

## First Strong 2431

Chapter 2431 - Cause my discomfort

“The patriarch, it looks like a good spirit.”

Shen Lang is not a guest, nor a satire, but a fact.

After just two discoveries, and then carefully look at the patriarch's overall, he can feel that the patriarch is indeed a good spirit.

This is not the same as the state of the previous injury.

He and the dog god, apart from staying in the space of the heavenly book, actually did not leave long. And this patriarch, even so fast, has been healed!

This is indeed a little unbelievable, even if it is a hundred times longer, it is still very short.

However, Shen Lang was not too surprised, because he had just had such a conjecture.

The patriarch must have his heritage, and the ancestor of the ancestor is more likely to have secrets that the current patriarchs have not known.

Now, this is a proof.

“Everyone is gone! I will handle it.”

After the patriarch and Shen Lang looked at each other, their eyes turned to all the mermaid, and then suddenly there was a surge of energy, instantly covering all the mermaid on the scene.

Shen Lang only felt this energy, but the reaction of the mermaid was different. All of them were like the spring breeze, and they became very comfortable.

Shen Lang naturally pays attention to all their changes. When he let go, he discovered that this energy is like a great help for all mermaids.

All the mermaids on the scene have gone through the battle with the barbarians, some are injured, some are very tired, and more or less affected.

After being covered by the energy of the patriarch, they were exhausted and the injured, and obviously relieved.

It is naturally grateful to have all the fishermen who have helped the patriarch to heal, and the confidence of the patriarch is also embarrassing.

But no one spoke, including the worried Fengqiu and so on, all silently saluting, and then quickly went to the island and quickly disappeared.

Because they all understand that no matter how the patriarch's injury is, they can't stay here!

Stay here, they are cumbersome, it will affect the patriarchs to play.

Just like before, it was because of the numerous insects attacking them that the patriarch had to give in.

If they leave, the patriarch can let go.

Judging from the cure of the patriarchs, the injury should be a good recovery.

Shen Lang certainly understands what he is playing, but he did not say it, nor did he stop it.

“It seems that I don't need my kind help.”

There are no mermaids on the edge of the island. They are far away, leaving the mermaid patriarch and Shen Lang.

The patriarch re-examined the waves.

“You should not come back.”

“I have returned.”

“You are here, you won, and you will benefit on both sides. But you should accept it and you should not be here.”

“I have already got it.”

The answer of the two people seems quite interesting.

This is a gesture of confidence!

What the patriarch said in this way is that you should not come back. If you come back and make a profit, you should go right away. If you continue to work on the mermaid, you will delay the time and let him have the opportunity to go out.

The meaning of Shen Lang is that I will come, I will be stunned, how are you!

When the dialogue reaches this level, naturally there is no way to proceed.

Both want to force, how to continue!

The mermaid patriarch was silent for a moment, then slowly said: “I have just stopped my family from being injured, I can give you another chance.”

“Oh?”

“Hand over the beads of Hanze and hand over your income, you can leave with your beast.”

To observe that the dog \*\*\*\*\* has swallowed up the bluebird's fire, it is the original patriarch, and now the ancestor of the patriarch's body, who is the ancestor of the patriarch's body, is not very interested in this.

“The Pearl of Hanze, I have already traded one with the barbarian. Is it a good deal to change the sun beads of two Shibuya people?”

Shen Lang continued from the self-concerned: “There is one less, besides me, are you still going to chase the barbarian? Can you leave here? How much power can you play when you leave here?”

“I can kill you first.”

The ancestor Yuanshen responded coldly.

Among his eyes, there has been a murder!

The various situations that occurred in Hanze today made him feel very unsuccessful, very depressed, and now, it is time to come out of this evil!

Shen Lang shook his head: “I was just teasing your descendants, and now you have succeeded in causing my discomfort.”

He just thought that he was leaving, and he was the last to play these mermaids.

The patriarch was hurt by himself, and naturally he knew that there was a general and there was no intention to help treat anything.

But now, the attitude of this ancestor Yuanshen has already made him very upset.

Of course, it also evokes his interest!

In the end, what kind of way is it to recover the injury so quickly?

In the mermaid family, Shen Lang only read the memory of Fengqiu. If the memory of the ancestor Yuanshen can be read, including the memory of the patriarch, it would be cool!

The patriarch is to understand everything about the Hanze mermaid now. For the contemporary cold weather, I know a lot about it, at least not below Meng Xi, and the information of the Lord of Sand Kingdom thousands of years ago.

The ancestors of the ancestor Yuanshen do not know whether they have the memory of the ancestors of the Hanze mermaid. If so, then they can know a lot of information since ancient times.

From the previous situation, even if there is no complete memory, it should be part of it.

Therefore, Shen Lang is now very keen to take his memory.

However, the other party from the previous cautious to the current arrogance and confidence, certainly not only the recovery, it is likely to improve!

Therefore, the mouth said that Shen Lang himself is still highly alert, and also reminded the dog god.

“The opportunity has been given, you are not sure, I have already returned the human condition. Now is the time to settle the account. Everything you have done to me, I have to pay back all the things you took from Hanze, I will let you Spit all!”

“Old ghost, where are you confident? This is not your body. You have problems with your manipulation. What do you wear with me? I can break you once and you can break you twice!”

Shen Lang snorted, like a very arrogant disdain.

The ancestors of the ancestors, the gods, were really sneer.

“I am more grateful to you when I say it! If it weren’t for you, I will always be in the image of God until I die! But now, I am no longer a dream, I have succeeded in living! I will be Dominate the whole world!”

His proud words have revealed a message – he has already won the patriarch!

Chapter 2432 - New life first battle

The ancestor Yuanshen controlled the body of the patriarch, naturally it was much better than it controlled the gods.

But after all, this is the way to live, to control the body of others, or to have some resistance and inconsistency.

After he completely integrated, it is different. Now the body of the patriarch is already its body. It is a big leap with him.

At the most basic level, whether the patriarch has obtained the inheritance of an ancestor Yuanshen or the ancestor Yuanshen has a strong flesh, it will be the result of the addition.

In fact, when the ancestor Yuanshen got a strong flesh, it was not just the result of the addition. After he annexed the patriarch's soul consciousness, he was greatly strengthened, and naturally he could exert the strength of the flesh more powerfully.

Because the current patriarch, naturally can not be compared with the original ancestor who opened the cold, it will really be a god-level existence.

The reason why the ancestor Yuanshen was slammed by Shen Lang was because it was a tribute to the ancestors. In this temple, it was attached to the image of the gods, and it was strengthened by the incense of the descendants.

It is said that the avatars are very stubborn, and the natural combat power is limited.

But the annexation of the patriarch is different!

It's like an advanced system, even if it's not complete enough, it's an advanced system. Installed on a low-end mobile phone, it can't exert its effect, and it can be installed on the flagship machine to make the flagship machine even more powerful.

Shen Lang himself is an example, although not exactly the same, but similar.

He had just awakened when the body is not matching the consciousness, the weaker the more limited time to play. The more powerful, the more you can get the help of previous life memories.

In any case, the current situation has basically been determined.

On the one hand, this ancestor Yuanshen really swallowed up the former patriarch and got a better growth.

On the other hand, he still has any secrets, or what secrets he gets, so that the patriarch's injury is quickly restored.

The combination of these two is to let him come out to avenge and even say the confidence to re-master the world.

This requires vigilance. If you still deal with the degree of patriarchal control before, you will not be defeated, but you will most likely judge the misstep.

With this judgment, Shen Lang once again reminded the dog god.

Now that the other party has dispelled all the mermaid people, there is no burden, and then summon the scarab, for this level, there is no effect, at most there is a little interference.

For this little bit of interference, Shen Lang has to mentally control the scarabs, and there is not much price/performance ratio.

“You have succeeded in living, and your son and granddaughter is equal to being killed by you! Are you conscience?”

Shen Lang sneered a sentence.

They are direct conversations without conscious exchanges.

The mermaids have been dispelled and left. In order to avoid affecting the patriarch's play and avoid being used by the enemy to marry the patriarchs, they are all hidden as much as possible, and naturally they will not hear the exchanges here.

The irony of Shen Lang did not make the ancestor of the ancestor, the new patriarch, feel ashamed.

“Since they are descendants of my children, it is of mine. If there is a chance to bring me back to life, they are naturally willing to give their lives. This will be their glory!”

“And even if I am the resurrection, is no longer me, I will be in the presence of his name! I'll give it to him and let him become the greatest chiefs, led by Han-taek mermaid family, took to the peak!”

The ancestor Yuanshen has successfully entered the role, he is the new patriarch of the Hanze mermaid!

In fact, think about it, he should also be a bit troubled.

To say that he is the ancestor of the mermaid family of Hanze, the ancestor himself has already died, he is just a glimpse of the existence.

Without the idol, he did not even exist in the form.

Controlling the body of the patriarch, that is the patriarch, not him.

The ancestor, the idol, and the patriarch are not him. Now, after he has merged and merged, he has grown into a brand new soul, a soul that is not an ancestor or a patriarch.

This new existence is him.

This ancestral ancestral \*\*\*\*\* finally developed into a completely independent new personality.

His existence only borrows the identity, name, etc. of the patriarch, and the future thinking and behavior are all new people.

And there is no doubt that the new patriarch who has the ancestor consciousness will really take advantage of Hanze to forge ahead. As for whether this is good or bad for Hanze, it is necessary to see what height the new patriarch can reach.

Now, it is the first battle!

The new patriarch's freshmen set sail for the first battle of Yangwei.

Conversely, it can be said that Shen Lang is the first stumbling block to Yang Wei. If he can do it, it will be a stepping stone!

"You are too late to leave, you will be the first goal of my Liwei!"

Although the new patriarch has a arrogant attitude, but for the strength of Shen Lang, there has been a painful understanding of the skin before, and naturally it will not be underestimated.

And he didn't have so much nonsense to say, to say the words of humiliation, and then to say it after taking people down.

During the conversation, there was something in his hand, a small shell with a grip.

"Let's give you a chance to offer all the beads of the cold, the ripples of the water, etc. I can spare you a life!"

When there is something new in his hand, Shen Lang is highly alert.

Looking at it is a shell, but nothing can be sensed, which makes him more vigilant.

The more you can't feel anything, the more weird it is, the more likely it is to have power that cannot be said.

However, he is tight inside the outer pine. On the surface, he still laughs loudly: "This is what you have dedicated to me. If I give it back to you, wouldn't you hit your face? Have your own ability to take it back!"

The dog \*\*\*\* is also very clear. It seems that the one sentence you came to me is actually a slap in the face, ready to go!

Their high alert, Han Ze's new patriarch sneer, seems to be completely out of sight.

"My kindness is limited. Since I will not give you the opportunity to cherish it again and again, then let it go to death!"

When the new patriarch of Hanze finished this sentence, he had a word in his mouth. But it is not a kind of sound wave used by mermaid. It seems to be a non-regular language, like a spell.

In an instant, the shell in his hand opened.

Suddenly, the shell that the palm can hold, after being opened, suddenly fanned out and released a powerful attraction!

This moment of attraction completely covered the surrounding waves and the dog gods, including the back of the Hanze waters are covered, these cold water is also the general fluctuations of the river.

But just for a moment, the waters tend to calm down, and cover a large piece of attraction, but it is wrapped around them, and it is extremely strong!

Chapter 2433 - Invincible suction

When the Hanze patriarch began to "speak the spell", Shen Lang and the dog \*\*\*\* were ready for defense.

Shen Lang has already used the realm of God to control the surrounding area.

Even if there is a similar attack from the shell, he can make himself and the dog \*\*\*\* dodge through the bonus of the field of God.

But the moment the shell opened, there was no light, but an attraction.

This makes Shen Lang and the dog \*\*\*\* a little different.

Is the other party wanting to use this little shell to collect them?

It is still quite experienced in this respect. No matter what magic weapon artifact, if you want to absorb others, you must have a stronger mental strength.

Otherwise, even if the artifact can withstand and have this power, the individual can't control it.

He used the Tiantian Tower before, and he dared not directly absorb the strongest of the same strength. Only the way he was weaker or seriously injured could he take the opportunity to collect it.

Now the situation of the other party is the same.

If this shell is a powerful weapon for the Hanze genius to find out, and want to absorb him and the dog god, first of all, they must be stronger than the two of them in spirit, and then this magic weapon can strengthen their confrontation.

In terms of mental strength, Shen Lang is quite confident, and the power of confrontation is stronger.

So there is no immediate dodge, retreat, and so on, and there is no counterattack, but to wait and see what it is.

Changes in the surrounding environment, including the chilling waters of the cold waters, are caused by the strong suction.

Shen Lang can clearly feel that this shell is facing them, that is, everything around it is blocked, and the water of Hanze is affected.

The level of Hanze later is restored because they were only affected, not the target. The suction of this thing is more targeted to lock him and the dog god!

Shen Lang is the person who owns the tower of the tower. For this little shell, how to pay attention to it, there is still a degree.

They are now confidently stopping, want to take them past? Just see if you have this ability!

He and the dog \*\*\*\* are now in the air above the waters, and do not need to rely on the ground.

“I didn’t expect you to do it for a long time, just such a thing, just this stuff, what can we have...”

Shen Lang is laughing at the patriarch, but did not expect the absorption of that thing, suddenly ten times stronger!

It was originally a very strong suction, but now it seems that it is just a blind man!

If it is a very weak suction, it will be suspicion and vigilance. Just as Shen Lang can’t sense the abnormality of this shell, pay special attention to it.

Therefore, the strong suction in front is to make them feel normal, but it is not enough to threaten them, so that they feel that they can fight.

The result is that they do not defend, leave, but directly hard.

Hard shackles are a process of wrestling. Normally, both sides of the offense and defense will gradually strengthen to the limit, and then see who is stronger.

However, the suction of this shell is suddenly increased ten times, so that the waves and the dog gods are too late to change!

After ten times the strong suction, Shen Lang and the dog \*\*\*\* may not be able to resist, but if this rhythm starts from the beginning, before this strong suction controls them, they will dodge.

It is because of the strength of the front, they are paralyzed a bit, so that they are in a state of calm resistance, suddenly raised ten times, already in that state, want to dodge to leave is too late.

Of course, if you really want to say it, Shen Lang can still get it. He can carry a dog \*\*\*\* into the space of the heavenly book with a thought, then it is a suction that can't resist, and at most it is pulled out halfway. I can still leave before I am completely accepted.

But Shen Lang does not believe in evil!

What kind of magic weapon can have such an effect?

Therefore, at the moment when the suction suddenly increased, he and the dog \*\*\*\* naturally also because the other side is gradually strengthening, strengthening a few, and they also cooperate with the strengthening.

Therefore, when they first changed, they only found that they were enhanced. When they found that they were so powerful, even if they wanted to hide into the space of heaven, it was too late!

The way of this shell is similar to that of the tower, as if it is a very small person, but it is sucked into its space.

The unimaginable suction is already fast enough to “imagine” itself.

When the time swells and the dog god, it has already entered the world of this shell.

This is a bit different from the world inside the Tower of Heaven, a bit like the space of the heavenly book, and a bit like the mysterious space inside the Yungong Holy Land.

The two of them seem to have thrown the void directly into the world, and now, there is no trace!

This makes Shen Lang secretly frown.

If there is a “wall” like the tower, you can also break this existence, but if it is surrounded by void, how to break it?

In this ancient cold world, the wheel of the heavens has not been used, but the door of the Three Realms can also be used.

And in this space, can you use the door of the Three Realms?

The preliminary estimate of Shen Lang is not used, this is the world that has been isolated.

“Ha ha ha ha ha! Lord of the sand country, are you not very arrogant? I am going to kill you, is it easy?” But I will trap you in this Xianbei until old!”

The voice of the new patriarch of Hanze rang in the air.

This sound seems to be everywhere, as if it is a full-scale stereo sound.

At this point, Shen Lang is not at all surprised. He talks to people who are inside the tower, and the people inside should feel this way.

In fact, it is just an idea, it is enough to make the whole space full of Dog God is a bit violent, just the strong absorption, let it have no resistance, this is a very shameful thing . It directly restores the hugeness of the body, and the big claws step on the ground!

However, this space does not see the margins, even if its body suddenly grows a lot bigger, it is far from the side.

Shen Lang is still calm.

In his mind, he is searching for memories about “Sinbee.”

It is necessary to know ourselves and know each other in order to better break the battle.

The small shell that I just saw, although it has been highly valued, is still more than imagined, and we must know more about it to be better targeted.

Soon, Shen Lang already had the information of “Xianbei”, but what surprised him was that this was not from the memory of Fengqiu, but from the memory of Mengxiu!

It seems that the enemy is still more aware of you. For his own people, there are a lot of secret concealment, and the enemy will take any means to pay attention to any clues.

#### Chapter 2434 - Hanze Xianbei

The information about Xianbei is not in the memory of Fengqiu. Perhaps this is the core secret that the patriarch can know. It may also be that Hanze does not know when it will be passed down.

The mobile phone of the Shibuya barbarian for Hanze information spans tens of thousands of years. This time, it is the first time to make the most important force, so it is the right to get all the information.

It is just a small shell with a grip of Ying Ying. It looks a bit ugly. Actually, it is an artifact that the barbarian attaches great importance to and focuses on defense!

It may have a specific name. It may not be collected by the barbarians. It is called the scallop because of its power, and because it is Hanze, the full name is Hanze Xianbei.

Of course, it may have been named Hanze Xianbei, and the name is probably the first ancestor of the mermaid who founded the Hanze settlement.

According to the information obtained by the barbarian, this immortal is the celestial spirit that this chiller does not know how many years have been born, and it has great connotation.

Everyday is likely to be hidden in the depths of Hanze, and everything in the cold waters is its nutrients.

And because it is not like the ordinary human race, the aliens will die, its special existence, Shouyuan can not be measured, the longer the time, the more aura absorbed, the greater the power!

According to legend, the mermaid of Hanze, only the patriarch is qualified to know its existence, and is in contact with it, and can not be driven at will, but after encountering a big problem, I would like to ask for assistance.

It is also said that its power is to be able to absorb everything and turn it into nothingness.

The strategy of the barbarians is to defend in advance. Once they meet, they will quickly flee, leaving Hanze Xianbei far away from the scope of absorption.

As for the way to crack, of course, there is no. Because they have not seen it, perhaps someone who has actually seen it may have been sucked in.

Just because in the memory of Meng Xi, this is called Han Ze Xianbei, they have no specific impression, so Shen Lang just did not find.

Then again, just after Shen Lang himself has increased the emphasis on this shell magic weapon, but still still in the way, because the emphasis is not enough.

Even if you just think of Hanze Xianbei, there may still be certain decisions.

This is because the confidence brought by strength will still be a challenge.

However, this information has a little analytical reference for Shen Lang.

If the information of the barbarian is not wrong, then this cold sage is the celestial spirit that was born in this cold, and it should have existed before the ancestor of the mermaid that came before the Hanze.

The ancestor should have conquered it and turned it into an artifact of Hanze. Or it has a high spirituality, is to reach a certain agreement, similar to Yao Chi and Yu.

But as time goes by, maybe it slips on its own, or the later generations can't keep up, or don't know, not enough to control it.

After the ancestor Yuanshen merged and merged the patriarch, they found it.

Of course, this patriarch had no chance to play before, and it has been controlled by the ancestor Yuanshen. It can't explain anything. Perhaps Xianbei is still there, but he has not had time to use it.

Just after the new patriarch will successfully use Hanze Xianbei, it is also because of the battle with Shenlang before, realizing that this is a strong enemy, so with certain tactics, thus controlling them.

It is a result of being inhaled into the fairy, and the barbarian is not clear about it. This is inexperienced.

Shen Lang can only refer to the tower of the tower, and the tower will refine everything inside. All the energy is tempered and finally gathered into a projectile.

This cold sage, will it be such a situation?

If so, how is it going?

What is the form of refining? Is it just refining people, living things, or is everything going to be refining?

There are no answers to these questions, but Shen Lang has to prevent!

At this moment, the dog \*\*\*\* is striding in a big step, so that he can smash the sea and try to turn this space over.

Shen Lang is combining this information, has made an accounting estimate, and then has several solutions.

Like a dog god, he will never do it, because it is definitely a waste of effort. Like the Sky Tower, even the more you attack, the more power you will absorb, and the corresponding growth.

However, he did not stop to stop the dog god, but in the uncertain situation, what is a temptation.

It seems that there is a feeling of nothingness around, but at least one thing is still down to earth.

What is to be confirmed now is the “field” of this pedal, whether it is true or not, or is it a illusion.

Shen Lang observed the heavy step of the dog god, and then slashed to the ground with the sword of the king.

There is a result right away, this ground is just a phantom!

After reading it, the ground did not break open, the sword did not enter, and after the out, there was no trace.

It is not surprising that the ground is a phantom, and the surrounding void is also an illusion.

Then you don't need to try again, whether it is slashing around the void and slashing against the ground, it will be the same result.

Although the dog \*\*\*\*\* is angry, but still conscious, watching the action of Shen Lang, has already guessed such a result.

So it also stopped the meaningless destruction of the ground, and then narrowed the body and looked at the waves.

Shen Lang has already had a vein, just the first round of temptation.

Now he is launching a second round of attack temptation!

This time, Shen Lang is releasing the heart fire!

According to the information of Meng Yu, this immortal is a spiritual thing that was born out of Hanze. It is naturally a chilly attribute.

Normally, it is a property that can restrain the Barbarian barbarian, but in turn, everything in the fire system should be something that it doesn't like or the damage will be even bigger!

If you want to burn a fire, nothing is more suitable than a heart fire.

The last time I put it out, it was the time when I saw this cold. I didn't understand the property at the time. I thought it was a special kind of fire. I also wanted to let it solve the problem. It turned out to be a disgusting emotion.

Now that the heart fire has been released, it really has a low mood, because the environment here does not make it comfortable and like.

“Set fire! Burn everything around! This is a reward for you!”

Shen Lang communicated with the consciousness of the heart, and then used a sun bead as a bait.

The sun's energy contained in the sun is the essence of Shibuya, which is like the concentration of high-efficiency flame.

So when it came out, it attracted the heart of the fire.

There have been several times before the heart fire and Shen Lang, knowing that if you want to eat well, you have to work. Although it is low in intelligence, it also has such a consciousness.

Chapter 2435 - 5 rounds of attack

After the heart fire came out, the dog \*\*\*\*\* was ready for defense. The power of this thing is still very strong, so as not to cause trouble to burn himself.

Shen Lang made an indication of the fire of the earth, using the sun beads as a bait to drive it to work.

The heart fire is not entangled, and it is determined that you want to absorb the energy of this sun bead, and it will start working immediately.

Under the command of Shen Lang, it began to spray innumerable blazing flames indiscriminately around!

Shen Lang and the dog \*\*\*\*\* are at the center of this sea of fire.

According to Shen Lang's estimation, even if this is a special space, it may be in Xianbei, just like they absorbed, just like the tower.

If this is the case, you don't have to look at what it looks like, just follow this guess and go out.

If it is trapped in Xianbei, the powerful high-temperature flame may make Xianbei unable to bear it. Maybe open the shell and let them go out.

Even if it is not so simple, the high-temperature flame of the heart fire, maybe it can also ignite this space, so that Xianbei is hard to be like.

The dog \*\*\*\*\* is self-defense and watching the excitement, and the Shenlang is not relaxed at all.

While he is commanding the fire of the earth, he is still paying attention to the slightest changes around him!

These changes include whether they will suppress, suppress and refine both of them, as well as the indiscriminate attacks of high-temperature flames now, and what changes have been made to this space.

The power of the Earth's fire is naturally no small matter, but it depends on the target and scope of its attack.

The large-scale fire-breathing attack, which is now indistinguishable in all directions, is very expensive.

After a while, the ground fire stopped the fire, a little negative feeling of completion.

This has already had a little reference for Shen Lang, and he can't ruin the ground fire. This thing has not yet raised.

So he did not politely feed the sun beads to the heart.

After the entire sun bead was put into the heart of the fire, it immediately broke out again, the fire soared, and then burned again!

It can be seen that it has really not really done its best. Now that it is certain that it can make up for the consumption, there is a wave.

Shen Lang did not blame it, the sun beads worked well for it, which is not bad, indicating that the sun beads still have a role.

Then he took the fire of the earth and let it slowly absorb the energy of the sun beads.

The burning of the flame requires fuel to support the combustion. If there is enough fuel, if the environment is consistent, it will continue to burn.

It's not the same as the fire. It seems to be burning in all directions and a false ground. It's not known how much, at least there is no fuel, so after the fire was collected, it quickly extinguished.

Shen Lang has just monitored everything around him.

Because of the role of the golden mask, he can extend to a wide range, the smaller the range, the more attention can be paid to all the details.

Just the feeling of this space, whether it is the naked eye, or the sense of the gods, including the role of the golden mask, can feel the endless!

But this kind of feeling, Shen Lang suspected is similar to the extension effect of repeated mirroring in the sand country.

Just a heart attack, let him get a verification.

The fire of the earth's fire is indistinguishable from the surrounding, and the range is very large, but the length is limited. It cannot be as long as a thousand miles.

If it is really boundless, the flame should naturally extend to its limits.

But the feeling of just sinking waves seems to have been compressed before it has reached the limit.

This feeling is like burning a fire in a glass cover. When the flame hits the edge of the glass cover, it is blocked and will not burn out.

If this is the case, then the invisible barrier of this limit is actually the scope of this space.

Further speculation, that should have burned to the surrounding of this space, it should also burn to the inner body of this fairy!

Under such circumstances, there is already a care in Shen Lang's heart.

If you continue to attack the past with the heart fire, this space should be unbearable, and Xianbei should not be able to bear it!

However, the energy of this cold zealard is enormous, and the two rounds of burning just after the fire are not enough to make it collapse.

It is impossible for Shen Lang to let the fire of the earth burn to the limit.

But his means can be far more than one!

After completing the second round of testing of the Earth Fire, Shen Lang immediately started the third round of testing!

The third round of testing is lightning!

Shen Lang did not summon Lei Yuan, it was just his own hands.

Just after the heart fire is an indiscriminate attack, now he is facing the same place on the ground, lightning is constantly attacking the same place!

According to the estimation just now, regardless of the current illusion, this space may be within the Xianbei, as long as it is attacked in one place, that is, a continuous attack.

This is similar to the continuous firing of bullets in the same place. In that case, it is theoretically possible to break through bulletproof glass, including walls.

In the process of lightning bombardment, Shen Lang is also paying attention to the changes in the entire space.

If there isn't any change, it's most likely that there is no attack at all, or that the attack appears to be in the same location and may actually be changing.

According to his observations, there was no change in the entire space, but in the small part of the attack, there was a little fluctuation!

It's hard to say exactly what level it is and what level it is, but it works, indicating that the attack is correct.

Shen Lang continued the thunder and lightning bombardment, and then began the fourth round of testing without interruption!

God light!

The power of Shengguang need not be said more It was originally because of the attack of the sword of the king, so it was not used.

Now with the attack of the Earth Fire and Thunder, he has more information, so now that the Thunder is in one place, the Light is also gathering at the attack!

This is a two-pronged attack.

The place where the microwave has been moved has just been monitored, and there has been a big change right away!

The effect of this change is the same as the distortion of the entire space.

At this moment, Shen Lang has already had a care in his heart.

Explain that the attack just made is effective. The current distortion is to change this space. In short, it is to change another place to avoid being penetrated, or the place has been penetrated!

Shen Lang immediately made a decision, the fifth round of attacks!

This is actually not the fifth round of testing, but the use of the “three four four five” three different ways, at the same time attack this array!

Chapter 2436 - Superimposed tear

The new addition to the attack package is the gold dagger!

This thing has been used before, after the recovery, the power is greatly increased, coupled with the current strength of Shen Lang, just let it break the patriarch’s scales defense.

It is now an attack that steers it and continues to the same place on the ground.

However, the thunder and the gods are not afraid of overlapping, the gold dagger can not let their attacks be destroyed, so strictly speaking in the same area, not the same point.

Feeling the monitoring of Shen Lang, it was discovered that even after the twisting and shaking, now even if it is still attacking the same place, it is actually not the same place.

But he doesn’t care!

Because of the recent reaction, it has been proved that this is feasible, and Hanze Xianbei will also be “afraid of pain” and “fear of injury”.

It has been effective just now. Now that I have added one more, the effect will only be better.

And the dog \*\*\*\*\* is not stupid!

It is just not as good as the waves, and it is used to letting Shen Lang think.

Now, in the case of various attempts, Shen Lang is innocent and commanding it. It also observes and tries to grasp various situations.

Looking at it in one round, the current situation has given it a general awareness, and then there is a plan for cooperation.

It snarls and swings its claws and attacks the past in the air. The targets are the places where the thunder and thunder and lightning are attacked. This is not afraid of overlapping!

Under the combined attack of multiple forces, the space was once again distorted.

The feeling just got is not big, and this time, Shen Lang can feel more clear, it is the dog \*\*\*\*\* also feels.

It is very difficult to chase the specific changes in this space and to lock the point of the attack. Basically, it can be said that it cannot be done.

But the other party will dodge, and they have already given them a lot of confidence.

The continuous attack of Shen Lang, in addition to paying attention to the changes around it, is also starting to build the next step based on all the confidence gathered.

Although the attack just took effect, the scope of the attack is still too small and it is concentrated on one point. For the entire space, whether it is a sphere, a cube, or an attempted shape, it is only one of the above.

It is necessary to pierce the whole space by such a little bit, and it is estimated that before the penetration, the energy is consumed.

So he must have a more effective solution!

Before that, he also wanted to make another attempt, there is the space of heaven and the door of the Three Realms.

If you can enter the space of the book here, you can cultivate well, spend more time thinking about ways, and there will be no delays.

If it can be transmitted and removed using the door of the Three Realms, it can be transmitted directly, and the Hanze patriarch is caught off guard in the back.

The current Shen Lang can be used with ease and skill.

But after trying it out, he immediately got the result.

Can't enter the space of heaven!

After the book space has been obtained, for such a long time, it can be said that it has always been his finale.

Although it can not defend the enemy, but because of its hidden speciality, whether it is the enemy of immediate strength, you can seize the opportunity to escape.

It is the first time that I can't use it.

But he was not too disappointed because the result was foreseen.

This place is already an independent space, and it is impossible to enter another independent space such as the Tianshu space.

Probably the same reason, in this space can not be located, can not use the door of the Three Realms to send away.

Shen Lang began to think of this possibility, but don't try it, after all, it is not reconciled. At the moment, after the test, you can use other methods.

In fact, there is no better way to add code on the method that has just been effective!

The addition of this wave is to release the fire from the ground and control it to concentrate on one place.

So reach the six-layer attack at the same time!

The first layer is the light of the gods, the first layer is lightning, and the first layer is the ground fire.

Then the dog \*\*\*\*\* snarls the sound waves, and the attack of the paws.

The last layer, but not the gold dagger, in the surrounding, the effect can not be integrated.

It is Shen Lang and then distracted to manipulate the water ripple stick!

The water ripples attacked the water ripple energy that went out and hit a point.

Such a combination of six layers of energy, continuous speed, power has just increased a big step, has a rapid tearing effect!

Just as Shen Lang's self-confidence judgment on the absorption capacity of this cold scent is the same, now Xianbei did not expect that it would suddenly increase so much.

When the entire space is distorted, it is too late.

Before it was a point, or a small hole, after the transfer, it can be repaired with uniform energy.

Now, when it fluctuates evenly, it tears a big hole!

The result is that the entire space energy is evenly passed, and it takes a little bit of time before the hole is evenly repaired.

The continuous six-layer superimposed attack continues to tear open along the rip!

Destruction is always easier than repairing. When the repair ability exceeds the damage, it seems that there will be no change. When the repair ability cannot keep up with the damage, the crack will become bigger and bigger.

The heart fire has just tasted the sweetness, absorbing the energy of the sun beads, and now it is very hard. And Shen Lang controls it to burn to a point, which is much more economical than the previous attack in all directions, and can last longer.

The power of Shenlang and the power of thunder and lightning cannot be sustained for a long time, but their power is enormous.

The two-layered attack of the dog \*\*\*\*\* is the weakest two rings in the six layers, but it is more daring and more tacit understanding, and the play is better than just.

The water ripple stick is a special existence!

This is a treasure of Hanze, even if it is not the same as Hanze Xianbei, it is also homologous.

Therefore, the exertion of the local fire in this area will be suppressed to a certain extent, and it is necessary to make a discount; but the performance of the water rippled rod can be greatly increased.

Now it is also superimposed, so that the crack is torn more and more, and the whole space is also constantly fluctuating.

This is also a process of stubborn struggle. Xianbei is undoubtedly also strengthening control and repair, and can not let them destroy this space.

but.....

Shen Lang is not trying to fight against it. The purpose is to leave, just the continuous superimposed attack, just means, not purpose.

Therefore, when the crack appeared, he had already applied the field of God and shrouded everything. When the crack opened a little bigger, he had already brought the dog \*\*\*\*\* and took the fire. The water rippled rod stopped the attack of the gods and thunder and instantly entered the crack!

## Chapter 2437 - Between Xianbei

Shen Lang is planned, and all the attacks are for this purpose.

And the reason why you have to be distracted to use the realm of God is for faster speed!

It is able to continue to enlarge this crack without being evenly repaired by the entire space. It relies on the continuous superposition of the six layers of attacks. Once stopped, it will heal immediately.

So at that moment, he was racing against time. After stopping the attack, he grabbed the space before being repaired.

The feeling of playing now is to break a space, but after breaking it, what is the result below is still unknown.

But no matter what kind of result, as long as it is a little fresh, it is a new hope.

When Shen Lang and the dog \*\*\*\* entered the crack, they lost the space crack of the continuous attack and immediately merged again.

At the moment, there is a darkness in front of Shen Lang!

The dark waves immediately passed through the holy armor, illuminating everything around them.

Seeing it in the eye, he was slightly surprised.

He and the dog \*\*\*\* are now in the same gap as the cave, the gap is not too high, and behind them, there is a big bead.

Because the beads themselves do not shine, they are invisible in the darkness, and they are clear when they are illuminated.

It has a flowing texture and looks very special.

Further, it can be confirmed that the footsteps are not actually mountain cracks. This is meat!

The answer is already coming out.

They are still in the shell of Xianbei at the moment!

Just absorbed in it, it is into the big pearl-like thing in the shell, that is a space that traps them.

The crack that just rips open the space is actually opening a hole in the pearl and drilling it out from it.

But the pearls themselves are inside the shell, so they just came out of the pearl space of Xianbei, still within the fairy.

Now the foot is the meat of Xianbei, the same crack in the entire cave, that is, the crack in the meat.

It will be dark, because the shell is closed, and if it is not open, it is dark.

The feeling now, the world inside this immortal, like a small hill, that pearl is also very large. That's not surprising, because the size of the palm that I saw before was just a shrinking change.

For example, in the belly of a dog god, it should be such a feeling.

After arriving here, the other party must be clear, and they will inevitably attack them again. Even if they are ignored, they should leave immediately, or they will stick to them.

However, from that space, Shen Lang has settled a lot.

Even if Hanze Xianbei confined the shell and did not open it, he was already able to pass through the gates of the Three Realms.

But the situation just now has come, and Shen Lang is certainly not so anxious now.

He now has an idea, can you take this large pearl away?

Judging from the situation just now, this large pearl is an independent space, which can trap people.

According to the new patriarch, there is no problem in getting old and dead.

Just in this pearl space, it is very difficult to come out, but in this fairy, this pearl is considered from the outside.

For example, it will not trap them now.

But there are two problems.

Can one pick it up? Although there is no big space in the inside, it is at least a big pearl higher than people.

The other one, even if you can pick it up, can you use it?

The space that has just been trapped by them is this pearl, but the role of the pearl is the scallop, or the pearl is part of the scallop.

If the pearl is cut from the shell, it is likely that there is no value. Not worthless, there is no value of that space, it may be the same resources as Nedan.

If there is really no way, it will threaten life. If the enemy's magic weapon is destroyed, it will be destroyed.

But now there are obviously more ways. If there is a possibility of destruction, it is a pity that Shen Lang feels it.

Such heaven and earth spirits are not known for tens of thousands of years before they were born, and ruined the violent things.

Shen Lang prefers the latter, which is a whole and can be controlled by Xianbei. And this pearl is probably the inner dan of Xianbei. Once it is taken, it may be dead.

All his thoughts are so flocking in his mind, in his realm, these are all over the moment, and the time to sort out is very short.

Basically, when he and the dog \*\*\*\*\* just came out and just illuminate everything, they have already considered this.

but.....

They are in the body of Hanze Xianbei!

Just inside the pearl space, Hanze Xianbei is of course aware of it, and it is the manipulation of the pearl to trap them.

They broke open the pearl barrier, and the fairy is naturally clear.

Therefore, it is just a moment of “free leisure.”

The meat on the top and bottom has been squeezed quickly!

It's like a mountain stitching together, letting the two of them in the middle of the gap, there is no room for war.

The dog \*\*\*\*\* immediately snorted, his body quickly became bigger, and he slammed it upwards, arching the squeezed space.

This is the meat of Xianbei, not a real mountain and stone gap. Although it is very strong and tough, it is still tough. The strong support of the dog \*\*\*\*\* is to hold up some space around, without any cracks.

But this is inside the Xianbei, even if it grows up and supports the space, it is still crushed in all aspects.

Then they also saw a thick mucus rolling over and coming to them.

This is secreted by Xianbei Whether it is poisonous or some other characteristics, this is definitely not a simple liquid.

When Shen Lang just observed and thought about everything, he also paid attention to everything around him. So when this change is made, he is immediately aware.

The dog \*\*\*\*\* propped up a space around him, and he stabbed it directly with the sword of the king!

It is not the same as the pearl space. This is the real flesh. The sword of the king penetrates into it. In an instant, it is the depth of the blood.

In the pearl of Hanze Sinbei, it is not afraid of the attack of the sword of the king. The gap of that point is evenly blended after the opening of the space.

But now that it is stuck in the meat, it will be painful and will bleed!

And instinctively the same reaction, the closed meat immediately separated up and down, try to open the distance, to avoid being stabbed by the sword of the king.

However, Shen Lang does not need to follow the above to penetrate, and the sword of the king's sword continues to extend upwards and continues to deepen!

Chapter 2438 - Wanted warning

Under the closure of the shell, the meat inside is originally fitted, that is, because it is big enough to have a gap.

So even if the top and bottom are separated as much as possible, the gap is not enough to separate the sword of the king of Shen Lang.

The sword of Shen Lang, of course, is to force it to open the shell!

If the shell is opened, it can also enlarge the space and avoid the sword injury.

But Hanze Xianbei naturally does not open the shell so easily, whether it can run out, just open, it is equal to it has lost!

Therefore, it not only did not open the shell, but re-attacked it!

It was just a squeezing squeeze, and perhaps an instinctive attack. Now, after being stabbed, it is a more sensible attack.

So, it is the familiar strong suction!

This time, both the dog \*\*\*\*\* and the Shen wave have already had experience. When the strong suction has just appeared, it has already reacted.

Shen Lang is to make the sword of the king become very large, and the handle is still normal. In this case, the larger area is stuck in the meat, and the resistance is greater.

His feet were also firmly anchored on the flesh of the foot, while the hand was firmly held with a water rippler.

At the time of the attack, he had already controlled the surrounding field. In the realm of the gods, he fixed himself and the dog \*\*\*\*\* firmly.

The reaction of the dog \*\*\*\*\* is also very fast.

It just has a large space for the body to lift up, but when the scallop meat is separated, it does not need to be so vigorously picked up.

When one feels the suction, in addition to sinking his own gravity, the four big claws are firmly caught in the meat below.

On its back, on the body, etc., a lot of tentacles of vine plants grow rapidly, and they instantly penetrate into the meat of Xianbei and lock firmly.

Strong suction, naturally still \*\*\*\*\* them into the big pearl next to it.

This change has also made Shen Lang more clear. In the pearl space, it is possible to trap them, and on the outside, they can \*\*\*\*\* them in!

When I was in the pearl space, Shen Lang thought about this problem.

That broke out a ten-fold strong general suction, and it was really a deliberate resistance that could not resist. If there is no good countermeasure, it will be easy to go out. If you have not left, you will be sucked back.

Therefore, in the process of testing the breakout, he also distracted to consider how to defend the strong suction.

Then there are no more than a few ways, self-powerful confrontation, external force and preemptive control of the environment!

This is one of the reasons why he just first applied the field of God.

The space within the domain of God is the space with absolute control. The smaller the range, the stronger the control.

Therefore, this powerful suction force must be controlled by Shen Lang before passing through the scope of God's field.

Shen Lang can pull the fast-moving patriarchs, and this suction energy can also be pulled.

Even though it is ten times more powerful, it has been pulled by a seven-eighth eighth-eighth, and when it is tied to the waves and the dog god, two or three are left.

If this is the case, they will defend their strength and they will be able to resist it.

The current situation is even more different.

Because this is in Xianbei, not suspended in the cold water surface, but down to earth. The “ground” that is stepped on and caught is the meat of Xianbei.

So the more powerful it \*\*\*\*\* them, the more powerful it is to pull its own meat!

The limbs of the dog \*\*\*\*\* and the vines firmly grasped the large pieces of meat. The sword of the king is deeper into the upper layer of the meat, and it becomes very big. If it wants to pull the dark waves past the pearl, it means that the sword of the great king is broken first!

Just a little try, Xianbei knows that this time is not so easy.

It felt that the speed of absorption was greatly affected and it was no longer possible to \*\*\*\*\* the enemy quickly. In addition, the pain is also a sword that has just penetrated, and has been increased several times!

And it can also feel what kind of situation your injury will be.

At first, the sword of the king was only pierced into it. For it is so big, the thin blade is like a needle.

But now the needle has become a blade, and it is not a piercing, it is to follow the meat, and the injury will be much greater.

The dog’s claws, vines, etc., are holding on to its flesh. It is really necessary to \*\*\*\*\* it up, and it will involve a lot of meat.

Just like the cold sage, it will not open the shell because of the sword of Shen Lang. This is a problem related to the face.

The injury to these meats is of course affordable for it. But if you are hurt by the prey that has already come in, it will be a bit lost.

Plus, just after they came out of the pearls, even if they inhaled them again, it would be another wave. They only need a little more time, they can still get out of trouble.

So under the circumstance, it is also a little hesitant, thinking about whether to change the other way. Or is there a better way to suppress both of them!

“You still want to escape! Xianbei is not something you can escape!”

The voice of the new patriarch is ringing again!

It seems that he is also in some way, can pay attention to the situation inside Xianbei.

Just after they got out of trouble, he didn't say anything. He shouldn't want to influence Xianbei, and he would control himself.

Now looking at this slight stalemate, this is the opening reprimand.

This sound now sounds like it came from the pearl, and there is no sense of the whole space.

In fact, it is not a real “sound”, it is perceived, so there is no delay in time.

Shen Lang did not pay attention to the new patriarch of Han Ze, but sent a sentiment to Xianbei!

“You can fix it now It is very long and not easy. I don't want to ruin you. You should feel the means to get me!”

This is a warning that directly gave Xianbei an ultimatum.

Just now they are in the pearl space of Xianbei, it certainly knows what is inside, or is it fighting.

Now that you have left the pearl space, the best way is to take them in immediately, or else. The means of breaking the pearl before it was used, it is really troublesome!

Shenguang, thunder and so on, even that space can be torn, not to mention the flesh and blood now?

Now that the suction has stabilized, Shen Lang has also collected the water ripple stick and replaced the gold scarab in hand.

“Do you think that I am the means?”

During the speech, he immediately released a batch of scarabs, about a few hundred!

When these scarabs came out, they were under the control of Shenlang, avoiding him and the dog god, and the flesh of Xianbei irritated them, and they madly smashed them up!

Chapter 2439 - Golden scale

Xianbei is not a human being, and Shen Lang cannot know its feelings.

But as far as people are concerned, it is very difficult for many people to stab a sword and cut off a piece of meat. But if the wound is put on a group of ants and worms to bite, it is very uncomfortable and very embarrassing.

The hundreds of scarabs quickly licked the flesh and blood, and because of the help of the field of Shen Lang, they were instantly absorbed on the meat, and the blood stimulated them.

And that strong suction is aimed at Shen Lang and the dog god, and will not affect them.

So when they came out, they entered the state, and when Xianbei just felt them, they realized the taste of being smothered.

In an instant, Shen Lang found all the hundreds of scarabs, and all of them did not inhale into the pearl space.

This is a part of the suction of Xianbei to absorb these scarabs.

Although the scarab is absorbing the meat, it is no problem to lick these meats, just a little bit of speed. But they are not so strong, they are all absorbed in an instant.

“Is it coming?”

Shen Lang once again released thousands of scarabs!

This almost filled them all around, not to mention the fairy, but the dog gods felt flustered.

These thousands of scarabs are crazy savage, even if it is only a moment, it is also a small pit in the fleshy face of Xianbei.

Of course, it was just that moment, and then thousands of scarabs were absorbed into the pearl space.

However, this time, Shen Lang intentionally used the field of God to help the Scarabs, and increased the difficulty of absorption.

This made Xianbei have to transfer more of the power of the sinking waves to deal with the scarabs.

“Is it coming?”

This time, Shen Lang is a batch of one after another!

In a while, more than 10,000 were absorbed.

These scarabs have been collected by Xianbei, but the situation that continues, if it is human, has already numb its scalp.

It doesn't know how much Shen Lang can put it out, and it can't always receive it like this!

Besides, this is just the form of the means of display.

If you really want to break hands, then the lightning, the light, etc. come out together. When it is against the army of insects, it is already scarred, not to mention that there are still big swords stuck in its flesh, which may stir more at any time. Wound...

For a moment, when Shen Lang paused the bug call, Xianbei had already made a decision.

In an instant, the shells of Xianbei were opened, the meat was quickly separated, and the suction of the Shenlang and the dog \*\*\*\* was stopped.

This is very obvious, please leave them!

However, this Xianbei also has a certain wisdom plan, knowing that suction is its offensive and its defense.

Once the suction is stopped, the other party will not be able to speak, but you can also crush it by contact!

The key to this is its inner pearl.

Therefore, its suction only puts the waves and the dog gods, all of which form a stronger alert around the pearls. Once they are close, they will be absorbed.

As for the other parts, I don't care about the defense for the time being.

Shen Lang did not go to take its inner pearl.

At first, he didn't want to ruin the pearl. Now it is clear. This is the inner Dan of Xianbei. If it is taken, it may die. Even if it doesn't die, it will be painful, and the pearl may not have that. Space is up.

So after the other party succumbed, he also received it, and immediately took the dog \*\*\*\* out of Xianbei.

Hurry out, not afraid of the rebellion of Xianbei, or design framed, because it has been afraid.

This is an ambush for the new patriarch outside!

In fact, it is true. The new patriarch has been paying attention to the situation inside. He also has a way to know a general.

He did not know the communication of Shen Lang and Xian Bei, but he was aware of the attacks of so many beetles.

For the army of insects who were kings, he had a headache before. In order not to ruin all the fishermen on the scene, he had to pay the chills to send away the waves.

Now I can guess that Xianbei can't bear this harassment.

At the moment of opening, his attack has arrived!

It was countless golden sparkling fish scales, and at a rapid speed, it rolled over in the direction of Shen Lang and the dog god.

Gold scales!

This one, Shen Lang is understood at a glance, there is something in the memory of Fengqiu.

The mermaid of the Hanze family does not have a long tail. They can have scales, scorpions and fins.

Some of them are designed to adapt to the functions of underwater evolution, and fish scales are more like a skill for them!

Basically, when the scales are presented, it is equivalent to covering a layer of scales, not to mention the invulnerability, at least to allow all attacks to withstand a part.

And further, the scales can accelerate, strengthen defense, and take the initiative to attack!

Legend has it that the mermaid of this family has evolved to a very high level. It is possible to have a layer of gold scales. Those gold scales can be manipulated as you like, almost omnipotent!

In the view of Shen Lang, this is of course a mythological education accepted by Feng Qiu, and the worship of the mermaid gold scales.

However, in fact, Feng Qiu has not seen it. He has not seen it in the patriarch's body. Naturally, this may not be true. It may be a legend.

Now in this moment, it is truly witnessed, there are really golden scales!

These golden scales have flew away from his body, forming a powerful attacking array!

When Shen Lang and the dog \*\*\*\* flew directly out, they worried about the attack of the patriarch, and could they not defend?

The field of God is still being displayed but the scope is smaller, it is a big circle around them.

Therefore, when the patriarch attacked the golden scales, no matter how orderly and disorderly, no matter how fast, when it came to Shenlang and the dog god, it slowed down and seemed to become slow motion.

This naturally makes it impossible to attack the target, or even just watch the target move.

There is still a possibility to worry about the general scales in slow motion, that is, don't be charged by others!

Whether it is the golden scale that the former patriarch evolved and cultivated, or the new patriarch now, this is very precious. If it is taken away by Shen Lang, he naturally has to jump.

This is the same as the ruthless pearl and the water rippled rod. Now he still owns the golden scales and scallops, and if they are taken away again...

The newly-injured Xianbei, after they left, closed the shell again, and it was actually in the hands of the patriarch!

Shen Lang and the dog god, in order to be more secure, this time did not fall in the cold water surface, do not need water station to force, the island can be more practical.

## Chapter 2440 - Again crisis

When they landed, all the golden scales were separated from them, but they formed an encirclement and blocked them all.

The scope of this encirclement is basically the scope of the domain of God. It can not kill the enemy inward, but the speed is slowed down. The risk of being charged is greatly increased, and the patriarch can only retreat to the next level.

“The Lord of Sand Kingdom! Your strength exceeds my estimate, but do you think you are not embarrassed? You can come out, or benefit from our underestimation, or else you are trapped in Xianbei!”

This point, Shen Lang did not deny.

Everyone is a light enemy. Just because he and the dog \*\*\*\*\* don't pay enough attention, they will let Xianbei's suction succeed and inhale them.

And Xianbei also paid enough attention to them, in order to let them gather the six layers of attack power after the superposition, tearing the pearl space a corner, and did not expect that they are not hard to fight to the end, but come out from it.

This light enemy has allowed them to come out of the pearl to the fairy.

“If you come again, do you think you are hiding? Can you come out?” The patriarch further sneered.

Now that they are staying on the island, it is still difficult to fight against the strong suction.

This ground is the ground. Unlike the meat of Xianbei, it will not make the scallops hurt, and the sand near the water's edge is loose. It is loose and difficult to support.

For example, the dog's claws can firmly grasp the meat of Xianbei, but the sediment on the island is broken and not forceful.

In this case, the defense they can rely on is the realm of God.

Run, this is in the cold, the speed is impossible to get past the head snake.

but! What they don't know is that Shen Lang can directly use the door of the Three Realms, and now leave!

Even if you don't have time to use the door of the Three Realms, you can enter the space of heaven in an instant, and wait until they neglect to leave before they come out with ease.

However, there has been a sleepy cold scent, and Shen Lang is more experience and confidence.

He did not escape immediately, but continued to maintain a high degree of calm.

“Do you think it dares to \*\*\*\* us? Just if it wasn't me, I can destroy it!”

This sentence is said, Shen Lang is with great confidence. There is a large number of scarabs in the pearl space, which will make Xianbei feel the shadow.

After arriving in that space, Shen Lang could not sense them, nor did they know what kind of reaction the uncontrolled beetles would be.

But that Xianbei knows, and will remember the state of a large number of bugs in it.

And just now he has proved that he can get out of the trap, and if the other party comes again, it will be a useless effect.

“Then try it!”

At the same time as the patriarch's sentence came out, he had secretly recited the spell and drove the attack of the sacred sacred shell against Shen Lang!

Hanze Xianbei does not know what the relationship with the mermaid is. If it is driven by the mermaid, it must be done, just like the artifact.

Or it is very annoying to Shen Lang, just hurt it, but also forced it to let go.

So this time, it was quickly absorbed.

Just grabbed its meat, this time there is no such taboo, it directly locked the two waves and the dog god, and then directly reached a ten times the super suction!

After ten times of powerful suction, Shen Lang immediately felt unusual.

Although this time they were on the island, and there was a defensive layer of control of the surrounding area in the field of God, it still felt great pressure.

This is harder to confront than just in Xianbei!

When I was in Xianbei, I felt strong suction and it was a successful confrontation. Shen Lang also predicted that there would be no containment of Xianbei itself, it would be more difficult to confront.

But I did not expect this to be like ten times the suction, even stronger than I have just felt!

This is not to say that Xianbei has strengthened the power of absorption. This is the strength that had previously absorbed both of them. It was in Xianbei, and the intensity they felt did not reach the maximum.

Perhaps because of the distance is too close, it may be because of the relationship between them in Xianbei, or the absorption of such openness, which can make it better borrowed, so it can be bigger.

This discovery also made Shen Lang and the dog \*\*\*\*\* a lot heavier.

Originally outside of this, the interference to Xianbei itself, is to be a little weaker, plus stronger than expected, the degree of danger, it will once again exceed expectations.

The new patriarch, who had just monitored the whole process, understood the response to them. This time, the shots were taken again, and naturally they have not been copied.

If it is copied, isn't that the same result?

That is, they are sucked in, and they will break through, and then let Xianbei be injured, and finally have to release it.

So now this wave, he uses the powerful suction of Xianbei, is to use this to contain the two waves of Shen Lang and the dog god!

Because they are not fully fighting, they will be sucked in soon. Fighting this suction with all strength, there is no other attack against the patriarch!

The golden scales that he had just released were already around them, forming an encirclement outside the realm of God.

Once in the realm of the gods, the speed will be slowed down, the attack power will be weaker, and it will be easier to be evaded and shot down. So just he was in control of the outer ring and stopped the attack.

Now is the opportunity!

Shen Lang uses the field of God to counter the suction of Xianbei. The patriarch is also aware of it. This is a big containment. At this moment, the scales are once again rushed in, and the pieces are attacked by Shen Lang and the dog god!

If you want to control these golden scales, it will affect the confrontation with the strong suction, instead of controlling, the faster golden scales will immediately stab them!

The power of the field of God is still huge. Although the main force of Shen Lang is to restrain the suction of Xianbei, it still can limit those golden scales.

It's just that the focus is different. The degree of control is different now, and the patriarch is strengthening the attack. The result is much slower than it should have been, but it is much slower than it was just now.

The dog \*\*\*\* is now waiting for it. Once it is sucked into the space, it can help it to be smaller, mainly relying on the waves.

So now it is straight into the ground, and then a lot of plant vines are extended from the claws. Go out under the ground, try to bind a little more and pull the body.

At this time, Shen Lang made a move that they did not expect!
