

First Strong 2441

Chapter 2441 - Regaining the upper hand

Shen Lang did not hide in the space of Tianshu, but at this moment, took out the small shovel!

His small shovel quickly excavated, with the dog god, directly into the island!

This is the reason why Shen Lang will go to the island.

The down-to-earth is safer and better to borrow than the cold water surface. It is only a superficial factor. The deeper level is the addition of a backhand.

When the rapid drilling into the ground, the field of the gods collapsed, but it was time to leave.

Because the shovel's squatting speed is very fast, and the powerful suction is locked in the two of them. Whether on the ground or on the water, they are conspicuous targets that avoid other interference.

That is to say, if the suction is larger, the more things are absorbed, it will also affect its suction.

When they entered the underground, their goal could not be hit even if they were locked.

First, a lot of sediment around it will be sucked in!

For the sand and gravel that is in front of the target, it is too late to filter. Under such a strong effect, these clay sandstones ***** into the Xianbei pearls at an almost invisible speed!

Originally, Shen Lang borrowed a small shovel magic weapon, which was able to quickly smash and not leave too obvious traces.

But now the crazy sucking behind, like a fast excavator, follow the direction of their departure and drill on the island!

A cave was rolled out on the island between the time. .

The patriarch had to close his hand.

Although Xianbei can withstand it, more and more sand is sucked in and it will have an impact on it.

Although no matter how to dig, it will not **** the entire island, but this is a destruction of their living space, and the enemy will not care.

More importantly, it is necessary for Xianbe to absorb the target. If it is too far apart, it is also a lot of sediment cover, and it is very easy to lose the target.

The patriarch must also follow the past.

But if he follows the cave, do you know if the other party has laid any traps?

He has already merged with the patriarch, and all the memories are clear. Before the Shenlang was directly from the waters to the tiankeng on the island.

Later in the tiankeng, it was deliberately confusing the patriarch, and then did not know whether to go to the temple to do the same in the same way.

If he goes over here, there is nothing waiting for him. Now, when the other party leaves, it is possible to go to the temple.

When I thought of the temple, the head of the patriarch frowned.

His statue was destroyed, but he has a new flesh and does not need to be too urgent, but the temple is still very crucial.

Especially in the last temple he could collect it as a whole, and the other party saw it. If he had the ability to take away the temple, it would be no small loss.

This made his mind involuntarily pay attention to the temple, and then associated with all the ethnic groups who had just been dismissed.

With the strength of the king of the country, no one but him will be an opponent! Just taking the tribes away is just for their safety.

If the Lord of the Kingdom of Shah is going to chase down other people, the loss is even greater!

At this moment, the other party has gone far from the ground. He followed the sucked hole and extended in the direction of the inside, and did not feel the specific place.

At this time, he felt a wave of space nearby!

When his gods were concerned about the past, he saw Shen Lang and the dog god, which appeared directly near him. When he appeared, he attacked him!

Just after he did not sense the sinking of the waves, it was after Shen Lang took off the suction of Xianbei, and immediately stopped the excavation drilling under the ground, but replaced it with the door of the Three Realms.

There is no door to the Three Realms in Xianbei, but there is no problem in Hanze.

He is a close-range transmission, directly targeting the location of the patriarch.

At the same time, it also sent the idea to the dog god, ready to attack as soon as it appeared.

The patriarch had seen the use of the Three Realms before Shen Lang, but disappeared in front of him. In fact, there were three kinds.

One is to use the small shovel to go directly to the tiankeng under the cold waters; one is to disappear into the space of heaven in the tiankeng; finally the door of the three worlds is sent outside the temple.

If it is used three times in the same way, the patriarch's vision and realm will naturally break through.

But the three different ways are the ways that the other party has not seen, and they are hard to prevent.

Just as the new patriarch just had a connection, went to the temple, and chased other people, it was guessing the general direction, but did not know the specific way.

I didn't expect to come to attack himself because the other party was forced to escape by his two-pronged approach. It would definitely not come back. It might be that he would leave Hanze after doing some damage.

Therefore, even if he feels the surrounding fluctuations in an instant, and the gods immediately pay attention to the past, and even have this association, but to defend again, it is too late.

However, the patriarch of the Hanze mermaid family was originally a very strong existence, and it was stronger than the barbarian elder Mumbai. After the integration of the ancestor's gods, it was even stronger.

Even if he has no time to defend, there is no time to manipulate Xianbei, but the golden scale is cultivated by himself, or can be dispatched as he pleases!

These gold scales just had to be chased to the side of Shen Lang, but after he left, he certainly did not chase the soil, and he received it.

At this moment, the heart is free to move, all the gold scales are immediately in front, forming a dense array and rushing to the past.

This is the battle against defensive plus attack, directly against the attack as defense. Even if these golden scales can't break the enemy, at least they can make the enemy scrupulous and can't approach.

What the new patriarch needs is to fight for a little time!

After completing this step he has already started to drive Xianbei.

The powerful suction of Xianbei, this is the proven combat power, the means that can cause great deterrence to them. It has just succeeded in forcing the other party to escape.

So he still has the same attack method.

If everything is as expected, then naturally there is no problem. The attack just did pose a danger to Shen Lang and the dog god.

But now the two sides have turned around. It is not the prediction and preparation of Shen Lang, but the patriarch's estimation and preparation are insufficient.

When Shen Lang used the small shovel, he already thought of these backhands, so at the moment he appeared, he was ready for full attack.

He is a double preparation, the sword of the first hand, and it is a sharp sword that comes out directly to the patriarch!

The other hand is to attack the patriarch with the gods!

When they saw the golden scales in front of them, the sword of the king immediately became a provocative thorn and smashed them, sweeping them away and flying to the side.

Chapter 2442 - Dog god's play

Those gold scales are divided into two parts, one part is the surface forward and plays a defense role. The other part is a piece of paper that cuts to the front and becomes a sharp attack.

Although this is a unified operation, the overall speed is also fast, but the resistance of the sheet forward is much smaller, so the part of the attack is still faster, in front of the defense part.

This hand fully reflects the patriarch's combat experience, and this is naturally the memory of the ancestor Yuanshen, the contemporary patriarch, may not have so many high-level combat experience.

It is precisely because of this, the sword of the king of Shen Lang, to change the slashing into a provocation, sweeping these golden scales. Otherwise, it will be squatting on the golden scales in the past. After blocking it, it may not be possible to marry the Chinese patriarch.

And the number of gold scales on the surface is quite large, and there is still flashing, which is to block the space in front of it. It is the attack of the gods, and it is even more likely, it will hit the scales. on.

Shen Lang also made a response, and the sword of the king quickly provoked the gold scales, continued to attack the patriarch, and at the same time, released the gold dagger!

The power of the gods is extraordinary, but the light can't turn, and the flying sword can attack around other angles!

Shen Lang was the first attack, and the sword of the king was approaching, so the gold scale was just just formed into a formation, and it was destroyed by the change.

And further, he counted the gods, has reached the front of the patriarch!

The patriarch's reaction was also very fast, and the manipulation of Xianbei continued. People also quickly evaded and staggered the first round of Shenguang attacks.

According to the previous two effects, Xianbei will immediately send a strong suction!

His goal is completely against the waves!

In the previous few fights, he has made it clear that the key is to sink the waves. The dog **** is only a match. As long as the prisoner can be imprisoned, the dog **** can easily solve it.

Now he is coping with dodge, facing the waves, but the result is the dog **** that disappeared from the appearance, and this time is waiting for him!

The door of the Three Realms was sent back, and then immediately entered the battle state, which was ventilated by Shen Lang and the dog god.

After the dog's nerves passed a few times, I also understand that Shenlang is the core of the battle. It can't be the main force, even if it is purer than the Shenlang!

Therefore, this wave, it also changed the strategy, when it first appeared, it did not cooperate with Shenlang, but directly went down quickly, sticking to the surface of the cold waters.

In the realm of the dog god, the speed is very fast, and it appears almost disappeared as soon as it appears. In addition, when Shen Lang appears, it is attacking, so the patriarch has no time to pay attention to it, or pay attention to it and pay less attention.

The idea of the dog ***** is that Shen Lang is fighting in front. It can't help anything. Just go around and go to the back or other angles, or you can do anything else.

At the moment, when it comes to the following, it also feels that the other party ignores it, which is not good!

It admires the deep waves, and the willingness to cooperate with the auxiliary waves, but it is also the hegemon of the behemoth world. Now it is more than the time when he left, he did not know how much he did, and he despised it!

At this moment, it did not go around the back, directly at the angle below, suddenly became bigger, and looked up to the patriarchs!

The dog ***** is not just a mouthful, but a triple attack.

One weight is the surface attack, which directly bites the past.

The second is the extended attack on the bite. If you haven't bitten yet, you will have a long tongue sticking out and lengthening the attack range. And there is a suction that widens the scope of the attack.

The third is to fly some poisonous vines from the tongue, and further extend the length of the attack!

When the body of the dog ***** expands rapidly, the mouth quickly becomes larger and closer, but that speed is nothing for the patriarchal level.

He can completely control the immortality of the sin, and then deal with the behemoth below.

He refers to the speed of the dog god's body getting bigger and looking up, so it is ignored. After evading the attack of Shenguang, Xianbei has successfully started, and directly launched a strong suction for Shenlang!

At this time, he also re-adjusted the scales that had been broken up and blocked the past around the waves. This time, you must not let the Shenlang run. It is best to ***** him in after being seriously injured, so that there is no chance to escape.

The result was that at the moment when the firepower was fully opened, he despised the dog god, and the triple attack continued to come forward!

The enlarged body, raising the mouth of the skull, to the patriarch here, is still a little distance, and the tongue that flew out in advance is pulled a lot.

The poisonous grass that emerged from the tongue is further drawn closer!

Originally for their level of engagement, the time can be accurate to microseconds, the distance can be accurate to the size, inch, and the two extensions beyond the pre-judgment, which is equivalent to greatly shortening the attack time and distance.

According to normal, he is far from the dog's mouth, but it is safe, that is, the tongue is attacked, and the reaction is still too late, but further poisonous grass is already around him.

Focusing on the patriarch who attacked Shen Lang, although there are also distractions to pay attention to the dog god, this three-in-one change has exceeded his expectations.

The beast's tongue grows grass, which is not logical!

Suddenly, he was tied to the legs by the poisonous vines that came out of his tongue and quickly pulled into the mouth of the dog god!

The attack of the dog ***** is a three-in-one attack. Once the poisonous grass vine has succeeded, it does not need to be able to kill the enemy. It can only be fixed, delaying the time, and everything else will follow.

Its mouth-opening suction also pulls his body down, and then the tongue is covered again, it is not only the feet, but the whole body is covered, and further to Pull inside the mouth.

Of course, even if the patriarch pre-judgment mistakes, he did not sit still. He only lost a few microseconds of instant time. Immediately, those gold scales that were rearranged were like a sharp blade, and they turned to the tongue and vines around them.

He was supposed to let the golden scales hit the waves, which is equivalent to splitting a part and getting out of it. Still, I don't think the dog ***** can swallow him.

And with his realm, if he really swallowed in, he can also break out!

Therefore, he is still strong in stabilizing his body shape, and everything is aimed at Shen Lang!

He felt that the attack of the Emperor's behemoth was just to shake him, so that the scallops in his hands could not be attacked normally.

The more the enemy is afraid, the more his strategy is right!

But at this time, Shen Lang was out of his unexpected reaction!

Chapter 2443 - Wear heart

Shen Lang did not understand the immortal itself. It was also understood during the battle, but the whole process was short, so the experience was limited.

Three attacks, the second time in the Xianbei completed the block.

But after the third time, he also accumulated more experience.

Therefore, the door of the Three Realms is quickly pushed forward, and the speed of the Xianbei is not immediately applied to the other party. This is his strategy, and it is also intended to give the other party such a feeling!

Feeling that they are afraid of Xianbei, the patriarch will not change other attacks, but still use the successful Xianbei tactics.

This also made a foreshadowing for the break of Shen Lang.

Just as the opening of the golden scale, as for Xianbei, he also has a plan.

Just a safe distance, facing Xianbei is precisely a dangerous distance. It is difficult to do it quickly and it is difficult to do it.

Sinbe's powerful suction is naturally powerful, but it is the size of the palm on the surface, and its suction is also facing a direction. Once it is very close, the slight turn will avoid the direction, and let it lock and increase the difficulty. .

Therefore, after the first wave of Shenguang attack, at the same time as the dog ***** attacked, Shen Lang did not open the attack distance this time, but directly approached the patriarch!

This is a tactic that combines the characteristics of guns with Shen Lang. When there is a certain distance and there are no obstacles, the guns are powerful, and the fighters can't escape the bullet speed.

But if you are close to within a meter, you can easily make the Gunners unable to play.

In order to be safe, when he approached, he quickly turned to the side, avoiding the aim of the palm of the palm.

At this time, the patriarch half body was wrapped in the dog god, the golden scales all smashed to the dog ***** tongue, poisonous grass, etc., his palm is also ensured that it is not wrapped.

The closeness of Shen Lang also made him turn slightly to the waves!

At this point, he has already started the fairy, and even if he is close, he can still suck.

At this time, Shen Lang's eyebrows released a light!

For the gods, the patriarch has a concentrated defense. When he was attached to the statue, he had the golden body and attack, and naturally understood its power.

Therefore, for Shen Lang's hands, it is a high degree of defense.

Just after Shen Lang had already had a round of Shenguang attack, and then did not continue, the patriarch naturally felt that he should be a lack of success. Because the golden light he has stored has been absorbed by Shen Lang, he has now put down the use of golden light.

Even so, he is also concerned about the hands of Shen Lang, if there is the intention to launch Shenguang, it will immediately defend. At this moment, the key defense is the sword of the king who has retracted the length of the normal sword.

The key is that he still has confidence. He thinks that Xianbei has already started, and he will be able to ***** the Shenlang, and then the golden scale can smash the tongue of the giant beast below.

As a result, Shen Lang unexpectedly released a light from the eyebrow!

The light of the ***** is slightly downward, and the direct shot is the wrist of the hand he holds the fairy!

At the same time, he found that Shen Lang did not know when he had not taken the golden mask that represented the Lord of Sand. A close look at him is a young strange face.

All changes are almost always happening in an instant, and all changes are nothing more than microseconds.

The dog ***** successfully tied the patriarch's body to retreat, while its body continued to expand, and the head and open mouth continued to go up.

The closer you are, the bigger the suction.

Everything is going down the patriarch's body!

If, according to his original expectation, this time is the time to ***** in the sinking waves, even if his body is pulled down a little, it has no effect.

A lot of gold scales will also break the tongue and let him easily gain freedom.

He will not absorb the behemoths in order to avoid helping the waves, but will kill the monsters directly!

However, the sudden approach of Shen Lang has already made the plan require subtle adjustments. The real mask without the mask of Shen Lang has also affected it. What is more important is the light of the eyebrows!

If the waves are kept at a distance, whether it is to dodge or flee in the distance, the patriarch's own body is higher and lower. There is no difference.

Now it is not the same, Shen Lang has been close to him in front of him, on the one hand, the ***** of light is too late to dodge!

The direct target is the wrist, and the real goal is naturally Xianbei.

Attacking Sinbei may not be effective, and it will be sucked up with a slight delay. And if he directly breaks his wrist, there will be a new change, or Xianbei will fall, maybe it can't support it.

On the other hand, it is the dog ***** who pulls his body down quickly!

In the distance, it's okay to have a few inches and a few feet, but it's different now.

Originally, the goal of Shen Lang was the wrist, because his body was down, causing the light to shoot directly at the heart!

And because the dog ***** continues to pull him down, the light of Shen Lang continues.

As a result, the light that would have continued to blow his wrist became a shot in his heart, and then continued to drag a few inches!

Then the heart is not just a hole, but it is directly pulled through!

At this moment, the patriarch as a whole person seems to be stunned!

He did not think of it, and saw that he had successfully received the Lord of the Sand State, but he was defeated and turned over!

If it is the sword of the king, although sharp, but if necessary, he can give up other to escape.

If it is another weapon, the scales on his body can be defended, even if he suffers a little internal injury.

If he does not release the scales, even the speed and power of the gods may not be able to resist a little bit of time. In the time of piercing the scales, there may be struggles to escape. Or being pulled a few inches, it avoids the heart of the heart.

But no if!

Everything has both the inevitable need for Shen Lang and the dog god, as well as the occasional change in microseconds.

Shen Langben hopes to break his wrist, and then find a way to win the fairy, even if it succeeds, did not expect to hit the heart, of course, the gods will continue, as much as possible continuous attacks.

And everything is still going on, the dog god's pull-down did not stop, at the next moment, the same continued light, it was drawn from the top of the heart to the shoulders.

However, these microsecond time changes have also enabled Xianbei to successfully lock the waves in front of you!

The patriarch had already started the spell to start the fairy, but when the “focus” aimed at the sinking waves, he quickly approached and had to re-tune.

Just because it is too close, and he is continuing to go down, so Xianbei does not lock the waves so fast.

At the time of the completion of the attack, Xianbei also successfully locked the Shenlang, and with the strongest suction, sucked Shen Lang into Xianbei!

Chapter 2444 - Xian Xianbei

Xianbei is naturally no problem.

The patriarch’s heart was exploding and it was naturally dead.

But the head did not burst, did not break the head, with his strength and realm, it will not fall in a short time.

Even if he burst his head, his gods have a chance to escape!

Because he used to be the ancestor of the first ancestor, he is used to the soul to live in, it is easier than the normal human soul.

However, the last time I was able to attach myself to the patriarch’s body, there are people and factors in the right place: it is its temple, without the statue, but also attached to the temple, and the patriarch came in and was attached to the temple.

Now if he is destroyed, the gods want to escape, and there is no physical body nearby that can be attached to the body. It is much more difficult.

But Shen Lang has no problem!

At that moment, Shenguang hit the patriarch, but the goal and his plan are different.

This entry and exit is both good and can kill or even kill the patriarch.

There are also bad things, that is, the threat of Xianbei cannot be solved immediately.

Shen Lang kept the continuous attack of Shenguang, he did not need to change the angle, still kept a slight bow, the dog **** pulled down the patriarch's body, and completed the pull-through effect.

As a result of this ongoing attack, he is naturally clear and willing to see it. He is also very clear about the consequences of the diversion of the light.

Therefore, while maintaining the eyebrows of the eyebrows, the sword of the king, who had been in his hands, had already been cut off with ease!

It is already close to the front, and the sword of the king can be adjusted to the length of the heart, so even if his head is fixed, there is no need for the body to move. Just the rotation of the wrist is naturally cut to the wrist holding the fairy. .

At this time, the patriarch, the heart was smashed through, and even if there was no ambiguity, it was absolutely affected.

He didn't have time to regret the golden scales, and he didn't have the air control to defend his light. Naturally, he would fully complete the absorption of the last Xianbei.

As long as the sinking waves can be sucked into the fairy, there is still a great chance to die.

Therefore, he continued to manipulate Xianbei, which is one of the reasons for Xianbei to continue to lock in the waves.

But the result is that there is no defense against the sword of the king...

With the sharpness of the sword of the king, his golden scale can still be blocked. The ordinary scales are as strong as steel, and they are cut instantly. The whole arm is cut like tofu!

Judging from the past few times, Shen Lang basically guessed a probable, this Hanze Xianbei, whether it is an artifact or a spiritual thing, want to control it, it must be a spell to stimulate!

That should be similar to a communication that allows it to confirm the target of the attack.

To attack, you need to hold it continuously. It may be used as a continuous connection after communication to maintain control at will, otherwise it will not be so intelligent.

As for the continuous injection of vitality through the grip, Shen Lang does not feel that it is because this Xianbei itself is very powerful.

This is similar to the gold scarab that needs to be held in order to manipulate the connection, or like the Fan Xueyu to contact the giant python through the voice.

These are assumptions, but as long as the patriarch's wrist is cut off and the cemetery is removed, it can be verified whether it is correct.

Shen Lang has just designed to use the eyebrows to achieve this. According to the plan just now, even if the broken wrist Xianbei will still spontaneously attack, then he still has time to dodge.

The current situation is different. Because of the slight deviation, the patriarch is now hit hard. In addition, he succeeded in making up the knife and breaking his wrist. However, Xianbei has completely locked him. It is too late to want to dodge. It is.

However, this is also in his plan!

If you want to consider dodging, then he just has to stop the continuous attack of the gods, try to get rid of it and leave.

But he can have serious chances of injury or even killing the patriarch. He does not want to miss it, even if it is likely to be sucked in by Xianbei.

Big deal will come again!

He has successfully detached from it before, and he will use it again in the same way.

The patriarch's heart was devastated, and the remaining dog gods were more than enough to deal with him.

Now, it is the moment to witness the miracle...

When the wrist was cut off, the great suction of Xianbea suddenly disappeared, and the sigh of the sun that was about to be sucked in was relieved.

Hanze Xianbei, it really needs the owner to control in real time.

This effect, Shen Lang is very satisfied, and immediately made an action, go directly to win the Xianbei!

Hanze Xianbei and the Tiantian Tower seem to be the same kind of magic weapon, but in fact the effect is still different.

The advantage of the tower is not to absorb the enemy, but to concentrate all the spiritual objects such as the absorbed people and objects, and finally become a Dan Wan.

At a certain level, it is dangerous to use to attack the enemy. The effect is not rational. It should be regarded as an auxiliary artifact. It is an alchemy.

Hanze Xianbei, from the current situation, obviously has a very strong aggression, that super strong suction, even Shen Lang and the dog ***** can not deal with it, can be seen.

Therefore, Shen Lang has already had a strong interest in this artifact, which is a completely different thing from the water ripple rod.

The new patriarch of Hanze has been hit hard now, but it will not become a big problem.

But it's not a kid, of course it's all!

The memory of this new patriarch also needs to be read!

It's just that you must first win the fairy, and then this guy is an artifact, a spiritual thing, in case you have broken into the waters of Hanze?

Shen Lang can now adapt to the cold waters, and he is not sure to find it.

Besides, the new patriarch and the dog god!

At that moment, Shen Lang does not need to think about and hesitate. The direct and best choice is to catch the Xianbei, and then whatever it reacts, first income into the storage space and then say As for how to manipulate it, and its specific origin, role, etc., just wait for the memory of the Hanze patriarch.

The Hanze patriarch originally wanted to go through the same with Shenbo, but after feeling that his wrist was broken, he realized that it was over!

Before he could wait for another hand to accept it, Xianbei had already been taken away by the sinking waves in front of him.

At this time, his body was pulled a few inches lower.

His golden scales have arrived, and the tongue of the dog ***** is cut, but the tongue of the dog ***** and the poisonous grass above it are also invading his body.

The tongue of the dog ***** is scarred by a lot of gold scales, but because it is too big, it is not completely broken.

After the devastating blow, his control of the scales and the speed of his power were also sharply reduced, which also reduced the degree of injury of the dog god.

At this moment, the sinking wave of Xianbei has already pinched the head of the patriarch, and under his weakness, he directly suppressed the past!

Chapter 2445 - Escape route

Shen Lang's personal mental strength is very powerful, and he will not even lose to the cold autumn and dog gods higher than his realm.

But this new patriarch of Hanze is also very powerful, which is the fusion of the ancestor Yuanshen and the patriarch.

Because of this, even if there was no integration before, it was only attached to the patriarch, and Shen Lang did not want to read his memory.

When he was clear about his condition, he quickly treated all the mermen, and with the artifacts of Hanze Sangbei, he really couldn't think about it.

But step by step to the present, with this result, it is a natural thing.

Shen Lang just won the Xianbei, and immediately suppressed the patriarch, they were all completed by the way. And at this point, it must be suppressed.

The patriarch's heart was blasted, cracked to the clavicle, and the wrist was broken. This was a constant heavy blow and had a huge impact on his body and mind.

And he broke the expectation that he had the same, even the scallops were lost, but it was a disruptive blow to the spirit.

The poisonous grass of the dog ***** is still invading his body, still releasing venom.

All of this adds up, so that the current patriarchal state is extremely poor, and the Shenlang has almost no influence. At this moment, it is enough to pay attention to the patriarch and to suppress it with all strength.

The effect is very obvious, and the consciousness of the new patriarch is quickly suppressed.

Shen Lang did not rush to read his memory, but to fight the iron, further suppression, directly to keep his gods firmly, so that he did not have the opportunity to escape.

When it was controlled, the scales also lost their offensiveness.

Shen Lang is welcome, first collect all the golden scales to avoid the dog ***** may be attacked again. Then continue to further suppression!

The reason why I don't relax is because this is to deal with the ancestor's consciousness of the ancestor, which is much older than his predecessor. Maybe it will be deliberate relaxation, waiting for anti-kill!

Just like Simbe's first wave of suction, it reached a very high level, but it did not let them fear. When they went to squat, this played ten times the true power and could not escape.

Now that the other side is in a weak state, he is directly and fully suppressed, but what if it is disguised?

So you must be sure to be innocent!

The dog ***** is also relieved at this moment.

It was a great relief for the battle just now, because it also understood the whole process and knew that it played a key role. If it is not that it entangles the other party, it is difficult for Shen Lang to get close and it is difficult to hit the other's heart.

At this time, the behavior of Shen Lang, let it also know the intention of Shen Lang.

It did not dare to care about it, and it was still highly alert and continued to cooperate with Shen Lang.

Its cooperation is to continue to destroy the patriarch!

Now the patriarch has been suppressed, and the defense suddenly weakened. The former poisonous grass was still blocked by the scales, but only slightly found the entrance between the gaps.

Now that there is no defense, it will be much better. It can intensify the venom attack along with the previous intrusion, and further numb the body of the patriarch through the venom.

At the same time, its body has returned to its original shape, and the big mouth is matched with the retracted tongue, and the lower half of the patriarch is bitten.

If necessary, just crush your legs!

The defense of Shen Lang is not unreasonable, and it is not useless.

The main body of this new patriarch is the ancestor Yuanshen. It is an old guy who doesn't know for many thousand years. From the beginning of a ruin, to the fact that he has a body and merged into a new person, it is a gradual process and a personality. The process of gradual improvement.

Older people tend to be more reluctant. And those who have a hard time and have a chance to become a person will be more cherished; even those who have the chance to resurrect will not be mentioned.

Shen Lang himself has had such experience.

This new patriarch, can be regarded as all three are satisfied, so he cherishes life more and more.

If he is not sure, he will not come out to deal with Shen Lang, and he will not think about destroying the Shen Lang and then catching up with the barbarians.

After successfully winning the house and healing the body of the patriarch, he would pretend that he did not know the situation here and could not directly come out.

The result is now beyond his expectations, but can he be willing to wait?

When Shen Lang continued to attack him, and after Xianbei was captured, he realized that he had no chance to turn over, and even had no chance to go with the other party.

According to his urine, it is natural to think about how to save his life.

The flesh is already like this, it can't be saved, and it doesn't make sense to keep it. So the best way is to leave and re-find a flesh!

And now, under this circumstance, who is the most suitable?

Shen Lang is his goal!

He expected that Shen Lang would definitely absorb his mental power and read his memory. This time is his best and only chance!

Unlike the patriarch, Shen Lang will defend him, nor is it homologous, it will be more difficult.

So he first fully protected himself!

His way is to give up rebellion and let Shen Lang suppress and absorb his spiritual strength. As the other side relaxes, he mixes into the past.

He has enough patience. As long as he can survive first, he does not mind being lurking for opportunities. For years and decades, it is nothing to him.

Therefore, the suppression of Shen Lang, almost did not encounter any resistance, giving him the feeling, just like the patriarch suffered a heavy blow, has collapsed into a military.

His continued suppression of all efforts was further confirmed until the patriarch's body and mind were completely controlled.

Under the premise of ensuring safety, Shen Lang naturally began to read his memory, in order to achieve the effect of this change, but also began to absorb his spiritual strength.

The patriarch did not have the slightest resistance is a complete suppression, he also gave up all, just keep a glimpse of the pure god, as long as he can let him into the body of Shen Lang.

When Shen Lang read the memory, he began to accelerate the moment of absorbing his mental power, and the ancestor Yuanshen immediately followed it naturally!

This is the same effect as being absorbed, but one is active and the other is passive.

After being absorbed, it will be further refined by the other side, and his initiative to enter is to maintain autonomy.

For example, he is like a pool of water, destined to be dried. Then he turned himself into a drop of oil. If the water continued to dry, the remaining oil was obvious.

In the process of releasing water, when the water discharge begins to increase, the oil will actively mix and pass, and it may be safer.

The oil is placed in a new big pool, and it can still maintain independence.

Now it is a high-prepared Shen Lang, and I noticed this drop of oil!

Chapter 2446 - Wipe out

The high alert of Shen Lang is all-round, and it is a hypothesis – it should be said that he will definitely find opportunities.

The new patriarch's physical body is already like this, and it is destined to be unable to escape. What can be done is undoubtedly the way of the soul of the Yuanshen, which he has had successful experience.

If you flee outside, on the one hand, there is no mermaid nearby to let him possess, whether it is to fly directly to the soul of the gods, or to attach to weapons and other foreign objects, it will be more obvious.

At this point, Shen Lang is confident. He and the dog ***** are here. As long as there is a little trace of movement, they will be noticed.

It means that this road is more difficult to go, it is more likely to be another road!

The other way is to be attached to him, or to the body of the dog god.

In the presence of this speculation, Shen Lang also gave the dog ***** an idea and made it fully prepared.

Originally, he cooperated with his dog god, and naturally let the contact patriarch's body carry venom, and the spirit is also highly alert, so as not to be possessed.

After Shen Lang confirmed that he was completely suppressed, he immediately began to read his memory!

For him, the memory of the patriarch means at least part of the memory of the ancestors of Hanze and the memory of the contemporary patriarch. These are far more important for understanding the ancient cold world than the wind and autumn.

In the process, he also joined the spiritual power of the patriarch.

If you don't accept it, it will lead you out of the hole!

This state is to let the patriarch feel that he is immersed in the harvest, and thus more likely to take advantage of this opportunity to show his feet.

In short, Shen Lang is better to let the patriarch choose him as the target of possession. In this case, he still has greater confidence. In case it is attached to the dog god, the dog ***** may not have so much experience, and he is not good at helping.

However, the integration of dog gods and poisonous grass seeds should not be so easy.

His prediction is no problem, the new patriarch hatred of him is the biggest, the identity of his sand country lord, for the Hanze patriarch, also has the role of sand country information.

Compared to the behemoth, the other party is more willing to possess him, especially he created a condition.

At this time, the new patriarch almost returned himself to the ancestor Yuanshen. When it wanted to mix into the absorption of Shenlang, it was acutely perceived by Shen Lang.

In an instant, Shen Lang quickly "wrapped" it!

In the analogy of oil and water, the ancestor Yuanshen is to let himself not be swallowed by refining and refining, and can maintain autonomy. As long as it is low-key lurking, there will be opportunities in the future.

But for Shen Lang, his current state is more special!

It is not easy to find a drop of oil in a pool of water, but it is definitely easier to find a drop of water in a pool of water.

And he was already ready. When he discovered this “a drop of oil,” he immediately covered it and made a separation, so as not to let him escape.

In this respect, Shen Lang is actually experienced.

There are more people who want to take possession of him, including the dragons in the Dragon Valley and the ancient humans.

These dangerous experiences have created the extraordinary strength of his current spiritual strength, and he is also very keen and has a wealth of experience.

In fact, when I was in the temple, when I absorbed the golden light, Shen Lang suspected that the ancestor of the Hanze ancestors would be mixed in the golden light, would it be that I wanted to enter his body.

At that time, it was already highly alert and screened once, but at that time it gave up all the golden light energy and attached it to the temple.

This time, it is not so lucky.

After Shen Lang has locked him up, it is even easier, because this is his home game!

Of course, in addition to the advantage of home game, there is also a disadvantage, that is, the opponent's arbitrary attack, is to him to bear.

However, the ancestor Yuanshen wanted to escape this time. He thought that he was as low-key as possible to lurk into the body of Shen Lang, so he has given up most of his mental strength decisively, and he exists in the way of a god.

The advantage of this is that it is safe and has something to offer. He can be desperate for the opportunity of resurrection in the future. Waiting for the future of Shen Lang to be seriously injured, or to repair the key moment of the upgrade, he is even weak, can also seize control.

But now it won't work!

Once discovered, his superiority is gone, and only a small part of the energy of a **** is directly the object of being crushed.

And Shen Lang is not only highly valued, but also very decisive!

He would like to annex and merge the “owner of the sand country”, but Shen Lang does not need to integrate the new patriarch. Valuable memories are already in place, and mental energy can directly absorb refining.

Therefore, after discovering the ancestor Yuanshen at the moment, it immediately crushed the past with the highest pressure, without mercy.

When the ancestor Yuan Shen sensed that he was isolated, he already knew it was finished.

He let himself give up his resistance and gave up most of his mental strength, just to have a chance to cover himself.

Once it is discovered, it means that it is unable to escape!

He was also a very decisive, and at the moment he was about to be crushed, he quickly released an idea to be able to attract the sinking waves.

“You know that I am the ancestor of the Hanze people, I can tell you some ancient treasures that have already been lost!”

Such a procrastination means that Shen Lang will ignore it and continue to crush the past without mercy!

“I really know a lot of treasures! Very rich treasures!”

The ancestor Yuanshen began to panic. He used to see Shen Lang's interest in interests Whether it's a corrugated rod or a chilling pearl, it's a cold rush that just took the risk of life. Crackers.

I thought that throwing out some of the lost ancient treasures should be able to make this sand country take the initiative, but did not expect to completely ignore it.

For his almost screaming general thoughts, Shen Lang still ignored it.

Soon, the ancestor of the first ancestor was directly refining!

This is the essence of the ancestor's demise, but it is not powerful, but independent spirituality. His main mental strength is still in the flesh.

Therefore, Shen Lang quickly refining him, which is to erase the thoughts left by the ancient and powerful, and the rest of the spiritual power, which was originally in his suppression, can be slowly absorbed. It is.

This wave killed the Hanze patriarch, the dog **** also helped a lot, but also the tongue was hurt by the gold scale, Shen Lang himself has harvested a huge, of course, will not give the dog God meat.

So after extracting most of the mental power, let the dog **** eat before the body of the Hanze family did not completely collapse.

Chapter 2447 - Counting harvest

This is still in Hanze, first ruining the ancestor statues of others, and then destroying the patriarchs of the people, the entire mermaid family may be desperate.

Although it is really desperate, Shen Lang is not afraid of them, and may even be a prey.

But he is not a magical way after all, and he will not avoid such a situation. If he can avoid it, he will avoid this situation.

Therefore, it is not appropriate to stay here for a long time. After absorbing most of the mental power, the dog **** directly swallowed the body of the patriarch and then left Hanze from the island together.

They are looking for the cold autumn, coming out of Hanze, of course, they still have to continue on the road.

Shen Lang has a new idea.

I thought about keeping words and maps on the ground before. In this case, Gao Hanqiu saw a general idea, such as an appointment to the sand congress.

But it must be very large to be perceived, and even if it comes to Hanze, it may be in any direction, and the chances of being discovered are still very small.

Now I have changed my mind, not waiting for the cold luck, but I am attracted to contact him!

He was directly a small stone, quickly portrayed the text and map through the sacred armor, and then injected his mark on the stone!

This is equivalent to leaving his traces, and it is very strong.

If it is someone else, such as the mermaid of Hanze, you will find that the stone is slightly energetic and can't find anything.

However, if the cold autumn passes through this place, even if it is far away, it should be able to sense his breath.

In the realm of the cold and autumn, you can explore a great range. Even if you can't reach the thousands of miles under the golden mask, hundreds of miles are completely without problems.

With his discretion, in places like Hanze, it should be surrounded by a circle, and it may not be as direct as a god.

So the possibility of being aware of it will be great.

Such a stone can be made in a lot of pieces at a time, and then to other places like settlements, and then marked.

But in fact, I can't do this because he has a rough map, but there is no cold autumn. So after somewhere, you should plan a route to the sand country based on it.

The dog **** is a wound that has been wounded by the golden scale on the tongue, but for its realm, it is similar to the wound of the oral ulcer level, and it does not have much influence, and it will recover quickly.

And it has eaten barbarians before, and now with the Hanze patriarch, it is also a huge gain.

So after Shen Lang was completed, it was a Gandang mount, letting Shen Lang sit on its back, and he followed the direction of the command and walked.

Shen Lang is not eager to reinforce all the spiritual power of the patriarch, he now needs to sort out all the harvest, and the memory of the patriarch!

His harvest is two-fold. On the one hand, it is the harvest of the real thing, and on the other hand, it is non-physical.

The harvest of the real thing, including the previous water ripple rod, the enchanting pearl, the sun beads, and the essence of the heavens that they contributed again, and the final sage of the zealand, the patriarch gold scale.

Non-physical is the memory of the patriarch, as well as his spiritual strength.

The essence of the heavens and earth does not need to be verified, the sun beads have been fed to the heart of the fire, and there is one left, and the two of the beads of Hanze have not been moved.

Water ripple rods have also been used.

After the collection, Xianbei was included in the storage space, fearing that it would run away. Shenlang would not take it out before he could figure out its condition.

The role of the gold scale has been seen, probably also knows what is a thing, but the specific control, or need to be integrated after the patriarch memory.

Without the patriarch, it is already equal to the ownerless, and Shen Lang can absorb it, but I don't know if there is no body of the patriarch, and there is no such effect.

All the key points are on the memory of the patriarch.

This is what needs to be done right now.

Shen Lang did not have a specific direction to go, came to Hanze, completely random.

Now, there is already a clear goal – Shibuya!

You don't have to be a barbarian, but at least you have to put a Peugeot over there. If there is a random arrival in Shibuya, you can have a clue.

Therefore, Shen Lang was sent to the dog ***** by this route, so that it would run in the direction of Shibuya.

Shen Lang himself began to integrate the memory of the patriarch.

It is a fusion of memory, of course, it is much faster than refining all the spiritual power, and the memory of the patriarch here is more energy and time, because he is much more than Meng Yu and Feng Qiu.

The ancestor Yuanshen and the patriarchs were originally two different memories, but the other party has merged together, so now the understanding of Shenlang has not been separated from each other.

However, depending on the timeline and the sense of time, it is still clear who knows which memory belongs to whom.

Of course, it doesn't matter who is it. Now it is already the memory that Shen Lang can use.

Because there are too many memories involved, Shen Lang can't recall it one by one. I can only recall it according to the key I want to know.

The first thing he has to figure out is how did the ancestor Yuanshen do it?

Because he and the dog ***** did not take long, then there was a conflict with the barbarian, and then they went to the space of the book first, waiting for the barbarian to chase in.

In the end, when they both fought, Shen Lang and the dog ***** reappeared.

For such a period of time, the ancestor Yuanshen, who was attached to the patriarch, not only succeeded in occupying the patriarch, but also had a lot of strength, and it seemed to be better to be injured by the gold behead.

Even if it is Shen Lang to do should also be able to occupy the fusion of the patriarchal body, it is already very good.

Now he first recalled this, on the one hand to satisfy curiosity, on the other hand, if there is really a flaw, master this, it will be a life-saving effect for serious injuries!

In the memory of the new patriarch, after paying the sacred pearls to let them leave, they even sent the mermaids directly to the cold waters, belonging to a restricted area of the patriarch.

Some of the mermaids are busy repairing the road leading to the shrine of the island. Some of them replenish the remnant temple, and some continue to perform their duties. For example, the wind will return to the guardian area of the welcome department.

But those are arranged by the middle and high level, and do not need the patriarch personally. Everyone knows that the patriarch was injured and no one dared to bother him.

The patriarch has been in the bottom of the restricted area, until the barbarian came in, and everyone did not dare to alarm him, calling him to save his life until he went out.

In the time when the bottom of the water is restricted, it is the key to the transformation of the patriarch!

Chapter 2448 - Secret of the fairy

The restricted area at the bottom of the water is in the depths of the cold waters on the edge of the temple.

The speed of cultivation there can be faster, get more energy, and the tradition has always been exclusive to the patriarch.

Spread to the present, just knowing such a role, but why it is the strongest energy, but a bit fuzzy, just speculate that it is the natural energy of that area.

The ancestor Yuanshen knew the original.

It is because of Xianbei!

Xianbei can be used as an artifact, but it is a spiritual thing. It is the unique thing that was born in this cold.

It absorbs energy and can concentrate energy.

When the ancestors came here in ancient times, in addition to the beads of Hanze, they also discovered Hanze Xianbei, which are also named by him.

That Xianbei was raised by him, but at that time he was a super powerful and powerful person, and he did not need to borrow the Xianbei weapon.

So I have been raised in a place that allows it to gather energy and feed it.

Because I didn't use it very much, I also forgot to confess this when the ancestors died.

Therefore, the mermaid family behind, just because the ancestor mentioned Sinbe, but knew that there was such a thing, but did not know where it was, how to control it.

That place would be regarded as a restricted area exclusive to the patriarch, and it was also because it was placed there and cultivated, and then passed down from generation to generation.

Now the ancestor Yuanshen himself is attached to the patriarch, and after knowing these situations, it is convenient to use this.

He sneaked into the restricted area directly, and continued to deepen, looking for the place of Xianbei.

He re-attached himself to the patriarch with a sacred god. After many years, Xianbei certainly could not recognize it. But he used the contact method of the original contract, like a spell, to reconnect with Xianbei.

Xianbei is completely unaware of how long it has lived. When the ancestors came here, they still don't know how long they have lived.

So always live to the present, or continue to live, it will be like this.

Of course, the peculiarity of this spirit makes it possible for the Shouyuan to be very long, but the big factor is to be in this cold.

In addition, it gathers energy and absorbs energy. It is also unknown how long it takes for the years to form. It does not cultivate itself.

It has the ingenuity, but also because of the ancestors of Hanze, but it has not been able to teach it to cultivate. So no matter how many years have passed, it is a great growth, but it cannot be equated with human time.

But even if it does not mean that mankind has practiced for tens of thousands of years, it is also accumulating a lot of energy!

After the ancestor Yuanshen communicated, it borrowed its energy. Many of these energies are contained around the Xianbei, and the more powerful energy in the restricted area above the water is actually the overflow of Xianbei here.

The ancestor Yuanshen directly absorbed the energy of Xianbei here. It is powerful and does not know how many times, plus he is the ancestor of the ancestors, many of which are beyond the reach of the current patriarch.

In such a unique environment, he used the help of powerful external energy to merge the soul of the patriarch on the one hand, and quickly repaired his injury on the other hand.

After the fusion, the strength of both spirits, and a quantum leap, coupled with the experience of the ancestors, let him quickly evolved the golden scale, and suddenly got a big growth.

This is the case. He still feels that he is not enough. He can also understand the situation on the island. What he needs is a little more time. The barbarians will all be destroyed!

After the dark waves came again, and changed the above situation, until this time, the new patriarch identity, he has also completed a staged repair, with strong self-confidence.

Seeing that the barbarian is already gone, can't let Shen Lang go!

He must revenge, first destroy the swell, and catch up with the group of barbarians.

After all, time is too short. If you give him a little more time, he can evolve stronger and be more secure.

But time is not waiting for people. In order to insure, he directly uses the spell of communication to bring Xianbei out from below.

In the latter case, if Shen Lang encountered it, he would be able to get in touch.

Shen Lang understands that he relies on the environment and energy. In the final analysis, it depends on the fairy.

The method of Xianbei's control is also complete in his memory. After recalling it, Shen Lang has already mastered it clearly, but there is still no actual exercise.

To learn more about the information about Xianbei, it was discovered that it was the first ancestor. For the specific origin of Xianbei, the understanding is limited.

According to his own experience, Shen Lang estimates that Xianbei is a level of heaven and earth with Leiyuan, but it is breeding here in Hanze.

Even if it has no manipulation, it has the effect of gathering energy in Hanze, and it is used to absorb the enemy. This is a skill developed by the ancestors, not necessarily the only skill!

This makes Shen Lang full of expectations for Xianbei, and perhaps can develop more skills.

The only thing that is a little worried is that if you leave Hanze, will it have any effect on it?

For example, will it not survive as the average shellfish leave the water? Does its ability to borrow Hanze to play it out?

However, this only makes Shen Lang a little hesitant, and then it is not in the heart.

Lei Yuan can follow him to wander around the space!

Besides, this guy almost had their life before, and it will cost it a little, not too much.

In addition to Xianbei, in addition to the things that Shen Lang attached to, I also thought about memories one by one.

The water rippled rod was used before Shen Lang, but it is simply a weapon, and it is completely unacceptable.

In fact, this is the magic weapon of Hanze's ancestor refining. Inherited to the present, it can really be regarded as an ancient artifact.

The simplest level of hardness is also the sword that can withstand the invincible king.

The contemporary patriarchs, in fact, are only a small part of the ability, and many have been lost in the long years.

The ancestor of the ancestor is naturally able to make up the use of these lost.

In other words, now Shen Lang can only use the water rippler to surpass the previous patriarch! Of course, he is not a mermaid, he has not practiced the practice of chills, etc. These will be very limited.

In short, this is a better artifact than he expected.

As for the Pearl of Hanze, the effect is the same as that analyzed by Shenlang. It is pure Yin to cold. For the average person to take it, it is not only unhelpful, but it is extremely dangerous. This is a good thing for the mermaid family. .

Or it should be said that the mermaid family that has been born here is itself evolved in adapting to the cold, including everything in the cold waters.

Chapter 2449 - Mermaid

For the time being, the Pearl of Hanze is not used.

Of course, Shenlang will not be regarded as rubbish, and it does not mean that there is still a chance to trade in Shibuya, just keep it. When you return to Earth, you can give rain, for her physical condition, for their ice palace. The heart is all treasure!

There is another key to the key now, and that is the golden scale.

Gold scales originally seemed to be the essence of the fish scales on the mermaid, which is more effective than the average scales.

He collected this thing. The main thing at the time was to prevent them from continuing to attack the tongue of the dog god. Secondly, thinking about it might have something to do.

But considering that this is the mermaid patriarch, after the patriarch's body is gone, it is likely to exert no effect.

So I didn't expect anything. After recalling the memory in this area, there are a lot of situations that surprised him!

The origin of the golden scales is actually related to the mermaid family – this is the origin of a mermaid family!

Here Hanze was handed down from this ancestor, but in fact it was not one of them at the time, but he was very powerful, created such a settlement, and then brought a little ethnic group, where he multiplied to the present race.

The ancestor, only respected him as the strongest power.

Their origins are not ordinary. They seem to be inhuman, like fish and fish. They are in the memory of the first ancestor Yuanshen, and there is no too detailed impression.

But one thing is that they all have gold scales. And the legendary gold scales are enough, it is possible to make them fly dragons!

The one who had the most potential at the beginning was the ancestor.

But because the ancestor of the ancestor is only a glimpse of the ancestor, it is not the idea before dying, so what is the end of the ancestor, and whether there is enough gold scale dragon, he himself is not known.

According to the memory of the contemporary patriarchs, the generations passed down from generation to generation, and no one has ever reached the level of the first ancestor.

The evolution of gold scales has also become a legend of old legends.

This generation of patriarchs, of course, his dream is also able to cultivate gold scales, to reach the realm of the ancestors, even if the dragon is a legend, it is close to the legend.

However, it is only limited to dreams. He did not cultivate himself. It was the power of the ancestor Yuanshi plus the power of Xianbei, and it was only after the integration of his body.

These gold scales are the things of the mermaid, but they can be separated from the body at any time, and they can be used to attack the defense as you like, and there are many magical uses.

But now there is no flesh of the mermaid. If there is pure gold scales, there will be only simple qualities such as sharpness and hardness.

This is of course a pity, but it is not a pity. Originally, Shen Lang was not a mermaid. He could not leave a patriarch in order to use the golden scale.

So now these can still have value in use, it is not bad, just use it as a weapon.

Of course, the specific can not be used, and which can be used, all need to be manipulated before they can be confirmed.

What surprised Shen Lang, of course, is their origin.

Originally based on the impression of the mermaid family, it is natural that this is an alien group caused by the genetic mixture of the human and the fish.

But now I know more. This mermaid family is not so simple. They are not only the genes of the human race and the fish race, but also the genes of the dragons!

Or maybe it's another state, they are not mermaid at all, but a human dragon!

This ancestor may have taken the surviving tribes and did not know where to escape to Hanze. The sinister danger of the ancient cold world, the harsh environment of the poor mountains and waters of Hanze, is used to rely on the defense of the Scorpio.

For security reasons, so don't let future generations know so many secrets, so there is not much to say about the situation of the dragons, only a clue to the golden scale dragon.

Nor did it reveal the identity of the human dragon, but the mermaid family.

The descendants of the descendants, such as people and fish scales, can swim in the water, can turn the fins, etc., naturally, when they are mermaids.

And these may be the changes they made to preserve their lives and continue their descendants, and let them remember that they are mermaids from generation to generation.

Although this is an absurd association, it is not impossible.

Because on the earth, the dragon is a legend of the ancient times. On the mainland of the island, the dragon is also the legend of the ancient times. There is also a dragon family behind it. It is also an ancient legend, and it was destroyed by the various tribes in the funeral valley.

Imagine if, in the age of the ancient times, in the ages after the dragons and the dragons, there were dragons and human races that progenited the descendants, wouldn't it be the geeks of all the tribes in the world?

In the era when the Lianlong people are going to kill, it is even more impossible to give people a space to survive.

From the aspects of their size and ability, as a human dragon, all aspects are far from being compared with the dragon, which is even more dangerous.

It is possible to flee desperately, to escape to the world of gas, to hide in places where the various ethnic groups cannot reach, to change their appearance, to change their living habits, and so on.

Of course, this is only a guess, and it may be just descendants of the Terran and the fish. Just what fish is it, can it be so powerful?

However, in the end, this is the surprise and association that caused Shen Lang. Whether it is a mermaid or a human dragon, or a dragon or a fisherman, it has nothing to do with him.

I came here today because the dog gods came here randomly to chase the bluebirds. After leaving here, they may not be coming back. After Hanze, they will continue to live here quietly.

In the past, it is not known how many thousands of years ago the ancient past will not affect modern. Even if they came from other worlds, they are now part of the ancient cold world. This is their home.

Even if you have evolved enough gold scales and possessed the skills of the dragon, no one will pursue where to come from.

In this regard, Shen Lang searched for the memory of Han Ze's ancestors. At least the part of the memory that this ancestor Yuan had here has no clearer results.

In addition to these memories of actual gains, there is still a part of the memory that is about the world.

However, the situation in the ancient cold world is a bit messy and contradictory.

This is related to two aspects, that is, the world in the memory of the ancestors, and the world in the memory of the contemporary patriarch, is not the same. After all, it is too long, the memory of the king of the country may be different.

In general, there are still gains, so that Shen Lang can have a rough understanding of the different settlements in the ancient cold world.

If you want to go to Shibuya and go to other settlements, there is a good reference.

Chapter 2450 - Scared bird

Shen Lang is also associated with the relevant memory, of course, for some insignificant, useless memory, of course, will ignore it.

For example, the ancestor of the first ancestor, in the extremely long years, has memories of generations of ancestral gods from generation to generation. These have no effect on Shen Lang, and they have to be screened one by one.

The dog **** continues to hurry, and he can safely absorb some of the spiritual power of the ancestor Yuanshen.

Shen Lang relies on the memory of the king of the country and the memory of Fengqiu. He has a slight impression on Shibuya, and Mengxi's memory has a mature route.

Meng Hao had originally come to Hanze personally. After returning to Shibuya, he once again came to the public. Naturally, there is a mature route.

Shen Lang gave this memory to the dog god. The dog **** follows the path of memory. It is comparable to the navigation of the holy armor. It does not need to think about it.

The dog **** is screaming at the waves, in fact, it is the problem of not letting go of the following, otherwise the sheer weight is nothing.

The one thing that hurts is the tongue. It doesn't affect what he plays. The whole speed is still very fast.

Both of them are purely holding on to the road, just to get to the valley in a hurry, can not find the cold autumn and leave a mark, and then run a few more places.

If the speed is fast enough, the possibility of finding them together is even greater.

However, because the route of Meng Pu was used, Meng Xi, who had broken his arms, led the barbarians back, and naturally followed the previous route.

In addition to Meng Yu, some of the remaining barbarians are injured, and their team is bigger, the overall speed is of course slower than the dog god.

Coupled with the battle between Shen Lang and Han Zhe, the speed is very fast, and the time of delay is not too long.

The result is halfway, catching up with the barbarians who desperately retreat to Shibuya!

With a golden mask, Shen Lang can sense the range of thousands of miles, and found the barbarian early when he was not close.

But he is going to go this route, and it is impossible to take a detour.

Moreover, everyone has dealt with it several times before. This time, it is even more difficult for Shen Lang to save them. Let them also give way. It is impossible to detour in order to consider the feelings of the barbarian.

Therefore, he only informed the dog ***** in advance, so that it does not need to deliberately provoke the other party, just cross the barbarian directly.

The dog ***** didn't feel this at first. He didn't feel it when he walked out for a thousand or two miles.

It estimates that the route of Shen Lang comes from Meng Pu, so it is speculated that they will meet them on the road. In fact, others may not follow the same road. Perhaps it is other routes that have already passed.

When it sensed the barbarian later, it was a big surprise!

The barbarians go ahead of them. They are full retreat after eating and losing. Plus, everyone is taking the same route. The distance is to add the speed of the opponent.

So from the beginning, everyone's gap is very big, and Shen Lang is clearly aware of it, prompting it in advance.

If it is in its behemoth world, it can also be done, because that is the world that it is most familiar with, and there are special methods that no one else has.

But this is a strange world, they come together, this only shows that the spirit of Shen Lang is very powerful!

This makes it silently admired. It is no wonder that from the gods to the patriarchs, from the barbarians to the immortals, they can't deal with him, which is too strong.

Shen Langben just gave it a hint to avoid unnecessary conflicts, but did not know to give the dog God great confidence!

Even if it is to let all the barbarians disappear, it will feel easy to solve.

The speed of the dog ***** is faster, but because the barbarian is also retreating with all his strength, if he catches up, it is necessary to take a little more time to deduct the speed of the barbarian.

After the dog ***** sensed the barbarian, it took another while, and the distance was pulled closer, and the barbarian sensed them.

When it was discovered that the owner of the sand country was chasing after the beast, the barbarian was sinking in his heart!

No matter how they feel about Shen Lang, even if they hate it, they have to admit that he is strong.

The big elder's arms are gone, this is the ***** tip.

So at this point the other party chased over, everyone can analyze it, nothing more than two possibilities.

One may be the owner of the sand country. I feel that I have not got enough benefits. I want to catch up and kill them all, and take back the beads of Hanze.

However, this possibility is even smaller. If you really want to do this, then if you join the Hanze mermaid, you don't have to use so much power.

Another one of the greater possibilities is that the Lord of the Kingdom of Sand has not been completely settled!

Can mediate and let them go first, that is the mermaid who can hold the cold, but perhaps after they leave, the mermaid patriarch will go out!

He will come to this side, but also getting closer and closer, indicating that the speed is very fast, faster than their full withdrawal, it is likely to escape!

That means that the patriarch who can't beat Hanze, even the patriarch is chasing after him!

He did not flee back to the sand country, but came back to them in the direction of Shibuya, or they wanted to unite them together to fight against the Hanze patriarchs; or they led the Hanze patriarchs and let their barbarians come. Support the patriarch of Hanze and take the opportunity to escape.

No matter which possibility is big, the two possibilities have no benefit to their group of barbarians. It is nothing more than a strong enemy, and the difference between a stronger enemy.

They are like a group of scared birds. After discovering this, they don't need Meng to order the command, and all the barbarians are more desperately accelerating!

Originally they came out from Hanze, they ran all the way, and it was a bit tired after the road, and the speed will be a little slow, and it will be all right.

Meng Hao is of course very worried.

What if I get caught up later? There is still a stronger Hanze patriarch What should I do?

After being smashed by Shen Lang, he burned for many years of flaming blood, and it was extinguished. He would not think again about being equal to the patriarchs.

It is already a great luck to be able to take back most of the people who have passed safely.

This trip has damaged many ethnic groups, and he himself has been seriously injured. The safety of the patriarch is also more important. If the patriarch can't stand it, it is the moment when Shibuya lives and dies.

I just confessed to it inside, and after I came out, I was desperate to run with everyone, just for safety first.

Now this situation, let Meng Hao have to think of worse results, and then make a decision to sacrifice!

When he was caught up, he asked for mercy and pleaded, and placed the dignity of the following to protect everyone. When it is really necessary, sacrifice him and most of the people, and send the beads of Hanze back!

Therefore, when everyone is desperately accelerating, Meng Hao, who made the decision, gave the Hanze Pearl to another barbarian and entrusted him with the final task.
