand country.

Therefore, he kept the fan from the moment, and ignored the Emperor's behemoth and the Scarab. They were all embarrassed. He was going to fight the Lord of Sand.

He is also not ill, and he maintains a master position.

Although this speed will be slower, you can give the other party a little more time to prepare.

But only if the strength is not enough, you need to grab advanced attack!

The master is easy and casual, and is the first to come.

And he seems to be slowly moving, in fact, he is more than a dozen meters, does not need to step far and far, and can not take a few steps.

With the sand wave of the sand mask of the country, it stood so calmly, and did not make obvious defenses or attack.

This makes Meng Hao feel more ceremonial.

This is the battle of the master!

Masters don't need to be in a hurry like a sly, not to be as scared as the mermaid waste.

At this moment, he seems to feel that all the barbarians, behemoths, and big worms around have disappeared. It seems that on the land along the edge of this cold, there are only two people, he and the king of the country.

And the two of them will soon be out of a terrible battle!

The elders of Meng Hao were still a little excited at this moment. This is the battle he dreamed of!

What he needs is such an opportunity to prove himself that if he can defeat a leader of a party, it means that he has the strength of a true leader.

Then someone introduced him, and the name of Guangmeng was enough, instead of needing to be named "Shibuya No. 2".

The second person, it sounds very good, but in fact it is only a vassal!

Others think of barbarians, or have any dialogue with Silicon Valley, and the goal or the right to speak is always the patriarch. His great elder, the so-called second person, said that it is the real part of the errands.

Of course, if there is any problem, then he will be a black pot.

So this time, his attitude is very tough, that is, he wants to force the patriarch of Hanze to come out, and he wants to pass the challenge with the Hanze patriarch, and he is truly superior.

Now Hanze's patriarch has not come out, but the Lord of the Shah is here, and is also a stepping stone of the same level. He can defeat the Lord of the Kingdom of Sand and achieve the same effect.

The battle he expected was coming early!

And he did not go forward, the other side is also waiting for the wind and light.

Let the atmosphere of the scene become a bit of a hit.

The heart of the elders of Meng Hao is also very clear. The calmer it is now, the more embarrassing it will be when you wait!

Other barbarians rushed to the melee, but instead they could not show up for a while. But his battle with the Lord of Sand State is likely to be a winner in an instant!

So he is ready to keep himself the strongest defense. Once he is shot, it is also the strongest blow!

Wait... What is the situation?

The elders of Meng Hao suddenly realized that it was a bit wrong.

His so-called unsatisfactory pace is only relative to the speed of the battlefield rushing. In fact, it is also an instant to the other party's casual. He does not have to attack first, that is, to maintain the style and let the opponent come first.

But now he seems to have gone a lot of steps, why haven't he arrived yet?

Even if he was immersed in the excitement of the fierce battle in his life, he immediately found out that this was wrong.

This is not a problem with a few steps. It is only a few steps, which is equivalent to more than double the time!

Now he seems to keep a distance from the other party. Although it is not a safe distance, there is still a distance to attack and defend.

This distance, before one step, is still the case.

Before two steps, it seems to be the same...

He realized that it was wrong and stopped immediately.

He had just been a little bit mad because of his excitement. He only had the patriarch-level opponent he always wanted to fight, and he ignored the surroundings.

Now he still hasn't dealt with the battles of the Emperor's behemoth and the Scarab, but he paid a little attention to the surroundings and clearly compared the location.

Basically I have understood one thing, just a few steps behind, are all in place!

Or when he came over from the beginning, he was controlled every step of the way, and he walked out of the way of returning to fifty, which made him exceed expectations.

The owner of this sand country, apparently not manipulated his pace, but manipulated the entire environment!

The light is to shock him a bit, but also an instant high alert.

Has the other party controlled the entire environment?

If it is fighting, is it not in the control of others?

He was already prepared for the most powerful blow, and now he could not help hesitating.

"Xiao Meng, your heart is up."

Suddenly perceived this voice, let the elders of Meng Hao almost spit a blood!

“Little Meng”!

Who are you? So old-fashioned!

You have nothing to do with our country, but even if you live a long age?

“The Lord of Sand! I want to fight you fairly!”

Although Meng Yu feels vomiting blood, he must admit that the other party is concerned about it. He just has a heart.

Because the environment was found to be manipulated by others and not self-aware, the fighting spirit that filled his confidence was affected to some extent.

But after responding to this sentence, he immediately realized that he fell into the next!

The other party called him “Xiao Meng”, which was deliberate. He deliberately said that he was upset by the elders and predecessors, and this sentence itself affected his state of mind.

He let himself calmly respond to the desire to fight a fair, and it seems to pull back to the normal balance.

But the challenge is to get permission from others. Whether it is out of courtesy or other factors, I have put myself down a lower posture.

“Yes, you want to challenge me, want a fair fight, I naturally will not bully you, will give you the fairness you want. But, are you really ready?”

Shen Lang’s response allowed Meng Hao to confirm the analysis.

The phrase “will not bully you” is to put yourself in a strong side!

For Meng Hao, this is the most important battle in his life. He has placed high hopes on it. He hopes that through this battle, he will reach the patriarchal level.

So no matter what the details, including the verbal details, have not let go.

The benefit of paying attention to and analyzing very clearly is that you will not make mistakes, but the disadvantage is that you will worry more.

He knew that the last sentence of Shen Lang was intended to influence his interference and influence his mood, but he could not help but be affected.

Am I really ready?

Chapter 2414 - Psychological offensive

Shen Lang can influence others through the spirit, but it is also a prerequisite.

The most basic point is that the other person's mental strength is weaker than him, and the second is that the whole is weaker and easier to succeed.

For example, the average barbarian, or the mermaid, can easily influence or even manipulate them.

But this Mengzong elder is not the same. He is already the second person of the Shibuya of the workers. He is the great elder of the barbarian, and his strength is far better than the average barbarian.

And he wants to challenge the leader level of other settlements, but also wants to use people as a stepping stone. If you don't have strong strength, you don't dare to have this ambition.

In addition, he is challenging the Shenlang as a target. It is the most exciting time. At this time, if you want to infiltrate him with mental power, it will definitely fight back and there will be no effect.

But Shen Lang really did affect him!

This is because Shen Lang is purely through the exchange of consciousness, psychologically guiding him, rather than directly through the spiritual level of invasion.

Just now, Shen Lang just thrown him a question, are you really ready?

If Meng Hao is really very determined, naturally, there is no need to face this kind of problem, just do it.

He will be influenced by the guidance of Shen Lang, and will ask himself this question, which means that he is actually not determined enough.

Really ready?

In fact, Meng Hao has already had a firm determination of nine points, but only one point of vacillation.

The shake of this one is due to changes in the target. When he came, he was prepared according to the Hanze mermaid patriarch, but now he has suddenly changed to the head of the sand country. Even if he is very excited, he can't apply it directly.

Although he has not yet played a direct role with the "owner of the sand country", it has already had a triple impact!

The first weight is the words of Shen Lang, the mermaid patriarchs offer three beads of cold! This sentence contains too much information.

The second is the reaction of the mermaid people. They seem to assist in attacking together, but when the worms are summoned, they immediately fall into the cold, which is also the side-by-side information.

The third priority is the display of Shen Lang's personal strength. Even if he didn't play directly, he could summon so many bugs at hand, and he could not let him know if he didn't notice it.

In fact, he did not specifically add this information together, but this information has entered his mind, and it will naturally affect his analytical judgment.

So whether he thinks or not, the subconscious has already outlined a powerful king of the country!

If he just didn't force it, he kept the brutality of the barbarian and directly rushed to the past, and he would go to the top of the boat and not consider it.

But now, these have affected his thinking, and naturally it has affected his confidence.

"You want to beat me, not because I am your enemy, just because you need to beat me. But have you ever thought about it, if you lost with me?"

"I can beat Hanze's mermaid patriarch, you want to win me, the possibility is embarrassing. And if you lose, it is not just your personal confidence, all of you barbarians will be greatly reduced, they will even be Killed."

"And these are because of your decision. Do you want to pay such a big price for your own impulse?"

"Because you are not my enemy, so I communicate with you calmly, patiently ask you, is it really ready? Can bear the cost of losing, is really ready!"

"But you have to think clearly, once you and I started, there is no turning back. I can't be so friendly to you, and I will definitely kill all the barbarians!"

"You also perceive that my beast is still very interested in eating your barbarian."

Because it is the exchange of consciousness, these are the constant moments that are transmitted to his consciousness, not the verbal.

This is the layer of progress, direct contact with the part of his inner hesitation.

The point where Meng Yu hesitated was the other 53 tribal people!

If he is alone here, he can squander the boat without any scruples, anyway, it is not a death! Where else can you go?

But now with a large number of ethnic groups here, if he is defeated and dragged all of them to death, then it is impossible to explain to the ancestral ancestors of the Shigu barbarians.

What makes him more tangled is the attitude of Shen Lang!

Before Shen Lang said that he was “something”, then everyone was arrogant and angry, and no matter what Shen Lang said, he would not listen.

The current exchange of consciousness is a very peaceful gesture, and it is entirely an attitude for him.

And Shen Lang is not saying that the Hanze patriarch's affairs, Meng Hao did not see, but summoned a large number of worms, this is seen; the sacred beast became huge, powerful, swallowed the barbarian, also saw of.

Therefore, this information entered his mind. He was affected unconsciously. He felt that the owner of the sand country was still a person who was more meaningful. He directly analyzed the pros and cons, and let him know separately, so that he would not lose face.

In this way, he has been resolutely shaken by nine points, and has become half and half.

Fortunately, they are conscious communication, no dictation, long-term use of time, so I did not hesitate to look at it for a long time.

“The Lord of Sand State, we really need the Pearl of Hanze. If you really have three, you don't need all, as long as you can give one to me, I will never have to say anything, just stop!”

After half of the hesitation, he made a decision to open a deal with Shen Lang.

He came here to come to Hanze, that is, to trade Hanze with Hanze, but basically can confirm that Hanze will not sell, and then he plans to turn his face, and there is no good face to the wind.

But now Shen Lang has already given him a lot of scruples. He has no confidence and excitement when he has just walked in. He is ready to retreat to the next level. He can bring the beads of Hanze back, which is also a complete one Shenlang feels stable, the battle is not necessarily to be slashed, psychologically convincing the other party, it is even harder to fight without the war!

“The Pearl of Hanze, I naturally have it. It is ok to give one to you. But the reason is to make it clear. This makes it impossible to let it be. If you want to win me, then don’t blame me.” “”

“No! No! As long as I am willing to give up one – no, I mean, as long as we are willing to trade one for us, that is our barbarian friends and benefactors, we will never grab it!”

“Tell it, what are you willing to pay?”

Shen Lang did not offer the price himself, but waited for the other party to offer the price first.

Because he only knows that the Pearl of Hanze is the treasure of Hanze, the specific value of geometry, is not suitable for him, they are still unknown.

Therefore, if you can trade the barbaric treasures, then of course it is better.

In this way, it means that he has the treasures of the three different ethnic groups in Shaguo, Hanze and Shibuya. This trip is worthwhile!

Chapter 2415 - Sun beads

Seeing Meng Xi’s attitude, although it is not stated clearly, it can basically guess that it is probably, or that Shibuya has encountered a crisis and needs the solution of Han Zezhu.

The bigger possibility is that the patriarch of the barbarian has cultivated a problem!

Their energy is hot and hot, and can be simply classified as a fire system. In this ancient cold world, cold is the way to go, for example, there are cold fires everywhere, this lake is also called Hanze.

The water of Hanze is extremely cold, and the temperature of the cold is lower.

Therefore, the barbarian is a different kind of situation. It may be related to the practice of their ancient ancestors, or it may be related to the environment of Shibuya.

Now they need the Pearl of Hanze, it should be that the patriarch has cultivated a problem, and can not directly absorb the cold fire, etc., which requires the beads of Hanze to neutralize.

Only when the patriarch is in trouble, will the second person come to the team personally and have a tough attitude.

The reason why Shen Lang will use a psychological offensive will be to subdue Meng Hao instead of direct war. Of course, I am not afraid of losing both sides. On the one hand, I want to understand this point. I feel that this is an opportunity that can be utilized and more resources can be obtained.

On the other hand, it is also because Shen Lang does not want to be used by the mermaid family!

In the case of the barbarians, Meng Meng had not ordered it yet, that is, the wind will attack in advance and take everyone together.

When Shen Langyi summoned the scarab, the mermaid who attacked the squid immediately got into the cold.

This is very obvious. Their purpose is to trigger the two parties to fight, and then let them lose both sides. By then, the mermaids will come out and be cheap.

Shen Lang personally still has the confidence to break the barbarians, not to the extent of both losses, but still do not want people to succeed!

He and the dog ***** have smashed the barbarians. Is it different to help the mermaids solve a strong enemy who hit the door?

It's better to get the benefits. If you don't get any benefit, then you will be the hitter of the Hanze people.

Now that the psychological offensive has shaken Meng Hao, as long as it can be traded normally, it will break the wishful thinking of the Hanze people. If the two sides are interested in the event, it is not impossible to join hands with Hanze.

“The preciousness of the Pearl of Hanze, we are clear. Naturally, there will be no loss to you. I have a treasured Sun Bead with our Shibuya. I want to trade with Hanze. I am willing to trade with you now.”

Sun beads?

Shen Lang quickly searched the memory of a handful of kings of the world and Fengqiu. Some things in Shaguo and Hanze, he remembers a little more clearly, and the things of other settlements outside are not so understood.

Soon he has the answer.

The place where the barbarians live is called Shibuya. The legend is a land of wasteland. The environment in Shibuya and other places is different. The whole valley is hot and hot. It is said that there is a fire element to treasure, which is what they call It's something for the sun beads.

What the sun bead looks like, whether it is the owner of the sand country or the wind and autumn, has not seen it, and has not heard the detailed description.

However, Shen Lang himself can still have some speculation analysis.

Since it has been with the environment, or even the environment created by that thing, it must be an essence obtained under high temperature, but it is called the sun bead according to the shape obtained.

This thing, including the environment of Shibuya, should be the source of the power of the barbarian.

Simply put, this is the energy of high temperature to yang, while the beads of chilling are the energy of low temperature to yin.

The patriarch of the barbarian may have absorbed too much of this thing, and he couldn't control it, so he needed the Pearl of Hanze to balance it.

According to them, the sun beads are their treasure, and the use of sun beads to exchange the beads of cold is an equal transaction.

But for Hanze, this hot and high temperature energy is not what their mermaids need. The energy of this sun bead is even stronger, and it is equal to zero.

The Pearl of Hanze is their treasure. If it is really only left by the ancestors, or if other ancestors have obtained very little, it is naturally impossible to trade with them.

When Shen Lang and the dog **** discovered the barbarian, when they had just rushed over to the side of Hanze, they basically did not miss any plot.

Seeing Meng's attitude towards the Wind Club just now, it should have been before the two sides have passed, and the Hanze merfish refused, so this time they intend to buy it, or else they will be robbed.

It was only because of the accidental intervention of the two of them that it has evolved into the current situation.

For Shen Lang, whether it is the Pearl of the Cold or the Sun, as long as it is confirmed that this is their treasure, the value is the same.

Because he doesn't know the Pearl of the Cold or the Sun Bead, does it have any effect on him, and it is even more unclear whether there will be side effects.

Therefore, the Pearl of Hanze has three points. Of course, it is better to use another two to replace it with other baby. You can choose a little more.

Shen Lang did not respond immediately, so Meng Meng was a little anxious.

Originally, I was fighting. You let me change my mind, but I refused to trade. What is it?

"The Pearl of Hanze, I only need one! The Sun Beads, we barbarians are willing to offer double copies, and we hope that the Lord of Sands will help!"

He immediately added a price tag.

This should also be the bottom line that was prepared before coming. If you trade with Hanze, you are willing to change one.

He is now afraid of this situation – if the sun beads have no effect on the sand country, then the second one is also rejected by others!

Shen Lang just did not respond, in fact, is searching for memories, understanding what the sun beads are, and then comprehensive considerations. I am not interested in raising prices.

But now the other party is wrong as he wants to raise the price, so he doesn't explain anything. This way people will not believe it, but they will feel hypocritical.

“Since the Pearl of Hanze is so important to you, then I am happy to complete it. Two sun beads, for a pearl of the cold, sold!”

Shen Lang directly agreed.

This kind of thing is actually very subtle, because his influence on Meng Hao may be just a little while, waiting for him to calm down, or think more, it may become awkward.

Since it can be solved peacefully and can be changed to more things, why not?

As for whether he will fool him with fake sun beads, this is not so worried.

Because the other side is in urgent need of the Pearl of Hanze, this is ready for the sun beads to change, but the barbarian will be more worried that he does not have a real rim of the cold.

“Is there still the Lord of Love Sands suspended first?”

After negotiating the transaction, Meng Hao was naturally excited and made a quick decision.

Whether it was the impact of Shen Lang on his psychological offensive or the commercial transaction, it was all exchange of consciousness, and the overall speed was very fast.

But the battle outside is also fast.

Some of the barbarians continue to kill insects and kill a lot of scarabs. This is part of their win, but one or two of the part of the dog **** was eaten!

Chapter 2416 - After the transaction

In addition to the elders of Meng Hao, there are still 53 of the barbarians he brought, and now there are five who have been eaten by the Emperor!

Shen Lang immediately sent an idea to the dog god, issued an order, and gave advice!

He asked the dog **** to throw out the barbarian and then retreated to him, lest the barbarians take the opportunity to do it.

Because the agreement with him is Meng Hao, other barbarians have just suffered, and may not be in good order.

This is his decision. He can't let the dog **** be attacked and injured.

He had already been defeated by the war without a fight. If the dog **** was injured, he could not ignore it. If he returned to the battle, he would still make the mermaids in the dark happy.

The scarabs are much simpler, and he has direct control to summon the rest of them back.

This is the third time to summon the scarab, and it is not clear about their origins, but now Shenlang has electricity to treat them as their own army of insects.

To put it simply, after doing his second time as a thug, he has a little bit of affection.

The battle with the mermaids was good. Although thousands of scarabs were killed, some also ate human flesh and blood.

Now this time, there should be thousands of sacrifices, but because of the energy that broke out of the barbarian body, their bodies are like high-temperature flames, so that the scarabs, none of them are cheap.

Of course, this is just a pity of feelings, not to let him revenge for these worms.

The connection between the dog **** and Shen Lang is very tacit. Together with the instructions of Shen Lang, it does not hesitate any more.

It has just eaten five, and it is very cool to eat. Although these barbarians are hot and heart-wrenching, it also means a big supplement.

However, since Shen Lang said, it would not be greedy and greedy. Immediately, he received the poisonous grass and shocked himself. He took out the barbarians of the whole body and quickly reduced his body and returned to Shenlang.

When it completed this step, a large number of Scarabs quickly disappeared.

There are still forty-eight remaining barbarians.

They used to be rushing out of the momentum, like a thousand troops, now it is a gesture of defeat.

The barbarians who fought against the worms, although they were not injured, were very addicted, but the scale of tens of thousands made them a little scalp.

It's gone now, and it's a feeling of a deep sigh of relief.

Fighting the dog god, in addition to the five that have been eaten, there are more than a dozen, more or less infected with poisonous grass, this will be much more wolf.

In an instant, they all realized that the elders should have reached an agreement with the head of the country, and it would be an armistice.

Their arrogance was also suppressed by reality. At this point, they stopped squatting and learned the dog god, and they retreated a safe distance.

Shen Lang directly ingested a chill of the pearl.

Meng Hao has just breathed a sigh of relief, and the other party has really withdrawn, at least not let the tribes continue to suffer casualties. But I am worried that the Pearl of Hanze will not say anything, increase the price and the like.

If he wants to increase the price, he will be very embarrassed. Even if he is prepared, the sun bead is the treasure of Shibuya!

Now that I saw Shen Lang's appointment, I was really able to come up with the Pearl of Hanze. He was relieved.

The Pearl of Hanze is full of energy, just like the essence of heaven and earth, or the spirit of the spirit, this can not be fake.

Shen Lang has already taken it out. Of course, the elders of Meng Hao are afraid of his remorse. The two are his own price. Before the other party raises the price, he will quickly complete the transaction.

He immediately took out two sun beads.

When the enchanting beads and the sun beads appeared together, the surrounding environment had a subtle reaction.

That is a sense of rejection that is disgusting to each other!

Both of these spirits have a certain spirituality and do not want to be close to each other.

This is the same feeling of water and fire, it is equivalent to giving them a verification, to confirm that the other party's hands are not fake.

“Thank you! Please!”

Even if an agreement has been reached and this step is reached, the two sides will still be highly wary, and they are afraid that the other party will grab something and run.

Now they each control the Baozhu to fly to the front, not as simple as sending a general object, but firmly involved, if they do not get it, it will not be released.

The barbarian had already retired, and as soon as they saw the transaction, they were ready to prepare, and they were close.

Even if they are injured, and regardless of their injuries, it matters!

Both sent to the front and there was a process of interlacing in the air. The distance between them was one to two meters apart, but when they were not close, the three orbs were severely repelled.

The result is that under the control of the two of them, it is still a few meters away from each other, and finally at least ten meters apart before continuing.

They were sent to the other side, and the two made a gesture, and then they released the control and replaced the beads exchanged in front of them.

Shen Lang now has two beads of chill, and has received two sun beads. Trading it, the same level of baby has one more, naturally it is worthy.

And Meng Hao is of course very satisfied. The purpose of his coming here is to trade to the Pearl of Hanze.

Hanze will not let go, they have already prepared for a hard battle.

In fact, like these two kinds of energy, the limit is mutually exclusive, but when it is not strong, the environment of Hanze and other aspects will be a kind of effect for the barbarian.

And this is why it is obvious that Meng Hao is the second person in Shibuya, and Hanze is just welcoming the squad.

It is because they feel that by virtue of their mutual advantages and environmental advantages, their team can be dealt with by the barbarians, at least they can compete.

Meng Hao consciously has the ability to fight against the Hanze mermaid patriarch, but also to see him!

Such a comparison Now it is very lucky to be able to trade with the owner of the sand country to the Pearl of Hanze.

Of course, the cost of the lives of five ethnic groups has now been paid, but it is only a pleasure to ignore it for the time being.

However, the human heart is not enough to swallow.

Meng Hao just felt that he could get the pearl of Hanze, and he was already satisfied.

But now that it really falls into the hands, it is confirmed that there is no innocence, and the mind can't help but move.

Why do the Lord of the Shah State want to persuade?

Why is he so good to talk, almost no bargaining, one promised to change one?

After he got it now, his thoughts were completely different.

If he is really the sacred pearl that he received from the Hanze patriarch, then it should be done once, can he still be alive?

It must be hurt!

Chapter 2417 - Must fight right away

This idea makes Meng Xi feel a little like a dream!

Once it is determined that this is the “result”, then again, the other “reasons” will be another interpretation.

The head of the Sha State and the Hanze family had a big battle, and they were sure to be badly hurt, so the mermaid hoped that both sides would lose both sides.

The owner of the sand country is afraid that he can’t cope with the mermaid in the dark, so he will take the initiative to show him and deliberately guide him to complete the transaction.

To put it bluntly, the beast may be the main force, these bugs will not work, and he may not last long!

So he is the one who wants to exchange quickly!

And this chilly pearl, originally came from the Hanze mermaid patriarch, the white things, one for two sun beads, that is a cheap thing, can not be completed immediately, how can bargain?

After trying to understand this, Meng Hao looked at Shen Lang’s eyes again and became less pure.

Then I sensed a dozen injured Wolverines and several ethnic groups who were swallowed by the beast.

Meng Hao feels very unwilling!

In the case of serious injury to others, they are two for one. If you say it, it will become a big head!

More importantly, it is his long-cherished wish to fight with the patriarchal figures, and the opportunities are few.

Usually he can’t go to other settlements to provoke others. This time there is an excuse, so he thought about it or could fight with the Hanze patriarch.

It seems now that the patriarch of Hanze may also be injured. He certainly will not close the door and will not give him a stepping stone.

The owner of this sand country is the best goal!

As a result, I was almost fooled by the past, and almost missed the best opportunity!

Meng Min's thoughts at this moment are a bit tangled.

The three parties are intriguing and mutually utilizing each other. If he comes forward and fights with the Lord of the Sand State, no matter whether he wins or loses, the cheaper people are Hanze people.

The best situation, of course, is that the fish and the king of the sand country fight first. Even if you can't win, you can consume a part of it first. He will come to the end to clean up. That is the best.

But the problem now is that after the mermaid of Hanze, which caused them to fight, they retired early into the cold, and now there is no army of insects, nor has it come out.

The mermaid family is already fighting, and they have paid the price. They are not eager to fight again.

And Meng Hao can't wait!

If you don't do it now, the Lord of the Kingdom of Sand in front of you will definitely leave immediately. It will disappear from this cold, and it will be difficult to find it again. The ancient cold world is so big, he can hide wherever he wants, and he can't find it.

Even if you go back to the sand country, you will greatly increase the difficulty if you want to break into the sand country. Others have the advantage of geographical advantage and have the people of the Sha nationality play together.

war!

Must fight right away!

Defeat the owner of this wounded sand country, you can make a bad breath, you can avenge the tribe and increase your reputation.

In the face of the Hanze mermaid, it is even more truly famous, and the long-cherished wish has been reached.

The owner of this sand country is now, even if there are no other good things, there are at least two beads of cold and two sun beads!

If he had two pearls of the cold and two sun beads, then he would directly cross the patriarch and become the first person in Shibuya. It is a matter of course!

Face, fame, interests, and many other aspects, immediately detonated a slightly hesitant and entangled Meng Hao elders.

The only bad thing is to avenge the mermaid, but what about it? The benefits are all he has!

Thinking of this, Meng Hao immediately passed a message to Shen Lang.

“The Lord of the Shah, you have just persuaded me to give me a chance. I will give you a chance. Let’s be honest! Put your Hanze Pearl and the Sun Beads out, I can spare you a life and let you leave!”

Shen Lang couldn’t help but laugh: “Mr. Meng Hao, you have a problem with your brain? I will help you, do you talk to me like this?”

Just after the wave was also gratified, because he did not pay much, relying on the psychological offensive, he completed a big profit transaction, and did not make people fish.

I didn’t expect Meng Hao to turn his face right away.

With his mind, thinking a little, I guessed why Meng Hao thought so.

This guy thought that he and Hanze’s patriarchs had lost both sides, so they wanted to take advantage of it and give him a job!

Originally his idea was very simple, and it was completed. Maybe it could be exchanged, let the barbarian help him to pay attention to it, in case of the cold autumn looking for their area around Shibuya, bring a message.

How good is the direction of development, now it seems that it is still too good, human nature can not stand the test of interest!

Is Shen Langwei a person who is afraid of things?

It's just a matter of choosing a better price/performance ratio, and it's not like the fish.

Since this old barbarian is so unreliable, it is welcome!

His attitude, Meng Hao is not happy!

What he was most concerned about was that others regarded him as the second person!

Just able to convince him, because Shen Lang is a peaceful attitude, now said his attitude, this is itself a high attitude to discriminate against him!

“The Ming people don't say whispers! How did you get these three fragrant beads? You have already fought a battle with the Hanze mermaid patriarch, and it is already the end of both losses.”

“You are now guilty, just want to scare us away. Let you make a big ticket to leave! Think good, earned two mermaid beads, and earned me two sun beads.”

“They don't dare to move you again because their patriarchs have lost both of them. They are not guilty of your courage.”

“But I am different, we are not the same!”

“I have already seen your status, even if you pretend to be no better, no use you rely on your beast, once I shoot, it will only kill the life!”

“If you still want to keep your life and want to leave decently, then quickly find a reason for yourself. Take the initiative to give me the beads of the cold and the sun beads, I will keep you well! Make sure that the fish will not hurt. It’s yours! Otherwise else...”

Meng Hao that cool!

Just a string of consciousness sent by Shen Lang, directly shaken his mind, turned a bit of entanglement into half hesitation, and finally surrendered.

Now it is his turn to put pressure on it!

He is also a series of conscious pasts, exerting pressure from all levels, and must let the owner of this sand country understand the current situation.

“Death does not want to harvest you, you have to hit yourself to find death, this is the old birthday star hanging, live impatient.”

Shen Lang looked at his gaze and revealed a hint of mockery.

“I am a good person after all, I can fulfill you once, and now I can fulfill you again!”

Chapter 2418 - Undertake new targets of anger

“That is not to talk about it? I was also going to fulfill you once. If you find yourself dead, don’t blame me!”

Meng Hao looked a lot.

His mind has spread out, not to communicate with Shen Lang, but to order the other forty-eight barbarians.

Shen Lang is also communicating with the dog ***** consciousness.

This time, Meng Yu absorbed the previous lesson and will not let the Lord of the Shah State control the surrounding environment, but personally led all the barbarians to kill together!

The giant beasts and the worms have already had an experience. The barbarian will be better handled, and the owner of the sand country will give him the elder to deal with it!

Just when they rushed to kill the past, it was dumbfounded!

The Lord of the Shah and the beast of the gods disappeared out of thin air in front of them!

Did you escape?

He is full of momentum, his fist has been extended, and the goal has disappeared!

This made them all very uncomfortable.

He wants to win the king of the country, but this must be a battle to win.

If the other party is escaping, he can announce that the other party is afraid of him, but there is no fighting. This is not convincing. Others will listen, and he will not believe that he has that strength. More will feel that he is bragging.

He is now ready to consider many aspects, but gives him such a result!

“Roar—!”

Meng Hao directly broke out a roar, and the sound of the four wild, spread out far and spread into the cold.

With his lead, the other forty-eight barbarians also screamed!

Some of them have been poisoned, some have been dealing with bugs, and their partners have sacrificed. These grievous flames have not been vented.

At this moment, they will vent their anger at the same time.

At this time, above the Hanze waters, the wind and other mermaid families have emerged.

“Congratulations, congratulations! The elders of Meng Hao have successfully scared away the owner of the country!”

The wind will open the door directly.

Meng Hao looked at the cold and cold, he did not believe that the wind would be so kind.

“Wind! You Hanze is not willing to trade with me, then how? I got the Pearl of Hanze! And you have nothing, originally two treasures of Sun Pearl, can give you! Idiot!”

At the end of the day, he couldn't help but swear.

This is to vent the uncomfortable feelings against Shen Lang to the head of the wind.

The wind will not be annoyed, but will continue to speak.

“You are now missing five ethnic groups, and a group of people are injured. This should have a 20% discount on the overall strength...”

“How about that? Do you want to fight with us? Eighty percent of the strength, we have killed you little mermaid!”

Meng Hao sneered and directly launched the challenge.

He is full of anger now!

Everything that has to be done, face, fame and interests, are gone!

Although he does not know how the other party has reached it, it will certainly be sure that it will be used at this critical moment. It must have been transmitted far away, and may have returned to Saudi Arabia.

This means that he can no longer fight the Lord of the Shah, and all the negative emotions have all erupted.

The original arrogance is that it is venting, and the wind will take the initiative to hit it. This is to find death!

“These stinky fish! All are a bunch of rubbish! When I was fighting, I ran one by one, and now I ran out and loaded it!”

“Don’t talk to them so much, just kill them!”

“We have got the Pearl of Hanze, and then salvage some mermaid!”

“Kill them!”

“Destroy them!”

The other barbarians roared with the roar.

At this moment, Meng Hao has moved another mind.

Originally, he came here, knowing that the other party would not trade, and thought about fighting the mermaid patriarch. Through this battle to force the other side to trade the beads of the cold, it is best to be able to become famous.

But it was just the change of the process by the head of the country, isn’t it just back on track?

And when it comes, it’s not the same, now he can be lightly loaded!

Because the Pearl of Hanze has already been obtained, don't worry about this problem. Judging from the reaction of the escaping of the Lord of Sand State, it is also a verification point – he and the mermaid patriarch are both hurt!

That is an excellent opportunity now!

Taking advantage of the mermaid patriarch, he was wounded and defeated him!

If he doesn't show up, use the blood of other mermaid to force it!

This wave also allows him to win back his face, to bring the prestigious reputation, and to wash the Hanze mermaid population, and the benefits will not be inferior to the owner of the sand country.

With such a thought, his emotions are back.

Anyway, the goal can be achieved, the goal is A or B, and the relationship is not that big.

Instead, the wind will jump out and let him have a feeling of recovery!

Otherwise, after they have vented a pass, they may leave directly and go back to Shibuya.

Now it is the target of the Hanze mermaid!

But in fact, they regard the mermaid as a prey, and the mermaid is also treating them as prey!

Because of the grammar of the exercises, coupled with the special nature of Hanze, the fishermen feel that the wind will be their party, they can make the barbarian team led by Meng Hao.

Now that death and injury have lost one or two percent of combat power, is it easier to get it?

Originally, they were passively dealing with barbarians. Now it is different. The pearl of the mermaid's treasure, Hanze, has confirmed that it has indeed been gone by the king of the country!

Now that one is in the hands of the barbarian Meng Yu, this will of course be taken back!

Moreover, this matter has already been ugly and ugly. It is necessary to destroy all of their barbarians here, in order to achieve a violent effect.

They dare not directly go to Shenbo because of psychological shadows. It is a tens of thousands of holy beetles. It is a very headache to deal with.

But dare to deal with the barbarians, can take back one from the barbarian's hands, but also reduced a lot of losses.

Now the mermaid headed by the wind will be humiliating, hateful and eager, ready to kill the barbarian!

The two sides look at each other, the meat inside the bowl!

In the space of the book at the moment, the dog **** is very puzzled.

“Why are we hiding? Are you afraid of them? I can!”

It just didn't make much fun, just because Shen Lang had ordered the suspension and retreat, so it must stop.

Now the other side wants another wave, it is trying to complete what has not been done before, and swallow these barbarians one by one!

As a result, Shen Lang gave a greeting and directly brought it into the space of this day.

The dog **** was originally a dominant player in the world of giant beasts, and there was no habit of running away. With the situation encountered by Shen Lang, you can also accept the escape.

But to escape, it should also be a strong enemy that can't fight. Just these barbarians will not let them run away.

Chapter 2419 - Confirmation of harvest

Shen Lang looked at the depressed dog ***** and smiled and responded.

“I want to fish the fisherman!”

What does it mean to sneak a dog and fish out the fisherman?

“Let’s say it! Because we were fighting with them on the island before, let these fish people fear us. So when I called the army of insects, they quickly hid into the water.”

This is what the dog ***** knows. It was such a situation before.

“So, they hope that we and the barbarians will lose both sides, and it is best to die together. And as long as we are, they will not dare to come out casually, so I want them to fight first!”

The meaning of Shen Lang is obvious. They are not there. The fishermen dare to come out and fight with the barbarians.

And no matter who wins or loses, he can come out and clean up the situation.

This is naturally to report that the wind will lead the barbarians to attack their enemies!

As for the barbarians, they can’t run again. If the attack with the mermaid is injured, it will be better handled; if they win, they will take the initiative to find the sinking waves.

In addition to this, there is another point, and it is also the first to avoid the edge of the waves, so that they have nowhere to anger.

To be reasonable, the dog ***** certainly said that it is not a deep wave, it is also a complete belief in Shen Lang’s judgment.

However, at this moment, emotionally, it is still a bit stunned, hoping to go out earlier.

“You are calm, just the energy of these barbarians is like fire, you swallow them, what will the effect be? Now, in addition to solving the problem, you can also study the countermeasures!”

“There are still forty-eight, and maybe there are fish people who have to deal with it together. If you go out, you will be more efficient.”

Shen Lang said this, immediately poured like ice water, let the dog **** calm down.

Yes, it is excitement to go out to fight, but in this strange world, on someone else's site, you must ensure that you can win, or you must be fully prepared.

Just over a dozen barbarians, they entangled it, it can be seen that the strength of these barbarians is also very weak, there are more than forty!

If there was a bug in the army, then it would face three times the attack! Or there are twice as many people, attacking the waves with Meng Meng!

The dog **** is to help the Shenlang busy, can not do the main force, but also strive to share half of the pressure.

So at this moment, it calmed down immediately, let go of the ***** thoughts of going out to fight, patiently squatting down and closing the study.

I have just swallowed up five barbarians, both head and energy, which are very strong, so that it is full. But to digest these, it still takes time.

The hot energy is mixed in its belly and it is a bit uncomfortable.

Now, in addition to trying to resolve these energies, we need to figure out how to crack them. How can we solve these barbarian and mermaid families more quickly?

This has become a busy moment, there is no need to take care of so much, and everything is waiting for the order of Shen Lang.

After Shen Lang woke up the dog god, he was not idle. He is finally free to check the harvest.

The Pearl of Hanze, this is the ancestor of the Hanze mermaid. He has the memory of Fengqiu, and he has a little understanding of this information.

The sun beads are just traded, and the things of the Suigu barbarian are just heard of the name, and the specific effects and effects can only be guessed.

These two things are mutually exclusive. I have already witnessed them. Both of them are sensed in the air, but their locks are directly repelled to one side, at least ten meters away.

Now Shen Lang is pondering about their situation, and there is no intention to let the two appear together.

Undoubtedly, they are all beads with extremely powerful energy, the level is not inferior to the essence of the world, and the tendency is more obvious.

To the cold of the cold zeal, the energy is ultra-low temperature and chilly, hot sun beads, energy is hot and yang, if it fits the method, the effect will be fast.

But this is also a double-edged sword!

If the other way, people who practice negative exercises or chilly environments, if they use sun beads, it will not only have no effect, they will seriously pull their hind legs, and may even destroy their own cultivation.

vice versa.

But now the barbarian is looking for it, Meng Hao is eager for the Pearl of Hanze. According to the analysis of Shen Lang, it is likely that their patriarchs are overcrowded. It is estimated that they will reach the edge of the explosion, which requires the balance of the cold.

According to the traditional thinking of China, this is a very well understood, balanced way of yin and yang.

If the two are not used well, they will be mutually exclusive. If they are used well, they may be complementary.

The mermaids are in Hanze, the barbarians are in Shibuya, they all have their own settlements, there will not be too much communication, and it is even more impossible to circulate the treasures that they rely on.

Therefore, the consequences of mutual exclusion are imaginable, and complement each other, but there is no such experience.

This is why the mermaid does not care about the sun, even if it is precious, it is waste for them.

And the barbarian will find it, and there is probably no way, and the last dead horse is a living horse doctor!

Shen Lang is a person who does not forget his heart.

The three of them use gold coffins to explore the world, not for tourism, but to find some better resources.

So with mermaid, and barbarians, if there is no interest, purely vindictive, he is not risky.

It is normal for the dog **** to be irritated and excited, but he will consider it comprehensively.

I have already got the Pearl of the Cold and the Sun Beads This is from the leader level of the other party, and it doesn't look like a fake.

However, under the urgency of the situation, it has not been carefully verified, and it is still doubtful.

Now in the space of Tianshu, one of his purposes is to confirm, to confirm that they are really treasures, if they are pitted, then they will come back!

Now the Pearl of the Cold and the Sun Beads have been confirmed, and the rest is the water rippled rod.

The water rippled stick is actually a lot lighter, because this thing was just seen by the ancestor Yuanshen who controlled the Hanze patriarch.

In the case of that moment, the ancestor Yuanshen had no way to change the same fake to adjust the package.

Now it is not a confirmation of the water ripple rod, but to further understand the study.

The water rippled stick is the magic weapon of Hanze passed down from generation to generation. It is different from the nature of the Hanze Pearl, but it is the treasure of Zhenshan.

Unlike the Pearl of Hanze, the water rippled stick has been seen in the autumn, but it is also a way of paying attention, and there is no close contact.

Chapter 2420 - Residual scene

The water corrugated rod is a magic weapon that the Hanze patriarch can possess. Even if it is given to other people, the normal is still unmovable.

The fishermen like Fengqiu are not moving, and the outsiders are even more immobile.

But now it is different. It is completely isolated here. The seal of the Hanze patriarch is completely ineffective.

This is tantamount to being an unowned thing. Shen Lang can now re-confirm the mark and become his magic weapon!

Once he succeeded in marking his mark, it was impossible for the Hanze patriarch to manipulate the water ripple stick.

It's like a mobile phone, the original owner, can be locked, positioned, or even remotely controlled in the cloud through software.

But if you completely break the network, then unlock it, crack the jailbreak, and then re-network, with the new account ID, it has nothing to do with the original owner.

Shen Lang does not understand the specifics of the water ripple rod, but the law is universal, and when he comes to such a realm, once the magic weapon is started, he will soon be able to figure out a rough.

In the worst case, the hardness of this thing is no problem, and it can resist the slash of the sword of the king.

Now, after confirming the imprint of the water ripple rod, it is also based on the legend that I have seen the use of the ancestor Yuanshen and the story of Fengqiu memories.

Soon, Shen Lang will understand a rough!

Hard and so on, it is only an intrinsic property. It is really a big feature that is able to release energy like water ripples. It looks like a ripple of water, and it actually contains extremely powerful energy.

When it is against the bombardment of the dog's claws, it is not just the direct contact of the rod, but the water ripple energy meets and can resist.

And it is capable of manipulating the surrounding energy, especially the water system energy.

For example, in Hanze, its water ripple energy can directly call the control of Hanze waters.

Although it is not convenient to operate the water ripple rod in this book space, Shen Lang can understand the rules of use, etc., and make it familiar.

For the outside world, Shen Lang is of course unable to know. Even if the detector is left, it is necessary to go out before you can see the record.

When people are in the space of heaven, everything is determined by analysis.

In light of the previous situation, he feels that the mermaid will be them, and it should be unwilling. Not willing to take away the beads of Hanze, and I am not willing to let the barbarians make trouble here.

But they are not reckless, knowing the strength of Shen Lang, so that even if they have the advantage of geographical advantage, they are also the first choice to hide, not with the barbarian.

As a result, they did not fight, but instead completed a friendly transaction. When it was time to fight again, Shen Lang unilaterally withdrew.

Both of them did not know that he was still in the same place. Normally, he thought that he had already transmitted to a distant place. Combined with Meng Yu's doubts, he would feel that he was injured, so he took the opportunity to escape.

Then it is impossible to wait for him to come back. If there is any idea, it is the matter of both sides.

The barbarian has already got the pearl of the cold, this is what they want; if they leave, it is the loss of the battle just sacrificed.

In the case of the mermaid, both Shen Lang and the barbarian retreat, which means that they have solved the enemy and should be thankful.

But the hearts of the people may not be so peaceful!

After the completion of the win-win transaction, the monk of the barbarian, after analyzing the opportunity to win the wave, immediately turned his face and wanted to take them down, all of which had a harvest.

If there is no sinking wave, will he be willing?

He would think that both Shen Lang and Hanze's patriarchs were both hurt. Doesn't that mean that Hanze may not have a fisherman as his opponent?

Comprehensive analysis, Shen Lang thinks that the barbarian will shoot the mermaid, instead of taking the time to leave!

In terms of mermaid, it is possible to see from a few people who only come with the wind, including all the other things in the back. They are self-sufficient in possession of the land and are able to restrain the practice of the Shibuya barbarian.

They are not afraid of barbarians!

Just just afraid that Shen Lang summoned the scarab!

Now that there is no Shenlang, there is no army of insects, then they will certainly be willing to work on the barbarian, taking the beads of Hanze from the hands of the barbarian, indirectly recovering some of the losses.

Based on these analyses, Shen Lang feels that after he leaves, both sides should have a wave. Combined with their strength, you can estimate an approximate time.

Everyone wants to take advantage of the profits, and the same is true for the waves, so they are not in a hurry.

Combined with the time of 100 times here, he calculated that when he was just right, he greeted the dog god.

During this time, the dog **** digested the hot energy, while also pondering how to deal with the barbarian and the mermaid, when it was called to go out, it was very calm.

When they appeared, they were still in the place where they disappeared before.

As soon as it appeared, I saw a serious disaster scene!

Because it is just the land on the edge of Hanze, there is no building, and of course there is no wreckage, but on this land, there are also a lot of battle marks.

Let Shen Lang be a bit surprised, there are no mermaid and barbarian on the scene!

Originally, he calculated the time. According to the reason, it should be just finished, just when he came to clean up the mess, how was it finished in advance?

This is a bit disappointing. If you finish the game in advance, the barbarian ran away, even if it didn't go far, it was hard to catch up in this cold environment. The mermaid family naturally hides.

The dog ***** is also quickly observing the surrounding environment.

Shen Lang immediately sensed it.

The golden mask is the same effect as an amp, and the soul ***** swims out, which can greatly open the sensing distance. If it is concentrated in the vicinity, it can greatly enhance the perception of details.

And because this is just what happened, Shen Lang didn't need to use the green pebbles, and in the golden mask state, he quickly reappeared the situation here.

After they left the wind will come out with the mermaid, the two sides soon battle, their battle is not evenly matched.

Obviously barbarians are more powerful, but fish people have a natural advantage.

They did not land directly on the shore, but on the waters of Hanze, using the water of the cold.

In this respect, their attacks have been significantly increased, and on the other hand, there is a clear suppression of the hot barbarian.

Therefore, even though each of the obvious barbarians is stronger than them, this wave is an elite for the battle, but it is still controlled by the wind.

However, there is a change in the barbarian!

Meng Hao Da Elder!

Before he had no chance to shoot with Shen Lang, he was shackled. When he shot, he would let the wind wait for the fish to collapse!

It is precisely because of the crushing in this realm that their battles end earlier than the predictions of Shen Lang.
